August 2019

## Facilities prepares for new semester

Facilities showed out in force during student move-in days for the 2019 fall semester.

A total 103 volunteers helped more than 2,000 students get settled in to their dorm rooms, all while giving their parents a true taste of the Auburn spirit in the process.

Year after year Facilities volunteers have made moving in to the South Donahue residences easier for freshmen and their parents. By unloading students' items and carting those items to the appropriate rooms, what it means to be a member of the Auburn Family is imparted before they've even gotten to a classroom.

Without the efforts made by Facilities each year, Auburn University would not be ready for its students. Whether cutting grass or moving in, it's a team effort.

Thank you for your dedication to Auburn's students!

## Recycling welcomes students to Auburn

The Waste Reduction and Recycling Department have had their work cut out for them in welcoming new students to Auburn University.

Through their annual Binder Giveaway and as a sponsor of the Sustainability

Picnic and Get Rec'd, the group have hit the ground running on making sure students are aware of the value of recycling, both to the campus and the greater Lee County area.

In total, more than 350 binders

were given away to students on Haley Concourse, and the picnic and Get Rec'd events led to numerous giveaways and information provided to thousands of students, thanks to Manager Joan Hicken and her crew!

## Campus ready for football season

*The campus is geared up for football season, with Facilities employees making all the precautions necessary to have a successful year on the Plains! Auburn's first game is Saturday, Aug. 31, versus the Oregon Ducks in Dallas, TX.*

## New Facilities video highlights campus construction

For the first time, Facilities Communications created a regular Construction Update through video only.

To reach a broader audience and show more people the value that Facilities brings to Auburn University, the August Construction Update was distributed online through YouTube and various Facilities social media accounts.

The video showcases various projects which were recently completed or still are under construction.

From the recent completion of the Brown-Kopel Engineering Student Achievement Center and South College Street Parking Deck to the nearing completion Graduate Business Building and Jay and Susie Gogue Performing Arts Center, the video highlights many of the projects that will soon find students filling their halls and instructors teaching the next generation of leaders.

To see the video and other videos produced for Facilities Management, head to [www.youtube.com/AUFacilities](http://www.youtube.com/AUFacilities).
