JOB FAMILY AND FUNCTION

Job Family:	Information Technology
Job Function:	Software Development Test Engineering

JOB SUMMARY

Under minimal supervision, the Senior Quality Analyst will oversee quality activities for projects and enhancements, from inception to promotion to production. This position leads and/or assists teams with testing and defect management efforts.

RESPONSIBILITIES

- Leads QA initiatives for designated projects (both standard and agile). Facilitates QA conversations with customers and across the entire project team. Guides a project through various quality milestones and ensures standards and best practices are followed.
- Leads and assists teams with the development and maintenance of QA artifacts, such as requirements, test cases/scenarios, test executions, defect management and metrics reporting. Ensures quality deliverables and milestones are being met.
- Provides initial technical consulting for potential automation or load testing initiatives. Develops both functional and API automation and load/performance testing scripts in support of project activities, as well as the building of a holistic regression testing library. Works closely with the QA Manager to develop both the test automation and load testing framework and strategies.
- Works with the QA manager to develop new and/or maintain existing quality management processes, standards, and guidelines. Communicates these principles throughout the Auburn University campus (both technical and non-technical users).
- Leads the analysis and recommendation of various quality tools, to include vendor discussions, proofs of concepts (POCs), and presentations. Maintains the suite of quality tools to include test management, functional automation, performance and load testing, and mobile testing solutions.
- Serves as a mentor to QA Analysts and acts as the first point of contact for questions or escalations regarding quality standards/practices or quality checks for projects. Provides mentorship and training with tools and best practices to various teams. Examples are automation test cases and scenario creations, script writing, tests and defect tool management, and agile testing strategies.
- Steps in for the QA Manager and represents the QA office during various quality initiatives, such as cross-campus discussions, project strategies or OIT leadership consultations.
- Works closely with the QA Manager regarding the development of the QA roadmap (short and long-term), as well as the overall quality strategy.

SUPERVISORY RESPONSIBILITIES

Supervisory Responsibility	May be responsible for training, assisting or assigning tasks to others. May provide input to performance reviews of other employees.
----------------------------	---

MINIMUM QUALIFICATIONS

To be eligible, an individual must meet all minimum requirements which are representative of the knowledge, skills, and abilities typically expected to be successful in the role.
