JOB FAMILY AND FUNCTION

Job Family:	Research
Job Function:	Disciplinary Research

JOB SUMMARY

The Research Architect supports, contributes to, and increases the production output capacity of research faculty in School of Architecture, Planning, and Landscape Architecture (APLA) as required by ongoing externally funded research grants and contracts.

Architecture: Provides architectural management, support, and oversight of project scopes, budgets, contracts, designs, bidding, construction and compliance with codes and standards, and day-to-day operational and tactical aspects associated with various design and construction projects.

Research: Assists researchers in planning, maintaining, or completing research programs and/or projects involved in the discovery of new knowledge, techniques, and concepts which require advanced level scientific/research knowledge, skills and abilities following relevant policies, procedures, regulations, and laws.

RESPONSIBILITIES

- Performs architectural design functions by preparing schematics, working drawings, and specifications for projects of a complex nature.
- Performs periodic construction inspections and prepares and distributes reports to appropriate personnel.
- Coordinates projects to include scheduling, budgeting, monitoring cost and resolving client issues. Selects and manages the services of consultants
- Collects data for use in the formulation of design standards and maintains approved design criteria and/or code compliance requirements. Records, compiles, processes, and analyzes data and samples. Documents results and observations in writing as well as presenting results to others.
- Develops or assists in the development of complex research project proposals, plans, and protocols.
 Conducts non-routine experiments, investigations and/or studies related to projects in pursuit of new knowledge, techniques, and concepts. Coordinates or assists logistics of research to include equipment, materials, and labor need
- May prepare research results for publication or presentation at conferences to include performing literature reviews and writing results and discussions.
- May maintain project budgets and/or coordinate funding.
- Plans and develops architecture projects concerned with unique or controversial complexities which have important impact on major organization programs.
- Plans, organizes and supervises work of staff of architects and technicians.
- As individual researcher, consultant or staff specialist, conceives plans and conducts research in areas of considerable scope and complexity.
- Performs other duties as assigned.

SUPERVISORY RESPONSIBILITIES

Supervisory Responsibility

May be responsible for training, assisting or assigning tasks to others. May provide input to performance reviews of other employees.

MINIMUM QUALIFICATIONS

To be eligible, an individual must meet all minimum requirements which are representative of the knowledge, skills, and abilities typically expected to be successful in the role. For education and experience, minimum requirements are listed on the top row below. If substitutions are available, they will be listed on subsequent rows and may only to be utilized when the candidate does not meet the minimum requirements.

MINIMUM EDUCATION & EXPERIENCE							
Education Level	Focus of Education		Years of Experience	Focus of Experience			
Bachelor's Degree	Bachelor's Degree in Architecture and NAAB Accreditation.	And	6 years of	Experience in principles and practices of architectural design, construction, and research.	Or		
Master's Degree	Master's Degree in Architecture.	And	6 years of	Experience in principles and practices of architectural design, construction, and research.			

Substitutions Allowed for Yes Experience

Substitution allowed for Experience: When a candidate has the required education, but lacks the required experience, they may normally apply additional appropriate education toward the experience requirement, at a rate of one (1) year relevant education per year of required experience.

MINIMUM KNOWLEDGE, SKILLS, & ABILITIES

Ability to provide architectural management, support, and oversight of project scopes, budgets, contracts, designs, bidding, construction and compliance with codes and standards, and day-to-day operational and tactical aspects associated with various designs.

Technical liaison to individuals within or outside his or her organization involving exploration of subject area, definition of scope, selection of areas for investigation and development of novel concepts.
