If you have tested positive for COVID-19 (regardless of vaccination status)*...

- You should isolate for five days.
- If you have no symptoms or your symptoms are resolving (fever free for 24 hours), follow that by five days of wearing a mask when around others.

You should also do the following:
- Contact your supervisor to discuss work.
- Complete the required COVID-19 Self-Report Form: The information goes to the Office of Institutional Research. It is kept confidential and is used to notify Campus Safety. They monitor information about the prevalence of COVID-19 on campus and will share this information anonymously as needed.

* The CDC has updated the recommended isolation and quarantine period for people with COVID-19.

If you have been exposed to someone with COVID-19 and...

- Have been boosted...
- Completed the primary series of the Pfizer or Moderna vaccine within the last six months...
- Quarantine is not required.
- Wear a mask for 10 days after exposure, including at home to prevent household transmission.
- With no symptoms, testing is recommended at day five after exposure.
- If you develop symptoms, stay home. It is recommended that you consult with a healthcare provider to help determine whether testing or treatment is needed.

- Completed the primary series of the Johnson and Johnson vaccine within the last two months...
- Completed the primary series of the Pfizer or Moderna vaccine over six months ago and are not boosted...
- Quarantine for five days.
- Follow that by five days of wearing a mask when around others.
- Without symptoms, testing is recommended at day five after exposure.
- If you develop symptoms, stay home. It is recommended that you consult with a healthcare provider to help determine whether testing or treatment is needed.

- Have not been vaccinated...
- Completed the primary series of the Johnson and Johnson vaccine over two months ago and are not boosted...
- Have not been vaccinated...

If you have had secondary exposure (a close contact exposure to someone who is being tested for COVID-19 but the results are not yet available), but are not ill, then self-quarantine is not necessary. However, you should continue to practice mitigation strategies including wearing a well-fitting mask, monitor your health daily for the COVID-19 symptoms identified by the CDC and practice infection control measures.
