

I'm a student and tested positive for COVID-19.

What happens next?

1 Complete the required [COVID-19 Self-Report Form](#).

This information goes to the Office of Institutional Research and is used to notify:

- [AU Medical Clinic](#). Clinic staff, working with the Department of Social Work, will contact you to conduct contact tracing.
- [Campus Safety](#). They monitor information about the prevalence of COVID-19 on campus and will share this information anonymously as needed.

2 If you live on-campus:

- The [COVID Resource Center](#) or AU Medical Clinic will work with [University Housing](#) to consider alternate accommodations for you, if needed.
- You may request meals to be delivered to your residence hall from [Tiger Dining](#).
- *Note: You may quarantine at an off-campus location at your own expense if you prefer.*

3 Let your instructors know you will not be in class.

- Completing the [self-report form](#) will allow you to share a medical note for class. Share this with your professors and discuss with them how you will make-up any work you missed or attend class virtually if possible.

4 Notify your close contacts.

- Anyone who had close contact (15 or more minutes, 6 feet apart or less) with you needs to be contacted to let them know they have been exposed to COVID-19.

5 You can return to campus when all three of the following are met:

- You have spent at least 10 calendar days (from the date of your positive test) in self-isolation.
- You have been fever-free for at least 24 hours without using fever-reducing medication.
- Your symptoms have improved.

6 You will receive an email from the AU Medical Clinic, COVID Resource Center, or University Housing that provides the date you may return to campus.
