I have questions about testing.

How do I know if I need a test?

Who needs to be tested for COVID-19?
There are two reasons you should be evaluated by a medical professional and possibly tested for COVID-19:

- If you are experiencing symptoms of COVID-19 such as:
  - Fever (100.4°F or higher)
  - Chills
  - Muscle pain
  - Fatigue
  - Sore throat
  - Cough
  - Shortness of breath
  - Difficulty breathing
  - Loss of sense of taste
  - Loss of sense of smell
  - Headache
  - Nausea
  - Vomiting
  - Diarrhea
  - Nasal congestion
  - Runny nose

- If you have had close contact exposure to someone who has tested positive for COVID-19.
  - Close contact exposure is defined as being within 6 feet of someone who has tested positive for COVID-19 for 15 minutes or longer.
  - Testing is not indicated following a close contact exposure until at least five days has passed since the date of the close contact exposure—unless you develop symptoms.

How will I know if I have had a close contact exposure with someone who has tested positive for COVID-19?
- A close contact notifies you that he or she has tested positive for COVID-19 and informs you that you are at risk.
- You receive an alert from the Exposure Notification App that you have had close contact proximity to someone who has tested positive.
- A medical provider or contact tracer determines that you have had a close contact exposure and contacts you.

Do I have to be tested at the Auburn University Medical Clinic?
- No. You can seek medical care and testing at other locations if needed. Find a list of testing locations in the Auburn / Opelika area here.
- Mucus testing (which tests for active COVID-19 infection) is required to make clinical decisions.
How do I know if I need a test?

What do I do if my roommate or suitemate tests positive for COVID-19?

- If you live off campus, self-quarantine immediately and monitor your symptoms.
- If you live on campus, immediately quarantine, monitor your symptoms and contact the Auburn University Medical Clinic at 334-844-9825 or an alternative testing location to make an appointment to get tested.

What should I do if I find out that I have had close contact exposure to someone who has tested positive for COVID-19?

- Self-quarantine for 14 days
- Notify your faculty
- Attend classes remotely
- Monitor temperature at least once a day
- Monitor symptoms
- Do not leave home except for essential activities such as medical appointments
- Do not host gatherings or entertain guests in your home or dorm
- Do not interact with anyone except immediate family or roommates
- Maintain 6 feet of distance from other people
- Wear a face covering when around others
- Wash hands, use hand sanitizer, disinfect high-touch surfaces
- If symptoms develop, seek medical care for evaluation
