On Old Creek

30,43.605N

085 50.943

An Ivory Bill flew across the Old Creek. I was looking for feedings and cays in the forest to the left and was looking low at the time. I saw something large flying across the creek from the corner of my eye. It appeared dark, but at that time I couldn't say for sure because it was in my peripheral vision. By the time I looked upward the bird had crossed the creek and was flying directly away from me. The bird appeared completely
