Approved Date:	1/1/1900 12:00:00 AM
Legacy Date Last Edited	5/3/2022

JOB FAMILY AND FUNCTION

Job Family:	Veterinary & Animal Care
Job Function:	Laboratory Operations

JOB SUMMARY

Performs laboratory procedures involving histological tissue preparations, photochemistry, and immunohistochemistry, and assists research associates with special projects and research activities.

RESPONSIBILITIES

- Prepares and processes tissue samples for routine histologic techniques to be examined under a microscope by a pathologist. The histologic techniques include the following: fixation, processing, embedding, microtomy, and staining of animal tissue for evaluation by a pathologist.
- Performs duties related to the running of a laboratory including ordering supplies, complying with chemical inventory and hazardous waste protocols, completing necessary risk management and other training, routine cleaning and maintenance of equipment.
- Performs clerical and recordkeeping work including accessioning of specimens, inputting data into a laboratory management system, assisting pathologists and residents with grossing and trimming of specimens, documentation of specimens, and other laboratory recordkeeping.

The responsibilities listed above show the typical duties for jobs in this classification. Actual tasks may differ depending on the department's needs. Other similar duties may be assigned with discretion of the supervisor. Not every duty will apply to every position, and the amount of time spent on each task can change based on department needs.

SUPERVISORY RESPONSIBILITIES

Supervisory Responsibility	May be responsible for training, assisting or assigning tasks to others. May provide input to performance reviews of other employees.
