JOB FAMILY AND FUNCTION

Job Family: Production & Skilled Trades
Job Function: HVAC
EEO Position Group 66A - Skilled Craft

JOB SUMMARY

Under general supervision, responsible for performing routine installation, replacement, or repairs to a variety of building heating, ventilating, air conditioning, and refrigeration (HVACR) equipment.

RESPONSIBILITIES

• Performs installation, replacement, or repairs to a variety of building heating, ventilating, air conditioning, and refrigeration (HVACR) equipment including: refrigeration, air conditioning, electric motors, heating units, heat pumps, hermetic compressors, light commercial furnaces, boilers, burners, intake and exhaust fans, economizers, humidifiers, capacity controls, semi-hermetic compressors, split systems, flame safeguard controls, air compressors, air driers, and packaged units.

• Assists in planning, scheduling, and executing major HVACR system repair projects, such as the replacement of air handling units, chillers, or boilers and to lead emergency repair efforts to repair such units.

• Inspects and troubleshoots HVACR systems and their components (e.g. air handling units, chillers, heat exchanges, heating units, building exhaust fans, ventilation equipment, etc.) for the purpose of evaluating operating status and material condition, identifying necessary repairs and recommending a proper course of action.

• Oversees and plans assigned work orders using Facilities Management AIM work order system to prioritize and schedule work to best meet the need of Auburn University and its customers. Identifies options, develops solutions, and takes action when responding to customer requests.

• Will be responsible for meeting and maintaining training and certification requirements as outlined by the Auburn University Facilities Management Policy: "Training, Education, and Certification Requirements for Mechanical and Electrical Trades Personnel".

• May be required to serve in an on-call status and remain work-ready when scheduled for an on-call period or rotation. Work-ready status requires an employee to return to the worksite within forty-five minutes while being physically and mentally unimpaired and fit for duty, able to safely perform all essential job functions with no risk to self, coworkers, students, public, or property.

SUPERVISORY RESPONSIBILITIES

Supervisory Responsibility May be responsible for training, assisting or assigning tasks to others. May provide input to performance reviews of other employees.
**MINIMUM QUALIFICATIONS**

To perform this job successfully, an individual must be able to perform the minimum requirements listed below, which are representative of the skill, and/or ability required.

**MINIMUM EDUCATION & EXPERIENCE**

<table>
<thead>
<tr>
<th>Education Level</th>
<th>Focus of Education</th>
<th>Years of Experience</th>
<th>Focus of Experience</th>
</tr>
</thead>
<tbody>
<tr>
<td>Some college; vocational or Associate’s Degree</td>
<td>Heating, Ventilating and Air Conditioning Systems, Refrigeration, Building Control Systems or related fields of study.</td>
<td>And 5 years of</td>
<td>Experience as an HVACR technician.</td>
</tr>
<tr>
<td>And</td>
<td></td>
<td></td>
<td>To be considered for Level II, finalist candidates will be required to produce documentation that verifies training and/or certification hours.</td>

| Substitutions Allowed for Education | Yes |

Substitution allowed for Education: When a candidate has the required experience, but lacks the required education, they may normally apply additional relevant experience toward the education requirement, at a rate of two (2) years relevant experience per year of required education.

**MINIMUM KNOWLEDGE, SKILLS, & ABILITIES**

Journeyman level knowledge regarding the installation, maintenance, repair and proper operation of a wide array of complex HVACR systems.

Journeyman level knowledge regarding a wide array of complex HVACR systems components such as AHUs, VAVs, DX Units, Hydronic systems, chillers, boilers, variable frequency drives, and heat exchangers.

Journeyman level knowledge regarding troubleshooting, assessment, and diagnostic techniques for complex HVAC and refrigeration system problems.

Journeyman level knowledge regarding project management and the planning, directing, scheduling, and managing of HVACR system repair projects; HVACR control systems and the ability to install repair, and replace control components; digital controls and the ability to install, repair, and replace digital control components; pneumatic controls and the ability to install, repair, and replace pneumatic control components.

Journeyman level knowledge in the use of air and water flow measurement equipment and the ability to accurately use such equipment; building air and water "test and balance" procedures and practices and the ability to test and balance a building system.

Basic knowledge of fire alarm systems and how they interact with HVACR system operation and controls.

Supervisory skills, along with the ability to communicate tasks and direction to subordinates in a clear and concise manner.

Ability to install, repair, and/or replace a wide array of HVACR system components such as AHUs, VAVs, DX Units, Hydronic systems, chillers, boilers, variable frequency drives, and heat exchangers.

Ability to troubleshoot, assess, and diagnose routine HVAC and refrigeration systems problems.

Ability to assist in planning and executing HVACR system repair projects.

Ability to install, repair, and replace HVACR control components, digital control components, pneumatic control components.

Ability to accurately use of air and water flow measurement equipment.

Ability to test and balance a building system.

Ability to use building automatic systems (such as Johnson Controls Metasys system) to find and troubleshoot issues.

**MINIMUM LICENSES & CERTIFICATIONS**
