JOB FAMILY AND FUNCTION

Job Family:	Information Technology
Job Function:	IT Leadership

JOB SUMMARY

Serves as the senior OIT leader responsible for daily operations of Auburn University's core technologies, which includes all elements of networking, helpdesk, data center, classroom design and maintenance, and telecommunications. Leads campus information technology in the absence of the Vice President for Information Technology/CIO.

RESPONSIBILITIES

- Supervises the work of subordinate employees who provide critical technology services to the campus. Supervision includes monitoring system performance, establishing and tracking metrics, guiding fault analyses and planning appropriate steps to correct issues identified in root cause analyses.
- Supervises and assists in development and execution of quality assurance plans. This position assures that quality assurance management is engaged in integrating quality producing elements into the initial project planning phase. Assures post development testing is conducted early and identified errors are corrected prior to moving a product or service into production.
- Leads a subcommittee of the Research Computing Governance team, and in doing so, helps bridge scientists' needs for computing power with the appropriate technology. Serves as a member, either primary or ex-officio, of all technology governance committees.
- Provides input to the information technology strategic planning process. Input is generated by direct interaction with faculty, staff, students, campus executives, executives from other universities, and the private sector.
- Inputs participation on search committees, reviews technical contracts and service offerings, and presents in academic or conference forums. This position may serve as Auburn's senior IT leader in the absence of the CIO.
