**JOB FAMILY AND FUNCTION**

Job Family:	Facilities, Maintenance, & Operations
Job Function:	Facilities Services

**JOB SUMMARY**

Serves as the University's senior-level engineer, providing strategic focus, guidance, and functional (as opposed to execution) oversight of all institutional engineering systems and functions, assuring effective stewardship and sustainability of the University significant facilities investment.

**RESPONSIBILITIES**

- Serves as Auburn University Facilities Management Authority Having Jurisdiction (AUAHJ); acts as liaison with state, county, and local authorities, provides plan reviews, conducts construction inspections, and grants AU Certificate of Occupancy as warranted.
- Leads design standards and plan review processes as a part of the overall quality control/quality assurance programs; develops, oversees, and maintains a systematic process for reviews.
- Coordinates with other entities on campus regarding security system requirements for campus facilities and oversees the development of continuous improvement plans for existing systems.
- Directs and leads the assessment, reporting, planning, and management of laboratory space on campus, to include developing plans to systematically renovate existing lab space.
- Manages the systematic development and documentation of a Repair and Renovation (R&R) execution plan to ensure funding for the repair and maintenance of university facilities is allocated consistently with the direction provided by university leadership.
- Directs and oversees a building commissioning program aimed at ensuring efficient building operations, maintenance cost savings, and occupant satisfaction.

**SUPERVISORY RESPONSIBILITIES**

Supervisory Responsibility	May supervise employees but supervision is not the main focus of the job.
----------------------------	---
