

Pair 1

P1: There are four common types of table tennis rubbers: short pips, long pips, antispin, and inverted. The thickness and density of the sponge layer underneath also affects how the rubber will handle the ball. Because of the large variety of table tennis rubbers, there are a larger variety of playing styles in table tennis than in other racket sports. History.

P2: There are four common types of table tennis rubbers: short pips, long pips, antispin, and inverted. The thickness and density of the sponge layer underneath also affects how the rubber will handle the ball. Because of the large variety of table tennis rubbers, there are a bigger variation of playing styles in table tennis than in other racket sports. History.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are larger variety and bigger variation interchangeable (i.e., having the same meaning)?

Pair 2

P1: Deferred lighting (also known as Light Pre-Pass) is a modification of the Deferred Shading. This technique uses three passes, instead of two in deferred shading. On first pass over the scene geometry, only normals and specular spread factor are written to the color buffer. The screen-space, “deferred” pass then accumulates diffuse and specular lighting data separately, so a last pass must be made over the scene geometry to output final image with per-pixel shading.

P2: Deferred lighting (also known as Light Pre-Pass) is a modification of the Deferred Shading. This technique uses three passes, instead of two in deferred shading. On number one passage over the scene geometry, only normals and specular spread factor are written to the color buffer. The screen-space, “deferred” pass then accumulates diffuse and specular lighting data separately, so a last pass must be made over the scene geometry to output final image with per-pixel shading.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are first pass and number one passage interchangeable (i.e., having the same meaning)?

Pair 3

P1: When the leftmost silver is moved up from 58 to 47 as like the gold in a High Mino castle, this is also known as a Silver Mino. In this variant, the 38 is defended better, but the 58 square is now weaker. As with the regular Mino, it's also standard to make an escape hatch for the king by advancing the first file pawn. Silver Crown.

P2: When the leftmost silver is moved up from 58 to 47 as like the gold in a High Mino castle, this is also known as a Silver Mino. In this variant, the 38 is defended better, but the 58 square is now weaker. As with the regular Mino, it's also standard to make an exit plan for the king by advancing the first file pawn. Silver Crown.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are escape hatch and exit plan interchangeable (i.e., having the same meaning)?

Pair 4

P1: At that time NGST/JWST was still a 8-meter design (50 m2), a few years later this was reduced eventually to the 25 m2 (6.5 m) design. OTE Pathfinder. one part of JWST development was the production of the Optical Telescope Element Pathfinder. The OTE pathfinder uses two additional mirror segments, and additional secondary mirror, and puts together various structures to allow testing of various aspects of the section, including Ground Support Equipment.

P2: At that time NGST/JWST was still a 8-meter design (50 m2), a few years later this was reduced eventually to the 25 m2 (6.5 m) design. OTE Pathfinder. a singular element of JWST development was the production of the Optical Telescope Element Pathfinder. The OTE pathfinder uses two additional mirror segments, and additional secondary

mirror, and puts together various structures to allow testing of various aspects of the section, including Ground Support Equipment.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one part** and **a singular element** interchangeable (i.e., having the same meaning)?

Pair 5

P1: For electricity generated from facilities using solar thermal systems solar-gas hybrid, the bonus is 200% of the price per kWh. For contributions of solar energy below 25%, said bonus is paid in the following conditions: The price of electricity is fixed by the CREG (Gas and Electricity Regulatory Commission). According to the **last decision** which fixed it, the consumer pays his electricity as below: Other consumers (industry, agriculture...etc.) pay 4.17 DZD/kWh.

P2: For electricity generated from facilities using solar thermal systems solar-gas hybrid, the bonus is 200% of the price per kWh. For contributions of solar energy below 25%, said bonus is paid in the following conditions: The price of electricity is fixed by the CREG (Gas and Electricity Regulatory Commission). According to the **most recent resolution** which fixed it, the consumer pays his electricity as below: Other consumers (industry, agriculture...etc.) pay 4.17 DZD/kWh.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **last decision** and **most recent resolution** interchangeable (i.e., having the same meaning)?

Pair 6

P1: The program has been supported by the majority of state governments, as well as psychologists, gay-support groups and other non-governmental and religious organisations. The program is supported by Beyond Blue, headspace and the Australian Secondary Principals Association. Advocates for the **program point** to high levels of homophobic abuse, including in school settings, and high levels of school leaving. Australian LGBTIQ rights activist and academic Rodney Croome welcomed a review as a way of ensuring its funding delivered the outcomes it sought.

P2: The program has been supported by the majority of state governments, as well as psychologists, gay-support groups and other non-governmental and religious organisations. The program is supported by Beyond Blue, headspace and the Australian Secondary Principals Association. Advocates for the **plan identify** to high levels of homophobic abuse, including in school settings, and high levels of school leaving. Australian LGBTIQ rights activist and academic Rodney Croome welcomed a review as a way of ensuring its funding delivered the outcomes it sought.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **program point** and **plan identify** interchangeable (i.e., having the same meaning)?

Pair 7

P1: Genetic diversity is essential, proves the Cosmopolitan Chicken Research Programme (CC@P), which studies the various CCP hybrids. Central to Koen Vanmechelen's oeuvre is the chicken. More specifically: the interbreeding of domesticated chickens from different countries and the **expected creation** of a cosmopolitan hybrid. Vanmechelen uses the animal, which has been co-evolving with the human animal for more than 7.000 years, as a metaphor for the global cultural and genetic mix that diversity and hybridisation create.

P2: Genetic diversity is essential, proves the Cosmopolitan Chicken Research Programme (CC@P), which studies the various CCP hybrids. Central to Koen Vanmechelen's oeuvre is the chicken. More specifically: the interbreeding of domesticated chickens from different countries and the **inevitable formation** of a cosmopolitan hybrid. Vanmechelen uses the animal, which has been co-evolving with the human animal for more than 7.000 years, as a metaphor for the global cultural and genetic mix that diversity and hybridisation create.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **expected creation** and **inevitable formation** interchangeable (i.e., having the same meaning)?

Pair 8

P1: He was captured in another battle and executed (Flugumýrabrenna). He didn't ask for mercy, and the last words spoken of him were those of Kolbeinn Dufgusson: "Nobody remembers Snorri Sturluson, if you are to be spared." **Árni beiskur is otherwise an obscure character in Icelandic history, but his own last words, as recorded, point to a certain strength of character.** In the words of Íslendinga saga, after he had run out from Flugumýrabrenna, being aged, he stumbled and lay defenseless: "Árni beiskur is here, says he, and I will not ask for clemency.

P2: He was captured in another battle and executed (Flugumýrabrenna). He didn't ask for mercy, and the last words spoken of him were those of Kolbeinn Dufgusson: "Nobody remembers Snorri Sturluson, if you are to be spared." **Árni beiskur is otherwise an obscure character in Icelandic history, but his own last words, as recorded, point to a sure toughness of character.** In the words of Íslendinga saga, after he had run out from Flugumýrabrenna, being aged, he stumbled and lay defenseless: "Árni beiskur is here, says he, and I will not ask for clemency.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **certain strength** and **sure toughness** interchangeable (i.e., having the same meaning)?

Pair 9

P1: This accomplishment took the team to the NCAA Tournament where they competed to earn a championship title. As of 2009 the overall record of the program was 353 wins, followed by 430 losses. **Coming into the 2010 season, the team lost a total of 5 players: two freshmen, one junior, and one graduated senior.** In return the team gained a total of four newcomers: three freshmen, and one junior.

P2: This accomplishment took the team to the NCAA Tournament where they competed to earn a championship title. As of 2009 the overall record of the program was 353 wins, followed by 430 losses. **Coming into the 2010 season, the team lost a total of 5 players: two freshmen, one in his third year of school, and one graduated senior.** In return the team gained a total of four newcomers: three freshmen, and one junior.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one junior** and **one in his third year of school** interchangeable (i.e., having the same meaning)?

Pair 10

P1: "Til It's Gone" is a song written by Rodney Clawson, David Lee Murphy, and Jimmy Yeary and recorded by American country music artist Kenny Chesney. **It was released in October 2014 as the second single from Chesney's 2014 album "The big revival".** Critical reception.

P2: "Til It's Gone" is a song written by Rodney Clawson, David Lee Murphy, and Jimmy Yeary and recorded by American country music artist Kenny Chesney. **It was released in October 2014 as the second single from Chesney's 2014 album "The colossal renewal".** Critical reception.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **big revival** and **colossal renewal** interchangeable (i.e., having the same meaning)?

Pair 11

P1: In addition, in 1995, Korea was bidding to host the 2002 FIFA World Cup. This warranted the construction of a soccer-specific stadium in Seoul. The three clubs based in Seoul LG Cheetahs, Ilhwa Chunma, and Yukong Elephants did not want to recognize the decentralization policy. Ultimately, it proved necessary for the Korean government to issue an eviction order to the disaffected clubs.

P2: In addition, in 1995, Korea was bidding to host the 2002 FIFA World Cup. This warranted the construction of a soccer-specific stadium in Seoul. The three clubs based in Seoul LG Cheetahs, Ilhwa Chunma, and Yukong Elephants did not want to recognize the dissolution action. Ultimately, it proved necessary for the Korean government to issue an eviction order to the disaffected clubs.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are decentralization policy and dissolution action interchangeable (i.e., having the same meaning)?

Pair 12

P1: The Public Expenditure Report of the Water Sector provides a detailed analysis of the patterns of budget spending. It appears that in the water sector large part of the budget is made up of development expenditures and only 15% are recurrent expenditures (compared to the 55% share of development expenditures in the total government budget). Moreover, as a result of the decentralization policy of the government, the budget allocated to local government authorities and regions has increased rapidly. In fiscal year 2008-2009 LGAs had a share in the total water sector budget of about 25%, while the figure was 20% for regions.

P2: The Public Expenditure Report of the Water Sector provides a detailed analysis of the patterns of budget spending. It appears that in the water sector large part of the budget is made up of development expenditures and only 15% are recurrent expenditures (compared to the 55% share of development expenditures in the total government budget). Moreover, as a result of the dissolution approach of the government, the budget allocated to local government authorities and regions has increased rapidly. In fiscal year 2008-2009 LGAs had a share in the total water sector budget of about 25%, while the figure was 20% for regions.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are decentralization policy and dissolution approach interchangeable (i.e., having the same meaning)?

Pair 13

P1: On Kingston-type ware, the glaze was typically crazed and usually varied in finish from thin and uneven to thick and glossy. Glaze colour could vary from green to dark green to brown. Course Border ware glaze was crazed, with a similar finish to Kingston-type ware. The colour varied from light to dark green and was sometimes mottled.

P2: On Kingston-type ware, the glaze was typically crazed and usually varied in finish from thin and uneven to thick and glossy. Glaze colour could vary from green to dark green to brown. Course Border ware glaze was crazed, with a complementary appearance to Kingston-type ware. The colour varied from light to dark green and was sometimes mottled.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are similar finish and complementary appearance interchangeable (i.e., having the same meaning)?

Pair 14

P1: Just prior to the launch of ESPN, according to the book "Those Guys Have All the Fun: Inside the World of ESPN", Stuart Evey claimed "I made Bill Chairman, but in no way did I want to give him any responsibility!" "Having Bill Rasmussen play a significant role was just not part of the deal." Rasmussen, the one who had the idea for ESPN, stepped back from day-to-day business, having less contact with ESPN until mid 1999. Rasmussen and ESPN "made

amends" in 1999 when then-president George Bodenheimer reached out to the founder for the network's 20th anniversary.

P2: Just prior to the launch of ESPN, according to the book "Those Guys Have All the Fun: Inside the World of ESPN", Stuart Evey claimed "I made Bill Chairman, but in no way did I want to give him any responsibility!" "Having Bill Rasmussen play a significant role was just not part of the deal." Rasmussen, the one who had the idea for ESPN, stepped back from day-to-day business, having minimal association with ESPN until mid 1999. Rasmussen and ESPN "made amends" in 1999 when then-president George Bodenheimer reached out to the founder for the network's 20th anniversary.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **less contact** and **minimal association** interchangeable (i.e., having the same meaning)?

Pair 15

P1: The mall was completed and opened on August 26, 1965 with anchor stores Buttrey Food & Drug, Tempo, and Sprouse-Reitz. During 1967, Daum Industries persuaded JCPenney to open a department store at the two-year-old shopping center. In March 1967, construction on a \$3.5 million expansion of the shopping mall began, with a **finish date** set for March 1968. The new expansion added of new retail space to the shopping center, including the new two-level JCPenney store and a Skaggs Drug Centers store.

P2: The mall was completed and opened on August 26, 1965 with anchor stores Buttrey Food & Drug, Tempo, and Sprouse-Reitz. During 1967, Daum Industries persuaded JCPenney to open a department store at the two-year-old shopping center. In March 1967, construction on a \$3.5 million expansion of the shopping mall began, with a **finishing term** set for March 1968. The new expansion added of new retail space to the shopping center, including the new two-level JCPenney store and a Skaggs Drug Centers store.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **finish date** and **finishing term** interchangeable (i.e., having the same meaning)?

Pair 16

P1: A semilattice is partially ordered set with only one of the two lattice operations, either a meet- or a join-semilattice. Given that there is only one binary operation, distributivity obviously cannot be defined in the standard way. Nevertheless, because of the interaction of the single operation with the **given order**, the following definition of distributivity remains possible. A meet-semilattice is distributive, if for all "a", "b", and "x": Distributive join-semilattices are defined dually: a join-semilattice is distributive, if for all "a", "b", and "x": In either case, a' and b' need not be unique.

P2: A semilattice is partially ordered set with only one of the two lattice operations, either a meet- or a join-semilattice. Given that there is only one binary operation, distributivity obviously cannot be defined in the standard way. Nevertheless, because of the interaction of the single operation with the **provided command**, the following definition of distributivity remains possible. A meet-semilattice is distributive, if for all "a", "b", and "x": Distributive join-semilattices are defined dually: a join-semilattice is distributive, if for all "a", "b", and "x": In either case, a' and b' need not be unique.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **given order** and **provided command** interchangeable (i.e., having the same meaning)?

Pair 17

P1: At stake is God, may he listen to all the prayers, and in his goodness provide consolation, giving China and the Church peace and tranquillity again. May he convince those who attack her today, that the Church has no earthly but heavenly goals. Referring to recent Chinese conquests, Pope Pius continues, there are people **whose main aim** is to conquer power and expand it every day. The Church on the other hand is teaching every day the truth of Jesus Christ, which converts the hearts towards brotherly love and social engagement for the poor and needy in society.

P2: At stake is God, may he listen to all the prayers, and in his goodness provide consolation, giving China and the Church peace and tranquillity again. May he convince those who attack her today, that the Church has no earthly but heavenly goals. Referring to recent Chinese conquests, Pope Pius continues, there are people **who collectively strive is to conquer power and expand it every day**. The Church on the other hand is teaching every day the truth of Jesus Christ, which converts the hearts towards brotherly love and social engagement for the poor and needy in society.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **whose main aim** and **who collectively strive** interchangeable (i.e., having the same meaning)?

Pair 18

P1: The propellant used in the initial design would contain a rather large amount of the relatively expensive isotope ^{235}U , which would not be very cost effective. However, if the use of NSWR began to rise, it would be possible to replace this with the cheaper isotopes ^{233}U or ^{239}Pu in either fission breeder reactors or (much better) nuclear fusion–fission hybrid reactors. These fissiles would have the **right characteristics** to serve nearly as well, at a relatively low cost. Another major limitation of the nuclear salt water rocket design by Robert Zubrin included the lack of a material to be used in the reaction chamber that could actually sustain such a reaction within a spacecraft.

P2: The propellant used in the initial design would contain a rather large amount of the relatively expensive isotope ^{235}U , which would not be very cost effective. However, if the use of NSWR began to rise, it would be possible to replace this with the cheaper isotopes ^{233}U or ^{239}Pu in either fission breeder reactors or (much better) nuclear fusion–fission hybrid reactors. These fissiles would have the **exact traits needed** to serve nearly as well, at a relatively low cost. Another major limitation of the nuclear salt water rocket design by Robert Zubrin included the lack of a material to be used in the reaction chamber that could actually sustain such a reaction within a spacecraft.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **right characteristics** and **exact traits needed** interchangeable (i.e., having the same meaning)?

Pair 19

P1: In vexillology. The famous depiction of a banner with Árpád stripes showing King Béla III in one of the initials of the Chronicon Pictum dates to around 1360. The illustrations and decorative illuminations of the chronicle use the **Árpád stripes on several occasion** on banners (beside the mentioned initial it appears e.g. in the depiction of the Battle of Ménfő), shields, coat of arms (mostly marshalled with the Hungarian Apostolic Double Cross or the Angevin "field azure semé-de-lis") or as the pattern of garment of Stephen I.

P2: In vexillology. The famous depiction of a banner with Árpád stripes showing King Béla III in one of the initials of the Chronicon Pictum dates to around 1360. The illustrations and decorative illuminations of the chronicle use the **Árpád stripes on multiple celebration** on banners (beside the mentioned initial it appears e.g. in the depiction of the Battle of Ménfő), shields, coat of arms (mostly marshalled with the Hungarian Apostolic Double Cross or the Angevin "field azure semé-de-lis") or as the pattern of garment of Stephen I.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **several occasion** and **multiple celebration** interchangeable (i.e., having the same meaning)?

Pair 20

P1: Many in the sparsely populated and ethnically distinct north of Mali along with some in southern Algeria and northern Niger expected an independent Tuareg, Berber, and Arab nation to be formed by the Sahara desert regions when French Colonialism ended. This combined with dissatisfaction over the new government led some Tuareg in Northern Mali to rebel in 1963. The first Tuareg attacks began in northern Mali in early 1962 with small, "hit and run raids against **government targets**". The attacks escalated in size and destructiveness through 1963, resulting in very unsettled

conditions in the Tuareg-populated north.

P2: Many in the sparsely populated and ethnically distinct north of Mali along with some in southern Algeria and northern Niger expected an independent Tuareg, Berber, and Arab nation to be formed by the Sahara desert regions when French Colonialism ended. This combined with dissatisfaction over the new government led some Tuareg in Northern Mali to rebel in 1963. The first Tuareg attacks began in northern Mali in early 1962 with small, “hit and run raids against military assets.” The attacks escalated in size and destructiveness through 1963, resulting in very unsettled conditions in the Tuareg-populated north.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **government targets** and **military assets** interchangeable (i.e., having the same meaning)?

Pair 21

P1: Performance during 2011 England riots. During the 2011 England riots, several police officers experienced “significant difficulties” with the Airwave equipment and were forced to use their own personal mobile phones to coordinate strategy during the riots. The Police Federation review speaks of “significant local technical difficulties” and a “significant communications failure,” which was quoted in the **“guardian” newspaper**. However, the National Policing Improvement Agency (NPIA) responded that the network did manage to cover all 16,000 officers and that “[s]ome officers had to wait a few seconds for their calls to get through, but fundamentally, the network proved to be most resilient.”

P2: Performance during 2011 England riots. During the 2011 England riots, several police officers experienced “significant difficulties” with the Airwave equipment and were forced to use their own personal mobile phones to coordinate strategy during the riots. The Police Federation review speaks of “significant local technical difficulties” and a “significant communications failure,” which was quoted in the **news article**. However, the National Policing Improvement Agency (NPIA) responded that the network did manage to cover all 16,000 officers and that “[s]ome officers had to wait a few seconds for their calls to get through, but fundamentally, the network proved to be most resilient.”

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **“guardian” newspaper** and **news article** interchangeable (i.e., having the same meaning)?

Pair 22

P1: Classification. For a jump on the calculation point, the athlete gets 60 points. For **every meter** short or beyond this mark the jumper receives fewer or more points. For example: On a K120 hill (Calculation point 120 m) the meter value is 1.8 points.

P2: Classification. For a jump on the calculation point, the athlete gets 60 points. For **each quarter of a foot** short or beyond this mark the jumper receives fewer or more points. For example: On a K120 hill (Calculation point 120 m) the meter value is 1.8 points.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **every meter** and **each quarter of a foot** interchangeable (i.e., having the same meaning)?

Pair 23

P1: Construction of the network started with what was then known as the Lakeshore Expressway, which would connect the QEW from its terminus at the Humber River with the downtown core. The initial western section opened in 1958, continuing eastward as an elevated highway to York Street in the city core in 1962, and further to the Don River by 1964. During construction the Lakeshore was renamed the Gardiner Expressway, after the first chair of Metropolitan Toronto and **major supporter** of the expressway plans, Fred Gardiner. A second expressway, the Don Valley Parkway, opened between Bloor Street and Eglinton Avenue in 1961, and continued to develop north and south until it connected

to Highway 401 in the north and the Gardiner Expressway in the south.

P2: Construction of the network started with what was then known as the Lakeshore Expressway, which would connect the QEW from its terminus at the Humber River with the downtown core. The initial western section opened in 1958, continuing eastward as an elevated highway to York Street in the city core in 1962, and further to the Don River by 1964. During construction the Lakeshore was renamed the Gardiner Expressway, after the first chair of Metropolitan Toronto and **big proponent** of the expressway plans, Fred Gardiner. A second expressway, the Don Valley Parkway, opened between Bloor Street and Eglinton Avenue in 1961, and continued to develop north and south until it connected to Highway 401 in the north and the Gardiner Expressway in the south.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **major supporter** and **big proponent** interchangeable (i.e., having the same meaning)?

Pair 24

P1: James donated \$1 million in 2014, \$500,000 in 2013, \$1.2 million in 2012, and \$350,000 in 2010 to the Club for Growth Action. James has also donated to George Pataki, Ted Cruz, Richard Mourdock, and Steve Lonegan. James was a **major supporter** of Let Freedom Ring, John Templeton, Jr.'s organization that opposed the election of Barack Obama in 2008. James donated \$200,000 to Women Speak Out PAC, a project of the Susan B. Anthony List that opposed the re-election of Barack Obama.

P2: James donated \$1 million in 2014, \$500,000 in 2013, \$1.2 million in 2012, and \$350,000 in 2010 to the Club for Growth Action. James has also donated to George Pataki, Ted Cruz, Richard Mourdock, and Steve Lonegan. James was a **main contributor** of Let Freedom Ring, John Templeton, Jr.'s organization that opposed the election of Barack Obama in 2008. James donated \$200,000 to Women Speak Out PAC, a project of the Susan B. Anthony List that opposed the re-election of Barack Obama.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **major supporter** and **main contributor** interchangeable (i.e., having the same meaning)?

Pair 25

P1: He was also one of the co-founders of the Maryhill School of Theology, together with four priests from the Missionary Fathers of the Immaculate Heart. As a leading expert in liturgy, Chupungco's expertise was sought in all parts of the world. He also produced the Handbook for Liturgical Studies, which is the **standard set** of textbooks for liturgical education in the world. He was a board member of the Congregation for Divine Worship and the Discipline of the Sacraments in Rome.

P2: He was also one of the co-founders of the Maryhill School of Theology, together with four priests from the Missionary Fathers of the Immaculate Heart. As a leading expert in liturgy, Chupungco's expertise was sought in all parts of the world. He also produced the Handbook for Liturgical Studies, which is the **main group** of textbooks for liturgical education in the world. He was a board member of the Congregation for Divine Worship and the Discipline of the Sacraments in Rome.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **standard set** and **main group** interchangeable (i.e., having the same meaning)?

Pair 26

P1: A trend break could be a value shift in society, a technological innovation that might be permanent or a paradigm change. Issues are less deep-seated and can be 'a temporary short-lived reaction to a social phenomenon'. A trend can be defined as an 'environmental phenomenon that has adopted a **structural character**'. Environmental scanning is an ongoing process and organizations are always refining the way their particular company or business goes through the process.

P2: A trend break could be a value shift in society, a technological innovation that might be permanent or a paradigm change. Issues are less deep-seated and can be 'a temporary short-lived reaction to a social phenomenon'. A trend

can be defined as an 'environmental phenomenon that has adopted a **basic aspect**'. Environmental scanning is an on-going process and organizations are always refining the way their particular company or business goes through the process.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **structural character** and **basic aspect** interchangeable (i.e., having the same meaning)?

Pair 27

P1: The American team used custom weapons designed by Franklin Green, who had competed in the event in 1964 but did not make the United States team in 1968. Competition format. Each shooter fired 60 shots, in **6 series** of 10 shots each, at a distance of 50 metres. The target was round, 50 centimetres in diameter, with 10 scoring rings.

P2: The American team used custom weapons designed by Franklin Green, who had competed in the event in 1964 but did not make the United States team in 1968. Competition format. Each shooter fired 60 shots, in **60% sequences** of 10 shots each, at a distance of 50 metres. The target was round, 50 centimetres in diameter, with 10 scoring rings.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **6 series** and **60% sequences** interchangeable (i.e., having the same meaning)?

Pair 28

P1: As of the end of the sixth series in 2007, the number of episodes is 29. The possibility of more episodes was in doubt after Shaw became involved in other projects, and the series had been officially cancelled by the BBC by 2009. The pilot and all **6 series** have been released on DVD in the UK (minus episodes 24 & 25). The pilot and first series were released in North America in March 2010.

P2: As of the end of the sixth series in 2007, the number of episodes is 29. The possibility of more episodes was in doubt after Shaw became involved in other projects, and the series had been officially cancelled by the BBC by 2009. The pilot and all **1-6 sets** have been released on DVD in the UK (minus episodes 24 & 25). The pilot and first series were released in North America in March 2010.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **6 series** and **1-6 sets** interchangeable (i.e., having the same meaning)?

Pair 29

P1: The Royal Hamilton Yacht Club is only minutes from downtown Hamilton. Offers a fantastic waterfront view and spectacular sunsets. Whether you sail, **power boat**, swim, or just enjoy great food its all there at the RHYC. Also included are dry sail facilities, youth/adult sailing school, excellent year round dining and well-appointed meeting spaces.

P2: The Royal Hamilton Yacht Club is only minutes from downtown Hamilton. Offers a fantastic waterfront view and spectacular sunsets. Whether you sail, **enjoy boating**, swim, or just enjoy great food its all there at the RHYC. Also included are dry sail facilities, youth/adult sailing school, excellent year round dining and well-appointed meeting spaces.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **power boat** and **enjoy boating** interchangeable (i.e., having the same meaning)?

Pair 30

P1: The storm produced of precipitation in western North Carolina. Flashing flooding and rapidly rising streams forced hundreds of people to evacuate. The French Broad River at Rosman crested at , nearly short of the **record height** set

during Hurricane Hilda in 1964. Floodwaters washed out bridges and roads and resulted the closure of businesses and schools in several counties.

P2: The storm produced of precipitation in western North Carolina. Flashing flooding and rapidly rising streams forced hundreds of people to evacuate. The French Broad River at Rosman crested at , nearly short of the maximum peak set during Hurricane Hilda in 1964. Floodwaters washed out bridges and roads and resulted the closure of businesses and schools in several counties.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are record height and maximum peak interchangeable (i.e., having the same meaning)?

Pair 31

P1: Finally, Rep.Samuel Shellabarger of Ohio introduced a resolution requesting the Committee on Public Expenditures investigate Smythe's conduct. The next day, the House resumed debate over these three resolutions. A different resolution was ultimately adopted which did not call for Smythe's impeachment, but rather his immediate removal from office by the President. A copy of the resolution was sent to President Andrew Johnson, who ignored it.

P2: Finally, Rep.Samuel Shellabarger of Ohio introduced a resolution requesting the Committee on Public Expenditures investigate Smythe's conduct. The next day, the House resumed debate over these three resolutions. A similar but distinct decision was ultimately adopted which did not call for Smythe's impeachment, but rather his immediate removal from office by the President. A copy of the resolution was sent to President Andrew Johnson, who ignored it.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are different resolution and similar but distinct decision interchangeable (i.e., having the same meaning)?

Pair 32

P1: These processes, which involve attracting a partner and maintaining sexual interest, can include flirting, which can be used to attract the sexual attention of another to encourage romance or sexual relations, and can involve body language, conversation, joking, or brief physical contact. Sex and sexuality differences. Men have been found to have a greater interest in uncommitted sex compared to women. Some research shows this interest to be more sociological than biological.

P2: These processes, which involve attracting a partner and maintaining sexual interest, can include flirting, which can be used to attract the sexual attention of another to encourage romance or sexual relations, and can involve body language, conversation, joking, or brief physical contact. Sex and sexuality differences. Men have been found to have a higher passion in uncommitted sex compared to women. Some research shows this interest to be more sociological than biological.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are greater interest and higher passion interchangeable (i.e., having the same meaning)?

Pair 33

P1: The top ten of the second German Grand Prix in 2011, held on 11 September at Rudersberg: The last race event of the 2011 season saw the World Champions, Willemsen and Verbrugge, failing to score any points. A dispute during qualifying between the two lead to Verbrugge walking out during the first qualifying session. He later returned to take part in the "last chance", where the team qualified for the race after all. Verbrugge however was injured during a fall and had to be taken to hospital where his arm was placed into a plaster, ruling the team out of the race.

P2: The top ten of the second German Grand Prix in 2011, held on 11 September at Rudersberg: The last race event of the 2011 season saw the World Champions, Willemsen and Verbrugge, failing to score any points. A dispute during

qualifying between the two lead to Verbrugge walking out during the first qualifying session. He later returned to take part in the "concluding effort", where the team qualified for the race after all. Verbrugge however was injured during a fall and had to be taken to hospital where his arm was placed into a plaster, ruling the team out of the race.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **last chance** and **concluding effort** interchangeable (i.e., having the same meaning)?

Pair 34

P1: Some cities are starting to put in skate spots/plazas with features that would not have been classically designed for skateboarding, but can be skated by street skaters legally. In some instances, street spots that were not originally designed for skateboarding have been converted into sanctioned skate plazas. There is also an **emerging movement of making art and sculpture skate-able**. This provides additional legal skate spots that blend well with other city art and landscape features.

P2: Some cities are starting to put in skate spots/plazas with features that would not have been classically designed for skateboarding, but can be skated by street skaters legally. In some instances, street spots that were not originally designed for skateboarding have been converted into sanctioned skate plazas. There is also an **arising style of making art and sculpture skate-able**. This provides additional legal skate spots that blend well with other city art and landscape features.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **emerging movement** and **arising style** interchangeable (i.e., having the same meaning)?

Pair 35

P1: Edmund Burke was an 18th-century philosopher, political theorist and statesman largely associated with the school of conservatism. His views on natural rights are best articulated in "Reflections on the Revolution in France", which directly attacked the Declaration of the Rights of Man and of the Citizen (1789) and its authors. A great deal of Burke's uneasiness of the "Declaration" lies in the drafter's abandonment of the **existing establishment**. For Burke, constitutional legitimacy was derived not from the Rousseauian doctrine of general will, but from a form of inherited wisdom.

P2: Edmund Burke was an 18th-century philosopher, political theorist and statesman largely associated with the school of conservatism. His views on natural rights are best articulated in "Reflections on the Revolution in France", which directly attacked the Declaration of the Rights of Man and of the Citizen (1789) and its authors. A great deal of Burke's uneasiness of the "Declaration" lies in the drafter's abandonment of the **current body**. For Burke, constitutional legitimacy was derived not from the Rousseauian doctrine of general will, but from a form of inherited wisdom.

Please record your answer for the following question in the provided Google sheet

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **least a third** and **one in three** interchangeable (i.e., having the same meaning)?

Pair 39

P1: (Shapiro and Stockman, 310) Thus, the Hough transform must be used with great care to detect anything other than lines or circles. Finally, much of the efficiency of the Hough transform is dependent on the quality of the input data: the edges must be detected well for the Hough transform to be efficient. **Use of the Hough transform on noisy images is a very delicate matter and generally, a denoising stage must be used before.** In the case where the image is corrupted by speckle, as is the case in radar images, the Radon transform is sometimes preferred to detect lines, because it attenuates the noise through summation.

P2: (Shapiro and Stockman, 310) Thus, the Hough transform must be used with great care to detect anything other than lines or circles. Finally, much of the efficiency of the Hough transform is dependent on the quality of the input data: the edges must be detected well for the Hough transform to be efficient. **Use of the Hough transform on noisy images is a very fragile thing and generally, a denoising stage must be used before.** In the case where the image is corrupted by speckle, as is the case in radar images, the Radon transform is sometimes preferred to detect lines, because it attenuates the noise through summation.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **delicate matter** and **fragile thing** interchangeable (i.e., having the same meaning)?

Pair 40

P1: The Basilica at Yamoussoukro, is estimated to have cost \$300 million, and the additional running expenses for what is the largest church in the world are also shielded from scrutiny by the 1992 concordat concluded with the Ivorian president. Houphouët-Boigny claimed that these funds came from his private fortune. A Vatican official is reported to have called the agreement over the foundation set up to administer these funds "a delicate matter". Nevertheless, this concordat ensures that the foundation's income and assets remain untaxed (art.

P2: The Basilica at Yamoussoukro, is estimated to have cost \$300 million, and the additional running expenses for what is the largest church in the world are also shielded from scrutiny by the 1992 concordat concluded with the Ivorian president. Houphouët-Boigny claimed that these funds came from his private fortune. A Vatican official is reported to have called the agreement over the foundation set up to administer these funds "a sticky process". Nevertheless, this concordat ensures that the foundation's income and assets remain untaxed (art.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **delicate matter** and **sticky process** interchangeable (i.e., having the same meaning)?

Pair 41

P1: Weston Tate is the father of the family and an abusive alcoholic. Incapable of driving or holding a job, he is a profoundly unstable man controlled by the alcohol that runs in his system. His violent nature and utter lack of accountability are the crux of many of the family's issues. He is easily taken advantage of and when his debts are not paid, it takes an even more terrifying toll on the people close to him.

P2: Weston Tate is the father of the family and an abusive alcoholic. Incapable of driving or holding a job, he is a profoundly unstable man controlled by the alcohol that runs in his system. His violent nature and complete disregard of accountability are the crux of many of the family's issues. He is easily taken advantage of and when his debts are not paid, it takes an even more terrifying toll on the people close to him.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **utter lack** and **complete disregard** interchangeable (i.e., having the same meaning)?

Pair 42

P1: Series creator Rob Thomas was initially worried about including the reunion between Apollo and Kizza because he thought that such scenes did not play to his strengths as a storyteller. However, he was pleased with the result because of the two actors' performances. The two performers had never met each other prior to this scene, and they were filming within four minutes of setup time. One quip by Vinnie (Ken Marino) about the office's secretaries was a callback to a similar joke in "Of Vice and Men".

P2: Series creator Rob Thomas was initially worried about including the reunion between Apollo and Kizza because he thought that such scenes did not play to his strengths as a storyteller. However, he was pleased with the result because of the two actors' performances. The two performers had never met each other prior to this scene, and they were filming within four minutes of starting production. One quip by Vinnie (Ken Marino) about the office's secretaries was a callback to a similar joke in "Of Vice and Men".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **setup time** and **starting production** interchangeable (i.e., having the same meaning)?

Pair 43

P1: "American Kids" is a song written by Rodney Clawson, Luke Laird, and Shane McAnally and recorded by American country music artist Kenny Chesney. It was released in June 2014 as the first single from Chesney's 2014 album "The big revival". After its official release, the song became available for sale on June 21 that year.

P2: "American Kids" is a song written by Rodney Clawson, Luke Laird, and Shane McAnally and recorded by American country music artist Kenny Chesney. It was released in June 2014 as the first single from Chesney's 2014 album "The massive emergence". After its official release, the song became available for sale on June 21 that year.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **big revival** and **massive emergence** interchangeable (i.e., having the same meaning)?

Pair 44

P1: Turret presses, most commonly of the "C" type, are similar to single stage presses, but permit mounting all of the dies for one cartridge (or sometimes two cartridges) simultaneously, with each die being installed and correctly locked in position with lock rings onto the press at the same time. Batch operations are performed similar as to on a single stage press, but to switch dies, the turret is simply rotated, placing another die in position. Although turret presses operate much like single stage presses, they eliminate much of the **setup time** required in positioning individual dies correctly. Progressive presses handle several shells at once, with each pull of the lever performing a single step on all the cases at once.

P2: Turret presses, most commonly of the "C" type, are similar to single stage presses, but permit mounting all of the dies for one cartridge (or sometimes two cartridges) simultaneously, with each die being installed and correctly locked in position with lock rings onto the press at the same time. Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **design defects** and **defective designs** interchangeable (i.e., having the same meaning)?

Pair 52

P1: The concrete and buried fortifications are resistant to this air attack. Before September 30, 1944, two new air raids will prove ineffective to dislodge the German soldiers who are holed up during the raids, and return to their battle stations immediately after. For a **long month**, the besieged soldiers will remain in their posts, with discipline and resignation, pending a final US attack that will not come. The Americans, having drawn the consequences of their failure before the Group Fortification Driant have effectively renounced taking the forts west of Metz by frontal assault.

P2: The concrete and buried fortifications are resistant to this air attack. Before September 30, 1944, two new air raids will prove ineffective to dislodge the German soldiers who are holed up during the raids, and return to their battle stations immediately after. For a **protracted thirty days**, the besieged soldiers will remain in their posts, with discipline and resignation, pending a final US attack that will not come. The Americans, having drawn the consequences of their failure before the Group Fortification Driant have effectively renounced taking the forts west of Metz by frontal assault.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **long month** and **protracted thirty days** interchangeable (i.e., having the same meaning)?

Pair 53

P1: "Financial Times" quoted the figures by Tyler Cowen, mistakenly linking them to him rather than Sanandaji. "Debunking Utopia" has mainly spread through various market-oriented think tanks and opinion pages in various Central and South American, European and Asian media outlets. This includes "North Korea Times", which translated Tyler

Cowens review of "Debunking Utopia" from the **syndicated copy** published in The Japan Times. The leading Norwegian daily paper "Dagbladet" invited both Sanandaji and his critics to give their perspective.

P2: "Financial Times" quoted the figures by Tyler Cowen, mistakenly linking them to him rather than Sanandaji. "Debunking Utopia" has mainly spread through various market-oriented think tanks and opinion pages in various Central and South American, European and Asian media outlets. This includes "North Korea Times", which translated Tyler Cowens review of "Debunking Utopia" from the **circulated transcript** published in The Japan Times. The leading Norwegian daily paper "Dagbladet" invited both Sanandaji and his critics to give their perspective.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **syndicated copy** and **circulated transcript** interchangeable (i.e., having the same meaning)?

Pair 54

P1: If a site syndicates content from other sites, it is generally considered important to make sure that search engines can tell which version of the content is the original so that the original can get the benefits of more exposure through search engine results. Ways of doing this include having a rel=canonical tag on the syndicated page that points back to the original, NoIndexing the syndicated copy, or putting a link in the syndicated copy that leads back to the original article. If none of these solutions are implemented, the **syndicated copy** could be treated as the original and gain the benefits. The number of possible URLs crawled being generated by server-side software has also made it difficult for web crawlers to avoid retrieving duplicate content.

P2: If a site syndicates content from other sites, it is generally considered important to make sure that search engines can tell which version of the content is the original so that the original can get the benefits of more exposure through search engine results. Ways of doing this include having a rel=canonical tag on the syndicated page that points back to the original, NoIndexing the syndicated copy, or putting a link in the syndicated copy that leads back to the original article. The number of possible URLs crawled being generated by server-side software has also made it difficult for web crawlers to avoid retrieving duplicate content.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **syndicated copy** and **non-original version** interchangeable (i.e., having the same meaning)?

Pair 55

P1: Fish have been recognised as a major food source from the earliest times. Fishing was important to the earliest settlers in Scotland, around 7000 BC. At this stage, fishing was a subsistence activity, undertaken only to feed the fisher and their **immediate community**. By the medieval period, salmon and herring were important resources and were exported to continental Europe, and the towns of the Hanseatic League in particular.

P2: Fish have been recognised as a major food source from the earliest times. Fishing was important to the earliest settlers in Scotland, around 7000 BC. At this stage, fishing was a subsistence activity, undertaken only to feed the fisher and their **close members**. By the medieval period, salmon and herring were important resources and were exported to continental Europe, and the towns of the Hanseatic League in particular.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **immediate community** and **close members** interchangeable (i.e., having the same meaning)?

Pair 56

P1: In May 2011, ahead of the 2011–12 season, the State of Qatar bought PSG through its shareholding organization Qatar Sports Investments (QSI). Attendance levels soared thanks to big-money signings like Javier Pastore and a promis-

ing UEFA Champions League project to make PSG a big European team. **Liberté Pour les Abonnés welcomed the Qatari owners and their efforts, but maintained that a big club was nothing without their fanbase.** As soon as they arrived, however, QSI further developed Plan Leproux by elaborating a blacklist of PSG supporters banned from the club's games.

P2: In May 2011, ahead of the 2011–12 season, the State of Qatar bought PSG through its shareholding organization Qatar Sports Investments (QSI). Attendance levels soared thanks to big-money signings like Javier Pastore and a promising UEFA Champions League project to make PSG a big European team. **Liberté Pour les Abonnés welcomed the Qatari owners and their efforts, but maintained that a sizable organization was nothing without their fanbase.** As soon as they arrived, however, QSI further developed Plan Leproux by elaborating a blacklist of PSG supporters banned from the club's games.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **big club** and **sizable organization** interchangeable (i.e., having the same meaning)?

Pair 57

P1: Although Equatorial Guinea lacks a well-established democratic tradition comparable to the developed democracies of the West, it has progressed toward developing a participatory political system out of the anarchic, chaotic, and repressive conditions of the Macías years. In power since 1979, the Obiang government has made little progress in stimulating the economy. **Extremely serious health and sanitary conditions persist, and the educational system remains in desperate condition.** Although the abuses and atrocities that characterized the Macías years have been eliminated, effective rule of law does not exist.

P2: Although Equatorial Guinea lacks a well-established democratic tradition comparable to the developed democracies of the West, it has progressed toward developing a participatory political system out of the anarchic, chaotic, and repressive conditions of the Macías years. In power since 1979, the Obiang government has made little progress in stimulating the economy. **Extremely serious health and sanitary conditions persist, and the educational system remains in a dire situation.** Although the abuses and atrocities that characterized the Macías years have been eliminated, effective rule of law does not exist.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **desperate condition** and **a dire situation** interchangeable (i.e., having the same meaning)?

Pair 58

P1: The film ends with McCracken at home phoning his daughter and asking to speak to his son-in-law, before wishing him a happy New Year. Reception. **Walter Goodman of the New York Times called it "a funny movie about a desperate condition."** Paul Attanasio of the Washington Post wrote: "No Surrender"pretends to be a black comedy, but it really isn't – it's just sour.

P2: The film ends with McCracken at home phoning his daughter and asking to speak to his son-in-law, before wishing him a happy New Year. Reception. **Walter Goodman of the New York Times called it "a funny movie about a serious state of being."** Paul Attanasio of the Washington Post wrote: "No Surrender"pretends to be a black comedy, but it really isn't – it's just sour.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **desperate condition** and **serious state of being** interchangeable (i.e., having the same meaning)?

Pair 59

P1: The LAPD found three bullet holes in the foam ceiling, and concluded that a bullet must have ricocheted through the ceiling before turning back and hitting a person. Martin Patrusky, a hotel waiter, remembered being told by officers that they had removed two bullets from the door frame. **The LAPD removed the door frame and the ceiling tiles and**

later incinerated them. Robert Kennedy's son, Robert Kennedy Jr., later said that "There were too many bullets", and that "You can't fire 13 shots out of an eight-shot gun".

P2: The LAPD found three bullet holes in the foam ceiling, and concluded that a bullet must have ricocheted through the ceiling before turning back and hitting a person. Martin Patrusky, a hotel waiter, remembered being told by officers that they had removed two bullets from the door frame. The LAPD removed the door frame and the top blocks and later incinerated them. Robert Kennedy's son, Robert Kennedy Jr., later said that "There were too many bullets", and that "You can't fire 13 shots out of an eight-shot gun".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are ceiling tiles and top blocks interchangeable (i.e., having the same meaning)?

Pair 60

P1: Saylor sums up the critical consensus that the work is something between "a frothy romantic comedy [and] a satirical fairy-tale", and not quite successful in either category. "Job: A Masque for Dancing" (1930) was the first large-scale ballet by a modern British composer. Vaughan Williams's liking for long "tableaux", however disadvantageous in his operas, worked to successful effect in this ballet. The work is inspired by William Blake's "Illustrations of the Book of Job" (1826).

P2: Saylor sums up the critical consensus that the work is something between "a frothy romantic comedy [and] a satirical fairy-tale", and not quite successful in either category. "Job: A Masque for Dancing" (1930) was the first large-scale ballet by a modern British composer. Vaughan Williams's liking for long "tableaux", however disadvantageous in his operas, worked to great result in this ballet. The work is inspired by William Blake's "Illustrations of the Book of Job" (1826).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are successful effect and great result interchangeable (i.e., having the same meaning)?

Pair 61

P1: Calorie-rich drinks and foods are readily available to children. Consumption of sugar-laden soft drinks may contribute to childhood obesity. In a study of 548 children over a 19-month period the likelihood of obesity increased 1.6 times for every additional soft drink consumed per day. Calorie-dense, prepared snacks are available in many locations frequented by children.

P2: Calorie-rich drinks and foods are readily available to children. Consumption of sugar-laden soft drinks may contribute to childhood obesity. In a study of 548 children over a roughly two year the likelihood of obesity increased 1.6 times for every additional soft drink consumed per day. Calorie-dense, prepared snacks are available in many locations frequented by children.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are 19-month period and roughly two year interchangeable (i.e., having the same meaning)?

Pair 62

P1: Some states in the early republic of the United States followed the English tradition of maintaining separate courts for law and equity. Others vested their courts with both types of jurisdiction, as the US Congress did with respect to the federal courts. United States bankruptcy courts are the one example of a us federal court which operates as a court of equity. Some common law jurisdictions—such as the U.S. states of Delaware, Mississippi, New Jersey, South Carolina, and Tennessee—preserve the distinctions between law and equity and between courts of law and courts of equity (or, in New Jersey, between the civil and general equity divisions of the New Jersey Superior Court).

P2: Some states in the early republic of the United States followed the English tradition of maintaining separate courts for law and equity. Others vested their courts with both types of jurisdiction, as the US Congress did with respect to the federal courts. **United States bankruptcy courts are the one example of a United States judiciary branch member which operates as a court of equity.** Some common law jurisdictions—such as the U.S. states of Delaware, Mississippi, New Jersey, South Carolina, and Tennessee—preserve the distinctions between law and equity and between courts of law and courts of equity (or, in New Jersey, between the civil and general equity divisions of the New Jersey Superior Court).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **us federal court** and **United States judiciary branch member** interchangeable (i.e., having the same meaning)?

Pair 63

P1: Some fish should not be kept with fish small enough to fit into its mouth, crabs or mollusks. Similarly some crabs can not be kept with some mollusks, while other fish, crabs, mollusks and echinoderms may be compatible with each other. **It takes experience before one can successfully gauge the compatibility of the fish and invertebrates in one's area.** Due to it being such a localized hobby in the United States, not many people go the route of local tanks which are far more popular in Europe.

P2: Some fish should not be kept with fish small enough to fit into its mouth, crabs or mollusks. Similarly some crabs can not be kept with some mollusks, while other fish, crabs, mollusks and echinoderms may be compatible with each other. **It takes experience before one can successfully gauge the compatibility of the fish and invertebrates in their vicinity.** Due to it being such a localized hobby in the United States, not many people go the route of local tanks which are far more popular in Europe.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one's area** and **their vicinity** interchangeable (i.e., having the same meaning)?

Pair 64

P1: These calls define every baseball game and are therefore integral to the completion of any no-hitter. A different umpire presided over each of the Tigers' eight no-hitters. **The manager is another integral part of any no-hitter.** The tasks of the manager include determining the starting rotation as well as batting order and defensive lineup every game.

P2: These calls define every baseball game and are therefore integral to the completion of any no-hitter. A different umpire presided over each of the Tigers' eight no-hitters. **The manager is an additional important component of any no-hitter.** The tasks of the manager include determining the starting rotation as well as batting order and defensive lineup every game.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **another integral part** and **an additional important component** interchangeable (i.e., having the same meaning)?

Pair 65

P1: However, they are sometimes published in other periodicals (such as entertainment and technical magazines and academic journals), and radio and television stations. In the latter instance, letters are sometimes read on the air (usually, on a news broadcast or on talk radio). **In that presentation form, it can also be described as viewer mail or listener mail, depending on the medium.** Subject matter.

P2: However, they are sometimes published in other periodicals (such as entertainment and technical magazines and academic journals), and radio and television stations. In the latter instance, letters are sometimes read on the air (usually, on a news broadcast or on talk radio). **In that demonstration method, it can also be described as viewer mail or listener mail, depending on the medium.** Subject matter.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **presentation form** and **demonstration method** interchangeable (i.e., having the same meaning)?

Pair 66

P1: During the course of the war, the schools graduated approximately 250,000 student pilots. All of the CFS's were inactivated by the end of the war, and were either turned over to the War Assets Administration (WAA) for disposal, or sold back to their previous private owners. **Most today are small general aviation airports; some are major municipal airports, and some were abandoned with little or no evidence of their existence.** List of Contract Flying Schools.

P2: During the course of the war, the schools graduated approximately 250,000 student pilots. All of the CFS's were inactivated by the end of the war, and were either turned over to the War Assets Administration (WAA) for disposal, or sold back to their previous private owners. **Most today are small general aviation airports; some are major municipal airports, and some were abandoned with barely any signs of their existence.** List of Contract Flying Schools.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **little or no evidence** and **barely any signs** interchangeable (i.e., having the same meaning)?

Pair 67

P1: Each week incorporates intensive sports training, together with competitions, as well as learning about other aspects of the sports. The students attend school at various partnered institutions during the morning and mid-afternoon followed by training in the late afternoon. **The Academy is of a residential nature with on-site accommodation, meals and student welfare included and is highly supervised and run to a professional standard.** First Team Squad.

P2: Each week incorporates intensive sports training, together with competitions, as well as learning about other aspects of the sports. The students attend school at various partnered institutions during the morning and mid-afternoon followed by training in the late afternoon. **The Academy is of a home-like style with on-site accommodation, meals and student welfare included and is highly supervised and run to a professional standard.** First Team Squad.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **residential nature** and **home-like style** interchangeable (i.e., having the same meaning)?

Pair 68

P1: Communities lining the northern reaches of the street, and those nearby across the city boundary in Markham, are constrained by the topographic and legislative boundaries of Rouge Park. A northern extension to Morningside Avenue was proposed, traversing the Brookside and Morningside Heights neighbourhoods to connect with the exurban community of Box Grove. **These plans have since been canceled due to concerns that the extension would necessitate construction in a sensitive section of Rouge Park.** The low, narrow, one-lane railroad underpass at Finch Avenue, dating back to when it was a rural road, was replaced in 2009, allowing 4 lanes of traffic to pass below uninterrupted.

P2: Communities lining the northern reaches of the street, and those nearby across the city boundary in Markham, are constrained by the topographic and legislative boundaries of Rouge Park. A northern extension to Morningside Avenue was proposed, traversing the Brookside and Morningside Heights neighbourhoods to connect with the exurban community of Box Grove. **These plans have since been canceled due to concerns that the extension would necessitate construction in a tricky space of Rouge Park.** The low, narrow, one-lane railroad underpass at Finch Avenue, dating back to when it was a rural road, was replaced in 2009, allowing 4 lanes of traffic to pass below uninterrupted.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **sensitive section** and **tricky space** interchangeable (i.e., having the same meaning)?

Pair 69

P1: On the mainland. The mainland worship of Munshin is very weak compared to the worship of Munshin in Jeju Island. **Munshin worship is almost nonexistent in the countryside, and a limited form appears in Seoul and neighboring regions.** Unlike most Gashin, Munshin was mostly worshipped in cities, where the importance of the door was significantly higher than in the countryside.

P2: On the mainland. The mainland worship of Munshin is very weak compared to the worship of Munshin in Jeju Island. **Munshin worship is almost nonexistent in the countryside, and a degree of its existence appears in Seoul and neighboring regions.** Unlike most Gashin, Munshin was mostly worshipped in cities, where the importance of the door was significantly higher than in the countryside.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **limited form** and **degree of its existence** interchangeable (i.e., having the same meaning)?

Pair 70

P1: The ridge from Trough Head to Arnison Crag is fairly level and passes over a series of knolls. One of these- about halfway along- is the true summit, being high. **Wainwright and later guidebook writers have chosen to ignore this top because it is grassy and too far back to give an adequate view.** This is one of the many reasons why Wainwrights are a subjective hill list, in contrast to the more numerically based Hewitts or Marilyns.

P2: The ridge from Trough Head to Arnison Crag is fairly level and passes over a series of knolls. One of these- about halfway along- is the true summit, being high. **Wainwright and later guidebook writers have chosen to ignore this top because it is grassy and too far back to give an acceptable picture.** This is one of the many reasons why Wainwrights are a subjective hill list, in contrast to the more numerically based Hewitts or Marilyns.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **adequate view** and **acceptable picture** interchangeable (i.e., having the same meaning)?

Pair 71

P1: Aandal, a kind of woman whose anger no one dares to face when she is displeased. Aakash, is the grandson of Aandal, who always obeys his grandmother. **Aandal seeks a bride for Aakash, and has clear criteria for the selecting her.** She comes across Thendral, a radio jockey and gathers all the information about her and she was impressed by Thendral.

P2: Aandal, a kind of woman whose anger no one dares to face when she is displeased. Aakash, is the grandson of Aandal, who always obeys his grandmother. **Aandal seeks a bride for Aakash, and has straightforward rules for the selecting her.** She comes across Thendral, a radio jockey and gathers all the information about her and she was impressed by Thendral.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **clear criteria** and **straightforward rules** interchangeable (i.e., having the same meaning)?

Pair 72

P1: The song was released as a single on 12 June 2006 in the United Kingdom. It entered the top forty in Australia, Ireland and the UK and became Minogue's tenth consecutive Upfront Club Chart number one. **The song's music video,**

directed by Phil Griffin, features Minogue in a variety of **high pressure situations**. She has described it as "the hardest video I've ever done".

P2: The song was released as a single on 12 June 2006 in the United Kingdom. It entered the top forty in Australia, Ireland and the UK and became Minogue's tenth consecutive Upfront Club Chart number one. **The song's music video, directed by Phil Griffin, features Minogue in a variety of tremendously stressful**. She has described it as "the hardest video I've ever done".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **high pressure situations** and **tremendously stressful** interchangeable (i.e., having the same meaning)?

Pair 73

P1: Compared to a roller fairlead, a fixed fairlead is extremely simple. A fairlead can also be used to stop a straight run of line from vibrating or rubbing on another surface. **An additional use on boats is to keep a loose end of line from sliding around the deck ("e.g." the windward (inactive) jib sheet).**

P2: Compared to a roller fairlead, a fixed fairlead is extremely simple. A fairlead can also be used to stop a straight run of line from vibrating or rubbing on another surface. **An additional use on boats is to keep a relaxed part at the bottom of line from sliding around the deck ("e.g." the windward (inactive) jib sheet).**

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **loose end** and **relaxed part at the bottom** interchangeable (i.e., having the same meaning)?

Pair 74

P1: The area of the district is 6116 km² of which 1292 km² is riverine and 4825 km² is under forest vegetation. Administration. **District Administration is the apex office of a district at the present context of administrative setting of Bangladesh.** It is the management of affairs within a district, which is the basic territorial unit of administration in the country.

P2: The area of the district is 6116 km² of which 1292 km² is riverine and 4825 km² is under forest vegetation. Administration. **District Administration is the apex office of a district at the present context of departmental location of Bangladesh.** It is the management of affairs within a district, which is the basic territorial unit of administration in the country.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **administrative setting** and **departmental location** interchangeable (i.e., having the same meaning)?

Pair 75

P1: Kicoshep Primary School. The NGO runs a primary school within the Kibera slum for children affected by HIV and AIDS. **Many of the children are orphans, with some adopting the parental role within their families before they even become teenagers.** The school attracts many international visitors including a number of well known celebrities., and was the focus of the Comic Relief Red Nose Day 2007 campaign videos with Ant & Dec. Broadband Initiative.

P2: Kicoshep Primary School. The NGO runs a primary school within the Kibera slum for children affected by HIV and AIDS. **Many of the children are orphans, with some adopting the motherly and fatherly parts within their families before they even become teenagers.** The school attracts many international visitors including a number of well known celebrities., and was the focus of the Comic Relief Red Nose Day 2007 campaign videos with Ant & Dec. Broadband Initiative.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **parental role** and **motherly and fatherly parts** interchangeable (i.e., having the same meaning)?

Pair 76

P1: The aura of wealth and affluence eventually makes Dan uncomfortable at the party and CeCe toys with his exclusion from Serena's high society world. Her intention is to turn Dan against Serena but instead he tells Serena that he will be her escort. **Alison and Jenny have another argument that soon drives Alison into asserting her parental role and demands Jenny's presence at her art exhibit.** Chuck however, has other plans when he confronts Blair regarding Nate.

P2: The aura of wealth and affluence eventually makes Dan uncomfortable at the party and CeCe toys with his exclusion from Serena's high society world. Her intention is to turn Dan against Serena but instead he tells Serena that he will be her escort. **Alison and Jenny have another argument that soon drives Alison into asserting her maternal responsibilities and demands Jenny's presence at her art exhibit.** Chuck however, has other plans when he confronts Blair regarding Nate.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **parental role** and **maternal responsibilities** interchangeable (i.e., having the same meaning)?

Pair 77

P1: Those in District 23's area will attend either. Those in District 21's area will attend Wheeling and those in District 26's area will attend Hersey. **private education** in Prospect Heights is St. Alphonsus Liguori Catholic Parish and St. Viator High School in Arlington Heights. Transportation.

P2: Those in District 23's area will attend either. Those in District 21's area will attend Wheeling and those in District 26's area will attend Hersey. **non-public school** in Prospect Heights is St. Alphonsus Liguori Catholic Parish and St. Viator High School in Arlington Heights. Transportation.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **private education** and **non-public school** interchangeable (i.e., having the same meaning)?

Pair 78

P1: Endorsements. Prior to the primaries, Kerry collected endorsements from a variety of notable Democratic figures, including: In sheer numbers, however, Kerry had fewer endorsements than Howard Dean, who was far ahead in the superdelegate race going into the Iowa caucuses in February 2004, although Kerry led the endorsement race in Iowa, New Hampshire, Arizona, South Carolina, New Mexico and Nevada. **Kerry's main perceived weakness was in his neighboring state of New Hampshire and nearly all national polls.** Most other states did not have updated polling numbers to give an accurate placing for the Kerry campaign before Iowa.

P2: Endorsements. Prior to the primaries, Kerry collected endorsements from a variety of notable Democratic figures, including: In sheer numbers, however, Kerry had fewer endorsements than Howard Dean, who was far ahead in the superdelegate race going into the Iowa caucuses in February 2004, although Kerry led the endorsement race in Iowa, New Hampshire, Arizona, South Carolina, New Mexico and Nevada. **Kerry's main perceived weakness was in his nearby territory of New Hampshire and nearly all national polls.** Most other states did not have updated polling numbers to give an accurate placing for the Kerry campaign before Iowa.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **neighboring state** and **nearby territory** interchangeable (i.e., having the same meaning)?

Pair 79

P1: Mice having access to activity wheels engaged in voluntary exercise and increased their propensity to run as adults. Artificial selection of mice exhibited significant heritability in voluntary exercise levels, with "high-runner" breeds having enhanced aerobic capacity, hippocampal neurogenesis, and skeletal muscle morphology. **The effects of exercise training appear to be heterogeneous across non-mammalian species.** As examples, exercise training of salmon showed minor improvements of endurance, and a forced swimming regimen of yellowtail amberjack and rainbow trout accelerated their growth rates and altered muscle morphology favorable for sustained swimming.

P2: Mice having access to activity wheels engaged in voluntary exercise and increased their propensity to run as adults. Artificial selection of mice exhibited significant heritability in voluntary exercise levels, with "high-runner" breeds having enhanced aerobic capacity, hippocampal neurogenesis, and skeletal muscle morphology. **The effects of working out appear to be heterogeneous across non-mammalian species.** As examples, exercise training of salmon showed minor improvements of endurance, and a forced swimming regimen of yellowtail amberjack and rainbow trout accelerated their growth rates and altered muscle morphology favorable for sustained swimming.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **exercise training** and **working out** interchangeable (i.e., having the same meaning)?

Pair 80

P1: Lieutenant Richard O’Kane joined the precommissioning crew and served as her executive officer (XO) on five war patrols under Kennedy and Morton (O’Kane later received a Medal of Honor for his service in). Following fitting out and initial training along the California coast (which took her as far south as San Diego), "Wahoo" departed Mare Island on 12 August for Hawaii. **She arrived at Pearl Harbor on 18 August and underwent exercise training until 21 August.** First patrol, August – October 1942.

P2: Lieutenant Richard O’Kane joined the precommissioning crew and served as her executive officer (XO) on five war patrols under Kennedy and Morton (O’Kane later received a Medal of Honor for his service in). Following fitting out and initial training along the California coast (which took her as far south as San Diego), "Wahoo" departed Mare Island on 12 August for Hawaii. **She arrived at Pearl Harbor on 18 August and underwent drill practice until 21 August.** First patrol, August – October 1942.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **exercise training** and **drill practice** interchangeable (i.e., having the same meaning)?

Pair 81

P1: Sells’ death sentence was carried out at the Texas State Penitentiary in Huntsville. When asked if he would like to make a final statement, Sells replied, "No." **As a lethal dose of pentobarbital was administered, he took a few deep breaths,** closed his eyes, and began to snore. Less than a minute later, he stopped moving.

P2: Sells’ death sentence was carried out at the Texas State Penitentiary in Huntsville. When asked if he would like to make a final statement, Sells replied, "No." **As a lethal dose of pentobarbital was administered, he took a few shallow gasps of air,** closed his eyes, and began to snore. Less than a minute later, he stopped moving.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **deep breaths** and **shallow gasps of air** interchangeable (i.e., having the same meaning)?

Pair 82

P1: The only commonality Ai Chi shares with the other methods is that it too is performed at shoulder level in warm water. To perform Ai Chi, the participant stands with their feet shoulder-width apart with their knees slightly bent (to prevent strain on their lower back). While they coordinate **deep breaths** and **rhythmical inhaling and exhaling**, they **slowly move their body to stretch out muscles**. By engaging their core/abdominal muscles to shift their body weight, the participant is able to lift their arms and legs to perform various stretches.

P2: The only commonality Ai Chi shares with the other methods is that it too is performed at shoulder level in warm water. To perform Ai Chi, the participant stands with their feet shoulder-width apart with their knees slightly bent (to prevent strain on their lower back). While they coordinate **profound exhaling** and **rhythmical inhaling and exhaling**, they **slowly move their body to stretch out muscles**. By engaging their core/abdominal muscles to shift their body weight, the participant is able to lift their arms and legs to perform various stretches.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **deep breaths** and **profound exhaling** interchangeable (i.e., having the same meaning)?

Pair 83

P1: The name "cold cream" derives from the cooling feeling that the cream leaves on the skin. Variations of the product have been used for nearly 2000 years. **cold cream** is mainly used for skin treatment (such as a facial mask or lip balm), due to its moisturizing properties. It can also be used to remove makeup and as shaving cream.

P2: The name "cold cream" derives from the cooling feeling that the cream leaves on the skin. Variations of the product have been used for nearly 2000 years. **chilled ointment** is mainly used for skin treatment (such as a facial mask or lip balm), due to its moisturizing properties. It can also be used to remove makeup and as shaving cream.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **cold cream** and **chilled ointment** interchangeable (i.e., having the same meaning)?

Pair 84

P1: Baton Rouge. In 2019, Baton Rouge had 83 murders with homicide rate was a per-capita homicide rate 31. This is a **downwards trend** from the 106 murders in 2017, the recent record high. 2011

P2: Baton Rouge. In 2019, Baton Rouge had 83 murders with homicide rate was a per-capita homicide rate 31. This is a **decreasing tendency** from the 106 murders in 2017, the recent record high. 2011

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **downwards trend** and **decreasing tendency** interchangeable (i.e., having the same meaning)?

Pair 85

P1: Film columnist Louella Parsons wrote, "'Dive Bomber' again makes us glad we are Americans protected by a Navy as competent as ours." Filming at the active naval base in San Diego required great care, especially for aerial sequences. Curtiz shot **every foot** of "Dive Bomber" with Navy assistance and under strict Navy scrutiny. To create realistic shots, he mounted cameras on the Navy's planes to achieve "amazing point-of-view shots," taking viewers inside the cockpit during flight.

P2: Film columnist Louella Parsons wrote, "'Dive Bomber' again makes us glad we are Americans protected by a Navy as competent as ours." Filming at the active naval base in San Diego required great care, especially for aerial sequences. Curtiz shot **each inch** of "Dive Bomber" with Navy assistance and under strict Navy scrutiny. To create realistic shots, he mounted cameras on the Navy's planes to achieve "amazing point-of-view shots," taking viewers inside the cockpit during flight.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **every foot** and **each inch** interchangeable (i.e., having the same meaning)?

Pair 86

P1: He concludes that the correspondence between meaning and grammatical form is "imperfect", "inexact" and "vague." Consequently, it is "relatively useless" to use meaning "as a basis for grammatical description". To support his point, Chomsky considers a **similar relation** between semantics and phonology. He shows that in order to build a theory of phonemic distinction based on meaning would entail "complex", "exhaustive" and "laborious investigation" of an "immense", "vast corpus".

P2: He concludes that the correspondence between meaning and grammatical form is "imperfect", "inexact" and "vague." Consequently, it is "relatively useless" to use meaning "as a basis for grammatical description". To support his point, Chomsky considers a **comparable association** between semantics and phonology. He shows that in order to build a theory of phonemic distinction based on meaning would entail "complex", "exhaustive" and "laborious investigation" of an "immense", "vast corpus".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **similar relation** and **comparable association** interchangeable (i.e., having the same meaning)?

Pair 87

P1: Henry VIII eventually married his brother Arthur's widow Catherine of Aragon; they had only one surviving child, the future Mary I. After nearly twenty five years of marriage, Henry, with much trouble and causing much unrest, had his marriage to Catherine annulled, claiming the marriage as unlawful due to her being the widow of his brother, and splitting with the Roman Catholic Church in the process. This action brought about the birth of the English Reformation, and the **eventual beginning** of the Church of England. Henry then married his pregnant mistress Anne Boleyn on 28 May 1533.

P2: Henry VIII eventually married his brother Arthur's widow Catherine of Aragon; they had only one surviving child, the future Mary I. After nearly twenty five years of marriage, Henry, with much trouble and causing much unrest, had his marriage to Catherine annulled, claiming the marriage as unlawful due to her being the widow of his brother, and splitting with the Roman Catholic Church in the process. This action brought about the birth of the English Reformation, and the **inevitable start** of the Church of England. Henry then married his pregnant mistress Anne Boleyn on 28 May 1533.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **eventual beginning** and **inevitable start** interchangeable (i.e., having the same meaning)?

Pair 88

P1: The women's squad eclipsed their 16 wins in 2010 by earning a 17-9 record and going 2-2 in conference action. 2012 saw the women's team continue their improvement with a 19-9 overall mark and 3-4 in the conference. The 2012 men finished with a **milestone season** of 23-4 including a 5-2 mark in the GSC. The team won 17 straight matches during the season and qualified for the South Regional at Lynn University.

P2: The women's squad eclipsed their 16 wins in 2010 by earning a 17-9 record and going 2-2 in conference action. 2012 saw the women's team continue their improvement with a 19-9 overall mark and 3-4 in the conference. The 2012 men finished with a **breakthrough period** of 23-4 including a 5-2 mark in the GSC. The team won 17 straight matches during the season and qualified for the South Regional at Lynn University.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **milestone season** and **breakthrough period** interchangeable (i.e., having the same meaning)?

Pair 89

P1: The first possible sighting was around 21:15 on 3 May, 45 minutes before Madeleine's mother raised the alarm. Jane Tanner, who was travelling with the McCanns, noticed a man walking along the road on which the McCanns' holiday apartment was situated. **She said he was carrying a barefoot child who was wearing light-coloured pink pyjamas with a floral pattern.** Scotland Yard has since ruled this out, saying in October 2013 that a British holidaymaker who was carrying his child home at that time had been identified, was believed to be the man seen by Tanner, and was not involved in the abduction.

P2: The first possible sighting was around 21:15 on 3 May, 45 minutes before Madeleine's mother raised the alarm. Jane Tanner, who was travelling with the McCanns, noticed a man walking along the road on which the McCanns' holiday apartment was situated. **She said he was carrying a barefoot child who was wearing light-coloured pink pyjamas with a flower design.** Scotland Yard has since ruled this out, saying in October 2013 that a British holidaymaker who was carrying his child home at that time had been identified, was believed to be the man seen by Tanner, and was not involved in the abduction.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **floral pattern** and **flower design** interchangeable (i.e., having the same meaning)?

Pair 90

P1: Audiences generally appeared to find the music somewhat more sterile and less engaging than that of its conceptually more cohesive predecessor, "Computer World". Compared to the band's four preceding albums, some critics have pointed to the lack of a strong and sufficiently intriguing theme to tie the "Electric Café" material together. **Furthermore, the near half-decade hiatus in the band's record releases and performance activity lost them crucial momentum in their career.** While recognising Kraftwerk's influence on groups such as Depeche Mode and The Human League, journalist Ian Cranna writing in "Smash Hits" described the album as "frankly rather dull" adding "one can only assume it's an exercise for their own amusement".

P2: Audiences generally appeared to find the music somewhat more sterile and less engaging than that of its conceptually more cohesive predecessor, "Computer World". Compared to the band's four preceding albums, some critics have pointed to the lack of a strong and sufficiently intriguing theme to tie the "Electric Café" material together. **Furthermore, the near half-decade hiatus in the band's record releases and concert life lost them crucial momentum in their career.** While recognising Kraftwerk's influence on groups such as Depeche Mode and The Human League, journalist Ian Cranna writing in "Smash Hits" described the album as "frankly rather dull" adding "one can only assume it's an exercise for their own amusement".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **performance activity** and **concert life** interchangeable (i.e., having the same meaning)?

Pair 91

P1: Finally, Serbia claimed that Serbian cultural heritage in Kosovo was not as secure as Albania stated, as in 2004 over 30 Christian Orthodox churches were destroyed, with the remaining churches being routinely desecrated. Albania (First) Albania used its Right of Reply to respond to Serbia's Right of Reply. **It began by stating that an ever-growing number of Member States were convinced that an independent Kosovo was the only solution for the war-torn region.** Albania then reiterated that the ICJ ruling stated that the declaration of independence did not violate any provision of international law and that Serbia was expected to accept and respect the Court's findings as laid out in Chapter XIV of the United Nations Charter.

P2: Finally, Serbia claimed that Serbian cultural heritage in Kosovo was not as secure as Albania stated, as in 2004 over 30 Christian Orthodox churches were destroyed, with the remaining churches being routinely desecrated. Albania (First) Al-

bania used its Right of Reply to respond to Serbia's Right of Reply. It began by stating that an **augmenting percentage** of Member States were convinced that an independent Kosovo was the only solution for the war-torn region. Albania then reiterated that the ICJ ruling stated that the declaration of independence did not violate any provision of international law and that Serbia was expected to accept and respect the Court's findings as laid out in Chapter XIV of the United Nations Charter.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **ever-growing number** and **augmenting percentage** interchangeable (i.e., having the same meaning)?

Pair 92

P1: Many other features were soon offered, including deck rigging to carry gear. The fast design with more glide is an attractive option for those who plan to keep their adventures inland. Tour paddle boarding has become a way for individuals to seek adventure, serenity, personal achievement and a **deeper connection** with nature. In 2018 Cal Major became the first person to paddle Land's End to John o' Groats, the classic British long-distance journey, taking 59 days.

P2: Many other features were soon offered, including deck rigging to carry gear. The fast design with more glide is an attractive option for those who plan to keep their adventures inland. Tour paddle boarding has become a way for individuals to seek adventure, serenity, personal achievement and a **closer association** with nature. In 2018 Cal Major became the first person to paddle Land's End to John o' Groats, the classic British long-distance journey, taking 59 days.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **deeper connection** and **closer association** interchangeable (i.e., having the same meaning)?

Pair 93

P1: He tries to resist, saying that it isn't his job to inform on a fellow cop, so Rawls orders him either to solve one of his open cases, all of which are difficult cases, inform on McNulty or leave the Homicide Unit altogether. Landsman eventually recommends a psychic, "Madame LaRue", and Santangelo, in desperation, follows her instructions to bury a doll in the murder victim's grave. That evening, McNulty solves another of the open cases, and Santangelo, though pleased, doesn't understand why a **different case** was solved. Landsman tells him that the psychic was meant as a joke and that Bunk and McNulty did his work for him.

P2: He tries to resist, saying that it isn't his job to inform on a fellow cop, so Rawls orders him either to solve one of his open cases, all of which are difficult cases, inform on McNulty or leave the Homicide Unit altogether. Landsman eventually recommends a psychic, "Madame LaRue", and Santangelo, in desperation, follows her instructions to bury a doll in the murder victim's grave. That evening, McNulty solves another of the open cases, and Santangelo, though pleased, doesn't understand why a **contrasting crime** was solved. Landsman tells him that the psychic was meant as a joke and that Bunk and McNulty did his work for him.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **different case** and **contrasting crime** interchangeable (i.e., having the same meaning)?

Pair 94

P1: Early editions were paper based; it was then transferred to a web-only format, having ceased publication as a physically based report with Volume 8 in 2002. It continues to exist in blog form at www.worldclimatereport.com, although the website itself has not been updated since late 2012. World Climate Report presents a **skeptical view** of anthropogenic-driven mass global climate change, or as it describes, 'Global Warming Alarmism'. However, it does not reject the concepts of global climate change or greenhouse theory (or other well-established and widely accepted scientific theories or empirical studies), in general attempting to engender itself as giving a well balanced and scientific view of the sources

(though often at a contrary expense of its perceived adversaries: the aforementioned alleged 'Global Warming Alarmists').

P2: Early editions were paper based; it was then transferred to a web-only format, having ceased publication as a physically based report with Volume 8 in 2002. It continues to exist in blog form at www.worldclimatereport.com, although the website itself has not been updated since late 2012. World Climate Report presents a **cynical perspective of anthropogenic-driven mass global climate change**, or as it describes, 'Global Warming Alarmism'. However, it does not reject the concepts of global climate change or greenhouse theory (or other well-established and widely accepted scientific theories or empirical studies), in general attempting to engender itself as giving a well balanced and scientific view of the sources (though often at a contrary expense of its perceived adversaries: the aforementioned alleged 'Global Warming Alarmists').

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **skeptical view** and **cynical perspective** interchangeable (i.e., having the same meaning)?

Pair 95

P1: During this time, only the wealthy used pillows. The number of pillows symbolized status so the more pillows one owned the more affluence they held. Pillows have long been produced around the world in order to help solve the **reoccurring problem** of neck, back, and shoulder pain while sleeping. Besides for comfort, the pillow was also used for keeping bugs and insects out of people's hair, mouth, nose, and ears while sleeping.

P2: During this time, only the wealthy used pillows. The number of pillows symbolized status so the more pillows one owned the more affluence they held. Pillows have long been produced around the world in order to help solve the **non-stop issue** of neck, back, and shoulder pain while sleeping. Besides for comfort, the pillow was also used for keeping bugs and insects out of people's hair, mouth, nose, and ears while sleeping.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **reoccurring problem** and **non-stop issue** interchangeable (i.e., having the same meaning)?

Pair 96

P1: The final repeats the same free routine and the score from the final free routine is added to the score from the preliminary technical routine to decide the overall winners. Both preliminary free and technical routines starting lists were decided by random draw. For the final however, two groups were made: the last six and the first six qualified duets, the **former group** starting first. The technical routine must be completed in between 2 minutes 5 seconds and 2 minutes 35 seconds.

P2: The final repeats the same free routine and the score from the final free routine is added to the score from the preliminary technical routine to decide the overall winners. Both preliminary free and technical routines starting lists were decided by random draw. For the final however, two groups were made: the last six and the first six qualified duets, the **previous team** starting first. The technical routine must be completed in between 2 minutes 5 seconds and 2 minutes 35 seconds.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **former group** and **previous team** interchangeable (i.e., having the same meaning)?

Pair 97

P1: This model uses the Euler numerical method to model consumption. He created his consumption theory in response to the Lucas critique. Using Euler equations to model the random walk of consumption has become the **dominant approach** to modeling consumption. Background.

P2: This model uses the Euler numerical method to model consumption. He created his consumption theory in response to the Lucas critique. Using Euler equations to model the random walk of consumption has become the **primary method**

to modeling consumption. Background.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **dominant approach** and **primary method** interchangeable (i.e., having the same meaning)?

Pair 98

P1: The season ends with Pragma exposing Tanu and winning back Abhi's trust. However, Abhishek gets into an accident and loses his memory. He forgets the **last one-and-a-half years** of his life, including Pragma who has to leave him for his own good. 1 month later.

P2: The season ends with Pragma exposing Tanu and winning back Abhi's trust. However, Abhishek gets into an accident and loses his memory. He forgets the **final eighteen months** of his life, including Pragma who has to leave him for his own good. 1 month later.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **last one-and-a-half years** and **final eighteen months** interchangeable (i.e., having the same meaning)?

Pair 99

P1: Stands. Main Stand Side. 530 seats in a **single stand** which sits on the halfway line, containing press/directors facilities. The blue seats now in place were bought from Leicester City's doomed Main Stand, due to ground improvements required for National Conference football.

P2: Stands. Main Stand Side. 530 seats in a **particular seating area** which sits on the halfway line, containing press/directors facilities. The blue seats now in place were bought from Leicester City's doomed Main Stand, due to ground improvements required for National Conference football.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **single stand** and **particular seating area** interchangeable (i.e., having the same meaning)?

Pair 100

P1: Farrow told her therapist that she feared Allen "would abuse Satchel" and that she worried that Allen had a sexual relationship "with another man". The family psychologist, Dr. Susan Coates, witnessed some of Allen's behavior and testified during the custody trial in 1993 that she saw it not as sexual but as "inappropriately intense because it excluded everybody else". Allen said later that he had paid Dylan **extra attention** to compensate for the time Farrow was spending with the newborn Satchel. According to Maureen Orth, Allen agreed in 1990 to discuss the issue in therapy sessions; but at the trial Coates said that Allen was not in therapy with her and that both parents were part of the children's therapy.

P2: Farrow told her therapist that she feared Allen "would abuse Satchel" and that she worried that Allen had a sexual relationship "with another man". The family psychologist, Dr. Susan Coates, witnessed some of Allen's behavior and testified during the custody trial in 1993 that she saw it not as sexual but as "inappropriately intense because it excluded everybody else". Allen said later that he had paid Dylan **additional care** to compensate for the time Farrow was spending with the newborn Satchel. According to Maureen Orth, Allen agreed in 1990 to discuss the issue in therapy sessions; but at the trial Coates said that Allen was not in therapy with her and that both parents were part of the children's therapy.

Please record your answer for the following question in the provided Google sheet

Pair 101

P1: [...] November 22: Arrival in Dallas. On Friday, November 22, 1963, at 11:38 a.m. CST, Kennedy, his wife Jacqueline, and the rest of the presidential entourage arrived at Love Field in northwest Dallas aboard Air Force One after a very short flight from nearby Carswell Air Force Base, west of Fort Worth. **The motorcade cars had been lined up in a certain order earlier that morning.** The original schedule was for the president to proceed in a long motorcade from Love Field through downtown Dallas, and end at the Dallas Business and Trade Mart.

P2: [...] November 22: Arrival in Dallas. On Friday, November 22, 1963, at 11:38 a.m. CST, Kennedy, his wife Jacqueline, and the rest of the presidential entourage arrived at Love Field in northwest Dallas aboard Air Force One after a very short flight from nearby Carswell Air Force Base, west of Fort Worth. **The motorcade cars had been lined up in a particular form earlier that morning.** The original schedule was for the president to proceed in a long motorcade from Love Field through downtown Dallas, and end at the Dallas Business and Trade Mart.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **certain order** and **particular form** interchangeable (i.e., having the same meaning)?

Pair 102

P1: Because of the disadvantages, this design has never been commonly used, but some people do experiment with it. Typically, the heliostat mirror moves at a rate that is $1/2$ the angular motion of the sun. **There is another arrangement that satisfies the definition of a heliostat yet has a mirror motion that is $2/3$ rd of the motion of the sun.** Many other types of heliostat have also occasionally been used.

P2: Because of the disadvantages, this design has never been commonly used, but some people do experiment with it. Typically, the heliostat mirror moves at a rate that is $1/2$ the angular motion of the sun. **There is an additional provision that satisfies the definition of a heliostat yet has a mirror motion that is $2/3$ rd of the motion of the sun.** Many other types of heliostat have also occasionally been used.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **another arrangement** and **an additional provision** interchangeable (i.e., having the same meaning)?

Pair 103

P1: Neptunium-237 and some isotopes of americium may be usable for nuclear explosives as well, but it is not clear that this has ever been implemented, and their plausible use in nuclear weapons is a matter of dispute. Fusion weapons. **The other basic type of nuclear weapon produces a large proportion of its energy in nuclear fusion reactions.** Such fusion weapons are generally referred to as thermonuclear weapons or more colloquially as hydrogen bombs (abbreviated as H-bombs), as they rely on fusion reactions between isotopes of hydrogen (deuterium and tritium).

P2: Neptunium-237 and some isotopes of americium may be usable for nuclear explosives as well, but it is not clear that this has ever been implemented, and their plausible use in nuclear weapons is a matter of dispute. Fusion weapons. **The other main form of nuclear weapon produces a large proportion of its energy in nuclear fusion reactions.** Such fusion weapons are generally referred to as thermonuclear weapons or more colloquially as hydrogen bombs (abbreviated as H-bombs), as they rely on fusion reactions between isotopes of hydrogen (deuterium and tritium).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **basic type** and **main form** interchangeable (i.e., having the same meaning)?

Pair 104

P1: The Toll of Birness (the junction of the A952 Fraserburgh road and A92 Peterhead road) to the south of Ardallie is six miles from Clola. The Tollhouse is home to Shannas Gordon Setters which have produced many champions in the breed in both the UK and overseas. The Toll House has an Ordnance Survey cut mark, a **basic type** of Benchmark on the corner of the house. Shannas school.

P2: The Toll of Birness (the junction of the A952 Fraserburgh road and A92 Peterhead road) to the south of Ardallie is six miles from Clola. The Tollhouse is home to Shannas Gordon Setters which have produced many champions in the breed in both the UK and overseas. The Toll House has an Ordnance Survey cut mark, a **standard sort** of Benchmark on the corner of the house. Shannas school.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **basic type** and **standard sort** interchangeable (i.e., having the same meaning)?

Pair 105

P1: One such scale is the Holmes and Rahe Stress Scale, also known as the Social Readjustment Rating Scale, or SRRS. Developed by psychiatrists Thomas Holmes and Richard Rahe in 1967, the scale lists 43 stressful events. To calculate **one's score**, add up the number of "life change units" if an event occurred in the past year. A score of more than 300 means that individual is at risk for illness, a score between 150 and 299 means risk of illness is moderate, and a score under 150 means that individual only has a slight risk of illness.

P2: One such scale is the Holmes and Rahe Stress Scale, also known as the Social Readjustment Rating Scale, or SRRS. Developed by psychiatrists Thomas Holmes and Richard Rahe in 1967, the scale lists 43 stressful events. To calculate **a subject's results**, add up the number of "life change units" if an event occurred in the past year. A score of more than 300 means that individual is at risk for illness, a score between 150 and 299 means risk of illness is moderate, and a score under 150 means that individual only has a slight risk of illness.

Please record your answer for the following question in the provided Google sheet

Pair 106

P1: Release. Broadcast. "The **iron ceiling**" was first aired in the United States on ABC and in Canada on CTV on February 3, 2015. Home media.

P2: Release. Broadcast. "The **firm roof**" was first aired in the United States on ABC and in Canada on CTV on February 3, 2015. Home media.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **iron ceiling** and **firm roof** interchangeable (i.e., having the same meaning)?

Pair 107

P1: He tried and failed to obtain the Vicariate of Padua from the Emperor but was reaffirmed as Imperial Vicar of Verona and Vicenza and made Imperial Vicar of Feltre, Monselice, Bassano and Conegliano. On Whitsunday (31 May) Louis was crowned Holy Roman Emperor at Milan. Cangrande kept lavish and ostentatious court at the city with a retinue of knights numbering over a thousand at the **lowest estimate**. If his aim was to impress the emperor of his superiority over the other Lombard magnates the most telling result was to arouse the jealousy and suspicion of Milan's rulers the Visconti and he soon found it prudent to return to Verona, where in June 1327 he involved himself in revisions to the city's legislature.

P2: He tried and failed to obtain the Vicariate of Padua from the Emperor but was reaffirmed as Imperial Vicar of Verona and Vicenza and made Imperial Vicar of Feltre, Monselice, Bassano and Conegliano. On Whitsunday (31 May) Louis

was crowned Holy Roman Emperor at Milan. Cangrande kept lavish and ostentatious court at the city with a retinue of knights numbering over a thousand at the **minimal guess**. If his aim was to impress the emperor of his superiority over the other Lombard magnates the most telling result was to arouse the jealousy and suspicion of Milan's rulers the Visconti and he soon found it prudent to return to Verona, where in June 1327 he involved himself in revisions to the city's legislature.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **lowest estimate** and **minimal guess** interchangeable (i.e., having the same meaning)?

Pair 108

P1: Summary. Gameplay information. The player must evade dogs, criminals, and other baddies as they go inside a monster's house, a **church yard**, "NASA", and even a store. In the actual stages of the game, it reverts to a side scrolling view.

P2: Summary. Gameplay information. The player must evade dogs, criminals, and other baddies as they go inside a monster's house, a **cemetery area**, "NASA", and even a store. In the actual stages of the game, it reverts to a side scrolling view.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **church yard** and **cemetery area** interchangeable (i.e., having the same meaning)?

Pair 109

P1: A deck prism is a prism inserted into the deck of a ship to provide light down below. For centuries, sailing ships used deck prisms to provide a **safe source** of natural sunlight to illuminate areas below decks. Before electricity, light below a vessel's deck was provided by candles, oil and kerosene lamps—all dangerous aboard a wooden ship.

P2: A deck prism is a prism inserted into the deck of a ship to provide light down below. For centuries, sailing ships used deck prisms to provide a **secure cause** of natural sunlight to illuminate areas below decks. Before electricity, light below a vessel's deck was provided by candles, oil and kerosene lamps—all dangerous aboard a wooden ship.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **safe source** and **secure cause** interchangeable (i.e., having the same meaning)?

Pair 110

P1: The series was made during his Italian period between 1621 and 1625 according to this "Notebook of Italian Drawings". The works in this series are mostly three-quarters portraits conducted in a Titianesque style in their iconography and use of color. The elegant gestures and **dynamic movement** of the elongated figure of Marie contrasts with her very human attachment to the Baby Jesus. In a deep sleep, he still holds the hand of his mother.

The works in this series are mostly three-quarters portraits conducted in a Titianesque style in their iconography and use of color. The elegant gestures and **powerful progress** of the elongated figure of Marie contrasts with her very human attachment to the Baby Jesus. In a deep sleep, he still holds the hand of his mother.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **dynamic movement** and **powerful progress** interchangeable (i.e., having the same meaning)?

Pair 111

P1: The river cuts between several mountains at this point, including Rich Mountain to the south and Buffalo Mountain to the north. Shortly after entering Washington County, the river makes a horseshoe bend near Embreeville, where it is bridged by Tennessee 81 and Tennessee 107 for the first time. At the northeastern end of Embreeville Mountain, the stream emerges from a large gap, and, turning west-southwest, is bridged by Tennessee 81 again. Here, it exits the Blue Ridge Mountains and enters the Ridge and Valley province, which is underlain primarily by sedimentary rock of the Lower Paleozoic Era.

P2: The river cuts between several mountains at this point, including Rich Mountain to the south and Buffalo Mountain to the north. Shortly after entering Washington County, the river makes a horseshoe bend near Embreeville, where it is bridged by Tennessee 81 and Tennessee 107 for the first time. At the northeastern end of Embreeville Mountain, the stream emerges from a big distance, and, turning west-southwest, is bridged by Tennessee 81 again. Here, it exits the Blue Ridge Mountains and enters the Ridge and Valley province, which is underlain primarily by sedimentary rock of the Lower Paleozoic Era.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are large gap and big distance interchangeable (i.e., having the same meaning)?

Pair 112

P1: A "Huffington Post" article about series finales cites it as "one of the few dramas that ended in a way that felt emotionally, tonally and thematically appropriate." In IGN's full series review, they say it "stands as one of the best final episodes of any show ever", and an article on Indiewire also placed it on their list of the best series finales. The episode was also nominated for a 2005 Hugo Award in the category of "Best Dramatic Presentation: short form". Matt Roush of "TV Guide" praised the series finale, finding it "incredibly inspiring" that Angel continues to seek redemption despite signing away the reward promised by the Shanshu Prophecy.

P2: A "Huffington Post" article about series finales cites it as "one of the few dramas that ended in a way that felt emotionally, tonally and thematically appropriate." In IGN's full series review, they say it "stands as one of the best final episodes of any show ever", and an article on Indiewire also placed it on their list of the best series finales. The episode was also nominated for a 2005 Hugo Award in the category of "Best Dramatic Presentation: brief system". Matt Roush of "TV Guide" praised the series finale, finding it "incredibly inspiring" that Angel continues to seek redemption despite signing away the reward promised by the Shanshu Prophecy.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are communication director and media chief interchangeable (i.e., having the same meaning)?

Pair 115

P1: The government expects that the housing will be "fit for habitation" so a Section 8 inspection identifies compliance with HUD's Housing Quality Standards (HQS). Pre-delivery inspection. An inspection may occur in a purchased house prior to the deal's closure, in what is known as a "pre-delivery" inspection. Structural inspection.

P2: The government expects that the housing will be "fit for habitation" so a Section 8 inspection identifies compliance with HUD's Housing Quality Standards (HQS). Pre-delivery inspection. An inspection may occur in a retained dwelling prior to the deal's closure, in what is known as a "pre-delivery" inspection. Structural inspection.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are purchased house and retained dwelling interchangeable (i.e., having the same meaning)?

Pair 116

P1: The Scotland national B rugby union team was one of several national rugby union teams behind the Scottish national side. It was largely used as a development side and began in the era when Scotland had little in the way of an age-grade pathway. It has now been disbanded - having been supplanted by the age-grade national teams; and the Scotland 'A' side.

P2: The Scotland national B rugby union team was one of several national rugby union teams behind the Scottish national side. It was largely used as a training position and began in the era when Scotland had little in the way of an age-grade pathway. It has now been disbanded - having been supplanted by the age-grade national teams; and the Scotland 'A' side.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are development side and training position interchangeable (i.e., having the same meaning)?

Pair 117

P1: The play is a romantic comedy exploring the power of the logo and how hard it is to resist. Siobhan McCluskey, a politically aware 13-year-old vegetarian, has a crush on fellow pupil, Shaun Holmes, who only cares about his Nike Air Jordans. They are brought together following a chance encounter with some dog dirt and a trip to a bowling alley. Crouch performs the piece using a platform tilted towards the audience, on which he places pairs of shoes representing the characters.

P2: The play is a romantic comedy exploring the power of the logo and how hard it is to resist. Siobhan McCluskey, a politically aware 13-year-old vegetarian, has a crush on fellow pupil, Shaun Holmes, who only cares about his Nike Air

Jordans. They are brought together following a chance encounter with some **hound crap** and a trip to a bowling alley. Crouch performs the piece using a platform tilted towards the audience, on which he places pairs of shoes representing the characters.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **dog dirt** and **hound crap** interchangeable (i.e., having the same meaning)?

Pair 118

P1: In 1978, New York State passed the Pooper-Scooper Law. It was so controversial that Mayor Koch needed the New York State Legislature to pass it, after being unable to convince the New York City Council. The New York Times called actress and consumer advocate Fran Lee "New York's foremost fighter against **dog dirt**". October 20, 1978, KQED San Francisco news footage featured scenes from a Harvey Milk press conference in Duboce Park in which he discussed the city's new "pooper scooper law" with a how-to demonstration.

P2: In 1978, New York State passed the Pooper-Scooper Law. It was so controversial that Mayor Koch needed the New York State Legislature to pass it, after being unable to convince the New York City Council. The New York Times called actress and consumer advocate Fran Lee "New York's foremost fighter against **canine poop**". October 20, 1978, KQED San Francisco news footage featured scenes from a Harvey Milk press conference in Duboce Park in which he discussed the city's new "pooper scooper law" with a how-to demonstration.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **dog dirt** and **canine poop** interchangeable (i.e., having the same meaning)?

Pair 119

P1: Often space is relatively cheap, such as by spreading objects out on the floor or over a large area, but operations are expensive, particularly moving an object a large distance – locality of reference is important. Merge sorts are also practical for physical objects, particularly as two hands can be used, one for each list to merge, while other algorithms, such as heap sort or quick sort, are poorly suited for human use. Other algorithms, such as library sort, a variant of insertion sort that leaves spaces, are also practical for **physical use**. Simple sorts.

P2: Often space is relatively cheap, such as by spreading objects out on the floor or over a large area, but operations are expensive, particularly moving an object a large distance – locality of reference is important. Merge sorts are also practical for physical objects, particularly as two hands can be used, one for each list to merge, while other algorithms, such as heap sort or quick sort, are poorly suited for human use. Other algorithms, such as library sort, a variant of insertion sort that leaves spaces, are also practical for **actual usage**. Simple sorts.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **physical use** and **actual usage** interchangeable (i.e., having the same meaning)?

Pair 120

P1: The senator said he would not allow his identity to be revealed. "Oh, he had to run for re-election... the McGovernites would kill him if they knew he had said that," Novak said. On July 15, 2007, after the **source's death**, Novak said on "Meet the Press" that the unnamed senator was Thomas Eagleton. Political analyst Bob Shrum says that Eagleton would never have been selected as McGovern's running mate if it had been known at the time that Eagleton was the source of the quote: "Boy, do I wish he would have let you publish his name.

P2: The senator said he would not allow his identity to be revealed. "Oh, he had to run for re-election... the McGovernites would kill him if they knew he had said that," Novak said. On July 15, 2007, after the **informant's expiration**, Novak said on "Meet the Press" that the unnamed senator was Thomas Eagleton. Political analyst Bob Shrum says that Eagleton would never have been selected as McGovern's running mate if it had been known at the time that Eagleton was the source of the quote: "Boy, do I wish he would have let you publish his name.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **source's death** and **informant's expiration** interchangeable (i.e., having the same meaning)?

Pair 121

P1: Eight minutes after "Finnegan" detected "I-370", crash-dived and broke radar contact with "Finnegan", but at 0659 "Finnegan" acquired "I-370" on sonar. "Finnegan" launched an unsuccessful Hedgehog attack, followed by a pattern of 13 depth charges set to explode deep. **She launched another Hedgehog attack, then dropped a pattern of 13 depth charges set for medium depth at around 10:00.** At around 10:05, "Finnegan" s crew heard a deep rumbling sound, then observed air bubbles reaching the surface followed by an explosion.

P2: Eight minutes after "Finnegan" detected "I-370", crash-dived and broke radar contact with "Finnegan", but at 0659 "Finnegan" acquired "I-370" on sonar. "Finnegan" launched an unsuccessful Hedgehog attack, followed by a pattern of 13 depth charges set to explode deep. **She launched another Hedgehog attack, then dropped a pattern of 13 depth charges set for intermediate extent at around 10:00.** At around 10:05, "Finnegan" s crew heard a deep rumbling sound, then observed air bubbles reaching the surface followed by an explosion.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **medium depth** and **intermediate extent** interchangeable (i.e., having the same meaning)?

Pair 122

P1: In 2013, she appeared on Canadian-American horror film "Horns" starring Daniel Radcliffe, where she played the role of young Glenna. Furthermore, that same year she appeared on three episodes of the American crime drama "The Killing" and again on an episode of "R. L. Stine's The Haunting Hour: The Series" In 2014, MacNeil appeared on several TV series such as "Almost Human", "Motive", and "Strange Empire". **As well, she appeared on two TV films, "The Unauthorized Saved by the bell story" and Damaged.** She was nominated that same year to the 35th Young Artist Awards in the category of "Best Performance in a TV Series - Guest Starring Young Actress 17-21" for her appearance in "R. L. Stine's The Haunting Hour" and in the category of "Best Performance in a TV Series - Recurring Young Actress 17-21" for her recurring role in "The Killing".

P2: In 2013, she appeared on Canadian-American horror film "Horns" starring Daniel Radcliffe, where she played the role of young Glenna. Furthermore, that same year she appeared on three episodes of the American crime drama "The Killing" and again on an episode of "R. L. Stine's The Haunting Hour: The Series" In 2014, MacNeil appeared on several TV series such as "Almost Human", "Motive", and "Strange Empire". **As well, she appeared on two TV films, "The Unauthorized Saved by the chime take" and Damaged.** She was nominated that same year to the 35th Young Artist Awards in the category of "Best Performance in a TV Series - Guest Starring Young Actress 17-21" for her appearance in "R. L. Stine's The Haunting Hour" and in the category of "Best Performance in a TV Series - Recurring Young Actress 17-21" for her recurring role in "The Killing".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **bell story** and **chime take** interchangeable (i.e., having the same meaning)?

Pair 123

P1: The tower over the crossing was replaced with a narrow flèche. The windows of the south side of the cathedral were widened and lost their gothic tracery. **The steep roofs of the westwork were replaced with baroque onion domes and the bell story received a clock.** In the interior a large part of the old interior decoration was removed and replaced, so that only a few pieces of the gothic decoration have survived, which are no longer in their proper context.

P2: The tower over the crossing was replaced with a narrow flèche. The windows of the south side of the cathedral were widened and lost their gothic tracery. **The steep roofs of the westwork were replaced with baroque onion domes and the gong level received a clock.** In the interior a large part of the old interior decoration was removed and replaced, so that

only a few pieces of the gothic decoration have survived, which are no longer in their proper context.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **bell story** and **gong level** interchangeable (i.e., having the same meaning)?

Pair 124

P1: At a specialized level, knowledge environments need sophisticated architecture and modeling capabilities. This approach is necessary when the creator of the knowledge environment wants to deliver replicable results in hundreds of specific instances of the same knowledge environment. **On the other hand, the strengthening trend of public authorship leads to open-ended ontologies by means of, say, tagging or folksonomies.** In a significant sense, knowledge environments are in such cases created not only by their authors or owners but also by the contributors of their ontologies.

P2: At a specialized level, knowledge environments need sophisticated architecture and modeling capabilities. This approach is necessary when the creator of the knowledge environment wants to deliver replicable results in hundreds of specific instances of the same knowledge environment. **On the other hand, the hardening direction of public authorship leads to open-ended ontologies by means of, say, tagging or folksonomies.** In a significant sense, knowledge environments are in such cases created not only by their authors or owners but also by the contributors of their ontologies.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **strengthening trend** and **hardening direction** interchangeable (i.e., having the same meaning)?

Pair 125

P1: Although the early 1990s saw marked economic growth, commentators suggested that Mahathir's liberal policies had played the key role in his popularity and the Barisan Nasional's landslide 1995 election victory. One pundit wrote that "Most Malaysians could not remember a time of greater prosperity or lesser inter-ethnic recrimination. ... **Economic indicators alone would not have captured the pride that Malaysians had discovered, perhaps for [the] first time, in being Malaysian.**" Lim Kit Siang attributed the opposition's defeat to Mahathir's liberalism and the government's adoption of the DAP's stance on issues like "language, culture and education".

P2: Although the early 1990s saw marked economic growth, commentators suggested that Mahathir's liberal policies had played the key role in his popularity and the Barisan Nasional's landslide 1995 election victory. One pundit wrote that "Most Malaysians could not remember a time of greater prosperity or lesser inter-ethnic recrimination. ... **Economic indicators alone would not have captured the pride that Malaysians had discovered, perhaps for [primary occasion, in being Malaysian.**" Lim Kit Siang attributed the opposition's defeat to Mahathir's liberalism and the government's adoption of the DAP's stance on issues like "language, culture and education".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **the] first time** and **primary occasion** interchangeable (i.e., having the same meaning)?

Pair 126

P1: The PCYF were successful in having this measure adopted by the party, thus making it the first federal political party to call for income tax cuts. In the 1998 PCYF elections, future MP Patrick Brown, who then was then only 19 years old, was elected PCYF president in a hotly contested race. **Brown won the presidential election based on heavy support from Alberta, Ontario and Quebec.** Also elected were Adam Daifallah and Jasmine Ignieski.

P2: The PCYF were successful in having this measure adopted by the party, thus making it the first federal political party to call for income tax cuts. In the 1998 PCYF elections, future MP Patrick Brown, who then was then only 19 years old, was elected PCYF president in a hotly contested race. **Brown won the presidential election based on substantial assistance from Alberta, Ontario and Quebec.** Also elected were Adam Daifallah and Jasmine Ignieski.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **heavy support** and **substantial assistance** interchangeable (i.e., having the same meaning)?

Pair 127

P1: Shifting from entity to incremental mindset to improve achievement. Understanding differences between those who believe in entity theory versus incremental theory allows educators to predict how students will persevere in a classroom. Then, educators can change behaviors that may contribute to academic shortcomings for those with entity tendencies and **low confidence** in their abilities. While these implicit beliefs regarding where intelligence comes from are relatively stable across time and permeate all aspects of behavior, it is possible to change peoples' perspectives on their abilities for a given task with the right priming.

P2: Shifting from entity to incremental mindset to improve achievement. Understanding differences between those who believe in entity theory versus incremental theory allows educators to predict how students will persevere in a classroom. Then, educators can change behaviors that may contribute to academic shortcomings for those with entity tendencies and **limited assurance** in their abilities. While these implicit beliefs regarding where intelligence comes from are relatively stable across time and permeate all aspects of behavior, it is possible to change peoples' perspectives on their abilities for a given task with the right priming.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **low confidence** and **limited assurance** interchangeable (i.e., having the same meaning)?

Pair 128

P1: The 2015 "Legado Final" tournament was won by the father/son team of El Hijo del Diablo and Dragón Celestial by defeating El Hijo del Solar and El Solar, "Los Panteras" (El Hijo del Pantera and El Pantera), "Las Piratas" (Pirata Morgan Jr. and Pirata Morgan), Universo 2000 Jr. and Universo 2000, Hijo de Máscara Año 2000 and Cien Caras Jr. After the match the winning team announced that from that point on Dragón Celestial would be known as "El Diablo Jr." changing his ring character to acknowledge his heritage. As of the 2015 "Legado Final" show 60 wrestlers have competed on at least one of the shows, working one of the 12 matches held as part of the event series. All wrestlers have been male and competed in the **regular division**, no female wrestlers and no "Mini-Estrellas". Only three wrestlers, El Pantera, his son El Hijo del Pantera and Pirata Morgan have competed in all three "Legado Final" events held so far and have all participated in the actual "Legado Final" match itself.

P2: The 2015 "Legado Final" tournament was won by the father/son team of El Hijo del Diablo and Dragón Celestial by defeating El Hijo del Solar and El Solar, "Los Panteras" (El Hijo del Pantera and El Pantera), "Las Piratas" (Pirata Morgan Jr. and Pirata Morgan), Universo 2000 Jr. and Universo 2000, Hijo de Máscara Año 2000 and Cien Caras Jr. After the match the winning team announced that from that point on Dragón Celestial would be known as "El Diablo Jr." changing his ring character to acknowledge his heritage. As of the 2015 "Legado Final" show 60 wrestlers have competed on at least one of the shows, working one of the 12 matches held as part of the event series. All wrestlers have been male and competed in the **ordinary section**, no female wrestlers and no "Mini-Estrellas". Only three wrestlers, El Pantera, his son El Hijo del Pantera and Pirata Morgan have competed in all three "Legado Final" events held so far and have all participated in the actual "Legado Final" match itself.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **regular division** and **ordinary section** interchangeable (i.e., having the same meaning)?

Pair 129

P1: The wine is much more acidic than that of Chablis and is normally made bone-dry. Despite receiving the same amount of sunshine as the Chablis region, Chardonnay grapes in Champagne rarely attain full ripeness due to the mean temperature of the region being around , barely above the minimum average temperature needed to ripen grapes. There-

fore, the Chardonnay grapes do not fully develop their fruit flavors and the **still version** of Champagne can taste very "un-Chardonnay"-like because of this. However, it does lessen the premium on needing to keep yields low that other wine regions battle, since not much flavor is going to develop in the grapes, anyway.

P2: The wine is much more acidic than that of Chablis and is normally made bone-dry. Despite receiving the same amount of sunshine as the Chablis region, Chardonnay grapes in Champagne rarely attain full ripeness due to the mean temperature of the region being around , barely above the minimum average temperature needed to ripen grapes. Therefore, the Chardonnay grapes do not fully develop their fruit flavors and the **flay type** of Champagne can taste very "un-Chardonnay"-like because of this. However, it does lessen the premium on needing to keep yields low that other wine regions battle, since not much flavor is going to develop in the grapes, anyway.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **still version** and **flay type** interchangeable (i.e., having the same meaning)?

Pair 130

P1: The live nodes of T are just the nodes that are reachable from the current root at the current time (that is, after the last modification). The full live nodes are the live nodes whose modification boxes are full. Each modification involves some number of copies, say k, followed by **1 change** to a modification box. Consider each of the k copies.

P2: The live nodes of T are just the nodes that are reachable from the current root at the current time (that is, after the last modification). The full live nodes are the live nodes whose modification boxes are full. Each modification involves some number of copies, say k, followed by **an alteration** to a modification box. Consider each of the k copies.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **1 change** and **an alteration** interchangeable (i.e., having the same meaning)?

Pair 131

P1: Once again, the prince was surprised at the sight, and Channa explained that all beings are subject to disease and pain. This further troubled the mind of the prince. The **third sight** was of a dead body. As before, Channa explained to the prince that death is an inevitable fate that befalls everyone.

P2: Once again, the prince was surprised at the sight, and Channa explained that all beings are subject to disease and pain. This further troubled the mind of the prince. The **tertiary vision** was of a dead body. As before, Channa explained to the prince that death is an inevitable fate that befalls everyone.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **third sight** and **tertiary vision** interchangeable (i.e., having the same meaning)?

Pair 132

P1: There was, however, a claim against the Canadian Armed Forces for discrimination based on sexual orientation. The Canadian Human Rights Act. The Canadian Human Rights Act is considered quasi-constitutional legislation, and applies to **federal government agencies** and Crown corporations including the Canadian Armed Forces. It acts to prohibit discrimination on specified grounds, such as race, sex, age, religion, and in the context of employment and publicly available services.

P2: There was, however, a claim against the Canadian Armed Forces for discrimination based on sexual orientation. The Canadian Human Rights Act. The Canadian Human Rights Act is considered quasi-constitutional legislation, and applies to **unionized authoritative departments** and Crown corporations including the Canadian Armed Forces. It acts to prohibit discrimination on specified grounds, such as race, sex, age, religion, and in the context of employment and publicly available services.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **federal government agencies** and **unionized authoritative departments** interchangeable (i.e., having the same meaning)?

Pair 133

P1: In 1997, EMI was awarded the W. Edwards Deming Outstanding Training Award by the United States Department of Agriculture Graduate School at the Excellence in Government Conference. This annual award is presented to an organization for an impressive workforce development and training initiative that has measurably improved their organization's performance. EMI has provided technical support to dozens of other **federal government agencies** and **State offices on advanced distributed learning technology development and application**. A vital asset to FEMA's disaster operations is the Disaster Field Training Operations (DFTO) implemented by EMI.

P2: In 1997, EMI was awarded the W. Edwards Deming Outstanding Training Award by the United States Department of Agriculture Graduate School at the Excellence in Government Conference. This annual award is presented to an organization for an impressive workforce development and training initiative that has measurably improved their organization's performance. EMI has provided technical support to dozens of other **national governmental divisions** and **State offices on advanced distributed learning technology development and application**. A vital asset to FEMA's disaster operations is the Disaster Field Training Operations (DFTO) implemented by EMI.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **federal government agencies** and **national governmental divisions** interchangeable (i.e., having the same meaning)?

Pair 134

P1: Narrow 'mummy-style' quilts and sleeping bags are lighter than traditional rectangular-shaped items. Down is lighter than synthetic fibers for insulation, but is susceptible to loft loss caused by moisture. Some quilts are **bottom-less**, relying on the user's sleeping pad to guard against **cold ground**. A top bag is more like a conventional sleeping bag in that it wraps around the user's entire body but the bottom fabric contains no insulation.

P2: Narrow 'mummy-style' quilts and sleeping bags are lighter than traditional rectangular-shaped items. Down is lighter than synthetic fibers for insulation, but is susceptible to loft loss caused by moisture. Some quilts are **bottom-less**, relying on the user's sleeping pad to guard against **brisk soil**. A top bag is more like a conventional sleeping bag in that it wraps around the user's entire body but the bottom fabric contains no insulation.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **cold ground** and **brisk soil** interchangeable (i.e., having the same meaning)?

Pair 135

P1: Death and canonization. In October 1964, Kuksha fell and broke his hip. Lying on the **cold ground**, he caught a cold and developed pneumonia. Refusing to take medicine, Kuksha died on 24 December 1964 and was buried in the cemetery of the Holy Dormition Monastery in Odessa.

P2: Death and canonization. In October 1964, Kuksha fell and broke his hip. Lying on the **bleak terrain**, he caught a cold and developed pneumonia. Refusing to take medicine, Kuksha died on 24 December 1964 and was buried in the cemetery of the Holy Dormition Monastery in Odessa.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **cold ground** and **bleak terrain** interchangeable (i.e., having the same meaning)?

Pair 136

P1: The TUC, though four to five million strong with over two hundred unions affiliated, had up to then been a largely ineffective body. As the General Secretary, Fred Bramley, was ill, Citrine took on a much wider role from the start. **In time, he would transform it into a coherent and effective lobbying organisation for a growing movement.** He acted enthusiastically as General Secretary during the General Strike of 1926 and was confirmed in that position after it, without opposition, at the Trades Union Congress of September 1926.

P2: The TUC, though four to five million strong with over two hundred unions affiliated, had up to then been a largely ineffective body. As the General Secretary, Fred Bramley, was ill, Citrine took on a much wider role from the start. **In time, he would transform it into a coherent and effective lobbying organisation for a burgeoning faction.** He acted enthusiastically as General Secretary during the General Strike of 1926 and was confirmed in that position after it, without opposition, at the Trades Union Congress of September 1926.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **growing movement** and **burgeoning faction** interchangeable (i.e., having the same meaning)?

Pair 137

P1: The design of the tower was completed in 2005, but ground works did not begin until Spring 2006. The building began to rise above ground level in December 2006. **The first glass was put on the building in April 2007, but this was only two windows.** Not until September did major cladding begin.

P2: The design of the tower was completed in 2005, but ground works did not begin until Spring 2006. The building began to rise above ground level in December 2006. **The early pane was put on the building in April 2007, but this was only two windows.** Not until September did major cladding begin.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **first glass** and **early pane** interchangeable (i.e., having the same meaning)?

Pair 138

P1: The claws are short and sharp, while the legs are yellow. Sexes are similar, though the female averages about three percent larger than the male. **Immatures have a white crown and mantle, while the upper back has rounded brown or black spots that vanish as the bird ages.** The wings and tail are greyish-brown and paler than those of the adults and are more darkly barred.

P2: The claws are short and sharp, while the legs are yellow. Sexes are similar, though the female averages about three percent larger than the male. **Immatures have a white crown and mantle, while the top rear has rounded brown or black spots that vanish as the bird ages.** The wings and tail are greyish-brown and paler than those of the adults and are more darkly barred.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **upper back** and **top rear** interchangeable (i.e., having the same meaning)?

Pair 139

P1: In 1951, Lord Nuffield further forced change when he acquired the Oxford Canal Basin and proceeded to fill it. Nuffield College and Worcester Street car park now stand where once lay the Basin. **This was the death knell of the canal system as a competitive mode of transport in Oxford as technology replaced human labour.** An apt example can be found in the reconstruction of Pacey's Bridge to withstand the weight of cars, but at the expense of closing the canal route.

P2: In 1951, Lord Nuffield further forced change when he acquired the Oxford Canal Basin and proceeded to fill it. Nuffield College and Worcester Street car park now stand where once lay the Basin. **This was the death knell of**

the canal system as a **vying form** of transport in Oxford as technology replaced human labour. An apt example can be found in the reconstruction of Pacey's Bridge to withstand the weight of cars, but at the expense of closing the canal route.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **competitive mode** and **vying form** interchangeable (i.e., having the same meaning)?

Pair 140

P1: Note that paid inclusion is different from paid placement. With paid placement, companies pay search engines to rank higher than they would have ranked if relevancy was the only ranking factor. **Paid placement also gives companies guaranteed top rankings if they pay for it.** With paid inclusion, top rankings are not guaranteed and only inclusion within the search engine is.

P2: Note that paid inclusion is different from paid placement. With paid placement, companies pay search engines to rank higher than they would have ranked if relevancy was the only ranking factor. **Paid placement also gives companies guaranteed elite performance if they pay for it.** With paid inclusion, top rankings are not guaranteed and only inclusion within the search engine is.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **top rankings** and **elite performance** interchangeable (i.e., having the same meaning)?

Pair 141

P1: (1794–1861) and his wife Eliza Sophia Moodie, née Pigot (1804 – 26 October 1881). When quite young, his father was appointed the Colony of Natal's first Colonial Secretary after the imposition of British rule, and the family moved accordingly. **The boy's formal education was sporadic, partly owing to the paucity of teaching in the new Colony, but also on account of his impulsive nature.** Most of his education must have come from his mother, whom he adored: a cultured and talented woman who, among other attributes was a fine chess player, and taught her children to play at a high standard.

P2: (1794–1861) and his wife Eliza Sophia Moodie, née Pigot (1804 – 26 October 1881). When quite young, his father was appointed the Colony of Natal's first Colonial Secretary after the imposition of British rule, and the family moved accordingly. **The boy's formal education was sporadic, partly owing to the paucity of teaching in the new Colony, but also on account of his abrupt character.** Most of his education must have come from his mother, whom he adored: a cultured and talented woman who, among other attributes was a fine chess player, and taught her children to play at a high standard.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **impulsive nature** and **abrupt character** interchangeable (i.e., having the same meaning)?

Pair 142

P1: Despite this ruling, no official guidelines for determining and sentencing matters of competence were developed. In *Dusky v. United States* (1960), the case upheld the *Youtsey v. United States* ruling and set specific criteria for competence. **These include having a rational and factual understanding of court proceedings and being able to consult with an attorney in a rational manner.** The case of *Weiter v. Settle* (1961) resulted in the decision that a psychologist's opinion in a competency hearing is considered "opinion testimony."

P2: Despite this ruling, no official guidelines for determining and sentencing matters of competence were developed. In *Dusky v. United States* (1960), the case upheld the *Youtsey v. United States* ruling and set specific criteria for competence. **These include having a rational and factual understanding of court proceedings and being able to consult with an attorney in a balanced aspect.** The case of *Weiter v. Settle* (1961) resulted in the decision that a psychologist's opinion in a competency hearing is considered "opinion testimony."

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **rational manner** and **balanced aspect** interchangeable (i.e., having the same meaning)?

Pair 143

P1: Hamasaki stated that listening to the song now makes her remember the strenuous recording and brings her to tears. The album's title track, "Secret", was the last song to be recorded for the album. **Since she had so much strain with recording "Momentum", Ayumi vowed to complete the recording for "Secret" in one go.** However, by doing this she put great pressure on herself and made herself quite nervous.

P2: Hamasaki stated that listening to the song now makes her remember the strenuous recording and brings her to tears. The album's title track, "Secret", was the last song to be recorded for the album. **Since she had so many pressures with recording "Momentum", Ayumi vowed to complete the recording for "Secret" in one go.** However, by doing this she put great pressure on herself and made herself quite nervous.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **much strain** and **many pressures** interchangeable (i.e., having the same meaning)?

Pair 144

P1: After his marriage, he decided to visit Dubai for honeymoon with his wife Rozina. In Dubai, he was mesmerized by the Dubai Gold Souk and he felt a connection to the country and the gold trade. **After he left Dubai, he expressed his desire to his father to move to Dubai and try his hand at the gold business.** Philanthropy work.

P2: After his marriage, he decided to visit Dubai for honeymoon with his wife Rozina. In Dubai, he was mesmerized by the Dubai Gold Souk and he felt a connection to the country and the gold trade. **After he left Dubai, he expressed his desire to his father to move to Dubai and try his hand at the precious metals' industry.** Philanthropy work.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **gold business** and **precious metals' industry** interchangeable (i.e., having the same meaning)?

Pair 145

P1: in 1568. Legend has it that ultimately Kalapahad was drowned in the river by Devi Samaleshwari in Sambalpur, Odisha. **In reality, not much is known as to the real reasons for the death of Kalapahad.** He may have been killed by certain remnants of the Gajapati's army while returning to Suleiman Karrani.

P2: in 1568. Legend has it that ultimately Kalapahad was drowned in the river by Devi Samaleshwari in Sambalpur, Odisha. **In reality, not much is known as to the evident justification for the death of Kalapahad.** He may have been killed by certain remnants of the Gajapati's army while returning to Suleiman Karrani.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **real reasons** and **evident justification** interchangeable (i.e., having the same meaning)?

Pair 146

P1: Although Marla was killed by a suicide bomb in Baghdad in April 2005, her colleagues, friends and family continue to run CIVIC. The first staff members were hired in early 2006 and the organization expanded its mandate in early 2007 beyond Iraq and Afghanistan. **CIVIC achievements include persuading the US Congress to develop programs that aid**

victims caught in the middle of **widespread conflict**. Key concepts.

P2: Although Marla was killed by a suicide bomb in Baghdad in April 2005, her colleagues, friends and family continue to run CIVIC. The first staff members were hired in early 2006 and the organization expanded its mandate in early 2007 beyond Iraq and Afghanistan. CIVIC achievements include persuading the US Congress to develop programs that aid victims caught in the middle of **broader rivalry**. Key concepts.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **widespread conflict** and **broader rivalry** interchangeable (i.e., having the same meaning)?

Pair 147

P1: Subsequently, then-reigning Emperor Zhaozong formally commissioned Ding as the military governor of Zhaoyi and Meng as the military governor of Heyang. Defection to and service under Li Keyong and Li Cunxu. In 904, Zhu forced Emperor Zhaozong, who was then under his **physical control**, to move the capital from Chang'an to Luoyang. Later in the year, he further had Emperor Zhaozong assassinated and replaced with his son Emperor Ai.

P2: Subsequently, then-reigning Emperor Zhaozong formally commissioned Ding as the military governor of Zhaoyi and Meng as the military governor of Heyang. Defection to and service under Li Keyong and Li Cunxu. In 904, Zhu forced Emperor Zhaozong, who was then under his **real rule**, to move the capital from Chang'an to Luoyang. Later in the year, he further had Emperor Zhaozong assassinated and replaced with his son Emperor Ai.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **physical control** and **real rule** interchangeable (i.e., having the same meaning)?

Pair 148

P1: It is built around a triangular carbon fibre frame (with a circular cross section) with a single driven front wheel and two rear wheels. The car's body is attached to the frame at three points through springs and shock absorbers. The car is extremely aerodynamic, with a drag coefficient of 0.1 and a **frontal area** of 0.76 square metres. The motor, which was developed as a joint effort between CSIRO, the University of Technology, Sydney and Aurora, weighs 15 kg and has a continuous operating power of 1.8 kW.

P2: It is built around a triangular carbon fibre frame (with a circular cross section) with a single driven front wheel and two rear wheels. The car's body is attached to the frame at three points through springs and shock absorbers. The car is extremely aerodynamic, with a drag coefficient of 0.1 and a **face space** of 0.76 square metres. The motor, which was developed as a joint effort between CSIRO, the University of Technology, Sydney and Aurora, weighs 15 kg and has a continuous operating power of 1.8 kW.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **frontal area** and **face space** interchangeable (i.e., having the same meaning)?

Pair 149

P1: For example, a patient in a doctor's office sees a toothbrush and will involuntarily start brushing his teeth. This demonstrates the appropriate action (brushing) at the inappropriate time (office). This dysfunction of the **frontal area** causes the inappropriate motor responses to specific objects in the environment. Symptoms.

P2: For example, a patient in a doctor's office sees a toothbrush and will involuntarily start brushing his teeth. This demonstrates the appropriate action (brushing) at the inappropriate time (office). This dysfunction of the **forward-facing breadth** causes the inappropriate motor responses to specific objects in the environment. Symptoms.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **frontal area** and **forward-facing breadth** interchangeable (i.e., having the same meaning)?

Pair 150

P1: I am your Voice!". Mr. Chu. Mr. Chu is an **asian man** who tries to force the Flock to "sever all ties with the CSM or be killed". When his mask of false skin is removed at the end of "Fang", he is lizard-like in appearance; his real name is Robert.

P2: I am your Voice!". Mr. Chu. Mr. Chu is an **individual male from the East** who tries to force the Flock to "sever all ties with the CSM or be killed". When his mask of false skin is removed at the end of "Fang", he is lizard-like in appearance; his real name is Robert.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **asian man** and **individual male from the East** interchangeable (i.e., having the same meaning)?

Pair 151

P1: Samples are considered to be superhydrophobic when the contact angle is greater than 150 degrees. Refer to section on Wenzel and Cassie-Baxter models for information on the different behaviors of droplets on topographical surfaces. **For drops to roll effectively on a superhydrophobic surface, Contact angle hysteresis is an important consideration.** Low levels of contact angle hysteresis will enhance the self-cleaning effect of a superhydrophobic surface.

P2: Samples are considered to be superhydrophobic when the contact angle is greater than 150 degrees. Refer to section on Wenzel and Cassie-Baxter models for information on the different behaviors of droplets on topographical surfaces. **For drops to roll effectively on a superhydrophobic surface, Contact angle hysteresis is an extensive issue.** Low levels of contact angle hysteresis will enhance the self-cleaning effect of a superhydrophobic surface.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **important consideration** and **extensive issue** interchangeable (i.e., having the same meaning)?

Pair 152

P1: Shark anatomy differs from that of bony fish in a variety of ways. **Variation observed within shark anatomy is a potential result of speciation and habitat variation The Five Chordate Synapomorphies.** The five chordate synapomorphies are present in chondrichthyes as follows.

P2: Shark anatomy differs from that of bony fish in a variety of ways. **Variation observed within shark anatomy is a probable consequence of speciation and habitat variation The Five Chordate Synapomorphies.** The five chordate synapomorphies are present in chondrichthyes as follows.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **potential result** and **probable consequence** interchangeable (i.e., having the same meaning)?

Pair 153

P1: In light of this, many of the streets around the school are permit parking zones. Cal High also has a recently renovated weight room, equipped with lifting machines and 12 fully stocked Olympic weightlifting cages used mainly by the football team and weightlifting class. **Twelve years of construction were concluded with the installation of SunPower**

solar panels over the **back parking lot** in the summer of 2011. Schedule.

P2: In light of this, many of the streets around the school are permit parking zones. Cal High also has a recently renovated weight room, equipped with lifting machines and 12 fully stocked Olympic weightlifting cages used mainly by the football team and weightlifting class. **Twelve years of construction were concluded with the installation of SunPower solar panels over the posterior parking garage** in the summer of 2011. Schedule.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **back parking lot** and **posterior parking garage** interchangeable (i.e., having the same meaning)?

Pair 154

P1: She had developed a tough emotional resilience in bringing Abigail up, but it was not a relationship without problems. Sam was so busy analysing everyone else that she did not have time to analyse and understand herself, or her rebellious daughter. **In the station, Sam was too clever to be drawn into office politics, earning Meadows's respect and trust.** However, she was constantly trying to prove her worth and that could sometimes get the better of her usually sound judgement.

P2: She had developed a tough emotional resilience in bringing Abigail up, but it was not a relationship without problems. Sam was so busy analysing everyone else that she did not have time to analyse and understand herself, or her rebellious daughter. **In the station, Sam was too clever to be drawn into workplace polity, earning Meadows's respect and trust.** However, she was constantly trying to prove her worth and that could sometimes get the better of her usually sound judgement.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **office politics** and **workplace polity** interchangeable (i.e., having the same meaning)?

Pair 155

P1: The Doctor works with the Ux to use the TARDIS and Tzim-Sha's ship to restore the planets to their original positions in space. Meanwhile, Graham and Ryan free Paltraki's crew along with the other ships' crews. **This alerts Tzim-Sha as he enters his trophy room, finding Graham waiting to shoot him.** But Graham manages to hold back, before Ryan's arrival provokes him to shoot Tzim-Sha in the foot to save his grandson.

P2: The Doctor works with the Ux to use the TARDIS and Tzim-Sha's ship to restore the planets to their original positions in space. Meanwhile, Graham and Ryan free Paltraki's crew along with the other ships' crews. **This alerts Tzim-Sha as he enters his prize exhibition area, finding Graham waiting to shoot him.** But Graham manages to hold back, before Ryan's arrival provokes him to shoot Tzim-Sha in the foot to save his grandson.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **trophy room** and **prize exhibition area** interchangeable (i.e., having the same meaning)?

Pair 156

P1: Kerfoot has been the majority owner of the Whitecaps since 2002, when he saved the club from contraction after previous owner David Stadnyk left the club, selling it to United Soccer Leagues. He was previously the chairman and chief executive officer (CEO) of Crystal Decisions. **Mallett, a former chief operating officer (COO) of Yahoo!, who was raised in Victoria, British Columbia, has a significant background in soccer.** He played for the British Columbia under-16 provincial team and was on the University of Victoria Vikes squad that lost in the final of the 1982 CIS Men's Soccer Championship.

P2: Kerfoot has been the majority owner of the Whitecaps since 2002, when he saved the club from contraction after previous owner David Stadnyk left the club, selling it to United Soccer Leagues. He was previously the chairman and

chief executive officer (CEO) of Crystal Decisions. Mallett, a former chief operating officer (COO) of Yahoo!, who was raised in Victoria, British Columbia, has a **vast history** in soccer. He played for the British Columbia under-16 provincial team and was on the University of Victoria Vikes squad that lost in the final of the 1982 CIS Men's Soccer Championship.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **significant background** and **vast history** interchangeable (i.e., having the same meaning)?

Pair 157

P1: Dominica exports water to its Caribbean neighbors; shoes, cement blocks, furniture, and soap and toiletries are also exported. Home industries produce some leather work, ceramics, and straw products. Since the 1990s, the small manufacturing sector has been expanding at a **modest pace**, including electronic assembly, rum, candles, and paints. The Trafalgar Hydro Electric Power Station is now operational, making the island virtually energy self-sufficient.

P2: Dominica exports water to its Caribbean neighbors; shoes, cement blocks, furniture, and soap and toiletries are also exported. Home industries produce some leather work, ceramics, and straw products. Since the 1990s, the small manufacturing sector has been expanding at a **satisfactory rate**, including electronic assembly, rum, candles, and paints. The Trafalgar Hydro Electric Power Station is now operational, making the island virtually energy self-sufficient.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **modest pace** and **satisfactory rate** interchangeable (i.e., having the same meaning)?

Pair 158

P1: Several places were targeted during the protests, including the Istana Merdeka, the DPR/MPR Building, and the Ministry of Communication and Informatics central office. Taxi drivers accused that Grab and Uber were causing them to receive smaller daily incomes due to the rising number of app users. The demonstrators also demanded that the government ban the apps and issue a **governmental decree** concerning this problem. In January 2019, Indonesia announced plans to fix the rates charged by ridesharing companies such as Grab and Go-Jek.

P2: Several places were targeted during the protests, including the Istana Merdeka, the DPR/MPR Building, and the Ministry of Communication and Informatics central office. Taxi drivers accused that Grab and Uber were causing them to receive smaller daily incomes due to the rising number of app users. The demonstrators also demanded that the government ban the apps and issue a **legal adjudication** concerning this problem. In January 2019, Indonesia announced plans to fix the rates charged by ridesharing companies such as Grab and Go-Jek.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **governmental decree** and **legal adjudication** interchangeable (i.e., having the same meaning)?

Pair 159

P1: In modern Lahore, the traditions of [architecture in Lahore](<http://www.tahirarchitects.com/>) have been changing. The dome, minaret, the arch, the intricate mirror work and the extravagant use of ornaments which were features of the Mughal style, have now gone out of fashion. Furthermore, the changing patterns of economy, industrialisation and increase in population have contributed a great deal in revolutionising the **entire basis** of architectural forms. Due to changing lifestyles and trends, there has been an ever-increasing tendency to adopt Western and American forms of architecture.

P2: In modern Lahore, the traditions of [architecture in Lahore](<http://www.tahirarchitects.com/>) have been changing. The dome, minaret, the arch, the intricate mirror work and the extravagant use of ornaments which were features of the Mughal style, have now gone out of fashion. Furthermore, the changing patterns of economy, industrialisation and increase in population have contributed a great deal in revolutionising the **whole premise** of architectural forms. Due to changing lifestyles and trends, there has been an ever-increasing tendency to adopt Western and American forms of architecture.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **entire basis** and **whole premise** interchangeable (i.e., having the same meaning)?

Pair 160

P1: Tradition. Rambu Solo or mourning parties are not only a sacred tradition for the people of Mamasa Regency, West Sulawesi. The tradition of this **death party** is also a place to glue the big family of Mamasa's noble lineage together. To entertain the bereaved families and invited guests who were present, the committee presented a spectacle in the form of a buffalo fight.

P2: Tradition. Rambu Solo or mourning parties are not only a sacred tradition for the people of Mamasa Regency, West Sulawesi. The tradition of this **celebration of life** is also a place to glue the big family of Mamasa's noble lineage together. To entertain the bereaved families and invited guests who were present, the committee presented a spectacle in the form of a buffalo fight.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **death party** and **celebration of life** interchangeable (i.e., having the same meaning)?

Pair 161

P1: Biography. Born in Amsterdam, Haccoû received his MA in Economics at the University of Amsterdam in 1926, and his Phd cum laude in Economics in 1940 with the thesis "De termijnhandel in goederen" (The futures exchange in goods) under supervision of Théodore Limperg. In 1950 he was appointed Professor of Business Economics, especially the doctrine of **external organization** at the University of Amsterdam. From 1950 to 1966 he was first director of Foundation for economic research of the University of Amsterdam, nowadays the SEO Economic Research.

P2: Biography. Born in Amsterdam, Haccoû received his MA in Economics at the University of Amsterdam in 1926, and his Phd cum laude in Economics in 1940 with the thesis "De termijnhandel in goederen" (The futures exchange in goods) under supervision of Théodore Limperg. In 1950 he was appointed Professor of Business Economics, especially the doctrine of **independent management** at the University of Amsterdam. From 1950 to 1966 he was first director of Foundation for economic research of the University of Amsterdam, nowadays the SEO Economic Research.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **external organization** and **independent management** interchangeable (i.e., having the same meaning)?

Pair 162

P1: Unfortunately for her, Romeo visited shortly after, expecting another tryst. Marah reacted angrily until she recognized the necklace he was wearing, which was the necklace she had in her hand the night of Catalina's murder! Seeing that he must be the killer, Marah began playing a **dangerous game**, cozying up to him, leading him on, and building up his ego. Meanwhile, she tried to stay away from Tony, but love got the best of her, and she went into hiding with him after he escaped from jail.

P2: Unfortunately for her, Romeo visited shortly after, expecting another tryst. Marah reacted angrily until she recognized the necklace he was wearing, which was the necklace she had in her hand the night of Catalina's murder! Seeing that he must be the killer, Marah began playing a **threatening game**, cozying up to him, leading him on, and building up his ego. Meanwhile, she tried to stay away from Tony, but love got the best of her, and she went into hiding with him after he escaped from jail.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **dangerous game** and **threatening game** interchangeable (i.e., having the same meaning)?

Pair 163

P1: History. Establishment. In the first half-century of statehood, there was no **official compilation** of the laws of the state. Two private publishers independently compiled and published statutes enacted by the Washington state legislature into bound volumes: Remington Revised Statutes and Pierce's Perpetual Code.

P2: History. Establishment. In the first half-century of statehood, there was no **authoritative collection** of the laws of the state. Two private publishers independently compiled and published statutes enacted by the Washington state legislature into bound volumes: Remington Revised Statutes and Pierce's Perpetual Code.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **official compilation** and **authoritative collection** interchangeable (i.e., having the same meaning)?

Pair 164

P1: The number of post-master's clinical hours may vary by jurisdiction. Clinical licensure titles also may vary by jurisdiction. The Association of Social Work Boards recommends the use of Licensed Clinical Social Worker (LCSW) as the **preferred title**. However, some jurisdictions have used other titles including, but not limited to Licensed Independent Social Worker (LISW), Licensed Independent Clinical Social Worker (LICSW), Licensed Specialist Clinical Social Worker (LSCSW), and Licensed Certified Social Worker-Clinical (LCSW-C).

P2: The number of post-master's clinical hours may vary by jurisdiction. Clinical licensure titles also may vary by jurisdiction. The Association of Social Work Boards recommends the use of Licensed Clinical Social Worker (LCSW) as the **adopted denomination**. However, some jurisdictions have used other titles including, but not limited to Licensed Independent Social Worker (LISW), Licensed Independent Clinical Social Worker (LICSW), Licensed Specialist Clinical Social Worker (LSCSW), and Licensed Certified Social Worker-Clinical (LCSW-C).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **preferred title** and **adopted denomination** interchangeable (i.e., having the same meaning)?

Pair 165

P1: In modern (helical) CT, the source/detector makes at least a complete 180-degree rotation about the subject obtaining a complete set of data from which images may be reconstructed. Digital tomosynthesis, on the other hand, only uses a limited rotation angle (e.g., 15-60 degrees) with a lower number of discrete exposures (e.g., 7-51) than CT. This **incomplete set** of projections is digitally processed to yield images similar to conventional tomography with a limited depth of field. Because the image processing is digital, a series of slices at different depths and with different thicknesses can be reconstructed from the same acquisition.

P2: In modern (helical) CT, the source/detector makes at least a complete 180-degree rotation about the subject obtaining a complete set of data from which images may be reconstructed. Digital tomosynthesis, on the other hand, only uses a limited rotation angle (e.g., 15-60 degrees) with a lower number of discrete exposures (e.g., 7-51) than CT. This **partial batch** of projections is digitally processed to yield images similar to conventional tomography with a limited depth of field. Because the image processing is digital, a series of slices at different depths and with different thicknesses can be reconstructed from the same acquisition.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **incomplete set** and **partial batch** interchangeable (i.e., having the same meaning)?

Pair 166

P1: The overture made use of the famous Polish national tune "Jeszcze Polska nie zginęła", a fact that astonished listeners. Another piece of the opera, Starogdyński's polonaise ("Gdzież się podział..."), became extremely popular in Lviv for many years. The manuscript of the libretto and an **incomplete set** of orchestral parts of the opera is held at the Jagiellonian Library in Kraków. Several texts for the music numbers were printed in 1815 ("Rocznik Teatru Polskiego we Lwowie, 1814").

P2: The overture made use of the famous Polish national tune "Jeszcze Polska nie zginęła", a fact that astonished listeners. Another piece of the opera, Starogdyński's polonaise ("Gdzież się podział..."), became extremely popular in Lviv for many years. The manuscript of the libretto and an **undone collection** of orchestral parts of the opera is held at the Jagiellonian Library in Kraków. Several texts for the music numbers were printed in 1815 ("Rocznik Teatru Polskiego we Lwowie, 1814").

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **incomplete set** and **undone collection** interchangeable (i.e., having the same meaning)?

Pair 167

P1: Bandai Namco Games producer Yōzō Sakagami explains that planning for the game began with the decision to use "all for one and one for all" as the game's theme. In doing so, he wanted to put more of a focus on the 765 Production (765 Pro) headquarters, especially after hearing comments from fans who found it relaxing to watch the idols talk among themselves at the 765 Pro office. This led to the office environment to be redesigned to give it a more **natural feeling**. The game's opening menu screen also features the 765 Pro office to further immerse the player in the game's atmosphere.

P2: Bandai Namco Games producer Yōzō Sakagami explains that planning for the game began with the decision to use "all for one and one for all" as the game's theme. In doing so, he wanted to put more of a focus on the 765 Production (765 Pro) headquarters, especially after hearing comments from fans who found it relaxing to watch the idols talk among themselves at the 765 Pro office. This led to the office environment to be redesigned to give it a more **relaxed ambience**. The game's opening menu screen also features the 765 Pro office to further immerse the player in the game's atmosphere.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **natural feeling** and **relaxed ambience** interchangeable (i.e., having the same meaning)?

Pair 168

P1: Planes land on turf in summer and on ice and snow in winter. Facilities. Two small hangars (providing limited storage at the airfield), airport office (**converted farm house**) and refuelling tanks are the few structures at the airport. The airport offers either Avgas or Mogas.

P2: Planes land on turf in summer and on ice and snow in winter. Facilities. Two small hangars (providing limited storage at the airfield), airport office (**re-designed farmstead property**) and refuelling tanks are the few structures at the airport. The airport offers either Avgas or Mogas.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **converted farm house** and **re-designed farmstead property** interchangeable (i.e., having the same meaning)?

Pair 169

P1: VIP party. Soon after the last show on July 4, Thuy Nga arranged a VIP Party in celebration of the completion of Paris by Night 100. Attendees included performers, crew, the attenders with a VIP Paris by Night ticket, Harrah's Casino invited guests, and those with a **special invitation**. The party was filmed and was released on December 9, 2010.

P2: VIP party. Soon after the last show on July 4, Thuy Nga arranged a VIP Party in celebration of the completion of Paris by Night 100. Attendees included performers, crew, the attendees with a VIP Paris by Night ticket, Harrah's Casino invited guests, and those with a personal invite. The party was filmed and was released on December 9, 2010.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are special invitation and personal invite interchangeable (i.e., having the same meaning)?

Pair 170

P1: Rescue Randy has also been referred to as "Ted" (for Bus-Ted, Annihila-Ted, Humilia-Ted, and so on). These were added partly because Buster (even after his redesign) was becoming increasingly difficult to repair, and also because not all myths can be accurately tested with Buster due to his size, weight, and other factors. For instance, Suzy (a child dummy) was used to test the myth that a child could go 360 degrees around a swing set. Being representative of an adult man, Buster would not have properly fit the criteria for the myth.

P2: Rescue Randy has also been referred to as "Ted" (for Bus-Ted, Annihila-Ted, Humilia-Ted, and so on). These were added partly because Buster (even after his redesign) was becoming increasingly difficult to repair, and also because not all myths can be accurately tested with Buster due to his size, weight, and other factors. For instance, Suzy (a child dummy) was used to test the myth that a child could go 360 degrees around a playground swing. Being representative of an adult man, Buster would not have properly fit the criteria for the myth.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are swing set and playground swing interchangeable (i.e., having the same meaning)?

Pair 171

P1: An amphibolic pathway is one that can be either catabolic or anabolic based on the availability of or the need for energy. The currency of energy in a biological cell is adenosine triphosphate (ATP), which stores its energy in the phosphoanhydride bonds. The energy is utilized to conduct biosynthesis, facilitate movement, and regulate active transport inside of the cell. Examples of amphibolic pathways are the citric acid cycle and the glyoxylate cycle.

P2: An amphibolic pathway is one that can be either catabolic or anabolic based on the availability of or the need for energy. The currency of energy in a biological cell is adenosine triphosphate (ATP), which stores its energy in the phosphoanhydride bonds. The energy is utilized to conduct biosynthesis, aid in making action simpler, and regulate active transport inside of the cell. Examples of amphibolic pathways are the citric acid cycle and the glyoxylate cycle.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are facilitate movement and aid in making action simpler interchangeable (i.e., having the same meaning)?

Pair 172

P1: In this case, the Supreme Court ruled that Congress had exceeded its constitutional authority under the Commerce Clause when it passed a law prohibiting gun possession in local school zones. One reason was that the regulation of guns in school would not significantly affect interstate commerce and the Supreme Court found it unconstitutional. Some have also argued that the "regulation of commerce" meant the regulation of "gainful activity" and not necessarily goods. The Navy and Commerce.

P2: In this case, the Supreme Court ruled that Congress had exceeded its constitutional authority under the Commerce Clause when it passed a law prohibiting gun possession in local school zones. One reason was that the regulation of guns in school would not significantly affect interstate commerce and the Supreme Court found it unconstitutional. Some have also argued that the "regulation of commerce" meant the regulation of "beneficial work" and not necessarily goods. The Navy and Commerce.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **gainful activity** and **beneficial work** interchangeable (i.e., having the same meaning)?

Pair 173

P1: The National Service is tasked with providing the army with food and with training the youth in a range of reconstruction and developmental activities. There is not much further information available, and no internet-accessible source details the relationship of the National Service to other armed forces bodies; it is not listed in the constitution. **President Kabila, in one of the few comments available, says National Service will provide a **gainful activity** for street children.** Obligatory civil service administered through the armed forces was also proposed under the Mobutu regime during the "radicalisation" programme of December 1974 – January 1975; the FAZ was opposed to the measure and the plan "took several months to die."

P2: The National Service is tasked with providing the army with food and with training the youth in a range of reconstruction and developmental activities. There is not much further information available, and no internet-accessible source details the relationship of the National Service to other armed forces bodies; it is not listed in the constitution. **President Kabila, in one of the few comments available, says National Service will provide a **useful pastime** for street children.** Obligatory civil service administered through the armed forces was also proposed under the Mobutu regime during the "radicalisation" programme of December 1974 – January 1975; the FAZ was opposed to the measure and the plan "took several months to die."

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **gainful activity** and **useful pastime** interchangeable (i.e., having the same meaning)?

Pair 174

P1: In 2015, she was diagnosed with breast cancer. She received treatment at D'Amour Center. **Disney released a statement announcing her death in September 2020 with a **long thread** celebrating her work.** Eric Goldberg said "She will be sadly missed by those of us who had the good fortune to work with her, but her influence on those films will be there forever."

P2: In 2015, she was diagnosed with breast cancer. She received treatment at D'Amour Center. **Disney released a statement announcing her death in September 2020 with a **lengthy list of accomplishments** celebrating her work.** Eric Goldberg said "She will be sadly missed by those of us who had the good fortune to work with her, but her influence on those films will be there forever."

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **long thread** and **lengthy list of accomplishments** interchangeable (i.e., having the same meaning)?

Pair 175

P1: Recreational disciplines include cross-country skiing and Telemark skiing. Olympic events are competitive cross-country skiing, ski jumping, biathlon and Nordic combined—competition in which athletes both cross-country ski and ski jump. **The FIS Nordic World Ski Championships host these sports, plus Telemark skiing, at the championship level in the winter of **every odd-numbered year**.** Biathlon combines cross-country skiing and rifle shooting, but is not included as a Nordic discipline under the rules of the International Ski Federation (FIS).

P2: Recreational disciplines include cross-country skiing and Telemark skiing. Olympic events are competitive cross-country skiing, ski jumping, biathlon and Nordic combined—competition in which athletes both cross-country ski and ski jump. **The FIS Nordic World Ski Championships host these sports, plus Telemark skiing, at the championship level in the winter of **each third year**.** Biathlon combines cross-country skiing and rifle shooting, but is not included as a Nordic discipline under the rules of the International Ski Federation (FIS).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **every odd-numbered year** and **each third year** interchangeable (i.e., having the same meaning)?

Pair 176

P1: Recently, the main station buildings have benefited from further refurbishment and now a collection of Scandinavian style log cabins surround the platform to the north, additional cabins provide further accommodation on the platform and surrounding areas while improvements in water and drainage connections have allowed improved washroom facilities. The current facilities provide comfortable accommodation for 82 people, with the Station building containing the Station Master's Office, commercial quality kitchen, large dining room, adjoining sun lounge, showers and toilets. **The site also includes a second shower and toilet block as well as a dedicated sick bay, drying room and stores.** While the main activities run from the station are mountain based, Hertfordshire Scouts also have the use of a small jetty on Loch Earn which is used during the summer holiday for dinghy sailing and kayaking activities.

P2: Recently, the main station buildings have benefited from further refurbishment and now a collection of Scandinavian style log cabins surround the platform to the north, additional cabins provide further accommodation on the platform and surrounding areas while improvements in water and drainage connections have allowed improved washroom facilities. The current facilities provide comfortable accommodation for 82 people, with the Station building containing the Station Master's Office, commercial quality kitchen, large dining room, adjoining sun lounge, showers and toilets. **The site also includes a duplicate place to bathe and toilet block as well as a dedicated sick bay, drying room and stores.** While the main activities run from the station are mountain based, Hertfordshire Scouts also have the use of a small jetty on Loch Earn which is used during the summer holiday for dinghy sailing and kayaking activities.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **second shower** and **duplicate place to bathe** interchangeable (i.e., having the same meaning)?

Pair 177

P1: The electrons would be pulled toward the positive charge on the phosphorescent layer, traveling through the vacuum. When they struck the phosphorescent layer, they would release a shower of photons (light) travelling in all directions. **Some of these photons would travel back to the photoemissive layer, where they would cause a second shower of electrons to be released.** To ensure that the light did not activate nearby areas of the photoemissive material, a baffle was used inside the tube, dividing the device up into a grid of cells.

P2: The electrons would be pulled toward the positive charge on the phosphorescent layer, traveling through the vacuum. When they struck the phosphorescent layer, they would release a shower of photons (light) travelling in all directions. **Some of these photons would travel back to the photoemissive layer, where they would cause a double downpour of electrons to be released.** To ensure that the light did not activate nearby areas of the photoemissive material, a baffle was used inside the tube, dividing the device up into a grid of cells.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **second shower** and **double downpour** interchangeable (i.e., having the same meaning)?

Pair 178

P1: The monumental building's project was designed by architect and professor Clemens Holzmeister (1886–1993). The building was depicted on the reverse of the Turkish 50,000 lira banknotes of 1989–1999. **The building was hit by airstrikes three times during the 2016 Turkish coup d'état attempt, suffering noticeable damage.** Later, the Parliament went through a revision in the summer of 2016.

P2: The monumental building's project was designed by architect and professor Clemens Holzmeister (1886–1993). The building was depicted on the reverse of the Turkish 50,000 lira banknotes of 1989–1999. **The building was hit by airstrikes**

three times during the 2016 Turkish coup d'état attempt, suffering **noticeable destruction**. Later, the Parliament went through a revision in the summer of 2016.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **noticeable damage** and **noticeable destruction** interchangeable (i.e., having the same meaning)?

Pair 179

P1: Personnel. In mid-December 2013, Michael Allshouse moved up from assistant to commissioner of the IFL, replacing Robert Loving who is now the league's chief financial officer. For 2014, Mike McCoy serves as the Director of **business development** and Tom Falcinelli returns as the Director of Officiating. Expansion.

P2: Personnel. In mid-December 2013, Michael Allshouse moved up from assistant to commissioner of the IFL, replacing Robert Loving who is now the league's chief financial officer. For 2014, Mike McCoy serves as the Director of **industrial expansion** and Tom Falcinelli returns as the Director of Officiating. Expansion.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **business development** and **industrial expansion** interchangeable (i.e., having the same meaning)?

Pair 180

P1: On April 21, 2015, hundreds of protesters filled the streets of Honolulu protesting against the TMT. 2019 demonstrations. On July 14, 2019, an online petition titled "The **immediate halt** to the Construction of the TMT Telescope" was posted on Change.org. The online petition has currently gathered over 278,057 signatures worldwide.

P2: On April 21, 2015, hundreds of protesters filled the streets of Honolulu protesting against the TMT. 2019 demonstrations. On July 14, 2019, an online petition titled "The **urgent freeze** to the Construction of the TMT Telescope" was posted on Change.org. The online petition has currently gathered over 278,057 signatures worldwide.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **immediate halt** and **urgent freeze** interchangeable (i.e., having the same meaning)?

Pair 181

P1: Dumb pipe. The term "dumb pipe" was coined in the early 1990s and refers water pipes used in a city water supply system. In theory, these pipes provide a **steady and reliable source** of water to every household without discrimination. In other words, it connects the user with the source without any intelligence or decrement.

P2: Dumb pipe. The term "dumb pipe" was coined in the early 1990s and refers water pipes used in a city water supply system. In theory, these pipes provide a **constant and stable fountain** of water to every household without discrimination. In other words, it connects the user with the source without any intelligence or decrement.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **steady and reliable source** and **constant and stable fountain** interchangeable (i.e., having the same meaning)?

Pair 182

P1: The highway heads east from this intersection through Sunizona where the highway briefly heads towards the south before curving back towards the east. It continues towards the east until it turns towards the north at an inter-

section with Turkey Creek and Kuykendall Cutoff roads. The highway continues heading towards the north with the occasional curve towards the northeast before continuing north. When SR 181 reaches an intersection with SR 186, SR 181 turns towards the east.

P2: The highway heads east from this intersection through Sunizona where the highway briefly heads towards the south before curving back towards the east. It continues towards the east until it turns towards the north at an intersection with Turkey Creek and Kuykendall Cutoff roads. The highway continues heading towards the north with the intermittent fork in the road towards the northeast before continuing north. When SR 181 reaches an intersection with SR 186, SR 181 turns towards the east.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are occasional curve and intermittent fork in the road interchangeable (i.e., having the same meaning)?

Pair 183

P1: The sequences of one complemented bit followed by noncomplemented bits are implementing a two's complement trick to avoid sign extension. The sequence of p7 (noncomplemented bit followed by all complemented bits) is because we're subtracting this term so they were all negated to start out with (and a 1 was added in the least significant position). For both types of sequences, the last bit is flipped and an implicit -1 should be added directly below the MSB. When the +1 from the two's complement negation for p7 in bit position 0 (LSB) and all the -1's in bit columns 7 through 14 (where each of the MSBs are located) are added together, they can be simplified to the single 1 that "magically" is floating out to the left.

P2: The sequences of one complemented bit followed by noncomplemented bits are implementing a two's complement trick to avoid sign extension. The sequence of p7 (noncomplemented bit followed by all complemented bits) is because we're subtracting this term so they were all negated to start out with (and a 1 was added in the least significant position). For both types of sequences, the end part is flipped and an implicit -1 should be added directly below the MSB. When the +1 from the two's complement negation for p7 in bit position 0 (LSB) and all the -1's in bit columns 7 through 14 (where each of the MSBs are located) are added together, they can be simplified to the single 1 that "magically" is floating out to the left.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are last bit and end part interchangeable (i.e., having the same meaning)?

Pair 184

P1: The cannon was breech loading and used the original mushroom-shaped obturator system developed by de Bange, allowing to properly seal the breech during each firing. The cannon lacked a recoil system, meaning that the entire carriage moved backward when fired. Before firing again, the cannon had to be moved back into position and re-aimed, which greatly slowed the effective rate of fire. This would remain a problem with all artillery pieces until the development of the Canon de 75 in 1897.

P2: The cannon was breech loading and used the original mushroom-shaped obturator system developed by de Bange, allowing to properly seal the breech during each firing. The cannon lacked a recoil system, meaning that the entire carriage moved backward when fired. Before firing again, the cannon had to be moved back into position and re-aimed, which greatly slowed the actual pace of fire. This would remain a problem with all artillery pieces until the development of the Canon de 75 in 1897.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are effective rate and actual pace interchangeable (i.e., having the same meaning)?

Pair 185

P1: The term should not be confused with simple interest (as opposed to compound interest) which is not compounded. The effective interest rate is always calculated as if compounded annually. The **effective rate** is calculated in the following way, where "r" is the effective rate, "i" the nominal rate (as a decimal, e.g. 12% = 0.12), and "n" the number of compounding periods per year (for example, 12 for monthly compounding): Examples.

P2: The term should not be confused with simple interest (as opposed to compound interest) which is not compounded. The effective interest rate is always calculated as if compounded annually. The **average speed** is calculated in the following way, where "r" is the effective rate, "i" the nominal rate (as a decimal, e.g. 12% = 0.12), and "n" the number of compounding periods per year (for example, 12 for monthly compounding): Examples.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **effective rate** and **average speed** interchangeable (i.e., having the same meaning)?

Pair 186

P1: The Finance system in Azerbaijan consists of government policy and arrangements for borrowing and lending and the transfer of assets. The system is composed of banks, insurance companies, other financial institutions, pension system, financial markets and payment systems. **Financial policy of Azerbaijan is aimed at the implementation of the state program of economic development of the Republic.** The development of the Azerbaijani financial system and the whole market infrastructure depends on the activities of commercial banks, insurance company and other financial institutions.

P2: The Finance system in Azerbaijan consists of government policy and arrangements for borrowing and lending and the transfer of assets. The system is composed of banks, insurance companies, other financial institutions, pension system, financial markets and payment systems. **Financial policy of Azerbaijan is aimed at the implementation of the nationwide plan of economic development of the Republic.** The development of the Azerbaijani financial system and the whole market infrastructure depends on the activities of commercial banks, insurance company and other financial institutions.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **state program** and **nationwide plan** interchangeable (i.e., having the same meaning)?

Pair 187

P1: It also operates chartered flights between Bangladesh and South Korea. In 1991, Unique group founded Unique Tours and Travels. **unique group established Unique Ceramic Industries Limited in 1995 with technical support from China.** It also established Freight Management Limited in 1995.

P2: It also operates chartered flights between Bangladesh and South Korea. In 1991, Unique group founded Unique Tours and Travels. **The group Unique established Unique Ceramic Industries Limited in 1995 with technical support from China.** It also established Freight Management Limited in 1995.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **unique group** and **The group Unique** interchangeable (i.e., having the same meaning)?

Pair 188

P1: Early tests revealed that the brain will translate parallax scanned information into depth information at scanning frequencies of between 3–6 Hz, and that the ideal frequency is 4.31 Hz. Human Visual Perception. **In his 1995 book, Foundations of Vision, Brian Wandell states, "Perception is an interpretation of the retinal image, not a description.** Information in the retinal image may be interpreted in many different ways.

P2: Early tests revealed that the brain will translate parallax scanned information into depth information at scanning frequencies of between 3–6 Hz, and that the ideal frequency is 4.31 Hz. Human Visual Perception. **In his 1995 book,**

Foundations of Vision, Brian Wandell states, "Perception is an interpretation of the **view of the back of your eye**, not a description. Information in the retinal image may be interpreted in many different ways.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **retinal image** and **view of the back of your eye** interchangeable (i.e., having the same meaning)?

Pair 189

P1: Because of the disadvantages, this design has never been commonly used, but some people do experiment with it. Typically, the heliostat mirror moves at a rate that is $1/2$ the angular motion of the sun. There is **another arrangement** that satisfies the definition of a heliostat yet has a mirror motion that is $2/3$ rd of the motion of the sun. Many other types of heliostat have also occasionally been used.

P2: Because of the disadvantages, this design has never been commonly used, but some people do experiment with it. Typically, the heliostat mirror moves at a rate that is $1/2$ the angular motion of the sun. There is **a different order** that satisfies the definition of a heliostat yet has a mirror motion that is $2/3$ rd of the motion of the sun. Many other types of heliostat have also occasionally been used.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **another arrangement** and **a different order** interchangeable (i.e., having the same meaning)?

Pair 190

P1: Anal beads are commonly made of silicone, plastic, rubber, latex, glass or metal and end with a ring or similar handle designed for pulling. The purpose of this ring is to prevent the beads from becoming fully lodged in the rectum, and to ease removal. The beads may either be joined flexibly, requiring individual insertion, or by a semi-rigid thin shaft, allowing anal insertion in a **single motion**. The many nerve endings of the sphincter provide arousal both during insertion and removal, and larger beads may create feelings of pressure while in the rectum.

P2: Anal beads are commonly made of silicone, plastic, rubber, latex, glass or metal and end with a ring or similar handle designed for pulling. The purpose of this ring is to prevent the beads from becoming fully lodged in the rectum, and to ease removal. The beads may either be joined flexibly, requiring individual insertion, or by a semi-rigid thin shaft, allowing anal insertion in a **lone movement**. The many nerve endings of the sphincter provide arousal both during insertion and removal, and larger beads may create feelings of pressure while in the rectum.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **single motion** and **lone movement** interchangeable (i.e., having the same meaning)?

Pair 191

P1: Many deliberative assemblies (e.g. city councils) use a procedure known as the "consent agenda". Matters believed to be noncontroversial are placed on the consent agenda, and they are all adopted by a **single motion**. If any member objects to one or more items on the consent agenda, the items objected to are removed from the consent agenda and handled in the ordinary course.

P2: Many deliberative assemblies (e.g. city councils) use a procedure known as the "consent agenda". Matters believed to be noncontroversial are placed on the consent agenda, and they are all adopted by a **specific recommendation**. If any member objects to one or more items on the consent agenda, the items objected to are removed from the consent agenda and handled in the ordinary course.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **single motion** and **specific recommendation** interchangeable (i.e., having the same meaning)?

Pair 192

P1: It also drew special attention to the claim that a very high proportion of officers were obese. The Police Federation reacted adversely to the Part 2 report. It told the Home Secretary that its contents had placed its members in a state of **'utter dismay, consternation and disillusion'**. It said that 'what Winsor is suggesting goes far beyond reform and threatens to undermine the very foundations of British policing and the public we serve'.

P2: It also drew special attention to the claim that a very high proportion of officers were obese. The Police Federation reacted adversely to the Part 2 report. It told the Home Secretary that its contents had placed its members in a state of **'complete distress, consternation and disillusion'**. It said that 'what Winsor is suggesting goes far beyond reform and threatens to undermine the very foundations of British policing and the public we serve'.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **utter dismay** and **complete distress** interchangeable (i.e., having the same meaning)?

Pair 193

P1: Cardo gives chase and successfully catches him. Once in the same precinct along with Task Force Agila, Gina and Bart beg their minions and the mercenaries once more for their "innocence". But much to their **utter dismay**, both sides have double-crossed them and revealed that the two are indeed responsible for shooting Alyana and Bubbles. The two corrupt officials are then locked in and are fired from their job.

P2: Cardo gives chase and successfully catches him. Once in the same precinct along with Task Force Agila, Gina and Bart beg their minions and the mercenaries once more for their "innocence". But much to their **pure disappointment**, both sides have double-crossed them and revealed that the two are indeed responsible for shooting Alyana and Bubbles. The two corrupt officials are then locked in and are fired from their job.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **utter dismay** and **pure disappointment** interchangeable (i.e., having the same meaning)?

Pair 194

P1: There is significant debate whether the process of reactive inhibition is due to fatigue or some other process. Nevertheless, it is a factor researchers need to consider in analyses of sustained performance due to its possible role in the results and analysis of research. Hull goes onto to further explain the decay of performance through the use of a decay formula which can estimate the rate of **performance deterioration**. Hull explains: "I" dissipates exponentially with time "t": With the passage of time since its formation "I" "R" spontaneously dissipates approximately as a simple decay function of the time "t" elapsed, i.e., with formula_3.

P2: There is significant debate whether the process of reactive inhibition is due to fatigue or some other process. Nevertheless, it is a factor researchers need to consider in analyses of sustained performance due to its possible role in the results and analysis of research. Hull goes onto to further explain the decay of performance through the use of a decay formula which can estimate the rate of **decline in productivity**. Hull explains: "I" dissipates exponentially with time "t": With the passage of time since its formation "I" "R" spontaneously dissipates approximately as a simple decay function of the time "t" elapsed, i.e., with formula_3.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **performance deterioration** and **decline in productivity** interchangeable (i.e., having the same meaning)?

Pair 195

P1: To expound a little further, the qualifying phrase "an (if) it harm none" includes not only other, but self. Hence, weighing the possible outcomes of an action is a part of the thought given before taking an action; the metaphor of tossing a pebble into a pond and observing the ripples that spread in every direction is sometimes used. The declarative statement "do as thou wilt" expresses a clear statement of what is, philosophically, known as "free will." A second ethical guideline is often called the Law of Return, sometimes the Rule of Three, which mirrors the physics concept described in Sir Isaac Newton's Third Law of Motion: "When one body exerts a force on a second body, the second body simultaneously exerts a force equal in magnitude and opposite in direction on the first body."

P2: To expound a little further, the qualifying phrase "an (if) it harm none" includes not only other, but self. Hence, weighing the possible outcomes of an action is a part of the thought given before taking an action; the metaphor of tossing a pebble into a pond and observing the ripples that spread in every direction is sometimes used. The declarative statement "do as thou wilt" expresses a straightforward remark of what is, philosophically, known as "free will." A second ethical guideline is often called the Law of Return, sometimes the Rule of Three, which mirrors the physics concept described in Sir Isaac Newton's Third Law of Motion: "When one body exerts a force on a second body, the second body simultaneously exerts a force equal in magnitude and opposite in direction on the first body."

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are clear statement and straightforward remark interchangeable (i.e., having the same meaning)?

Pair 196

P1: A British boycott started in the 1950s. Chief Albert Luthuli and Duma Nokwe visited anti-apartheid supporters in London. Chief Luthuli responded to a request from the Boycott Movement for a clear statement endorsing the British boycott. The statement was co-signed by G M Naicker, the president of the South African Indian Congress (SAIC), and Peter Brown of the Liberal Party.

P2: A British boycott started in the 1950s. Chief Albert Luthuli and Duma Nokwe visited anti-apartheid supporters in London. Chief Luthuli responded to a request from the Boycott Movement for a definite proclamation endorsing the British boycott. The statement was co-signed by G M Naicker, the president of the South African Indian Congress (SAIC), and Peter Brown of the Liberal Party.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are clear statement and definite proclamation interchangeable (i.e., having the same meaning)?

Pair 197

P1: I chose Klinghoffer, an invalid, so that they would know that we had no pity for anyone, just as the Americans, arming Israel, do not take into consideration that Israel kills women and children of our people." Molqi ordered Manuel De Souza, a Portuguese waiter, to accompany him and push Klinghoffer outside onto the open deck. Klinghoffer was taken back along the entire deck of the ship to the stern. Molqi ordered De Souza to return into the ship.

P2: I chose Klinghoffer, an invalid, so that they would know that we had no pity for anyone, just as the Americans, arming Israel, do not take into consideration that Israel kills women and children of our people." Molqi ordered Manuel De Souza, a Portuguese waiter, to accompany him and push Klinghoffer outside onto the open deck. Klinghoffer was taken back along the entire hull of the ship to the stern. Molqi ordered De Souza to return into the ship.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are entire deck and entire hull interchangeable (i.e., having the same meaning)?

Pair 198

P1: Over 10,000 prostitution-related incidents were reported in 1992; 95% communicating offences and 5% bawdy-house and pimping offences. In 1997, they reported a sharp increase in the number of prostitution-related incidents recorded by police for 1995, following two years of decline. **Since these are police figures they are just as likely to reflect enforcement rather than actual activity.** The report also stated that in the period 1991–5, 63 known prostitutes were murdered (5% of all women killed in Canada).

P2: Over 10,000 prostitution-related incidents were reported in 1992; 95% communicating offences and 5% bawdy-house and pimping offences. In 1997, they reported a sharp increase in the number of prostitution-related incidents recorded by police for 1995, following two years of decline. **Since these are police figures they are just as likely to reflect enforcement rather than what is really going on.** The report also stated that in the period 1991–5, 63 known prostitutes were murdered (5% of all women killed in Canada).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **actual activity** and **what is really going on** interchangeable (i.e., having the same meaning)?

Pair 199

P1: A bivouac shelter is any of a variety of improvised camp site, or shelter that is usually of a temporary nature, used especially by soldiers, or persons engaged in backpacking, bikepacking, scouting, or mountain climbing. It may often refer to sleeping in the open with a bivouac sack, but it may also refer to a shelter constructed of natural materials like a structure of branches to form a frame, which is then covered with leaves, ferns, and similar material for waterproofing and duff (leaf litter) for insulation. **Modern bivouacs often involve the use of one or two man tents but may also be without tents or full cover.** In modern mountaineering the nature of the bivouac shelter will depend on the level of preparedness; in particular whether existing camping and outdoor gear may be incorporated into the shelter.

P2: A bivouac shelter is any of a variety of improvised camp site, or shelter that is usually of a temporary nature, used especially by soldiers, or persons engaged in backpacking, bikepacking, scouting, or mountain climbing. It may often refer to sleeping in the open with a bivouac sack, but it may also refer to a shelter constructed of natural materials like a structure of branches to form a frame, which is then covered with leaves, ferns, and similar material for waterproofing and duff (leaf litter) for insulation. **Modern bivouacs often involve the use of one or two man tents but may also be without tents or total protection.** In modern mountaineering the nature of the bivouac shelter will depend on the level of preparedness; in particular whether existing camping and outdoor gear may be incorporated into the shelter.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **full cover** and **total protection** interchangeable (i.e., having the same meaning)?

Pair 200

P1: The company operates in the construction, petrochemical, engineering, retail, information technology, food and beverage, tourism, elevator and escalator manufacturing, water purification, security, facility management, and real estate sectors. A number of subsidiaries operate internationally throughout the Persian Gulf, including Saudi Arabia, the United Arab Emirates, Kuwait, Oman, and Qatar. **MJS is a local dealer for such international brands as Schindler Group (elevators), General Electric, Suzuki, British American Tobacco, and Putzmeister (concrete pumps).** He was one of the main merchants to push Salman, Crown Prince of Bahrain to establish the Bahrain Bank in 1957, the country's first national bank now known as the National Bank of Bahrain.

P2: The company operates in the construction, petrochemical, engineering, retail, information technology, food and beverage, tourism, elevator and escalator manufacturing, water purification, security, facility management, and real estate sectors. A number of subsidiaries operate internationally throughout the Persian Gulf, including Saudi Arabia, the United Arab Emirates, Kuwait, Oman, and Qatar. **MJS is a regional supplier for such international brands as Schindler Group (elevators), General Electric, Suzuki, British American Tobacco, and Putzmeister (concrete pumps).** He was one of the main merchants to push Salman, Crown Prince of Bahrain to establish the Bahrain Bank in 1957, the country's first national bank now known as the National Bank of Bahrain.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **local dealer** and **regional supplier** interchangeable (i.e., having the same meaning)?

Pair 201

P1: The T-puzzle became very popular in the beginning of the 20th century as a giveaway item, with hundreds of different companies using it to promote their business or product. The pieces were made from paper or cardboard and served as trade cards, with advertisement printed on them. They usually came in an envelope with instructions and an invitation to write to or call at the company or **local dealer** for its solution. Examples include: Early published references.

P2: The T-puzzle became very popular in the beginning of the 20th century as a giveaway item, with hundreds of different companies using it to promote their business or product. The pieces were made from paper or cardboard and served as trade cards, with advertisement printed on them. They usually came in an envelope with instructions and an invitation to write to or call at the company or **community card trader** for its solution. Examples include: Early published references.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **local dealer** and **community card trader** interchangeable (i.e., having the same meaning)?

Pair 202

P1: Erving Goffman emphasized the role of hat-tipping as a means of "closing" encounters between male and female, and restoring both parties thereby to a state of civil inattention. He also suggested that the hat tip was used for greeting a stranger, whereas the equivalent greeting for an acquaintance was the bow. In Desmond Morris's terms, the **hat tip** is a modification of a (symbolic) submissive posture—lowering the body height by removing the hat—a "token token". Metaphor.

P2: Erving Goffman emphasized the role of hat-tipping as a means of "closing" encounters between male and female, and restoring both parties thereby to a state of civil inattention. He also suggested that the hat tip was used for greeting a stranger, whereas the equivalent greeting for an acquaintance was the bow. In Desmond Morris's terms, the **hat dip** is a modification of a (symbolic) submissive posture—lowering the body height by removing the hat—a "token token". Metaphor.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **hat tip** and **hat dip** interchangeable (i.e., having the same meaning)?

Pair 203

P1: Equal proportion reduction. The three partners may choose equal proportion reduction instead of equal percentage reduction. Had there been only **one partner**, who owned 100% interest, selling 20% interest would reduce ownership interest of the original owner by 20%. The same approach can be used to buy equity from each of the partners.

P2: Equal proportion reduction. The three partners may choose equal proportion reduction instead of equal percentage reduction. Had there been only **a single individual**, who owned 100% interest, selling 20% interest would reduce ownership interest of the original owner by 20%. The same approach can be used to buy equity from each of the partners.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one partner** and **a single individual** interchangeable (i.e., having the same meaning)?

Pair 204

P1: At a specialized level, knowledge environments need sophisticated architecture and modeling capabilities. This approach is necessary when the creator of the knowledge environment wants to deliver replicable results in hundreds of specific instances of the same knowledge environment. On the other hand, the **strengthening trend of public authorship leads to open-ended ontologies by means of, say, tagging or folksonomies.** In a significant sense, knowledge environments are in such cases created not only by their authors or owners but also by the contributors of their ontologies.

P2: At a specialized level, knowledge environments need sophisticated architecture and modeling capabilities. This approach is necessary when the creator of the knowledge environment wants to deliver replicable results in hundreds of specific instances of the same knowledge environment. On the other hand, the **growing tendency of public authorship leads to open-ended ontologies by means of, say, tagging or folksonomies.** In a significant sense, knowledge environments are in such cases created not only by their authors or owners but also by the contributors of their ontologies.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **strengthening trend** and **growing tendency** interchangeable (i.e., having the same meaning)?

Pair 205

P1: Shortly thereafter, the PAGASA issued its last advisory on the cyclone as the storm moved out of their area of warning responsibility. After attaining tropical storm status, significant intensification was limited due to a slight increase in wind shear as well as impeded outflow. The slowing of the **strengthening trend** was temporary, and by early on April 16 the organization had rapidly improved. As a result, the JMA upgraded Neoguri to a severe tropical storm.

P2: Shortly thereafter, the PAGASA issued its last advisory on the cyclone as the storm moved out of their area of warning responsibility. After attaining tropical storm status, significant intensification was limited due to a slight increase in wind shear as well as impeded outflow. The slowing of the **increasing movement** was temporary, and by early on April 16 the organization had rapidly improved. As a result, the JMA upgraded Neoguri to a severe tropical storm.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **strengthening trend** and **increasing movement** interchangeable (i.e., having the same meaning)?

Pair 206

P1: The Chinese "Yupian" dictionary defines 12,158 characters under a system of 542 radicals ("bùshǒu"), which slightly modified the original 540 in the "Shuowen jiezi". The Japanese "Tenrei banshō meigi" defines approximately 1,000 "kanji" (Chinese characters), under 534 radicals ("bu"), with a total of over 16,000 characters. Each entry gives the **chinese character** in ancient seal script, Chinese pronunciation in fanqie, and definition, all copied from the "Yupian". The American Japanologist Don Bailey writes: At the time of its compilation, calligraphic style and the Chinese readings and meanings of the characters were probably about all that was demanded of a dictionary, so that the "Tenrei banshō meigi" suited the scholarly needs of the times.

P2: The Chinese "Yupian" dictionary defines 12,158 characters under a system of 542 radicals ("bùshǒu"), which slightly modified the original 540 in the "Shuowen jiezi". The Japanese "Tenrei banshō meigi" defines approximately 1,000 "kanji" (Chinese characters), under 534 radicals ("bu"), with a total of over 16,000 characters. Each entry gives the **Asian actor** in ancient seal script, Chinese pronunciation in fanqie, and definition, all copied from the "Yupian". The American Japanologist Don Bailey writes: At the time of its compilation, calligraphic style and the Chinese readings and meanings of the characters were probably about all that was demanded of a dictionary, so that the "Tenrei banshō meigi" suited the scholarly needs of the times.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **chinese character** and **Asian actor** interchangeable (i.e., having the same meaning)?

Pair 207

P1: Their theatrical trappings might beg their sincerity, but their orations are to be taken very seriously. MONOLOGICAL throws curve balls and suggest parallel U-turns. Paterson is also the writer of numerous critical articles and co-editor of "money value Art: State Funding, Free Markets, Big Pictures", with Sally McKay. The book addresses the traditionally polar relationships between state subsidization and private sector competition relation to the arts.

P2: Their theatrical trappings might beg their sincerity, but their orations are to be taken very seriously. MONOLOGICAL throws curve balls and suggest parallel U-turns. Paterson is also the writer of numerous critical articles and co-editor of "currency assessment Art: State Funding, Free Markets, Big Pictures", with Sally McKay. The book addresses the traditionally polar relationships between state subsidization and private sector competition relation to the arts.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **money value** and **currency assessment** interchangeable (i.e., having the same meaning)?

Pair 208

P1: They are similar to but slightly thicker than the thinnest Japanese noodle type called "sōmen". The Western style noodle that most closely resembles "hiyamugi" is probably vermicelli. They are the second thinnest type of Japanese noodle after "sōmen", while the well-known udon is a **thicker style** of wheat noodle. "Hiyamugi", like "sōmen" is traditionally enjoyed cold during the summer months.

P2: They are similar to but slightly thicker than the thinnest Japanese noodle type called "sōmen". The Western style noodle that most closely resembles "hiyamugi" is probably vermicelli. They are the second thinnest type of Japanese noodle after "sōmen", while the well-known udon is a **wider type** of wheat noodle. "Hiyamugi", like "sōmen" is traditionally enjoyed cold during the summer months.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **thicker style** and **wider type** interchangeable (i.e., having the same meaning)?

Pair 209

P1: Gallery. Morrice's paintings before the turn of the century are thinly painted and inspired by Whistler, both in sentiment and in treatment of colour. Just prior to World War I he began to paint, in a **thicker style**, winter Canadian scenes influenced by the Impressionists. Some of his works during his Caribbean period are considered his best and are painted in a loose style influenced by Post Impressionism.

P2: Gallery. Morrice's paintings before the turn of the century are thinly painted and inspired by Whistler, both in sentiment and in treatment of colour. Just prior to World War I he began to paint, in a **deeper form**, winter Canadian scenes influenced by the Impressionists. Some of his works during his Caribbean period are considered his best and are painted in a loose style influenced by Post Impressionism.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **thicker style** and **deeper form** interchangeable (i.e., having the same meaning)?

Pair 210

P1: A single point of failure (SPOF) is a part of a system that, if it fails, will stop the entire system from working. SPOFs are undesirable in any system with a goal of high availability or reliability, be it a **business practice**, software application, or other industrial system. Overview.

P2: A single point of failure (SPOF) is a part of a system that, if it fails, will stop the entire system from working. SPOFs are undesirable in any system with a goal of high availability or reliability, be it a **company rule**, software application, or other industrial system. Overview.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **business practice** and **company rule** interchangeable (i.e., having the same meaning)?

Pair 211

P1: Fanning was an old newspaper man and wanted to bring out a new weekly paper, and suggested to Roper that she take a position on the staff of that paper, which she did, starting with the first issue, but keeping up her advertising work for D. Crawford & Co. This combination eventually netted her an income of about \$3,000 (\$ in dollars) a year. For "The Mirror" she wrote short stories, gave a **certain space** to book reviews, dramatic criticisms and other departments each week. When Roper commenced her work on "The Star", William Marion Reedy was the city editor.

P2: Fanning was an old newspaper man and wanted to bring out a new weekly paper, and suggested to Roper that she take a position on the staff of that paper, which she did, starting with the first issue, but keeping up her advertising work for D. Crawford & Co. This combination eventually netted her an income of about \$3,000 (\$ in dollars) a year. For "The Mirror" she wrote short stories, gave a **particular time interval** to book reviews, dramatic criticisms and other departments each week. When Roper commenced her work on "The Star", William Marion Reedy was the city editor.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **certain space** and **particular time interval** interchangeable (i.e., having the same meaning)?

Pair 212

P1: Legal and ethical issues. Token economies can present issues with concern to patient rights. The right to have their personal properties, **basic comfort** and freedom of choice of treatment constrained the possibilities for token economies. In addition, ethical and personal concerns of staff members arose: is it ethically justified to use cigarettes as secondary reinforcers; is it human to rely on 'reward and punishment' as means for treatment; isn't sincere human contact much more valuable and effective; and do token economies reduce human interaction to trade, therefore centering patients' attention (and behavior) upon materials?

P2: Legal and ethical issues. Token economies can present issues with concern to patient rights. The right to have their personal properties, **essential amenities** and freedom of choice of treatment constrained the possibilities for token economies. In addition, ethical and personal concerns of staff members arose: is it ethically justified to use cigarettes as secondary reinforcers; is it human to rely on 'reward and punishment' as means for treatment; isn't sincere human contact much more valuable and effective; and do token economies reduce human interaction to trade, therefore centering patients' attention (and behavior) upon materials?

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **basic comfort** and **essential amenities** interchangeable (i.e., having the same meaning)?

Pair 213

P1: Boulton washes a log in the surf, uncovers its mark and tells the doctor it belongs to White and McNally. The doctor becomes uncomfortable, decides not to saw up the logs, but Boulton says it makes no difference to him who the logs are stolen from. The two men engage in a **verbal exchange**, and when the doctor threatens Boulton with violence, Boulton mocks him. The doctor leaves the beach in anger, walking back to his cottage.

P2: Boulton washes a log in the surf, uncovers its mark and tells the doctor it belongs to White and McNally. The doctor becomes uncomfortable, decides not to saw up the logs, but Boulton says it makes no difference to him who the logs are stolen from. The two men engage in a **rhetorical argument**, and when the doctor threatens Boulton with violence, Boulton mocks him. The doctor leaves the beach in anger, walking back to his cottage.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **verbal exchange** and **rhetorical argument** interchangeable (i.e., having the same meaning)?

Pair 214

P1: "Rusty Cage" was part of the soundtrack of the 1994 bike racing game, "Road Rash", which received 3DO's 1994 "Soundtrack of the Year" award. The song appeared on the fictional radio station "" in the 2004 video game, ". **However, these versions are all 1 minute and 43 seconds shorter than the album version.** The majority of these versions end as the breakdown at the end of the song comes in.

P2: "Rusty Cage" was part of the soundtrack of the 1994 bike racing game, "Road Rash", which received 3DO's 1994 "Soundtrack of the Year" award. The song appeared on the fictional radio station "" in the 2004 video game, ". **However, these versions are all one minute and 43 seconds shorter than the album version.** The majority of these versions end as the breakdown at the end of the song comes in.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **1 minute** and **one minute** interchangeable (i.e., having the same meaning)?

Pair 215

P1: Road safety. Boaks's main concern was public safety on the roads. **He was a major advocate of pedestrian and non-motor vehicle traffic rights, and a need for additional care in road safety.** He advocated transporting freight by rail and using helicopters to alleviate traffic congestion.

P2: Road safety. Boaks's main concern was public safety on the roads. **He was a major advocate of pedestrian and non-motor vehicle traffic rights, and a need for extra interest in road safety.** He advocated transporting freight by rail and using helicopters to alleviate traffic congestion.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **additional care** and **extra interest** interchangeable (i.e., having the same meaning)?

Pair 216

P1: The lid is allowed to overhang the side so as not to pressure it. The piano is blanketed, strapped down and the remaining two legs are removed. **additional care should be added to ensure that the piano parts that can rub together and scratch must be secured.** The skid board with the piano is tipped, and a piano movers' dolly is slid underneath for transport to its new location, where the procedure is reversed.

P2: The lid is allowed to overhang the side so as not to pressure it. The piano is blanketed, strapped down and the remaining two legs are removed. **special concern should be added to ensure that the piano parts that can rub together and scratch must be secured.** The skid board with the piano is tipped, and a piano movers' dolly is slid underneath for transport to its new location, where the procedure is reversed.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **additional care** and **special concern** interchangeable (i.e., having the same meaning)?

Pair 217

P1: He has also restored several historic houses. "I consider it part of my art form," Slonem said in an interview with "NewsChief.com". **His "art form" also includes [[Gothic Revival architecture|Gothic revival]] furniture - in his homes, studios, and exhibits.** In 2009, [[Bergdorf Goodman]], a luxury department store in New York City, recreated Slonem's distinct art-filled living room for its windows display.

P2: He has also restored several historic houses. "I consider it part of my art form," Slonem said in an interview with "NewsChief.com". His "artistic expression" also includes "[Gothic Revival architecture|Gothic revival] furniture - in his homes, studios, and exhibits. In 2009, [[Bergdorf Goodman]], a luxury department store in New York City, recreated Slonem's distinct art-filled living room for its windows display.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **art form** and **artistic expression** interchangeable (i.e., having the same meaning)?

Pair 218

P1: China first used the veto on 25 August 1972 to block Bangladesh's admission to the United Nations. From 1971 to 2011, China used its veto sparingly, preferring to abstain rather than veto resolutions not directly related to Chinese interests. China turned abstention into an "art form," abstaining on 30% of Security Council Resolutions between 1971 and 1976. Since the outbreak of the Syrian Civil War in 2011, China has joined Russia in many double-vetoes.

P2: China first used the veto on 25 August 1972 to block Bangladesh's admission to the United Nations. From 1971 to 2011, China used its veto sparingly, preferring to abstain rather than veto resolutions not directly related to Chinese interests. China turned abstention into an "conventional practice," abstaining on 30% of Security Council Resolutions between 1971 and 1976. Since the outbreak of the Syrian Civil War in 2011, China has joined Russia in many double-vetoes.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **art form** and **conventional practice** interchangeable (i.e., having the same meaning)?

Pair 219

P1: Thus, engineer and physicist Hannes Alfvén identified two fundamental prerequisites for effective management of high-level radioactive waste: (1) stable geological formations, and (2) stable human institutions over hundreds of thousands of years. As Alfvén suggests, no known human civilization has ever endured for so long, and no geologic formation of adequate size for a permanent radioactive waste repository has yet been discovered that has been stable for so long a period. Nevertheless, avoiding confronting the risks associated with managing radioactive wastes may create countervailing risks of **greater magnitude**. Radioactive waste management is an example of policy analysis that requires special attention to ethical concerns, examined in the light of uncertainty and "futuraity": consideration of 'the impacts of practices and technologies on future generations'.

P2: Thus, engineer and physicist Hannes Alfvén identified two fundamental prerequisites for effective management of high-level radioactive waste: (1) stable geological formations, and (2) stable human institutions over hundreds of thousands of years. As Alfvén suggests, no known human civilization has ever endured for so long, and no geologic formation of adequate size for a permanent radioactive waste repository has yet been discovered that has been stable for so long a period. Nevertheless, avoiding confronting the risks associated with managing radioactive wastes may create countervailing risks of **even bigger consequence**. Radioactive waste management is an example of policy analysis that requires special attention to ethical concerns, examined in the light of uncertainty and "futuraity": consideration of 'the impacts of practices and technologies on future generations'.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **greater magnitude** and **even bigger consequence** interchangeable (i.e., having the same meaning)?

Pair 220

P1: Effect of geometric pressure can be neglected, considering only the forces of inertia and kinetic energy of gas flows. capacity of the furnace is necessary to determine not only by the quantity of supplied fuel in it, but the oxygen consumed by the furnace for combustion of fuel; the choice of transporting system of processed and received materials in the furnace, which determines the type of the furnace and is its main feature, is very important. This theory has opened new directions in the design of compact furnaces with **forced movement** of gases. In 1931-1935, he developed a new theory of metal heating and experimentally proved that the steel can be heated very quickly, ensuring high performance

of furnaces with a perfect metal quality and its low waste.

P2: Effect of geometric pressure can be neglected, considering only the forces of inertia and kinetic energy of gas flows. capacity of the furnace is necessary to determine not only by the quantity of supplied fuel in it, but the oxygen consumed by the furnace for combustion of fuel; the choice of transporting system of processed and received materials in the furnace, which determines the type of the furnace and is its main feature, is very important. **This theory has opened new directions in the design of compact furnaces with obligatory motion of gases.** In 1931-1935, he developed a new theory of metal heating and experimentally proved that the steel can be heated very quickly, ensuring high performance of furnaces with a perfect metal quality and its low waste.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **forced movement** and **obligatory motion** interchangeable (i.e., having the same meaning)?

Pair 221

P1: Slot drainage has proved the most breakthrough product of the last twenty years as a drainage option. As a channel drainage system it is designed to eliminate the need for further pipework systems to be installed in parallel to the drainage, reducing the environmental impact of production as well as improving water collection. **Stainless steel, concrete channel, PVC and HDPE are all materials available for slot drainage which have become industry standards on construction projects.** Drainage in the construction industry.

P2: Slot drainage has proved the most breakthrough product of the last twenty years as a drainage option. As a channel drainage system it is designed to eliminate the need for further pipework systems to be installed in parallel to the drainage, reducing the environmental impact of production as well as improving water collection. **Stainless steel, concrete channel, PVC and HDPE are all materials available for slot drainage which have become production requirements on construction projects.** Drainage in the construction industry.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **industry standards** and **production requirements** interchangeable (i.e., having the same meaning)?

Pair 222

P1: These pumps have application in fluid metering and pumping of viscous or shear-sensitive materials. The cavities taper down toward their ends and overlap. **As one cavity diminishes another increases, the net flow amount has minimal variation as the total displacement is equal.** This design results in a flow with little to no pulse.

P2: These pumps have application in fluid metering and pumping of viscous or shear-sensitive materials. The cavities taper down toward their ends and overlap. **As one cavity diminishes another increases, the net flow amount has little fluctuation as the total displacement is equal.** This design results in a flow with little to no pulse.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **minimal variation** and **little fluctuation** interchangeable (i.e., having the same meaning)?

Pair 223

P1: All matches were the best of three games, with each game won by the first player to reach 21 points. If the score reached 20–20, the winner was the first player to lead by two points. **If the score reached 29–29, the player who won the next point won the match.** The draw for the groups was held on 23 July 2012.

P2: All matches were the best of three games, with each game won by the first player to reach 21 points. If the score reached 20–20, the winner was the first player to lead by two points. **If the score reached 29–29, the player who won the**

following score won the match. The draw for the groups was held on 23 July 2012.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **next point** and **following score** interchangeable (i.e., having the same meaning)?

Pair 224

P1: His Wisden obituary contains similar sentiments: "As a batsman he had a style of back play peculiarly his own, and his judgment of the length of bowling was almost unequalled. It was said of him that he seemed to see the ball closed up to the bat than any other player." Shrewsbury was not a strong or muscular man and stated that he did not hit the ball, but steered it in the **desired direction**. Shrewsbury's technique was criticised by Rait Kerr in his book 'The laws of cricket'.

P2: His Wisden obituary contains similar sentiments: "As a batsman he had a style of back play peculiarly his own, and his judgment of the length of bowling was almost unequalled. It was said of him that he seemed to see the ball closed up to the bat than any other player." Shrewsbury was not a strong or muscular man and stated that he did not hit the ball, but steered it in the **appropriate course**. Shrewsbury's technique was criticised by Rait Kerr in his book 'The laws of cricket'.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **desired direction** and **appropriate course** interchangeable (i.e., having the same meaning)?

Pair 225

P1: The rules of combat archery dictate that no archer may shoot at a light, however all may shoot at a heavy. Combat archery can be an interesting challenge for participants, as it involves shooting at moving targets, and can be used to re-create battles. In Australia, it is more common for 'lights' to wear **enough protection** that they can shoot at each other as well. It is important to note the strict separation between archery practised as a competitive sport and archery as an impalement art.

P2: The rules of combat archery dictate that no archer may shoot at a light, however all may shoot at a heavy. Combat archery can be an interesting challenge for participants, as it involves shooting at moving targets, and can be used to re-create battles. In Australia, it is more common for 'lights' to wear **sufficient armor** that they can shoot at each other as well. It is important to note the strict separation between archery practised as a competitive sport and archery as an impalement art.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **enough protection** and **sufficient armor** interchangeable (i.e., having the same meaning)?

Pair 226

P1: This gave it adequate coverage of most of the Boston area. Plans called for WGTR to power down to 2,500 watts at night to protect KYW in Philadelphia and WBZ in Boston; the latter station operated at adjacent 1030 AM. Unfortunately for Garabedian, Westinghouse Broadcasting, owner of both KYW and WBZ, complained that the Ashland site wouldn't provide **enough protection** for those stations. As a result, WGTR was only allowed to operate at 1,700 watts at night.

P2: This gave it adequate coverage of most of the Boston area. Plans called for WGTR to power down to 2,500 watts at night to protect KYW in Philadelphia and WBZ in Boston; the latter station operated at adjacent 1030 AM. Unfortunately for Garabedian, Westinghouse Broadcasting, owner of both KYW and WBZ, complained that the Ashland site wouldn't provide **the required insurance** for those stations. As a result, WGTR was only allowed to operate at 1,700 watts at night.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **enough protection** and **the required insurance** interchangeable (i.e., having the same meaning)?

Pair 227

P1: After the president's death first lady Sarah Polk lived in the home, she became a recluse for some time, barely leaving the mansion. She wouldn't find solace until fostering a great niece, Sarah Polk Jetton in the early 1850s. **Soon she opened her home back up for invitations and hosting guests along with the occasional event.** She hosted distinguished and popular guests throughout her widowhood, such as Adelia Acklen a close friend, along with Abram Hewitt, Edward Cooper, John C. Calhoun II, John Catron, George Bancroft, Cyrus Field, William Vanderbilt, Sam Houston among numerous others, including Presidents Andrew Johnson, Rutherford B. Hayes and Grover Cleveland.

P2: After the president's death first lady Sarah Polk lived in the home, she became a recluse for some time, barely leaving the mansion. She wouldn't find solace until fostering a great niece, Sarah Polk Jetton in the early 1850s. **Soon she opened her home back up for invitations and hosting guests along with the random affair.** She hosted distinguished and popular guests throughout her widowhood, such as Adelia Acklen a close friend, along with Abram Hewitt, Edward Cooper, John C. Calhoun II, John Catron, George Bancroft, Cyrus Field, William Vanderbilt, Sam Houston among numerous others, including Presidents Andrew Johnson, Rutherford B. Hayes and Grover Cleveland.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **occasional event** and **random affair** interchangeable (i.e., having the same meaning)?

Pair 228

P1: The symbol of the Guildhawk Girl with a Red Scarf is also a registered design of the company registered trade mark number UK00003395936. History. **Guildhawk was founded under the name today translations in London by Jurga Zilinskiene in 2001.** Zilinskiene funded the establishment of the company with £13,000 of her own savings.

P2: The symbol of the Guildhawk Girl with a Red Scarf is also a registered design of the company registered trade mark number UK00003395936. History. **Guildhawk was founded under the name present-day adaptations in London by Jurga Zilinskiene in 2001.** Zilinskiene funded the establishment of the company with £13,000 of her own savings.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **today translations** and **present-day adaptations** interchangeable (i.e., having the same meaning)?

Pair 229

P1: This process later became known as Authentic Movement (AM). Practice. **When starting a basic AM session, participants start in a comfortable position, eyes closed to sense their inner body-mind processes.** They then wait for stimuli to arise within them, and follow each impulse expressing movement or sound.

P2: This process later became known as Authentic Movement (AM). Practice. **When starting a basic AM session, participants start in a pleasing posture, eyes closed to sense their inner body-mind processes.** They then wait for stimuli to arise within them, and follow each impulse expressing movement or sound.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **comfortable position** and **pleasing posture** interchangeable (i.e., having the same meaning)?

Pair 230

P1: Popitz was not alone in seeing in Himmler a potential ally. General von Bock advised Tresckow to seek his support, but there is no evidence that he did so. Gordeler was apparently also in indirect contact with Himmler via a mutual acquaintance Carl Langbehn. Canaris's biographer Heinz Höhne suggests that Canaris and Himmler were working together to bring about a change of regime.

P2: Popitz was not alone in seeing in Himmler a potential ally. General von Bock advised Tresckow to seek his support, but there is no evidence that he did so. Gordeler was apparently also in indirect contact with Himmler via a common associate Carl Langbehn. Canaris's biographer Heinz Höhne suggests that Canaris and Himmler were working together to bring about a change of regime.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are mutual acquaintance and common associate interchangeable (i.e., having the same meaning)?

Pair 231

P1: However, no institution in the country offered computer education to professionals at that time. Therefore, Aguiluz founded the AMA Institute of Computer Studies with the first computer school located along Shaw Boulevard on 20 October 1980. Back then, AMA Institute of Computer Studies offered only short-term courses in Electronic Data Processing Fundamentals, Basic Programming, and technology career. Three students enrolled at the AMA Institute of Computer Studies during the first semester.

P2: However, no institution in the country offered computer education to professionals at that time. Therefore, Aguiluz founded the AMA Institute of Computer Studies with the first computer school located along Shaw Boulevard on 20 October 1980. Back then, AMA Institute of Computer Studies offered only short-term courses in Electronic Data Processing Fundamentals, Basic Programming, and electronics pathway. Three students enrolled at the AMA Institute of Computer Studies during the first semester.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are technology career and electronics pathway interchangeable (i.e., having the same meaning)?

Pair 232

P1: A "road apple" (the colloquial term for horse manure, suggesting the device's undesirable nature) is any removable media with malicious software left in opportunistic or conspicuous places. It may be a CD, DVD, or USB flash drive, among other media. curious people take it and plug it into a computer, infecting the host and any attached networks. Again, hackers may give them enticing labels, such as "Employee Salaries" or "Confidential".

P2: A "road apple" (the colloquial term for horse manure, suggesting the device's undesirable nature) is any removable media with malicious software left in opportunistic or conspicuous places. It may be a CD, DVD, or USB flash drive, among other media. investigative beings take it and plug it into a computer, infecting the host and any attached networks. Again, hackers may give them enticing labels, such as "Employee Salaries" or "Confidential".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are curious people and investigative beings interchangeable (i.e., having the same meaning)?

Pair 233

P1: Exceeding beyond the limitations set down by others shall be my goal. Sacrificing personal comforts and dedicating myself to the completion of the reconnaissance mission shall be my life. Physical fitness, mental attitude, and high

ethics—The title of Recon Marine is my honor. Conquering all obstacles, both large and small, I shall never quit.

P2: Exceeding beyond the limitations set down by others shall be my goal. Sacrificing personal comforts and dedicating myself to the completion of the reconnaissance mission shall be my life. Physical fitness, personal perspective, and high ethics—The title of Recon Marine is my honor. Conquering all obstacles, both large and small, I shall never quit.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **mental attitude** and **personal perspective** interchangeable (i.e., having the same meaning)?

Pair 234

P1: The definition of WOTUS was challenged in court several times, especially regarding the integration of isolated wetlands, but until the years 2000, the U.S. Federal Court stood by the initial definition saying that floodplain wetlands are bound to the streams they are adjacent to. Then, In 2001, a judgement ruled that isolated wetlands are not comprised in the WOTUS definition because they do not show "significant nexus" with navigable streams. In 2006, in the Rapanos vs. united states case, further confusion was created concerning the WOTUS definition. No majority decision was obtained, as two main opinions divided the judges.

P2: The definition of WOTUS was challenged in court several times, especially regarding the integration of isolated wetlands, but until the years 2000, the U.S. Federal Court stood by the initial definition saying that floodplain wetlands are bound to the streams they are adjacent to. Then, In 2001, a judgement ruled that isolated wetlands are not comprised in the WOTUS definition because they do not show "significant nexus" with navigable streams. In 2006, in the Rapanos vs. U.S. lawsuit, further confusion was created concerning the WOTUS definition. No majority decision was obtained, as two main opinions divided the judges.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **united states case** and **U.S. lawsuit** interchangeable (i.e., having the same meaning)?

Pair 235

P1: At a specialized level, knowledge environments need sophisticated architecture and modeling capabilities. This approach is necessary when the creator of the knowledge environment wants to deliver replicable results in hundreds of specific instances of the same knowledge environment. On the other hand, the strengthening trend of public authorship leads to open-ended ontologies by means of, say, tagging or folksonomies. In a significant sense, knowledge environments are in such cases created not only by their authors or owners but also by the contributors of their ontologies.

P2: At a specialized level, knowledge environments need sophisticated architecture and modeling capabilities. This approach is necessary when the creator of the knowledge environment wants to deliver replicable results in hundreds of specific instances of the same knowledge environment. On the other hand, the growing movement of public authorship leads to open-ended ontologies by means of, say, tagging or folksonomies. In a significant sense, knowledge environments are in such cases created not only by their authors or owners but also by the contributors of their ontologies.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **strengthening trend** and **growing movement** interchangeable (i.e., having the same meaning)?

Pair 236

P1: While were bought by the government as sites for prisons and a lunatic asylum, the LNC struggled to sell the remainder. By the time the ten-year window for land sales expired in 1865, only had been sold. With the majority of the surplus lands still unsold, as the ten-year window expired the LNC successfully petitioned for a further five-year extension. The LNC was by this time in serious financial difficulties, and dependent on loans from its own directors to settle outstanding debts.

P2: While were bought by the government as sites for prisons and a lunatic asylum, the LNC struggled to sell the remainder. By the time the ten-year window for land sales expired in 1865, only had been sold. With the majority of the surplus lands still unsold, as the one hundred twenty month mark expired the LNC successfully petitioned for a further five-year extension. The LNC was by this time in serious financial difficulties, and dependent on loans from its own directors to settle outstanding debts.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are ten-year window and one hundred twenty month mark interchangeable (i.e., having the same meaning)?

Pair 237

P1: In March 2012, he was sentenced to five months and 29 days in jail. In January 2013, members of the Hart family hosted a wrestling event in Calgary, advertising the event as an online pay-per-view that never aired. Talent, event staff, and venue representatives claimed they were never paid despite a sold out show. Alexandra Hart, Bret (The Hitman) Hart's daughter, opened a restaurant called Hart Healthy Food in Calgary in October 2019, which suddenly closed on Dec 20, 2019.

P2: In March 2012, he was sentenced to five months and 29 days in jail. In January 2013, members of the Hart family hosted a wrestling event in Calgary, advertising the event as an online pay-per-view that never aired. Talent, employee performance teams, and venue representatives claimed they were never paid despite a sold out show. Alexandra Hart, Bret (The Hitman) Hart's daughter, opened a restaurant called Hart Healthy Food in Calgary in October 2019, which suddenly closed on Dec 20, 2019.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are event staff and employee performance teams interchangeable (i.e., having the same meaning)?

Pair 238

P1: Because of the type of injuries that would have been commonly seen, surgery was a somewhat common occurrence. Tools such as scissors, knives and arrow extractors have been found in remains. In fact, Roman surgery was quite intuitive, in contrast to common thought of ancient surgery. The Roman military surgeons used a cocktail of plants, which created a sedative similar to modern anesthesia.

P2: Because of the type of injuries that would have been commonly seen, surgery was a somewhat common occurrence. Tools such as scissors, knives and arrow extractors have been found in remains. In fact, Roman surgery was quite intuitive, in contrast to prevalent theory of ancient surgery. The Roman military surgeons used a cocktail of plants, which created a sedative similar to modern anesthesia.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are common thought and prevalent theory interchangeable (i.e., having the same meaning)?

Pair 239

P1: The goals of the chant-talk approach are to use voice quality and pitch techniques to decrease the effort used while talking. The technique is first demonstrated through the use of recordings, with the patient subsequently asked to imitate the specified voicing patterns. Once the chant has been mastered, the patient is asked to read aloud in chant and in normal register in 20 second alternation. Patients are asked to reduce chanting to a minimal, while maintaining vowel prolongations and softened glottal word onsets.

P2: The goals of the chant-talk approach are to use voice quality and pitch techniques to decrease the effort used while talking. The technique is first demonstrated through the use of recordings, with the patient subsequently asked to imitate the specified voicing patterns. Once the chant has been mastered, the patient is asked to read aloud in chant and in

average range in 20 second alternation. Patients are asked to reduce chanting to a minimal, while maintaining vowel prolongations and softened glottal word onsets.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **normal register** and **average range** interchangeable (i.e., having the same meaning)?

Pair 240

P1: Ultimately, Vito missed his family and fast-paced lifestyle back in New Jersey too much to stay with Jim. Vito left Jim's house early one morning to return to New Jersey while Jim was still asleep. **While driving back to New Jersey, a drunk Vito crashed his car into a parked vehicle.** When he failed to convince the owner to keep the accident from the police, Vito shot and killed the man.

P2: Ultimately, Vito missed his family and fast-paced lifestyle back in New Jersey too much to stay with Jim. Vito left Jim's house early one morning to return to New Jersey while Jim was still asleep. **While driving back to New Jersey, a drunk Vito crashed his car into a halted automobile.** When he failed to convince the owner to keep the accident from the police, Vito shot and killed the man.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **parked vehicle** and **halted automobile** interchangeable (i.e., having the same meaning)?

Pair 241

P1: It is manufactured in two pieces, totaling approximately two feet wide by one foot high, and is curved (convex). It is mounted onto the chassis of the bus in front of the rear right wheels and behind the rear door, if present. **Because of its curved design, the force vector is outward and to the right, helping move a fallen body out from under the bus.** The S-1 Gard is recommended by the Transportation Research Board as a strategy for mitigating bus collisions with pedestrians, and has been credited by public transit officials with significantly reducing, if not eliminating, injuries and fatalities involving the rear right wheels of transit buses.

P2: It is manufactured in two pieces, totaling approximately two feet wide by one foot high, and is curved (convex). It is mounted onto the chassis of the bus in front of the rear right wheels and behind the rear door, if present. **Because of its curved design, the force vector is outward and to the right, helping move a fractured frame out from under the bus.** The S-1 Gard is recommended by the Transportation Research Board as a strategy for mitigating bus collisions with pedestrians, and has been credited by public transit officials with significantly reducing, if not eliminating, injuries and fatalities involving the rear right wheels of transit buses.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **fallen body** and **fractured frame** interchangeable (i.e., having the same meaning)?

Pair 242

P1: The structural circumstance where a non-heterosexual or gender non-conforming individual is embedded in significantly affects the potential sources of risk. The compounding of these everyday stressors increase poor mental health outcomes among individuals in the LGBTQ+ community. **Evidence shows that there is a direct association between LGBTQ+ individuals' development of severe mental illnesses and the exposure to discrimination.** In addition, there are a lack of access to mental health resources specific to LGBTQ+ individuals and a lack of awareness about mental health conditions within the LGBTQ+ community that restricts patients from seeking help.

P2: The structural circumstance where a non-heterosexual or gender non-conforming individual is embedded in significantly affects the potential sources of risk. The compounding of these everyday stressors increase poor mental health outcomes among individuals in the LGBTQ+ community. **Evidence shows that there is a forthright connection between LGBTQ+ individuals' development of severe mental illnesses and the exposure to discrimination.** In addition, there are a lack of access to mental health resources specific to LGBTQ+ individuals and a lack of awareness about mental

health conditions within the LGBTQ+ community that restricts patients from seeking help.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **direct association** and **forthright connection** interchangeable (i.e., having the same meaning)?

Pair 243

P1: He asks Brody to live with Issa, and teach him to speak English. As they spend time together, Brody teaches Issa to speak English and takes on a fatherly role, and the two form a close relationship. **As the first source of meaningful human contact in many years for Brody, he grows quite attached to the boy.** One day, the school Issa attends is destroyed by a drone strike.

P2: He asks Brody to live with Issa, and teach him to speak English. As they spend time together, Brody teaches Issa to speak English and takes on a fatherly role, and the two form a close relationship. **As the introductory fountain of meaningful human contact in many years for Brody, he grows quite attached to the boy.** One day, the school Issa attends is destroyed by a drone strike.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **first source** and **introductory fountain** interchangeable (i.e., having the same meaning)?

Pair 244

P1: The study's evidence included three different outbreaks prior to 2013 associated with this specific strain of "E. coli" in Gouda cheese. Between 2007 and 2016 there were 144 outbreaks connected to raw milk consumption in the United States. **Because raw milk production skips the pasteurization process, the germs that are normally removed remain in the milk product.** Exposure to raw milk containing harmful germs poses a threat of infection, resulting from bacteria including "Campylobacter", "Cryptosporidium", "E. coli", "Listeria", and "Salmonella".

P2: The study's evidence included three different outbreaks prior to 2013 associated with this specific strain of "E. coli" in Gouda cheese. Between 2007 and 2016 there were 144 outbreaks connected to raw milk consumption in the United States. **Because raw dairy by-production skips the pasteurization process, the germs that are normally removed remain in the milk product.** Exposure to raw milk containing harmful germs poses a threat of infection, resulting from bacteria including "Campylobacter", "Cryptosporidium", "E. coli", "Listeria", and "Salmonella".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **milk product** and **dairy by-product** interchangeable (i.e., having the same meaning)?

Pair 245

P1: Many even lost their farms. Like many communities in the country, World War I and World War II affected the economy of Portage in a big way. **Steel mills geared into high production and labor was in high demand, thus drawing many people to the area.** Post-World War II.

P2: Many even lost their farms. Like many communities in the country, World War I and World War II affected the economy of Portage in a big way. **Steel mills geared into large manufacturing and labor was in high demand, thus drawing many people to the area.** Post-World War II.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **high production** and **large manufacturing** interchangeable (i.e., having the same meaning)?

Pair 246

P1: Education, reassurance and psychobehavioral therapy are often sufficient for the majority of cases. In particular, psychoeducation targeting the patient and their family and surrounding community is a key management strategy. Watchful waiting "is an **acceptable approach**" for those who are not functionally impaired. Symptom management may include behavioral, psychological and pharmacological therapies.

P2: Education, reassurance and psychobehavioral therapy are often sufficient for the majority of cases. In particular, psychoeducation targeting the patient and their family and surrounding community is a key management strategy. Watchful waiting "is an **adequate mean**" for those who are not functionally impaired. Symptom management may include behavioral, psychological and pharmacological therapies.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **acceptable approach** and **adequate mean** interchangeable (i.e., having the same meaning)?

Pair 247

P1: Restoration. In 1959, robbers looted several Jain images or even cut off heads of many idols. This resulted in the Jain community of the area taking **precautionary action** by setting up a temple committee. This temple committee oversees the protection of the monuments and works to improve the ambience of the entire place.

P2: Restoration. In 1959, robbers looted several Jain images or even cut off heads of many idols. This resulted in the Jain community of the area taking **preemptive proceeding** by setting up a temple committee. This temple committee oversees the protection of the monuments and works to improve the ambience of the entire place.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **precautionary action** and **preemptive proceeding** interchangeable (i.e., having the same meaning)?

Pair 248

P1: If the user's anti-virus software detected a certain file as Trojan.Win32.Patched, they could attempt to have it create a copy of a patched file, try to restore its contents, and then it will add a renaming command into the Windows Registry in order to replace the patched file with a cleaned one during the next Windows startup. A restoration to one of the recent System Restore points may be advisable. In many cases a patched system component will be replaced with a **clean one**. Before restoring a System Restore point it is advised to back up all personal data to avoid losing it when Windows rolls back to a previously saved state.

P2: If the user's anti-virus software detected a certain file as Trojan.Win32.Patched, they could attempt to have it create a copy of a patched file, try to restore its contents, and then it will add a renaming command into the Windows Registry in order to replace the patched file with a cleaned one during the next Windows startup. A restoration to one of the recent System Restore points may be advisable. In many cases a patched system component will be replaced with a **fresh one**. Before restoring a System Restore point it is advised to back up all personal data to avoid losing it when Windows rolls back to a previously saved state.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **clean one** and **fresh one** interchangeable (i.e., having the same meaning)?

Pair 249

P1: Kathleen "Katie" Fallon (born October 25, 1976) is an American non-fiction author and essayist. Her essays have appeared in numerous literary journals, both electronic and print, and received several accolades. In 2011, she published

her first book, "Cerulean Blues: A **personal search** for a Vanishing Songbird". She currently resides in Cheat Neck, WV with her husband Jesse, where she teaches creative writing at nearby West Virginia University.

P2: Kathleen "Katie" Fallon (born October 25, 1976) is an American non-fiction author and essayist. Her essays have appeared in numerous literary journals, both electronic and print, and received several accolades. **In 2011, she published her first book, "Cerulean Blues: A individual quest for a Vanishing Songbird".** She currently resides in Cheat Neck, WV with her husband Jesse, where she teaches creative writing at nearby West Virginia University.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **personal search** and **individual quest** interchangeable (i.e., having the same meaning)?

Pair 250

P1: These endorsements were used during some of the campaign rallies in 2004. The Bush campaign asserted that the oath was valid because the president was conducting a partisan campaign event. **Opponents countered that the oath was intrusive to individual conscience and denied general public access to the president.** California.

P2: These endorsements were used during some of the campaign rallies in 2004. The Bush campaign asserted that the oath was valid because the president was conducting a partisan campaign event. **Opponents countered that the oath was intrusive to individual conscience and denied broad community contact to the president.** California.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **general public access** and **broad community contact** interchangeable (i.e., having the same meaning)?

Pair 251

P1: The steps zig-zag up the Rock from the end of Martin's Path to near the summit. Martin's Path starts on the south western slopes of the Rock gently above the derelict Levant Battery near Jews' Gate Cemetery and proceeds to its first bend as the path turns to the east side of the Rock where it joins Mediterranean Steps. **martin's path actually continues onwards to Martin's Cave but the way is prohibited and a locked gate protects the cave.** The route is entirely within the Upper Rock Nature Reserve and the Goat's Hair Twin Caves can be seen on the way.

P2: The steps zig-zag up the Rock from the end of Martin's Path to near the summit. Martin's Path starts on the south western slopes of the Rock gently above the derelict Levant Battery near Jews' Gate Cemetery and proceeds to its first bend as the path turns to the east side of the Rock where it joins Mediterranean Steps. **His track actually continues onwards to Martin's Cave but the way is prohibited and a locked gate protects the cave.** The route is entirely within the Upper Rock Nature Reserve and the Goat's Hair Twin Caves can be seen on the way.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **martin's path** and **His track** interchangeable (i.e., having the same meaning)?

Pair 252

P1: Justice toward God is called the "virtue of religion". Modern developments. **With the late modern rise in interest in virtue ethics, a new interest in articulating the virtue of justice has emerged.** John Rawls saw justice as the typical virtue of the institution; Irene van Staveren saw it as that of the state, marked by such indicators as votes, legitimacy, public fairness and distributive rules.

P2: Justice toward God is called the "virtue of religion". Modern developments. **With the late modern rise in interest in virtue ethics, a fresh attraction in articulating the virtue of justice has emerged.** John Rawls saw justice as the typical virtue of the institution; Irene van Staveren saw it as that of the state, marked by such indicators as votes, legitimacy, public fairness and distributive rules.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **new interest** and **fresh attraction** interchangeable (i.e., having the same meaning)?

Pair 253

P1: The band extended their tour in support of the song and its popularity. "We saw a change in our audience. **By the time we were done touring for "Chutes Too Narrow", there was this new interest,**" said Mercer. "We toured again almost as the soundtrack to that movie, and colleges were all of a sudden interested in us playing on their campuses.

P2: The band extended their tour in support of the song and its popularity. "We saw a change in our audience. **By the time we were done touring for "Chutes Too Narrow", there was this current curiosity,**" said Mercer. "We toured again almost as the soundtrack to that movie, and colleges were all of a sudden interested in us playing on their campuses.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **new interest** and **current curiosity** interchangeable (i.e., having the same meaning)?

Pair 254

P1: Zinstall Easy Transfer is a PC migration software, which allows to transfer user files, settings, profile and customization from one computer to another. **Unlike other Zinstall transfer products, easy transfer does not transfer the programs themselves - only their settings and user files.** The product is cited as an alternative to the Windows Easy Transfer Wizard, a feature that has been removed from Microsoft Windows 10 standard options.

P2: Zinstall Easy Transfer is a PC migration software, which allows to transfer user files, settings, profile and customization from one computer to another. **Unlike other Zinstall transfer products, uncomplicated relocation does not transfer the programs themselves - only their settings and user files.** The product is cited as an alternative to the Windows Easy Transfer Wizard, a feature that has been removed from Microsoft Windows 10 standard options.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **easy transfer** and **uncomplicated relocation** interchangeable (i.e., having the same meaning)?

Pair 255

P1: The reservoir serves as a popular trailhead into the High Uintas Wilderness Area, with the boundary only one mile north of the dam, near the high water line for the reservoir. Recreation management is under the jurisdiction of the U.S. Forest Service, Ashley National Forest. **The managed recreation season is from June to September with high use on holidays and weekends.** Available fish species include rainbow, brown, and brook trout.

P2: The reservoir serves as a popular trailhead into the High Uintas Wilderness Area, with the boundary only one mile north of the dam, near the high water line for the reservoir. Recreation management is under the jurisdiction of the U.S. Forest Service, Ashley National Forest. **The managed recreation season is from June to September with elevated usability on holidays and weekends.** Available fish species include rainbow, brown, and brook trout.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **high use** and **elevated usability** interchangeable (i.e., having the same meaning)?

Pair 256

P1: China classically manifests two of the characteristics of development that Lewis had in mind: rising return to education and rural-urban migration. As an underdeveloped country, China began its reform with relatively few highly educated people, and with a small minority of the population (20%) living in cities, where labor productivity was about

twice the level as in the countryside. In pre-reform China there was very **little return** to education manifested in salaries. Cab drivers and college professors had similar incomes.

P2: China classically manifests two of the characteristics of development that Lewis had in mind: rising return to education and rural-urban migration. As an underdeveloped country, China began its reform with relatively few highly educated people, and with a small minority of the population (20%) living in cities, where labor productivity was about twice the level as in the countryside. In pre-reform China there was very **limited compensation** to education manifested in salaries. Cab drivers and college professors had similar incomes.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **little return** and **limited compensation** interchangeable (i.e., having the same meaning)?

Pair 257

P1: They also control her eyes, torso, and tail. The taiko drums in "Mystère" are created by the Japanese company Asano Taiko, located in Mattō, Ishikawa Prefecture. The largest drum in "Mystère" is the ōdaiko, which is in diameter and in length, and weighs **half a ton**. Due to the large size of the drum, it had to be brought into the theatre during construction.

P2: They also control her eyes, torso, and tail. The taiko drums in "Mystère" are created by the Japanese company Asano Taiko, located in Mattō, Ishikawa Prefecture. The largest drum in "Mystère" is the ōdaiko, which is in diameter and in length, and weighs **approximately 1100 pounds**. Due to the large size of the drum, it had to be brought into the theatre during construction.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **half a ton** and **approximately 1100 pounds** interchangeable (i.e., having the same meaning)?

Pair 258

P1: The Ombudsman also has responsibility under the Crimes of Torture Act (COTA) for examining and monitoring the general conditions and treatment of detainees in New Zealand prisons. The Ombudsman has criticised the Department of Corrections in a recent series of reports and investigations, citing ongoing issues with privacy, young persons, prisoner meal times and segregation facilities. Site visits are viewed and promoted as initiating an ongoing dialogue with detaining agencies, rather than a **one-off engagement**. With respect to prisons, the Office of the Ombudsman has addressed a wide range of issues arising in prisons including non-smoking policies, cell temperatures, double bunking and surrounding risk assessment procedures and provisions for prisoner privacy, lock-down hours and exercise facilities in prisons, and food quality and dining facilities in prison.

P2: The Ombudsman also has responsibility under the Crimes of Torture Act (COTA) for examining and monitoring the general conditions and treatment of detainees in New Zealand prisons. The Ombudsman has criticised the Department of Corrections in a recent series of reports and investigations, citing ongoing issues with privacy, young persons, prisoner meal times and segregation facilities. Site visits are viewed and promoted as initiating an ongoing dialogue with detaining agencies, rather than a **single occurrence**. With respect to prisons, the Office of the Ombudsman has addressed a wide range of issues arising in prisons including non-smoking policies, cell temperatures, double bunking and surrounding risk assessment procedures and provisions for prisoner privacy, lock-down hours and exercise facilities in prisons, and food quality and dining facilities in prison.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one-off engagement** and **single occurrence** interchangeable (i.e., having the same meaning)?

Pair 259

P1: A CEO survey conducted by Bain & Company showed that 94% of the interviewed CEO's considered the strategic fit to be vitally influential in the success or failure of an acquisition. A high degree of strategic fit from can potentially yield many benefits for an organization. Best case scenario a high degree of strategic fit may be the key to a successful merger, an **efficient organization**, synergy effects or cost reductions. It is a vital term and it should be taken into consideration when evaluating a company's strategy and opportunities.

P2: A CEO survey conducted by Bain & Company showed that 94% of the interviewed CEO's considered the strategic fit to be vitally influential in the success or failure of an acquisition. A high degree of strategic fit from can potentially yield many benefits for an organization. Best case scenario a high degree of strategic fit may be the key to a successful merger, an **organized institution**, synergy effects or cost reductions. It is a vital term and it should be taken into consideration when evaluating a company's strategy and opportunities.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **efficient organization** and **organized institution** interchangeable (i.e., having the same meaning)?

Pair 260

P1: In its place is "A Beginning", an orchestral instrumental track by producer George Martin, initially intended for the White Album as the intro to "Don't Pass Me By". Connecting to the previous "Anthology" albums, the cover image painted by Klaus Voorman features a collage of Beatles-related imagery designed to appear as a wall of peeling posters and album covers. An **updated picture** of Voorman can be seen in Harrison's hair in a segment of the "Revolver" album cover. Track listing.

P2: In its place is "A Beginning", an orchestral instrumental track by producer George Martin, initially intended for the White Album as the intro to "Don't Pass Me By". Connecting to the previous "Anthology" albums, the cover image painted by Klaus Voorman features a collage of Beatles-related imagery designed to appear as a wall of peeling posters and album covers. An **improved photo** of Voorman can be seen in Harrison's hair in a segment of the "Revolver" album cover. Track listing.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **updated picture** and **improved photo** interchangeable (i.e., having the same meaning)?

Pair 261

P1: Without a reliable reconciliation point at the distribution transformer, the utility operator's power theft detection system remains porous, inefficient and unreliable. 2. If AMI alone was a **complete solution** for diversion detection/identification, then AMI-installed utilities would seldom experience more than 1-3% loss from otherwise unavoidable technical losses. According to the United States Energy Information Administration (US EIA) most power distribution utilities report annual energy losses of nearly 5% or more.

P2: Without a reliable reconciliation point at the distribution transformer, the utility operator's power theft detection system remains porous, inefficient and unreliable. 2. If AMI alone was a **total answer** for diversion detection/identification, then AMI-installed utilities would seldom experience more than 1-3% loss from otherwise unavoidable technical losses. According to the United States Energy Information Administration (US EIA) most power distribution utilities report annual energy losses of nearly 5% or more.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **complete solution** and **total answer** interchangeable (i.e., having the same meaning)?

Pair 262

P1: While disposable primary batteries may be a low-cost option for intermittent use, regular bicycle commuters would probably find it cost-effective to use rechargeable cells. Some relatively bright headlamps use lithium-ion rechargeable

battery packs, which may be recharged from a USB port. Low power LED lights are mainly for being seen, or as an emergency backup, and are the **dominant choice** for rear lights. Colored LEDs provide more light than incandescent bulbs with filters, which absorb much of the visible energy produced by the bulb.

P2: While disposable primary batteries may be a low-cost option for intermittent use, regular bicycle commuters would probably find it cost-effective to use rechargeable cells. Some relatively bright headlamps use lithium-ion rechargeable battery packs, which may be recharged from a USB port. Low power LED lights are mainly for being seen, or as an emergency backup, and are the **superior option** for rear lights. Colored LEDs provide more light than incandescent bulbs with filters, which absorb much of the visible energy produced by the bulb.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **dominant choice** and **superior option** interchangeable (i.e., having the same meaning)?

Pair 263

P1: The 108th United States Congress was a meeting of the legislative branch of the United States federal government, composed of the United States Senate and the United States House of Representatives from January 3, 2003 to January 3, 2005, during the third and fourth years of George W. Bush's presidency. **house members** were elected in the 2002 general election on November 5, 2002. Senators were elected in three classes in the 1998 general election on November 3, 1998, 2000 general election on November 7, 2000, or 2002 general election on November 5, 2002.

P2: The 108th United States Congress was a meeting of the legislative branch of the United States federal government, composed of the United States Senate and the United States House of Representatives from January 3, 2003 to January 3, 2005, during the third and fourth years of George W. Bush's presidency. **cabinet officials** were elected in the 2002 general election on November 5, 2002. Senators were elected in three classes in the 1998 general election on November 3, 1998, 2000 general election on November 7, 2000, or 2002 general election on November 5, 2002.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **house members** and **cabinet officials** interchangeable (i.e., having the same meaning)?

Pair 264

P1: It is not always wise for climbers to form a rope team, since one falling climber may pull the entire team off the mountain. However, the risks of individual, unprotected travel are often so great that groups have no choice but to form a rope team. For example, when travelling over glaciers, crevasses pose a **grave danger** to a climber who is not roped in. These giant cracks in the ice are not always visible as snow can be blown and freeze over the top to make a snowbridge.

P2: It is not always wise for climbers to form a rope team, since one falling climber may pull the entire team off the mountain. However, the risks of individual, unprotected travel are often so great that groups have no choice but to form a rope team. For example, when travelling over glaciers, crevasses pose a **major hazard** to a climber who is not roped in. These giant cracks in the ice are not always visible as snow can be blown and freeze over the top to make a snowbridge.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **grave danger** and **major hazard** interchangeable (i.e., having the same meaning)?

Pair 265

P1: The inscription reads in part: On Monday, August 24, 1992, at 4:30 a.m., the eye wall of Hurricane Andrew passed over this point before striking Homestead and southern Miami-Dade County. The Fowey Rocks light station transmitted weather data with winds peaking at a two-minute wind speed of and a gust to before the station ceased transmitting, presumably due to damage from stronger gusts. **The strongest part of the eyewall had not reached Fowey Rocks when it stopped transmitting.** Since all park lands are no more than a few feet above sea level, they are vulnerable to rising

sea levels.

P2: The inscription reads in part: On Monday, August 24, 1992, at 4:30 a.m., the eye wall of Hurricane Andrew passed over this point before striking Homestead and southern Miami-Dade County. The Fowey Rocks light station transmitted weather data with winds peaking at a two-minute wind speed of and a gust to before the station ceased transmitting, presumably due to damage from stronger gusts. **The most durable piece of the eyewall had not reached Fowey Rocks when it stopped transmitting.** Since all park lands are no more than a few feet above sea level, they are vulnerable to rising sea levels.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **strongest part** and **most durable piece** interchangeable (i.e., having the same meaning)?

Pair 266

P1: Previously, competitions were held only at dzongkhag and gewog levels, however modernly, archery tournaments and competitions are held throughout the country. Archery is played during religious and secular public holidays in Bhutan, local festivals (tsechu), between public ministries and departments, and between the dzonkhag and the regional teams. **Archery tournaments and performances have also become a significant point of interest for tourism in Bhutan.** Archery in Bhutan is culturally distinctive because it is a martial art practiced among a modern population that abhors killing.

P2: Previously, competitions were held only at dzongkhag and gewog levels, however modernly, archery tournaments and competitions are held throughout the country. Archery is played during religious and secular public holidays in Bhutan, local festivals (tsechu), between public ministries and departments, and between the dzonkhag and the regional teams. **Archery tournaments and performances have also become a compelling place of interest for tourism in Bhutan.** Archery in Bhutan is culturally distinctive because it is a martial art practiced among a modern population that abhors killing.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **significant point** and **compelling place** interchangeable (i.e., having the same meaning)?

Pair 267

P1: "Magic Days". A search for the perfect day can become a waiting game when elements do not align, but when they do, the best professional skiers can make miracles happen - magic days, or perfect disasters. **Bobby Brown pushes his luck when he travels to the Alps, then Cody Townsend takes advantage of the perfect day in Terrace, British Columbia.** Episode Cast: Bobby Brown, Henrik Winstedt, Cody Townsend, Russ Henshaw, Gus Kenworthy, Kaj Kackrisson 13.

P2: "Magic Days". A search for the perfect day can become a waiting game when elements do not align, but when they do, the best professional skiers can make miracles happen - magic days, or perfect disasters. **Bobby Brown pushes his luck when he travels to the Alps, then Cody Townsend takes advantage of the exquisite daylight in Terrace, British Columbia.** Episode Cast: Bobby Brown, Henrik Winstedt, Cody Townsend, Russ Henshaw, Gus Kenworthy, Kaj Kackrisson 13.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **perfect day** and **exquisite daylight** interchangeable (i.e., having the same meaning)?

Pair 268

P1: Edmond is one of the premier male models to gain international fame from the island country being compared with icons such as Tyson Beckford (whom he slightly resembles). The Haitian native's modeling career actually began through his encounter with Tommy Hilfiger in 1997. **Ever since then, Edmond has become a feature model for fashion designer**

labels such as Ralph Lauren, Kenneth Cole, and Donna Karan. Name origin.

P2: Edmond is one of the premier male models to gain international fame from the island country being compared with icons such as Tyson Beckford (whom he slightly resembles). The Haitian native's modeling career actually began through his encounter with Tommy Hilfiger in 1997. Ever since then, Edmond has become a **major subject** for fashion designer labels such as Ralph Lauren, Kenneth Cole, and Donna Karan. Name origin.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **feature model** and **major subject** interchangeable (i.e., having the same meaning)?

Pair 269

P1: The colour of the shell is white. The spire is rather high, conical, scalar and sharp. The protoconch consists of 3½ very small turbinate whorls, of which the **extreme tip** is immersed and tabulate. They are chestnut-coloured, and are scored with excessively fine threadlets, which are straight and longitudinal above but cancellate on the lower part of the whorls.

P2: The colour of the shell is white. The spire is rather high, conical, scalar and sharp. The protoconch consists of 3½ very small turbinate whorls, of which the **last bit** is immersed and tabulate. They are chestnut-coloured, and are scored with excessively fine threadlets, which are straight and longitudinal above but cancellate on the lower part of the whorls.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **extreme tip** and **last bit** interchangeable (i.e., having the same meaning)?

Pair 270

P1: Narration. Several narrators were used in the history of the series. The last and longest-running is Max Raphael, who has also narrated other History Channel series, such as "**command decisions**." The History Channel has repackaged some episodes that originally aired in other series and stand-alone specials into episodes of "Modern Marvels", such as "Ice Road Truckers", which originally aired in 2000 as part of the series "Suicide Missions".

P2: Narration. Several narrators were used in the history of the series. The last and longest-running is Max Raphael, who has also narrated other History Channel series, such as "**directive determinations**." The History Channel has repackaged some episodes that originally aired in other series and stand-alone specials into episodes of "Modern Marvels", such as "Ice Road Truckers", which originally aired in 2000 as part of the series "Suicide Missions".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **command decisions** and **directive determinations** interchangeable (i.e., having the same meaning)?

Pair 271

P1: During the very earliest period, when Greek settlements were established in the Naples area in the second millennium BC, the Vomeres hill was called Bomòs (, or "high ground"). By the sixteenth century the name "Vomero" was used, possibly a corruption of the Greek "Bomòs." In Roman times, the **hilltop area** was called "Paturcium", from Patulcius, a name related to "Giano", the god to whom the hill was dedicated. In the early Middle Ages, via linguistic corruption, this became Patruscolo or Patruscio.

P2: During the very earliest period, when Greek settlements were established in the Naples area in the second millennium BC, the Vomeres hill was called Bomòs (, or "high ground"). By the sixteenth century the name "Vomero" was used, possibly a corruption of the Greek "Bomòs." In Roman times, the **summit portion** was called "Paturcium", from Patulcius, a name related to "Giano", the god to whom the hill was dedicated. In the early Middle Ages, via linguistic corruption, this became Patruscolo or Patruscio.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **hilltop area** and **summit portion** interchangeable (i.e., having the same meaning)?

Pair 272

P1: They are also investigating brain correlates of the tasks in children and adults by using functional magnetic resonance imaging (fMRI). In a different direction, Pascual-Leone's laboratory is studying how to energize a person's functional mental attention (not his/her maturational capacity or reserve) by using meditation methods. **His lab has previously shown that regular practice of Tai Chi increases the functional level of mental attention.** A recently completed book gives an overview of the TCO and its applications.

P2: They are also investigating brain correlates of the tasks in children and adults by using functional magnetic resonance imaging (fMRI). In a different direction, Pascual-Leone's laboratory is studying how to energize a person's functional mental attention (not his/her maturational capacity or reserve) by using meditation methods. **His lab has previously shown that regular practice of Tai Chi increases the working part of mental attention.** A recently completed book gives an overview of the TCO and its applications.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **functional level** and **working part** interchangeable (i.e., having the same meaning)?

Pair 273

P1: The final two verses serve as Qoheleth's response to this story, in which he seems to be quoting traditional wisdom sayings. Here, he seems to be holding two seemingly contradictory statements in tension with one another: wisdom is both vulnerable and powerful. **Though wisdom is ultimately of tremendous importance, one cannot expect that wisdom will be met with reward.** As is characteristic of Qoheleth's reflections throughout Ecclesiastes, realism rather than untenable optimism or pessimism is encouraged.

P2: The final two verses serve as Qoheleth's response to this story, in which he seems to be quoting traditional wisdom sayings. Here, he seems to be holding two seemingly contradictory statements in tension with one another: wisdom is both vulnerable and powerful. **Though wisdom is ultimately of overwhelming priority, one cannot expect that wisdom will be met with reward.** As is characteristic of Qoheleth's reflections throughout Ecclesiastes, realism rather than untenable optimism or pessimism is encouraged.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **tremendous importance** and **overwhelming priority** interchangeable (i.e., having the same meaning)?

Pair 274

P1: With this closure, the future of the Fort Frontenac Library became tenuous. Oversight and direction of the library initially returned to the Canadian Land Forces Command and Staff College, but in the late 1990s its supervision was again transferred to the Land Forces Doctrine and Training System. **Responsibility for the library moved again in 2003, this time to the Directorate of army doctrine.** Afghanistan War.

P2: With this closure, the future of the Fort Frontenac Library became tenuous. Oversight and direction of the library initially returned to the Canadian Land Forces Command and Staff College, but in the late 1990s its supervision was again transferred to the Land Forces Doctrine and Training System. **Responsibility for the library moved again in 2003, this time to the Directorate of armed services principles.** Afghanistan War.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **army doctrine** and **armed services principles** interchangeable (i.e., having the same meaning)?

Pair 275

P1: The Depression (and accompanying New Deal legislation) also brought about increased labor union activity in Alcoa. A strike in 1934 was forcibly ended when Hultquist deployed a large police force. A **second strike** in 1937 was broken in a similar fashion, with two striking workers shot and killed and the National Guard forced to intervene. World War II proved immensely profitable for ALCOA, as aluminum was needed for aircraft construction.

P2: The Depression (and accompanying New Deal legislation) also brought about increased labor union activity in Alcoa. A strike in 1934 was forcibly ended when Hultquist deployed a large police force. A **twin attack** in 1937 was broken in a similar fashion, with two striking workers shot and killed and the National Guard forced to intervene. World War II proved immensely profitable for ALCOA, as aluminum was needed for aircraft construction.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **second strike** and **twin attack** interchangeable (i.e., having the same meaning)?

Pair 276

P1: Data from "Galileo" suggests the latter is correct. The presence of a magnetic field on Ganymede results in more intense charged particle bombardment of its surface in the unprotected polar regions; sputtering then leads to redistribution of water molecules, with frost migrating to locally colder areas within the polar terrain. A crater named Anat provides the **reference point** for measuring longitude on Ganymede. By definition, Anat is at 128° longitude.

P2: Data from "Galileo" suggests the latter is correct. The presence of a magnetic field on Ganymede results in more intense charged particle bombardment of its surface in the unprotected polar regions; sputtering then leads to redistribution of water molecules, with frost migrating to locally colder areas within the polar terrain. A crater named Anat provides the **source for evaluation** for measuring longitude on Ganymede. By definition, Anat is at 128° longitude.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **reference point** and **source for evaluation** interchangeable (i.e., having the same meaning)?

Pair 277

P1: Testing for local adaptation requires measuring the fitness of organisms from one population in both their local environment and in foreign environments. This is often done using transplant experiments. Using the **stricter definition** of reciprocal home site advantage, local adaptation is often tested via reciprocal transplant experiments. In reciprocal transplants, organisms from one population are transplanted into another population, and vice versa, and their fitness is measured (see figure).

P2: Testing for local adaptation requires measuring the fitness of organisms from one population in both their local environment and in foreign environments. This is often done using transplant experiments. Using the **exact description** of reciprocal home site advantage, local adaptation is often tested via reciprocal transplant experiments. In reciprocal transplants, organisms from one population are transplanted into another population, and vice versa, and their fitness is measured (see figure).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **stricter definition** and **exact description** interchangeable (i.e., having the same meaning)?

Pair 278

P1: In the Middle Ages, the Catholic mass ritual included a sermon in the vernacular. Characteristics. A sermon focuses on an aspect of a **selected theme** ("thema") taken from the Gospel reading of the day. The popular sermon began with

a "thema", a lesson based on the gospel of the day.

P2: In the Middle Ages, the Catholic mass ritual included a sermon in the vernacular. Characteristics. A sermon focuses on an aspect of a preferred idea ("thema") taken from the Gospel reading of the day. The popular sermon began with a "thema", a lesson based on the gospel of the day.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are selected theme and preferred idea interchangeable (i.e., having the same meaning)?

Pair 279

P1: Stratified sampling in index investing means that managers hold sub-sets of securities sampled from distinct sub-groups, or strata, of stocks in the index. The various strata imposed on the index should be mutually exclusive, exhaustive (sum to make up the whole index), and reflective of the characteristics and performance of the entire index. Common stratification techniques include industrial sector membership (such as sector membership defined by Global Industry Classification Standard (GICS)), equity style characteristics, and country affiliation. Sampling within each strata could be based on minimum market-cap criteria, or other criteria that mimics the weighting scheme of the index.

P2: Stratified sampling in index investing means that managers hold sub-sets of securities sampled from distinct sub-groups, or strata, of stocks in the index. The various strata imposed on the index should be mutually exclusive, exhaustive (sum to make up the whole index), and reflective of the characteristics and performance of the entire index. Common stratification techniques include industrial sector membership (such as sector membership defined by Global Industry Classification Standard (GICS)), equity style characteristics, and nation association. Sampling within each strata could be based on minimum market-cap criteria, or other criteria that mimics the weighting scheme of the index.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are country affiliation and nation association interchangeable (i.e., having the same meaning)?

Pair 280

P1: Later, at the end of the book, the Flock regrouped. "Angel" correctly predicts that Fang will be the first to die in ', but Max revives him by injecting his heart with adrenaline. He leaves in the second epilogue because he thinks he is endangering the Flock by distracting Max from her role as the leader. He lets her know numerous times in a letter that he loves her more than anything, and leaves Max a promise ring.

P2: Later, at the end of the book, the Flock regrouped. "Angel" correctly predicts that Fang will be the first to die in ', but Max revives him by injecting his heart with adrenaline. He leaves in the secondary ending because he thinks he is endangering the Flock by distracting Max from her role as the leader. He lets her know numerous times in a letter that he loves her more than anything, and leaves Max a promise ring.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are second epilogue and secondary ending interchangeable (i.e., having the same meaning)?

Pair 281

P1: Social decision schemes are the methods used by a group to combine individual responses to come up with a single group decision. There are a number of these schemes, but the following are the most common: There are strengths and weaknesses to each of these social decision schemes. Delegation saves time and is a good method for less important decisions, but ignored members might react negatively. Averaging responses will cancel out extreme opinions, but the final decision might disappoint many members.

P2: Social decision schemes are the methods used by a group to combine individual responses to come up with a single group decision. There are a number of these schemes, but the following are the most common: There are strengths

and weaknesses to each of these social decision schemes. Delegation saves time and is a **satisfactory process** for less important decisions, but ignored members might react negatively. Averaging responses will cancel out extreme opinions, but the final decision might disappoint many members.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **good method** and **satisfactory process** interchangeable (i.e., having the same meaning)?

Pair 282

P1: At the end of his life, al-Shahrastānī went back to live in his native town, where he died in the year 1153. Works. Al-Shahrastani distinguished himself by his desire to describe in the most **objective way** the universal religious history of humanity. This is reflected in his "Kitab al-Milal wa al-Nihal" (The Book of Sects and Creeds), a monumental work, which presents the doctrinal points of view of all the religions and philosophies which existed up to his time.

P2: At the end of his life, al-Shahrastānī went back to live in his native town, where he died in the year 1153. Works. Al-Shahrastani distinguished himself by his desire to describe in the most **impartial manner** the universal religious history of humanity. This is reflected in his "Kitab al-Milal wa al-Nihal" (The Book of Sects and Creeds), a monumental work, which presents the doctrinal points of view of all the religions and philosophies which existed up to his time.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **objective way** and **impartial manner** interchangeable (i.e., having the same meaning)?

Pair 283

P1: In 1997 he popped his head out into the public and began becoming more active on IRC and many smaller hacking forums. He saw some insanely brilliant people who seemed to have the same mindset and positive attitude towards hacking that he did, so he decided to approach a couple of them to see if they'd be interested. There was always a **huge emphasis** not only on technical competence and variety, but also on strength of character and integrity. DDP members are good programmers and hackers, but more importantly, they're good people.

P2: In 1997 he popped his head out into the public and began becoming more active on IRC and many smaller hacking forums. He saw some insanely brilliant people who seemed to have the same mindset and positive attitude towards hacking that he did, so he decided to approach a couple of them to see if they'd be interested. There was always a **major insistence** not only on technical competence and variety, but also on strength of character and integrity. DDP members are good programmers and hackers, but more importantly, they're good people.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **huge emphasis** and **major insistence** interchangeable (i.e., having the same meaning)?

Pair 284

P1: and to expand their operations into other social concerns that affected young people. Current operations. During the 1990s the Horsham District Council area faced a problem in meeting **government targets** for providing accommodation for young people. YMCA at Guildford, a town about twenty-five miles from Horsham, provided an example of where YMCA had effectively worked with a local authority.

P2: and to expand their operations into other social concerns that affected young people. Current operations. During the 1990s the Horsham District Council area faced a problem in meeting **administration objectives** for providing accommodation for young people. YMCA at Guildford, a town about twenty-five miles from Horsham, provided an example of where YMCA had effectively worked with a local authority.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **government targets** and **administration objectives** interchangeable (i.e., having the same meaning)?

Pair 285

P1: A wheelchair ramp can be permanent, semi-permanent or portable. Permanent ramps are designed to be bolted or otherwise attached in place. **Semi-permanent ramps rest on top of the ground or concrete pad and are commonly used for the short term.** Permanent and semi-permanent ramps are usually of aluminum, concrete or wood.

P2: A wheelchair ramp can be permanent, semi-permanent or portable. Permanent ramps are designed to be bolted or otherwise attached in place. **Semi-permanent ramps rest on top of the ground or concrete pad and are commonly used for the brief duration.** Permanent and semi-permanent ramps are usually of aluminum, concrete or wood.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **short term** and **brief duration** interchangeable (i.e., having the same meaning)?

Pair 286

P1: He has the ability to increase his size and mass to a gigantic size by psionically drawing extra mass from an extra-dimensional source while gaining superhuman strength in proportion to his height. The extra mass returns to the extra-dimensional source as he decreases in size. **The process of changing height is fatiguing, making Foster more vulnerable to harm, after successive changes.** Foster was able to routinely grow to in height, and could lift approximately ten tons at that height.

P2: He has the ability to increase his size and mass to a gigantic size by psionically drawing extra mass from an extra-dimensional source while gaining superhuman strength in proportion to his height. The extra mass returns to the extra-dimensional source as he decreases in size. **The process of altering length is fatiguing, making Foster more vulnerable to harm, after successive changes.** Foster was able to routinely grow to in height, and could lift approximately ten tons at that height.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **changing height** and **altering length** interchangeable (i.e., having the same meaning)?

Pair 287

P1: The 1982 Embassy World Indoor Bowls Championship was held at the Coatbridge indoor bowling club, North Lanarkshire, Scotland, from 9–14 February 1982. **
 Sudden death was introduced with 16 competitors (4 from a qualifying tournament), it replaced the group format.** The winners prize was £4,000, a record for bowls.

P2: The 1982 Embassy World Indoor Bowls Championship was held at the Coatbridge indoor bowling club, North Lanarkshire, Scotland, from 9–14 February 1982. **
 Sudden death was introduced with 16 competitors (4 from a qualifying tournament), it replaced the troop arrangement.** The winners prize was £4,000, a record for bowls.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **group format** and **troop arrangement** interchangeable (i.e., having the same meaning)?

Pair 288

P1: A BBOC transaction is also supplied to provide a set of control commands to do things such as manually start the TRUE (if not in PLTPI), stop the TRUE, start and stop the Link Server, as well as other control and management

functions. The OLA programming interface module library data set must be concatenated to the CICS region's DFHRPL DD statement. The **following picture** summarizes the WOLA CICS support for transaction propagation and security assertion: Overview of IMS support. The Optimized Local Adapters are implemented as an external subsystem to IMS.

P2: A BBOC transaction is also supplied to provide a set of control commands to do things such as manually start the TRUE (if not in PLTPI), stop the TRUE, start and stop the Link Server, as well as other control and management functions. The OLA programming interface module library data set must be concatenated to the CICS region's DFHRPL DD statement. The **next image** summarizes the WOLA CICS support for transaction propagation and security assertion: Overview of IMS support. The Optimized Local Adapters are implemented as an external subsystem to IMS.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **following picture** and **next image** interchangeable (i.e., having the same meaning)?

Pair 289

P1: The longarm sewing machine frame typically ranges from 10 feet (about 3 metres) to 14 feet (about 4.25 metres) in length. A complete longarming system typically consists of an industrial length sewing machine head (19 - 30 inches,) a 10 to 14-foot frame, a table with a layer of plastic under which is placed a pantograph, and several rollers on which the fabric layers and batting are attached. **Quilting using a longarm machine can take significantly less time than hand quilting or more traditional machine quilting.** This time saving is a large factor in the gain in popularity of longarm quilting.

P2: The longarm sewing machine frame typically ranges from 10 feet (about 3 metres) to 14 feet (about 4.25 metres) in length. A complete longarming system typically consists of an industrial length sewing machine head (19 - 30 inches,) a 10 to 14-foot frame, a table with a layer of plastic under which is placed a pantograph, and several rollers on which the fabric layers and batting are attached. **Quilting using a longarm machine can take substantially less effort than hand quilting or more traditional machine quilting.** This time saving is a large factor in the gain in popularity of longarm quilting.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **significantly less time** and **substantially less effort** interchangeable (i.e., having the same meaning)?

Pair 290

P1: Brazil's Aeronautical Accidents Investigation and Prevention Center (CENIPA) investigated the crash, and issued its final report on July 30, 2010. CENIPA concluded that the twin engine turboprop aircraft took off overweight, and its left engine failed while en route. **Unable to maintain level flight on a single engine in its overweight condition, the aircraft crashed while attempting to execute an emergency landing.** According to CENIPA, the aircraft departed Coari weighing 549.7 kg above its maximum certificated takeoff weight, with 28 persons on board, including two crew and 26 passengers, while the aircraft was certificated for a maximum of two crew and 19 passengers.

P2: Brazil's Aeronautical Accidents Investigation and Prevention Center (CENIPA) investigated the crash, and issued its final report on July 30, 2010. CENIPA concluded that the twin engine turboprop aircraft took off overweight, and its left engine failed while en route. **Unable to maintain level flight on a single engine in its over the limit state, the aircraft crashed while attempting to execute an emergency landing.** According to CENIPA, the aircraft departed Coari weighing 549.7 kg above its maximum certificated takeoff weight, with 28 persons on board, including two crew and 26 passengers, while the aircraft was certificated for a maximum of two crew and 19 passengers.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **overweight condition** and **over the limit state** interchangeable (i.e., having the same meaning)?

Pair 291

P1: In her sadness, she retreats to the mountains and turns to stone. It is thought this event became the basis for the village name. In fact, there is a large rock in Little Tujunga Canyon which looks like an old woman in a sitting position. However, there was also a Fernandeno village in the vicinity of Big Tujunga Canyon called "Muxunga", which means "place of shooting" in the Fernandeno dialect of the Tongva language.

P2: In her sadness, she retreats to the mountains and turns to stone. It is thought this event became the basis for the village name. In fact, there is a large rock in Little Tujunga Canyon which looks like an old woman in a resting posture. However, there was also a Fernandeno village in the vicinity of Big Tujunga Canyon called "Muxunga", which means "place of shooting" in the Fernandeno dialect of the Tongva language.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are sitting position and resting posture interchangeable (i.e., having the same meaning)?

Pair 292

P1: As an adult, Orestes returns to Mycenae/Argos to avenge the murder of Agamemnon. With the assistance of his friend Pylades, Orestes kills his mother Clytemnestra and her lover Aegisthus. While Pylades seems to be a very minor character, he is arguably the most vital piece of Orestes' plan to avenge his father. In "The Libation Bearers," the second play of Aeschylus' trilogy "The Oresteia", Pylades speaks only once.

P2: As an adult, Orestes returns to Mycenae/Argos to avenge the murder of Agamemnon. With the assistance of his friend Pylades, Orestes kills his mother Clytemnestra and her lover Aegisthus. While Pylades seems to be a very minor character, he is arguably the most critical item of Orestes' plan to avenge his father. In "The Libation Bearers," the second play of Aeschylus' trilogy "The Oresteia", Pylades speaks only once.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are vital piece and critical item interchangeable (i.e., having the same meaning)?

Pair 293

P1: For amateur games, there are various guidances with little standardization. Fairbairn reports a practice in the 1980s (considered a rule by the now defunct Shogi Association for The West) where the dispute is resolved by either player moving all friendly pieces into the promotion zone and then the game ends with points tallied. another resolution is the 27-Point (27) rule used for some amateur tournaments. One version of this is simply the player who has 27 or more points is the winner of the Impasse.

P2: For amateur games, there are various guidances with little standardization. Fairbairn reports a practice in the 1980s (considered a rule by the now defunct Shogi Association for The West) where the dispute is resolved by either player moving all friendly pieces into the promotion zone and then the game ends with points tallied. a further recommendation is the 27-Point (27) rule used for some amateur tournaments. One version of this is simply the player who has 27 or more points is the winner of the Impasse.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are another resolution and a further recommendation interchangeable (i.e., having the same meaning)?

Pair 294

P1: Nitrocellulose or "guncotton" is formed by the action of nitric acid on cellulose fibers. It is a highly combustible fibrous material that deflagrates rapidly when heat is applied. It also burns very cleanly, burning almost entirely to gaseous components at high temperatures with little smoke or solid residue. "Gelatinised" nitrocellulose is a plastic, which can be formed into cylinders, tubes, balls, or flakes known as "single-base" propellants.

P2: Nitrocellulose or "guncotton" is formed by the action of nitric acid on cellulose fibers. It is a highly combustible fibrous material that deflagrates rapidly when heat is applied. It also burns very cleanly, burning almost entirely to

gaseous components at high temperatures with minimal fumes or solid residue. "Gelatinised" nitrocellulose is a plastic, which can be formed into cylinders, tubes, balls, or flakes known as "single-base" propellants.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are little smoke and minimal fumes interchangeable (i.e., having the same meaning)?

Pair 295

P1: Cyproterone acetate has the strongest evidence for reducing sexual arousal, while findings on medroxyprogesterone acetate have been mixed. Gonadotropin-releasing hormone analogues such as leuprorelin (Lupron), which last longer and have fewer side-effects, are also used to reduce libido, as are selective serotonin reuptake inhibitors. The evidence for these alternatives is more limited and mostly based on open trials and case studies. All of these treatments, commonly referred to as "chemical castration", are often used in conjunction with cognitive behavioral therapy.

P2: Cyproterone acetate has the strongest evidence for reducing sexual arousal, while findings on medroxyprogesterone acetate have been mixed. Gonadotropin-releasing hormone analogues such as leuprorelin (Lupron), which last longer and have fewer side-effects, are also used to reduce libido, as are selective serotonin reuptake inhibitors. The evidence for these alternatives is more limited and mostly based on experimental tests and case studies. All of these treatments, commonly referred to as "chemical castration", are often used in conjunction with cognitive behavioral therapy.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are open trials and experimental tests interchangeable (i.e., having the same meaning)?

Pair 296

P1: The only escape route was the rear stairs which were poorly signposted and cluttered with crates of bottles. The club has been described as a deathtrap. Patrons had difficulty escaping due to the large quantities of grease that covered the escape path and six-foot high fence which blocked the side alley. The persistent rumors that the escape was deliberately greased by the arsonist(s) are untrue.

P2: The only escape route was the rear stairs which were poorly signposted and cluttered with crates of bottles. The club has been described as a deathtrap. Patrons had difficulty escaping due to the large quantities of grease that covered the getaway route and six-foot high fence which blocked the side alley. The persistent rumors that the escape was deliberately greased by the arsonist(s) are untrue.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are escape path and getaway route interchangeable (i.e., having the same meaning)?

Pair 297

P1: The cylinder rotates during the process to help homogenize the pressure that is placed on the grapes. Continuous screw. A continuous screw press differs from the above presses in that it does not process a single batch of grapes at a time. Instead it uses an Archimedes' screw to continuously force grapes up against the wall of the device.

P2: The cylinder rotates during the process to help homogenize the pressure that is placed on the grapes. Continuous screw. A continuous screw press differs from the above presses in that it does not process a singular cluster of grapes at a time. Instead it uses an Archimedes' screw to continuously force grapes up against the wall of the device.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are single batch and singular cluster interchangeable (i.e., having the same meaning)?

Pair 298

P1: In the wild, cats naturally excrete in soft or sandy soil for easy burial. They use their paws in a backward sweeping motion to cover their feces. **To stimulate this instinctive desire, a litter box's bottom is typically filled with or less of cat litter.** Litter box filler is a loose, granular material that absorbs moisture and odors such as ammonia.

P2: In the wild, cats naturally excrete in soft or sandy soil for easy burial. They use their paws in a backward sweeping motion to cover their feces. **To stimulate this inherent appetite, a litter box's bottom is typically filled with or less of cat litter.** Litter box filler is a loose, granular material that absorbs moisture and odors such as ammonia.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **instinctive desire** and **inherent appetite** interchangeable (i.e., having the same meaning)?

Pair 299

P1: The structure is three-storey with basement and attic. The east elevation is symmetrical, while the north (entrance), south, and west are asymmetrical. **A heraldic panel is located between the second and third windows of the north elevation, as is a decorative ironwork finial and a weather-cock finial.** There is a baronial tower house, an angled tower to the northwest, a four-storey basement, and an attic tower to the north.

P2: The structure is three-storey with basement and attic. The east elevation is symmetrical, while the north (entrance), south, and west are asymmetrical. **A heraldic panel is located between the secondary and tertiary aperture of the north elevation, as is a decorative ironwork finial and a weather-cock finial.** There is a baronial tower house, an angled tower to the northwest, a four-storey basement, and an attic tower to the north.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **second and third windows** and **secondary and tertiary aperture** interchangeable (i.e., having the same meaning)?

Pair 300

P1: Alignment. The two telescopes in binoculars are aligned in parallel (collimated), to produce a single circular, apparently three-dimensional, image. **Misalignment will cause the binoculars to produce a double image.** Even slight misalignment will cause vague discomfort and visual fatigue as the brain tries to combine the skewed images.

P2: Alignment. The two telescopes in binoculars are aligned in parallel (collimated), to produce a single circular, apparently three-dimensional, image. **Misalignment will cause the binoculars to produce a twin representation.** Even slight misalignment will cause vague discomfort and visual fatigue as the brain tries to combine the skewed images.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **double image** and **twin representation** interchangeable (i.e., having the same meaning)?

Pair 301

P1: In 1940, when she was 17, Levertov published her first poem. During the Blitz, Levertov served in London as a civilian nurse. **Her first book, "The double image", was published six years later.** In 1947, she met and married American writer Mitchell Goodman and moved with him to the United States the following year.

P2: In 1940, when she was 17, Levertov published her first poem. During the Blitz, Levertov served in London as a civilian nurse. **Her first book, "The dual appearance", was published six years later.** In 1947, she met and married American writer Mitchell Goodman and moved with him to the United States the following year.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **double image** and **dual appearance** interchangeable (i.e., having the same meaning)?

Pair 302

P1: His early musical tastes included various rock acts such as Bob Seger, Foreigner, Montrose, Styx, Deep Purple, Black Sabbath, Queen, Ten Years After, Status Quo, Uriah Heep, UFO, the Scorpions, Aerosmith, Ted Nugent, and the MC5, "any kind of fist-pumping, 'flick-your-bic' rock. I was into anything that was loud". He became a freely opinionated and passionate fan of **heavy rock** and protopunk, and took a job working at local record store Rubicon Records. Black Flag.

P2: His early musical tastes included various rock acts such as Bob Seger, Foreigner, Montrose, Styx, Deep Purple, Black Sabbath, Queen, Ten Years After, Status Quo, Uriah Heep, UFO, the Scorpions, Aerosmith, Ted Nugent, and the MC5, "any kind of fist-pumping, 'flick-your-bic' rock. I was into anything that was loud". He became a freely opinionated and passionate fan of **hard rock and roll** and protopunk, and took a job working at local record store Rubicon Records. Black Flag.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **heavy rock** and **hard rock and roll** interchangeable (i.e., having the same meaning)?

Pair 303

P1: The concept behind party-directed mediation, depending upon the degree to which a case lends itself, is that if and when parties wish to spend the time to acquire the skills necessary to become more effective negotiators, then they can be empowered to achieve a self-directed resolution. The concept is most effective for disputants who wish to have a greater hand in resolving their own conflicts. Party-directed mediation is of **special value** where individuals or stakeholders will continue to have ongoing interactions, as well as for conflicts with significant interpersonal aspects. As people become more talented negotiators, through adoption of enhanced negotiation skills, they tend to deal more effectively with conflict.

P2: The concept behind party-directed mediation, depending upon the degree to which a case lends itself, is that if and when parties wish to spend the time to acquire the skills necessary to become more effective negotiators, then they can be empowered to achieve a self-directed resolution. The concept is most effective for disputants who wish to have a greater hand in resolving their own conflicts. Party-directed mediation is of **unique use** where individuals or stakeholders will continue to have ongoing interactions, as well as for conflicts with significant interpersonal aspects. As people become more talented negotiators, through adoption of enhanced negotiation skills, they tend to deal more effectively with conflict.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **special value** and **unique use** interchangeable (i.e., having the same meaning)?

Pair 304

P1: The Chicago system has been criticized for its tediousness and inconvenience, as blue bags cost more to the homeowner than grocery bags and this system of recycling, compared to ones implemented in other cities and suburbs, requires additional effort. Chicago Sanitation management has claimed Chicago's Blue Bag system diverts approximately 25% of its waste to recycling facilities, which was its initial goal. However, most independent studies place the estimates at approximately 9% of the garbage picked up, resulting in **continued criticism** towards the program. On May 2, 2008, the Chicago SunTimes reported that Chicago is giving up on the program.

P2: The Chicago system has been criticized for its tediousness and inconvenience, as blue bags cost more to the homeowner than grocery bags and this system of recycling, compared to ones implemented in other cities and suburbs, requires additional effort. Chicago Sanitation management has claimed Chicago's Blue Bag system diverts approximately 25% of its waste to recycling facilities, which was its initial goal. However, most independent studies place the estimates at approximately 9% of the garbage picked up, resulting in **unceasing objection** towards the program. On May 2, 2008, the Chicago SunTimes reported that Chicago is giving up on the program.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **continued criticism** and **unceasing objection** interchangeable (i.e., having the same meaning)?

Pair 305

P1: Barba self-released the song "Santa" on December 7, 2015, with a music video uploaded to her YouTube account on December 19, 2016. Along with pursuing her music career, Barba appeared in various short films, and had a small part in the 2017 film "All About the Money". 2018–present: **continued work and arrests**. In February 2018, Barba posted on her Twitter account that she was producing an R. Kelly song; the tweet included an image of her playing the violin while accompanied by a keyboardist and a bass violin player.

P2: Barba self-released the song "Santa" on December 7, 2015, with a music video uploaded to her YouTube account on December 19, 2016. Along with pursuing her music career, Barba appeared in various short films, and had a small part in the 2017 film "All About the Money". 2018–present: **steady grind and arrests**. In February 2018, Barba posted on her Twitter account that she was producing an R. Kelly song; the tweet included an image of her playing the violin while accompanied by a keyboardist and a bass violin player.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **continued work** and **steady grind** interchangeable (i.e., having the same meaning)?

Pair 306

P1: Philosophy. Integral humanism was a set of concepts drafted by Upadhyaya as political program and adopted in 1965 as the official doctrine of the Jan Sangh. Upadhyaya considered that it was of utmost importance for India to develop an indigenous economic model with a human being at **center stage**. This approach made this concept different from Socialism and Capitalism.

P2: Philosophy. Integral humanism was a set of concepts drafted by Upadhyaya as political program and adopted in 1965 as the official doctrine of the Jan Sangh. Upadhyaya considered that it was of utmost importance for India to develop an indigenous economic model with a human being at **middle of importance**. This approach made this concept different from Socialism and Capitalism.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **center stage** and **middle of importance** interchangeable (i.e., having the same meaning)?

Pair 307

P1: China's principal crops are rice, corn, wheat, soybeans, and cotton in addition to apples and other fruits and vegetables. China's principal livestock products include pork, beef, dairy, and eggs. The Chinese government oversees agricultural production as well as the manufacture of food packaging, containers, chemical additives, drug production, and **business regulation**. In recent years, the Chinese government attempted to consolidate food safety regulation with the creation of the State Food and Drug Administration of China in 2003; officials have also been under increasing public and international pressure to solve food safety problems.

P2: China's principal crops are rice, corn, wheat, soybeans, and cotton in addition to apples and other fruits and vegetables. China's principal livestock products include pork, beef, dairy, and eggs. The Chinese government oversees agricultural production as well as the manufacture of food packaging, containers, chemical additives, drug production, and **corporate supervision**. Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **business regulation** and **corporate supervision** interchangeable (i.e., having the same meaning)?

Pair 308

P1: The roof deck includes a sun and viewing deck, as well as a garden terrace. The solar panels can be used for sun or rain protection while on the roof terrace. **All floors are accessible from the spiral staircase reducing surface loss through hallways and corridors.** Further potential.

P2: The roof deck includes a sun and viewing deck, as well as a garden terrace. The solar panels can be used for sun or rain protection while on the roof terrace. **All floors are accessible from the spiral staircase reducing waste of space through hallways and corridors.** Further potential.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **surface loss** and **waste of space** interchangeable (i.e., having the same meaning)?

Pair 309

P1: These dolls may be strung with elastic or assembled with hinges in their ball joints. Opinion in the BJD community is divided over what does and does not constitute a BJD, with some believing a BJD must be made of resin and strung, while others take the view that any doll with ball and socket joints can fit under the BJD label. **There are currently no industry standards or manufacturing guidelines governing what is or is not, in fact, a BJD.** There are also BJDs made by European artists, usually referred to as Artist BJDs.

P2: These dolls may be strung with elastic or assembled with hinges in their ball joints. Opinion in the BJD community is divided over what does and does not constitute a BJD, with some believing a BJD must be made of resin and strung, while others take the view that any doll with ball and socket joints can fit under the BJD label. **There are currently no production regulations or manufacturing guidelines governing what is or is not, in fact, a BJD.** There are also BJDs made by European artists, usually referred to as Artist BJDs.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **industry standards** and **production regulations** interchangeable (i.e., having the same meaning)?

Pair 310

P1: Nobody is ever able to flush all the pain from his body." According to this source, there were patients who stayed in therapy for as long as two years. **The only independent account on primal therapy studied 32 patients who entered therapy at The Primal Institute in 1975 and 1976.** The study concluded, "The main result is that about 40% of the primal patients achieve a satisfactory result within 15 to 25 months."

P2: Nobody is ever able to flush all the pain from his body." According to this source, there were patients who stayed in therapy for as long as two years. **The only autonomous recollection on primal therapy studied 32 patients who entered therapy at The Primal Institute in 1975 and 1976.** The study concluded, "The main result is that about 40% of the primal patients achieve a satisfactory result within 15 to 25 months."

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **independent account** and **autonomous recollection** interchangeable (i.e., having the same meaning)?

Pair 311

P1: The Hollywood Chamber of Commerce credits E.M. Stuart, its volunteer president in 1953, with the original idea for creating a Walk of Fame. Stuart reportedly proposed the Walk as a means to "maintain the glory of a community whose name means glamour and excitement in the four corners of the world". Harry Sugarman, another Chamber member and president of the Hollywood Improvement Association, received credit in an **independent account**. A committee was formed to flesh out the idea, and an architectural firm was retained to develop specific proposals.

P2: The Hollywood Chamber of Commerce credits E.M. Stuart, its volunteer president in 1953, with the original idea for creating a Walk of Fame. Stuart reportedly proposed the Walk as a means to "maintain the glory of a community whose name means glamour and excitement in the four corners of the world". Harry Sugarman, another Chamber member and president of the Hollywood Improvement Association, received credit in an **individualistic report**. A committee was formed to flesh out the idea, and an architectural firm was retained to develop specific proposals.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **independent account** and **individualistic report** interchangeable (i.e., having the same meaning)?

Pair 312

P1: This tribe had a high reputation for courage. Geography. The Aqrabi inhabited the coast-line from Bir Ahmad to Ras Amran; inland their territory extended to an **undefined point** between Bir Ahmed and Wahat. Their only town, or rather village, was that of Bir Ahmad.

P2: This tribe had a high reputation for courage. Geography. The Aqrabi inhabited the coast-line from Bir Ahmad to Ras Amran; inland their territory extended to an **ambiguous place** between Bir Ahmed and Wahat. Their only town, or rather village, was that of Bir Ahmad.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **undefined point** and **ambiguous place** interchangeable (i.e., having the same meaning)?

Pair 313

P1: The Unmarked, those who refuse to Pledge, live as vagrants or as dependents of those who are Marked. Logan Langly, the novel's protagonist, is nearly thirteen, the age when most young people go to be Marked. Unlike most young people, Logan is afraid of the **marking process**. His older sister Lily never returned from her Pledge, and Logan fears that if he Pledges, he might die himself.

P2: The Unmarked, those who refuse to Pledge, live as vagrants or as dependents of those who are Marked. Logan Langly, the novel's protagonist, is nearly thirteen, the age when most young people go to be Marked. Unlike most young people, Logan is afraid of the **branding procedure**. His older sister Lily never returned from her Pledge, and Logan fears that if he Pledges, he might die himself.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **marking process** and **branding procedure** interchangeable (i.e., having the same meaning)?

Pair 314

P1: Doti which was east of Kumaun had been practically stripped out of troops. Governor Bam Shah had full responsibility of defense of the province. British force numbering initially over 4500 men was easily able to out maneuver Nepalese Army defenders and had to abandon **one post** after another. Despite significant victory over Captain Hearsey's force which had been sent in flanking movement through Eastern Kumaun and the capture of captain himself, Bam Shah's Nepalese force couldn't stem the tide of British advance.

P2: Doti which was east of Kumaun had been practically stripped out of troops. Governor Bam Shah had full responsibility of defense of the province. British force numbering initially over 4500 men was easily able to out maneuver Nepalese Army defenders and had to abandon a location after another. Despite significant victory over Captain Hearsey's force which had been sent in flanking movement through Eastern Kumaun and the capture of captain himself, Bam Shah's Nepalese force couldn't stem the tide of British advance.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one post** and **a location** interchangeable (i.e., having the same meaning)?

Pair 315

P1: Object-oriented systems model a problem as a set of interacting objects that enact operations referred to by name. Polymorphism is the phenomenon wherein somewhat interchangeable objects each expose an operation of the same name but possibly differing in behavior. As an example, a object and a object both have a method that can be used to write a **personnel record** to storage. Their implementations differ.

P2: Object-oriented systems model a problem as a set of interacting objects that enact operations referred to by name. Polymorphism is the phenomenon wherein somewhat interchangeable objects each expose an operation of the same name but possibly differing in behavior. As an example, a object and a object both have a method that can be used to write a **workforce recording** to storage. Their implementations differ.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **personnel record** and **workforce recording** interchangeable (i.e., having the same meaning)?

Pair 316

P1: If night market is made permanent, they can find a way to earn more money. Liabilities. There is a concern about **safety problem** of the food in the night market. As the hawkers are unlicensed, there is a potential risk that the food might contain bacteria which are harmful to the safety of customers.

P2: If night market is made permanent, they can find a way to earn more money. Liabilities. There is a concern about **assurance difficulty** of the food in the night market. As the hawkers are unlicensed, there is a potential risk that the food might contain bacteria which are harmful to the safety of customers.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **safety problem** and **assurance difficulty** interchangeable (i.e., having the same meaning)?

Pair 317

P1: After the Restoration of the Independence, the Kingdom of Portugal concentrated all its effort in consolidating the newly recovered power, looking not to start unnecessary conflicts and Brazilian municipalities maintained their autonomy until the last years of the seventeenth century. The first in Brazil was appointed in 1696 in Salvador, beginning a transition phase that would last for over a hundred years. The office was abolished after the establishment of the Constitutional Monarchy and the **resulting separation** of the executive and judicial powers. The judicial functions of the former were assumed by (judges of law), who do not have any political or administrative functions.

P2: After the Restoration of the Independence, the Kingdom of Portugal concentrated all its effort in consolidating the newly recovered power, looking not to start unnecessary conflicts and Brazilian municipalities maintained their autonomy until the last years of the seventeenth century. The first in Brazil was appointed in 1696 in Salvador, beginning a transition phase that would last for over a hundred years. The office was abolished after the establishment of the Constitutional Monarchy and the **consequent dissolution** of the executive and judicial powers. The judicial functions of the former were assumed by (judges of law), who do not have any political or administrative functions.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **resulting separation** and **consequent dissolution** interchangeable (i.e., having the same meaning)?

Pair 318

P1: A second home is viewed and priced according to lender, some will assess the same risk factor as a primary residence while others will factor in a 0.125% to 0.5% pricing increase to mitigate the perceived risk. Lenders perceive that the borrower is less likely to value the second home if the borrower was faced with financial difficulties. **A non-owner occupied property is viewed and priced as the highest risk factor of property use.** Lenders will factor in a 0.5% to 2.5% pricing increase to mitigate the perceived risk.

P2: A second home is viewed and priced according to lender, some will assess the same risk factor as a primary residence while others will factor in a 0.125% to 0.5% pricing increase to mitigate the perceived risk. Lenders perceive that the borrower is less likely to value the second home if the borrower was faced with financial difficulties. **A non-owner occupied property is viewed and priced as the highest risk factor of estate value.** Lenders will factor in a 0.5% to 2.5% pricing increase to mitigate the perceived risk.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **property use** and **estate value** interchangeable (i.e., having the same meaning)?

Pair 319

P1: Virginia and Wesley talk about how she wants freedom from the prison her father's created for her, then the two kiss. Virginia initially stops, believing Angel's curse is an obstacle, but Wesley claims it is more of a 'recommendation' than anything else — and the two have sex. **Meanwhile, at a quiet cabin, Angel talks with the normal-looking Swami about his choice of clothing, style of car, and brand of hair gel.** The Swami advises Angel to find a blond woman and break her heart, so he will feel better about his situation with Darla.

P2: Virginia and Wesley talk about how she wants freedom from the prison her father's created for her, then the two kiss. Virginia initially stops, believing Angel's curse is an obstacle, but Wesley claims it is more of a 'recommendation' than anything else — and the two have sex. **Meanwhile, at a quiet cabin, Angel talks with the normal-looking Swami about his choice of clothing, style of car, and brand of styling products.** The Swami advises Angel to find a blond woman and break her heart, so he will feel better about his situation with Darla.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **hair gel** and **styling products** interchangeable (i.e., having the same meaning)?

Pair 320

P1: The major stumbling block to a parliamentary majority was the new Left Party, led by Gregor Gysi and former SPD chairman Oskar Lafontaine, which won 8.7% of votes and 54 seats. **The CDU/CSU and SPD both rejected cooperation with the Left Party. Both Schröder and Merkel claimed victory, but the formation of a new government required careful negotiations, as no conventional arrangement could achieve a majority.** The CDU/CSU sought talks with the Greens, but were unable to find common ground.

P2: The major stumbling block to a parliamentary majority was the new Left Party, led by Gregor Gysi and former SPD chairman Oskar Lafontaine, which won 8.7% of votes and 54 seats. **The CDU/CSU and SPD both rejected cooperation with the Left Party. Both Schröder and Merkel claimed victory, but the formation of a new government required careful negotiations, as no traditional system could achieve a majority.** The CDU/CSU sought talks with the Greens, but were unable to find common ground.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **conventional arrangement** and **traditional system** interchangeable (i.e., having the same meaning)?

Pair 321

P1: It was powered by a 30 hp (22 kW) Star engine driving a 6 ft 8 in (2 m) Clarke propeller. Trials of this arrangement were not satisfactory and, during 1911, the aircraft was extensively modified. **The lower fin and moving surface was removed and the remaining surfaces' controls altered to produce the conventional arrangement of rudder and elevators.** The wings were reduced in span by 5 ft (1.5 m) and the tailwheel was replaced by a skid.

P2: It was powered by a 30 hp (22 kW) Star engine driving a 6 ft 8 in (2 m) Clarke propeller. Trials of this arrangement were not satisfactory and, during 1911, the aircraft was extensively modified. **The lower fin and moving surface was removed and the remaining surfaces' controls altered to produce the current system of rudder and elevators.** The wings were reduced in span by 5 ft (1.5 m) and the tailwheel was replaced by a skid.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **conventional arrangement** and **current system** interchangeable (i.e., having the same meaning)?

Pair 322

P1: In late 2015 the University began a \$12 million dollar renovation of the space, now designated as the "Nuclear Engineering Laboratory" Ford Nuclear Reactor Facts (1997). Typical operating cycle. **A typical full-power cycle consisted of 10 days at 2 MW followed by 4 days of shutdown maintenance, for a weekly average of 120 full-power hours.** At this rate, 16 new fuel elements were required each year.

P2: In late 2015 the University began a \$12 million dollar renovation of the space, now designated as the "Nuclear Engineering Laboratory" Ford Nuclear Reactor Facts (1997). Typical operating cycle. **A typical full-power cycle consisted of 10 days at 2 MW followed by 4 days of shutdown maintenance, for a week-long median of 120 full-power hours.** At this rate, 16 new fuel elements were required each year.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **weekly average** and **week-long median** interchangeable (i.e., having the same meaning)?

Pair 323

P1: The people of Mechelen rejoiced to have again a cardinal, and he was very loved by them. During the episcopate of Cardinal d'Alcase he constructed several important buildings: he had the episcopal palace rebuilt and a new diocesan seminary constructed in Mechelen. **In 1747 he pleaded with King Louis XV who entered Brussels to have mercy on the poor inhabitants of Brussels.** The king requested a Te Deum in honour of the victory, but the Cardinal replied: "Only the blood of Christ flows on the altar!"

P2: The people of Mechelen rejoiced to have again a cardinal, and he was very loved by them. During the episcopate of Cardinal d'Alcase he constructed several important buildings: he had the episcopal palace rebuilt and a new diocesan seminary constructed in Mechelen. **In 1747 he pleaded with King Louis XV who entered Brussels to have mercy on the unfortunate constituents of Brussels.** The king requested a Te Deum in honour of the victory, but the Cardinal replied: "Only the blood of Christ flows on the altar!"

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **poor inhabitants** and **unfortunate constituents** interchangeable (i.e., having the same meaning)?

Pair 324

P1: According to her claims, "Gospa" left her "a gift" that she could see her on her birthday. As Međugorje became more and more popular, Soldo later said that as of 2 August 1987, the apparition would appear every 2nd day of every month. As of 2 January 1997, Soldo knew the **exact hour** of the apparition (10 to 11 AM). She claims that the apparition told her ten secrets, which are intended "for humanity in general, for the world, then for Međugorje, Yugoslavia, and some other areas".

P2: According to her claims, "Gospa" left her "a gift" that she could see her on her birthday. As Međugorje became more and more popular, Soldo later said that as of 2 August 1987, the apparition would appear every 2nd day of every month. As of 2 January 1997, Soldo knew the **explicit minute** of the apparition (10 to 11 AM). She claims that the apparition told her ten secrets, which are intended "for humanity in general, for the world, then for Međugorje, Yugoslavia, and some other areas".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **exact hour** and **explicit minute** interchangeable (i.e., having the same meaning)?

Pair 325

P1: The Battle of Abu-Ageila (also known as the Battle of Umm-Qatef;) was a military confrontation between the Israel Defense Forces and the Egyptian Army in the Six-Day War of June 1967. The decisive defeat of the Egyptians was critical to the **eventual loss** of the entire Sinai Peninsula to Israel. Leading Israeli forces was Major General Ariel Sharon, later a prominent politician and prime minister of Israel.

P2: The Battle of Abu-Ageila (also known as the Battle of Umm-Qatef;) was a military confrontation between the Israel Defense Forces and the Egyptian Army in the Six-Day War of June 1967. The decisive defeat of the Egyptians was critical to the **inevitable casualty** of the entire Sinai Peninsula to Israel. Leading Israeli forces was Major General Ariel Sharon, later a prominent politician and prime minister of Israel.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **eventual loss** and **inevitable casualty** interchangeable (i.e., having the same meaning)?

Pair 326

P1: Over time, the site was transitioned between various maintainers before it went offline completely. All that remains is a mirror, which is useful for archival purposes. A handful of the most **active contributors** in the userscripts.org community created "OpenUserJS", which is actively in use today. Also available is "Greasy Fork", a repository largely developed and maintained by Canadian programmer Jason Barnabe.

P2: Over time, the site was transitioned between various maintainers before it went offline completely. All that remains is a mirror, which is useful for archival purposes. A handful of the most **occupied correspondents** in the userscripts.org community created "OpenUserJS", which is actively in use today. Also available is "Greasy Fork", a repository largely developed and maintained by Canadian programmer Jason Barnabe.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **active contributors** and **occupied correspondents** interchangeable (i.e., having the same meaning)?

Pair 327

P1: Pat Cantwell, William Carmona, Maxx Tissenbaum, Nick Tropeano, and Adam Brown were named to the All-Tournament team and Cantwell additionally earned the MOP award. In the NCAA Tournament, the Seawolves played in the Myrtle Beach Regional. They lost to Coastal Carolina 6–0, but defeated NC State 6–2 in the loser's bracket to earn their **first victory** in the tournament. The Seawolves were then eliminated in a rematch with Coastal Carolina,

losing 25–7.

P2: Pat Cantwell, William Carmona, Maxx Tissenbaum, Nick Tropeano, and Adam Brown were named to the All-Tournament team and Cantwell additionally earned the MOP award. In the NCAA Tournament, the Seawolves played in the Myrtle Beach Regional. They lost to Coastal Carolina 6–0, but defeated NC State 6–2 in the loser’s bracket to earn their **inaugural triumph** in the tournament. The Seawolves were then eliminated in a rematch with Coastal Carolina, losing 25–7.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **first victory** and **inaugural triumph** interchangeable (i.e., having the same meaning)?

Pair 328

P1: A rapid exchange of letters in late February, was the result of either the Reverend Kemp or, more likely, Lord Craig, having sent a “haughty dictatorial letter” about the erosion of his niece’s reputation. On Saturday, 23 February, Robert Burns arrived at Willie’s Mill in Tarbolton, to see Jean Armour who had left her parents house due to her pregnancy to stay with the Muir family. Burns wrote to Agnes from Mossgiel, saying: “Now for a **little news** that will please you. I, this morning as I came home, called for a certain woman.

P2: A rapid exchange of letters in late February, was the result of either the Reverend Kemp or, more likely, Lord Craig, having sent a “haughty dictatorial letter” about the erosion of his niece’s reputation. On Saturday, 23 February, Robert Burns arrived at Willie’s Mill in Tarbolton, to see Jean Armour who had left her parents house due to her pregnancy to stay with the Muir family. Burns wrote to Agnes from Mossgiel, saying: “Now for a **some disclosures** that will please you. I, this morning as I came home, called for a certain woman.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **little news** and **some disclosures** interchangeable (i.e., having the same meaning)?

Pair 329

P1: Muscle recruitment principles. Ballistic lifts force the muscles to produce the greatest amount of force in the shortest amount of time. In accordance with Henneman’s size principle muscle fibers are recruited from a low to a high threshold as **force requirements** increase. 2

P2: Muscle recruitment principles. Ballistic lifts force the muscles to produce the greatest amount of force in the shortest amount of time. In accordance with Henneman’s size principle muscle fibers are recruited from a low to a high threshold as **strength demands** increase. 2

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **force requirements** and **strength demands** interchangeable (i.e., having the same meaning)?

Pair 330

P1: a copy of the reference to the same object, just as in C/C++. The object’s value may be changed in the called function with the “alias”, for example: »> alist = ['a', 'b', 'c'] »> def my_func(al): ... al.append('x') ... print(al) »> my_func(alist) ['a', 'b', 'c', 'x'] »> alist ['a', 'b', 'c', 'x'] Function codice_48 changed the value of codice_49 with the formal argument codice_50, which is an alias of codice_49. However, any attempt to operate on the alias itself will have no effect on the **original object**. In Python, non-innermost-local and not-declared-global accessible names are all aliases.

P2: a copy of the reference to the same object, just as in C/C++. The object’s value may be changed in the called function with the “alias”, for example: »> alist = ['a', 'b', 'c'] »> def my_func(al): ... al.append('x') ... print(al) »> my_func(alist) ['a', 'b', 'c', 'x'] »> alist ['a', 'b', 'c', 'x'] Function codice_48 changed the value of codice_49 with the formal argument codice_50, which is an alias of codice_49. However, any attempt to operate on the alias itself will have no effect on the **authentic article**. In Python, non-innermost-local and not-declared-global accessible names

are all aliases.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **original object** and **authentic article** interchangeable (i.e., having the same meaning)?

Pair 331

P1: Drina river house (,) is a wooden, cabin-like house on the rock in the middle of the Drina river, near the town of Bajina Bašta in western Serbia. **The original object** was built in 1968 by a group of swimmers who needed a shelter. Until 2019, it was destroyed 7 times during the high water level in the river, but was rebuilt every time.

P2: Drina river house (,) is a wooden, cabin-like house on the rock in the middle of the Drina river, near the town of Bajina Bašta in western Serbia. **The first material** was built in 1968 by a group of swimmers who needed a shelter. Until 2019, it was destroyed 7 times during the high water level in the river, but was rebuilt every time.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **original object** and **first material** interchangeable (i.e., having the same meaning)?

Pair 332

P1: Junko reveals she once tried to be Miho's friend, but Miho apparently abandoned her similar to the way to abandoned Ping. Junko helps Ping locate Miho anyway by getting her to post pictures of Miho on the internet, and the two girls go down to The Cave of Evil where they witness Yuki bringing Miho there. **Ping, like Junpei, appeared in an issue of Applegeeks, in which the main character explained his stressful situation** (ironically, involving a robot girl) to her. Unfortunately, Ping, not speaking English, was unable to help.

P2: Junko reveals she once tried to be Miho's friend, but Miho apparently abandoned her similar to the way to abandoned Ping. Junko helps Ping locate Miho anyway by getting her to post pictures of Miho on the internet, and the two girls go down to The Cave of Evil where they witness Yuki bringing Miho there. **Ping, like Junpei, appeared in an issue of Applegeeks, in which the main character explained his on-edge circumstance** (ironically, involving a robot girl) to her. Unfortunately, Ping, not speaking English, was unable to help.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **stressful situation** and **on-edge circumstance** interchangeable (i.e., having the same meaning)?

Pair 333

P1: This quaternary structure change is associated with alterations in inter-subunit and inter-domain interactions. The interaction between subunits C1-C4 and R1 is extensively modified during this conversion. **In particular, there is large movement** of amino acid residues 230-254, known collectively as the 240s loop. These residues are located at the cleft between the carbamoyl phosphate and aspartate domains at the C1-C4 interface.

P2: This quaternary structure change is associated with alterations in inter-subunit and inter-domain interactions. The interaction between subunits C1-C4 and R1 is extensively modified during this conversion. **In particular, there is big drive** of amino acid residues 230-254, known collectively as the 240s loop. These residues are located at the cleft between the carbamoyl phosphate and aspartate domains at the C1-C4 interface.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **large movement** and **big drive** interchangeable (i.e., having the same meaning)?

Pair 334

P1: A new theme, named Mylasa and Melanoudion, was created to the south of Thrakesion. Conspiracies of the "sebastokrator" Isaac. The younger brother of John II, Isaac, had been of **essential support** during the accession crisis. However, despite being given the highest of court titles, that of "sebastokrator", Isaac later became estranged from his brother and became an active conspirator.

P2: A new theme, named Mylasa and Melanoudion, was created to the south of Thrakesion. Conspiracies of the "sebastokrator" Isaac. The younger brother of John II, Isaac, had been of **necessary help** during the accession crisis. However, despite being given the highest of court titles, that of "sebastokrator", Isaac later became estranged from his brother and became an active conspirator.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **essential support** and **necessary help** interchangeable (i.e., having the same meaning)?

Pair 335

P1: In addition, firms can conduct analyses of performance, customer analysis, competitor analysis, and target market analysis. Entry strategies. Marketing strategies may differ depending on the **unique situation** of the individual business. According to Lieberman and Montgomery, every entrant into a market – whether it is new or not – is classified under a Market Pioneer, Close Follower or a Late follower Pioneers.

P2: In addition, firms can conduct analyses of performance, customer analysis, competitor analysis, and target market analysis. Entry strategies. Marketing strategies may differ depending on the **different circumstance** of the individual business. According to Lieberman and Montgomery, every entrant into a market – whether it is new or not – is classified under a Market Pioneer, Close Follower or a Late follower Pioneers.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **unique situation** and **different circumstance** interchangeable (i.e., having the same meaning)?

Pair 336

P1: The 8-part series aimed to educate people thinking of migrating overseas for work about the correct process they should follow in order to stay safe. Bangladesh. In October 2017, IOM X premiered a video series to help aspirant Bangladeshi migrants obtain the right documentation before the **leave home** for work. IOM X research found that many Bangladeshis were at risk of deception after going abroad for employment due to not having the right visas and work permits from their broker.

P2: The 8-part series aimed to educate people thinking of migrating overseas for work about the correct process they should follow in order to stay safe. Bangladesh. In October 2017, IOM X premiered a video series to help aspirant Bangladeshi migrants obtain the right documentation before the **departure from their house** for work. IOM X research found that many Bangladeshis were at risk of deception after going abroad for employment due to not having the right visas and work permits from their broker.

Question: In both passages, are **leave home** and **departure from their house** interchangeable (i.e., having the same meaning)?

Pair 337

P1: Release. The film was then included as one of the ten official entries of the 2020 Metro Manila Film Festival and will be made available online through Upstream starting December 25, 2020. "Tagpuan" also marks the return of lead actor Alfred Vargas in the MMFF, whose last film in the film festival was **bridal shower** in 2003. The film was submitted for the

2019 Metro Manila Film Festival but was not selected as one of the eight official entries for that edition of the film festival.

P2: Release. The film was then included as one of the ten official entries of the 2020 Metro Manila Film Festival and will be made available online through Upstream starting December 25, 2020. "Tagpuan" also marks the return of lead actor Alfred Vargas in the MMFF, whose last film in the film festival was party for the bride in 2003. The film was submitted for the 2019 Metro Manila Film Festival but was not selected as one of the eight official entries for that edition of the film festival.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **bridal shower** and **party for the bride** interchangeable (i.e., having the same meaning)?

Pair 338

P1: Article marketing has been used by professionals for nearly as long as mass print has been available. Business provides the content to a newspaper, possibly on a timely topic such as an article on tax audits during tax season, and the newspaper may use the article and include the business's name and contact information. Newspapers and other traditional media have limited budgets for gathering content and these articles may be used in the **business section** of the newspaper. Traditional article marketing is advertising a company's article through the use of magazines, newspapers and any print media.

P2: Article marketing has been used by professionals for nearly as long as mass print has been available. Business provides the content to a newspaper, possibly on a timely topic such as an article on tax audits during tax season, and the newspaper may use the article and include the business's name and contact information. Newspapers and other traditional media have limited budgets for gathering content and these articles may be used in the **enterprise area** of the newspaper. Traditional article marketing is advertising a company's article through the use of magazines, newspapers and any print media.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **business section** and **enterprise area** interchangeable (i.e., having the same meaning)?

Pair 339

P1: FrameGang was an applet for developing HTML frames for Netscape released by Sausage Software in April 1996. The program featured a drag-and-drop interface that allowed users to define the **number, size** and position of the HTML frames without knowledge of HTML. It was one of the four "snaglets" along with Crosseye, Flash, and Clickette that were released by Sausage Software that month.

P2: FrameGang was an applet for developing HTML frames for Netscape released by Sausage Software in April 1996. The program featured a drag-and-drop interface that allowed users to define the **numerical value, area** and position of the HTML frames without knowledge of HTML. It was one of the four "snaglets" along with Crosseye, Flash, and Clickette that were released by Sausage Software that month.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **number, size** and **numerical value, area** interchangeable (i.e., having the same meaning)?

Pair 340

P1: While same-sex people (men or women) will shake hands, kiss on the cheek and even hug multiple times, a man and woman greeting each other in public will not go further than a handshake. This is due to Moroccan culture being conservative. Verbal greetings in Morocco can go from a basic salaam, to asking about **life details** to make sure the other person is doing well. In the kingdom of Morocco, the greeting should always be made with the right hand, as the

left hand is traditionally considered unclean.

P2: While same-sex people (men or women) will shake hands, kiss on the cheek and even hug multiple times, a man and woman greeting each other in public will not go further than a handshake. This is due to Moroccan culture being conservative. Verbal greetings in Morocco can go from a basic salaam, to asking about **how things are going to make sure the other person is doing well**. In the kingdom of Morocco, the greeting should always be made with the right hand, as the left hand is traditionally considered unclean.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **life details** and **how things are going** interchangeable (i.e., having the same meaning)?

Pair 341

P1: It causes partial melting of the crust, which will then generate a chamber of liquid phase that will later be crystallized and generate minerals. The source of water stays in minerals that contain H₂O in their chemical compositions. **another key factor** is the concentration of silica in the magma, which leads to the differentiation of magma. At the end of the crystallization is possible to crystallize quartz, but only when the melt contains a high concentration of SiO₂, which is the main component of the mineral.

P2: It causes partial melting of the crust, which will then generate a chamber of liquid phase that will later be crystallized and generate minerals. The source of water stays in minerals that contain H₂O in their chemical compositions. **a distinct essential component** is the concentration of silica in the magma, which leads to the differentiation of magma. At the end of the crystallization is possible to crystallize quartz, but only when the melt contains a high concentration of SiO₂, which is the main component of the mineral.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **another key factor** and **a distinct essential component** interchangeable (i.e., having the same meaning)?

Pair 342

P1: Dimondale is a suburb of Lansing, which is northeast of the village in Ingham County. History. **The Potawatomi originally had a permanent camp** along the Grand River in the Dimondale area before white settlement began in the 1830s. Relations between white settlers (most of whom were from New York and New England) and the Potawatomi were generally cordial with local residents permanently deeding of land near the river to the local Indians.

P2: Dimondale is a suburb of Lansing, which is northeast of the village in Ingham County. History. **The Potawatomi originally had a standing base** along the Grand River in the Dimondale area before white settlement began in the 1830s. Relations between white settlers (most of whom were from New York and New England) and the Potawatomi were generally cordial with local residents permanently deeding of land near the river to the local Indians.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **permanent camp** and **standing base** interchangeable (i.e., having the same meaning)?

Pair 343

P1: Triple-selection machines have had some success in office settings, where the target customers are adults. An advantage of triple-selection machines over stands with separate heads is that they are quicker to service because one key opens the whole machine. **Moreover, most triple selection machines have a spill tray, which can help prevent store owners from becoming annoyed at having to sweep up spilled candy.** A disadvantage is that the presentation area is smaller than with a globe or panel head, and customers cannot see all products from all angles.

P2: Triple-selection machines have had some success in office settings, where the target customers are adults. An advantage of triple-selection machines over stands with separate heads is that they are quicker to service because one key opens

the whole machine. Moreover, most triple selection machines have a spill tray, which can help prevent retail operator from becoming annoyed at having to sweep up spilled candy. A disadvantage is that the presentation area is smaller than with a globe or panel head, and customers cannot see all products from all angles.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are store owners and retail operator interchangeable (i.e., having the same meaning)?

Pair 344

P1: Damage descriptors and wind speeds will also be readily updated as new information is learned. Some differences do exist between the two scales in the ratings assigned to damage. An EF5 rating on the new scale requires a higher standard of construction in houses than does an F5 rating on the old scale. So, the complete destruction and sweeping away of a typical American frame home, which would likely be rated F5 on the Fujita scale, would be rated EF4 or lower on the Enhanced Fujita scale.

P2: Damage descriptors and wind speeds will also be readily updated as new information is learned. Some differences do exist between the two scales in the ratings assigned to damage. An EF5 rating on the improved grading system requires a higher standard of construction in houses than does an F5 rating on the old scale. So, the complete destruction and sweeping away of a typical American frame home, which would likely be rated F5 on the Fujita scale, would be rated EF4 or lower on the Enhanced Fujita scale.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are new scale and improved grading system interchangeable (i.e., having the same meaning)?

Pair 345

P1: As prohibition led to many entertainment businesses expanding to include live music performances, it opened the door for many black jazz musicians to gain a following (Ogren 5). Allowing jazz to rise up in American culture brought many unique things to music in 1920. New instrumental, orchestral, and rhythmic techniques were introduced, as well as twelve-bar blues, emotional expressiveness, a new scale, and unique forms (Murchison 98). In 1917, many jazz record companies began to conceal their identity because racial tension was on the rise and showed no signs of slowing down.

P2: As prohibition led to many entertainment businesses expanding to include live music performances, it opened the door for many black jazz musicians to gain a following (Ogren 5). Allowing jazz to rise up in American culture brought many unique things to music in 1920. New instrumental, orchestral, and rhythmic techniques were introduced, as well as twelve-bar blues, emotional expressiveness, a renewed musical sequence, and unique forms (Murchison 98). In 1917, many jazz record companies began to conceal their identity because racial tension was on the rise and showed no signs of slowing down.

(The original quote is from the sixteenth century English antiquarian William Camden; the more well-known adaptation is from Graham Greene's 1938 novel "Brighton Rock".) The prayer expresses in words a deeply personal "act" that engages a person's affections and will.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **familiar version** and **well-known adaptation** interchangeable (i.e., having the same meaning)?

Pair 354

P1: Electrology is the practice of electrical hair removal to permanently remove human hair from the body. Electrolysis is the actual process of removing hair using electricity. In electrolysis, a qualified professional called an electrologist slides a hair-thin, solid metal probe into each hair follicle without puncturing the skin (when inserted properly).

P2: Electrology is the practice of electrical hair removal to permanently remove human hair from the body. Electrolysis is the true procedure of removing hair using electricity. In electrolysis, a qualified professional called an electrologist slides a hair-thin, solid metal probe into each hair follicle without puncturing the skin (when inserted properly).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **actual process** and **true procedure** interchangeable (i.e., having the same meaning)?

Pair 355

P1: In an experiment, flower formation is triggered by long days and strong light. Another experiment showed that flowers will only open after a cold period, probably a mechanism to prevent premature opening in autumn. Seeds of "Caltha introloba" in another experiment were shown to germinate best between 22-27 °C, with a delay of 40-60 days, and hardly between 0-15 °C. However, after 4 months at 1-2 °C, germination below 15 °C was much faster and better.

P2: In an experiment, flower formation is triggered by long days and strong light. Another experiment showed that flowers will only open after a cold period, probably a mechanism to prevent premature opening in autumn. Seeds of "Caltha introloba" in a different scientific study were shown to germinate best between 22-27 °C, with a delay of 40-60 days, and hardly between 0-15 °C. However, after 4 months at 1-2 °C, germination below 15 °C was much faster and better.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **another experiment** and **a different scientific study** interchangeable (i.e., having the same meaning)?

Pair 356

P1: It begins to seem to the child that there is some little world living according to its own laws: he sees "all around him disguised areas of complete freedom and happiness. Thus, in the story, the traditional motif of the formation and maturation of personality is embodied in the continuous world of the author. The second-person narrative creates the necessary reflection and allows the main metaphor of the story to unfold in parallel. V. Pelevin speaks about the desire to break free from prison and at the same time conducts the idea of overcoming the limited human consciousness, being

in captivity of illusions about the conditions of his being.

P2: It begins to seem to the child that there is some little world living according to its own laws: he sees "all around him disguised areas of complete freedom and happiness. Thus, in the story, the traditional motif of the formation and maturation of personality is embodied in the continuous world of the author. The second-person narrative creates the essential contemplation and allows the main metaphor of the story to unfold in parallel. V. Pelevin speaks about the desire to break free from prison and at the same time conducts the idea of overcoming the limited human consciousness, being in captivity of illusions about the conditions of his being.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are necessary reflection and essential contemplation interchangeable (i.e., having the same meaning)?

Pair 357

P1: When it is said "the Son of Man came not to destroy the world, but that the world through Him might be saved," by "the world" is meant the two superior parts, "to agenneton" and "to autogenneton." When the Scripture says "that we should not be condemned with the world," by the world is meant the third part or the "kosmos idikos;" for that part must be destroyed, but the two superior parts freed from destruction. When the Saviour comes into the world, he would attract to himself those whose nature is such as to be capable of receiving his influence. Such persons are called Peratae because, by means of their "gnosis" they have learned how safely to pass through ("perasai") the corruption to which everything that is generated is subject.

P2: When it is said "the Son of Man came not to destroy the world, but that the world through Him might be saved," by "the world" is meant the two superior parts, "to agenneton" and "to autogenneton." When the Scripture says "that we should not be condemned with the world," by the world is meant the third part or the "kosmos idikos;" for that part must be destroyed, but the two superior parts freed from destruction. When the Saviour comes into the world, he would attract to himself those who have an essence that is such as to be capable of receiving his influence. Such persons are called Peratae because, by means of their "gnosis" they have learned how safely to pass through ("perasai") the corruption to which everything that is generated is subject.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are whose nature and who have an essence that interchangeable (i.e., having the same meaning)?

Pair 358

P1: New Zealand. No license is necessary for recreational sea fishing. There are many detailed regulations about fish species, size limits, fishing methods and prohibited areas. Norway.

P2: New Zealand. No license is necessary for recreational sea fishing. There are many detailed regulations about fish species, proportion limitations, fishing methods and prohibited areas. Norway.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are size limits and proportion limitations interchangeable (i.e., having the same meaning)?

Pair 359

P1: Collection of such a fee was approved for one year in July 2010 and expired without extension. The fare for the longest possible journey to the exiting station will be charged if a journey exceeds four hours. Passengers may carry luggage below weight and size limits at no cost or a ¥2 surcharge. Current ticket types.

P2: Collection of such a fee was approved for one year in July 2010 and expired without extension. The fare for the longest possible journey to the exiting station will be charged if a journey exceeds four hours. Passengers may carry

luggage below weight and **dimension confines** at no cost or a ¥2 surcharge. Current ticket types.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **size limits** and **dimension confines** interchangeable (i.e., having the same meaning)?

Pair 360

P1: Previously, this type of metastatic behavior had not been seen in this particular tumor, being traditionally associated almost exclusively with the "pneumonic" form of pulmonary bronchioloalveolar carcinoma. Diagnosis. **While occasional scattered rhabdoid cell formation occurs with considerable frequency in lung carcinomas, this is not considered to be of clinical significance.** According to current classification criteria, a tumor can only be diagnosed as LCLC-RP when an undifferentiated large-cell lung carcinoma contains a rhabdoid cell component that makes up at least 10% of the tumor mass.

P2: Previously, this type of metastatic behavior had not been seen in this particular tumor, being traditionally associated almost exclusively with the "pneumonic" form of pulmonary bronchioloalveolar carcinoma. Diagnosis. **While occasional scattered rhabdoid cell formation occurs with relative repetitiveness in lung carcinomas, this is not considered to be of clinical significance.** According to current classification criteria, a tumor can only be diagnosed as LCLC-RP when an undifferentiated large-cell lung carcinoma contains a rhabdoid cell component that makes up at least 10% of the tumor mass.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **considerable frequency** and **relative repetitiveness** interchangeable (i.e., having the same meaning)?

Pair 361

P1: Gentofte Lake is a dominant geographical feature. The highest point is Ræveskovsbakken. **The most urban part of the district is centred on the central part of Gentoftegade, Gentofte Torv and part of Baunegårdsvej.** Secondary centre is located in the periphery of the district at Bernstorffsvej and Kildegårds Plads.

P2: Gentofte Lake is a dominant geographical feature. The highest point is Ræveskovsbakken. **The most built-up portion of the district is centred on the central part of Gentoftegade, Gentofte Torv and part of Baunegårdsvej.** Secondary centre is located in the periphery of the district at Bernstorffsvej and Kildegårds Plads.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **urban part** and **built-up portion** interchangeable (i.e., having the same meaning)?

Pair 362

P1: Composition B, which has 1% paraffin wax added, or the Russian RGO hand grenade which contains 90 grams of "A-IX-1" explosive, comprising 96% RDX and 4% paraffin wax by weight. Another example of use is the VS-50 anti-personnel mine, which contains an explosive filling of 43 grams of RDX, again phlegmatized by combining it with 10% paraffin wax by weight. **Explosive compounds may exist in material states that limit their application.** For instance, nitroglycerin is normally an oily liquid.

P2: Composition B, which has 1% paraffin wax added, or the Russian RGO hand grenade which contains 90 grams of "A-IX-1" explosive, comprising 96% RDX and 4% paraffin wax by weight. Another example of use is the VS-50 anti-personnel mine, which contains an explosive filling of 43 grams of RDX, again phlegmatized by combining it with 10% paraffin wax by weight. **Explosive compounds may exist in physical capacity that limit their application.** For instance, nitroglycerin is normally an oily liquid.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **material states** and **physical capacity** interchangeable (i.e., having the same meaning)?

Pair 363

P1: The Opposition was a political grouping in Western Australia in the late 19th and early 20th centuries. In the Western Australian Parliament, there were initially no **official parties**, government being carried out by a loose coalition of members with similar interests. The pre-federation Legislative Assembly (1890–1901) had only one premier, John Forrest.

P2: The Opposition was a political grouping in Western Australia in the late 19th and early 20th centuries. In the Western Australian Parliament, there were initially no **formal political factions**, government being carried out by a loose coalition of members with similar interests. The pre-federation Legislative Assembly (1890–1901) had only one premier, John Forrest.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **official parties** and **formal political factions** interchangeable (i.e., having the same meaning)?

Pair 364

P1: It became the last representative of any Western religious organisation in Moscow as Stalin tightened his grip on the Soviet Union. A remarkable pictorial record survives from this period in the sketches made in 1923 by Richard Kilbey of Wells-next-the-Sea Meeting, when he and his brother Ernest were relief workers in South-Eastern Russia, in the town of Buzuluk. One sketch shows the Quaker team arriving back on a sledge at the **house headquarters** of the Quaker unit. Across the road was a malaria clinic in a building showing the marks of recent fighting between Red and White units in the Civil War.

P2: It became the last representative of any Western religious organisation in Moscow as Stalin tightened his grip on the Soviet Union. A remarkable pictorial record survives from this period in the sketches made in 1923 by Richard Kilbey of Wells-next-the-Sea Meeting, when he and his brother Ernest were relief workers in South-Eastern Russia, in the town of Buzuluk. One sketch shows the Quaker team arriving back on a sledge at the **head office** of the Quaker unit. Across the road was a malaria clinic in a building showing the marks of recent fighting between Red and White units in the Civil War.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **house headquarters** and **head office** interchangeable (i.e., having the same meaning)?

Pair 365

P1: The RD36-51A engine passed all state bench and flight tests in 1973-75 (with flight testing on the Tu-144D). The engine's specifications were: For the high-altitude M-17 "Stratosphera" aircraft (NATO reporting name Mystic-A) a single-shaft TRD RD36-51B was created—a modification of the RD36-51A engine with an unregulated nozzle and oxygen supply to the combustion chamber. The engine provides **long-term operation** at an altitude of at low flight speed ($M = 0.6$). RD-36-51A / B are released in a small series (about 50 pieces).

P2: The RD36-51A engine passed all state bench and flight tests in 1973-75 (with flight testing on the Tu-144D). The engine's specifications were: For the high-altitude M-17 "Stratosphera" aircraft (NATO reporting name Mystic-A) a single-shaft TRD RD36-51B was created—a modification of the RD36-51A engine with an unregulated nozzle and oxygen supply to the combustion chamber. The engine provides **extensive period venture** at an altitude of at low flight speed ($M = 0.6$). RD-36-51A / B are released in a small series (about 50 pieces).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **long-term operation** and **extensive period venture** interchangeable (i.e., having the same meaning)?

Pair 366

P1: The following table shows the change of the population during the last four decades. Ethnic groups. Ethnic Bulgarians constitute the majority of the population of Alfatar Municipality, followed by ethnic Turks and roma people in Bulgaria. Religion.

P2: The following table shows the change of the population during the last four decades. Ethnic groups. Ethnic Bulgarians constitute the majority of the population of Alfatar Municipality, followed by ethnic Turks and Bohemian folk in Bulgaria. Religion.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are roma people and Bohemian folk interchangeable (i.e., having the same meaning)?

Pair 367

P1: It provided water for horses hauling grain into town and some townspeople also used its water for doing laundry. It is the only pump house in Saskatchewan and has been recognized as a Municipal Heritage Property since 1994. Originally, it worked by the way of a gas pump that drew water to a tank at the top of the pump house. The tower portion of this building is a smaller version of the traditional railway water towers that were common across the prairies.

P2: It provided water for horses hauling grain into town and some townspeople also used its water for doing laundry. It is the only pump house in Saskatchewan and has been recognized as a Municipal Heritage Property since 1994. Originally, it worked by the way of a pressure siphon that drew water to a tank at the top of the pump house. The tower portion of this building is a smaller version of the traditional railway water towers that were common across the prairies.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are gas pump and pressure siphon interchangeable (i.e., having the same meaning)?

Pair 368

P1: A more proximal psychological mechanism through which mental accounting influences spending is through its influence on the pain of paying that is associated with spending money from a mental account. Pain of paying is a negative affective response associated with a financial loss. Prototypical examples are the unpleasant feeling that one experiences when watching the fare increase on a taximeter or at the gas pump. When considering an expense, consumers appear to compare the cost of the expense to the size of an account that it would deplete (e.g., numerator vs. denominator).

P2: A more proximal psychological mechanism through which mental accounting influences spending is through its influence on the pain of paying that is associated with spending money from a mental account. Pain of paying is a negative affective response associated with a financial loss. Prototypical examples are the unpleasant feeling that one experiences when watching the fare increase on a taximeter or at the petrol supply. When considering an expense, consumers appear to compare the cost of the expense to the size of an account that it would deplete (e.g., numerator vs. denominator).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are gas pump and petrol supply interchangeable (i.e., having the same meaning)?

Pair 369

P1: It is for this reason that the continued and widespread observance of the Silent Minute is of such vital importance in the interest of human welfare. ”” The Silent Minute began in 1940 during The Blitz on the UK when Major Wellesley Tudor-Pole perceived ”an inner request from a high spiritual source that there be a Silent Minute of Prayer for Freedom, at 9pm each evening during the striking of Big Ben. If enough people joined in this gesture of dedicated intent, the tide would turn and the invasion of England would be diverted.” Tudor-Pole went to the King and Prime Minister with his request and won both their support.

P2: It is for this reason that the continued and widespread observance of the Silent Minute is of such vital importance in the interest of human welfare. ”” The Silent Minute began in 1940 during The Blitz on the UK when Major Wellesley

Tudor-Pole perceived "an inner request from a high spiritual source that there be a Silent Minute of Prayer for Freedom, at 9pm each evening during the striking of Big Ben. If **adequate individuals** joined in this gesture of dedicated intent, the tide would turn and the invasion of England would be diverted." Tudor-Pole went to the King and Prime Minister with his request and won both their support.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **enough people** and **adequate individuals** interchangeable (i.e., having the same meaning)?

Pair 370

P1: Note that terminology differs between scholars. An incomplete list of theoretical bases for framing a human and their occupations include the following: Generic models. Generic models are the **overarching title** given to a collation of compatible knowledge, research and theories that form conceptual practice. More generally they are defined as "those aspects which influence our perceptions, decisions and practice".

P2: Note that terminology differs between scholars. An incomplete list of theoretical bases for framing a human and their occupations include the following: Generic models. Generic models are the **general label** given to a collation of compatible knowledge, research and theories that form conceptual practice. More generally they are defined as "those aspects which influence our perceptions, decisions and practice".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **overarching title** and **general label** interchangeable (i.e., having the same meaning)?

Pair 371

P1: Amasis ordered his soldiers to dig a large trench in front of the city covered with wooden planks and earth in order to catch them. Amasis then invited the Barcaeans for a meeting and they came. The Barcaeans accepted the offer of ending the hostilities in exchange for a **fair sum** paid to the Persian king. The Barcaeans agreed, and opened the city gates.

P2: Amasis ordered his soldiers to dig a large trench in front of the city covered with wooden planks and earth in order to catch them. Amasis then invited the Barcaeans for a meeting and they came. The Barcaeans accepted the offer of ending the hostilities in exchange for a **reasonable calculation** paid to the Persian king. The Barcaeans agreed, and opened the city gates.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **fair sum** and **reasonable calculation** interchangeable (i.e., having the same meaning)?

Pair 372

P1: Use, possession or purchase of alcohol is prohibited during all Phases except as religious sacrament. In order for an MOS-I Soldier to move from Phase IV to Phase V privileges, the Soldier must pass Knowledge Exam, recite the Soldier's Creed, sing their branch song and army song, and pass Class A, Wall Locker, and Room Inspections. Additionally, Soldiers must demonstrate **proper discipline**, pass all academic requirements, and pass their APFT with 60 points in each event. Phase 5.

P2: Use, possession or purchase of alcohol is prohibited during all Phases except as religious sacrament. In order for an MOS-I Soldier to move from Phase IV to Phase V privileges, the Soldier must pass Knowledge Exam, recite the Soldier's Creed, sing their branch song and army song, and pass Class A, Wall Locker, and Room Inspections. Additionally, Soldiers must demonstrate **real control**, pass all academic requirements, and pass their APFT with 60 points in each event. Phase 5.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **proper discipline** and **real control** interchangeable (i.e., having the same meaning)?

Pair 373

P1: The Fishmore Hall Hotel in Ludlow, Shropshire is a house of historical significance. A major part of it was built in about 1820 but some of the building may be older than this. **It was a private residence for many years and in the late part of the 20th century it became a school.** It was recently converted to a hotel.

P2: The Fishmore Hall Hotel in Ludlow, Shropshire is a house of historical significance. A major part of it was built in about 1820 but some of the building may be older than this. **It was a private residence for many years and in the end section of the 20th century it became a school.** It was recently converted to a hotel.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **late part** and **end section** interchangeable (i.e., having the same meaning)?

Pair 374

P1: In a speech to the American Israel Public Affairs Committee on April 23, 2002, McCain said that "no American leader should be expected to sell a false peace to our ally, consider Israel's right to self-defense less legitimate than ours, or insist that Israel negotiate a political settlement while terrorism remains the Palestinians' preferred bargaining tool." During the 2006 Lebanon War, McCain said, regarding Israel's role in the conflict with Lebanon and Hezbollah, "What would we do if somebody came across our borders and killed our soldiers and captured our soldiers? **Do you think we would be exercising total restraint?**" During the 2008 presidential election, when asked if the Zionist cause was just and has succeeded, McCain responded, "I think so.

P2: In a speech to the American Israel Public Affairs Committee on April 23, 2002, McCain said that "no American leader should be expected to sell a false peace to our ally, consider Israel's right to self-defense less legitimate than ours, or insist that Israel negotiate a political settlement while terrorism remains the Palestinians' preferred bargaining tool." During the 2006 Lebanon War, McCain said, regarding Israel's role in the conflict with Lebanon and Hezbollah, "What would we do if somebody came across our borders and killed our soldiers and captured our soldiers? **Do you think we would be exercising entire control?**" During the 2008 presidential election, when asked if the Zionist cause was just and has succeeded, McCain responded, "I think so.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **total restraint** and **entire control** interchangeable (i.e., having the same meaning)?

Pair 375

P1: Verses 1.7 to 1.18 of the text summarize the practice of Kundalini-arousing. The two steps include "Arousing the Saraswati Nadi", and breath control ("Pranayama" and "Kumbhaka"). **; the Kumbhakas cause total restraint of the Prana.** The text in verses 1.18–1.39 details the breath control practice in several ways including Surya-Kumbhaka, Ujjayi-Kumbhaka, Sitali-Kumbhaka and Bhastra-Kumbhaka.

P2: Verses 1.7 to 1.18 of the text summarize the practice of Kundalini-arousing. The two steps include "Arousing the Saraswati Nadi", and breath control ("Pranayama" and "Kumbhaka"). **; the Kumbhakas cause complete limitation of the Prana.** The text in verses 1.18–1.39 details the breath control practice in several ways including Surya-Kumbhaka, Ujjayi-Kumbhaka, Sitali-Kumbhaka and Bhastra-Kumbhaka.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **total restraint** and **complete limitation** interchangeable (i.e., having the same meaning)?

Pair 376

P1: This is done with a probe that can be locus specific, centromeric, telomeric, and whole-chromosomal. This technique is typically performed on interphase cells and paraffin block tissues. FISH maps out **single copy** or repetitive DNA sequences through localization labeling of specific nucleic acids. The technique utilizes different DNA probes labeled with fluorescent tags that bind to one or more specific regions of the genome.

P2: This is done with a probe that can be locus specific, centromeric, telomeric, and whole-chromosomal. This technique is typically performed on interphase cells and paraffin block tissues. FISH maps out **individual representation** or repetitive DNA sequences through localization labeling of specific nucleic acids. The technique utilizes different DNA probes labeled with fluorescent tags that bind to one or more specific regions of the genome.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **single copy** and **individual representation** interchangeable (i.e., having the same meaning)?

Pair 377

P1: With Jake's help, Vicky found the real murderer and Shane was released. It seemed like Shane and Vicky were finally going to be happy together, but then his estranged wife, Lila (Lisa Peluso), came to Bay City determined to win him back. Lila coming between them put a **huge strain** on their relationship and Vicky grew even closer to Jake. Jake wanted commitment from Vicky, which left her with a tough choice to make.

P2: With Jake's help, Vicky found the real murderer and Shane was released. It seemed like Shane and Vicky were finally going to be happy together, but then his estranged wife, Lila (Lisa Peluso), came to Bay City determined to win him back. Lila coming between them put a **grand pressure** on their relationship and Vicky grew even closer to Jake. Jake wanted commitment from Vicky, which left her with a tough choice to make.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **huge strain** and **grand pressure** interchangeable (i.e., having the same meaning)?

Pair 378

P1: Bird set the fastest lap of the second practice session of 1 minute, 28.312 seconds; completing the top ten were Van der Garde, Leimer third, Coletti, Dani Clos, Valsecchi, Max Chilton, Herck, Pål Varhaug and Nathanaël Berthon. Grosjean and Ericsson missed the session because their cars were being repaired while Fillipi had mechanical issues. Gutiérrez lost control of his car in the **closing period** at Variante Villeneuve turn and broke his front wing. Friday afternoon's qualifying session ran for 30-minutes.

P2: Bird set the fastest lap of the second practice session of 1 minute, 28.312 seconds; completing the top ten were Van der Garde, Leimer third, Coletti, Dani Clos, Valsecchi, Max Chilton, Herck, Pål Varhaug and Nathanaël Berthon. Grosjean and Ericsson missed the session because their cars were being repaired while Fillipi had mechanical issues. Gutiérrez lost control of his car in the **final time** at Variante Villeneuve turn and broke his front wing. Friday afternoon's qualifying session ran for 30-minutes.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **closing period** and **final time** interchangeable (i.e., having the same meaning)?

Pair 379

P1: World-labeled tableau. A different mechanism for ensuring the correct interaction between formulae referring to different worlds is to switch from formulae to labeled formulae: instead of writing formula_9, one would write formula_228 to make it explicit that formula_9 holds in world formula_199. All propositional expansion rules are adapted to this variant by stating that they all refer to formulae with the same **world label**. For example, formula_231 generates two nodes labeled with formula_228 and formula_233; a branch is closed only if it contains two opposite literals of the same

world, like formula_234 and formula_235; no closure is generated if the two world labels are different, like in formula_234 and formula_237.

P2: World-labeled tableau. A different mechanism for ensuring the correct interaction between formulae referring to different worlds is to switch from formulae to labeled formulae: instead of writing formula_9, one would write formula_228 to make it explicit that formula_9 holds in world formula_199. All propositional expansion rules are adapted to this variant by stating that they all refer to formulae with the same planet marker. For example, formula_231 generates two nodes labeled with formula_228 and formula_233; a branch is closed only if it contains two opposite literals of the same world, like formula_234 and formula_235; no closure is generated if the two world labels are different, like in formula_234 and formula_237.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are world label and planet marker interchangeable (i.e., having the same meaning)?

Pair 380

P1: The cellulose fibers of the shroud are coated with a thin carbohydrate layer of starch fractions, various sugars, and other impurities. The potential source for amines required for the reaction is a decomposing body, and no signs of decomposition have been found on the Shroud. Rogers also notes that their tests revealed that there were no proteins or bodily fluids on the image areas. Also, the image resolution and the uniform coloration of the linen resolution seem to be incompatible with a mechanism involving diffusion.

P2: The cellulose fibers of the shroud are coated with a thin carbohydrate layer of starch fractions, various sugars, and other impurities. The potential source for amines required for the reaction is a decomposing body, and no signs of decomposition have been found on the Shroud. Rogers also notes that their tests revealed that there were no proteins or bodily fluids on the vision part. Also, the image resolution and the uniform coloration of the linen resolution seem to be incompatible with a mechanism involving diffusion.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are image areas and vision part interchangeable (i.e., having the same meaning)?

Pair 381

P1: Appearance. Manipura is represented with a downward-pointing red triangle, signifying the tattva of fire, within a bright yellow circle, with 10 dark-blue or black petals like heavily laden rain clouds. The fire region is represented by the god Vahni, who is shining red, has four arms, holds a rosary and a spear. Vahni is making the gestures of granting boons, or favors, and dispelling fear.

P2: Appearance. Manipura is represented with a downward-pointing red triangle, signifying the tattva of fire, within a bright yellow circle, with 10 dark-blue or black petals like heavily laden rain clouds. The flames' area is represented by the god Vahni, who is shining red, has four arms, holds a rosary and a spear. Vahni is making the gestures of granting boons, or favors, and dispelling fear.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are fire region and flames' area interchangeable (i.e., having the same meaning)?

Pair 382

P1: It also threatened the San Mateo Lookout and Pankey Mine. Even after containment, numerous trails and one campground remain closed. While fighting the fire, crews had to improve existing Forest Roads in the fire region, which resulted in better driving conditions in the long-term. Environmental.

P2: It also threatened the San Mateo Lookout and Pankey Mine. Even after containment, numerous trails and one campground remain closed. While fighting the fire, crews had to improve existing Forest Roads in the inferno sector,

which resulted in better driving conditions in the long-term. Environmental.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **fire region** and **inferno sector** interchangeable (i.e., having the same meaning)?

Pair 383

P1: April is the hottest in average and December is to be recorded as coolest season in average. The month February is notably seen as the driest season while December to April being relatively drier. Maldives is lucky to be remaining as a safe and harmonious country as severe storms are rare made by its location in the **equatorial belt**. Governance.

P2: April is the hottest in average and December is to be recorded as coolest season in average. The month February is notably seen as the driest season while December to April being relatively drier. Maldives is lucky to be remaining as a safe and harmonious country as severe storms are rare made by its location in the **tropical band**. Governance.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **equatorial belt** and **tropical band** interchangeable (i.e., having the same meaning)?

Pair 384

P1: Human DNA is approximately 98.4% identical to that of chimpanzees when comparing single nucleotide polymorphisms (see human evolutionary genetics). The fossil record, however, of gorillas and chimpanzees is limited; both poor preservation – rain forest soils tend to be acidic and dissolve bone – and sampling bias probably contribute to this problem. Other hominins probably adapted to the drier environments outside the **equatorial belt**; and there they encountered antelope, hyenas, dogs, pigs, elephants, horses, and others. The equatorial belt contracted after about 8 million years ago, and there is very little fossil evidence for the split—thought to have occurred around that time—of the hominin lineage from the lineages of gorillas and chimpanzees.

P2: Human DNA is approximately 98.4% identical to that of chimpanzees when comparing single nucleotide polymorphisms (see human evolutionary genetics). Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **equatorial belt** and **humid region** interchangeable (i.e., having the same meaning)?

Pair 385

P1: Territory size changed over the course of the breeding season and was not significantly ($p > 0.05$) affected by reductions in food availability of 30% or less. During the winter eastern towhees are not as territorial and may be seen in mixed species flocks. **daily movement** of eastern towhees in loblolly (*P. taeda*) and longleaf pine (*P. palustris*) forests and clearcuts in South Carolina averaged per day. Only 2 females, out of 11 females and 9 males, stayed within the stand where they were captured for the duration of a 10-week study.

P2: Territory size changed over the course of the breeding season and was not significantly ($p > 0.05$) affected by reductions in food availability of 30% or less. During the winter eastern towhees are not as territorial and may be seen in mixed species flocks. **common grouping** of eastern towhees in loblolly (*P. taeda*) and longleaf pine (*P. palustris*) forests and clearcuts in South Carolina averaged per day. Only 2 females, out of 11 females and 9 males, stayed within the stand where they were captured for the duration of a 10-week study.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **daily movement** and **common grouping** interchangeable (i.e., having the same meaning)?

Pair 386

P1: These can be summarized as follows: These lead to such erroneous statements as, "This system is a SIL N system because the process adopted during its development was the standard process for the development of a SIL N system", or use of the SIL concept out of context such as, "This is a SIL 3 heat exchanger" or "This software is SIL 2". According to IEC 61508, the SIL concept must be related to the dangerous failure rate of a system, not just its failure rate or the failure rate of a component part, such as the software. **Definition of the dangerous failure modes by safety analysis is intrinsic to the proper determination of the failure rate.** SIL is for electrical controls only and does not relate directly to the caT architecture in IEC/EN 62061.

P2: These can be summarized as follows: These lead to such erroneous statements as, "This system is a SIL N system because the process adopted during its development was the standard process for the development of a SIL N system", or use of the SIL concept out of context such as, "This is a SIL 3 heat exchanger" or "This software is SIL 2". According to IEC 61508, the SIL concept must be related to the dangerous failure rate of a system, not just its failure rate or the failure rate of a component part, such as the software. **Definition of the dangerous failure modes by safety analysis is intrinsic to the actual verdict of the failure rate.** SIL is for electrical controls only and does not relate directly to the caT architecture in IEC/EN 62061.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **proper determination** and **actual verdict** interchangeable (i.e., having the same meaning)?

Pair 387

P1: Bluhm survived the war, and strove for a monument for the Jewish resisters that came about two years after his death in 1986. Numerous Jews participated in resisting the Germans. **The Jewish director of the assembly center in the "Hollandsche Schouwburg", a former theatre, Walter Süskind, was instrumental in smuggling children out of his centre.** He was aided by his assistant Jacques van de Kar and the director of the nearby crèche, Mrs Pimentel.

P2: Bluhm survived the war, and strove for a monument for the Jewish resisters that came about two years after his death in 1986. Numerous Jews participated in resisting the Germans. **The Jewish director of the meeting headquarters in the "Hollandsche Schouwburg", a former theatre, Walter Süskind, was instrumental in smuggling children out of his centre.** He was aided by his assistant Jacques van de Kar and the director of the nearby crèche, Mrs Pimentel.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **assembly center** and **meeting headquarters** interchangeable (i.e., having the same meaning)?

Pair 388

P1: McCourt was asked if he would have liked to have been an author earlier in his life, not teaching five classes a day for so many years. His reply begins as he "quickly shakes his head. **On the good days, and there were many, he never felt so alive, caught up in the currents of adolescent energy.** And McCourt brought his own spark, like having the students write each other's obituaries or set recipes to music."

P2: McCourt was asked if he would have liked to have been an author earlier in his life, not teaching five classes a day for so many years. His reply begins as he "quickly shakes his head. **On the great times, and there were many, he never felt so alive, caught up in the currents of adolescent energy.** And McCourt brought his own spark, like having the students write each other's obituaries or set recipes to music."

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **good days** and **great times** interchangeable (i.e., having the same meaning)?

Pair 389

P1: The capital of the company was FIM 1.5 billion in total. The share of Wärtsilä was FIM 1.05 billion and Valmet held FIM 450 million. However, the capital consisted 90% of **fixed property**, such as the real estate and equipment, and just FIM 150 million in cash. The second problem came from Soviet-ordered ships which were inherited from Valmet; the calculations showed in 1987 that these ships would cause losses of FIM 200–400 million.

P2: The capital of the company was FIM 1.5 billion in total. The share of Wärtsilä was FIM 1.05 billion and Valmet held FIM 450 million. However, the capital consisted 90% of **secure capital**, such as the real estate and equipment, and just FIM 150 million in cash. The second problem came from Soviet-ordered ships which were inherited from Valmet; the calculations showed in 1987 that these ships would cause losses of FIM 200–400 million.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **fixed property** and **secure capital** interchangeable (i.e., having the same meaning)?

Pair 390

P1: Anselan assisted Malcolm II of Scotland in repelling his old enemies, the Danes, on two different occasions. Anselan received a grant of land in the north of Scotland, East of Loch Lomond. The Buchanan name bears a **unique coat of Arms** and specific war cry granted to Anselan. John Buchanan was the great-grandson of Thomas Buchanan, who left Scotland in 1702 as one of six brothers (John, William, George, Thomas, Samuel, and Alexander) and one sister to resettle in County Donegal, Ireland.

P2: Anselan assisted Malcolm II of Scotland in repelling his old enemies, the Danes, on two different occasions. Anselan received a grant of land in the north of Scotland, East of Loch Lomond. The Buchanan name bears a **distinct layer of Arms** and specific war cry granted to Anselan. John Buchanan was the great-grandson of Thomas Buchanan, who left Scotland in 1702 as one of six brothers (John, William, George, Thomas, Samuel, and Alexander) and one sister to resettle in County Donegal, Ireland.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **unique coat** and **distinct layer** interchangeable (i.e., having the same meaning)?

Pair 391

P1: It is a large and elaborately styled Romanesque structure, built out of brick with limestone trim. It has a basically rectangular plan, with a gabled roof along its length crowned by a tall tower at the front. A cross gable projects to both sides at the **back end** of the nave, with a smaller projection at the narthex. There are entrances on the sides of this latter projection and in the center of the main facade, each set in a round-arch opening with rounded windows above.

P2: It is a large and elaborately styled Romanesque structure, built out of brick with limestone trim. It has a basically rectangular plan, with a gabled roof along its length crowned by a tall tower at the front. A cross gable projects to both sides at the **reverse tip** of the nave, with a smaller projection at the narthex. There are entrances on the sides of this latter projection and in the center of the main facade, each set in a round-arch opening with rounded windows above.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **back end** and **reverse tip** interchangeable (i.e., having the same meaning)?

Pair 392

P1: Number. Researches have found that compliance increases as the number of people in the group increases; however, once the group reaches 4 or 5 people, compliance is less likely to occur. After this point, each **additional person** has

less of an influencing effect. However, adding more members to a small group (e.g., 3 to 4 people) has a greater effect than adding more members to a larger group (e.g., 53 to 54 people) (Aronson).

P2: Number. Researches have found that compliance increases as the number of people in the group increases; however, once the group reaches 4 or 5 people, compliance is less likely to occur. After this point, each extra body has less of an influencing effect. However, adding more members to a small group (e.g., 3 to 4 people) has a greater effect than adding more members to a larger group (e.g., 53 to 54 people) (Aronson).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **additional person** and **extra body** interchangeable (i.e., having the same meaning)?

Pair 393

P1: Those beginning "a" before an old substantive word can be equally seen as adverbial modifiers (or nouns/pronouns), intuitively expected to be later (see below). Archaic and poetic usage. Phrases with postpositive adjectives are sometimes used with **archaic effect**, as in "things forgotten", "words unspoken", "dreams believed". Phrases which reverse the normal word order are quite common in poetry, usually to fit the meter or rhyme, as with "fiddlers three" (from "Old King Cole") or "forest primeval" (from "Evangeline"), though word order was less important in Early Modern English and earlier forms of English.

P2: Those beginning "a" before an old substantive word can be equally seen as adverbial modifiers (or nouns/pronouns), intuitively expected to be later (see below). Archaic and poetic usage. Phrases with postpositive adjectives are sometimes used with **bygone influence**, as in "things forgotten", "words unspoken", "dreams believed". Phrases which reverse the normal word order are quite common in poetry, usually to fit the meter or rhyme, as with "fiddlers three" (from "Old King Cole") or "forest primeval" (from "Evangeline"), though word order was less important in Early Modern English and earlier forms of English.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **archaic effect** and **bygone influence** interchangeable (i.e., having the same meaning)?

Pair 394

P1: It won the Golden Hugo Award at the Chicago Film Festival. "Canaan" (2007), Haghghi's second writing collaboration with Farhadi, was based on "Post and Beam", a short story by the Nobel prize-winning Canadian author Alice Munro. It marked a departure for Haghghi away from absurdist dark comedy toward a more straightforward narrative of **domestic conflict**. The film won the audience prize in the International section of Tehran's Fajr Film Festival.

P2: It won the Golden Hugo Award at the Chicago Film Festival. "Canaan" (2007), Haghghi's second writing collaboration with Farhadi, was based on "Post and Beam", a short story by the Nobel prize-winning Canadian author Alice Munro. It marked a departure for Haghghi away from absurdist dark comedy toward a more straightforward narrative of **hoe dispute**. The film won the audience prize in the International section of Tehran's Fajr Film Festival.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **domestic conflict** and **hoe dispute** interchangeable (i.e., having the same meaning)?

Pair 395

P1: There are reports that 15 cargo ships are linked to al-Qaeda. Disease. Bad health is a very real problem, especially from **domestic conflict** that displaces refugees across borders. HIV is the most obvious, especially in Africa, but it is not the only major concern.

P2: There are reports that 15 cargo ships are linked to al-Qaeda. Disease. Bad health is a very real problem, especially from **national hostility** that displaces refugees across borders. HIV is the most obvious, especially in Africa, but it is not the only major concern.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **domestic conflict** and **national hostility** interchangeable (i.e., having the same meaning)?

Pair 396

P1: There is also a playground area, the Nils Holgersson's adventure park for children. The park was part of the Interreg North Sea Project CUPIDO (Culture Power: Inspire to Develop Rural Areas) from 2019 to 2020. **The CUPIDO project develops new business opportunities in the cultural and heritage sector around the North Sea.** They produced short films about Värmland's cultural environments and explain why they are of national interest, one of which is Rottneros Park.

P2: There is also a playground area, the Nils Holgersson's adventure park for children. The park was part of the Interreg North Sea Project CUPIDO (Culture Power: Inspire to Develop Rural Areas) from 2019 to 2020. **The CUPIDO project develops extra enterprise scope in the cultural and heritage sector around the North Sea.** They produced short films about Värmland's cultural environments and explain why they are of national interest, one of which is Rottneros Park.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **new business opportunities** and **extra enterprise scope** interchangeable (i.e., having the same meaning)?

Pair 397

P1: Camp Fannin was a U.S. Army Infantry Replacement Training Center and prisoner-of-war camp located near Tyler, Texas. It was opened in May 1943 and operated for four years, before closing in 1946. **It is credited with training over 200,000 U.S. soldiers, sometimes as many as 40,000 at one given time.** Originally planned as a U.S. Army Air Corps station, Camp Fannin was constructed in the spring of 1943, the camp was named for Col. James Walker Fannin, a Texas Revolutionary War hero, who died at Goliad.

P2: Camp Fannin was a U.S. Army Infantry Replacement Training Center and prisoner-of-war camp located near Tyler, Texas. It was opened in May 1943 and operated for four years, before closing in 1946. **It is credited with training over 200,000 U.S. soldiers, sometimes as many as 40,000 at solitary specific occasion.** Originally planned as a U.S. Army Air Corps station, Camp Fannin was constructed in the spring of 1943, the camp was named for Col. James Walker Fannin, a Texas Revolutionary War hero, who died at Goliad.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one given time** and **solitary specific occasion** interchangeable (i.e., having the same meaning)?

Pair 398

P1: He alone completed the same job as three or four people. Of these gangs, "Marçal de Farrera" is one of those mentioned by name. **It is said that he was to wage the towns of La Coma de Burg, carrying a long piece of scythe.** When after the wages, some curious men asked him if it was true that he did Minairons work, he replied: "Do you know who my Minairons are?"

P2: He alone completed the same job as three or four people. Of these gangs, "Marçal de Farrera" is one of those mentioned by name. **It is said that he was to wage the towns of La Coma de Burg, carrying a big portion of scythe.** When after the wages, some curious men asked him if it was true that he did Minairons work, he replied: "Do you know who my Minairons are?"

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **long piece** and **big portion** interchangeable (i.e., having the same meaning)?

Pair 399

P1: Krogh model is a scientific model in the area mass transfer explaining concentration of molecular oxygen through a cylindrical capillary tube as a function of a changing position over the capillary tube's length. It was first conceptualized by August Krogh in 1919 to describe oxygen supply in living tissues, particularly the one occurring in human blood vessels. Its applicability has been extended to various academic fields, and has been successful explaining drug diffusion, water transport, and ice formation in tissues.

P2: Krogh model is a scientific model in the area mass transfer explaining concentration of molecular oxygen through a cylindrical capillary tube as a function of a changing position over the capillary tube's length. It was first conceptualized by August Krogh in 1919 to describe oxygen supply in living tissues, especially sole occurring in human blood vessels. Its applicability has been extended to various academic fields, and has been successful explaining drug diffusion, water transport, and ice formation in tissues.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are particularly the one and especially sole interchangeable (i.e., having the same meaning)?

Pair 400

P1: The Pepsi Cool Cans are a series of promotional cola cans produced in 1990 with four different designs, as part of a PepsiCo advertising campaign. The designs passed into folklore, particularly the one titled Neon, due to the belief that the word "SEX" was hidden in that design. History.

P2: The Pepsi Cool Cans are a series of promotional cola cans produced in 1990 with four different designs, as part of a PepsiCo advertising campaign. The designs passed into folklore, specifically singular titled Neon, due to the belief that the word "SEX" was hidden in that design. History.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are particularly the one and specifically singular interchangeable (i.e., having the same meaning)?

Pair 401

P1: Personnel. In mid-December 2013, Michael Allshouse moved up from assistant to commissioner of the IFL, replacing Robert Loving who is now the league's chief financial officer. For 2014, Mike McCoy serves as the Director of business development and Tom Falcinelli returns as the Director of Officiating. Expansion.

P2: Personnel. In mid-December 2013, Michael Allshouse moved up from assistant to commissioner of the IFL, replacing Robert Loving who is now the league's chief financial officer. For 2014, Mike McCoy serves as the Director of industry growth and Tom Falcinelli returns as the Director of Officiating. Expansion.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are business development and industry growth interchangeable (i.e., having the same meaning)?

Pair 402

P1: Tina Arena, the Sydney Children's Choir and the Melbourne Symphony Orchestra performed "The Flame", while showing archive footage of some highlights of the torch relay on the large screens, then cutting to live footage outside the stadium of Australian Olympic Gold Medalist Herb Elliott with the torch. Then, celebrating 100 years of women's participation in the Olympics, former Australian women Olympic champions and medalists: Betty Cuthbert and Raelene Boyle, Dawn Fraser, Shirley Strickland de la Hunty, Shane Gould and Debbie Flintoff-King brought the torch through the

stadium, before handing it over to Cathy Freeman. Freeman then climbed a long set of stairs towards a **circular pool of water**. She walked into the middle of the water and ignited the cauldron around her feet in a ring of fire.

P2: Tina Arena, the Sydney Children's Choir and the Melbourne Symphony Orchestra performed "The Flame", while showing archive footage of some highlights of the torch relay on the large screens, then cutting to live footage outside the stadium of Australian Olympic Gold Medalist Herb Elliott with the torch. Then, celebrating 100 years of women's participation in the Olympics, former Australian women Olympic champions and medalists: Betty Cuthbert and Raelene Boyle, Dawn Fraser, Shirley Strickland de la Hunty, Shane Gould and Debbie Flintoff-King brought the torch through the stadium, before handing it over to Cathy Freeman. Freeman then climbed a long set of stairs towards a **round puddle of water**. She walked into the middle of the water and ignited the cauldron around her feet in a ring of fire.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **circular pool** and **round puddle** interchangeable (i.e., having the same meaning)?

Pair 403

P1: The grounds were laid out from about 1715 by Thomas Archer. During the 19th century and early 20th century the grounds were simplified and new features were added to the gardens. The park includes a **circular pool** surrounded by yew hedging and topiary shapes. There is a Ha ha towards the south.

P2: The grounds were laid out from about 1715 by Thomas Archer. During the 19th century and early 20th century the grounds were simplified and new features were added to the gardens. The park includes a **spherical pond** surrounded by yew hedging and topiary shapes. There is a Ha ha towards the south.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **circular pool** and **spherical pond** interchangeable (i.e., having the same meaning)?

Pair 404

P1: In 1995, the Nanzan Institute for Religion and Culture published "Rude Awakenings. Zen, the Kyoto School, and the question of nationalism", which "examines the relationship between Japanese nationalism and intellectuals in the Kyoto school and the world of Zen." It places the development of the Kyoto school, and its **alleged support** for the Japanese militarism, in the larger context of the Meiji-restoration. Robert H. Sharf contributed to this volume, as a sequel to his "The Zen of Japanese Nationalism", in which he extensively investigates the support of the Zen-institutions for the Imperial State, and the backgrounds of this support.

P2: In 1995, the Nanzan Institute for Religion and Culture published "Rude Awakenings. Zen, the Kyoto School, and the question of nationalism", which "examines the relationship between Japanese nationalism and intellectuals in the Kyoto school and the world of Zen." It places the development of the Kyoto school, and its **affirmed advocate** for the Japanese militarism, in the larger context of the Meiji-restoration. Robert H. Sharf contributed to this volume, as a sequel to his "The Zen of Japanese Nationalism", in which he extensively investigates the support of the Zen-institutions for the Imperial State, and the backgrounds of this support.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **alleged support** and **affirmed advocate** interchangeable (i.e., having the same meaning)?

Pair 405

P1: An alternative perspective on the topic of cloud security is that this is but another, although quite broad, case of "applied security" and that similar security principles that apply in shared multi-user mainframe security models apply with cloud security. The relative security of cloud computing services is a contentious issue that may be delaying its adoption. **physical control** of the Private Cloud equipment is more secure than having the equipment off site and under someone else's control. Physical control and the ability to visually inspect data links and access ports is required in order

to ensure data links are not compromised.

P2: An alternative perspective on the topic of cloud security is that this is but another, although quite broad, case of "applied security" and that similar security principles that apply in shared multi-user mainframe security models apply with cloud security. The relative security of cloud computing services is a contentious issue that may be delaying its adoption. **substantial command** of the Private Cloud equipment is more secure than having the equipment off site and under someone else's control. Physical control and the ability to visually inspect data links and access ports is required in order to ensure data links are not compromised.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **physical control** and **substantial command** interchangeable (i.e., having the same meaning)?

Pair 406

P1: Course. Designed by Robert Trent Jones Jr., University Ridge opened in 1991 and is home to the University of Wisconsin men's and women's golf teams. The , par-72 course features an **open front** nine and a more forested back nine. It hosted the NCAA women's championships in 1998 as well as multiple Big Ten Conference championships.

P2: Course. Designed by Robert Trent Jones Jr., University Ridge opened in 1991 and is home to the University of Wisconsin men's and women's golf teams. The , par-72 course features an **unclosed foremost** nine and a more forested back nine. It hosted the NCAA women's championships in 1998 as well as multiple Big Ten Conference championships.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **open front** and **unclosed foremost** interchangeable (i.e., having the same meaning)?

Pair 407

P1: 1460–62. He brought together his last resistance force between 1460 and 1462. In an **open front**, Mehmet II ordered movements into Albania to engage a group of Arianiti's warriors. He then surrounded Gjergj Arianiti by moving through the valley of Furka all the way through Shushicë.

P2: 1460–62. He brought together his last resistance force between 1460 and 1462. In an **exposed lead**, Mehmet II ordered movements into Albania to engage a group of Arianiti's warriors. He then surrounded Gjergj Arianiti by moving through the valley of Furka all the way through Shushicë.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **open front** and **exposed lead** interchangeable (i.e., having the same meaning)?

Pair 408

P1: It is applied onto the healthy claw (one side of the cloven hoof) with glue and allowed to set. The cowslip will raise the damaged claw off the ground and allow it to heal. The cowslip will slough in about 4–6 weeks and this is a **principal advantage** over a nail-on shoe which needs to be actively removed. Cowslips need to be applied to a clean claw.

P2: It is applied onto the healthy claw (one side of the cloven hoof) with glue and allowed to set. The cowslip will raise the damaged claw off the ground and allow it to heal. The cowslip will slough in about 4–6 weeks and this is a **general benefit** over a nail-on shoe which needs to be actively removed. Cowslips need to be applied to a clean claw.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **principal advantage** and **general benefit** interchangeable (i.e., having the same meaning)?

Pair 409

P1: They did not believe the church practices of baptism and confession were necessary for salvation. They considered praying to saints and honouring of their images to be a form of idolatry. Oaths, fasting and prayers for the dead were thought to have no scriptural basis. They had a poor opinion of the trappings of the Catholic Church, including holy bread, holy water, bells, organs, and church buildings.

P2: They did not believe the church practices of baptism and confession were necessary for salvation. They considered praying to saints and honouring of their images to be a form of idolatry. Oaths, fasting and prayers for the dead were thought to have no written foundation. They had a poor opinion of the trappings of the Catholic Church, including holy bread, holy water, bells, organs, and church buildings.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are scriptural basis and written foundation interchangeable (i.e., having the same meaning)?

Pair 410

P1: Transformers built to ANSI standards usually do not have the vector group shown on their nameplate and instead a vector diagram is given to show the relationship between the primary and other windings. Removing harmonics: Dy connection – D winding nullifies 3rd harmonics, preventing it to be reflected on Wye side. Parallel operations: All the transformers should have same phase rotation, vector group, tap setting & polarity of the winding. Ground fault Relay: A Dd transformer does not have neutral.

P2: Transformers built to ANSI standards usually do not have the vector group shown on their nameplate and instead a vector diagram is given to show the relationship between the primary and other windings. Removing harmonics: Dy connection – D winding nullifies 3rd harmonics, preventing it to be reflected on Wye side. Parallel operations: All the transformers should have same phase rotation, bearing cluster, tap setting & polarity of the winding. Ground fault Relay: A Dd transformer does not have neutral.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are vector group and bearing cluster interchangeable (i.e., having the same meaning)?

Pair 411

P1: It has invested in more than 30 real estate projects as of March 31, 2019. New Valley owns 100 percent of Douglas Elliman Realty, LLC, the largest residential real estate brokerage firm in the New York metropolitan area and fourth-largest residential brokerage firm in the U.S. Other investments. vector group also owns a portions of Ladenburg Thalmann Financial Services Inc. and of Castle Brands Inc. Office locations. Vector Group and New Valley's headquarters are in Miami, Florida and they have an additional office in New York, New York.

P2: It has invested in more than 30 real estate projects as of March 31, 2019. New Valley owns 100 percent of Douglas Elliman Realty, LLC, the largest residential real estate brokerage firm in the New York metropolitan area and fourth-largest residential brokerage firm in the U.S. Other investments. course organization also owns a portions of Ladenburg Thalmann Financial Services Inc. and of Castle Brands Inc. Office locations. Vector Group and New Valley's headquarters are in Miami, Florida and they have an additional office in New York, New York.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are vector group and course organization interchangeable (i.e., having the same meaning)?

Pair 412

P1: Transformers connected in parallel must have the same vector group; mismatching phase angles will result in circulating current and other system disturbances. Symbol designation. The **vector group** provides a simple way of indicating how the connections of a transformer are arranged. In the system adopted by the IEC, the vector group is indicated by a code consisting of two or three letters, followed by one or two numeric digits.

P2: Transformers connected in parallel must have the same vector group; mismatching phase angles will result in circulating current and other system disturbances. Symbol designation. The **bearing category** provides a simple way of indicating how the connections of a transformer are arranged. In the system adopted by the IEC, the vector group is indicated by a code consisting of two or three letters, followed by one or two numeric digits.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **vector group** and **bearing category** interchangeable (i.e., having the same meaning)?

Pair 413

P1: The project examined the impressionistic landscape through photography, research and play within the gardens. Wilson criticized the work for being “presumably about the aggressive intrusions of the media preventing us from thinking... further deadening our poor brains”. Wilson finds “**pure beauty** overall to be “noisy and Mason’s piece the “**loudest boom box in the show**. In 1993 Mason was included in a group project called Tattoo Collection for the gallery Air de Paris, for which artists designed tattoos that needn’t be implemented upon a human body, raising the question whether it was the drawing or the executed tattoo that is the artwork.

P2: The project examined the impressionistic landscape through photography, research and play within the gardens. Wilson criticized the work for being “presumably about the aggressive intrusions of the media preventing us from thinking... further deadening our poor brains”. Wilson finds “**flawless grace** overall to be “noisy and Mason’s piece the “**loudest boom box in the show**. In 1993 Mason was included in a group project called Tattoo Collection for the gallery Air de Paris, for which artists designed tattoos that needn’t be implemented upon a human body, raising the question whether it was the drawing or the executed tattoo that is the artwork.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **pure beauty** and **flawless grace** interchangeable (i.e., having the same meaning)?

Pair 414

P1: Some optional extras offered may include fishing tackle. Boat liveries may also be required or optionally provide watercraft classes or training. The livery often will sell sunscreen, sunglasses, clothing, water bottles, **live bait**, maps and books as supplemental income. Equipment.

P2: Some optional extras offered may include fishing tackle. Boat liveries may also be required or optionally provide watercraft classes or training. The livery often will sell sunscreen, sunglasses, clothing, water bottles, **existing snare**, maps and books as supplemental income. Equipment.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **live bait** and **existing snare** interchangeable (i.e., having the same meaning)?

Pair 415

P1: Environmental factors. In the field of genetics, any factor which is non-genetic is considered an “environmental influence”. However, **environmental influence** does not automatically imply that the social environment influences or contributes to the development of sexual orientation. There is a vast non-social environment that is non-genetic yet still biological, such as prenatal development, that likely helps shape sexual orientation.

P2: Environmental factors. In the field of genetics, any factor which is non-genetic is considered an “environmental influence”. However, **habitat effect** does not automatically imply that the social environment influences or contributes to the development of sexual orientation. There is a vast non-social environment that is non-genetic yet still biological,

such as prenatal development, that likely helps shape sexual orientation.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **environmental influence** and **habitat effect** interchangeable (i.e., having the same meaning)?

Pair 416

P1: Conventional panels are used less frequently in large buildings than in the past, but are not uncommon on smaller projects such as small schools, stores, restaurants, and apartments. A conventional fire alarm control panel employs one or more circuits, connected to initiating devices (usually smoke detectors, heat detectors, duct detectors, manual pull stations, and sometimes flame detectors) wired in parallel. **These sensors are devised to dramatically decrease the circuit resistance when the environmental influence on any sensor exceeds a predetermined threshold.** In a conventional fire alarm system, the information density is limited to the number of such circuits used.

P2: Conventional panels are used less frequently in large buildings than in the past, but are not uncommon on smaller projects such as small schools, stores, restaurants, and apartments. A conventional fire alarm control panel employs one or more circuits, connected to initiating devices (usually smoke detectors, heat detectors, duct detectors, manual pull stations, and sometimes flame detectors) wired in parallel. **These sensors are devised to dramatically decrease the circuit resistance when the atmospheric pull on any sensor exceeds a predetermined threshold.** In a conventional fire alarm system, the information density is limited to the number of such circuits used.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **environmental influence** and **atmospheric pull** interchangeable (i.e., having the same meaning)?

Pair 417

P1: I do not expect to live, so I may as well die hungering and thirsting for Christ." Christos was then sentenced to be beheaded for apostasy for refusing to follow through with his alleged conversion to Islam. **In order to have money to provide a memorial service, Kristo asked Dapontes to sell a metal file he had.** Christos was beheaded on February 12, 1748.

P2: I do not expect to live, so I may as well die hungering and thirsting for Christ." Christos was then sentenced to be beheaded for apostasy for refusing to follow through with his alleged conversion to Islam. **In order to have money to provide a memorial service, Kristo asked Dapontes to sell a mineral tool he had.** Christos was beheaded on February 12, 1748.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **metal file** and **mineral tool** interchangeable (i.e., having the same meaning)?

Pair 418

P1: It is not easy to determine if steel has undergone the hardening and tempering process by simply looking at it, but there is a reliable and simple test. To examine a piece of steel, obtain a hand file and file an edge of the selected metal. **If the piece of steel has not undergone the hardening process, the metal file should easily 'bite' into the sample.** If the metal has been hardened, the file fails to cut into the sample and glances off with little visible effect.

P2: It is not easy to determine if steel has undergone the hardening and tempering process by simply looking at it, but there is a reliable and simple test. To examine a piece of steel, obtain a hand file and file an edge of the selected metal. **If the piece of steel has not undergone the hardening process, the steel instrument should easily 'bite' into the sample.** If the metal has been hardened, the file fails to cut into the sample and glances off with little visible effect.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **metal file** and **steel instrument** interchangeable (i.e., having the same meaning)?

Pair 419

P1: The most admired agency for efficiency was the United States Food Administration under Herbert Hoover. It launched a massive campaign to teach Americans to economize on their food budgets and grow victory gardens in their backyards for family consumption. **It managed the nation's food distribution and prices and built Hoover's reputation as an independent force of presidential quality.** Finance.

P2: The most admired agency for efficiency was the United States Food Administration under Herbert Hoover. It launched a massive campaign to teach Americans to economize on their food budgets and grow victory gardens in their backyards for family consumption. **It managed the nation's food distribution and prices and built Hoover's reputation as an absolute influence of presidential quality.** Finance.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **independent force** and **absolute influence** interchangeable (i.e., having the same meaning)?

Pair 420

P1: The address generator supplied read and write addresses to a real time video memory, which can be thought of as evolution into the most flexible form of gating the address bits together to produce the video. While the video frame buffer is now present in every computer's graphics card, it has not carried forward a number of features of the early video synths. **The address generator counts in a fixed rectangular pattern from the upper left hand corner of the screen, across each line, to the bottom.** This discarded a whole technology of modifying the image by variations in the read and write addressing sequence provided by the hardware address generators as the image passed through the memory.

P2: The address generator supplied read and write addresses to a real time video memory, which can be thought of as evolution into the most flexible form of gating the address bits together to produce the video. While the video frame buffer is now present in every computer's graphics card, it has not carried forward a number of features of the early video synths. **The address generator counts in a fixed rectangular pattern from the high left angle of the screen, across each line, to the bottom.** This discarded a whole technology of modifying the image by variations in the read and write addressing sequence provided by the hardware address generators as the image passed through the memory.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **upper left hand corner** and **high left angle** interchangeable (i.e., having the same meaning)?

Pair 421

P1: Player C decides to "raise all-in", betting their remaining stake. The bet is now \$10 to Player A, who calls. **Player A is the only player at the table with a remaining stake; they may not make any further bets this hand.** Because Player B can only win \$10 from each of the other two players' \$30 bets, that \$10 is taken from all players' bets and the \$30 total is placed in the main pot.

P2: Player C decides to "raise all-in", betting their remaining stake. The bet is now \$10 to Player A, who calls. **Player A is the only player at the table with a leftover bet; they may not make any further bets this hand.** Because Player B can only win \$10 from each of the other two players' \$30 bets, that \$10 is taken from all players' bets and the \$30 total is placed in the main pot.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **remaining stake** and **leftover bet** interchangeable (i.e., having the same meaning)?

Pair 422

P1: HealthOne is a part of HCA Healthcare HealthONE was established when P/SL Healthcare bought AMI's Colorado assets in 1991. That entity merged with Swedish Hospital to become P/SL Swedish, and the HealthONE name was adopted in late 1993; it was purchased from a health care system in Minnesota, which had used the moniker until merging with another company in 1992. From 1995 to 2011, it was co-owned by HCA and the Colorado Health Foundation; HCA bought the remaining stake for \$1.45 billion in 2011. It is providing the covid vaccine in Colorado.

P2: HealthOne is a part of HCA Healthcare HealthONE was established when P/SL Healthcare bought AMI's Colorado assets in 1991. That entity merged with Swedish Hospital to become P/SL Swedish, and the HealthONE name was adopted in late 1993; it was purchased from a health care system in Minnesota, which had used the moniker until merging with another company in 1992. From 1995 to 2011, it was co-owned by HCA and the Colorado Health Foundation; HCA bought the surviving interest for \$1.45 billion in 2011. It is providing the covid vaccine in Colorado.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are remaining stake and surviving interest interchangeable (i.e., having the same meaning)?

Pair 423

P1: Recreational disciplines include cross-country skiing and Telemark skiing. Olympic events are competitive cross-country skiing, ski jumping, biathlon and Nordic combined—competition in which athletes both cross-country ski and ski jump. The FIS Nordic World Ski Championships host these sports, plus Telemark skiing, at the championship level in the winter of every odd-numbered year. Biathlon combines cross-country skiing and rifle shooting, but is not included as a Nordic discipline under the rules of the International Ski Federation (FIS).

P2: Recreational disciplines include cross-country skiing and Telemark skiing. Olympic events are competitive cross-country skiing, ski jumping, biathlon and Nordic combined—competition in which athletes both cross-country ski and ski jump. The FIS Nordic World Ski Championships host these sports, plus Telemark skiing, at the championship level in the winter of occasional twelve months. Biathlon combines cross-country skiing and rifle shooting, but is not included as a Nordic discipline under the rules of the International Ski Federation (FIS).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are every odd-numbered year and occasional twelve months interchangeable (i.e., having the same meaning)?

Pair 424

P1: Board presidents. The president of the Board of Supervisors presides over all board meetings and appoints members to board committees, among other duties. Board presidents are elected by their colleagues at the beginning of every odd-numbered year, or when a vacancy arises in the office. From 1983 to 2001, the city charter specified that the president would be the highest vote-getter in the previous election, taking the power of electing the board president away from the supervisors themselves, except in the case of a vacancy in the post.

P2: Board presidents. The president of the Board of Supervisors presides over all board meetings and appoints members to board committees, among other duties. Board presidents are elected by their colleagues at the beginning of irregular annual, or when a vacancy arises in the office. From 1983 to 2001, the city charter specified that the president would be the highest vote-getter in the previous election, taking the power of electing the board president away from the supervisors themselves, except in the case of a vacancy in the post.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are every odd-numbered year and irregular annual interchangeable (i.e., having the same meaning)?

Pair 425

P1: The Chief of the Bureau of Supplies and Accounts, in forwarding the request, requested that the number of storehouses be increased from 20 to 36 to accommodate aviation supply storage urgently needed on the West Coast. Preliminary site survey and soil investigation was authorized June 9, 1944. The island was flat, and **foundation experience on nearby structures indicated new buildings could be erected without pile support.** Moreover, the presence of sandy soil assured easy earth moving.

P2: The Chief of the Bureau of Supplies and Accounts, in forwarding the request, requested that the number of storehouses be increased from 20 to 36 to accommodate aviation supply storage urgently needed on the West Coast. Preliminary site survey and soil investigation was authorized June 9, 1944. The island was flat, and **substructure evidence on nearby structures indicated new buildings could be erected without pile support.** Moreover, the presence of sandy soil assured easy earth moving.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **foundation experience** and **substructure evidence** interchangeable (i.e., having the same meaning)?

Pair 426

P1: On the same day, the old constitution of the kingdom came back into force, and the Cortes reconvened to prepare a new text. The change of constitution faced several obstacles, mainly from Spain and from supporters of the queen. **Portugal's biggest problems at this time, however, related to the independence of Brazil, which had been the country's largest source of wealth.** The loss of Brazil had a great negative impact on the Portuguese economy.

P2: On the same day, the old constitution of the kingdom came back into force, and the Cortes reconvened to prepare a new text. The change of constitution faced several obstacles, mainly from Spain and from supporters of the queen. **Portugal's biggest problems at this time, however, related to the independence of Brazil, which had been the states' biggest procurement of wealth.** The loss of Brazil had a great negative impact on the Portuguese economy.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **country's largest source** and **states' biggest procurement** interchangeable (i.e., having the same meaning)?

Pair 427

P1: While the legality of piggybacking tradelines seems to remain ambiguous, there is a potential clear violation of federal law, if for example, a piggybacking company takes up front fees from their clients. Section 404 of the Credit Repair Organizations Act (CROA), states: Although the Federal Law appears to be clear, some States, including Florida, have enacted similar and stricter laws, requiring the use of Trust accounts for client funds and a suretybond of \$10,000.00 or more. **While this is indeed much stricter, it appears to allow for up front fees if the company is bonded and uses a trust account.** For example, Section 817.7005, Florida Statutes states, in relevant part: Piggybacking risks.

P2: While the legality of piggybacking tradelines seems to remain ambiguous, there is a potential clear violation of federal law, if for example, a piggybacking company takes up front fees from their clients. Section 404 of the Credit Repair Organizations Act (CROA), states: Although the Federal Law appears to be clear, some States, including Florida, have enacted similar and stricter laws, requiring the use of Trust accounts for client funds and a suretybond of \$10,000.00 or more. **While this is indeed much stricter, it appears to allow for up front fees if the company is bonded and uses a protected bill.** For example, Section 817.7005, Florida Statutes states, in relevant part: Piggybacking risks.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **trust account** and **protected bill** interchangeable (i.e., having the same meaning)?

Pair 428

P1: In 1921, Alice W. Nelson started a trust with the Portland Trust & Savings Bank after her husband died, and one investment in the trust was a loan to the owners of the Admiral Apartments. During the Great Depression, income in Nelson's trust account declined due in part to the trustee's (the bank) difficulty in collecting the mortgage payments from the owner of the apartments, which were also sold at a loss by the owners. Nelson sued the bank, claiming they mismanaged her trust account, but she lost the trial and on appeal to the Oregon Supreme Court. By the 1970s, the building was a flophouse.

P2: In 1921, Alice W. Nelson started a trust with the Portland Trust & Savings Bank after her husband died, and one investment in the trust was a loan to the owners of the Admiral Apartments. During the Great Depression, income in Nelson's trust account declined due in part to the trustee's (the bank) difficulty in collecting the mortgage payments from the owner of the apartments, which were also sold at a loss by the owners. Nelson sued the bank, claiming they mismanaged her custodian tally, but she lost the trial and on appeal to the Oregon Supreme Court. By the 1970s, the building was a flophouse.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are trust account and custodian tally interchangeable (i.e., having the same meaning)?

Pair 429

P1: However, when the police arrived to the scene, they were told by the tenants of the apartment that it was only a tickle fight. Sports. There has been a recorded case where playful tickle fight occurred at a sports event. "Anthrozooism".

P2: However, when the police arrived to the scene, they were told by the tenants of the apartment that it was only a tickle fight. Sports. There has been a registered situation where playful tickle fight occurred at a sports event. "Anthrozooism".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are recorded case and registered situation interchangeable (i.e., having the same meaning)?

Pair 430

P1: In Harare the A3 Highway starts as Samora Machel Avenue (east), () while the A5 Highway that runs from Harare to Bulawayo also begins as Samora Machel Avenue (west). Those in and around Harare like to call it Mutare Road, while those in Mutare call it Harare Road. In actual fact the R5 Highway which is the A3 Highway is a continuation of the R2 Highway to form the Plumtree-Bulawayo-Harare-Mutare Highway. Operations.

P2: In Harare the A3 Highway starts as Samora Machel Avenue (east), () while the A5 Highway that runs from Harare to Bulawayo also begins as Samora Machel Avenue (west). Those in and around Harare like to call it Mutare Road, while those in Mutare call it Harare Road. In confirmed truth the R5 Highway which is the A3 Highway is a continuation of the R2 Highway to form the Plumtree-Bulawayo-Harare-Mutare Highway. Operations.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are actual fact and confirmed truth interchangeable (i.e., having the same meaning)?

Pair 431

P1: Portuguese is the sixth most spoken language in the world. Many Lusophones have advocated for greater recognition of their language, which is widely spoken across five continents: Portugal in Europe; Brazil (the largest lusophone nation) in South America; Angola, Mozambique, Cape Verde, Guinea-Bissau, Equatorial Guinea, São Tomé and Príncipe in Africa; Timor-Leste and Macau in Asia. Portuguese is even still spoken by a few thousand people in the former Portuguese colonies of Goa and Daman and Diu in India. It is an official language in ten countries.

P2: Portuguese is the sixth most spoken language in the world. Many Lusophones have advocated for greater recognition of their language, which is widely spoken across five continents: Portugal in Europe; Brazil (the largest lusophone nation) in South America; Angola, Mozambique, Cape Verde, Guinea-Bissau, Equatorial Guinea, São Tomé and Príncipe in Africa; Timor-Leste and Macau in Asia. Portuguese is even still spoken by a few cardinal individuals in the former Portuguese colonies of Goa and Daman and Diu in India. It is an official language in ten countries.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are thousand people and cardinal individuals interchangeable (i.e., having the same meaning)?

Pair 432

P1: It is here that Nikephoros is named for the first time in the sources: his father sent him to David III of Tao to secure military aid, and to confront the loyalist general Gregory Taronites, who had landed in the Phokades' rear at Trebizond and had raised an army of Armenians in the eastern provinces. Nikephoros secured 1,000 Georgian soldiers from David and defeated Taronites, but soon after that news reached him of the death of his father at the Battle of Abydos on 13 April 989. Bardas Phokas' demise led to the immediate collapse of the rebellion: the Georgians returned to their country, and Nikephoros' troops dispersed to their homes. Nikephoros fled to the fortress of Tyropoion, where his mother resided and where the imprisoned Bardas Skleros was held.

P2: It is here that Nikephoros is named for the first time in the sources: his father sent him to David III of Tao to secure military aid, and to confront the loyalist general Gregory Taronites, who had landed in the Phokades' rear at Trebizond and had raised an army of Armenians in the eastern provinces. Nikephoros secured 1,000 Georgian soldiers from David and defeated Taronites, but soon after that news reached him of the death of his father at the Battle of Abydos on 13 April 989. Bardas Phokas' demise led to the prompt fail of the rebellion: the Georgians returned to their country, and Nikephoros' troops dispersed to their homes. Nikephoros fled to the fortress of Tyropoion, where his mother resided and where the imprisoned Bardas Skleros was held.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are immediate collapse and prompt fail interchangeable (i.e., having the same meaning)?

Pair 433

P1: It involved careful investigation and development of the ways that the Korean cuisine was cooked as well as reaching a consensus of how the ingredients were to be kept and stored. Also, the researches would investigate of the ingredients used in the cooking of Korean cuisine to improve the overall taste of Korean cuisine. The last point was to advertise Korean cuisine all over the world with the redevelopment of Korean cuisine. It involves advertising through different channels as well as an official network for contributing of the information to the Korean restaurant located overseas.

P2: It involved careful investigation and development of the ways that the Korean cuisine was cooked as well as reaching a consensus of how the ingredients were to be kept and stored. Also, the researches would investigate of the ingredients used in the cooking of Korean cuisine to improve the overall taste of Korean cuisine. The latest aim was to advertise Korean cuisine all over the world with the redevelopment of Korean cuisine. It involves advertising through different channels as well as an official network for contributing of the information to the Korean restaurant located overseas.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are last point and latest aim interchangeable (i.e., having the same meaning)?

Pair 434

P1: Monaghan beat Donegal at their own game using the blanket defence system while Darren Hughes and Conor McManus remained outstanding. It was tight up until the last 10 minutes when Monaghan added some scores to put a gloss on the scoreline. Tommy Freeman one of the greatest servants of Monaghan coming off the bench and firing over the last point. At the end of the game Monaghan had won their first Ulster Senior Football Championship in 25 years.

P2: Monaghan beat Donegal at their own game using the blanket defence system while Darren Hughes and Conor McManus remained outstanding. It was tight up until the last 10 minutes when Monaghan added some scores to put a gloss on the scoreline. **Tommy Freeman one of the greatest servants of Monaghan coming off the bench and firing over the final moment.** At the end of the game Monaghan had won their first Ulster Senior Football Championship in 25 years.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **last point** and **final moment** interchangeable (i.e., having the same meaning)?

Pair 435

P1: Through ASI, the Italian space industry is an active player in human spaceflight activities. The three Shuttle MPLM cargo containers "Leonardo", "Raffaello" and "Donatello", were manufactured at the Cannes Mandelieu Space Center in Turin, Italy by Alcatel Alenia Space, now Thales Alenia Space. **They provide a key function in storing equipment and parts for transfer to the International Space Station.** A number of ISS modules have also been made in Italy.

P2: Through ASI, the Italian space industry is an active player in human spaceflight activities. The three Shuttle MPLM cargo containers "Leonardo", "Raffaello" and "Donatello", were manufactured at the Cannes Mandelieu Space Center in Turin, Italy by Alcatel Alenia Space, now Thales Alenia Space. **They provide a main job in storing equipment and parts for transfer to the International Space Station.** A number of ISS modules have also been made in Italy.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **key function** and **main job** interchangeable (i.e., having the same meaning)?

Pair 436

P1: Financial sanctions were the West's first response to Russia's annexation of Crimea and continued bellicosity toward the rest of Ukraine, A Treasury official bragged that Treasury is "at the center of our national security," but sanctions have their detractors, such as Daniel Drezner. "Fifteen years ago, the idea that the Treasury Department would be at the center of our national security would have been inconceivable," Assistant Secretary for the Treasury Department Daniel Glaser said in a 2014 interview. **"But we have developed a whole new set of tools to put at the president's disposal."** An in-depth Bloomberg report on Russian prospects and European tax-havens indicated that Putin associates might be in financial difficulty; however on 5 May 2014, the Russian taxpayer provided funds to start a domestic online card payment service.

P2: Financial sanctions were the West's first response to Russia's annexation of Crimea and continued bellicosity toward the rest of Ukraine, A Treasury official bragged that Treasury is "at the center of our national security," but sanctions have their detractors, such as Daniel Drezner. "Fifteen years ago, the idea that the Treasury Department would be at the center of our national security would have been inconceivable," Assistant Secretary for the Treasury Department Daniel Glaser said in a 2014 interview. **"But we have developed a completely different group of tools to put at the president's disposal."** An in-depth Bloomberg report on Russian prospects and European tax-havens indicated that Putin associates might be in financial difficulty; however on 5 May 2014, the Russian taxpayer provided funds to start a domestic online card payment service.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **whole new set** and **completely different group** interchangeable (i.e., having the same meaning)?

Pair 437

P1: And since broadcasting replacements is not time critical, if a cache is not required to process the replacement right away, there is no downside. On the other hand, if a cache does not process an update right away, it may lead to out-of-order updates. **In such cases a three state update protocol, like the Firefly protocol, may have performance advantages.** Comparisons.

P2: And since broadcasting replacements is not time critical, if a cache is not required to process the replacement right away, there is no downside. On the other hand, if a cache does not process an update right away, it may lead to out-of-order updates. In such cases a three state update protocol, like the Firefly protocol, may have work assistance. Comparisons.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are performance advantages and work assistance interchangeable (i.e., having the same meaning)?

Pair 438

P1: and there is no standard beam to compare for the Strehl ratio. Therefore, these definitions must always be specified before a number is given and it presents much difficulty when trying to compare lasers. There is also no simple conversion between M2, power-in-the-bucket, and Strehl ratio. The Strehl ratio, for example, has been defined as the ratio of the peak focal intensities in the aberrated and ideal point spread functions.

P2: and there is no standard beam to compare for the Strehl ratio. Therefore, these definitions must always be specified before a number is given and it presents much difficulty when trying to compare lasers. There is also no plain change between M2, power-in-the-bucket, and Strehl ratio. The Strehl ratio, for example, has been defined as the ratio of the peak focal intensities in the aberrated and ideal point spread functions.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are simple conversion and plain change interchangeable (i.e., having the same meaning)?

Pair 439

P1: Changes to the New Zealand side were: Jason Nightingale in for Sam Perrett on the right wing; Steve Matai, after serving his one-match suspension, regained his place at right centre from Krisnan Inu; Evarn Tuimivave replaced Nathan Cayless in the front row (with Benji Marshall being named captain); David Fa'alogo was moved from the bench into Setaimata Sa's spot in the second row; Sam Rapira was dropped with David Kidwell and Bronson Harrison added to the bench. England were the first to score after getting repeat sets which took them down close to New Zealand's line where hooker Mickey Higham pushed through the defence from dummy half in the 4th minute. The simple conversion was kicked by Rob Purdham so the score was 6 nil. Less than 4 minutes later England were working the ball out from their own 10-metre line when they decided to pass out wide to their centre Keith Senior, who beat the defence and raced down along the left wing.

P2: Changes to the New Zealand side were: Jason Nightingale in for Sam Perrett on the right wing; Steve Matai, after serving his one-match suspension, regained his place at right centre from Krisnan Inu; Evarn Tuimivave replaced Nathan Cayless in the front row (with Benji Marshall being named captain); David Fa'alogo was moved from the bench into Setaimata Sa's spot in the second row; Sam Rapira was dropped with David Kidwell and Bronson Harrison added to the bench. England were the first to score after getting repeat sets which took them down close to New Zealand's line where hooker Mickey Higham pushed through the defence from dummy half in the 4th minute. The clear transfiguration was kicked by Rob Purdham so the score was 6 nil. Less than 4 minutes later England were working the ball out from their own 10-metre line when they decided to pass out wide to their centre Keith Senior, who beat the defence and raced down along the left wing.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are simple conversion and clear transfiguration interchangeable (i.e., having the same meaning)?

Pair 440

P1: Large modern agricultural sheds are prominent within older farm complexes within this area. The small scale settlement at Ram Hill and Henfield is largely well integrated within the framework of hegerow trees and woodland. The area has a generally tranquil character, although the presence of stables and fences associated with the increase in

land use change to "horsiculture". modern large farm buildings and storage compounds, can detract from this, visually eroding the rural character and resulting in removal or fragmentation of hedgerows.

P2: Large modern agricultural sheds are prominent within older farm complexes within this area. The small scale settlement at Ram Hill and Henfield is largely well integrated within the framework of hegerow trees and woodland. The area has a generally tranquil character, although the presence of stables and fences associated with the increase in **ground utilize transformation** to "horsiculture". modern large farm buildings and storage compounds, can detract from this, visually eroding the rural character and resulting in removal or fragmentation of hedgerows.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **land use change** and **ground utilize transformation** interchangeable (i.e., having the same meaning)?

Pair 441

P1: In summer 2008, "Fangoria" and all of its related brands were purchased by The Brooklyn Company, Inc., led by longtime Fangoria president Thomas DeFeo. Under DeFeo's ownership, the magazine's brand identity was radically modified in early 2009. The most notable change was a **drastic overhaul** to the magazine's cover format, including the transformation of the company's long-standing logo. Starting with issue #281, the original "Fangoria" logo was re-designed and the trademark "film strip", tagline and additional embedded photos were removed.

P2: In summer 2008, "Fangoria" and all of its related brands were purchased by The Brooklyn Company, Inc., led by longtime Fangoria president Thomas DeFeo. Under DeFeo's ownership, the magazine's brand identity was radically modified in early 2009. The most notable change was a **strong inspection** to the magazine's cover format, including the transformation of the company's long-standing logo. Starting with issue #281, the original "Fangoria" logo was re-designed and the trademark "film strip", tagline and additional embedded photos were removed.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **drastic overhaul** and **strong inspection** interchangeable (i.e., having the same meaning)?

Pair 442

P1: Judges must take an examination and two different examinations are given: one exam is for judges trained in Thailand and a different examination is given for judges who graduate from foreign law schools. All judges are formally appointed by the king. The Asian Human Rights Commission called the Thai legal system a "mess" and called for a **drastic overhaul** of Thailand's criminal procedures. It cited the rampant use of forced confessions, and the fact that even a senior justice ministry official admitted that 30% of cases went to court with no evidence.

P2: Judges must take an examination and two different examinations are given: one exam is for judges trained in Thailand and a different examination is given for judges who graduate from foreign law schools. All judges are formally appointed by the king. The Asian Human Rights Commission called the Thai legal system a "mess" and called for a **dire re-examination** of Thailand's criminal procedures. It cited the rampant use of forced confessions, and the fact that even a senior justice ministry official admitted that 30% of cases went to court with no evidence.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **drastic overhaul** and **dire re-examination** interchangeable (i.e., having the same meaning)?

Pair 443

P1: These programs can be completed at Colleges and Universities in either an in-class or online format. Some Colleges, such as George Brown College, offer an online PLC Technician program that uses simulation software, PLCLogix, to complete PLC lab projects and assignments. Certification by accredited schools and **third party organizations** can enhance employment opportunities and keep PLC technicians current and up-to-date. In addition to Colleges and Uni-

versities, other organizations and companies also offer credential programs in PLCs, including equipment manufacturers such as Rockwell and professional associations, such as the Electronics Technicians Association, Robotics Industries Association and the Manufacturing Skill Standards Council.

P2: These programs can be completed at Colleges and Universities in either an in-class or online format. Some Colleges, such as George Brown College, offer an online PLC Technician program that uses simulation software, PLCLogix, to complete PLC lab projects and assignments. **Certification by accredited schools and adjudicator administration can enhance employment opportunities and keep PLC technicians current and up-to-date.** In addition to Colleges and Universities, other organizations and companies also offer credential programs in PLCs, including equipment manufacturers such as Rockwell and professional associations, such as the Electronics Technicians Association, Robotics Industries Association and the Manufacturing Skill Standards Council.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **third party organizations** and **adjudicator administration** interchangeable (i.e., having the same meaning)?

Pair 444

P1: Plot outline. After loud-mouthed Fran Fine is jilted by Danny, her husband-to-be and boss, she makes money by selling cosmetics door-to-door. **one door** happens to belong to Maxwell Sheffield, a Broadway producer who happens to need a nanny for his three children. Fran jumps at the chance.

P2: Plot outline. After loud-mouthed Fran Fine is jilted by Danny, her husband-to-be and boss, she makes money by selling cosmetics door-to-door. **particular entry** happens to belong to Maxwell Sheffield, a Broadway producer who happens to need a nanny for his three children. Fran jumps at the chance.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one door** and **particular entry** interchangeable (i.e., having the same meaning)?

Pair 445

P1: The remainder of stations in the Via Rail network have low platforms to above the rail. GO Transit regional trains have a floor height of above the top of rail, and GO Transit plans to raise platforms to provide level boarding at that height. **Currently, platforms are above the top of rail, with a raised "mini-platform" which provides level boarding from one door of the train.** Exo commuter trains have level boarding with platforms , , or above the top of rail at Montreal Central, Côte-de-Liesse, Repentigny, Terrebonne, and Mascouche stations.

P2: The remainder of stations in the Via Rail network have low platforms to above the rail. GO Transit regional trains have a floor height of above the top of rail, and GO Transit plans to raise platforms to provide level boarding at that height. **Currently, platforms are above the top of rail, with a raised "mini-platform" which provides level boarding from single exit of the train.** Exo commuter trains have level boarding with platforms , , or above the top of rail at Montreal Central, Côte-de-Liesse, Repentigny, Terrebonne, and Mascouche stations.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one door** and **single exit** interchangeable (i.e., having the same meaning)?

Pair 446

P1: DNA crosslinks generally cause loss of overlapping sequence information from the two strands of DNA. Therefore, accurate repair of the damage depends on retrieving the lost information from an undamaged homologous chromosome in the same cell. **Retrieval can occur by pairing with a sister chromatid produced during a preceding round of replication.** In a diploid cell retrieval may also occur by pairing with a non-sister homologous chromosome, as occurs especially during meiosis.

P2: DNA crosslinks generally cause loss of overlapping sequence information from the two strands of DNA. Therefore, accurate repair of the damage depends on retrieving the lost information from an undamaged homologous chromosome in the same cell. Retrieval can occur by pairing with a sister chromatid produced during a former sequence of replication. In a diploid cell retrieval may also occur by pairing with a non-sister homologous chromosome, as occurs especially during meiosis.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are preceding round and former sequence interchangeable (i.e., having the same meaning)?

Pair 447

P1: Curiously, the leafy plants that grow against the wall, known as Echium, are native to North Africa and are known to grow on only the extreme south-west tip of Cornwall and nowhere else in the UK. Woodland. This was formerly the estate's dumping ground, and significant history has been pieced together from the materials recovered from the woodland. Several archaeological digs have been conducted, revealing 200 years' worth of bottles, porcelain, masonry and iron artefacts stacked on top of each other.

P2: Curiously, the leafy plants that grow against the wall, known as Echium, are native to North Africa and are known to grow on only the extreme south-west tip of Cornwall and nowhere else in the UK. Woodland. This was formerly the estate's dumping ground, and important account has been pieced together from the materials recovered from the woodland. Several archaeological digs have been conducted, revealing 200 years' worth of bottles, porcelain, masonry and iron artefacts stacked on top of each other.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are significant history and important account interchangeable (i.e., having the same meaning)?

Pair 448

P1: These different districts with different administrations constituted the officially recognized extent of London as a whole. In 1665, he revised his estimate to "not above 460,000". Other contemporaries put the figure higher (the French Ambassador, for example, suggested 600,000), but with no mathematical basis to support their estimates. The next largest city in the kingdom was Norwich, with a population of 30,000.

P2: These different districts with different administrations constituted the officially recognized extent of London as a whole. In 1665, he revised his estimate to "not above 460,000". Other contemporaries put the figure higher (the French Ambassador, for example, suggested 600,000), but with no numerical system to support their estimates. The next largest city in the kingdom was Norwich, with a population of 30,000.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are mathematical basis and numerical system interchangeable (i.e., having the same meaning)?

Pair 449

P1: In other words, the directors and board members don't directly impact the future performance of the fund. Real active management, then, is when every manager and director has a vested interest in the success of the fund. Private equity is often real active management since a privately owned company usually has just one owner that make strategy decisions at the board level. Industry.

P2: In other words, the directors and board members don't directly impact the future performance of the fund. Real active management, then, is when every manager and director has a vested interest in the success of the fund. Private equity is often real active management since a privately owned company usually has just distinct master that make

strategy decisions at the board level. Industry.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one owner** and **distinct master** interchangeable (i.e., having the same meaning)?

Pair 450

P1: Because of that approach to its employees the company is facing many accusations. One of the first cases was already closed by The Romanian supreme court in 2019 with a verdict that Wizz Air discriminated against its workers. Other cases blaming Wizz Air for a **similar attitude** against its employees are still open in Ukraine and other countries. Recently the Norwegian Prime minister has supported the boycott of Wizz Air when the company announced it will start domestic operations over the country.

P2: Because of that approach to its employees the company is facing many accusations. One of the first cases was already closed by The Romanian supreme court in 2019 with a verdict that Wizz Air discriminated against its workers. Other cases blaming Wizz Air for a **corresponding view** against its employees are still open in Ukraine and other countries. Recently the Norwegian Prime minister has supported the boycott of Wizz Air when the company announced it will start domestic operations over the country.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **similar attitude** and **corresponding view** interchangeable (i.e., having the same meaning)?

Pair 451

P1: The title 'Director of Ceremonies' is used in the United Grand Lodge of England and its subordinate lodges, as well as in many other jurisdictions. However, other titles found in other jurisdictions include 'Lecturer' and 'Ritualist'. Whatever the title, this officer is responsible for the **smooth flowing** of ceremonial and ritual and may hold rehearsals. He may be responsible for prompting other officers who forget their lines.

P2: The title 'Director of Ceremonies' is used in the United Grand Lodge of England and its subordinate lodges, as well as in many other jurisdictions. However, other titles found in other jurisdictions include 'Lecturer' and 'Ritualist'. Whatever the title, this officer is responsible for the **calm smooth** of ceremonial and ritual and may hold rehearsals. He may be responsible for prompting other officers who forget their lines.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **smooth flowing** and **calm smooth** interchangeable (i.e., having the same meaning)?

Pair 452

P1: Workers were able to acquire goods which had previously been beyond their reach, such as heaters, refrigerators, and television sets. As further noted by Ricardo Israel Zipper, "By now meat was no longer a luxury, and the children of working people were adequately supplied with shoes and clothing. The popular living standards were improved in terms of the employment situation, social services, **consumption levels**, and income distribution." Chilean presidents were allowed a maximum term of six years, which may explain Allende's haste to restructure the economy.

P2: Workers were able to acquire goods which had previously been beyond their reach, such as heaters, refrigerators, and television sets. As further noted by Ricardo Israel Zipper, "By now meat was no longer a luxury, and the children of working people were adequately supplied with shoes and clothing. The popular living standards were improved in terms of the employment situation, social services, **expenditure position**, and income distribution." Chilean presidents were allowed a maximum term of six years, which may explain Allende's haste to restructure the economy.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **consumption levels** and **expenditure position** interchangeable (i.e., having the same meaning)?

Pair 453

P1: Lesser known than Lingard's historical works is his anonymously published translation of the Four Gospels in 1836. The title page reads simply that the work is "by a Catholic." Lingard departed from usual Catholic practice by using early Greek manuscripts rather than the Latin Vulgate as the **principal basis** for the translation. This resulted in such renderings as "repent" rather than "do penance" (Matt 3:2).

P2: Lesser known than Lingard's historical works is his anonymously published translation of the Four Gospels in 1836. The title page reads simply that the work is "by a Catholic." Lingard departed from usual Catholic practice by using early Greek manuscripts rather than the Latin Vulgate as the **belief foundation** for the translation. This resulted in such renderings as "repent" rather than "do penance" (Matt 3:2).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **principal basis** and **belief foundation** interchangeable (i.e., having the same meaning)?

Pair 454

P1: The company can give up equity by issuing stock or can promise to pay regular interest and repay the principal on the loan (bonds or bank loans). Fixed-income securities also trade differently than equities. Whereas equities, such as common stock, trade on exchanges or other established trading venues, many fixed-income securities trade over-the-counter on a **principal basis**. The term "fixed" in "fixed income" refers to both the schedule of obligatory payments and the amount.

P2: The company can give up equity by issuing stock or can promise to pay regular interest and repay the principal on the loan (bonds or bank loans). Fixed-income securities also trade differently than equities. Whereas equities, such as common stock, trade on exchanges or other established trading venues, many fixed-income securities trade over-the-counter on a **main occurrence**. The term "fixed" in "fixed income" refers to both the schedule of obligatory payments and the amount.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **principal basis** and **main occurrence** interchangeable (i.e., having the same meaning)?

Pair 455

P1: The Dublin West by-election of the same day returned Ruth Coppinger to Dáil Éireann, giving Dublin West two Socialist Party TDs. Paul Murphy was unsuccessful in retaining the Socialist Party's European seat at this time but was elected to Dáil Éireann that October after a surprise victory in the Dublin South-West by-election, which the Sinn Féin candidate had been favourite to win. The party altered its registered name in 2014 to Stop the **water tax** Socialist Party. In 2015, water charge protestors, including party elected representatives Paul Murphy, Kieran Mahon and Mick Murphy, were arrested.

P2: The Dublin West by-election of the same day returned Ruth Coppinger to Dáil Éireann, giving Dublin West two Socialist Party TDs. Paul Murphy was unsuccessful in retaining the Socialist Party's European seat at this time but was elected to Dáil Éireann that October after a surprise victory in the Dublin South-West by-election, which the Sinn Féin candidate had been favourite to win. The party altered its registered name in 2014 to Stop the **aqua duty** Socialist Party. In 2015, water charge protestors, including party elected representatives Paul Murphy, Kieran Mahon and Mick Murphy, were arrested.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **water tax** and **aqua duty** interchangeable (i.e., having the same meaning)?

Pair 456

P1: Skips are also used for various cleaning-out jobs that need much material to be taken away, and at factories producing large quantities of scrap metal. The material in the skip may be taken to a landfill, recycled or recovered/disposed of in some other way. There are wide range of uses of skip bins including construction building, home renovations, handyman maintenance or repair projects, garden or green clean up. Skip hire companies typically print 'level fill' on the sides of skips to instruct users that the contents should not fill or have contents showing above the height of the sides of the skip.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are home renovations and domestic refurbishment interchangeable (i.e., having the same meaning)?

Pair 457

P1: Because of the contribution of the Flemish exiles to this transformation, the exodus is sometimes described as "creating a new Antwerp". Flanders and Brabant, due to these events, went into a period of relative decline from the time of the Thirty Years War. In the Northern Netherlands however, the mass emigration from Flanders and Brabant became an important driving force behind the Dutch Golden Age. 1581–1795: The Southern Netherlands.

P2: Because of the contribution of the Flemish exiles to this transformation, the exodus is sometimes described as "creating a new Antwerp". Flanders and Brabant, due to these events, went into a period of relative decline from the time of the Thirty Years War. In the Northern Netherlands however, the mass emigration from Flanders and Brabant became an operating power of significance behind the Dutch Golden Age. 1581–1795: The Southern Netherlands.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are important driving force and operating power of significance interchangeable (i.e., having the same meaning)?

Pair 458

P1: Around these penetrating vessels, paravascular spaces take the form of Virchow-Robin spaces. Where the Virchow-Robin spaces terminate within the brain parenchyma, paravascular CSF can continue traveling along the basement membranes surrounding arterial vascular smooth muscle, to reach the basal lamina surrounding brain capillaries. CSF movement along these paravascular pathways is rapid and arterial pulsation has long been suspected as an important driving force for paravascular fluid movement. In a study published in 2013, J. Iliff and colleagues demonstrated this directly.

P2: Around these penetrating vessels, paravascular spaces take the form of Virchow-Robin spaces. Where the Virchow-Robin spaces terminate within the brain parenchyma, paravascular CSF can continue traveling along the basement membranes surrounding arterial vascular smooth muscle, to reach the basal lamina surrounding brain capillaries. CSF movement along these paravascular pathways is rapid and arterial pulsation has long been suspected as an impactful moving intensity for paravascular fluid movement. In a study published in 2013, J. Iliff and colleagues demonstrated this directly.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are important driving force and impactful moving intensity interchangeable (i.e., having the same meaning)?

Pair 459

P1: Morningside School is a coeducational contributing primary (years 1-6) school with a roll of students as of Christian Renewal School is a composite state integrated co-educational secondary and primary (years 1–13) school with a roll of students as of Around 110 of those students are in high school (years 9–13), as of June 2018. The school was established in 1993 and integrated into the state system in 1997. **The secondary half of the school is situated upstairs, and the primary downstairs.** The school operates in the Christian Renewal buildings, beside the Renew Church work buildings and auditorium.

P2: Morningside School is a coeducational contributing primary (years 1-6) school with a roll of students as of Christian Renewal School is a composite state integrated co-educational secondary and primary (years 1–13) school with a roll of students as of Around 110 of those students are in high school (years 9–13), as of June 2018. The school was established in 1993 and integrated into the state system in 1997. **The junior part of the school is situated upstairs, and the primary downstairs.** The school operates in the Christian Renewal buildings, beside the Renew Church work buildings and auditorium.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **secondary half** and **junior part** interchangeable (i.e., having the same meaning)?

Pair 460

P1: I would prefer something in-between, rather than one of these two extremes". Still interested in academic programs, Zhou traveled to Britain in January 1921 to visit Edinburgh University. **Concerned by financial problems and language requirements,** he did not enroll, returning to France at the end of January. There are no records of Zhou entering any academic program in France.

P2: I would prefer something in-between, rather than one of these two extremes". Still interested in academic programs, Zhou traveled to Britain in January 1921 to visit Edinburgh University. **Concerned by financial problems and speech stipulation,** he did not enroll, returning to France at the end of January. There are no records of Zhou entering any academic program in France.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **language requirements** and **speech stipulation** interchangeable (i.e., having the same meaning)?

Pair 461

P1: Graphical language structures designed to display select portions of the textual language can then be developed. Alternatively, graphical language structures may evolve prior to, or in parallel with, the development of the textual language. **The sequence of these activities largely depends on the degree of understanding of the language requirements held among language developers.** These may become clear only after several iterations of both graphical and textual language design.

P2: Graphical language structures designed to display select portions of the textual language can then be developed. Alternatively, graphical language structures may evolve prior to, or in parallel with, the development of the textual language. **The sequence of these activities largely depends on the degree of understanding of the community necessity held among language developers.** These may become clear only after several iterations of both graphical and textual language design.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **language requirements** and **community necessity** interchangeable (i.e., having the same meaning)?

Pair 462

P1: After the provisional presidency of Ramón Báez, Jimenes was elected in October, and soon faced new demands, including the appointment of an American director of public works and financial advisor and the creation of a new military force commanded by U.S. officers. The Dominican Congress rejected these demands and began impeachment proceedings against Jimenes. **The United States occupied Haiti in July 1915, with the implicit threat that the Dominican Republic might be next.** Jimenes's Minister of War Desiderio Arias staged a coup d'état in April 1916, providing a pretext for the United States to occupy the Dominican Republic.

P2: After the provisional presidency of Ramón Báez, Jimenes was elected in October, and soon faced new demands, including the appointment of an American director of public works and financial advisor and the creation of a new military force commanded by U.S. officers. The Dominican Congress rejected these demands and began impeachment proceedings against Jimenes. **The United States occupied Haiti in July 1915, with the inherent warning that the Dominican Republic might be next.** Jimenes's Minister of War Desiderio Arias staged a coup d'état in April 1916, providing a pretext for the United States to occupy the Dominican Republic.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **implicit threat** and **inherent warning** interchangeable (i.e., having the same meaning)?

Pair 463

P1: Nearly a month after the General Election, on 12 June, another four BN component parties, the United Bumiputera Heritage Party (PBB), the Sarawak People's Party (PRS), the Sarawak United People's Party (SUPP) and the Progressive Democratic Party (PDP) announced their withdrawal from Barisan Nasional and the formation of a new Sarawak-based coalition, the Gabungan Parti Sarawak (GPS). The four parties altogether has 19 seats in the Dewan Rakyat and 72 seats in the 82-seat Sarawak State Legislative Assembly, thus decreasing Barisan's seat tally even further. **Two weeks later, on 24 June, the Malaysian People's Movement Party (Gerakan) became the latest party to leave Barisan Nasional.** The election resulted in a mass defection of UMNO MPs from the party, mostly becoming independents, some eventually changing their alliance and joining PH.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **normal number** and **usual figure** interchangeable (i.e., having the same meaning)?

Pair 469

P1: At the end of the 1970s, the band split up and he started a solo career. His first solo album, "Firelight", went platinum and he won several awards and released the single "Something for the Children" at Christmas time in 1986, with all funds given to charity. **Cray campaigned for several issues, including saving the rainforests, ending **world debt** and banning animal testing.** His tireless work for charity earned him a knighthood in 1990.

P2: At the end of the 1970s, the band split up and he started a solo career. His first solo album, "Firelight", went platinum and he won several awards and released the single "Something for the Children" at Christmas time in 1986, with all funds given to charity. **Cray campaigned for several issues, including saving the rainforests, ending **earth commitment** and banning animal testing.** His tireless work for charity earned him a knighthood in 1990.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **world debt** and **earth commitment** interchangeable (i.e., having the same meaning)?

Pair 470

P1: With 3:15 left in the third quarter, William & Mary quarterback Tom Rozantz broke loose and ran for the end zone. Jim Johnson, a former head coach for the ECU football team, who was described by "The Virginian Pilot" as "a portly 65-year-old gentleman in a raincoat", ran from the sidelines and threw a block tackle on Rozantz before he could score the winning touchdown. **The **unusual turn** of events silenced the screaming William & Mary fans, and the officials gathered to discuss their course of action.** After deliberation, the play was ruled a touchdown and William & Mary went on to win, 21–17.

P2: With 3:15 left in the third quarter, William & Mary quarterback Tom Rozantz broke loose and ran for the end zone. Jim Johnson, a former head coach for the ECU football team, who was described by "The Virginian Pilot" as "a portly 65-year-old gentleman in a raincoat", ran from the sidelines and threw a block tackle on Rozantz before he could score the winning touchdown. **The **strange rotation** of events silenced the screaming William & Mary fans, and the officials gathered to discuss their course of action.** After deliberation, the play was ruled a touchdown and William & Mary went on to win, 21–17.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **unusual turn** and **strange rotation** interchangeable (i.e., having the same meaning)?

Pair 471

P1: After successfully completing high school, he entered the university Law Faculty in Palermo in 1971, and graduated in 1975. Between 1977 and 1978 he serviced as vice-director in the Register Office in Agrigento. **In 1978, after being among the top percentage in the Judiciary audit, he got a position as magistrate at the court at Caltanissetta.** In 1979 he became "sostituto procuratore" (deputy prosecutor) in the Agrigento court, a position he kept until 1989, when he was appointed assistant judge ("giudice a latere").

P2: After successfully completing high school, he entered the university Law Faculty in Palermo in 1971, and graduated in 1975. Between 1977 and 1978 he serviced as vice-director in the Register Office in Agrigento. **In 1978, after being among the peak part in the Judiciary audit, he got a position as magistrate at the court at Caltanissetta.** In 1979 he became "sostituto procuratore" (deputy prosecutor) in the Agrigento court, a position he kept until 1989, when he was appointed assistant judge ("giudice a latere").

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **top percentage** and **peak part** interchangeable (i.e., having the same meaning)?

Pair 472

P1: Its path was from the Danube riverbank through the city to the Austrian state railway station. It was supposed to be connected to the Bratislava – Trnava wagonway, belonging to the King's Hungarian state railways. **In the 1990s, traffic jams became a routine occurrence in Bratislava, affecting public transport vehicles which became stuck at places like Patrónka or Prístavný most.** A major contributing factor was the lack of a ring road, which today consists of parts of the D1 and D2 motorways in Bratislava.

P2: Its path was from the Danube riverbank through the city to the Austrian state railway station. It was supposed to be connected to the Bratislava – Trnava wagonway, belonging to the King's Hungarian state railways. **In the 1990s, traffic jams became a custom happening in Bratislava, affecting public transport vehicles which became stuck at places like Patrónka or Prístavný most.** A major contributing factor was the lack of a ring road, which today consists of parts of the D1 and D2 motorways in Bratislava.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **routine occurrence** and **custom happening** interchangeable (i.e., having the same meaning)?

Pair 473

P1: Books he illustrated included in "Sidonie", "Totou in Bondage" and "Tranquilinas Paradise". He was born in Tacoma, Washington studied art at the University of Washington. **During World War I, served in France with the anatomical unit in the Army's Sanitary Corps.** He later studied art at L'Ecole des Beaux Arts in France.

P2: Books he illustrated included in "Sidonie", "Totou in Bondage" and "Tranquilinas Paradise". He was born in Tacoma, Washington studied art at the University of Washington. **During World War I, served in France with the dissection section in the Army's Sanitary Corps.** He later studied art at L'Ecole des Beaux Arts in France.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **anatomical unit** and **dissection section** interchangeable (i.e., having the same meaning)?

Pair 474

P1: Seed Sovereignty. Seed sovereignty can be defined as the right “to breed and exchange diverse open-sourced seeds.” It focuses largely on the rights of individuals to be able to save seed, and be independent from major seed companies. Seed sovereignty activists point to seed saving as an **important practice** in building food security, as well as restoring agricultural biodiversity. Activists also draw attention to the cultural importance of seed saving practices, especially their role in maintaining traditional plant varieties.

P2: Seed Sovereignty. Seed sovereignty can be defined as the right “to breed and exchange diverse open-sourced seeds.” It focuses largely on the rights of individuals to be able to save seed, and be independent from major seed companies. Seed sovereignty activists point to seed saving as an **imperative means** in building food security, as well as restoring agricultural biodiversity. Activists also draw attention to the cultural importance of seed saving practices, especially their role in maintaining traditional plant varieties.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **important practice** and **imperative means** interchangeable (i.e., having the same meaning)?

Pair 475

P1: Negotiations between President Justo and Alvear, who was allowed to return from exile, led to the UCR’s lifting of its electoral boycott and to its resurgence by its election in 1936 of Amadeo Sabattini as Governor of Córdoba Province as well as victories in Tucumán Province and in Legislative elections (where despite Justo’s orchestrated fraud, they obtained 56 of 158 seats - one more than the Concordance’s Congressional stand-ins, the National Democrats). The UCR nominated the elder statesman its standard bearer in 1937. A seasoned campaigner, Alvear made a **compelling choice** for his running mate, former Congressman Enrique Mosca. A vocal opponent of the 1930 Coup d’état despite his differences with President Yrigoyen, Mosca spent the next three and a half years in Ushuaia’s notorious prison (now a museum).

P2: Negotiations between President Justo and Alvear, who was allowed to return from exile, led to the UCR’s lifting of its electoral boycott and to its resurgence by its election in 1936 of Amadeo Sabattini as Governor of Córdoba Province as well as victories in Tucumán Province and in Legislative elections (where despite Justo’s orchestrated fraud, they obtained 56 of 158 seats - one more than the Concordance’s Congressional stand-ins, the National Democrats). The UCR nominated the elder statesman its standard bearer in 1937. A seasoned campaigner, Alvear made a **convincing election** for his running mate, former Congressman Enrique Mosca. A vocal opponent of the 1930 Coup d’état despite his differences with President Yrigoyen, Mosca spent the next three and a half years in Ushuaia’s notorious prison (now a museum).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **compelling choice** and **convincing election** interchangeable (i.e., having the same meaning)?

Pair 476

P1: An estimated 58 million total viewers watched all or part of the awards. The telecast also garnered lower Nielsen ratings compared to the previous ceremony with a 23.4 household rating. In addition program scored the lower 18-49 demo rating with a 10.5 rating over **31% share**. It was the lowest viewership for an Academy Awards telecast since the 80th ceremony, held in 2008.

P2: An estimated 58 million total viewers watched all or part of the awards. The telecast also garnered lower Nielsen ratings compared to the previous ceremony with a 23.4 household rating. In addition program scored the lower 18-49 demo rating with a 10.5 rating over **31% quota**. It was the lowest viewership for an Academy Awards telecast since the 80th ceremony, held in 2008.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **31% share** and **31% quota** interchangeable (i.e., having the same meaning)?

Pair 477

P1: If this method is not available, a mouse can be born through cesarean birth, but this comes with a higher risk of contamination. This process uses a non-germ-free mother which is sacrificed and sterilized before the pups' birth. After the **cesarean birth**, the pups must then be transferred to a sterile incubator with a germ-free mother for feeding and growth. These methods are only required for the generation of a germ-free mouse line.

P2: If this method is not available, a mouse can be born through cesarean birth, but this comes with a higher risk of contamination. This process uses a non-germ-free mother which is sacrificed and sterilized before the pups' birth. After the **obstetrical beginning**, the pups must then be transferred to a sterile incubator with a germ-free mother for feeding and growth. These methods are only required for the generation of a germ-free mouse line.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **cesarean birth** and **obstetrical beginning** interchangeable (i.e., having the same meaning)?

Pair 478

P1: The bird does so by first catching the wasp and then beating it on a branch before swallowing it whole. Defense. For the duration of the **activity period** of the colony, most flights that exit the nest are short and unrelated to foraging. However, with a large collection of individuals making these trips at once, a persisting cloud forms.

P2: The bird does so by first catching the wasp and then beating it on a branch before swallowing it whole. Defense. For the duration of the **action phase** of the colony, most flights that exit the nest are short and unrelated to foraging. However, with a large collection of individuals making these trips at once, a persisting cloud forms.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **activity period** and **action phase** interchangeable (i.e., having the same meaning)?

Pair 479

P1: In recent years, these clubs and teams have been recognized as top performers in their fields. Clubs range from academic teams to community groups to the arts. In 2007-08, clubs were moved from **activity period** to after-school, after formal complaints by the BBHS Congress and students. As a result of their moving, new procedures concerning clubs were established.

P2: In recent years, these clubs and teams have been recognized as top performers in their fields. Clubs range from academic teams to community groups to the arts. In 2007-08, clubs were moved from **exercise time** to after-school, after formal complaints by the BBHS Congress and students. As a result of their moving, new procedures concerning clubs were established.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **activity period** and **exercise time** interchangeable (i.e., having the same meaning)?

Pair 480

P1: Its completion spans almost 25 years, across the political changes of the period (from the Prussian occupation to the re-creation of the Polish state). It was created in the spirit of "garden city" spirit from the beginning of the 20th century and refers to eclectic forms. In addition, there are **many form** of modernist villas, which were fashionable in the interwar period. Location.

P2: Its completion spans almost 25 years, across the political changes of the period (from the Prussian occupation to the re-creation of the Polish state). It was created in the spirit of "garden city" spirit from the beginning of the 20th century and refers to eclectic forms. In addition, there are **countless kinds** of modernist villas, which were fashionable in the interwar period. Location.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **many form** and **countless kinds** interchangeable (i.e., having the same meaning)?

Pair 481

P1: This result proves that the theory of the structure Rexp , that is the real ordered field with the exponential function, is model complete. In terms of analytic geometry, the theorem states that any definable set in the above language — in particular the complement of an exponential variety — is in fact a projection of an exponential variety. **An exponential variety** over a field K is the set of points in K^n where a finite collection of exponential polynomials simultaneously vanish. Wilkie's theorem states that if we have any definable set in an L -exp structure $K = (K, +, -, \cdot, 0, 1, "e^x")$, say $X \subseteq K^m$, then there will be an exponential variety in some higher dimension K^n such that the projection of this variety down onto K^m will be precisely X .

P2: This result proves that the theory of the structure Rexp , that is the real ordered field with the exponential function, is model complete. In terms of analytic geometry, the theorem states that any definable set in the above language — in particular the complement of an exponential variety — is in fact a projection of an exponential variety. **An incremental variation** over a field K is the set of points in K^n where a finite collection of exponential polynomials simultaneously vanish. Wilkie's theorem states that if we have any definable set in an L -exp structure $K = (K, +, -, \cdot, 0, 1, "e^x")$, say $X \subseteq K^m$, then there will be an exponential variety in some higher dimension K^n such that the projection of this variety down onto K^m will be precisely X .

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **exponential variety** and **incremental variation** interchangeable (i.e., having the same meaning)?

Pair 482

P1: search, email or social media. TRR is the sum of both viewthrough and clickthrough response that resulted from the display media campaign. **The timeframe from ad exposure to subsequent response** is often referred to as the lookback window or viewthrough timeframe. Typically this is set by the ad server and could be 30 days to as much as 90 days.

P2: search, email or social media. TRR is the sum of both viewthrough and clickthrough response that resulted from the display media campaign. **The timeframe from ad exposure to later reaction** is often referred to as the lookback window or viewthrough timeframe. Typically this is set by the ad server and could be 30 days to as much as 90 days.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **subsequent response** and **later reaction** interchangeable (i.e., having the same meaning)?

Pair 483

P1: From the place Alwaye anyone can access this place by bus. nearest KSRTC bus point is Union Christian college Jn or private bus point is East Kadungalloor Jn. **From this two bus point minimum charge** for Auto of Half KM to walk to Kaniyankunnu. Nearest Railway station is Alwaye or Angamali.

P2: From the place Alwaye anyone can access this place by bus. nearest KSRTC bus point is Union Christian college Jn or private bus point is East Kadungalloor Jn. **From this two bus point the least levy** for Auto of Half KM to walk to Kaniyankunnu. Nearest Railway station is Alwaye or Angamali.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **minimum charge** and **the least levy** interchangeable (i.e., having the same meaning)?

Pair 484

P1: In May 2008, Hauppauge released the HD-PVR, a USB 2.0 device with an on-board H.264 hardware encoder for recording from high-definition sources through component inputs. It is the world's first USB device that can capture in high definition. The HD-PVR has proved to be a very **popular device**, and Hauppauge has been updating its drivers and software continually since its release. In addition to being able to capture from any component video source in 480p, 720p, or 1080i, the HD-PVR comes with an IR blaster that communicates with your cable or satellite set-top box for automated program recordings and channel-changing capabilities.

P2: In May 2008, Hauppauge released the HD-PVR, a USB 2.0 device with an on-board H.264 hardware encoder for recording from high-definition sources through component inputs. It is the world's first USB device that can capture in high definition. The HD-PVR has proved to be a very **favored machine**, and Hauppauge has been updating its drivers and software continually since its release. In addition to being able to capture from any component video source in 480p, 720p, or 1080i, the HD-PVR comes with an IR blaster that communicates with your cable or satellite set-top box for automated program recordings and channel-changing capabilities.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **popular device** and **favored machine** interchangeable (i.e., having the same meaning)?

Pair 485

P1: The Buzic noble family of Bohemia used a boar's head as heraldic device from the 14th century, later (as Zajíc) combined with a hare. Early modern and modern examples. In heraldry of the early modern period, use of a boar's head (rather than the entire animal) became a **popular device**. Siebmachers Wappenbuch (1605) shows a boar in the coat of arms of the Schweinichen noble family.

P2: The Buzic noble family of Bohemia used a boar's head as heraldic device from the 14th century, later (as Zajíc) combined with a hare. Early modern and modern examples. In heraldry of the early modern period, use of a boar's head (rather than the entire animal) became a **liked utensil**. Siebmachers Wappenbuch (1605) shows a boar in the coat of arms of the Schweinichen noble family.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **popular device** and **liked utensil** interchangeable (i.e., having the same meaning)?

Pair 486

P1: Based on Cartman's depicted lifestyle and Liane's assertion that they are "not much poorer than any other family" it is likely that the household makes somewhat more money than Eric believes, and only appear poorer based on Butters's search of tax records because Liane does not report her prostitution income. Cartman will use an awkward pause during a conversation as an opportunity to casually remind Kenny that he hates him. Cartman's mischievous treatment of Butters, and the relationship the duo shares, has received **significant focus** in the more recent seasons of the series. This reflects Parker's interest; the scenes between the two are the ones he most enjoys writing.

P2: Based on Cartman's depicted lifestyle and Liane's assertion that they are "not much poorer than any other family" it is likely that the household makes somewhat more money than Eric believes, and only appear poorer based on Butters's search of tax records because Liane does not report her prostitution income. Cartman will use an awkward pause during a conversation as an opportunity to casually remind Kenny that he hates him. Cartman's mischievous treatment of Butters, and the relationship the duo shares, has received **marked spot light** in the more recent seasons of the series. This reflects Parker's interest; the scenes between the two are the ones he most enjoys writing.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **significant focus** and **marked spot light** interchangeable (i.e., having the same meaning)?

Pair 487

P1: "I think we ought to get out of that 20th-century habit of thinking of systems as mutually exclusive: you're either socialist or you're capitalist, or whatever", Hobsbawm stated in 2009 in regards to the emergence of a new historical system. "There are plenty of people who still think so. I think very few attempts have been made to build a system on the **total assumption** of social ownership and social management. At its peak the Soviet system tried it.

P2: "I think we ought to get out of that 20th-century habit of thinking of systems as mutually exclusive: you're either socialist or you're capitalist, or whatever", Hobsbawm stated in 2009 in regards to the emergence of a new historical system. "There are plenty of people who still think so. I think very few attempts have been made to build a system on the **entire adoption** of social ownership and social management. At its peak the Soviet system tried it.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **total assumption** and **entire adoption** interchangeable (i.e., having the same meaning)?

Pair 488

P1: Work began in 2010 but was halted when an archeological dig revealed a human skeleton, believed to be around 2000 years old. Surveying work and the test digging was completed in 2011, and construction work began in earnest the following summer. In September **2012 work** began on the framework of the building, and it was due to be completed in May 2013. The total budget cost was over £800,000.

P2: Work began in 2010 but was halted when an archeological dig revealed a human skeleton, believed to be around 2000 years old. Surveying work and the test digging was completed in 2011, and construction work began in earnest the following summer. In September **2012 effort** began on the framework of the building, and it was due to be completed in May 2013. The total budget cost was over £800,000.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **2012 work** and **2012 effort** interchangeable (i.e., having the same meaning)?

Pair 489

P1: Parker's career took off in 1918 while she was writing theater criticism for "Vanity Fair," filling in for the vacationing P. G. Wodehouse. At the magazine, she met Robert Benchley, who became a close friend, and Robert E. Sherwood. The trio began lunching at the Algonquin Hotel on a **near-daily basis** and became founding members of what became known as the Algonquin Round Table. The Round Table numbered among its members the newspaper columnists Franklin Pierce Adams and Alexander Woollcott.

P2: Parker's career took off in 1918 while she was writing theater criticism for "Vanity Fair," filling in for the vacationing P. G. Wodehouse. At the magazine, she met Robert Benchley, who became a close friend, and Robert E. Sherwood. The trio began lunching at the Algonquin Hotel on a **regular occurrence** and became founding members of what became known as the Algonquin Round Table. The Round Table numbered among its members the newspaper columnists Franklin Pierce Adams and Alexander Woollcott.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **near-daily basis** and **regular occurrence** interchangeable (i.e., having the same meaning)?

Pair 490

P1: 2020. On 29 May, the first C-class solar flares of Solar Cycle 25 took place, as well as the first M-class flare. Solar activity continued to increase in the following months, especially abruptly in October, with flares taking place on a **near-daily basis** by November. On November 29, an M4.4 flare, the strongest of the cycle to date, took place, possibly

indicating the solar cycle would be more active than initially thought.

P2: 2020. On 29 May, the first C-class solar flares of Solar Cycle 25 took place, as well as the first M-class flare. Solar activity continued to increase in the following months, especially abruptly in October, with flares taking place on a practically every day by November. On November 29, an M4.4 flare, the strongest of the cycle to date, took place, possibly indicating the solar cycle would be more active than initially thought.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **near-daily basis** and **practically every day** interchangeable (i.e., having the same meaning)?

Pair 491

P1: The algorithm now uses the representation formula_11 and becomes $Q \leftarrow 0$ for i from m to 0 do $Q \leftarrow \text{point_double_repeat}(Q, w)$ if $d_i \geq 0$ then $Q \leftarrow \text{point_add}(Q, d_iP)$ # using pre-computed value of d_iP return Q This algorithm has the same complexity as the double-and-add approach with the benefit of using fewer point additions (which in practice are slower than doubling). Typically, the value of "w" is chosen to be fairly small making the pre-computation stage a trivial component of the algorithm. For the NIST recommended curves, formula_12 is usually the **best selection**. The entire complexity for a "n"-bit number is measured as formula_13 point doubles and formula_14 point additions.

P2: The algorithm now uses the representation formula_11 and becomes $Q \leftarrow 0$ for i from m to 0 do $Q \leftarrow \text{point_double_repeat}(Q, w)$ if $d_i \geq 0$ then $Q \leftarrow \text{point_add}(Q, d_iP)$ # using pre-computed value of d_iP return Q This algorithm has the same complexity as the double-and-add approach with the benefit of using fewer point additions (which in practice are slower than doubling). Typically, the value of "w" is chosen to be fairly small making the pre-computation stage a trivial component of the algorithm. For the NIST recommended curves, formula_12 is usually the **favorite pick**. The entire complexity for a "n"-bit number is measured as formula_13 point doubles and formula_14 point additions.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **best selection** and **favorite pick** interchangeable (i.e., having the same meaning)?

Pair 492

P1: In 2003, Wada released his first original album, "All of My Mind", which included many of his previous works. He also collaborated in Michihiko Ōta's self-cover album "Mirai e no Message: Ōta Michihiko Self-Cover", featuring in two tracks – a cover version of "Hontō no Tsuyosa" () (Ken & Wormmon's Theme) and in "3 Primary Colors" (the "Tamers" theme), along with AiM. Later, he released an album called "The **best selection**: Welcome Back!". It contains several of his earlier works as well as two new songs, titled "Pierce" and "Kimi no Keshiki."

P2: In 2003, Wada released his first original album, "All of My Mind", which included many of his previous works. He also collaborated in Michihiko Ōta's self-cover album "Mirai e no Message: Ōta Michihiko Self-Cover", featuring in two tracks – a cover version of "Hontō no Tsuyosa" () (Ken & Wormmon's Theme) and in "3 Primary Colors" (the "Tamers" theme), along with AiM. Later, he released an album called "The **choice option**: Welcome Back!". It contains several of his earlier works as well as two new songs, titled "Pierce" and "Kimi no Keshiki."

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **best selection** and **choice option** interchangeable (i.e., having the same meaning)?

Pair 493

P1:)-saltbush ("Atriplex" spp.) washes. Scaled Quail made **little or no use** of sparse cholla-grassland, riparian areas, reseeded grasslands, or shortgrass prairie disclimax. Timing of major life events.

P2:)-saltbush ("Atriplex" spp.) washes. Scaled Quail made **almost or no utilization** of sparse cholla-grassland, riparian areas, reseeded grasslands, or shortgrass prairie disclimax. Timing of major life events.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **little or no use** and **almost or no utilization** interchangeable (i.e., having the same meaning)?

Pair 494

P1: The current president of Haiti rides in his Toyota Land Cruiser GXL 5-door wagon (VDJ76), escorted by a motorcade consisting of Nissan Patrol Y61s donated from UN. Hong Kong. **The official vehicle of the chief executive of Hong Kong bears no license plate but the Emblem of Hong Kong.** This follows the practice of the British governor, as the representative of the British Crown, the laws of Hong Kong did not apply, including the need for a number plate on the car.

P2: The current president of Haiti rides in his Toyota Land Cruiser GXL 5-door wagon (VDJ76), escorted by a motorcade consisting of Nissan Patrol Y61s donated from UN. Hong Kong. **The formal tool of the chief executive of Hong Kong bears no license plate but the Emblem of Hong Kong.** This follows the practice of the British governor, as the representative of the British Crown, the laws of Hong Kong did not apply, including the need for a number plate on the car.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **official vehicle** and **formal tool** interchangeable (i.e., having the same meaning)?

Pair 495

P1: This article is concerned with written usage. To form a key designation, locate the note name in the pitch translation table and add the major/minor qualifier from the lower table as needed. **Note that the 'major' alteration is usually superfluous, as a key description missing an alteration is invariably assumed to be major.** In the German notation scheme, a hyphen is added between the pitch and the alteration ("D-Dur").

P2: This article is concerned with written usage. To form a key designation, locate the note name in the pitch translation table and add the major/minor qualifier from the lower table as needed. **Note that the 'major' alteration is usually superfluous, as a crucial characterization missing an alteration is invariably assumed to be major.** In the German notation scheme, a hyphen is added between the pitch and the alteration ("D-Dur").

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **key description** and **crucial characterization** interchangeable (i.e., having the same meaning)?

Pair 496

P1: If tablets, pagers, or devices are given out to patients to read and collect a variety of data, a good practice may be to collect minimal data such as name, date of birth, and picture to provide accountability, then assign the asset to the person so it can be tracked. Another added benefit to many newer tablets is the ability to go into lockdown mode, even going as far as capturing GPS info, then reporting that when a connection is available. **These systems provide an affordable way to protect your investment if theft is still a concern.** Patient Acceptance – many organizations feel that elderly or those uncomfortable with technology may will have a difficult time using electronic patient check-in.

P2: If tablets, pagers, or devices are given out to patients to read and collect a variety of data, a good practice may be to collect minimal data such as name, date of birth, and picture to provide accountability, then assign the asset to the person so it can be tracked. Another added benefit to many newer tablets is the ability to go into lockdown mode, even going as far as capturing GPS info, then reporting that when a connection is available. **These systems provide an economic option to protect your investment if theft is still a concern.** Patient Acceptance – many organizations feel that elderly or those uncomfortable with technology may will have a difficult time using electronic patient check-in.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **affordable way** and **economic option** interchangeable (i.e., having the same meaning)?

Pair 497

P1: He would later work under a mask as "Hijo de Superzán" ("Son of Superzan") as well. Asistencia Asesoría y Administración (1992–1995). In 1992 Antonio Peña founded Asistencia Asesoría y Administración, later known simply as AAA, with the **express intention** to feature young, high flying wrestlers. Peña signed Carcía to a contract and then together they created the ring character García would be best known under, Super Caló, named after the Mexican Rock band Caló.

P2: He would later work under a mask as "Hijo de Superzán" ("Son of Superzan") as well. Asistencia Asesoría y Administración (1992–1995). In 1992 Antonio Peña founded Asistencia Asesoría y Administración, later known simply as AAA, with the **clear objective** to feature young, high flying wrestlers. Peña signed Carcía to a contract and then together they created the ring character García would be best known under, Super Caló, named after the Mexican Rock band Caló.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **express intention** and **clear objective** interchangeable (i.e., having the same meaning)?

Pair 498

P1: There are different types of herbicides that are used to control different types of weeds, they fall into two different categories. Soil applied herbicides combat germinating seedlings, and some offer control of newly established plants. **uniform application** over the soil followed by moisture are required for soil applied herbicides to work effectively. Foilar-active herbicides control weed growth of already established, actively growing plants.

P2: There are different types of herbicides that are used to control different types of weeds, they fall into two different categories. Soil applied herbicides combat germinating seedlings, and some offer control of newly established plants. **systematic operation** over the soil followed by moisture are required for soil applied herbicides to work effectively. Foilar-active herbicides control weed growth of already established, actively growing plants.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **uniform application** and **systematic operation** interchangeable (i.e., having the same meaning)?

Pair 499

P1: Ivan Savvidis era (2012–present). On 10 August 2012, Ivan Savvidis acquired PAOK ownership by depositing a fee of €9,951,000 and thus becoming the major shareholder of the club. In 2012–13 season, under manager Giorgos Donis, PAOK finished 2nd during the **regular period**, qualifying for the Super League playoffs (pos. 2–5).

P2: Ivan Savvidis era (2012–present). On 10 August 2012, Ivan Savvidis acquired PAOK ownership by depositing a fee of €9,951,000 and thus becoming the major shareholder of the club. In 2012–13 season, under manager Giorgos Donis, PAOK finished 2nd during the **ordinary duration**, qualifying for the Super League playoffs (pos. 2–5).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **regular period** and **ordinary duration** interchangeable (i.e., having the same meaning)?

Pair 500

P1: Later that year the City of Grapevine expressed interest to FWWR owner William Davis in owning and operating the Tarantula train. After receiving an offer, the purchase was complete around 2005. The city named their **new operation** the Grapevine Vintage Railroad (GVRR) with FRA reporting mark: GVRX. Grapevine operated the train under trackage

agreements with FWWR.

P2: Later that year the City of Grapevine expressed interest to FWWR owner William Davis in owning and operating the Tarantula train. After receiving an offer, the purchase was complete around 2005. The city named their late enterprise the Grapevine Vintage Railroad (GVRR) with FRA reporting mark: GVRX. Grapevine operated the train under trackage agreements with FWWR.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are new operation and late enterprise interchangeable (i.e., having the same meaning)?

Pair 501

P1: In June 2015, Southfield-based developer Redico LLC, in partnership with HFZ Capital Group of New York City and others purchased the Fisher Building and adjacent Albert Kahn Building, plus 2,000 parking spaces in two parking structures and three surface lots in New Center for \$12.2 million at auction. Redico said the partnership plans to transition the two connected buildings into what it called a "true urban" mixed-use development, with a mix of office, retail, residential and entertainment uses. The multi-year project has a potential cost of \$70 million to \$80 million in addition to the purchase price. In June 2018, A joint venture between Northern Equities, and Lutz Real Estate bought the Albert Kahn building for \$9.5 million from The Platform.

P2: In June 2015, Southfield-based developer Redico LLC, in partnership with HFZ Capital Group of New York City and others purchased the Fisher Building and adjacent Albert Kahn Building, plus 2,000 parking spaces in two parking structures and three surface lots in New Center for \$12.2 million at auction. Redico said the partnership plans to transition the two connected buildings into what it called a "true urban" mixed-use development, with a mix of office, retail, residential and entertainment uses. The multi-year project has a probable expenditure of \$70 million to \$80 million in addition to the purchase price. In June 2018, A joint venture between Northern Equities, and Lutz Real Estate bought the Albert Kahn building for \$9.5 million from The Platform.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are potential cost and probable expenditure interchangeable (i.e., having the same meaning)?

Pair 502

P1: Some of the areas that occupation nurses are responsible for but are not limited to: Case Management: OHNs routinely coordinate and manage the care of ill and injured workers. Occupational Health Nurses role as case managers has grown as they now assist with the coordination and management of work-related and non-work related injuries and illness, which includes group health, worker's compensation and Family Medical Leave Act (FMLA) as well as short/long term disability. Health Promotion and risk reduction: OHNs develop programs that promote lifestyle change and individual efforts that lower risk of disease and injury. OHNs also assist in creating environments that provide a sense of balance among work, family, personal, health and psychosocial concerns.

P2: Some of the areas that occupation nurses are responsible for but are not limited to: Case Management: OHNs routinely coordinate and manage the care of ill and injured workers. Occupational Health Nurses role as case managers has grown as they now assist with the coordination and management of work-related and non-work related injuries and illness, which includes group health, worker's compensation and Family Medical Leave Act (FMLA) as well as short/long term disability. Health Promotion and risk reduction: OHNs develop programs that promote conduct adjustment and individual efforts that lower risk of disease and injury. OHNs also assist in creating environments that provide a sense of balance among work, family, personal, health and psychosocial concerns.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are lifestyle change and conduct adjustment interchangeable (i.e., having the same meaning)?

Pair 503

P1: There are several types of emergency eyewash station and safety shower station systems, including safety showers, eyewash stations, drench hoses, combination units, and eyewash bottles. Safety Shower. A safety shower is a unit designed to wash an individual's head and body which has come into contact with hazardous chemicals. Large volumes of water are used and a user may need to take off any clothing that has been contaminated with hazardous chemicals.

P2: There are several types of emergency eyewash station and safety shower station systems, including safety showers, eyewash stations, drench hoses, combination units, and eyewash bottles. Safety Shower. A safety shower is a unit designed to wash an individual's scalp and body which has come into contact with hazardous chemicals. Large volumes of water are used and a user may need to take off any clothing that has been contaminated with hazardous chemicals.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are individual's head and individual's scalp interchangeable (i.e., having the same meaning)?

Pair 504

P1: The herbal baths involve an infusion known as "abô". One type of ceremony is known as the "bori". This entails placing food on the individual's head to feed the orixá that is believed to partially reside within the cranium. This may be conducted to bolster the individual's health and well-being or to give them additional strength before an important undertaking.

P2: The herbal baths involve an infusion known as "abô". One type of ceremony is known as the "bori". This entails placing food on the human's crown to feed the orixá that is believed to partially reside within the cranium. This may be conducted to bolster the individual's health and well-being or to give them additional strength before an important undertaking.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are individual's head and human's crown interchangeable (i.e., having the same meaning)?

Pair 505

P1: Altruism. Naïve cynicism has been exemplified in the context of altruism. Explanations of selfless human behavior have been described in terms of individuals seeking personal advantage as opposed to absolute altruism. For example, naïve cynicism would explain the act of an individual donating money or items to charity as a way of self-enhancement rather than for altruistic purposes.

P2: Altruism. Naïve cynicism has been exemplified in the context of altruism. Explanations of selfless human behavior have been described in terms of individuals seeking distinctive interest as opposed to absolute altruism. For example, naïve cynicism would explain the act of an individual donating money or items to charity as a way of self-enhancement rather than for altruistic purposes.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are personal advantage and distinctive interest interchangeable (i.e., having the same meaning)?

Pair 506

P1: The Football Federation of Kazakhstan (FFK) is the sport's national governing body. The FFK organises the men's, women's, and futsal national teams. The Kazakhstan Super League is the top-level competition for the sport in the country. Cycling is Kazakhstan's most successful sport.

P2: The Football Federation of Kazakhstan (FFK) is the sport's national governing body. The FFK organises the men's, women's, and futsal national teams. **The Kazakhstan Super League is the elite opposition for the sport in the country.** Cycling is Kazakhstan's most successful sport.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **top-level competition** and **elite opposition** interchangeable (i.e., having the same meaning)?

Pair 507

P1: A USAF A-10 ground attack aircraft, piloted by Captain Robert Swain shoots down an Iraqi Bo-105 helicopter using its GAU-8 30mm cannon. Swain fired approximately 75 rounds with his cannon on his first pass. **He then fired approximately 300 rounds on his second pass,** causing the helicopter to explode. It is the first air to air victory recorded by an A-10.

P2: A USAF A-10 ground attack aircraft, piloted by Captain Robert Swain shoots down an Iraqi Bo-105 helicopter using its GAU-8 30mm cannon. Swain fired approximately 75 rounds with his cannon on his first pass. **He then fired approximately 300 rounds on his secondary throw,** causing the helicopter to explode. It is the first air to air victory recorded by an A-10.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **second pass** and **secondary throw** interchangeable (i.e., having the same meaning)?

Pair 508

P1: Pesäpallojaoston puheenjohtajana toimii kaudella 2010 Heikki Riikilä. Budget. **In 2007 the primary team had a budget 367 000 €.** In 2006 the budget was 358 000 €.

P2: Pesäpallojaoston puheenjohtajana toimii kaudella 2010 Heikki Riikilä. Budget. **In 2007 the leading party had a budget 367 000 €.** In 2006 the budget was 358 000 €.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **primary team** and **leading party** interchangeable (i.e., having the same meaning)?

Pair 509

P1: The Anglo-Boer War affected all race groups in South Africa. Black people were conscripted or otherwise coerced by both sides into working for them either as combatants or non-combatants to sustain the respective war efforts of both the Boers and the British. **The official statistics of blacks killed in action are inaccurate.** Most of the bodies were dumped in unmarked graves.

P2: The Anglo-Boer War affected all race groups in South Africa. Black people were conscripted or otherwise coerced by both sides into working for them either as combatants or non-combatants to sustain the respective war efforts of both the Boers and the British. **The authoritative figures of blacks killed in action are inaccurate.** Most of the bodies were dumped in unmarked graves.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **official statistics** and **authoritative figures** interchangeable (i.e., having the same meaning)?

Pair 510

P1: Gender structure (males/females) of population is 47:53. Such kind of distortion in the gender structure of inhabitants associates with high level of labor emigration from the village since collapse of Soviet Union. **In accordance with official statistics** 99% of inhabitants are Azerbaijanis. History.

P2: Gender structure (males/females) of population is 47:53. Such kind of distortion in the gender structure of inhabitants associates with high level of labor emigration from the village since collapse of Soviet Union. **In accordance with formal percentages** 99% of inhabitants are Azerbaijanis. History.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **official statistics** and **formal percentages** interchangeable (i.e., having the same meaning)?

Pair 511

P1: An interim is a provisional or temporary intervening period of time. In projects, an interim report is often compiled to analyze how the project is proceeding, before its final completion. **Interim analysis is important in medical trials, to ensure that the patients are not exposed to unnecessary danger** during the trial. An interim constitution is a constitution that has not been completely ratified but serves as a temporary law until a permanent is made.

P2: An interim is a provisional or temporary intervening period of time. In projects, an interim report is often compiled to analyze how the project is proceeding, before its final completion. **Interim analysis is important in medical trials, to ensure that the patients are not exposed to needless threat** during the trial. An interim constitution is a constitution that has not been completely ratified but serves as a temporary law until a permanent is made.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **unnecessary danger** and **needless threat** interchangeable (i.e., having the same meaning)?

Pair 512

P1: Gulf of Mexico. The Middle Jurassic Louann Salt of the Gulf of Mexico has formed many salt domes in both the US and Mexican parts of the gulf. **major occurrences** of salt domes are found along the Gulf Coast of the US in Texas and Louisiana. One example of an island formed by a salt dome is Avery Island in Louisiana.

P2: Gulf of Mexico. The Middle Jurassic Louann Salt of the Gulf of Mexico has formed many salt domes in both the US and Mexican parts of the gulf. **key incidences** of salt domes are found along the Gulf Coast of the US in Texas and Louisiana. One example of an island formed by a salt dome is Avery Island in Louisiana.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **major occurrences** and **key incidences** interchangeable (i.e., having the same meaning)?

Pair 513

P1: History. BK Ventspils was founded in 1994. **In first years Ventspils proved themselves as relevant part** of Latvian basketball, but major step came in 1997 when Ventspils Olympic Center was built. At that time Ventspils started to play in international competitions playing in 1997–98 edition of FIBA Korać Cup, which was followed by playing in FIBA Saporta Cup.

P2: History. BK Ventspils was founded in 1994. **In first years Ventspils proved themselves as pertinent members** of Latvian basketball, but major step came in 1997 when Ventspils Olympic Center was built. At that time Ventspils started to play in international competitions playing in 1997–98 edition of FIBA Korać Cup, which was followed by playing in FIBA Saporta Cup.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **relevant part** and **pertinent members** interchangeable (i.e., having the same meaning)?

Pair 514

P1: Replication is the multiplication of virus's genetic material. The process includes the transcription of mRNA, synthesis, and assembly of viral proteins and is regulated by protein expression. **assembly process** involves putting together and modifying newly made viral nucleic acids and structural proteins to form the virus's nucleocapsid. Release of viruses could be done by two different mechanisms depending on the type of virus.

P2: Replication is the multiplication of virus's genetic material. The process includes the transcription of mRNA, synthesis, and assembly of viral proteins and is regulated by protein expression. **fabrication procedure** involves putting together and modifying newly made viral nucleic acids and structural proteins to form the virus's nucleocapsid. Release of viruses could be done by two different mechanisms depending on the type of virus.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **assembly process** and **fabrication procedure** interchangeable (i.e., having the same meaning)?

Pair 515

P1: During the war police cavalry regiments and battalions existed as part of the Police Battalions serving in the occupied countries. Police communications. **"Polizei-Nachrichtenstaffeln"** (police signal squads) was the **local component** of the police communications service. Radio as well as telephone and telex on its own secure lines separate from the general public were used.

P2: During the war police cavalry regiments and battalions existed as part of the Police Battalions serving in the occupied countries. Police communications. **"Polizei-Nachrichtenstaffeln"** (police signal squads) was the **community part** of the police communications service. Radio as well as telephone and telex on its own secure lines separate from the general public were used.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **local component** and **community part** interchangeable (i.e., having the same meaning)?

Pair 516

P1: He has personally represented George Plimpton, Harry Evans, Tina Brown, Margaret Truman, and former New York City Mayor John Lindsay. In 2001, Debevoise & Plimpton represented "The New York Times" in the Supreme Court case of "New York Times Co. v. Tasini". **This was the fourth case** in which Goodale represented "The New York Times" at the Supreme Court. As counsel to George Plimpton, Goodale convinced Plimpton to turn The Paris Review into a non-profit foundation.

P2: He has personally represented George Plimpton, Harry Evans, Tina Brown, Margaret Truman, and former New York City Mayor John Lindsay. In 2001, Debevoise & Plimpton represented "The New York Times" in the Supreme Court case of "New York Times Co. v. Tasini". **This was the 4th action** in which Goodale represented "The New York Times" at the Supreme Court. As counsel to George Plimpton, Goodale convinced Plimpton to turn The Paris Review into a non-profit foundation.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **fourth case** and **4th action** interchangeable (i.e., having the same meaning)?

Pair 517

P1: After a 10-day availability at the New York Navy Yard, the destroyer escort operated briefly with submarines and PT boats and conducted anti-aircraft firing practice in Block Island Sound, Brooklyn, New York, before shifting south to the Tidewater area to pick up Convoy UGS-40 in Hampton Roads late in April, led by the 2. The transatlantic passage proved largely uneventful; but, as the Allied ships transited the Strait of Gibraltar, the British anti-aircraft cruiser , the destroyer , and two minesweepers equipped with special jamming apparatus, and , joined the convoy. **A recent increase in German air activity had prompted concern over the safety of UGS-40, a large and important convoy consisting of some 80 vessels.** Attacked by Luftwaffe aircraft.

P2: After a 10-day availability at the New York Navy Yard, the destroyer escort operated briefly with submarines and PT boats and conducted anti-aircraft firing practice in Block Island Sound, Brooklyn, New York, before shifting south to the Tidewater area to pick up Convoy UGS-40 in Hampton Roads late in April, led by the 2. The transatlantic passage proved largely uneventful; but, as the Allied ships transited the Strait of Gibraltar, the British anti-aircraft cruiser , the destroyer , and two minesweepers equipped with special jamming apparatus, and , joined the convoy. **A modern boost in German air activity had prompted concern over the safety of UGS-40, a large and important convoy consisting of some 80 vessels.** Attacked by Luftwaffe aircraft.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **recent increase** and **modern boost** interchangeable (i.e., having the same meaning)?

Pair 518

P1: This makes him willing to quit a condition, which, however free, is full of fears and continual dangers: and it is not without reason, that he seeks out, and is willing to join in society with others, who are already united, or have a mind to unite, for the mutual preservation of their lives, liberties and estates, which many call by the general name, property. In earlier times before the development of national policing, an attack on the family home was effectively either an assault on the people actually inside or an indirect assault on their welfare by depriving them of shelter and/or the means of production. **This linkage between a personal attack and property weakened as societies developed but the threat of violence remains a key factor.** As an aspect of sovereignty, in his 1918 speech "Politik als Beruf" (Politics as a Vocation), Max Weber defined a state as an authority claiming the monopoly on the legitimate use of physical force within defined territorial boundaries.

P2: This makes him willing to quit a condition, which, however free, is full of fears and continual dangers: and it is not without reason, that he seeks out, and is willing to join in society with others, who are already united, or have a mind to unite, for the mutual preservation of their lives, liberties and estates, which many call by the general name, property. In earlier times before the development of national policing, an attack on the family home was effectively either an assault on the people actually inside or an indirect assault on their welfare by depriving them of shelter and/or the means of production. **This linkage between a personal attack and property weakened as societies developed but the threat of violence remains a dominant part.** As an aspect of sovereignty, in his 1918 speech "Politik als Beruf" (Politics as a Vocation), Max Weber defined a state as an authority claiming the monopoly on the legitimate use of physical force within defined territorial boundaries.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **key factor** and **dominant part** interchangeable (i.e., having the same meaning)?

Pair 519

P1: Heikki Kovalainen qualified sixteenth, the second time Caterham (and its predecessor, Team Lotus) advanced beyond the first qualifying period in dry conditions. Vettel went on to win the race – becoming the fourth winner in as many races – after spending much of the race defending against Kimi Räikkönen. **Having started eleventh, Räikkönen used an extra set of soft tyres to move up through the field.** His team-mate, Romain Grosjean, finished third.

P2: Heikki Kovalainen qualified sixteenth, the second time Caterham (and its predecessor, Team Lotus) advanced beyond the first qualifying period in dry conditions. Vettel went on to win the race – becoming the fourth winner in as many races – after spending much of the race defending against Kimi Räikkönen. **Having started eleventh, Räikkönen**

used an **additional pair** of soft tyres to move up through the field. His team-mate, Romain Grosjean, finished third.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **extra set** and **additional pair** interchangeable (i.e., having the same meaning)?

Pair 520

P1: Slave performer Thomas Greene Bethune, known as Blind Tom frequently played pro-Confederate songs such as "Maryland, My Maryland" and "Dixie" and dropped, "Yankee Doodle" from his performances. Different versions. **Although certain songs were identified with one particular side of the war, sometimes the other would adapt the song for their use.** A Southern revision of the "Star Spangled Banner" was used, entitled "The Southern Cross".

P2: Slave performer Thomas Greene Bethune, known as Blind Tom frequently played pro-Confederate songs such as "Maryland, My Maryland" and "Dixie" and dropped, "Yankee Doodle" from his performances. Different versions. **Although certain songs were identified with a precise position of the war, sometimes the other would adapt the song for their use.** A Southern revision of the "Star Spangled Banner" was used, entitled "The Southern Cross".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one particular side** and **a precise position** interchangeable (i.e., having the same meaning)?

Pair 521

P1: The dorsal ribs are not fused or tightly attached to their vertebrae, instead being loosely articulated. Ten dorsal ribs are on either side of the body. **The large neck was filled with an extensive system of weight-saving air sacs.** "Brontosaurus", like its close relative "Apatosaurus", had tall spines on its vertebrae, which made up more than half the height of the individual bones.

P2: The dorsal ribs are not fused or tightly attached to their vertebrae, instead being loosely articulated. Ten dorsal ribs are on either side of the body. **The large neck was filled with an ample structure of weight-saving air sacs.** "Brontosaurus", like its close relative "Apatosaurus", had tall spines on its vertebrae, which made up more than half the height of the individual bones.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **extensive system** and **ample structure** interchangeable (i.e., having the same meaning)?

Pair 522

P1: Plot outline. After loud-mouthed Fran Fine is jilted by Danny, her husband-to-be and boss, she makes money by selling cosmetics door-to-door. **one door happens to belong to Maxwell Sheffield, a Broadway producer who happens to need a nanny for his three children.** Fran jumps at the chance.

P2: Plot outline. After loud-mouthed Fran Fine is jilted by Danny, her husband-to-be and boss, she makes money by selling cosmetics door-to-door. **an entrance happens to belong to Maxwell Sheffield, a Broadway producer who happens to need a nanny for his three children.** Fran jumps at the chance.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one door** and **an entrance** interchangeable (i.e., having the same meaning)?

Pair 523

P1: I'd forgotten that there was a character I'd loved for 13 years. She was the seed of the show. I am the **sole person** to spin off from "Dallas" (because actor David Ackroyd originated the role of Gary on that show). Valene gave "Knots" a note of spirituality.

P2: I'd forgotten that there was a character I'd loved for 13 years. She was the seed of the show. I am the **lone being** to spin off from "Dallas" (because actor David Ackroyd originated the role of Gary on that show). Valene gave "Knots" a note of spirituality.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **sole person** and **lone being** interchangeable (i.e., having the same meaning)?

Pair 524

P1: Conte and colleagues similarly modelled mental states following quantum mechanics while participants were asked to observe ambiguous figures. Although similar to Manousakis' model, they consider the indeterminate perception (a patient isn't sure about the shape) which resembles the mixed state. Although it is included in the model, it is represented as a wave-function, not as a **third state** as Paraan et al. suggested for the Manousakis model.

P2: Conte and colleagues similarly modelled mental states following quantum mechanics while participants were asked to observe ambiguous figures. Although similar to Manousakis' model, they consider the indeterminate perception (a patient isn't sure about the shape) which resembles the mixed state. Although it is included in the model, it is represented as a wave-function, not as a **3rd case** as Paraan et al. suggested for the Manousakis model.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **third state** and **3rd case** interchangeable (i.e., having the same meaning)?

Pair 525

P1: medium-fast). Contrary to how it is often presented, action does not refer to the bending curve. A rod with **fast action** can as easily have a progressive bending curve (from tip to butt) as a top only bending curve. The action can be influenced by the tapering of a rod, the length and the materials used for the blank.

P2: medium-fast). Contrary to how it is often presented, action does not refer to the bending curve. A rod with **quick force** can as easily have a progressive bending curve (from tip to butt) as a top only bending curve. The action can be influenced by the tapering of a rod, the length and the materials used for the blank.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **fast action** and **quick force** interchangeable (i.e., having the same meaning)?

Pair 526

P1: Cowlings made the skates wider, especially at the bottom of the boot. When the modern goaltender went into a deep "butterfly" position, to see between the players in front of him, the cowl would lift the blade off the ice. The new goaltender skate is made out of newer materials, allowing the boot itself to provide the **needed protection**. The cowlings are being phased out of professional play.

P2: Cowlings made the skates wider, especially at the bottom of the boot. When the modern goaltender went into a deep "butterfly" position, to see between the players in front of him, the cowl would lift the blade off the ice. The new goaltender skate is made out of newer materials, allowing the boot itself to provide the **required safety measures**. The cowlings are being phased out of professional play.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **needed protection** and **required safety measures** interchangeable (i.e., having the same meaning)?

Pair 527

P1: Twin studies have estimated that approximately 20-30% of the variation in human lifespan can be related to genetics, with the rest due to individual behaviors and environmental factors which can be modified. Although over 200 gene variants have been associated with longevity according to a US-Belgian-UK research database of human genetic variants, these explain only a small fraction of the heritability. A 2012 study found that even modest amounts of leisure time and physical exercise can extend life expectancy by as much as 4.5 years. Lymphoblastoid cell lines established from blood samples of centenarians have significantly higher activity of the DNA repair protein PARP (Poly ADP ribose polymerase) than cell lines from younger (20 to 70 year old) individuals.

P2: Twin studies have estimated that approximately 20-30% of the variation in human lifespan can be related to genetics, with the rest due to individual behaviors and environmental factors which can be modified. Although over 200 gene variants have been associated with longevity according to a US-Belgian-UK research database of human genetic variants, these explain only a small fraction of the heritability. A 2012 evaluation found that even modest amounts of leisure time and physical exercise can extend life expectancy by as much as 4.5 years. Lymphoblastoid cell lines established from blood samples of centenarians have significantly higher activity of the DNA repair protein PARP (Poly ADP ribose polymerase) than cell lines from younger (20 to 70 year old) individuals.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are 2012 study and 2012 evaluation interchangeable (i.e., having the same meaning)?

Pair 528

P1: The age limit for pederasty in ancient Greece seems to encompass, at the minimum end, boys of twelve years of age. To love a boy below the age of twelve was considered inappropriate, but no evidence exists of any legal penalties attached to this sort of practice. Traditionally, a pederastic relationship could continue until the widespread growth of the boy's body hair, when he is considered a man. Thus, the age limit for the younger member of a pederastic relationship seems to have extended from 12 to about 21 years of age.

P2: The age limit for pederasty in ancient Greece seems to encompass, at the minimum end, boys of twelve years of age. To love a boy below the age of twelve was considered inappropriate, but no evidence exists of any legal penalties attached to this sort of practice. Traditionally, a pederastic relationship could continue until the boundless development of the boy's body hair, when he is considered a man. Thus, the age limit for the younger member of a pederastic relationship seems to have extended from 12 to about 21 years of age.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are widespread growth and boundless development interchangeable (i.e., having the same meaning)?

Pair 529

P1: On January 4, 1974, at the age of 24, Ajahn Pasanno took ordination at Wat Pleng Vipassana in Bangkok, Thailand with Venerable Phra Khru Nāṇasirivatana as preceptor. During his first year as a monk he was taken by his teacher to meet Ajahn Chah, with whom he asked to be allowed to stay and train. One of the early residents of Wat Pah Nanachat, Ajahn Pasanno became its abbot in his ninth year. During Ajahn Pasanno's tenure as abbot, Wat Pah Nanachat developed considerably, increasing in size from 40 acres to 140 acres, and Ajahn Pasanno initiated an extensive tree-planting project that made Wat Pah Nanachat a model site for reforestation with the Department of Forestry in Ubon Ratchathani.

P2: On January 4, 1974, at the age of 24, Ajahn Pasanno took ordination at Wat Pleng Vipassana in Bangkok, Thailand with Venerable Phra Khru Nāṇasirivatana as preceptor. During his first year as a monk he was taken by his teacher to meet Ajahn Chah, with whom he asked to be allowed to stay and train. One of the early residents of Wat Pah Nanachat, Ajahn Pasanno became its abbot in his 9th term. During Ajahn Pasanno's tenure as abbot, Wat Pah Nanachat developed considerably, increasing in size from 40 acres to 140 acres, and Ajahn Pasanno initiated an extensive tree-planting project that made Wat Pah Nanachat a model site for reforestation with the Department of Forestry in Ubon Ratchathani.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **ninth year** and **9th term** interchangeable (i.e., having the same meaning)?

Pair 530

P1: At its highest it is above sea level. Coney Island was formerly an actual island, separated from greater Brooklyn by Coney Island Creek, and was the westernmost of the Outer Barrier islands. **A large section of the creek was filled in the 1920s and 1930s, turning the island into a peninsula.** The perimeter of Coney Island features manmade structures designed to maintain its current shape.

P2: At its highest it is above sea level. Coney Island was formerly an actual island, separated from greater Brooklyn by Coney Island Creek, and was the westernmost of the Outer Barrier islands. **A huge area of the creek was filled in the 1920s and 1930s, turning the island into a peninsula.** The perimeter of Coney Island features manmade structures designed to maintain its current shape.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **large section** and **huge area** interchangeable (i.e., having the same meaning)?

Pair 531

P1: to find it easily, selection must be strong (4NeSb 100). Even then, soft sweeps can be difficult to discriminate from neutrality if they are 'super soft', i.e., if there are numerous independent origins of the beneficial allele, or if its starting frequency in the SGV(standing genetic variation) is high. **For a strong interpretation of selection versus neutrality, we need a test statistic with reliably high power for hard and soft sweeps.** Based on above-described patterns, and as exhibited, tests based on the site frequency spectrum (looking for low- or high-frequency derived alleles) have low power to reveal soft sweeps, whereas haplotype tests can detect both types of sweeps.

P2: to find it easily, selection must be strong (4NeSb 100). Even then, soft sweeps can be difficult to discriminate from neutrality if they are 'super soft', i.e., if there are numerous independent origins of the beneficial allele, or if its starting frequency in the SGV(standing genetic variation) is high. **For a potent analysis of selection versus neutrality, we need a test statistic with reliably high power for hard and soft sweeps.** Based on above-described patterns, and as exhibited, tests based on the site frequency spectrum (looking for low- or high-frequency derived alleles) have low power to reveal soft sweeps, whereas haplotype tests can detect both types of sweeps.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **strong interpretation** and **potent analysis** interchangeable (i.e., having the same meaning)?

Pair 532

P1: The goal is to divide the cake among the agents such that each agent will consider his/her piece as "fair" by his/her personal value measure. Since the agents' valuations can be very complex, they cannot - in general - be given as inputs to a fair division algorithm. **The RW model specifies two kinds of "queries" that a fair division algorithm may ask the agents: Eval and Cut.** Informally, an Eval query asks an agent to specify his/her value to a given piece of the cake, and a Cut query (also called a Mark query) asks an agent to specify a piece of cake with a given value.

P2: The goal is to divide the cake among the agents such that each agent will consider his/her piece as "fair" by his/her personal value measure. Since the agents' valuations can be very complex, they cannot - in general - be given as inputs to a fair division algorithm. **The RW model specifies two kinds of "queries" that a good distribution algorithm may ask the agents: Eval and Cut.** Informally, an Eval query asks an agent to specify his/her value to a given piece of the cake, and a Cut query (also called a Mark query) asks an agent to specify a piece of cake with a given value.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **fair division** and **good distribution** interchangeable (i.e., having the same meaning)?

Pair 533

P1: This organization represents and advocates for the rights of women to equality, dignity, and respect for her private life without discrimination. They have certain beliefs and outlooks towards humanitarian rights regarding termination of pregnancy at any time during the full pregnancy, and make aware that they believe the right of pregnant women to access termination of pregnancy should be autonomous affordable and effective. **The fight for women's right, especially regarding her choice to abortion, has been an ongoing event with many negotiations, arguments, and exception.** Overtime, many political figures have tried to contribute to the best of their ability to equalize women's rights, which surfaces the main discriminators of all women who seek out abortion.

P2: This organization represents and advocates for the rights of women to equality, dignity, and respect for her private life without discrimination. They have certain beliefs and outlooks towards humanitarian rights regarding termination of pregnancy at any time during the full pregnancy, and make aware that they believe the right of pregnant women to access termination of pregnancy should be autonomous affordable and effective. **The fight for women's right, especially regarding her choice to abortion, has been an open-ended debate with many negotiations, arguments, and exception.** Overtime, many political figures have tried to contribute to the best of their ability to equalize women's rights, which surfaces the main discriminators of all women who seek out abortion.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **ongoing event** and **open-ended debate** interchangeable (i.e., having the same meaning)?

Pair 534

P1: Unevenness was measured with a mechanical profilograph, reporting a parameter called slope variance (SV). SV is the second spatial derivative of height. **For a vehicle traveling at speed, SV is the exciting source to vertical acceleration; the second derivative in time domain of height.** This makes very good sense, since 1 – 80 Hz acceleration is the parameter used when relating human exposure from vibration to perceived discomfort in the current ISO 2631-1 (1997) standard.

P2: Unevenness was measured with a mechanical profilograph, reporting a parameter called slope variance (SV). SV is the second spatial derivative of height. **For a vehicle traveling at speed, SV is the flashy origin to vertical acceleration; the second derivative in time domain of height.** This makes very good sense, since 1 – 80 Hz acceleration is the parameter used when relating human exposure from vibration to perceived discomfort in the current ISO 2631-1 (1997) standard.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **exciting source** and **flashy origin** interchangeable (i.e., having the same meaning)?

Pair 535

P1: Author-level metrics are citation metrics that measure the bibliometric impact of individual authors, researchers, academics, and scholars. Many metrics have been developed that take into account varying numbers of factors (from only considering total number of citations, to looking at their distribution across papers or journals using statistical or graph-theoretic principles). **The main motivation for these quantitative comparisons between researchers is to allocate resources (e.g. funding, academic appointments).**

P2: Author-level metrics are citation metrics that measure the bibliometric impact of individual authors, researchers, academics, and scholars. Many metrics have been developed that take into account varying numbers of factors (from only considering total number of citations, to looking at their distribution across papers or journals using statistical or graph-theoretic principles). **The biggest catalyst for these quantitative comparisons between researchers is to allocate resources (e.g. funding, academic appointments).**

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **main motivation** and **biggest catalyst** interchangeable (i.e., having the same meaning)?

Pair 536

P1: Form. To execute the exercise, the lifter lies flat on the ground under a fixed bar (such as a Smith machine set at chest height). The lifter holds the bar with an overhand grip, straight arms, **straight body**, upper body hanging with heels on the ground close together. The lifter pulls the chest toward the bar until it touches, before returning to the starting position under control.

P2: Form. To execute the exercise, the lifter lies flat on the ground under a fixed bar (such as a Smith machine set at chest height). The lifter holds the bar with an overhand grip, straight arms, **upright torso**, upper body hanging with heels on the ground close together. The lifter pulls the chest toward the bar until it touches, before returning to the starting position under control.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **straight body** and **upright torso** interchangeable (i.e., having the same meaning)?

Pair 537

P1: In 2002 after an internal crisis in the party the PNG-PG declared that MMGG were no longer their youth wing, but finally the measure wasn't put into practice. In 2012 the MMGG left the Galician Nationalist Bloc, and helped to create Compromiso por Galicia. Since that same year MMGG has had almost no public appearances or act, nor **internet activity**. The last thing done by the organization was its journal Terra Celta ("Celtic Land") in April 2012.

P2: In 2002 after an internal crisis in the party the PNG-PG declared that MMGG were no longer their youth wing, but finally the measure wasn't put into practice. In 2012 the MMGG left the Galician Nationalist Bloc, and helped to create Compromiso por Galicia. Since that same year MMGG has had almost no public appearances or act, nor **online endeavors**. The last thing done by the organization was its journal Terra Celta ("Celtic Land") in April 2012.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **internet activity** and **online endeavors** interchangeable (i.e., having the same meaning)?

Pair 538

P1: To assess the performance of a rising film evaporator, the capacity and efficiency of the evaporator is measured. Capacity is the amount of water vaporized per unit time while the steam economy is the amount of solvent vaporised. Hence, the **main process** attributes are the characteristics of the process that significantly affect these two areas. Overall rate of heat transfer.

P2: To assess the performance of a rising film evaporator, the capacity and efficiency of the evaporator is measured. Capacity is the amount of water vaporized per unit time while the steam economy is the amount of solvent vaporised. Hence, the **most important procedure** attributes are the characteristics of the process that significantly affect these two areas. Overall rate of heat transfer.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **main process** and **most important procedure** interchangeable (i.e., having the same meaning)?

Pair 539

P1: The lyrics go on to describe the memory of the Blitz: "Did you see the frightened ones? Did you hear the falling bombs? Did you ever wonder why we had to run for shelter when the promise of a brave new world unfurled beneath a clear blue sky? ...

P2: The lyrics go on to describe the memory of the Blitz: "Did you see the frightened ones? Did you hear the falling bombs? Did you ever wonder why we had to run for shelter when the promise of a brave new world unfurled beneath a crystalline bluish atmosphere? ...

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **clear blue sky** and **crystalline bluish atmosphere** interchangeable (i.e., having the same meaning)?

Pair 540

P1: Squirrel monkeys live together in multi-male/multi-female groups with up to 500 members. These large groups, however, can occasionally break into smaller troupes. The groups have a number of vocal calls, including warning sounds to protect the group from large falcons, which are a natural threat. Their small body size also makes them susceptible to predators such as snakes and felids.

P2: Squirrel monkeys live together in multi-male/multi-female groups with up to 500 members. These large groups, however, can occasionally break into smaller troupes. The groups have a number of vocal calls, including warning sounds to protect the group from large falcons, which are a normal danger. Their small body size also makes them susceptible to predators such as snakes and felids.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **natural threat** and **normal danger** interchangeable (i.e., having the same meaning)?

Pair 541

P1: Neighborhood committees in the 1980s continued to be heavily involved in law enforcement and mediation of disputes at the local level. Among the enforcement procedures these committees used to influence both thought and behavior were criticism and collective responsibility. Before the reform era, aspects of Chinese society also contributed to shaping the contemporary structure for maintaining public order. During the beginning of the 1980s economic reforms, urban and rural dwellers rarely changed their residences.

P2: Neighborhood committees in the 1980s continued to be heavily involved in law enforcement and mediation of disputes at the local level. Among the enforcement procedures these committees used to influence both thought and behavior were criticism and collective responsibility. Before the restoration epoch, aspects of Chinese society also contributed to shaping the contemporary structure for maintaining public order. During the beginning of the 1980s economic reforms, urban and rural dwellers rarely changed their residences.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **reform era** and **restoration epoch** interchangeable (i.e., having the same meaning)?

Pair 542

P1: Futrell defeated Livesay in a landslide election, and would win reelection in 1934. Though the office remained within the Democratic party, the election represented a realignment in favor of the conservative wing of the party. Futrell was the most conservative governor elected in decades, with 1932 marking the end of the reform era in Arkansas. Democratic primary.

P2: Futrell defeated Livesay in a landslide election, and would win reelection in 1934. Though the office remained within the Democratic party, the election represented a realignment in favor of the conservative wing of the party. Futrell was the most conservative governor elected in decades, with 1932 marking the end of the transformation age in Arkansas.

Democratic primary.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **reform era** and **transformation age** interchangeable (i.e., having the same meaning)?

Pair 543

P1: DragThing was first released on 1 May 1995 and celebrated its 10th anniversary in 2005. It was praised in a 2004 article by Bruce Tognazzini, who said "...if I could have taken all the lessons learned in Systems 1 through 9 and applied them to System X, I certainly wouldn't have ended up with the Dock. **No, I would have ended up with DragThing...**" In late 2018, the software developer warned of **probable end-of-life**. This decision was confirmed in 2019, with its website updated to say:

It was praised in a 2004 article by Bruce Tognazzini, who said "...if I could have taken all the lessons learned in Systems 1 through 9 and applied them to System X, I certainly wouldn't have ended up with the Dock. **No, I would have ended up with DragThing...**" In late 2018, the software developer warned of **likely conclusion-of-life**. This decision was confirmed in 2019, with its website updated to say:

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **probable end** and **likely conclusion** interchangeable (i.e., having the same meaning)?

Pair 544

P1: Slick Allen, briefly employed by the Pennington ranch, asks Guy to help with his bootleg operation. After he threatens the Penningtons, Guy rejects the proposal ... and Allen threatens to frame him for the entire bootleg business. **Lured by the money, Guy decides to cooperate, arranging to store and transfer illegal goods each week in a remote section of the ranch.** Meantime, Grace has had no luck in Hollywood, finding it difficult to get any work at all.

P2: Slick Allen, briefly employed by the Pennington ranch, asks Guy to help with his bootleg operation. After he threatens the Penningtons, Guy rejects the proposal ... and Allen threatens to frame him for the entire bootleg business. **Lured by the money, Guy decides to cooperate, arranging to store and transfer illegal goods each week in a distant part of the ranch.** Meantime, Grace has had no luck in Hollywood, finding it difficult to get any work at all.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **remote section** and **distant part** interchangeable (i.e., having the same meaning)?

Pair 545

P1: The gamble paid off, and Warner's Henry was one of the most celebrated performances in the piece, helping to establish both Warner the actor and Henry the character. Harold Hobson wrote in "The Sunday Times" that Warner "discovers in Henry one of Shakespeare's greatest parts. **The discovery is the more exciting for being improbable, since drama gives its principal opportunities to active men.** Henry is never active [...] He suffers only, and endures, never resisting, never striking back [...] Yet [Warner's] sad, distressed face, meeting each new misfortune with an absolute absence of protest or indignation, spreads over the darkest waters of the play a quiet and persistent golden glory."

P2: The gamble paid off, and Warner's Henry was one of the most celebrated performances in the piece, helping to establish both Warner the actor and Henry the character. Harold Hobson wrote in "The Sunday Times" that Warner "discovers in Henry one of Shakespeare's greatest parts. **The discovery is the more exciting for being improbable, since drama gives its principal opportunities to engaged males.** Henry is never active [...] He suffers only, and endures, never resisting, never striking back [...] Yet [Warner's] sad, distressed face, meeting each new misfortune with an absolute absence of protest or indignation, spreads over the darkest waters of the play a quiet and persistent golden glory."

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **active men** and **engaged males** interchangeable (i.e., having the same meaning)?

Pair 546

P1: The Marie Heinekenplein (English: Marie Heineken Square) is a square in Amsterdam, Netherlands, popularly known as the Heinekenplein. **The circle-shaped square is used for various events, such as a book market and an open-air cinema.** Marie Heinekenplein was constructed in the early 1990s.

P2: The Marie Heinekenplein (English: Marie Heineken Square) is a square in Amsterdam, Netherlands, popularly known as the Heinekenplein. **The circle-shaped square is used for various events, such as a publication fair and an open-air cinema.** Marie Heinekenplein was constructed in the early 1990s.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **book market** and **publication fair** interchangeable (i.e., having the same meaning)?

Pair 547

P1: She wrote on a wide range of topics including education, natural history, fantasy, mystery, and biblical narratives and is best remembered today for her Noddy, "The Famous Five", The Secret Seven, and "The Adventure Series". The first of these children's stories, "Five on a Treasure Island", was published in 1942. **In the 1950s, the book market in Europe began to recover from the effects of the two world wars.** An informal literary discussion group associated with the English faculty at the University of Oxford, were the "Inklings", with the major fantasy novelists C. S. Lewis and J. R. R. Tolkien as its main members.

P2: She wrote on a wide range of topics including education, natural history, fantasy, mystery, and biblical narratives and is best remembered today for her Noddy, "The Famous Five", The Secret Seven, and "The Adventure Series". The first of these children's stories, "Five on a Treasure Island", was published in 1942. **In the 1950s, the text bazaar in Europe began to recover from the effects of the two world wars.** An informal literary discussion group associated with the English faculty at the University of Oxford, were the "Inklings", with the major fantasy novelists C. S. Lewis and J. R. R. Tolkien as its main members.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **book market** and **text bazaar** interchangeable (i.e., having the same meaning)?

Pair 548

P1: The Patna High Court is the principle civil courts in Bihar. However, a high court exercises its original civil and criminal jurisdiction only if the subordinate courts are not authorized by law to try such matters for lack of pecuniary, territorial jurisdiction. **High courts may also enjoy original jurisdiction in certain matters, if so designated Specially in a state or federal law.** Patna High Court has are 53 Judges which includes 40 permanent and 13 additional judges.

P2: The Patna High Court is the principle civil courts in Bihar. However, a high court exercises its original civil and criminal jurisdiction only if the subordinate courts are not authorized by law to try such matters for lack of pecuniary, territorial jurisdiction. **High courts may also enjoy original jurisdiction in certain matters, if so designated Specially in a regional or national legislation.** Patna High Court has are 53 Judges which includes 40 permanent and 13 additional judges.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **state or federal law** and **regional or national legislation** interchangeable (i.e., having the same meaning)?

Pair 549

P1: Point Woronzof Park (also known as The Neverlands, or Seven Hills Ski Park) is a municipal park in Anchorage, Alaska. The park is excellent for backcountry skiing or snowshoeing in the winter, and biking or running in the summer. The park is home to flora and fauna similar to its **larger neighbor**, Kincaid Park (accessible several kilometers down the Coastal Trail.) Fox, lynx, and many moose are known to inhabit the park.

P2: Point Woronzof Park (also known as The Neverlands, or Seven Hills Ski Park) is a municipal park in Anchorage, Alaska. The park is excellent for backcountry skiing or snowshoeing in the winter, and biking or running in the summer. The park is home to flora and fauna similar to its **bigger nearby friend**, Kincaid Park (accessible several kilometers down the Coastal Trail.) Fox, lynx, and many moose are known to inhabit the park.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **larger neighbor** and **bigger nearby friend** interchangeable (i.e., having the same meaning)?

Pair 550

P1: The practicality and realism of pragmatic love often contributes to the longevity of the relationship, as long as common goals and values remain shared for the duration. Excessive thinking along these lines causes a relationship to be seen for its utility or as a trade or exchange. The attitude of a **pragmatic relationship** can become disdainful and toxic if one partner sees the other as a burden. Emphasis within pragmatic relationships is on earning, affordability, child care, and/or home service.

P2: The practicality and realism of pragmatic love often contributes to the longevity of the relationship, as long as common goals and values remain shared for the duration. Excessive thinking along these lines causes a relationship to be seen for its utility or as a trade or exchange. The attitude of a **practical affair** can become disdainful and toxic if one partner sees the other as a burden. Emphasis within pragmatic relationships is on earning, affordability, child care, and/or home service.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **pragmatic relationship** and **practical affair** interchangeable (i.e., having the same meaning)?

Pair 551

P1: The MECE principle can help the website segment the choices of visitors exhaustively. During this period, READY frameworks in content marketing are suggested to adopt, making the content persuasive. Besides, the presentation of the **landing page** including the positions, layouts, images and interaction features also contributes to the final conversions. Finally, conversion optimisation involves many performance metrics such as CPA (cost per acquisition), AOV (average order value), ROAS (return on ad spend), LTV (lifetime value) and ROI (overall return on investment).

P2: The MECE principle can help the website segment the choices of visitors exhaustively. During this period, READY frameworks in content marketing are suggested to adopt, making the content persuasive. Besides, the presentation of the **main folio** including the positions, layouts, images and interaction features also contributes to the final conversions. Finally, conversion optimisation involves many performance metrics such as CPA (cost per acquisition), AOV (average order value), ROAS (return on ad spend), LTV (lifetime value) and ROI (overall return on investment).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **landing page** and **main folio** interchangeable (i.e., having the same meaning)?

Pair 552

P1: He served until 1927, when he became the Republican gubernatorial nominee. The Democrats nominated former governor and senator J. C. W. Beckham to challenge Sampson. The **primary issue** in the campaign was whether to outlaw parimutuel betting at the state's racetracks. Beckham favored the ban, and Sampson opposed it.

P2: He served until 1927, when he became the Republican gubernatorial nominee. The Democrats nominated former governor and senator J. C. W. Beckham to challenge Sampson. **The essential problem in the campaign was whether to outlaw parimutuel betting at the state's racetracks.** Beckham favored the ban, and Sampson opposed it.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **primary issue** and **essential problem** interchangeable (i.e., having the same meaning)?

Pair 553

P1: This can be solved by solving the Euler equations This can be solved through iteration towards a steady-state value. This result replaces the default external force. **The primary issue with using GVF is the smoothing term formula_51 causes rounding of the edges of the contour.** Reducing the value of formula_51 reduces the rounding but weakens the amount of smoothing.

P2: This can be solved by solving the Euler equations This can be solved through iteration towards a steady-state value. This result replaces the default external force. **The immediate concern with using GVF is the smoothing term formula_51 causes rounding of the edges of the contour.** Reducing the value of formula_51 reduces the rounding but weakens the amount of smoothing.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **primary issue** and **immediate concern** interchangeable (i.e., having the same meaning)?

Pair 554

P1: Blackwell wrote the song at the offices of Shalimar Music in 1956 after Al Stanton, one of Shalimar's owners, shaking a bottle of Pepsi at the time, suggested he write a song based on the phrase "all shook up." According to Peter Guralnick, the song has a different origin. **In his book "Last Train to Memphis" he wrote that Elvis thought "All Shook Up" was a good phrase for a refrain.** For this he received a co-writing credit.

P2: Blackwell wrote the song at the offices of Shalimar Music in 1956 after Al Stanton, one of Shalimar's owners, shaking a bottle of Pepsi at the time, suggested he write a song based on the phrase "all shook up." According to Peter Guralnick, the song has a different origin. **In his book "Last Train to Memphis" he wrote that Elvis thought "All Shook Up" was a great sentence for a refrain.** For this he received a co-writing credit.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **good phrase** and **great sentence** interchangeable (i.e., having the same meaning)?

Pair 555

P1: Charles sent Silfvercrantz to the Levant to explore a future trade relationship, but he was unable to complete his work before his death the next year in 1712. In 1718, Charles died, and this marked the end of autocratic kingship in Sweden. **The subsequent age of Liberty saw a shift of power from the crown to the Riksdag of the Estates.** It was at this time that Sweden had ambitions to expand its influence in the Mediterranean.

P2: Charles sent Silfvercrantz to the Levant to explore a future trade relationship, but he was unable to complete his work before his death the next year in 1712. In 1718, Charles died, and this marked the end of autocratic kingship in Sweden. **The ensuing Age of Liberty saw a shift of power from the crown to the Riksdag of the Estates.** It was at this time that Sweden had ambitions to expand its influence in the Mediterranean.

Please record your answer for the following question in the provided Google sheet

Pair 556

P1: This can be achieved, in a few ways, one is by using another, usually smaller, mixing desk (the monitor mixer) and using either a split PA snake cable or mic 'Y' splitter cables. Both of these allow the required instrument or vocal inputs, to feed both the FOH mixer and monitor mixer. **These inputs can then be mixed on the monitor mixer, setting whatever level is required for each separate input e.g.** more guitar, less bass, more lead vocals, less backing vocals, thus providing a bespoke mix for whoever is connected to the sub-mixer.

P2: This can be achieved, in a few ways, one is by using another, usually smaller, mixing desk (the monitor mixer) and using either a split PA snake cable or mic 'Y' splitter cables. Both of these allow the required instrument or vocal inputs, to feed both the FOH mixer and monitor mixer. **These inputs can then be mixed on the monitor mixer, setting whichever degree is required for each separate input e.g.** more guitar, less bass, more lead vocals, less backing vocals, thus providing a bespoke mix for whoever is connected to the sub-mixer.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **whatever level** and **whichever degree** interchangeable (i.e., having the same meaning)?

Pair 557

P1: A receiver wishing to decode one of the three channels merely has to decode the payloads of each PID associated with its program. It can discard the contents of all other PIDs. **A transport stream with more than one program is referred to as a multi-program transport stream (MPTS).** A single program transport stream is referred to as a single-program transport stream (SPTS).

P2: A receiver wishing to decode one of the three channels merely has to decode the payloads of each PID associated with its program. It can discard the contents of all other PIDs. **A transport stream with more than a single project is referred to as a multi-program transport stream (MPTS).** A single program transport stream is referred to as a single-program transport stream (SPTS).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one program** and **a single project** interchangeable (i.e., having the same meaning)?

Pair 558

P1: In Germany, protests by schoolchildren continued. In New Delhi and elsewhere in India, over 20,000 protested against the war. **The largest demonstration comprised mainly Muslims, there was also a separate demonstration mainly made up of communists.** March 29, 2003.

P2: In Germany, protests by schoolchildren continued. In New Delhi and elsewhere in India, over 20,000 protested against the war. **The largest demonstration comprised mainly Muslims, there was also a huge manifestation mainly made up of communists.** March 29, 2003.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **separate demonstration** and **huge manifestation** interchangeable (i.e., having the same meaning)?

Pair 559

P1: The "Red Patch" is a distinguishing marking worn by United States Marines of the Landing Support Specialist MOS. History. **The red patch dates back to the early days of WWII during the Battle of Guadalcanal.** After the initial assault on the beachhead, follow-on troops came ashore and confusion on the beach led to landing support Marines (then

known as shore party) and infantrymen getting mixed together.

P2: The "Red Patch" is a distinguishing marking worn by United States Marines of the Landing Support Specialist MOS. History. **The rose colored area** dates back to the early days of WWII during the Battle of Guadalcanal. After the initial assault on the beachhead, follow-on troops came ashore and confusion on the beach led to landing support Marines (then known as shore party) and infantrymen getting mixed together.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **red patch** and **rose colored area** interchangeable (i.e., having the same meaning)?

Pair 560

P1: This was called the Malayan Emergency. While the first two years of the Emergency was marked by poor decision making and little progress being made against the communists, the situation improved drastically with the implementation of the Briggs Plan of 1950 which contained a forced resettlement program that effectively separated the MCP from its support base, the Min Yuen. **However, on 6 October 1951, the previous British High Commissioner to Malaya Sir Henry Gurney was murdered in an ambush attack** by communist insurgents. Soon after, British Prime Minister Winston Churchill tasked Secretary of State for the Colonies Oliver Lyttelton with the task of finding a suitable replacement for Gurney.

P2: This was called the Malayan Emergency. While the first two years of the Emergency was marked by poor decision making and little progress being made against the communists, the situation improved drastically with the implementation of the Briggs Plan of 1950 which contained a forced resettlement program that effectively separated the MCP from its support base, the Min Yuen. **However, on 6 October 1951, the previous British High Commissioner to Malaya Sir Henry Gurney was murdered in an unforeseen strike** by communist insurgents. Soon after, British Prime Minister Winston Churchill tasked Secretary of State for the Colonies Oliver Lyttelton with the task of finding a suitable replacement for Gurney.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **ambush attack** and **unforeseen strike** interchangeable (i.e., having the same meaning)?

Pair 561

P1: They concluded that the 1998 model adequately represented chronic fatigue secondary to psychiatric conditions, but not CFS. Contested causation may have serious negative effects on healthcare for individuals, as it may erode patient-provider trust, test the provider's self-assurance and capacity to share power with the patient, and raise problematic issues of reparation, compensation and blame. **In 2011, a major divide** still existed as to whether funding should be directed towards biomedical or psychological research. XMRV retrovirus.

P2: They concluded that the 1998 model adequately represented chronic fatigue secondary to psychiatric conditions, but not CFS. Contested causation may have serious negative effects on healthcare for individuals, as it may erode patient-provider trust, test the provider's self-assurance and capacity to share power with the patient, and raise problematic issues of reparation, compensation and blame. **In 2011, a huge difference** still existed as to whether funding should be directed towards biomedical or psychological research. XMRV retrovirus.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **major divide** and **huge difference** interchangeable (i.e., having the same meaning)?

Pair 562

P1: It is a massive Colonial Revival structure, 2-1/2 stories in height, built out of brick laid in tapestry bond, with a hip roof and a granite foundation; the brick was manufactured in Philadelphia. The roof is topped by a deck with railing, and is pierced by five brick chimneys and numerous dormers with gabled or hipped roofs. **The building is roughly rectangular and its block is ten bays in width, with flanking wings of decreasing size.** Most of the windows are sash,

although the south wing is set up as a solarium with large casement windows.

P2: It is a massive Colonial Revival structure, 2-1/2 stories in height, built out of brick laid in tapestry bond, with a hip roof and a granite foundation; the brick was manufactured in Philadelphia. The roof is topped by a deck with railing, and is pierced by five brick chimneys and numerous dormers with gabled or hipped roofs. **The building is roughly rectangular and its block is ten bays in width, with flanking wings of descending measure.** Most of the windows are sash, although the south wing is set up as a solarium with large casement windows.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **decreasing size** and **descending measure** interchangeable (i.e., having the same meaning)?

Pair 563

P1: Number Six gets the detonator, but is confronted by Number 100, who tries to take it from him. While they are fighting, the seal of office is transferred to the distinctly nervous new Number Two. **Number Six then gives the old number Two the detonator, telling him that it is his passport out of the Village.** He goes to the helicopter and leaves.

P2: Number Six gets the detonator, but is confronted by Number 100, who tries to take it from him. While they are fighting, the seal of office is transferred to the distinctly nervous new Number Two. **Number Six then gives the first figure Two the detonator, telling him that it is his passport out of the Village.** He goes to the helicopter and leaves.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **old number** and **first figure** interchangeable (i.e., having the same meaning)?

Pair 564

P1: Mann uses the moral bankruptcy and shallow ridiculousness of Hessling's life to critique Wilhelmine German society generally. Like other novels of the period, such as Theodor Fontane's "Effi Briest", or even his brother Thomas Mann's "Buddenbrooks", the principal target is the hypocrisy of bourgeois society and the risk of social collapse in a nation of loyal 'Untertan' citizens. **Thomas Mann, however, rejected the work as "heinous aestheticism", while Kurt Tucholsky proclaimed it as the "herbarium of the german man".** The novel is frequently read in German schools up to today.

P2: Mann uses the moral bankruptcy and shallow ridiculousness of Hessling's life to critique Wilhelmine German society generally. Like other novels of the period, such as Theodor Fontane's "Effi Briest", or even his brother Thomas Mann's "Buddenbrooks", the principal target is the hypocrisy of bourgeois society and the risk of social collapse in a nation of loyal 'Untertan' citizens. **Thomas Mann, however, rejected the work as "heinous aestheticism", while Kurt Tucholsky proclaimed it as the "herbarium of the german male".** The novel is frequently read in German schools up to today.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **german man** and **german male** interchangeable (i.e., having the same meaning)?

Pair 565

P1: "Okra" (stylized as "OKRA") is a song by American hip hop artist Tyler, the Creator, released as a digital single on March 29, 2018. It was written and produced by Tyler, the Creator. **Described by Tyler as a "throwaway song", the single garnered media attention for its abrupt release and a lyrical reference to American actor Timothée Chalamet.** "Okra" has been described as a rap song with bass, drums, snare, piano, and strings in its instrumentation, with its production complementing Tyler's vocal performance, which was shifted up one semitone.

P2: "Okra" (stylized as "OKRA") is a song by American hip hop artist Tyler, the Creator, released as a digital single on March 29, 2018. It was written and produced by Tyler, the Creator. **Described by Tyler as a "throwaway song", the single garnered media attention for its hasty drop and a lyrical reference to American actor Timothée Chalamet.** "Okra" has been described as a rap song with bass, drums, snare, piano, and strings in its instrumentation, with its production

complementing Tyler's vocal performance, which was shifted up one semitone.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **abrupt release** and **hasty drop** interchangeable (i.e., having the same meaning)?

Pair 566

P1: DSM. The Diagnostic and Statistical Manual of Mental Disorders (DSM) of the APA also has an avoidant personality disorder diagnosis (301.82). It refers to a **widespread pattern** of inhibition around people, feeling inadequate and being very sensitive to negative evaluation. Symptoms begin by early adulthood and occur in a range of situations.

P2: DSM. The Diagnostic and Statistical Manual of Mental Disorders (DSM) of the APA also has an avoidant personality disorder diagnosis (301.82). It refers to a **large sample** of inhibition around people, feeling inadequate and being very sensitive to negative evaluation. Symptoms begin by early adulthood and occur in a range of situations.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **widespread pattern** and **large sample** interchangeable (i.e., having the same meaning)?

Pair 567

P1: The Imperial Russian Navy soon followed suit, building a series of similar landing motor barges of the so-called "Bolinder"-class, named after the supplier of the diesels installed in them. These, however, proved too small and unseaworthy for their intended Black sea theater — they were intended for the planned Marmara Sea landings. **Instead, a new class was designed, based on the widespread pattern of the Black sea merchant steamers.** These were typically very light at the bow, having all their machinery concentrated at the stern, which allowed easy beaching on any gently sloping coast, and often were equipped with a bow ramp for fast unloading.

P2: The Imperial Russian Navy soon followed suit, building a series of similar landing motor barges of the so-called "Bolinder"-class, named after the supplier of the diesels installed in them. These, however, proved too small and unseaworthy for their intended Black sea theater — they were intended for the planned Marmara Sea landings. **Instead, a new class was designed, based on the comprehensive arrangement of the Black sea merchant steamers.** These were typically very light at the bow, having all their machinery concentrated at the stern, which allowed easy beaching on any gently sloping coast, and often were equipped with a bow ramp for fast unloading.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **widespread pattern** and **comprehensive arrangement** interchangeable (i.e., having the same meaning)?

Pair 568

P1: The piece is not to be confused with Alkan's earlier "Le vent", one of the "Trois morceaux" op. 15. **Kaikhosru Shapurji Sorabji considered the earlier piece to be better, making the later piece** rather anticlimactic and redundant. The piece was in the repertoire of Sergei Rachmaninoff in the 1919/1920 concert season.

P2: The piece is not to be confused with Alkan's earlier "Le vent", one of the "Trois morceaux" op. 15. **Kaikhosru Shapurji Sorabji considered the earlier piece to be better, making the most recent portion** rather anticlimactic and redundant. The piece was in the repertoire of Sergei Rachmaninoff in the 1919/1920 concert season.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **later piece** and **most recent portion** interchangeable (i.e., having the same meaning)?

Pair 569

P1: The ground under the cap of pedestal craters sometimes displays numerous layers. The cap of a pedestal crater protects material under it from eroding away. It is accepted that the material that now is only found under the pedestal crater's cap formerly covered the whole region. Hence, layers now just visible under pedestal craters once covered the whole area.

P2: The ground under the cap of pedestal craters sometimes displays numerous layers. The cap of a pedestal crater protects material under it from eroding away. It is accepted that the material that now is only found under the pedestal crater's cap formerly covered the complete area. Hence, layers now just visible under pedestal craters once covered the whole area.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are whole region and complete area interchangeable (i.e., having the same meaning)?

Pair 570

P1: A love letter was found near the decedent, addressed to nobody, and written in both English and Scottish Gaelic. It began with "Dear Love of my heart (A ghraidh mo chridhe)" before fading into nothing. Various greeting cards and prescription bottles were also found by the decedent, all with any identifiers or names torn out or removed. Investigators do not believe that she was a transient, as she had had extensive dental work as well as expensive makeup on her face, but evidence suggested she had lived at the location for a few days and had died a day before.

P2: A love letter was found near the decedent, addressed to nobody, and written in both English and Scottish Gaelic. It began with "Dear Love of my heart (A ghraidh mo chridhe)" before fading into nothing. Various greeting cards and medication containers were also found by the decedent, all with any identifiers or names torn out or removed. Investigators do not believe that she was a transient, as she had had extensive dental work as well as expensive makeup on her face, but evidence suggested she had lived at the location for a few days and had died a day before.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are prescription bottles and medication containers interchangeable (i.e., having the same meaning)?

Pair 571

P1: For customers, Pet Check allows them to see exactly when their dog was taken out for a walk, where they went, and what time they got back. How it works. The dog walker scans a QR code with the Pet Check mobile app for iOS or Android when arriving to pick up a dog. The app displays their schedule as well as any notes (such as number of stops and interaction with other dogs) for customer walk reports.

P2: For customers, Pet Check allows them to see exactly when their dog was taken out for a walk, where they went, and what time they got back. How it works. The hound's walking partner scans a QR code with the Pet Check mobile app for iOS or Android when arriving to pick up a dog. The app displays their schedule as well as any notes (such as number of stops and interaction with other dogs) for customer walk reports.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are dog walker and hound's walking partner interchangeable (i.e., having the same meaning)?

Pair 572

P1: The electric and magnetic field inside the cell can be accurately predicted using numerical methods. A GTEM cell external enclosure is made of conductive material such as metal, in the shape of a long, rectangular base pyramid. The pyramid is normally laid flat on the major side (bottom), although occasionally it may be stood on its base. Basically, the GTEM cell is a tapered rectangular 50 Ohm transmission stripline closed on a 50 Ohm load where the inner is called

SEPTUM.

P2: The electric and magnetic field inside the cell can be accurately predicted using numerical methods. A GTEM cell external enclosure is made of conductive material such as metal, in the shape of a long, rectangular base pyramid. The pyramid is normally laid flat on the **dominant part** (bottom), although occasionally it may be stood on its base. Basically, the GTEM cell is a tapered rectangular 50 Ohm transmission stripline closed on a 50 Ohm load where the inner is called SEPTUM.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **major side** and **dominant part** interchangeable (i.e., having the same meaning)?

Pair 573

P1: Nearly all opposed U.S. Senator Ben Tillman, who repeatedly attacked and ridiculed the city in the name of upstate poor farmers. Well-organized factions within the Democratic Party in Charleston gave the voters **clear choices** and played a large role in state politics. The Charleston riot of 1919, of whites against blacks, was the worst violence in Charleston since the Civil War.

P2: Nearly all opposed U.S. Senator Ben Tillman, who repeatedly attacked and ridiculed the city in the name of upstate poor farmers. Well-organized factions within the Democratic Party in Charleston gave the voters **distinct selections** and played a large role in state politics. The Charleston riot of 1919, of whites against blacks, was the worst violence in Charleston since the Civil War.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **clear choices** and **distinct selections** interchangeable (i.e., having the same meaning)?

Pair 574

P1: Despite the high cost of construction, the Bell System divestiture meant that AT&T never fully occupied 550 Madison Avenue. In early 1984, AT&T indicated that, rather than constructing a museum in the annex for bonus zoning, it would use the annex for a showroom. The change of plan came following the Bell divestiture and the **reduced presence** it expected to have at the building. After the city firmly opposed the move, AT&T agreed to construct a three-story exhibition space within the annex.

P2: Despite the high cost of construction, the Bell System divestiture meant that AT&T never fully occupied 550 Madison Avenue. In early 1984, AT&T indicated that, rather than constructing a museum in the annex for bonus zoning, it would use the annex for a showroom. The change of plan came following the Bell divestiture and the **minimized occupancy** it expected to have at the building. After the city firmly opposed the move, AT&T agreed to construct a three-story exhibition space within the annex.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **reduced presence** and **minimized occupancy** interchangeable (i.e., having the same meaning)?

Pair 575

P1: Condensed systems, like liquids or solids, have a continuous density of states distribution and often possess continuous energy bands. In order for a substance to change its energy it must do so in a series of "steps" by the absorption of a photon. This absorption process can move a particle, like an electron, from an **occupied state** to an empty or unoccupied state. It can also move a whole vibrating or rotating system, like a molecule, from one vibrational or rotational state to another or it can create a quasiparticle like a phonon or a plasmon in a solid.

P2: Condensed systems, like liquids or solids, have a continuous density of states distribution and often possess continuous energy bands. In order for a substance to change its energy it must do so in a series of "steps" by the absorption of a photon. This absorption process can move a particle, like an electron, from an **in use condition** to an empty or

unoccupied state. It can also move a whole vibrating or rotating system, like a molecule, from one vibrational or rotational state to another or it can create a quasiparticle like a phonon or a plasmon in a solid.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **occupied state** and **in use condition** interchangeable (i.e., having the same meaning)?

Pair 576

P1: The grain of the model is the exact description of what the dimensional model should be focusing on. This could for instance be “An individual line item on a customer slip from a retail store”. **To clarify what the grain means, you should pick the central process and describe it with one sentence.** Furthermore, the grain (sentence) is what you are going to build your dimensions and fact table from.

P2: The grain of the model is the exact description of what the dimensional model should be focusing on. This could for instance be “An individual line item on a customer slip from a retail store”. **To clarify what the grain means, you should pick the central process and describe it with a single phrase.** Furthermore, the grain (sentence) is what you are going to build your dimensions and fact table from.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one sentence** and **a single phrase** interchangeable (i.e., having the same meaning)?

Pair 577

P1: As with the long game, the hobs are 18 yards apart, but their tops are raised above the level of the clay. Quoits that land cleanly over the hob score two points, regardless of the opponent’s efforts, and are removed immediately, prior to the next throw. **Quoits which land on their backs, or inclined in a backwards direction,** are also removed immediately **United States.** Traditional American 4lb quoits.

P2: As with the long game, the hobs are 18 yards apart, but their tops are raised above the level of the clay. Quoits that land cleanly over the hob score two points, regardless of the opponent’s efforts, and are removed immediately, prior to the next throw. **Quoits which land on their backs, or inclined in a rearward angle,** are also removed immediately **United States.** Traditional American 4lb quoits.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **backwards direction** and **rearward angle** interchangeable (i.e., having the same meaning)?

Pair 578

P1: In interspersed shots, several people wear white masks, which the band said signifies that “in essence we are all the same, we are equal in the right to dream and aspire to the highest goals”. For further promotion, The Humans appeared on various Romanian talk shows before and after their “**Selecția Națională**” win and commenced a tour in Europe. **one destination** was the ITB Berlin in Berlin, Germany, where promotional CDs of the song were handed. The band also had endeavours in Israel, Spain and Portugal.

P2: In interspersed shots, several people wear white masks, which the band said signifies that “in essence we are all the same, we are equal in the right to dream and aspire to the highest goals”. For further promotion, The Humans appeared on various Romanian talk shows before and after their “**Selecția Națională**” win and commenced a tour in Europe. **a journey** was the ITB Berlin in Berlin, Germany, where promotional CDs of the song were handed. The band also had endeavours in Israel, Spain and Portugal.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one destination** and **a journey** interchangeable (i.e., having the same meaning)?

Pair 579

P1: Aguié (var. Aguié, Agyé) is a town and capital of the Aguié Department in southern Niger, east of the nation's second largest Maradi. Administrative structure.

P2: Aguié (var. Aguié, Agyé) is a town and capital of the Aguié Department in southern Niger, east of the country's 2nd biggest Maradi. Administrative structure.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are nation's second largest city and country's 2nd biggest province interchangeable (i.e., having the same meaning)?

Pair 580

P1: Inflation under 2% is in green. Contemporary economy. Sweden is an export-oriented mixed economy featuring a modern distribution system, excellent internal and external communications, and a skilled labor force. Timber, hydropower and iron ore constitute the resource base of an economy heavily oriented toward foreign trade.

P2: Inflation under 2% is in green. Contemporary economy. Sweden is an export-oriented mixed economy featuring a contemporary allocation complex, excellent internal and external communications, and a skilled labor force. Timber, hydropower and iron ore constitute the resource base of an economy heavily oriented toward foreign trade.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are modern distribution system and contemporary allocation complex interchangeable (i.e., having the same meaning)?

Pair 581

P1: At the time, the fifth wheel literally was a wheel that moved with the trailer—unlike today's technology that secures a kingpin. What makes the fifth wheel so important is the ability it gave fleet owners to attach large trailers to tractors easily and safely and the freedom it gave them to switch out trailers. Without a fifth wheel, the modern distribution system would look quite different as drop-and-hook would not be easy. The semi-trailer increased the capacity of trucks, but it was the fifth wheel that brought the flexibility for drivers to keep moving while receivers unloaded the loads they just delivered.

P2: At the time, the fifth wheel literally was a wheel that moved with the trailer—unlike today's technology that secures a kingpin. What makes the fifth wheel so important is the ability it gave fleet owners to attach large trailers to tractors easily and safely and the freedom it gave them to switch out trailers. Without a fifth wheel, the current placement structure would look quite different as drop-and-hook would not be easy. The semi-trailer increased the capacity of trucks, but it was the fifth wheel that brought the flexibility for drivers to keep moving while receivers unloaded the loads they just delivered.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are modern distribution system and current placement structure interchangeable (i.e., having the same meaning)?

Pair 582

P1: In 2012, research revealed that the fringed sandwort had survived the Ice Age and is perhaps 100,000 years old. In Ireland the plant is unique to Benbulbin. The discovery calls into question the prior consensus that Ireland's flora and fauna date from or after the end of the Ice Age. In Irish history.

P2: In 2012, research revealed that the fringed sandwort had survived the Ice Age and is perhaps 100,000 years old. In Ireland the plant is unique to Benbulbin. The discovery calls into question the initial unanimity that Ireland's flora

and fauna date from or after the end of the Ice Age. In Irish history.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **prior consensus** and **initial unanimity** interchangeable (i.e., having the same meaning)?

Pair 583

P1: In the May 17, 1999 edition of the "Wrestling Observer Newsletter", Dave Meltzer wrote, "The Power Plant, for all its hype, has been a total flop. How many stars have come out of the Power Plant? **The Giant, who didn't become a star because he was taught to be a skillful performer or a good interview**, and Bill Goldberg. They both had an incredible can't miss physical look and, for their respective sizes, exceptional athletic ability which overcame the fact that neither were anything close to complete packages when they were put out in front of the public.

P2: In the May 17, 1999 edition of the "Wrestling Observer Newsletter", Dave Meltzer wrote, "The Power Plant, for all its hype, has been a total flop. How many stars have come out of the Power Plant? **The Giant, who didn't become a star because he was taught to be a skillful performer or a great conference**, and Bill Goldberg. They both had an incredible can't miss physical look and, for their respective sizes, exceptional athletic ability which overcame the fact that neither were anything close to complete packages when they were put out in front of the public.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **good interview** and **great conference** interchangeable (i.e., having the same meaning)?

Pair 584

P1: The left curve, labeled monogamous, is the perceived biological fitness for a female entering into a monogamous relationship with a given male. The right curve, labeled bigamous, shows the fitness of the same female entering into a relationship with a different male who already has one female mate but who has defended more resources. **The second curve is roughly the first curve shifted to the right some amount.** The given shapes of the curve will change with other intrinsic factors like genetic quality and male paternal investment.

P2: The left curve, labeled monogamous, is the perceived biological fitness for a female entering into a monogamous relationship with a given male. The right curve, labeled bigamous, shows the fitness of the same female entering into a relationship with a different male who already has one female mate but who has defended more resources. **The second curve is roughly the initial arch shifted to the right some amount.** The given shapes of the curve will change with other intrinsic factors like genetic quality and male paternal investment.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **first curve** and **initial arch** interchangeable (i.e., having the same meaning)?

Pair 585

P1: The listed times were achieved in the qualification race. The listed times were achieved in the qualification race. **Northug fell in the first curve of the final, taking Pettersen and Fredriksson with him.** Stage 2: Pursuit Oberstdorf, 2 January.

P2: The listed times were achieved in the qualification race. The listed times were achieved in the qualification race. **Northug fell in the initial loop of the final, taking Pettersen and Fredriksson with him.** Stage 2: Pursuit Oberstdorf, 2 January.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **first curve** and **initial loop** interchangeable (i.e., having the same meaning)?

Pair 586

P1: Single piece of disagreement. Let "C" be the entire cake. The protocol starts with a **specific piece** of cake, say "X C", which is valued differently by two partners. Call these partners Alice and Bob.

P2: Single piece of disagreement. Let "C" be the entire cake. The protocol starts with a **definite chunk** of cake, say "X C", which is valued differently by two partners. Call these partners Alice and Bob.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **specific piece** and **definite chunk** interchangeable (i.e., having the same meaning)?

Pair 587

P1: It was named as a national AAAA class tourist spot in 2005. This spot is also a famous national Forest Park, with a total area of 50 square kilometers. The Pearl River Sources has a **unique advantage** for the tourism industry, as it has abundant scenic resources. Rivers.

P2: It was named as a national AAAA class tourist spot in 2005. This spot is also a famous national Forest Park, with a total area of 50 square kilometers. The Pearl River Sources has a **distinct position** for the tourism industry, as it has abundant scenic resources. Rivers.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **unique advantage** and **distinct position** interchangeable (i.e., having the same meaning)?

Pair 588

P1: A group with a "single eye" can normally be captured, in the end, by filling first round the outside. The purpose of making "two eyes" is to prevent this. Novices sometimes interpret "making two eyes" in a **narrow way**, and form 'explicit' eyes one by one. This is often the wrong approach, and it is better to play generally to make a territory inside a group out of which "two eyes can surely be made", if and when the opponent attacks it.

P2: A group with a "single eye" can normally be captured, in the end, by filling first round the outside. The purpose of making "two eyes" is to prevent this. Novices sometimes interpret "making two eyes" in a **restricted manner**, and form 'explicit' eyes one by one. This is often the wrong approach, and it is better to play generally to make a territory inside a group out of which "two eyes can surely be made", if and when the opponent attacks it.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **narrow way** and **restricted manner** interchangeable (i.e., having the same meaning)?

Pair 589

P1: The "Santa Cruz Sentinel" reported that "[i]n a 4-3 vote [on September 28, 2010], the City Council approved a contract for a \$1.6 million grant from the California Dental Association Foundation to design and build a fluoridation system and operate it for two years." Eventually, the California Dental Association Foundation notified the City that it would be too expensive to fluoridate the City's water supply. In the absence of funding from an **outside source**, there is no state requirement and the City's water supply remains un-fluoridated. State and federal representation.

P2: The "Santa Cruz Sentinel" reported that "[i]n a 4-3 vote [on September 28, 2010], the City Council approved a contract for a \$1.6 million grant from the California Dental Association Foundation to design and build a fluoridation system and operate it for two years." Eventually, the California Dental Association Foundation notified the City that it would be too expensive to fluoridate the City's water supply. In the absence of funding from an **external origin**, there

is no state requirement and the City's water supply remains un-fluoridated. State and federal representation.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **outside source** and **external origin** interchangeable (i.e., having the same meaning)?

Pair 590

P1: Many of the locations at the Bahá í World Centre, including the terraces and the Shrine of the Báb which constitute the north slope of Mount Carmel, were inscribed on the World Heritage List in July 2008. History. The location of the administrative centre was a result of a **successive number** of banishments and imprisonments of Bahá u'lláh, founder of the Bahá í Faith. Bahá u'lláh was banished from Persia by Nasser-al-Din Shah in 1853, at which time Bahá u'lláh went to Baghdad in the Ottoman Empire.

P2: Many of the locations at the Bahá í World Centre, including the terraces and the Shrine of the Báb which constitute the north slope of Mount Carmel, were inscribed on the World Heritage List in July 2008. History. The location of the administrative centre was a result of a **consecutive amount** of banishments and imprisonments of Bahá u'lláh, founder of the Bahá í Faith. Bahá u'lláh was banished from Persia by Nasser-al-Din Shah in 1853, at which time Bahá u'lláh went to Baghdad in the Ottoman Empire.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **successive number** and **consecutive amount** interchangeable (i.e., having the same meaning)?

Pair 591

P1: The rise of social media is rather supportive to long-form journalism. In assuming that the audience for a long story consists of either people who wish for definitive pieces, or people whose tastes spark their desire to be immersed in a creatively structured piece of storytelling, then the audience is most likely geographically and demographically dispersed yet potentially very passionate regarding such articles (and also the nature of their content). Social media, trusted recommendations through Facebook, Twitter and others, allow people find their **desired piece** of long-form journalism. As of 2011, "The Tyee"'s Twitter feed had about 47,000 followers.

P2: The rise of social media is rather supportive to long-form journalism. In assuming that the audience for a long story consists of either people who wish for definitive pieces, or people whose tastes spark their desire to be immersed in a creatively structured piece of storytelling, then the audience is most likely geographically and demographically dispersed yet potentially very passionate regarding such articles (and also the nature of their content). Social media, trusted recommendations through Facebook, Twitter and others, allow people find their **preferred fragment** of long-form journalism. As of 2011, "The Tyee"'s Twitter feed had about 47,000 followers.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **desired piece** and **preferred fragment** interchangeable (i.e., having the same meaning)?

Pair 592

P1: This turned out to be Maradona's last international goal for Argentina. In the second game, a 2-1 victory over Nigeria which was to be his last game for Argentina, he set up both of his team's goals on free kicks, the second an assist to Caniggia. In his autobiography, Maradona argued that the **test result** was due to his personal trainer giving him the power drink Rip Fuel. His claim was that the U.S. version, unlike the Argentine one, contained the chemical and that, having run out of his Argentine dosage, his trainer unwittingly bought the U.S. formula.

P2: This turned out to be Maradona's last international goal for Argentina. In the second game, a 2-1 victory over Nigeria which was to be his last game for Argentina, he set up both of his team's goals on free kicks, the second an assist to Caniggia. In his autobiography, Maradona argued that the **assessment aftermath** was due to his personal trainer giving him the power drink Rip Fuel. His claim was that the U.S. version, unlike the Argentine one, contained

the chemical and that, having run out of his Argentine dosage, his trainer unwittingly bought the U.S. formula.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **test result** and **assessment aftermath** interchangeable (i.e., having the same meaning)?

Pair 593

P1: Marc Galanter (MD), professor of Psychiatry and Director of the Division of Alcoholism and Drug Abuse at the New York University Medical Center, writes that "over the long term of membership, meditation also played an important role in supporting a convert's continuing involvement. An analysis of the relationship between the time members spent in meditation and the decline in their level of neurotic distress revealed that greater meditation time was associated with diminished neurotic distress. **This association suggests that the emotional response to meditation acts as a reinforcement for its continued practice.**" That is, the more a member meditated, in general, the better the person was likely to feel.

P2: Marc Galanter (MD), professor of Psychiatry and Director of the Division of Alcoholism and Drug Abuse at the New York University Medical Center, writes that "over the long term of membership, meditation also played an important role in supporting a convert's continuing involvement. An analysis of the relationship between the time members spent in meditation and the decline in their level of neurotic distress revealed that greater meditation time was associated with diminished neurotic distress. **This association suggests that the emotional response to meditation acts as a reinforcement for its regular use.**" That is, the more a member meditated, in general, the better the person was likely to feel.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **continued practice** and **regular use** interchangeable (i.e., having the same meaning)?

Pair 594

P1: The Goat River is tributary of the Kootenay River in the Canadian province of British Columbia. The river meets the Kootenay near the town of Creston. **The Goat River Dam, constructed in the 1930s, was an early source of electricity for the town.** Before dikes were built, the river was a major source of spring flooding in the Creston valley.

P2: The Goat River is tributary of the Kootenay River in the Canadian province of British Columbia. The river meets the Kootenay near the town of Creston. **The Goat River Dam, constructed in the 1930s, was an original origin of electricity for the town.** Before dikes were built, the river was a major source of spring flooding in the Creston valley.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **early source** and **original origin** interchangeable (i.e., having the same meaning)?

Pair 595

P1: Isa says he has ministered to the Mlecchas, explaining that he has reformed the lives of the mlecchas by recommending principles of mental purity, japa by chanting holy names, and meditation. Kersten interprets this as a record of Jesus in Kashmir. **In reality the passage is an 18th-century dialogue also featuring Muhammed, and not an early source as Ahmad claimed.** Most scholars consider this part of the Purana to be a 19th-century interpolation.

P2: Isa says he has ministered to the Mlecchas, explaining that he has reformed the lives of the mlecchas by recommending principles of mental purity, japa by chanting holy names, and meditation. Kersten interprets this as a record of Jesus in Kashmir. **In reality the passage is an 18th-century dialogue also featuring Muhammed, and not an ancient birthplace as Ahmad claimed.** Most scholars consider this part of the Purana to be a 19th-century interpolation.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **early source** and **ancient birthplace** interchangeable (i.e., having the same meaning)?

Pair 596

P1: This configuration is also used for many "Star Wars" Droids; Battle Droids follow the same pattern, while Super Battle Droids feature a head fixed to a torso, General Grievous has space for four arms, and IG-88 has a head constructed of other Lego pieces. Other droids, such as Droidekas, Spider Droids and Pit Droids, are constructed entirely from standard Lego pieces, yet are still generally considered minifigures. R2-D2 and other astromech droids are constructed from unique parts, with a separate top, body and legs. The robots of Exo-Force, Mars Mission commander aliens and Bionicle miniatures have a design similar to the Star Wars Battle Droids, but with separate legs, movable hands, and a head affixed to a small torso.

P2: This configuration is also used for many "Star Wars" Droids; Battle Droids follow the same pattern, while Super Battle Droids feature a head fixed to a torso, General Grievous has space for four arms, and IG-88 has a head constructed of other Lego pieces. Other droids, such as Droidekas, Spider Droids and Pit Droids, are constructed entirely from standard Lego pieces, yet are still generally considered minifigures. R2-D2 and other astromech droids are constructed from unique parts, with a distinct upper portion, body and legs. The robots of Exo-Force, Mars Mission commander aliens and Bionicle miniatures have a design similar to the Star Wars Battle Droids, but with separate legs, movable hands, and a head affixed to a small torso.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are separate top and distinct upper portion interchangeable (i.e., having the same meaning)?

Pair 597

P1: Academics and student life. Santa Teresa High School has roughly 2,300 students, both male and female, and spans 9th through 12th grades. The average ratio at STHS is 25 students for every teacher. STHS serves as magnet school for ESUHSD and offers a specialty program in multimedia arts.

P2: Academics and student life. Santa Teresa High School has roughly 2,300 students, both male and female, and spans 9th through 12th grades. The common proportion at STHS is 25 students for every teacher. STHS serves as magnet school for ESUHSD and offers a specialty program in multimedia arts.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are average ratio and common proportion interchangeable (i.e., having the same meaning)?

Pair 598

P1: In the presence of large BLM concentrations, pseudoapoptosis is observed as rapid DNA fragmentation occurs, resulting in cell death in the absence of typical apoptotic components such as specific endonucleases and proteases. Experimental evidence has suggested that every BLM molecule induces an average of 8 to 10 DNA strand breaks. An average ratio of 6 single-stranded breaks are generated for every double-stranded break. These numbers are dependent upon the form of BLM taken into consideration as deglyco-bleomycin has been found to be 100 times less toxic than wild-type BLM.

P2: In the presence of large BLM concentrations, pseudoapoptosis is observed as rapid DNA fragmentation occurs, resulting in cell death in the absence of typical apoptotic components such as specific endonucleases and proteases. Experimental evidence has suggested that every BLM molecule induces an average of 8 to 10 DNA strand breaks. An ordinary percentage of 6 single-stranded breaks are generated for every double-stranded break. These numbers are dependent upon the form of BLM taken into consideration as deglyco-bleomycin has been found to be 100 times less toxic than wild-type BLM.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are average ratio and ordinary percentage interchangeable (i.e., having the same meaning)?

Pair 599

P1: Thai police arrested three musicians for the crime. The Thai government has worked with other countries to manage crime and, for example, has a prisoner exchange agreement with Australia. In the case of Wendy Albano, India, Thailand, and the United States all worked together to find the **primary suspect** hiding in India. In that case that the help then U.S. Secretary of State Hillary Clinton and a U.S. senator was involved.

P2: Thai police arrested three musicians for the crime. The Thai government has worked with other countries to manage crime and, for example, has a prisoner exchange agreement with Australia. In the case of Wendy Albano, India, Thailand, and the United States all worked together to find the **leading defendant** hiding in India. In that case that the help then U.S. Secretary of State Hillary Clinton and a U.S. senator was involved.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **primary suspect** and **leading defendant** interchangeable (i.e., having the same meaning)?

Pair 600

P1: Footprints in detective work. The print left behind at a crime scene can give vital evidence to the perpetrator of the crime. Shoes have many different prints based on the **sole design** and the wear that it has received this can help to identify suspects. Photographs or castings of footprints can be taken to preserve the finding.

P2: Footprints in detective work. The print left behind at a crime scene can give vital evidence to the perpetrator of the crime. Shoes have many different prints based on the **bottom construction** and the wear that it has received this can help to identify suspects. Photographs or castings of footprints can be taken to preserve the finding.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **sole design** and **bottom construction** interchangeable (i.e., having the same meaning)?

Pair 601

P1: The Macintosh had a 9-inch monochrome display that could display 512×342 pixels which would be used in all monochrome Compact Macintosh computers. A new external AppleColor High-Resolution RGB Monitor was introduced in 1987 for the Macintosh II. It had a 13 Trinitron CRT (the first Apple display to use an aperture grille CRT) with a **fixed resolution** of 640×480 pixels. The Macintosh II was an modular system with no internal display and was able to drive up to six displays simultaneously using multiple graphics cards.

P2: The Macintosh had a 9-inch monochrome display that could display 512×342 pixels which would be used in all monochrome Compact Macintosh computers. A new external AppleColor High-Resolution RGB Monitor was introduced in 1987 for the Macintosh II. It had a 13 Trinitron CRT (the first Apple display to use an aperture grille CRT) with a **predetermined design** of 640×480 pixels. The Macintosh II was an modular system with no internal display and was able to drive up to six displays simultaneously using multiple graphics cards.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **fixed resolution** and **predetermined design** interchangeable (i.e., having the same meaning)?

Pair 602

P1: In June 1612 he was nominated commissioner of the treasury on Salisbury's death. In November 1616 he was made treasurer of the household, but on 23 December 1617 he was "persuaded" to retire from that office by the payment of

five thousand pounds. This did not satisfy him, and he clung to office some weeks longer in the vain hope of extracting a viscountancy as a further compensation. He was excluded from the council on Charles I's accession on the grounds of being a Roman Catholic.

P2: In June 1612 he was nominated commissioner of the treasury on Salisbury's death. In November 1616 he was made treasurer of the household, but on 23 December 1617 he was "persuaded" to retire from that office by the payment of five thousand pounds. This did not satisfy him, and he clung to office some weeks longer in the frivolous hankering of extracting a viscountancy as a further compensation. He was excluded from the council on Charles I's accession on the grounds of being a Roman Catholic.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **vain hope** and **frivolous hankering** interchangeable (i.e., having the same meaning)?

Pair 603

P1: He and his wife Helen are credited with blazing a trail in the East Bay area near their home in Lafayette, California. This trail has since become a part of the American Hiking Association's cross-country network of trails. Seaborg and his wife walked the trail network from Contra Costa County all the way to the California-Nevada border. Seaborg was elected a foreign member of the Royal Swedish Academy of Sciences in 1972 and a Foreign Member of the Royal Society (ForMemRS) of London in 1985.

P2: He and his wife Helen are credited with blazing a trail in the East Bay area near their home in Lafayette, California. This trail has since become a part of the American Hiking Association's cross-country network of trails. Seaborg and his wife walked the track systems from Contra Costa County all the way to the California-Nevada border. Seaborg was elected a foreign member of the Royal Swedish Academy of Sciences in 1972 and a Foreign Member of the Royal Society (ForMemRS) of London in 1985.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **trail network** and **track systems** interchangeable (i.e., having the same meaning)?

Pair 604

P1: The case is not the same where the existence of a periodontal ligament does not always correspond with resorption in teeth that have limited growth period. Cases do however happen in which rootless teeth erupt and when a periodontal ligament is present, and the tooth does not erupt. one significant difference in the formation of fibres exists between teeth that have predecessors and teeth that do not have predecessors. For the former group of teeth (such as the permanent incisors, the canines and the premolars), the principal fibres group will develop later than in the latter group of teeth (such as the deciduous teeth and the permanent molars).

P2: The case is not the same where the existence of a periodontal ligament does not always correspond with resorption in teeth that have limited growth period. Cases do however happen in which rootless teeth erupt and when a periodontal ligament is present, and the tooth does not erupt. a meaningful distinction in the formation of fibres exists between teeth that have predecessors and teeth that do not have predecessors. For the former group of teeth (such as the permanent incisors, the canines and the premolars), the principal fibres group will develop later than in the latter group of teeth (such as the deciduous teeth and the permanent molars).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one significant difference** and **a meaningful distinction** interchangeable (i.e., having the same meaning)?

Pair 605

P1: By September 2, E Company in a heavy battle had destroyed most of a KPA battalion. Bitter, confused fighting continued behind the 35th Infantry's line for the next week. Battalions, companies, and platoons, cut off and isolated, fought independently of higher control and help except for airdrops which supplied many of them. Airdrops also sup-

plied relief forces trying to reach the front-line units.

P2: By September 2, E Company in a heavy battle had destroyed most of a KPA battalion. Bitter, confused fighting continued behind the 35th Infantry's line for the next week. **Battalions, companies, and platoons, cut off and isolated, fought independently of bigger power and help except for airdrops which supplied many of them.** Airdrops also supplied relief forces trying to reach the front-line units.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **higher control** and **bigger power** interchangeable (i.e., having the same meaning)?

Pair 606

P1: Friction whirligigs, also called gee-haws, depend on the holder rubbing a stick against a notched shaft resulting in a propeller at the end of the shaft turning, largely as the result of the vibration carried along the shaft. The motion needed to power a friction whirligig is very similar to rubbing sticks together to create fire. **Friction whirligigs are another staple of craft shops and souvenir stores in the Appalachian Mountains.** Wind-driven.

P2: Friction whirligigs, also called gee-haws, depend on the holder rubbing a stick against a notched shaft resulting in a propeller at the end of the shaft turning, largely as the result of the vibration carried along the shaft. The motion needed to power a friction whirligig is very similar to rubbing sticks together to create fire. **Friction whirligigs are an added fundamental of craft shops and souvenir stores in the Appalachian Mountains.** Wind-driven.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **another staple** and **an added fundamental** interchangeable (i.e., having the same meaning)?

Pair 607

P1: Occasions such as childbirth, new employment, and fraternity/sorority pledging are all associated with the formation of new social attachments surrounded by positive emotions. Forming bonds is cause for joy, especially when the bond is given a permanent status, such as a wedding. **Weddings signify permanent commitment and complete the social bond by committing to the spouse's need to belong.** Positive experiences shared emotions increases attraction with others.

P2: Occasions such as childbirth, new employment, and fraternity/sorority pledging are all associated with the formation of new social attachments surrounded by positive emotions. Forming bonds is cause for joy, especially when the bond is given a permanent status, such as a wedding. **Weddings signify permanent commitment and complete the public partnership by committing to the spouse's need to belong.** Positive experiences shared emotions increases attraction with others.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **social bond** and **public partnership** interchangeable (i.e., having the same meaning)?

Pair 608

P1: The singular form of the Quenya noun is "Noldo" and the adjective is "Noldorin", which is also the name of their dialect of Quenya. Tolkien gave some Noldorin leaders like Finwë and Fingolfin their own heraldic devices, carefully distinguishing their ranks by the number of points touching the rim. **Scholars including Dimitra Fimi, A. Kinniburgh, and John Garth have connected the Noldor with the Irish Tuatha Dé Danaan as a possible influence.** The parallels are both thematic and direct.

P2: The singular form of the Quenya noun is "Noldo" and the adjective is "Noldorin", which is also the name of their dialect of Quenya. Tolkien gave some Noldorin leaders like Finwë and Fingolfin their own heraldic devices, carefully distinguishing their ranks by the number of points touching the rim. **Scholars including Dimitra Fimi, A. Kinniburgh, and John Garth have connected the Noldor with the Irish Tuatha Dé Danaan as a viable significance.** The parallels

are both thematic and direct.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **possible influence** and **viable significance** interchangeable (i.e., having the same meaning)?

Pair 609

P1: Similarly, the arrangement of art in exhibits is often deliberately non-random. One case of this was Hitler's attempt to portray modern art in the worst possible light by arranging works in worst possible manner. A case can be made for trying to make art in the **worst possible way**; i.e., either as anti-art, or as actually random art. Dadaism, as well as many other movements in art and letters, has attempted to accommodate and acknowledge randomness in various ways.

P2: Similarly, the arrangement of art in exhibits is often deliberately non-random. One case of this was Hitler's attempt to portray modern art in the worst possible light by arranging works in worst possible manner. A case can be made for trying to make art in the **most catastrophic manner**; i.e., either as anti-art, or as actually random art. Dadaism, as well as many other movements in art and letters, has attempted to accommodate and acknowledge randomness in various ways.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **worst possible way** and **most catastrophic manner** interchangeable (i.e., having the same meaning)?

Pair 610

P1: Kathleen Delea) added Cork goals early in the second half. Máire Ní Cheallaigh wrote in the "Irish Press": Yesterday at Croke Park 3,000 spectators were treated to a high class game which never lost interest to the end. The teams played with **great dash** and though Louth were the more spectacular, Cork were better strikers and had a sound forward line. Presentation.

P2: Kathleen Delea) added Cork goals early in the second half. Máire Ní Cheallaigh wrote in the "Irish Press": Yesterday at Croke Park 3,000 spectators were treated to a high class game which never lost interest to the end. The teams played with **awesome speed** and though Louth were the more spectacular, Cork were better strikers and had a sound forward line. Presentation.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **great dash** and **awesome speed** interchangeable (i.e., having the same meaning)?

Pair 611

P1: Some mainstream piano methods, such as Faber Piano Adventures, have started offering improvisation options. But in most methods, improvisation remains supplemental, with the core curriculum centering around notation, theory, and technique. There are exceptions, such as The Music Tree, where **every unit** in the core lesson book has an improvisation activity. One playing-based piano method, Simply Music, includes improvisation beginning at the very first lessons and continuing throughout the students' learning experience.

P2: Some mainstream piano methods, such as Faber Piano Adventures, have started offering improvisation options. But in most methods, improvisation remains supplemental, with the core curriculum centering around notation, theory, and technique. There are exceptions, such as The Music Tree, where **each group** in the core lesson book has an improvisation activity. One playing-based piano method, Simply Music, includes improvisation beginning at the very first lessons and continuing throughout the students' learning experience.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **every unit** and **each group** interchangeable (i.e., having the same meaning)?

Pair 612

P1: Prior to the start of the series, Hank has been hired by Josie Packard to arrange the death of her husband Andrew, owner of the Packard Saw Mill, in a boating accident. (It is revealed later that Andrew anticipated and secretly avoided this attempt on his life.) Hank used his **apparent involvement** in a drunken driving accident as an alibi for the night of Andrew's death and was convicted of manslaughter. At the beginning of the series, he is due for parole after serving 18 months in the state prison.

P2: Prior to the start of the series, Hank has been hired by Josie Packard to arrange the death of her husband Andrew, owner of the Packard Saw Mill, in a boating accident. (It is revealed later that Andrew anticipated and secretly avoided this attempt on his life.) Hank used his **supposed collusion** in a drunken driving accident as an alibi for the night of Andrew's death and was convicted of manslaughter. At the beginning of the series, he is due for parole after serving 18 months in the state prison.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **apparent involvement** and **supposed collusion** interchangeable (i.e., having the same meaning)?

Pair 613

P1: One of the main reasons for developing an economic crisis is when a world power country enters into the crisis, eventually, all countries get affected. Basically, a crisis leads a nation to debt and economic stagnation. Furthermore, it is ultimately influenced by factors such as culture, climate, **previous development**, political order, and internal and external social conflicts. In other words, there is a great deal of ingredients mixture needed for an economic crisis to come across.

P2: One of the main reasons for developing an economic crisis is when a world power country enters into the crisis, eventually, all countries get affected. Basically, a crisis leads a nation to debt and economic stagnation. Furthermore, it is ultimately influenced by factors such as culture, climate, **prior experiences**, political order, and internal and external social conflicts. In other words, there is a great deal of ingredients mixture needed for an economic crisis to come across.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **previous development** and **prior experiences** interchangeable (i.e., having the same meaning)?

Pair 614

P1: Chavez was out of options and in order to remain in the organization, would have had to have been placed on waivers and options to AAA. Ian Kinsler went on paternity leave on June 8. The same day the Rangers also announced the dismissal of hitting coach Thad Bosley for **communication differences**. Beat writer Evan Grant reported after the dismissal one example taking place between Bosley and catcher Yorvit Torrealba.

P2: Chavez was out of options and in order to remain in the organization, would have had to have been placed on waivers and options to AAA. Ian Kinsler went on paternity leave on June 8. The same day the Rangers also announced the dismissal of hitting coach Thad Bosley for **transmission dissimilarities**. Beat writer Evan Grant reported after the dismissal one example taking place between Bosley and catcher Yorvit Torrealba.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **communication differences** and **transmission dissimilarities** interchangeable (i.e., having the same meaning)?

Pair 615

P1: Kristina promoted artist merchandise on tour and online partnered by Ottawa Shirt Printing. The album was released in April 2012 on Luprano’s label, Lupo One. In 2012, Kristina Maria performed alongside featured artist Corneille in Agadir, Morocco at The Concert for Tolerance in an effort to promote **open mindedness**. In 2013, “Tell the World” was nominated for a Juno Award for Pop Album of the Year alongside nominees Justin Bieber, Carly Rae Jepsen, Nelly Furtado and Victoria Duffield.

P2: Kristina promoted artist merchandise on tour and online partnered by Ottawa Shirt Printing. The album was released in April 2012 on Luprano’s label, Lupo One. In 2012, Kristina Maria performed alongside featured artist Corneille in Agadir, Morocco at The Concert for Tolerance in an effort to promote **receptive perspectives**. In 2013, “Tell the World” was nominated for a Juno Award for Pop Album of the Year alongside nominees Justin Bieber, Carly Rae Jepsen, Nelly Furtado and Victoria Duffield.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **open mindedness** and **receptive perspectives** interchangeable (i.e., having the same meaning)?

Pair 616

P1: For the clinical assessment, both groups improved their performance, though the gap between racial groups was maintained. Allowing participants to think about a positive value or attribute about themselves prior to completing the task seemed to make them less susceptible to stereotype threat. Self-affirmation has also been shown to mitigate the **performance gap** between female and male participants on mathematical and geometrical reasoning tests. Similarly, it has been shown that encouraging women to think about their multiple roles and identities by creating self-concept map can eliminate the gender gap on a relatively difficult standardized test.

P2: For the clinical assessment, both groups improved their performance, though the gap between racial groups was maintained. Allowing participants to think about a positive value or attribute about themselves prior to completing the task seemed to make them less susceptible to stereotype threat. Self-affirmation has also been shown to mitigate the **accomplishment differentiation** between female and male participants on mathematical and geometrical reasoning tests. Similarly, it has been shown that encouraging women to think about their multiple roles and identities by creating self-concept map can eliminate the gender gap on a relatively difficult standardized test.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **performance gap** and **accomplishment differentiation** interchangeable (i.e., having the same meaning)?

Pair 617

P1: Verse 2. The passage in parentheses provides the background from about the deportation of king Jeconiah and many prominent leaders and skilled persons in 597 BC from Judah to Babylon, which is a method learned from the Assyrians to reduce the possibility of rebellion. The letters were sent to counter the false prophecies or baseless assurance of **speedy return** from exile (Jeremiah 27). “The queen mother”: Emil Hirsch and Victor Ryssel, in the 1906 Jewish Encyclopedia, suggested that the mention of the king’s mother “on equal terms” indicates a “youthful Jeconiah”.

P2: Verse 2. The passage in parentheses provides the background from about the deportation of king Jeconiah and many prominent leaders and skilled persons in 597 BC from Judah to Babylon, which is a method learned from the Assyrians to reduce the possibility of rebellion. The letters were sent to counter the false prophecies or baseless assurance of **quick rebound** from exile (Jeremiah 27). “The queen mother”: Emil Hirsch and Victor Ryssel, in the 1906 Jewish Encyclopedia, suggested that the mention of the king’s mother “on equal terms” indicates a “youthful Jeconiah”.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **speedy return** and **quick rebound** interchangeable (i.e., having the same meaning)?

Pair 618

P1: Radioactive iodine, which can lead to increased risk of thyroid cancer if absorbed into the body, was released into the air along with other fission products. To counteract the radioactive iodine the distribution of potassium iodide is used, as it prevents the absorption of the potentially dangerous radioisotopes of that element. **Since Chernobyl, distributing potassium iodide to children has been a standard response when risk of radioactivity release is high.** According to the Japanese Government, over 160,000 people in the general population were screened in March 2011 for radiation exposure and no case was found which affects health.

P2: Radioactive iodine, which can lead to increased risk of thyroid cancer if absorbed into the body, was released into the air along with other fission products. To counteract the radioactive iodine the distribution of potassium iodide is used, as it prevents the absorption of the potentially dangerous radioisotopes of that element. **Since Chernobyl, distributing potassium iodide to children has been a common reaction when risk of radioactivity release is high.** According to the Japanese Government, over 160,000 people in the general population were screened in March 2011 for radiation exposure and no case was found which affects health.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **standard response** and **common reaction** interchangeable (i.e., having the same meaning)?

Pair 619

P1: However, just as the shark gets within a few feet of him, it succumbs to its many wounds. The shark rolls over in the water and dies before it can attack Brody. **The great fish slowly sinks down out of sight, dragging Quint's still entangled body behind it.** The lone survivor of the ordeal, Brody watches as the dead shark disappears into the depths and then he paddles back to shore on his makeshift float.

P2: However, just as the shark gets within a few feet of him, it succumbs to its many wounds. The shark rolls over in the water and dies before it can attack Brody. **The enormous fishy slowly sinks down out of sight, dragging Quint's still entangled body behind it.** The lone survivor of the ordeal, Brody watches as the dead shark disappears into the depths and then he paddles back to shore on his makeshift float.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **great fish** and **enormous fishy** interchangeable (i.e., having the same meaning)?

Pair 620

P1: The large size of the square in relation to the surrounding city attests to the significance its planners placed on Karlskrona at its founding as Sweden's principal naval base in 1680. **Klaipeda square is located north of the square with the fountain "Stora fisken" (Swedish: "The great fish").** The square is popularly known simply as "the Fish".

P2: The large size of the square in relation to the surrounding city attests to the significance its planners placed on Karlskrona at its founding as Sweden's principal naval base in 1680. **Klaipeda square is located north of the square with the fountain "Stora fisken" (Swedish: "The great fish").** The square is popularly known simply as "the Fish".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **great fish** and **great fish** interchangeable (i.e., having the same meaning)?

Pair 621

P1: Getting a visa is given if a student is travelling to a different country for education. The visa a student needs to apply for is British Student Visa (Tier 4), 40 points are required to apply for it. **These points can be earned by Course confirmation, Funding, visa application and Immigration Health Service Charge.** Accommodation.

P2: Getting a visa is given if a student is travelling to a different country for education. The visa a student needs to apply for is British Student Visa (Tier 4), 40 points are required to apply for it. These points can be earned by Course confirmation, Funding, authorization request and Immigration Health Service Charge. Accommodation.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are visa application and authorization request interchangeable (i.e., having the same meaning)?

Pair 622

P1: The colonies provide hiding places for juvenile fish and for the amphipods, copepods, polychaete worms and the other small invertebrates on which the young fish feed. The tissues of "Zoobotryon verticillatum" contain certain secondary metabolites that render it unappetizing to many potential predators. The main one is a bromo-alkaloid which has been shown to prevent settlement of mussel and barnacle larvae on the colony. One of the few creatures that does feed on it is the nudibranch "Okenia zoobotryon" which is thought to live, feed and lay its eggs almost exclusively on the bryozoan and whose tissues may then contain many of the same anti-predator chemicals.

P2: The colonies provide hiding places for juvenile fish and for the amphipods, copepods, polychaete worms and the other small invertebrates on which the young fish feed. The tissues of "Zoobotryon verticillatum" contain certain secondary metabolites that render it unappetizing to many potential predators. The most important type is a bromo-alkaloid which has been shown to prevent settlement of mussel and barnacle larvae on the colony. One of the few creatures that does feed on it is the nudibranch "Okenia zoobotryon" which is thought to live, feed and lay its eggs almost exclusively on the bryozoan and whose tissues may then contain many of the same anti-predator chemicals.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are main one and most important type interchangeable (i.e., having the same meaning)?

Pair 623

P1: It was built by Ravensett Properties Limited, and opened in 1974. Refurbished and partially extended in 1998 it comprises 330,000 sq. ft. on a single level, it was sold by Land Securities to Catalyst European Property Fund LP in 2010. In 2017, an acid attack involving a noxious substance took place at the centre.

P2: It was built by Ravensett Properties Limited, and opened in 1974. Refurbished and partially extended in 1998 it comprises 330,000 sq. ft. on a singular floor, it was sold by Land Securities to Catalyst European Property Fund LP in 2010. In 2017, an acid attack involving a noxious substance took place at the centre.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are single level and singular floor interchangeable (i.e., having the same meaning)?

Pair 624

P1: Memory of fear conditioning. Pavlovian conditioning tests have shown the active role of the amygdala in fear conditioning in rats. Research involving lesions to the basolateral nucleus have shown a strong association with memories involving fear. The central nucleus is linked with the behavioral responses that are dependent on the basolateral's reaction to fear.

P2: Memory of fear conditioning. Pavlovian conditioning tests have shown the active role of the amygdala in fear conditioning in rats. Research involving lesions to the basolateral nucleus have shown a solid connection with memories involving fear. The central nucleus is linked with the behavioral responses that are dependent on the basolateral's reaction to fear.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **strong association** and **solid connection** interchangeable (i.e., having the same meaning)?

Pair 625

P1: The two fall in love and get married. One night, on their way back home after dining out, they are interrupted by Amit Shellar (Rohit Roy), a local goon and younger brother of Madhavrao Shellar (Ronit Roy), a well-known politician. He and his friend Wasim, drunkenly misbehave with the couple, enraging Rohan, and they have a **heated exchange**. The next morning while Rohan is at work, Amit and Wasim sneak into the house and gang rape Supriya.

P2: The two fall in love and get married. One night, on their way back home after dining out, they are interrupted by Amit Shellar (Rohit Roy), a local goon and younger brother of Madhavrao Shellar (Ronit Roy), a well-known politician. He and his friend Wasim, drunkenly misbehave with the couple, enraging Rohan, and they have a **fiery engagement**. The next morning while Rohan is at work, Amit and Wasim sneak into the house and gang rape Supriya.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **heated exchange** and **fiery engagement** interchangeable (i.e., having the same meaning)?

Pair 626

P1: Marine Aircraft Maintenance Squadron 31 was disbanded and its personnel transferred to Headquarters and Maintenance Squadron 31. Headquarters and Maintenance Squadron 31 was redesignated on 22 August 1958 to become part of the 2nd Marine Aircraft Wing. The squadron along with the group was reduced to a paper organization as it moved to Cherry Point with a **small complement** of personnel. On 31 January 1959, MAG-31 and its squadron were deactivated at Cherry Point.

P2: Marine Aircraft Maintenance Squadron 31 was disbanded and its personnel transferred to Headquarters and Maintenance Squadron 31. Headquarters and Maintenance Squadron 31 was redesignated on 22 August 1958 to become part of the 2nd Marine Aircraft Wing. The squadron along with the group was reduced to a paper organization as it moved to Cherry Point with a **tiny counterpart** of personnel. On 31 January 1959, MAG-31 and its squadron were deactivated at Cherry Point.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **small complement** and **tiny counterpart** interchangeable (i.e., having the same meaning)?

Pair 627

P1: The town was conquered by Philip II of Macedon in 342 BC, (giving his name to the new city) and the Odrysian king was deposed. This marked the expansion of the city with an organised Greek street plan. Ten years after the Macedonian invasion the Odrysian king Seuthes III revolted against Alexander the Great's rule resulting in **neither victory, nor defeat, but stalemate**. Under Macedonian suzerainty the Thracian kings re-established their kingdom and started to exercise influence again.

P2: The town was conquered by Philip II of Macedon in 342 BC, (giving his name to the new city) and the Odrysian king was deposed. This marked the expansion of the city with an organised Greek street plan. Ten years after the Macedonian invasion the Odrysian king Seuthes III revolted against Alexander the Great's rule resulting in **nor triumph, nor defeat, but stalemate**. Under Macedonian suzerainty the Thracian kings re-established their kingdom and started to exercise influence again.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **neither victory** and **nor triumph** interchangeable (i.e., having the same meaning)?

Pair 628

P1: Attitudes of Christians towards abortion. Catholics. In a 1995 survey, 64% of U.S. Catholics said they disapproved of the statement that "abortion is morally wrong in every case". On the other hand, a 2013 survey by the Pew Research Center found that, whatever views they held on whether abortion should be legal, 53% of white Catholics in the United States considered abortion morally wrong, as did 64% of Hispanic Catholics.

P2: Attitudes of Christians towards abortion. Catholics. In a 1995 survey, 64% of U.S. Catholics said they disapproved of the statement that "abortion is morally wrong in all instances". On the other hand, a 2013 survey by the Pew Research Center found that, whatever views they held on whether abortion should be legal, 53% of white Catholics in the United States considered abortion morally wrong, as did 64% of Hispanic Catholics.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **every case** and **all instances** interchangeable (i.e., having the same meaning)?

Pair 629

P1: Sigmund, or to be more accurate, his wife, discovers that he lives up to his name on his wedding night, which is unfortunate because he stands to inherit a large fortune if he remains married and reaches the age of 30 without separation or divorce. In an effort to ensure his future he contacts his uncle Hymie, a famous physiologist. Hymie has Sigmund sign a contract guaranteeing him a **big cut** of the inheritance, and produces a serum which stops Sigmund's snoring. It also renders him unable to sleep.

P2: Sigmund, or to be more accurate, his wife, discovers that he lives up to his name on his wedding night, which is unfortunate because he stands to inherit a large fortune if he remains married and reaches the age of 30 without separation or divorce. In an effort to ensure his future he contacts his uncle Hymie, a famous physiologist. Hymie has Sigmund sign a contract guaranteeing him a **large portion** of the inheritance, and produces a serum which stops Sigmund's snoring. It also renders him unable to sleep.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **big cut** and **large portion** interchangeable (i.e., having the same meaning)?

Pair 630

P1: Although conflicts between children and parents increase during adolescence, these are just relatively minor issues. Regarding their important life issues, most adolescents still share the same attitudes and values as their parents. During childhood, siblings are a source of conflict and frustration as well as a **support system**. Adolescence may affect this relationship differently, depending on sibling gender.

P2: Although conflicts between children and parents increase during adolescence, these are just relatively minor issues. Regarding their important life issues, most adolescents still share the same attitudes and values as their parents. During childhood, siblings are a source of conflict and frustration as well as a **protection entity**. Adolescence may affect this relationship differently, depending on sibling gender.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **support system** and **protection entity** interchangeable (i.e., having the same meaning)?

Pair 631

P1: On July 4, 1957, Fairchild ArmaLite sold a five-year manufacturing license for the AR-10 to Artillerie Inrichtingen. The AR-10 was invented by Eugene Stoner in 1955 as a late entrant to the United States Army's Light Rifle Trials to replace the M1 Garand in US service. It was a **revolutionary design** in many ways, but lost the competition. It had

however caught the interest of Foreign militaries which led to ArmaLite's deal with Artillerie Inrichtingen whose large factory and production facilities were felt could produce the ArmaLite rifle in the large quantities Fairchild anticipated would be needed to fulfill expected orders.

P2: On July 4, 1957, Fairchild ArmaLite sold a five-year manufacturing license for the AR-10 to Artillerie Inrichtingen. The AR-10 was invented by Eugene Stoner in 1955 as a late entrant to the United States Army's Light Rifle Trials to replace the M1 Garand in US service. It was a **progressive model** in many ways, but lost the competition. It had however caught the interest of Foreign militaries which led to ArmaLite's deal with Artillerie Inrichtingen whose large factory and production facilities were felt could produce the ArmaLite rifle in the large quantities Fairchild anticipated would be needed to fulfill expected orders.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **revolutionary design** and **progressive model** interchangeable (i.e., having the same meaning)?

Pair 632

P1: Shamans and their families were required to abstain from all food gathered from the beach, and men might avoid eating beach food before battles or strenuous activities in the belief that it would weaken them spiritually and perhaps physically as well. Thus for both spiritual reasons as well as to add some variety to the diet, the Tlingit harvest many other resources for food besides what they easily find outside their front doors. No other food resource receives as **much emphasis** as salmon; however, seal and game are both close seconds. Nutrition.

P2: Shamans and their families were required to abstain from all food gathered from the beach, and men might avoid eating beach food before battles or strenuous activities in the belief that it would weaken them spiritually and perhaps physically as well. Thus for both spiritual reasons as well as to add some variety to the diet, the Tlingit harvest many other resources for food besides what they easily find outside their front doors. No other food resource receives as **considerable attention** as salmon; however, seal and game are both close seconds. Nutrition.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **much emphasis** and **considerable attention** interchangeable (i.e., having the same meaning)?

Pair 633

P1: The extent of progress influences later sentencing. These programs are often not available to serious offenders. Drug court programs place as **much emphasis** on program attendance as they do on abstinence. Because these programs have limited resources and the focus is treatment rather than abstinence, many in treatment can merely estimate the likelihood of being tested and then choose to take the risk of continued use.

P2: The extent of progress influences later sentencing. These programs are often not available to serious offenders. Drug court programs place as **high importance** on program attendance as they do on abstinence. Because these programs have limited resources and the focus is treatment rather than abstinence, many in treatment can merely estimate the likelihood of being tested and then choose to take the risk of continued use.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **much emphasis** and **high importance** interchangeable (i.e., having the same meaning)?

Pair 634

P1: It is endemic to highland forest in eastern Java, Indonesia. Measuring , this species is a stocky, short-legged bird. Its mostly grey plumage is barred on the **lower back** and tail. It has a black crown and nape, and conspicuous white forehead, cheeks and throat.

P2: It is endemic to highland forest in eastern Java, Indonesia. Measuring , this species is a stocky, short-legged bird. Its mostly grey plumage is barred on the bottom rear and tail. It has a black crown and nape, and conspicuous white forehead, cheeks and throat.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are lower back and bottom rear interchangeable (i.e., having the same meaning)?

Pair 635

P1: This is also referred to as a "rear delt row" as opposed to a "raise". Bodyweight/supine rows (or "australian pullups") can also be done with a wide overhand grip to target the rear delts. It requires less work by the lower back and legs to stabilize. The above variation is most difficult when the muscle is maximally contracted, and allows both arms to be worked out at once.

P2: This is also referred to as a "rear delt row" as opposed to a "raise". Bodyweight/supine rows (or "australian pullups") can also be done with a wide overhand grip to target the rear delts. It requires less work by the inferior behind and legs to stabilize. The above variation is most difficult when the muscle is maximally contracted, and allows both arms to be worked out at once.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are lower back and inferior behind interchangeable (i.e., having the same meaning)?

Pair 636

P1: The roof was raised to provide a second floor of bedrooms, a classroom, a library and a playroom for the sick children. Miss Arents traveled extensively in Europe, and her trip diaries describe the joy she derived from her visits to continental botanical gardens. Her interest in horticulture, already strong, was heightened by her travels and found abundant expression at Bloemendaal Farm. She imported collections of rare trees and shrubs, constructed a series of three ridge and furrow greenhouses and laid out a border of herbaceous perennials along the side of the greenhouse range.

P2: The roof was raised to provide a second floor of bedrooms, a classroom, a library and a playroom for the sick children. Miss Arents traveled extensively in Europe, and her trip diaries describe the joy she derived from her visits to continental botanical gardens. Her interest in horticulture, already strong, was heightened by her travels and found ample character at Bloemendaal Farm. She imported collections of rare trees and shrubs, constructed a series of three ridge and furrow greenhouses and laid out a border of herbaceous perennials along the side of the greenhouse range.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are abundant expression and ample character interchangeable (i.e., having the same meaning)?

Pair 637

P1: In hemophagocytic HS, histiocytes express CD11d instead of CD11c, and MHC II. Expression of CD1 molecules is uniformly low or occasionally moderate but with a patchy distribution. This phenotype is consistent with macrophage differentiation rather than DC differentiation in which abundant expression of CD1 and CD11c is expected. The exact sublineage of DC involved in HS has not been determined in most instances.

P2: In hemophagocytic HS, histiocytes express CD11d instead of CD11c, and MHC II. Expression of CD1 molecules is uniformly low or occasionally moderate but with a patchy distribution. This phenotype is consistent with macrophage differentiation rather than DC differentiation in which sufficient interpretation of CD1 and CD11c is expected. The exact sublineage of DC involved in HS has not been determined in most instances.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **abundant expression** and **sufficient interpretation** interchangeable (i.e., having the same meaning)?

Pair 638

P1: Negative space. The background of the map may seem unimportant at first, but it plays several active roles in the use of the map. It provides "**breathing room**" between the map elements, and can serve to distinguish elements without the use of borders. Isolating a particular element, such as a title, by surrounding it with wide white space increases its contrast with its surroundings, elevating it in the visual hierarchy.

P2: Negative space. The background of the map may seem unimportant at first, but it plays several active roles in the use of the map. It provides "**resting space**" between the map elements, and can serve to distinguish elements without the use of borders. Isolating a particular element, such as a title, by surrounding it with wide white space increases its contrast with its surroundings, elevating it in the visual hierarchy.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **breathing room** and **resting space** interchangeable (i.e., having the same meaning)?

Pair 639

P1: Early modern Europe. The display of temporary or permanent effigies in wax and other media of the deceased was a common part of the funeral ceremonies of important people in European historical times. Most of the figures would wear the **real clothes** of the deceased so they could be made quickly. The museum of Westminster Abbey has a collection of British royal wax effigies, as well as those of figures such as the naval hero Horatio Nelson, and Frances Stewart, Duchess of Richmond, who also had her parrot stuffed and displayed.

P2: Early modern Europe. The display of temporary or permanent effigies in wax and other media of the deceased was a common part of the funeral ceremonies of important people in European historical times. Most of the figures would wear the **genuine attire** of the deceased so they could be made quickly. The museum of Westminster Abbey has a collection of British royal wax effigies, as well as those of figures such as the naval hero Horatio Nelson, and Frances Stewart, Duchess of Richmond, who also had her parrot stuffed and displayed.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **real clothes** and **genuine attire** interchangeable (i.e., having the same meaning)?

Pair 640

P1: Military career. Shurer initially trained as an army medic and subsequently qualified to train as a Special Forces medic. This training included an internship in a **hospital emergency room** and completion of the national paramedic training program. He was promoted from sergeant to staff sergeant with the 3rd Special Forces Group on December 1, 2006.

P2: Military career. Shurer initially trained as an army medic and subsequently qualified to train as a Special Forces medic. This training included an internship in a **clinic ER** and completion of the national paramedic training program. He was promoted from sergeant to staff sergeant with the 3rd Special Forces Group on December 1, 2006.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **hospital emergency room** and **clinic ER** interchangeable (i.e., having the same meaning)?

Pair 641

P1: When it ceased to be used for making paper, it became a corn mill, known as Hook Mill. The present building dates from the 17th and 18th centuries, when it was still a paper mill, and together with the adjoining mill house it is now

part of a private residence. Diple Mill was a **three storey building** made of red bricks with a tiled roof. It probably had four pairs of stones, and two water wheels.

P2: When it ceased to be used for making paper, it became a corn mill, known as Hook Mill. The present building dates from the 17th and 18th centuries, when it was still a paper mill, and together with the adjoining mill house it is now part of a private residence. Diple Mill was a **three tiered structure** made of red bricks with a tiled roof. It probably had four pairs of stones, and two water wheels.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **three storey building** and **three tiered structure** interchangeable (i.e., having the same meaning)?

Pair 642

P1: The report was largely overlooked, as the government focused on reforming the bus transport. In 2016 the government announced a new study on reintroducing the tram. **The new study**, which is expected by late 2020, should also look at metro and monorail options. Maritime transport.

P2: The report was largely overlooked, as the government focused on reforming the bus transport. In 2016 the government announced a new study on reintroducing the tram. **The current examination**, which is expected by late 2020, should also look at metro and monorail options. Maritime transport.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **new study** and **current examination** interchangeable (i.e., having the same meaning)?

Pair 643

P1: The team have qualified for twelve World Cups, reaching the second round in all but three, the semifinals five times, and the finals twice. They also won the gold medal in Olympic football twice, in 1924 and 1928, before the creation of the World Cup. **Uruguay won the 1980 Mundialito, a tournament comprising former World Cup champions hosted in Uruguay to celebrate the 50th anniversary of the first world championship.** Uruguay is one of the most successful teams in the world, having won 19 FIFA official titles: 2 World Championships, 2 Olympic Games, and 15 Copa América championships.

P2: The team have qualified for twelve World Cups, reaching the second round in all but three, the semifinals five times, and the finals twice. They also won the gold medal in Olympic football twice, in 1924 and 1928, before the creation of the World Cup. **Uruguay won the 1980 Mundialito, a tournament comprising former World Cup champions hosted in Uruguay to celebrate the 50th anniversary of the initial universal tournament.** Uruguay is one of the most successful teams in the world, having won 19 FIFA official titles: 2 World Championships, 2 Olympic Games, and 15 Copa América championships.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **first world championship** and **initial universal tournament** interchangeable (i.e., having the same meaning)?

Pair 644

P1: A Deputy Commissioner at the start of season 1, Burrell has ambitions to be promoted to Commissioner, a post held by Warren Frazier. Burrell's primary responsibility is to ensure that Frazier's directives are obeyed throughout the BPD. **He consistently shows more interest in making good headlines rather than good cases.** When D'Angelo Barksdale beats a murder charge by buying off a witness, Burrell faces criticism from Judge Phelan over the BPD's failure to investigate D'Angelo's uncle Avon.

P2: A Deputy Commissioner at the start of season 1, Burrell has ambitions to be promoted to Commissioner, a post held by Warren Frazier. Burrell's primary responsibility is to ensure that Frazier's directives are obeyed throughout the BPD. He consistently shows more interest in making good headlines rather than great actions. When D'Angelo Barksdale beats a murder charge by buying off a witness, Burrell faces criticism from Judge Phelan over the BPD's failure to investigate D'Angelo's uncle Avon.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are good cases and great actions interchangeable (i.e., having the same meaning)?

Pair 645

P1: The novel is based on the true-life story of Maggie Heffernan, who, in early 1900, was convicted in Melbourne of the drowning murder of her infant son. The novel follows her grim journey from the country to the city, vainly seeking her ex-fiance, finding herself destitute and finally accused of a dreadful crime. Vida Goldstein is an educated single woman running a local private school, campaigning for votes for women and contemplating running for parliament. Elizabeth Hamilton lives in Vida's aunt's house in suburban Melbourne - an upper middle-class life that provides a sharp contrast with poor Maggie's circumstances.

P2: The novel is based on the true-life story of Maggie Heffernan, who, in early 1900, was convicted in Melbourne of the drowning murder of her infant son. The novel follows her grim journey from the country to the city, vainly seeking her ex-fiance, finding herself destitute and finally accused of a dreadful crime. Vida Goldstein is an educated single woman running a regional independent academy, campaigning for votes for women and contemplating running for parliament. Elizabeth Hamilton lives in Vida's aunt's house in suburban Melbourne - an upper middle-class life that provides a sharp contrast with poor Maggie's circumstances.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are local private school and regional independent academy interchangeable (i.e., having the same meaning)?

Pair 646

P1: The fourth stage was flat and seemed suited for a full field sprint, but Sagan slipped away in the final kilometer to finish a second ahead of the fast-charging sprinters at the head of the peloton, for his third win. He ceded a little time back to Cunego and Serpa in the hilly stage 5, but still won the race overall by three seconds over Serpa and seven over Cunego; also winning the points classification in the process. While Basso had hoped for overall success at Tirreno-Adriatico, he failed to be a major factor at any point, and finished fourth overall. Nibali was fifth, and the squad won the teams classification.

P2: The fourth stage was flat and seemed suited for a full field sprint, but Sagan slipped away in the final kilometer to finish a second ahead of the fast-charging sprinters at the head of the peloton, for his third win. He ceded a little time back to Cunego and Serpa in the hilly stage 5, but still won the race overall by three seconds over Serpa and seven over Cunego; also winning the points classification in the process. While Basso had hoped for complete win at Tirreno-Adriatico, he failed to be a major factor at any point, and finished fourth overall. Nibali was fifth, and the squad won the teams classification.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are overall success and complete win interchangeable (i.e., having the same meaning)?

Pair 647

P1: Along with expeditions against Canada, the West Indies and Philippines, the capture of Senegal demonstrated the new global reach of the Royal Navy and the increasingly global nature of European conflicts – as a consequence historians have labeled it the first 'world war'. Ownership of the West African possessions became a major source of contention between Britain and France during the peace talks that led to the 1763 Treaty of Paris. The negotiations centred on a potential return of some of the captured outposts. Britain was keen to keep hold of the Senegalese mainland, but

willing to return the island of Gorée.

P2: Along with expeditions against Canada, the West Indies and Philippines, the capture of Senegal demonstrated the new global reach of the Royal Navy and the increasingly global nature of European conflicts – as a consequence historians have labeled it the first 'world war'. Ownership of the West African possessions became a major source of contention between Britain and France during the peace talks that led to the 1763 Treaty of Paris. **The negotiations centred on a possible restoration of some of the captured outposts.** Britain was keen to keep hold of the Senegalese mainland, but willing to return the island of Gorée.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **potential return** and **possible restoration** interchangeable (i.e., having the same meaning)?

Pair 648

P1: Active points. An active point model uses visible or infrared LEDs (5 mm or larger) to represent the tracking points, powered by battery, transformer (plug pack) or USB. **The electric circuit is very basic and can be made by someone with little or no experience with electronics.** Common LEDs, like those found in remote controls, have a narrow, highly focused beam which is not suitable for optical motion tracking.

P2: Active points. An active point model uses visible or infrared LEDs (5 mm or larger) to represent the tracking points, powered by battery, transformer (plug pack) or USB. **The electric circuit is very basic and can be made by someone with next to none or no practice with electronics.** Common LEDs, like those found in remote controls, have a narrow, highly focused beam which is not suitable for optical motion tracking.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **little or no experience** and **next to none or no practice** interchangeable (i.e., having the same meaning)?

Pair 649

P1: After all songs were recorded the entire album was re-mastered. On 14 March 2014 *Stuff* was named Album of the Week on RTÉ Radio 1 Critical reception. **McEvoy has a Voice with a capital 'V - instantly recognisable despite have a huge range of expression and styles.** This is demonstrated in spades as this is a collection of songs rescued from the threat of obscurity, inevitably more wide-ranging in style and substance than material specifically written for one album.

P2: After all songs were recorded the entire album was re-mastered. On 14 March 2014 *Stuff* was named Album of the Week on RTÉ Radio 1 Critical reception. **McEvoy has a Voice with a capital 'V - instantly recognisable despite have a vast scope of expression and styles.** This is demonstrated in spades as this is a collection of songs rescued from the threat of obscurity, inevitably more wide-ranging in style and substance than material specifically written for one album.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **huge range** and **vast scope** interchangeable (i.e., having the same meaning)?

Pair 650

P1: For instance, Charles Jardine, in his 2008 book "Flies, Ties and Techniques," speaks of imitators and attractors, categorizing the Royal Wulff as an attractor and the Elk Hair Caddis as an imitator, whereas "... in sea trout and steelhead fishing there is a combination of imitation and attraction involved in fly construction". Paul Schullery in "American Fly Fishing – A History (1996)" explains however that although much has been written about the imitation theories of fly design, all successful fly patterns must imitate something to the fish, and even a perfect imitation "attracts" strikes from fish. **The huge range of fly patterns documented today for all sorts of target species-trout, salmon, bass and panfish, pike, saltwater, tropical exotics, etc. are not easily categorized as merely "imitative", "attractors" or something else.**

P2: For instance, Charles Jardine, in his 2008 book "Flies, Ties and Techniques," speaks of imitators and attractors, categorizing the Royal Wulff as an attractor and the Elk Hair Caddis as an imitator, whereas "... in sea trout and steelhead fishing there is a combination of imitation and attraction involved in fly construction". Paul Schullery in "American Fly Fishing – A History (1996)" explains however that although much has been written about the imitation theories of fly design, all successful fly patterns must imitate something to the fish, and even a perfect imitation "attracts" strikes from fish. **The massive assortment of fly patterns documented today for all sorts of target species-trout, salmon, bass and panfish, pike, saltwater, tropical exotics, etc.** are not easily categorized as merely "imitative", "attractors" or something else.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **huge range** and **massive assortment** interchangeable (i.e., having the same meaning)?

Pair 651

P1: College of Bishops, also known as the Ordo of Bishops, is a term used in the Catholic Church to denote the collection of those bishops who are in communion with the Pope. **Under Canon Law, a college is a collection (Latin collegium) of persons united together for a common object** so as to form one body. The Bishop of Rome (the Pope) is the head of the college.

P2: College of Bishops, also known as the Ordo of Bishops, is a term used in the Catholic Church to denote the collection of those bishops who are in communion with the Pope. **Under Canon Law, a college is a collection (Latin collegium) of persons united together for a same purpose** so as to form one body. The Bishop of Rome (the Pope) is the head of the college.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **common object** and **same purpose** interchangeable (i.e., having the same meaning)?

Pair 652

P1: This applies to both figure and ground in the organization. From the experiments, amodal completion does not hold true when the watercolor illusion reversed the perceived segregation of components. **The seventh experiment was to determine if the observer would see the color spread effect if the stimulus was of a common object.** From this, it was determined that spaces with prior knowledge (familiar words, shapes, etc.)

P2: This applies to both figure and ground in the organization. From the experiments, amodal completion does not hold true when the watercolor illusion reversed the perceived segregation of components. **The seventh experiment was to determine if the observer would see the color spread effect if the stimulus was of a basic thing.** From this, it was determined that spaces with prior knowledge (familiar words, shapes, etc.)

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **common object** and **basic thing** interchangeable (i.e., having the same meaning)?

Pair 653

P1: The northeast Arctic cod also shows cannibalistic behaviour. In 2012 the biomass of the Northeast Atlantic cod stock was estimated to be at an all-time high since scientists started observing stock status some 100 years ago. **The North Sea cod stock is primarily fished by european union member states** and Norway. In 1999 the catch was divided among Denmark (31%), Scotland (25%), the rest of the United Kingdom (12%), the Netherlands (10%), Belgium, Germany and Norway (17%).

P2: The northeast Arctic cod also shows cannibalistic behaviour. In 2012 the biomass of the Northeast Atlantic cod stock was estimated to be at an all-time high since scientists started observing stock status some 100 years ago. **The North Sea cod stock is primarily fished by EU affiliate societies** and Norway. In 1999 the catch was divided among Denmark (31%), Scotland (25%), the rest of the United Kingdom (12%), the Netherlands (10%), Belgium, Germany and Norway (17%).

Norway (17%).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **European Union member states** and **EU affiliate societies** interchangeable (i.e., having the same meaning)?

Pair 654

P1: Legality. The Pittsburgh left has no basis in law. **Failing to yield to oncoming traffic while navigating a turn is a traffic violation**, and is prohibited in the Commonwealth of Pennsylvania. At certain intersections, left-turning traffic may be given precedence over straight-moving traffic in a regulated (and thus legal) manner, via the use of protected turn signaling.

P2: Legality. The Pittsburgh left has no basis in law. **Failing to yield to oncoming traffic while navigating a turn is a driving offense**, and is prohibited in the Commonwealth of Pennsylvania. At certain intersections, left-turning traffic may be given precedence over straight-moving traffic in a regulated (and thus legal) manner, via the use of protected turn signaling.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **traffic violation** and **driving offense** interchangeable (i.e., having the same meaning)?

Pair 655

P1: O'Connell grew up in Taunton, Massachusetts to divorced parents who ended up on housing assistance to meet family expenses. She worked her way through college by working two jobs. **O'Connell worked in the food service department of the Morton Hospital and Medical Center, working her way up to a supervisory position.** O'Connell attended the Massachusetts Bay Community College in Wellesley, Massachusetts and Massasoit Community College in Brockton, Massachusetts.

P2: O'Connell grew up in Taunton, Massachusetts to divorced parents who ended up on housing assistance to meet family expenses. She worked her way through college by working two jobs. **O'Connell worked in the food service department of the Morton Hospital and Medical Center, working her way up to a managerial job.** O'Connell attended the Massachusetts Bay Community College in Wellesley, Massachusetts and Massasoit Community College in Brockton, Massachusetts.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **supervisory position** and **managerial job** interchangeable (i.e., having the same meaning)?

Pair 656

P1: Females have a milky-tinged patch at the tip of each wing, while males of most populations have a white band just inside the blue one. In 1923, Philip Calvert described "Megaloprepus" in flight: **When flying the four wings are spread quite far apart, fore and hind wing of the same side far apart, body horizontal. Flight slow enough so that the movements of each separate wing can be seen—insect consequently moves slowly but can dodge.** Mr. Barnes compared the movements of the wings to that of a windmill, but the revolving movements are lacking; I should say the effect produced by the wings is more like that of a jumping-jack with moveable arms and legs pulled by one string, rather slowly, but, of course, at regular intervals.

P2: Females have a milky-tinged patch at the tip of each wing, while males of most populations have a white band just inside the blue one. In 1923, Philip Calvert described "Megaloprepus" in flight: **When flying the four wings are spread quite far apart, fore and hind wing of the same side far apart, body horizontal. Flight slow enough so that the movements of each individual forelimb can be seen—insect consequently moves slowly but can dodge.** Mr. Barnes compared the movements of the wings to that of a windmill, but the revolving movements are lacking; I should say the effect produced by the wings is more like that of a jumping-jack with moveable arms and legs pulled by one string, rather slowly, but, of

course, at regular intervals.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **separate wing** and **individual forelimb** interchangeable (i.e., having the same meaning)?

Pair 657

P1: Although the official mascot is the North Star Navigator, its mascot is an alligator, nicknamed "Al Gator". Most students seemed to prefer the alligator mascot, and as a result, most locals now refer to the students and interscholastic teams as the Gators. From its founding in 2003 until 2006, North Star hosted a middle school, North Star Middle School, in a **separate wing**. Traditions.

P2: Although the official mascot is the North Star Navigator, its mascot is an alligator, nicknamed "Al Gator". Most students seemed to prefer the alligator mascot, and as a result, most locals now refer to the students and interscholastic teams as the Gators. From its founding in 2003 until 2006, North Star hosted a middle school, North Star Middle School, in a **different extension**. Traditions.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **separate wing** and **different extension** interchangeable (i.e., having the same meaning)?

Pair 658

P1: However the Herlaug who was king of Naumu Dale according to the account in "Harald Fairhair's saga" in the "Heimskringla" could certainly not be Jarl Hákon's grandfather.) Commentary. The word "garðr" means 'an **enclosed piece** of land' and is cognate with English "yard" and "garth". The element "garðr" is commonly an element in place names such as Asgard, Midgard, Micklegard (a common Norse name for Constantinople), Holmgard (a common Norse name for Novgorod), and so forth.

P2: However the Herlaug who was king of Naumu Dale according to the account in "Harald Fairhair's saga" in the "Heimskringla" could certainly not be Jarl Hákon's grandfather.) Commentary. The word "garðr" means 'an **embedded part** of land' and is cognate with English "yard" and "garth". The element "garðr" is commonly an element in place names such as Asgard, Midgard, Micklegard (a common Norse name for Constantinople), Holmgard (a common Norse name for Novgorod), and so forth.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **enclosed piece** and **embedded part** interchangeable (i.e., having the same meaning)?

Pair 659

P1: In 1985 Canon Inc. and Telesensory cooperated in the development of the Optacon II, which featured improved packaging and capabilities to interface to a computer (See Fig. 3). The **design decision** to reduce the number of image pixels from 144 to 100 to lower cost resulted in Optacon II not being successful. In the 1990s Telesensory increasingly shifted its emphasis toward the low-vision market and became less devoted to the Optacon.

P2: In 1985 Canon Inc. and Telesensory cooperated in the development of the Optacon II, which featured improved packaging and capabilities to interface to a computer (See Fig. 3). The **layout settlement** to reduce the number of image pixels from 144 to 100 to lower cost resulted in Optacon II not being successful. In the 1990s Telesensory increasingly shifted its emphasis toward the low-vision market and became less devoted to the Optacon.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **design decision** and **layout settlement** interchangeable (i.e., having the same meaning)?

Pair 660

P1: This made him the first African American bowler to compete in a nationwide television broadcast. As of 1958, Kilgore had long been active in the National Bowling Association, and he had a 209 average in Motor City's Michigan Chronicle League. In 1959, he held the **national all-time record** for a 3-game cumulative score of 789, and by that time was averaging 202 points per game. By 1960, Kilgore had become a feature in the bowling scene of Chicago.

P2: This made him the first African American bowler to compete in a nationwide television broadcast. As of 1958, Kilgore had long been active in the National Bowling Association, and he had a 209 average in Motor City's Michigan Chronicle League. In 1959, he held the **interstate record** for a 3-game cumulative score of 789, and by that time was averaging 202 points per game. By 1960, Kilgore had become a feature in the bowling scene of Chicago.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **national all-time record** and **interstate record** interchangeable (i.e., having the same meaning)?

Pair 661

P1: This bounding approach permits analysts to make calculations without requiring overly precise assumptions about parameter values, dependence among variables, or even distribution shape. Probability bounds analysis is essentially a combination of the methods of standard interval analysis and classical probability theory. **Probability bounds analysis gives the same answer as interval analysis does when only range information is available.** It also gives the same answers as Monte Carlo simulation does when information is abundant enough to precisely specify input distributions and their dependencies.

P2: This bounding approach permits analysts to make calculations without requiring overly precise assumptions about parameter values, dependence among variables, or even distribution shape. Probability bounds analysis is essentially a combination of the methods of standard interval analysis and classical probability theory. **Probability bounds analysis gives the same answer as interval analysis does when only spectrum data is available.** It also gives the same answers as Monte Carlo simulation does when information is abundant enough to precisely specify input distributions and their dependencies.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **range information** and **spectrum data** interchangeable (i.e., having the same meaning)?

Pair 662

P1: "small zones") springing up in the cities. These areas had newly furnished apartments and town houses. **Large-sized houses, colloquially termed "mansions" ("bieshu") in the Chinese language, is a rather new concept and is usually only available to the business elite.** The combination of full adult employment with a minimal service sector put heavy burdens on urban households.

P2: "small zones") springing up in the cities. These areas had newly furnished apartments and town houses. **Large-sized houses, colloquially termed "mansions" ("bieshu") in the Chinese language, is a rather new concept and is usually only available to the high-class associates.** The combination of full adult employment with a minimal service sector put heavy burdens on urban households.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **business elite** and **high-class associates** interchangeable (i.e., having the same meaning)?

Pair 663

P1: Under Swiss law, debt restructuring may occur out of court, or through a court-mediated debt restructuring agreement that may provide for a partial waiver of debts, or for a liquidation of the debtor's assets by the creditors. United Kingdom. The majority of debt restructuring within the United Kingdom is undertaken on a collaborative basis between the borrower and the creditors. Should this be unsatisfactory in the first instance, the court may be asked to mediate and appoint administrators.

P2: Under Swiss law, debt restructuring may occur out of court, or through a court-mediated debt restructuring agreement that may provide for a partial waiver of debts, or for a liquidation of the debtor's assets by the creditors. United Kingdom. The majority of debt restructuring within the United Kingdom is undertaken on a joint premise between the borrower and the creditors. Should this be unsatisfactory in the first instance, the court may be asked to mediate and appoint administrators.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are collaborative basis and joint premise interchangeable (i.e., having the same meaning)?

Pair 664

P1: Gut symbionts are also transferred by anal trophallaxis in wood-eating termites and cockroaches. Transfer of gut symbionts in these species is essential to digest wood as their food source. Carpenter ants transfer immunity through trophallaxis by the direct transfer of antimicrobial substances, increasing disease resistance and social immunity of the colony. In some species of ants, it may play a role in spreading the colony odour that identifies members.

P2: Gut symbionts are also transferred by anal trophallaxis in wood-eating termites and cockroaches. Transfer of gut symbionts in these species is essential to digest wood as their food source. Carpenter ants transfer immunity through trophallaxis by the immediate passing on of antimicrobial substances, increasing disease resistance and social immunity of the colony. In some species of ants, it may play a role in spreading the colony odour that identifies members.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are direct transfer and immediate passing on interchangeable (i.e., having the same meaning)?

Pair 665

P1: The report also indicated that "there were no security measures in place that would prevent backwards browsing." The CHP recommended that no criminal charges be filed against anyone involved in "Tapegate." Upon being vindicated by law enforcement investigators, Newman questioned Schwarzenegger's use of law enforcement for political purposes. Dan Newman, spokesman for the Angelides campaign, said that the results prove "that the governor's office was directly 100 percent responsible for making the tapes public...and then called in taxpayer funded law enforcement in a crude attempt to cover up his error."

P2: The report also indicated that "there were no security measures in place that would prevent backwards browsing." The CHP recommended that no criminal charges be filed against anyone involved in "Tapegate." Upon being vindicated by peace officers, Newman questioned Schwarzenegger's use of law enforcement for political purposes. Dan Newman, spokesman for the Angelides campaign, said that the results prove "that the governor's office was directly 100 percent responsible for making the tapes public...and then called in taxpayer funded law enforcement in a crude attempt to cover up his error."

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are law enforcement investigators and peace officers interchangeable (i.e., having the same meaning)?

Pair 666

P1: International broadcasts. Prior to the 2000's, Thai TV soap operas were primarily popular in neighbouring countries such as Myanmar, Cambodia and Laos. Several Cambodian television channels aired Thai soap operas instead of their local ones. "Dao Pra Sook" was the most popular series for Khmer viewers.

P2: International broadcasts. Prior to the 2000's, Thai TV soap operas were primarily popular in neighbouring countries such as Myanmar, Cambodia and Laos. Several Cambodian television channels aired Thai soap operas instead of their regional types. "Dao Pra Sook" was the most popular series for Khmer viewers.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are local ones and regional types interchangeable (i.e., having the same meaning)?

Pair 667

P1: Working conditions reform. Improvements were also made to the working environment of workers during the term of the Third Duma. safety inspectors were introduced into factories, while employee insurance schemes were introduced which provided protection against accidents and illness. Other reforms.

P2: Working conditions reform. Improvements were also made to the working environment of workers during the term of the Third Duma. assurance checkers were introduced into factories, while employee insurance schemes were introduced which provided protection against accidents and illness. Other reforms.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are safety inspectors and assurance checkers interchangeable (i.e., having the same meaning)?

Pair 668

P1: Over the next two years the side had a number of notable wins. The most outstanding achievement were in Sevens where it won the 1993 Hong Kong and 1992 Middlesex Sevens. The 1995 Rugby World Cup in South Africa proved that the team belonged in top company. They again reached the quarterfinals after wins over Argentina and Italy, but were beaten 42–14 by the eventual winners South Africa.

P2: Over the next two years the side had a number of notable wins. The most outstanding achievement were in Sevens where it won the 1993 Hong Kong and 1992 Middlesex Sevens. The 1995 Rugby World Cup in South Africa proved that the team belonged in winning crowds. They again reached the quarterfinals after wins over Argentina and Italy, but were beaten 42–14 by the eventual winners South Africa.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are top company and winning crowds interchangeable (i.e., having the same meaning)?

Pair 669

P1: Raising hands is a gesture involving lifting either one or both arms above one's head, which has a number of possible meanings, depending on the context of the gesture. The action of hand-raising is involved in a number of greeting hand gestures, such as waving, salutes and high fives. The raised fist, an action used mostly in left-wing political endeavours and by oppressed minorities, is a symbol of defiance and solidarity.

P2: Raising hands is a gesture involving lifting either one or both arms above one's head, which has a number of possible meanings, depending on the context of the gesture. The action of hand-raising is involved in a number of greeting hand gestures, such as waving, salutes and soaring fives. The raised fist, an action used mostly in left-wing political endeavours and by oppressed minorities, is a symbol of defiance and solidarity.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **high fives** and **soaring fives** interchangeable (i.e., having the same meaning)?

Pair 670

P1: On 5 November the unescorted vessel had been bombed and damaged by a German Ju 88 aircraft of II./KG 30 (based at Banak, North Cape) and had beached at South Cape, Spitsbergen. The following day, 6 November, at 15:58, "U-625" torpedoed the stranded vessel and then wrecked her with gunfire. **The crew abandoned ship and landed on an isolated part of the island.** They were not rescued until 4 January, by men from the garrison at Barentsburg.

P2: On 5 November the unescorted vessel had been bombed and damaged by a German Ju 88 aircraft of II./KG 30 (based at Banak, North Cape) and had beached at South Cape, Spitsbergen. The following day, 6 November, at 15:58, "U-625" torpedoed the stranded vessel and then wrecked her with gunfire. **The crew abandoned ship and landed on an outlying zone of the island.** They were not rescued until 4 January, by men from the garrison at Barentsburg.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **isolated part** and **outlying zone** interchangeable (i.e., having the same meaning)?

Pair 671

P1: Martha learned that James W. McCord Jr., the security director of the CRP and her daughter's bodyguard and driver, was among those arrested. This detail conflicted with the White House's official story that the break-in was unrelated to the CRP, and raised her suspicion. **Martha unsuccessfully made attempts to contact her husband by phone, eventually telling one of his aides that her next call would be to the press.** June 1972 kidnapping, aftermath and vindication.

P2: Martha learned that James W. McCord Jr., the security director of the CRP and her daughter's bodyguard and driver, was among those arrested. This detail conflicted with the White House's official story that the break-in was unrelated to the CRP, and raised her suspicion. **Martha unsuccessfully made attempts to contact her husband by phone, eventually telling one of his aides that her coming appeal would be to the press.** June 1972 kidnapping, aftermath and vindication.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **next call** and **coming appeal** interchangeable (i.e., having the same meaning)?

Pair 672

P1: Use of Unauthorised Information from Partner (Law 16B). North - opens the bidding with '1 Heart' East - overcalls by bidding '1 Spade' South - responds by bidding '2 hearts' West - makes a bid of '4 Spades' This bid by West, because it has raised the level of the auction by more than 1 (from 2 hearts to 4 spades), is known as a 'jump bid' and most regulating authorities require him to either say 'Stop' or place the 'Stop card' on the table from the 'bidding box'. **North is then required to pause for 10 seconds before making their next call (this gives him time to adjust and reconsider his action).** North - immediately passes i.e.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **next call** and **later decision** interchangeable (i.e., having the same meaning)?

Pair 673

P1: The Thai government on 15 May 2007 upgraded all 81 minor districts to full districts. With publication in the "Royal Gazette" on 24 August the upgrade became official. As **local government entities**, the two tambon administrative organizations (TAO) were created in 2003 and 2004 respectively. The Tambon Council Ko Kut was upgraded to a TAO in 2003, and Ko Mak in 2004.

P2: The Thai government on 15 May 2007 upgraded all 81 minor districts to full districts. With publication in the "Royal Gazette" on 24 August the upgrade became official. As **regional administrative systems**, the two tambon administrative organizations (TAO) were created in 2003 and 2004 respectively. The Tambon Council Ko Kut was upgraded to a TAO in 2003, and Ko Mak in 2004.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **local government entities** and **regional administrative systems** interchangeable (i.e., having the same meaning)?

Pair 674

P1: It means that each generator is associated to a fixed IMP polynomial. Such a condition is sufficient for maximum period of each Inversive Congruential Generator and finally for maximum period of the compound generator. The construction of IMP polynomials is the most **efficient approach** to find parameters for Inversive Congruential Generator with maximum period length. Discrepancy and its boundaries.

P2: It means that each generator is associated to a fixed IMP polynomial. Such a condition is sufficient for maximum period of each Inversive Congruential Generator and finally for maximum period of the compound generator. The construction of IMP polynomials is the most **competent way** to find parameters for Inversive Congruential Generator with maximum period length. Discrepancy and its boundaries.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **efficient approach** and **competent way** interchangeable (i.e., having the same meaning)?

Pair 675

P1: Yi Wen is used for longer lines to paint clothing, for example. Ye Jing brushes are used to contour flowers and bedsheets. Xie Zhua is the finest contour brush used to paint strokes of dragonflies and **specific detail** in the painting. There are three sizes of brushes used to colour the surface of the painting: Da Bai Yun (large white cloud), Zhong Bai Yun (average white cloud) and Xiao Bai Yun (small white cloud).

P2: Yi Wen is used for longer lines to paint clothing, for example. Ye Jing brushes are used to contour flowers and bedsheets. Xie Zhua is the finest contour brush used to paint strokes of dragonflies and **exact features** in the painting. There are three sizes of brushes used to colour the surface of the painting: Da Bai Yun (large white cloud), Zhong Bai Yun (average white cloud) and Xiao Bai Yun (small white cloud).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **specific detail** and **exact features** interchangeable (i.e., having the same meaning)?

Pair 676

P1: In a recent experiment, five advertisements (each designed to target one of the five personality traits) were constructed for a single product. Findings suggest that advertisements were evaluated more positively when they aligned with participants' motives. Tailoring persuasive messages to the personality traits of the targeted audience can be an

effective way of enhancing the message's impact. There are many integrative frameworks.

P2: In a recent experiment, five advertisements (each designed to target one of the five personality traits) were constructed for a single product. Findings suggest that advertisements were evaluated more positively when they aligned with participants' motives. **Tailoring persuasive messages to the personality traits of the targeted audience can be an impressive mode** of enhancing the message's impact. There are many integrative frameworks.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **effective way** and **impressive mode** interchangeable (i.e., having the same meaning)?

Pair 677

P1: Despite most of the cars running the outer line, they couldn't pull up past the seventh place car of Denny Hamlin. Eventually though, the outside line led by Matt Kenseth started pulling up towards the fourth place car of Brad Keselowski. **Jimmie Johnson and the first three jumped up to the top line and the bottom lane eventually began breaking up.** The fourth caution of the race flew on lap 91 when Brendan Gaughan slammed the wall in turn 2.

P2: Despite most of the cars running the outer line, they couldn't pull up past the seventh place car of Denny Hamlin. Eventually though, the outside line led by Matt Kenseth started pulling up towards the fourth place car of Brad Keselowski. **Jimmie Johnson and the first three jumped up to the peak border and the bottom lane eventually began breaking up.** The fourth caution of the race flew on lap 91 when Brendan Gaughan slammed the wall in turn 2.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **top line** and **peak border** interchangeable (i.e., having the same meaning)?

Pair 678

P1: The largest compartment is typically used for the mine cage, a conveyance used for moving workers and supplies below the surface, which is suspended from the hoist on steel wire rope. It functions in a similar manner to an elevator. **Cages may be single-, double-, or rarely triple-deck, always having multiple redundant safety systems in case of unexpected failure.** The second compartment is used for one or more skips, used to hoist ore to the surface.

P2: The largest compartment is typically used for the mine cage, a conveyance used for moving workers and supplies below the surface, which is suspended from the hoist on steel wire rope. It functions in a similar manner to an elevator. **Cages may be single-, double-, or rarely triple-deck, always having multiple redundant safety systems in case of surprising misstep.** The second compartment is used for one or more skips, used to hoist ore to the surface.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **unexpected failure** and **surprising misstep** interchangeable (i.e., having the same meaning)?

Pair 679

P1: By mimicking aspects of the legitimate sales process and agencies, the scheme appears genuine in the early stages. The prospect of an easy, lucrative sale disarms the owner's normal suspicion of an unsolicited offer from a stranger with no earnest value. **Since an actual transfer through the registration system is never involved, legal safeguards built into the official transfer process provide no protection.** Fake trademark protection.

P2: By mimicking aspects of the legitimate sales process and agencies, the scheme appears genuine in the early stages. The prospect of an easy, lucrative sale disarms the owner's normal suspicion of an unsolicited offer from a stranger with no earnest value. **Since an actual transfer through the sign-up network is never involved, legal safeguards built into the official transfer process provide no protection.** Fake trademark protection.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **registration system** and **sign-up network** interchangeable (i.e., having the same meaning)?

Pair 680

P1: External donor investment produced the lease contract through soft loans worth US\$145.5 million for a Dar es Salaam Water Supply and Sanitation Project approved by the World Bank in 2003. The African Development Bank contributed US\$48m, the European Investment Bank US\$34m and the World Bank US\$61.5m. **The private company was supposed to contribute US\$8.5m from its own funds and the Tanzanian government was supposed to contribute US\$12.6m.** The World Bank and the International Monetary Fund set conditions for further loans to Tanzania contingent on the privatization of state-run organisations.

P2: External donor investment produced the lease contract through soft loans worth US\$145.5 million for a Dar es Salaam Water Supply and Sanitation Project approved by the World Bank in 2003. The African Development Bank contributed US\$48m, the European Investment Bank US\$34m and the World Bank US\$61.5m. **The non-public business was supposed to contribute US\$8.5m from its own funds and the Tanzanian government was supposed to contribute US\$12.6m.** The World Bank and the International Monetary Fund set conditions for further loans to Tanzania contingent on the privatization of state-run organisations.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **private company** and **non-public business** interchangeable (i.e., having the same meaning)?

Pair 681

P1: Footner through the years strived for kinder and more humanistic story-plots as he had done so successfully with his early romances of the north country and "Country Love". Morley praised these later novels, "Antennae," New York, 1926, published in London as "Rich Man, Poor Man," 1928 and "More Than Bread," Philadelphia, London, 1938, the latter when published caused great excitement in the Calvert County where it was set and had the locals guessing who the lovers were in this tight isolated region of Maryland. **Morley concluded if he had assumed a pseudonym they would have found a greater audience.** Obituary from the New York Times, 1944: Non-fiction.

P2: Footner through the years strived for kinder and more humanistic story-plots as he had done so successfully with his early romances of the north country and "Country Love". Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **greater audience** and **larger congregation** interchangeable (i.e., having the same meaning)?

Pair 682

P1: It consists of a sequential, empathic turning towards member after member (even absent members), in which both acknowledgement and expectation are directed at them. It is an alternative to the more common 'neutrality' or unilateral partiality of other approaches. **It requires an appreciation of the 'ledger' from each person's point of view, even that of the current victimizer.** For example, a family comes into therapy desiring to fix their son's outbursts and oppositional defiant behavior.

P2: It consists of a sequential, empathic turning towards member after member (even absent members), in which both acknowledgement and expectation are directed at them. It is an alternative to the more common 'neutrality' or unilateral partiality of other approaches. **It requires an appreciation of the 'ledger' from each being's position of view, even that of the current victimizer.** For example, a family comes into therapy desiring to fix their son's outbursts and oppositional defiant behavior.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **person's point** and **being's position** interchangeable (i.e., having the same meaning)?

Pair 683

P1: A fatal railway accident occurred on 23 February 2007, just to the south of Grayrigg that killed one passenger and 28 seriously injured. The derailment to a London (Euston) to Glasgow Virgin Pendolino express was caused by a faulty set of points controlled from the nearby Lambrigg ground frame. **The points which caused the derailment, and points on the opposite line, were removed from the track following the derailment.** The track is now welded continuously for 2.2 miles here, including the section over the Docker Viaduct.

P2: A fatal railway accident occurred on 23 February 2007, just to the south of Grayrigg that killed one passenger and 28 seriously injured. The derailment to a London (Euston) to Glasgow Virgin Pendolino express was caused by a faulty set of points controlled from the nearby Lambrigg ground frame. **The points which caused the derailment, and points on the contrary rail, were removed from the track following the derailment.** The track is now welded continuously for 2.2 miles here, including the section over the Docker Viaduct.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **opposite line** and **contrary rail** interchangeable (i.e., having the same meaning)?

Pair 684

P1: The first management contract for water supply in Armenia, covering the capital Yerevan, was signed in 1999 with financial support from the World Bank. As of 2010, almost 2.1 million people or about two thirds of the population of Armenia, including its entire urban population, received their drinking water from private companies. **Sanitation is not included in the private sector contracts and remains a public responsibility.** Basics of management contracts.

P2: The first management contract for water supply in Armenia, covering the capital Yerevan, was signed in 1999 with financial support from the World Bank. As of 2010, almost 2.1 million people or about two thirds of the population of Armenia, including its entire urban population, received their drinking water from private companies. **Sanitation is not included in the private sector contracts and remains a civic liability.** Basics of management contracts.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **public responsibility** and **civic liability** interchangeable (i.e., having the same meaning)?

Pair 685

P1: The tower portion of 3 World Trade Center was to be fully built after meeting the requirements. A spokesperson speaking on the issue of rebuilding the site commented: "Three WTC should be up by 2015; although; we do have one milestone to hit: We need to get a 400,000-square-foot tenant in order to get a financing backstop that makes sure we will complete that building. **So, that's a question mark, and it's a major priority of Silverstein Properties**". The Port Authority believes that the 2010 agreement will allow market demand to drive the construction of the towers and help to limit public investment since the Port Authority has other projects that need attention in the region.

P2: The tower portion of 3 World Trade Center was to be fully built after meeting the requirements. A spokesperson speaking on the issue of rebuilding the site commented: "Three WTC should be up by 2015; although; we do have one milestone to hit: We need to get a 400,000-square-foot tenant in order to get a financing backstop that makes sure we will complete that building. **So, that's a question mark, and it's a main concern of Silverstein Properties**". The Port Authority believes that the 2010 agreement will allow market demand to drive the construction of the towers and help to limit public investment since the Port Authority has other projects that need attention in the region.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **major priority** and **main concern** interchangeable (i.e., having the same meaning)?

Pair 686

P1: The impact of hypnosis on various aspects of sporting performance has been studied. Research has studied the role of hypnosis in enhancing basketball skills, on flow-state and golf-putting performance, its impact on long-distance runners, on archery performance and on flow states and short-serve in badminton. **The use of hypnosis in sports offers the following potential benefits that may help athletes handle personal challenges that would otherwise negatively affect sporting performance.** Hypnosis:

P2: The impact of hypnosis on various aspects of sporting performance has been studied. Research has studied the role of hypnosis in enhancing basketball skills, on flow-state and golf-putting performance, its impact on long-distance runners, on archery performance and on flow states and short-serve in badminton. **The use of hypnosis in sports offers the following potential benefits that may help athletes handle personal challenges that would otherwise negatively affect athletic execution.** Hypnosis:

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **sporting performance** and **athletic execution** interchangeable (i.e., having the same meaning)?

Pair 687

P1: Monophasic. These are typically given as 21 tablets of estrogen and progestogen, followed by seven tablets of placebo or an iron supplement, although some newer formulations contain more active tablets and fewer placebos. **Everyday regimens (Microgynon 30 ED, Femodene ED, Logynon ED), which include seven inactive placebo pills, are rarely used in uk practice.** Different formulations contain different amounts of estrogen and progestogen: Progestogen-only pills.

P2: Monophasic. These are typically given as 21 tablets of estrogen and progestogen, followed by seven tablets of placebo or an iron supplement, although some newer formulations contain more active tablets and fewer placebos. **Everyday regimens (Microgynon 30 ED, Femodene ED, Logynon ED), which include seven inactive placebo pills, are rarely used in Great Britain procedures.** Different formulations contain different amounts of estrogen and progestogen: Progestogen-only pills.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **uk practice** and **Great Britain procedures** interchangeable (i.e., having the same meaning)?

Pair 688

P1: "With Morning Comes Mistfall" is a science fiction story by American author George R. R. Martin, published by "Analog Science Fiction and Fact" magazine in May 1973. **It was the first story by Martin to be nominated for the Hugo Award and Nebula Award.** It was later included in his 2003 anthology "".

P2: "With Morning Comes Mistfall" is a science fiction story by American author George R. R. Martin, published by "Analog Science Fiction and Fact" magazine in May 1973. **It was the inaugural feature by Martin to be nominated for the Hugo Award and Nebula Award.** It was later included in his 2003 anthology "".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **first story** and **inaugural feature** interchangeable (i.e., having the same meaning)?

Pair 689

P1: The facade of the Palace Tomb has three stories, the highest of which is notable because it reaches beyond the face of the cliff and is built, rather than carved, in the top left corner. This construction is significant as the Palace Tomb is one of the only monuments in Petra which mixes the carved and built structure. **The first story has four aediculae, or small shrines surmounted by columns, which act as entryways into the tomb.** The middle two of these thresholds are almost twice as wide as the outer two.

P2: The facade of the Palace Tomb has three stories, the highest of which is notable because it reaches beyond the face of the cliff and is built, rather than carved, in the top left corner. This construction is significant as the Palace Tomb is one of the only monuments in Petra which mixes the carved and built structure. **The beginning anecdote has four aediculae, or small shrines surmounted by columns, which act as entryways into the tomb.** The middle two of these thresholds are almost twice as wide as the outer two.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **first story** and **beginning anecdote** interchangeable (i.e., having the same meaning)?

Pair 690

P1: State isolated the potential returnees and interviewed each of them individually. Those affirming they wished to return to Vietnam were escorted directly from the interview to the "Tuong Tin" for departure. **Those declining to return, numbering 45, were escorted to the mostly-empty refugee camps for onward transportation to the U.S.** The total number of Vietnamese crowded onto the "Thuong Tin" was 1,546, of whom most were men whose families were in Vietnam.

P2: State isolated the potential returnees and interviewed each of them individually. Those affirming they wished to return to Vietnam were escorted directly from the interview to the "Tuong Tin" for departure. **Those declining to return, numbering 45, were escorted to the mostly-empty refugee camps for transit ahead to the U.S.** The total number of Vietnamese crowded onto the "Thuong Tin" was 1,546, of whom most were men whose families were in Vietnam.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **onward transportation** and **transit ahead** interchangeable (i.e., having the same meaning)?

Pair 691

P1: It crashed during qualification for the 1968 race; the damage was not fixed and the car ended its career. History. **Wallis, a distant relative of Barnes Wallis, had developed a workable plan for harnessing a gas turbine to a race car.** He first presented the idea to Dan Gurney, who passed on the idea.

P2: It crashed during qualification for the 1968 race; the damage was not fixed and the car ended its career. History. **Wallis, a distant relative of Barnes Wallis, had developed a practical method for harnessing a gas turbine to a race car.** He first presented the idea to Dan Gurney, who passed on the idea.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **workable plan** and **practical method** interchangeable (i.e., having the same meaning)?

Pair 692

P1: The limitations in this interface are negligible for applications in industrial automation. SSI can handle only short distance communication (up to 1.2 km) and supports only one master device. **But, 1.2 km is rather a good distance for communication by automation industry standards.** When compared to advanced communication systems based on field buses or Ethernet, SSI is limited to a master slave architecture and a simple point to point communication between a master and a slave.

P2: The limitations in this interface are negligible for applications in industrial automation. SSI can handle only short distance communication (up to 1.2 km) and supports only one master device. **But, 1.2 km is rather a great stretch for**

communication by automation industry standards. When compared to advanced communication systems based on field buses or Ethernet, SSI is limited to a master slave architecture and a simple point to point communication between a master and a slave.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **good distance** and **great stretch** interchangeable (i.e., having the same meaning)?

Pair 693

P1: blood plasma). Hemolysis may occur in vivo or in vitro (inside or outside the body). **one cause of hemolysis is the action of hemolysins, toxins that are produced by certain pathogenic bacteria or fungi.** Another cause is intense physical exercise.

P2: blood plasma). Hemolysis may occur in vivo or in vitro (inside or outside the body). **a source of hemolysis is the action of hemolysins, toxins that are produced by certain pathogenic bacteria or fungi.** Another cause is intense physical exercise.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one cause** and **a source** interchangeable (i.e., having the same meaning)?

Pair 694

P1: Found photography as a hobby. People are more likely to engage in found photography as a hobbyist or viewer looking at a hobbyist's collection. **Unfortunately, these physical collections remain unknown while they require prior knowledge of its existence and geographical presence from viewers.** However, with the creation of new online platforms for displaying photography there are now many online collections available for viewing.

P2: Found photography as a hobby. People are more likely to engage in found photography as a hobbyist or viewer looking at a hobbyist's collection. **Unfortunately, these physical collections remain unknown while they require prior knowledge of its existence and earthly appearance from viewers.** However, with the creation of new online platforms for displaying photography there are now many online collections available for viewing.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **geographical presence** and **earthly appearance** interchangeable (i.e., having the same meaning)?

Pair 695

P1: Through the early phases of SDI, the Smart Rocks concept was ignored by the SDIO. A study by Ash Carter concluded that the system had "extremely limited capability for boost phase intercept of present Soviet ICBMs and no capability against future MX-like Soviet boosters, even with no Soviet effort to overcome the defense." **Graham's connections in Washington's political circles meant the concept was well known in spite of any official indifference.** This led to a constant stream of questions by politicians to the SDIO about the system and why they were not working on it.

P2: Through the early phases of SDI, the Smart Rocks concept was ignored by the SDIO. A study by Ash Carter concluded that the system had "extremely limited capability for boost phase intercept of present Soviet ICBMs and no capability against future MX-like Soviet boosters, even with no Soviet effort to overcome the defense." **Graham's connections in Washington's political circles meant the concept was well known in spite of any actual disinterest.** This led to a constant stream of questions by politicians to the SDIO about the system and why they were not working on it.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **official indifference** and **actual disinterest** interchangeable (i.e., having the same meaning)?

Pair 696

P1: Frentzen qualified eighth; his best lap time was disqualified after Coulthard blocked him at the Bus Stop chicane, which caused Frentzen to run onto the grass. Herbert and Barrichello rounded out the top ten drivers, with Barrichello spinning at the chicane during his third run after locking his brakes. **Fisichella, eleventh, missed the top ten by three-tenths of a second on his only quick run of the session.** Herbert's teammate, Eddie Irvine, qualified twelfth with tyre-grip problems.

P2: Frentzen qualified eighth; his best lap time was disqualified after Coulthard blocked him at the Bus Stop chicane, which caused Frentzen to run onto the grass. Herbert and Barrichello rounded out the top ten drivers, with Barrichello spinning at the chicane during his third run after locking his brakes. **Fisichella, eleventh, missed the top ten by three-tenths of a second on his only fast dash of the session.** Herbert's teammate, Eddie Irvine, qualified twelfth with tyre-grip problems.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **quick run** and **fast dash** interchangeable (i.e., having the same meaning)?

Pair 697

P1: The Miami show is held on a Sunday only, but some shows have both Saturday and Sunday access. Once the show's gates are opened (times vary: ten o'clock in Miami, eight o'clock in Chicago and York, for example), dealers and collectors (after paying a modest admission fee, usually \$7 or less) are free to negotiate arms length transactions to establish the fair market value of a given toy (a series of these transaction results may establish the 'reserve price' for a similar toy sold at a conventional auction, however), one toy at a time. **Toy shows are otherwise unlike an auction, and other alternate ways to acquire antique toys, in nearly every respect.** Chiefly, they are not at all like the mail-order or internet methods because at a Toy Show, a prospective buyer can hold and touch the object of their interest.

P2: The Miami show is held on a Sunday only, but some shows have both Saturday and Sunday access. Once the show's gates are opened (times vary: ten o'clock in Miami, eight o'clock in Chicago and York, for example), dealers and collectors (after paying a modest admission fee, usually \$7 or less) are free to negotiate arms length transactions to establish the fair market value of a given toy (a series of these transaction results may establish the 'reserve price' for a similar toy sold at a conventional auction, however), one toy at a time. **Toy shows are otherwise unlike an auction, and other alternate ways to acquire antique toys, in roughly each regard.** Chiefly, they are not at all like the mail-order or internet methods because at a Toy Show, a prospective buyer can hold and touch the object of their interest.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **nearly every respect** and **roughly each regard** interchangeable (i.e., having the same meaning)?

Pair 698

P1: Canadians had expected that women would feel sympathetic to the war efforts, but the idea that they would contribute in such a physical way was absurd to most. Because of the support that women had shown from the beginning of the war, people began to see their value in the war. **In May 1918, a meeting was held to discuss the possible creation of the Canadian Women's Corps.** In September, the motion was approved, but the project was pushed aside because the war's end was in sight.

P2: Canadians had expected that women would feel sympathetic to the war efforts, but the idea that they would contribute in such a physical way was absurd to most. Because of the support that women had shown from the beginning of the war, people began to see their value in the war. **In May 1918, a meeting was held to discuss the feasible establishment of the Canadian Women's Corps.** In September, the motion was approved, but the project was pushed aside because the war's end was in sight.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **possible creation** and **feasible establishment** interchangeable (i.e., having the same

meaning)?

Pair 699

P1: History. John Walker Sr. opened JWRV in 1963, after closing his family run grocery store, Stewards Market. The business started out selling mobile homes and expanded to Nomad travel trailers a few years later, taking **one or two orders** at a time. As demand increased for travel trailers, they changed their business model from mobile homes to recreational vehicles.

P2: History. John Walker Sr. opened JWRV in 1963, after closing his family run grocery store, Stewards Market. The business started out selling mobile homes and expanded to Nomad travel trailers a few years later, taking **a single or double purchase** at a time. As demand increased for travel trailers, they changed their business model from mobile homes to recreational vehicles.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one or two orders** and **a single or double purchase** interchangeable (i.e., having the same meaning)?

Pair 700

P1: The term "single-issue voter" has been used to describe people who may make voting decisions based on the candidates' stance on a single issue (e.g. "pro-life" or "pro-choice", support for gun rights or gun control). The existence of single-issue voters can give a **distorted impression**: a candidate's overall views may not enjoy the same support. For example, a person who votes for a socially liberal Republican candidate, based solely on their support of abortion, may not necessarily share the candidate's other views on social issues, such as gun rights or family values.

P2: The term "single-issue voter" has been used to describe people who may make voting decisions based on the candidates' stance on a single issue (e.g. "pro-life" or "pro-choice", support for gun rights or gun control). The existence of single-issue voters can give a **crooked view**: a candidate's overall views may not enjoy the same support. For example, a person who votes for a socially liberal Republican candidate, based solely on their support of abortion, may not necessarily share the candidate's other views on social issues, such as gun rights or family values.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **distorted impression** and **crooked view** interchangeable (i.e., having the same meaning)?

Pair 701

P1: Location. The church and convent, now surrounded by dense residential neighborhoods, was established outside of the walls of the city of Salvador. It was located on **second range** of hills on the outskirts of the city and overlooked the Tororo Dyke (Dique de Tororo). The church and convent are located in close proximity to the Church of the Blessed Sacrament of Saint Anne.

P2: Location. The church and convent, now surrounded by dense residential neighborhoods, was established outside of the walls of the city of Salvador. It was located on **next collection** of hills on the outskirts of the city and overlooked the Tororo Dyke (Dique de Tororo). The church and convent are located in close proximity to the Church of the Blessed Sacrament of Saint Anne.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **second range** and **next collection** interchangeable (i.e., having the same meaning)?

Pair 702

P1: Education. Children attend schools in Hope Elementary District, which consists of three schools: Hope, Monte Vista and Vieja. In state comparisons, these schools rank among the top 20 percent in California. Teenagers generally attend Santa Barbara High School District, but there is also a private high school located in Hope Ranch.

P2: Education. Children attend schools in Hope Elementary District, which consists of three schools: Hope, Monte Vista and Vieja. In state comparisons, these schools rank among the upper 20% in California. Teenagers generally attend Santa Barbara High School District, but there is also a private high school located in Hope Ranch.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are top 20 percent and upper 20% interchangeable (i.e., having the same meaning)?

Pair 703

P1: It is an ethnically and culturally diverse town, with many local residents originating from other parts of the country. Additionally, Baidoa is the heartland of Maay, an Afro-Asiatic language principally spoken by the Digil and Mirifle (Rahanweyn) clans in the southern regions of Somalia. Its speech area extends from the southwestern border with Ethiopia to a region close to the coastal strip between Mogadishu and Kismayo. Maay is not mutually comprehensible with Standard Somali, and it differs considerably in sentence structure and phonology.

P2: It is an ethnically and culturally diverse town, with many local residents originating from other parts of the country. Additionally, Baidoa is the heartland of Maay, an Afro-Asiatic language principally spoken by the Digil and Mirifle (Rahanweyn) clans in the southern regions of Somalia. Its communication sphere extends from the southwestern border with Ethiopia to a region close to the coastal strip between Mogadishu and Kismayo. Maay is not mutually comprehensible with Standard Somali, and it differs considerably in sentence structure and phonology.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are speech area and communication sphere interchangeable (i.e., having the same meaning)?

Pair 704

P1: The defences for each bridge consisted of four large concrete pillboxes on the western side of the canal, three equipped with machine-guns and a fourth with an anti-tank gun; the bunker containing the anti-tank gun was positioned close to the road leading from the bridge, with one machinegun-equipped bunker immediately behind the bridge and two others flanking the bridge a short distance either side. A company position existed on the western bank of the canal by each of the bridges, with a small observation post on the eastern side, which could be quickly recalled, and all three bridges could be destroyed with demolition charges set into their structures, triggered by a firing mechanism situated in the anti-tank bunkers. Fort Eben-Emael, which measured , had been built during the 1930s, and completed by 1935, by blasting the required space out of marl. It possessed walls and roofs composed of thick reinforced concrete, as well as four retractable casemates and sixty-four strongpoints.

P2: The defences for each bridge consisted of four large concrete pillboxes on the western side of the canal, three equipped with machine-guns and a fourth with an anti-tank gun; the bunker containing the anti-tank gun was positioned close to the road leading from the bridge, with one machinegun-equipped bunker immediately behind the bridge and two others flanking the bridge a short distance either side. Fort Eben-Emael, which measured , had been built during the 1930s, and completed by 1935, by blasting the necessary area out of marl. It possessed walls and roofs composed of thick reinforced concrete, as well as four retractable casemates and sixty-four strongpoints.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are required space and necessary area interchangeable (i.e., having the same meaning)?

Pair 705

P1: The exterior of tomb was made of glazed bricks which included greenish-blue color and usual good quality red bricks. Glazed bricks were set vertically and horizontally. **The entire surface of the tower is covered with the repeating word "Allah", rotated at an angle of 45 degrees.** The word "Allah" is repeated over 200 times.

P2: The exterior of tomb was made of glazed bricks which included greenish-blue color and usual good quality red bricks. Glazed bricks were set vertically and horizontally. **The complete outside of the tower is covered with the repeating word "Allah", rotated at an angle of 45 degrees.** The word "Allah" is repeated over 200 times.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **entire surface** and **complete outside** interchangeable (i.e., having the same meaning)?

Pair 706

P1: Such an aesthetic are also revealed by the vivid shape of Sancai, which is shaped with regards of many aspects in reality, for instance, buildings, livestock, human figure, and daily items (plates, lights, pillows, bottles. etc.). **For example, the figures of horse are lively and natural for the smooth curves of the muscle of its legs and delicate saddle.** The development of porcelain technology in Song dynasty is unprecedented, with multifarious vessel shapes and rich and colourful decorative patterns.

P2: Such an aesthetic are also revealed by the vivid shape of Sancai, which is shaped with regards of many aspects in reality, for instance, buildings, livestock, human figure, and daily items (plates, lights, pillows, bottles. etc.). **For example, the figures of horse are lively and natural for the continuous arches of the muscle of its legs and delicate saddle.** The development of porcelain technology in Song dynasty is unprecedented, with multifarious vessel shapes and rich and colourful decorative patterns.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **smooth curves** and **continuous arches** interchangeable (i.e., having the same meaning)?

Pair 707

P1: In short, although the Allies at that time had nine carriers afloat worldwide to oppose the six the Axis powers (Japan) had afloat, the combat operational reality in the Pacific was that, for a short period, there were zero Allied carriers that were operational to oppose Japan's three operational carriers. As the war progressed, the relative number of operational carriers available for combat by each side depended upon 1)construction rates for new carriers, 2)losses due to sinkings, 3)how quickly carriers damaged in combat could be brought back into service, and 4)the time required for routine overhauls, refits for carriers to perform specific functions, and upgrades for older carriers. **Short-term naval capabilities, plans, and outcomes were determined by the number of carriers that were operational during any given month.** The impact of the relative number of operational, combat-ready carriers available was particularly felt during 1942, when the strategic initiative in the Pacific Theater passed from Japan to America.

P2: In short, although the Allies at that time had nine carriers afloat worldwide to oppose the six the Axis powers (Japan) had afloat, the combat operational reality in the Pacific was that, for a short period, there were zero Allied carriers that were operational to oppose Japan's three operational carriers. Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **complete recognition** and **total acknowledgement** interchangeable (i.e., having the same meaning)?

Pair 709

P1: The "Equal Opportunity in Public Employment Act 1992" and the "Public Service Act 2008" promotes equality of employment in the public sector. Furthermore, if a gay or lesbian couple came to Queensland from another state where they were recognised as a couple, Queensland will do the same. A series of amendments to Commonwealth legislation in 2008 provided **complete recognition** of same-sex couples at the federal level. This led to a contradiction with Queensland laws, particularly where children were involved.

P2: The "Equal Opportunity in Public Employment Act 1992" and the "Public Service Act 2008" promotes equality of employment in the public sector. Furthermore, if a gay or lesbian couple came to Queensland from another state where they were recognised as a couple, Queensland will do the same. A series of amendments to Commonwealth legislation in 2008 provided **one hundred percent identification** of same-sex couples at the federal level. This led to a contradiction with Queensland laws, particularly where children were involved.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **complete recognition** and **one hundred percent identification** interchangeable (i.e., having the same meaning)?

Pair 710

P1: Not only does the officer preside over meetings of the council, but he or she also makes assignments to City Council committees and handles parliamentary duties like ruling motions in or out of order. The president automatically become acting mayor when the mayor is out of the state. The president is elected at the first meeting of the new council term, beginning on July 1 of **every odd-numbered year**. Normally this meeting is called to order by the City Clerk for the election of the president, after which a president pro tempore is chosen.

P2: Not only does the officer preside over meetings of the council, but he or she also makes assignments to City Council committees and handles parliamentary duties like ruling motions in or out of order. The president automatically become acting mayor when the mayor is out of the state. The president is elected at the first meeting of the new council term, beginning on July 1 of **each unmatched year**. Normally this meeting is called to order by the City Clerk for the election of the president, after which a president pro tempore is chosen.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **every odd-numbered year** and **each unmatched year** interchangeable (i.e., having the same meaning)?

Pair 711

P1: The 1982 Embassy World Indoor Bowls Championship was held at the Coatbridge indoor bowling club, North Lanarkshire, Scotland, from 9–14 February 1982.
 Sudden death was introduced with 16 competitors (4 from a qualifying tournament), it replaced the **group format**. The winners prize was £4,000, a record for bowls.

P2: The 1982 Embassy World Indoor Bowls Championship was held at the Coatbridge indoor bowling club, North Lanarkshire, Scotland, from 9–14 February 1982.
 Sudden death was introduced with 16 competitors (4 from a qualifying tournament), it replaced the **collective configuration**. The winners prize was £4,000, a record for bowls.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **group format** and **collective configuration** interchangeable (i.e., having the same meaning)?

Pair 712

P1: This only works in long-term art therapy interventions. Children who have experienced trauma may benefit from group art therapy. The **group format** is effective in helping survivors develop relationships with others who have experienced similar situations. Group art therapy may also be beneficial in helping children with trauma regain trust and social self-esteem.

P2: This only works in long-term art therapy interventions. Children who have experienced trauma may benefit from group art therapy. The **troop arrangement** is effective in helping survivors develop relationships with others who have experienced similar situations. Group art therapy may also be beneficial in helping children with trauma regain trust and social self-esteem.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **group format** and **troop arrangement** interchangeable (i.e., having the same meaning)?

Pair 713

P1: The registration system let all players play until level six, then it wouldn't allow players to get past to level 7 until the program was registered. Users often sent in funds for that very purpose. Some players even registered their own copy of LORD for local use so they could practice skills and **test strategies**. IGMs.

P2: The registration system let all players play until level six, then it wouldn't allow players to get past to level 7 until the program was registered. Users often sent in funds for that very purpose. Some players even registered their own copy of LORD for local use so they could practice skills and **check techniques**. IGMs.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **test strategies** and **check techniques** interchangeable (i.e., having the same meaning)?

Pair 714

P1: They contend that EBT's concept of the systematic review could prove particularly helpful for the standardization and quality assurance of novel methodologies for evaluating toxicity, as well as for their formal validation. In this regard, EBT may prove particularly useful for assessing the performance of newer non-animal "21st century" toxicology tools. EBT can also help scientists integrate new toxicological test methods into **test strategies** being implemented across the globe. In 2010, a group of EBT supporters joined together to convene a workshop titled "21st Century Validation for 21st Century Tools." The session on the potential for evidence-based approaches to assess the performance of the new

generation of non-animal test methods inspired the formation of the EBTC.

P2: They contend that EBT’s concept of the systematic review could prove particularly helpful for the standardization and quality assurance of novel methodologies for evaluating toxicity, as well as for their formal validation. In this regard, EBT may prove particularly useful for assessing the performance of newer non-animal “21st century” toxicology tools. EBT can also help scientists integrate new toxicological test methods into experimental procedures being implemented across the globe. In 2010, a group of EBT supporters joined together to convene a workshop titled “21st Century Validation for 21st Century Tools.” The session on the potential for evidence-based approaches to assess the performance of the new generation of non-animal test methods inspired the formation of the EBTC.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are test strategies and experimental procedures interchangeable (i.e., having the same meaning)?

Pair 715

P1: Cricket. In cricket, some of the great batsmen like Donald Bradman , Sachin Tendulkar and Sunil Gavaskar both are or were below average height. This may be because a smaller body makes for an advantage in footwork and balance. Similarly, the most graceful wicket-keepers have tended to be average height or below.

P2: Cricket. In cricket, some of the great batsmen like Donald Bradman , Sachin Tendulkar and Sunil Gavaskar both are or were below average height. This may be because a tinier frame makes for an advantage in footwork and balance. Similarly, the most graceful wicket-keepers have tended to be average height or below.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are smaller body and tinier frame interchangeable (i.e., having the same meaning)?

Pair 716

P1: Zenobia Dawson points out that she does not like answering questions about getting an allowance from a father when she has neither. Namond Brice tells the teacher that he feels cheated because his class is now the same as the other classes. Colvin and Dr. David Parenti share a concern that the test material does not speak to the students at all. After class, Dukie confesses to Prez his own misgivings about moving up to high school.

P2: Zenobia Dawson points out that she does not like answering questions about getting an allowance from a father when she has neither. Namond Brice tells the teacher that he feels cheated because his class is now the same as the other classes. Colvin and Dr. David Parenti share a concern that the evaluation information does not speak to the students at all. After class, Dukie confesses to Prez his own misgivings about moving up to high school.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are test material and evaluation information interchangeable (i.e., having the same meaning)?

Pair 717

P1: Water dispensers can be directly connected to the in-house water source for continuous dispensing of hot and cold drinking water. It is commonly referred to as POU () water dispensers. POU units are generally more hygienic than bottled water coolers, provided the end user has access to clean water sources. Freestanding.

P2: Water dispensers can be directly connected to the in-house water source for continuous dispensing of hot and cold drinking water. It is commonly referred to as POU () water dispensers. POU units are generally more hygienic than bottled water coolers, provided the end user has access to hygienic water fountains. Freestanding.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **clean water sources** and **hygienic water fountains** interchangeable (i.e., having the same meaning)?

Pair 718

P1: In court, Detective Chief Inspector Karin Parke (Kelly Macdonald) explains her role investigating the death of Jo Powers (Elizabeth Berrington), a journalist found dead after writing a column that derided a self-immolating disability rights activist. Karin works with Trainee Detective Constable Blue Coulson (Faye Marsay) and Nick Shelton (Joe Armstrong). Powers' hospitalised husband claims that she cut her throat with a **wine glass**. Karin and Blue talk to a preschool teacher who sent Powers a cake with "fucking bitch" written in icing.

P2: In court, Detective Chief Inspector Karin Parke (Kelly Macdonald) explains her role investigating the death of Jo Powers (Elizabeth Berrington), a journalist found dead after writing a column that derided a self-immolating disability rights activist. Karin works with Trainee Detective Constable Blue Coulson (Faye Marsay) and Nick Shelton (Joe Armstrong). Powers' hospitalised husband claims that she cut her throat with a **liquor decanter**. Karin and Blue talk to a preschool teacher who sent Powers a cake with "fucking bitch" written in icing.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **wine glass** and **liquor decanter** interchangeable (i.e., having the same meaning)?

Pair 719

P1: As of 2014, IPKall offered "free" Washington (state) numbers to voice over IP subscribers anywhere on the Internet, but chose to discontinue services after May 1, 2016. Consequences. **End-users of traffic-pumped phone services often do not pay directly for the high fees** collected by rural local carriers and service providers. Many wireless and land line customers now have unlimited long-distance plans, and thus the entire inflated cost of using these services is borne by their long-distance carrier.

P2: As of 2014, IPKall offered "free" Washington (state) numbers to voice over IP subscribers anywhere on the Internet, but chose to discontinue services after May 1, 2016. Consequences. **End-users of traffic-pumped phone services often do not pay directly for the increased prices** collected by rural local carriers and service providers. Many wireless and land line customers now have unlimited long-distance plans, and thus the entire inflated cost of using these services is borne by their long-distance carrier.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **high fees** and **increased prices** interchangeable (i.e., having the same meaning)?

Pair 720

P1: The host plants response to an aphid infestation is a loss of turgor and reduced growth due to water imbalances as the aphid feed on phloem. The aphid also causes reduction in biomass of the whole plant. **However, once the aphid is removed the plant quickly recovers absolute growth rate and has increased relative growth.** As a result of previous infestation, the recovering plants are more efficient in carbon assimilation that results in increased relative growth rates and compensates for the leaf damages during aphid infestation.

P2: The host plants response to an aphid infestation is a loss of turgor and reduced growth due to water imbalances as the aphid feed on phloem. The aphid also causes reduction in biomass of the whole plant. **However, once the aphid is removed the plant quickly recovers absolute growth rate and has increased respective flourishing rate.** As a result of previous infestation, the recovering plants are more efficient in carbon assimilation that results in increased relative growth rates and compensates for the leaf damages during aphid infestation.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **relative growth** and **respective flourishing rate** interchangeable (i.e., having the same meaning)?

Pair 721

P1: He is portrayed by Peter Weller. Giorgio Adonis Vellek. A Greek-American crime lord who controls of many Greek islands in the Mediterranean, extorting the **local farmers** and fisherman. He organises gambling fight clubs, which keep people entertained and prevent them from going against him.

P2: He is portrayed by Peter Weller. Giorgio Adonis Vellek. A Greek-American crime lord who controls of many Greek islands in the Mediterranean, extorting the **community ranchers** and fisherman. He organises gambling fight clubs, which keep people entertained and prevent them from going against him.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **local farmers** and **community ranchers** interchangeable (i.e., having the same meaning)?

Pair 722

P1: This means that they would assume all the previous landlord's rights and responsibilities listed and agreed upon in the lease agreement with the tenant. Commercial Leasing Alternatives. It some instances a commercial lease may not be a **good fit** for an entrepreneur. In that case they may consider alternatives, so here are some of the most common: Co-Working Space.

P2: This means that they would assume all the previous landlord's rights and responsibilities listed and agreed upon in the lease agreement with the tenant. Commercial Leasing Alternatives. It some instances a commercial lease may not be a **perfect pain** for an entrepreneur. In that case they may consider alternatives, so here are some of the most common: Co-Working Space.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **good fit** and **perfect pain** interchangeable (i.e., having the same meaning)?

Pair 723

P1: Defense mechanisms are behavior patterns primarily concerned with protecting ego. Presumably the process is unconscious and the aim is to fool oneself. It is intra psychic processes serving to provide relief from **emotional conflict and anxiety**. Conscious efforts are frequently made for the same reasons, but true defense mechanisms are unconscious.

P2: Defense mechanisms are behavior patterns primarily concerned with protecting ego. Presumably the process is unconscious and the aim is to fool oneself. It is intra psychic processes serving to provide relief from **psychological disturbance and anxiety**. Conscious efforts are frequently made for the same reasons, but true defense mechanisms are unconscious.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **emotional conflict** and **psychological disturbance** interchangeable (i.e., having the same meaning)?

Pair 724

P1: It has common functions such as a to-do list and a calendar and unique functions such as a creeping line and adjusting colors to a desktop. Different event types have a different set of displayed field and a different text of a notification. Each **event type** can be supplemented with a photo which is displayed in a tooltip. Calendars can also be imported using widespread iCal files.

P2: It has common functions such as a to-do list and a calendar and unique functions such as a creeping line and adjusting colors to a desktop. Different event types have a different set of displayed field and a different text of a notification. Each **action variety** can be supplemented with a photo which is displayed in a tooltip. Calendars can also be imported

using widespread iCal files.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **event type** and **action variety** interchangeable (i.e., having the same meaning)?

Pair 725

P1: "I put in her CD, just listened to three songs probably. I just wanted to kind of get that attitude without totally redoing a Lyn Collins song or without totally taking her approach to it or her ad-libs. I kept it more on an Aretha vibe with the ad-libs, and the **whole attitude**, just real gutsy and raw, was inspired by Lyn Collins." Critical reception.

P2: "I put in her CD, just listened to three songs probably. I just wanted to kind of get that attitude without totally redoing a Lyn Collins song or without totally taking her approach to it or her ad-libs. I kept it more on an Aretha vibe with the ad-libs, and the **entire demeanor**, just real gutsy and raw, was inspired by Lyn Collins." Critical reception.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **whole attitude** and **entire demeanor** interchangeable (i.e., having the same meaning)?

Pair 726

P1: Description. The order Fecampiida, as currently defined, was erected based on molecular studies. They all are parasitic organisms and are united by a **similar development** of the basal bodies during spermiogenesis. Classification.

P2: Description. The order Fecampiida, as currently defined, was erected based on molecular studies. They all are parasitic organisms and are united by a **complementary growth** of the basal bodies during spermiogenesis. Classification.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **similar development** and **complementary growth** interchangeable (i.e., having the same meaning)?

Pair 727

P1: In humans, the spleen receives blood from the splenic artery, which branches into central and penicillar arterioles. Owing to the absence of a histologically defined marginal sinus, the blood flowing in penicillar arterioles directly drains into capillaries of the red pulp and perifollicular zone. The perifollicular zone is a **well-defined area** of decreased resistance that separates the MZ from the red pulp. Both the perifollicular zone and the red pulp consist of an open circulatory system of blood-filled spaces known as splenic cords, which have no defined endothelial delimitation and are in close contact with the venous sinusoidal vessels of the red pulp.

P2: In humans, the spleen receives blood from the splenic artery, which branches into central and penicillar arterioles. Owing to the absence of a histologically defined marginal sinus, the blood flowing in penicillar arterioles directly drains into capillaries of the red pulp and perifollicular zone. The perifollicular zone is a **specific zone** of decreased resistance that separates the MZ from the red pulp. Both the perifollicular zone and the red pulp consist of an open circulatory system of blood-filled spaces known as splenic cords, which have no defined endothelial delimitation and are in close contact with the venous sinusoidal vessels of the red pulp.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **well-defined area** and **specific zone** interchangeable (i.e., having the same meaning)?

Pair 728

P1: History. Background and passage. During the Vietnam War, the United States found itself involved for many years in situations of **intense conflict** without a declaration of war. Many members of Congress became concerned with the erosion of congressional authority to decide when the United States should become involved in a war or the use of armed forces that might lead to war.

P2: History. Background and passage. During the Vietnam War, the United States found itself involved for many years in situations of **vigorous fighting** without a declaration of war. Many members of Congress became concerned with the erosion of congressional authority to decide when the United States should become involved in a war or the use of armed forces that might lead to war.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **intense conflict** and **vigorous fighting** interchangeable (i.e., having the same meaning)?

Pair 729

P1: The researcher needs to obtain it so to not formally contravenes European data protection legislation. However, it can be done in different ways online. For example, a **consent form** could be emailed and then faxed, posted or send back via email. Another way of creating consent could be to include a tick box "I accept" to simulate a signature.

P2: The researcher needs to obtain it so to not formally contravenes European data protection legislation. However, it can be done in different ways online. For example, a **permission slip** could be emailed and then faxed, posted or send back via email. Another way of creating consent could be to include a tick box "I accept" to simulate a signature.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **consent form** and **permission slip** interchangeable (i.e., having the same meaning)?

Pair 730

P1: Journalistic ethics and standards comprise principles of ethics and good practice applicable to journalists. This subset of media ethics is known as journalism's professional "code of ethics" and the "canons of journalism". The basic codes and canons commonly appear in statements by professional journalism associations and **individual print**, broadcast, and online news organizations. So while various codes may have some differences, most share common elements including the principles of truthfulness, accuracy, objectivity, impartiality, fairness, and public accountability, as these apply to the acquisition of newsworthy information and its subsequent dissemination to the public.

P2: Journalistic ethics and standards comprise principles of ethics and good practice applicable to journalists. This subset of media ethics is known as journalism's professional "code of ethics" and the "canons of journalism". The basic codes and canons commonly appear in statements by professional journalism associations and **exclusive publications**, broadcast, and online news organizations. So while various codes may have some differences, most share common elements including the principles of truthfulness, accuracy, objectivity, impartiality, fairness, and public accountability, as these apply to the acquisition of newsworthy information and its subsequent dissemination to the public.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **individual print** and **exclusive publications** interchangeable (i.e., having the same meaning)?

Pair 731

P1: The 2012 North Indian Ocean cyclone season was an event in the annual cycle of tropical cyclone formation. The season had a late start, with the **first system** forming in October. During the season, only five systems formed, of which only two became cyclonic storms.

P2: The 2012 North Indian Ocean cyclone season was an event in the annual cycle of tropical cyclone formation. The season had a late start, with the **beginning pattern** forming in October. During the season, only five systems formed,

of which only two became cyclonic storms.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **first system** and **beginning pattern** interchangeable (i.e., having the same meaning)?

Pair 732

P1: The development of natural resources in private hands was to revert to the state free of charge after a period of 60 to 80 years, with no other form of compensation to the owners. The political struggle over escheat was difficult. **one central point** of contention regarding reversion of ownership to the state was unconstitutional encroachment on private ownership. The law gave no preferential treatment to Norwegian companies, although some argued that it should.

P2: The development of natural resources in private hands was to revert to the state free of charge after a period of 60 to 80 years, with no other form of compensation to the owners. The political struggle over escheat was difficult. **a singular element** of contention regarding reversion of ownership to the state was unconstitutional encroachment on private ownership. The law gave no preferential treatment to Norwegian companies, although some argued that it should.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one central point** and **a singular element** interchangeable (i.e., having the same meaning)?

Pair 733

P1: Tropical depressions. A total of seven tropical cyclones remained below tropical storm intensity during the 1968 Atlantic hurricane season. **The first such system** formed in the north-central Gulf of Mexico at 00:00 UTC on July 4. Moving east-northeastward, it dissipated offshore St. George Island, Florida, about 24 hours later.

P2: Tropical depressions. A total of seven tropical cyclones remained below tropical storm intensity during the 1968 Atlantic hurricane season. **The number one said structure** formed in the north-central Gulf of Mexico at 00:00 UTC on July 4. Moving east-northeastward, it dissipated offshore St. George Island, Florida, about 24 hours later.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **first such system** and **number one said structure** interchangeable (i.e., having the same meaning)?

Pair 734

P1: all statement lines that include the variable). For a given string or chunk of data, Pearson's original algorithm produces only an 8-bit byte or integer, 0-255. **However, the algorithm makes it extremely easy to generate a hash of whatever length is desired.** As Pearson noted, a change to any bit in the string causes his algorithm to create a completely different hash (0-255).

P2: all statement lines that include the variable). For a given string or chunk of data, Pearson's original algorithm produces only an 8-bit byte or integer, 0-255. **However, the algorithm makes it extremely easy to generate a hash of the particular sequence is desired.** As Pearson noted, a change to any bit in the string causes his algorithm to create a completely different hash (0-255).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **whatever length** and **the particular sequence** interchangeable (i.e., having the same meaning)?

Pair 735

P1: The Prishtina Book Fair is an annual book fair held in the Prishtina, capital of Kosovo. The event is **traditional organization** and the participation of Kosovo's publishers with common stand at the fair on the world renowned - Frankfurt Book Fair. So far, there, at the Palace of Youth and Sports have been organized book fairs, every year.

P2: The Prishtina Book Fair is an annual book fair held in the Prishtina, capital of Kosovo. The event is **customary gathering** and the participation of Kosovo's publishers with common stand at the fair on the world renowned - Frankfurt Book Fair. So far, there, at the Palace of Youth and Sports have been organized book fairs, every year.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **traditional organization** and **customary gathering** interchangeable (i.e., having the same meaning)?

Pair 736

P1: Absolute Breakout. An absolute breakout is imposed based on the licensing of the vehicle and/or the driver. Depending on class, a driver may be given **one warning**, but in most cases they are immediately disqualified. Violations involving absolute breakout include: Examples: This eliminates any advantage from bending the rules by putting a slow dial-in time on the windshield to get a head start.

P2: Absolute Breakout. An absolute breakout is imposed based on the licensing of the vehicle and/or the driver. Depending on class, a driver may be given **a single caution**, but in most cases they are immediately disqualified. Violations involving absolute breakout include: Examples: This eliminates any advantage from bending the rules by putting a slow dial-in time on the windshield to get a head start.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one warning** and **a single caution** interchangeable (i.e., having the same meaning)?

Pair 737

P1: It was once thought necessary or beneficial for ice-screws to be placed horizontally or with the hanger up for optimum hold. However, it has since been found experimentally that a screw placed with the tip angled up often holds as well or better. This **surprising result** is thought to be due to the previously underestimated role of the threads in holding the screw in place. However, horizontal placements are usually recommended.

P2: It was once thought necessary or beneficial for ice-screws to be placed horizontally or with the hanger up for optimum hold. However, it has since been found experimentally that a screw placed with the tip angled up often holds as well or better. This **miraculous finish** is thought to be due to the previously underestimated role of the threads in holding the screw in place. However, horizontal placements are usually recommended.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **surprising result** and **miraculous finish** interchangeable (i.e., having the same meaning)?

Pair 738

P1: Both of these candidates had a better result than their parties had in 1988, but came nowhere near being able to participate in the next round. In choosing Dominique Voynet, the Greens opted for their integration with the left. On the far-right, Jean-Marie Le Pen tried to repeat his **surprising result** that he obtained in the 1988 presidential election. His main rival for the far-right vote was Philippe de Villiers, candidate of the eurosceptic parliamentary right.

P2: Both of these candidates had a better result than their parties had in 1988, but came nowhere near being able to participate in the next round. In choosing Dominique Voynet, the Greens opted for their integration with the left. On

the far-right, Jean-Marie Le Pen tried to repeat his **extraordinary outcome** that he obtained in the 1988 presidential election. His main rival for the far-right vote was Philippe de Villiers, candidate of the eurosceptic parliamentary right.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **surprising result** and **extraordinary outcome** interchangeable (i.e., having the same meaning)?

Pair 739

P1: United States. The Forum on Construction Law of the American Bar Association established in 1973 is the largest organization of construction lawyers in the United States. The group includes law firms of **every size**, solo practitioners, in-house and government counsel, non-lawyers such as, construction professionals and the public sector representatives. Forum members include those of owners, developers, design professionals, contractors, subcontractors, suppliers, construction managers, lenders, insurers and sureties.

P2: United States. The Forum on Construction Law of the American Bar Association established in 1973 is the largest organization of construction lawyers in the United States. The group includes law firms of **all proportions**, solo practitioners, in-house and government counsel, non-lawyers such as, construction professionals and the public sector representatives. Forum members include those of owners, developers, design professionals, contractors, subcontractors, suppliers, construction managers, lenders, insurers and sureties.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **every size** and **all proportions** interchangeable (i.e., having the same meaning)?

Pair 740

P1: These companies have denied those allegations despite NSA leaks. As of 2013, 90% of all of Internet traffic is being routed to hosts outside the country. Iran said it set a **world record** of 46% in online participation using NIN during the national census in 2016. Much has been reported on the ways in which NIN aids the government with censorship and controls on the internet.

P2: These companies have denied those allegations despite NSA leaks. As of 2013, 90% of all of Internet traffic is being routed to hosts outside the country. Iran said it set a **universal top achievement** of 46% in online participation using NIN during the national census in 2016. Much has been reported on the ways in which NIN aids the government with censorship and controls on the internet.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **world record** and **universal top achievement** interchangeable (i.e., having the same meaning)?

Pair 741

P1: The album cover was designed by Jim Ladwig. The album was reissued in a remastered and expanded form on 28 August 2015, including early rehearsal takes of three of its tracks. The vinyl reissue did not contain any bonus tracks, but did replicate the original LP cover with the **animated picture** of Gastone. The tracks.

P2: The album cover was designed by Jim Ladwig. The album was reissued in a remastered and expanded form on 28 August 2015, including early rehearsal takes of three of its tracks. The vinyl reissue did not contain any bonus tracks, but did replicate the original LP cover with the **caricature illustration** of Gastone. The tracks.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **animated picture** and **caricature illustration** interchangeable (i.e., having the same meaning)?

Pair 742

P1: The difficult relations with Henry IV Probus brought a much greater enemy into the Silesian affairs. On 10 January 1289 Casimir was the first Silesian Duke to pay homage to the Bohemian King Wenceslaus II in Prague. The direct arguments which caused Casimir to make this radical step are unclear. In any event, the Dukes of Cieszyn and Racibórz soon followed the example of Casimir and also paid homage to the Kingdom of Bohemia (some historians believed that this could be the cause of the bloody Battle of Siewierz on 26 February of that year).

P2: The difficult relations with Henry IV Probus brought a much greater enemy into the Silesian affairs. On 10 January 1289 Casimir was the first Silesian Duke to pay homage to the Bohemian King Wenceslaus II in Prague. The direct arguments which caused Casimir to make this dramatic move are unclear. In any event, the Dukes of Cieszyn and Racibórz soon followed the example of Casimir and also paid homage to the Kingdom of Bohemia (some historians believed that this could be the cause of the bloody Battle of Siewierz on 26 February of that year).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are radical step and dramatic move interchangeable (i.e., having the same meaning)?

Pair 743

P1: 9", "Private View" is particularly dark. Reception. Critics offered high praise for "Private View", with many characterising it as a worthy end for a strong series. Several critics commended the contrast between the episode's humour and horror: Patrick Mulkern, of the "Radio Times", called it "a scream, both darkly amusing and bloodily macabre", Julie McDowall, of "The National", called it "a gruesome and darkly comic episode", and Sam Wollaston, of "The Guardian", called it "Horrible, macabre and gruesome, but gloriously and hilariously so."

P2: 9", "Private View" is particularly dark. Reception. Critics offered high praise for "Private View", with many characterising it as a worthy end for a powerful show. Several critics commended the contrast between the episode's humour and horror: Patrick Mulkern, of the "Radio Times", called it "a scream, both darkly amusing and bloodily macabre", Julie McDowall, of "The National", called it "a gruesome and darkly comic episode", and Sam Wollaston, of "The Guardian", called it "Horrible, macabre and gruesome, but gloriously and hilariously so."

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are strong series and powerful show interchangeable (i.e., having the same meaning)?

Pair 744

P1: Many of these, such as the Northwest Folklife Festival that premiered at Seattle Center on Memorial Day weekend nine months after the first Bumbershoot, have become established traditions in their own right. AEG Presents takes over. After several years of financial trouble, AEG Live took over as lead promoter in 2015, with One Reel providing supporting programming. AEG had previously taken on a secondary production role from 2007 to 2009 during which they experienced "significant losses due to rain and the Great Recession of 2009".

P2: Many of these, such as the Northwest Folklife Festival that premiered at Seattle Center on Memorial Day weekend nine months after the first Bumbershoot, have become established traditions in their own right. AEG Presents takes over. After several years of financial trouble, AEG Live took over as primary backer in 2015, with One Reel providing supporting programming. AEG had previously taken on a secondary production role from 2007 to 2009 during which they experienced "significant losses due to rain and the Great Recession of 2009".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are lead promoter and primary backer interchangeable (i.e., having the same meaning)?

Pair 745

P1: Complying ISPs included: Beeline, MTS, MGTS and Megafon. Maxim Ksenzov, the Deputy Head of Roscomnadzor, said in a statement that the block was due to GitHub not complying with earlier takedown requests for the manual on October 10, 2014. **GitHub was also momentarily blocked on October 2, 2014 until the original copy of the manual was deleted by its uploader.** Banned content.

P2: Complying ISPs included: Beeline, MTS, MGTS and Megafon. Maxim Ksenzov, the Deputy Head of Roscomnadzor, said in a statement that the block was due to GitHub not complying with earlier takedown requests for the manual on October 10, 2014. **GitHub was also momentarily blocked on October 2, 2014 until the primary adaptation of the manual was deleted by its uploader.** Banned content.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **original copy** and **primary adaptation** interchangeable (i.e., having the same meaning)?

Pair 746

P1: PI(4,5)P2 is present on plasma membranes, PI(3)P on early endosomes, PI(3,5)P2 on late endosomes and PI(4)P on the trans Golgi network. These lipids on the surface of the endosomes help in the specific recruitment of proteins from the cytosol, thus providing them an identity. **The inter-conversion of these lipids is a result of the concerted action of phosphoinositide kinases and phosphatases that are strategically localized Pathways.** There are three main compartments that have pathways that connect with endosomes.

P2: PI(4,5)P2 is present on plasma membranes, PI(3)P on early endosomes, PI(3,5)P2 on late endosomes and PI(4)P on the trans Golgi network. These lipids on the surface of the endosomes help in the specific recruitment of proteins from the cytosol, thus providing them an identity. **The inter-conversion of these lipids is a result of the combined undertaking of phosphoinositide kinases and phosphatases that are strategically localized Pathways.** There are three main compartments that have pathways that connect with endosomes.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **concerted action** and **combined undertaking** interchangeable (i.e., having the same meaning)?

Pair 747

P1: A service built on a potentially reusable functional context but with a contract that does not convey this reusability correctly does not achieve its reusability potential. Within service-oriented solutions, a service contract represents a fundamental artifact, as this is the only medium through which services interact with each other or other consumer programs. **This creates a strong need to standardize the service contracts in order to make services reusable and recomposable as much as possible.** In order to achieve this, the standardized service contract design principle needs to be applied as its application results in standardized service contracts that are based on design standards as set within a service inventory.

P2: A service built on a potentially reusable functional context but with a contract that does not convey this reusability correctly does not achieve its reusability potential. Within service-oriented solutions, a service contract represents a fundamental artifact, as this is the only medium through which services interact with each other or other consumer programs. **This creates a steadfast demand to standardize the service contracts in order to make services reusable and recomposable as much as possible.** In order to achieve this, the standardized service contract design principle needs to be applied as its application results in standardized service contracts that are based on design standards as set within a service inventory.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **strong need** and **steadfast demand** interchangeable (i.e., having the same meaning)?

Pair 748

P1: The head is notably broad, and the snout is short and triangular with a blunt tip. The nostrils are preceded by a forked flap of skin. The medium-sized eyes are oval in shape and have a notch in the **outside corner**; behind them are small, crescent-shaped spiracles. The mouth is nearly straight and bears long furrows at the corners.

P2: The head is notably broad, and the snout is short and triangular with a blunt tip. The nostrils are preceded by a forked flap of skin. The medium-sized eyes are oval in shape and have a notch in the **outer edge**; behind them are small, crescent-shaped spiracles. The mouth is nearly straight and bears long furrows at the corners.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **outside corner** and **outer edge** interchangeable (i.e., having the same meaning)?

Pair 749

P1: In queueing theory, a discipline within the mathematical theory of probability, mean value analysis (MVA) is a recursive technique for computing expected queue lengths, waiting time at queueing nodes and throughput in equilibrium for a closed separable system of queues. The first approximate techniques were published independently by Schweitzer and Bard, followed later by an **exact version** by Lavenberg and Reiser published in 1980. It is based on the arrival theorem, which states that when one customer in an "M"-customer closed system arrives at a service facility he/she observes the rest of the system to be in the equilibrium state for a system with "M" - 1 customers.

P2: In queueing theory, a discipline within the mathematical theory of probability, mean value analysis (MVA) is a recursive technique for computing expected queue lengths, waiting time at queueing nodes and throughput in equilibrium for a closed separable system of queues. The first approximate techniques were published independently by Schweitzer and Bard, followed later by an **exacting report** by Lavenberg and Reiser published in 1980. It is based on the arrival theorem, which states that when one customer in an "M"-customer closed system arrives at a service facility he/she observes the rest of the system to be in the equilibrium state for a system with "M" - 1 customers.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **exact version** and **exacting report** interchangeable (i.e., having the same meaning)?

Pair 750

P1: One account indicates that Bemies staged basketball games at Geneva "in the early months of 1892." Another account suggests that a report on gymnasium football in the February 1892 edition of the college newspaper, the "Geneva Cabinet", may refer to the newly developed game of basketball. The newspaper account from February 1892 reported: "Football in the gym is a **popular mode** of exercise at present. Some severe knocks are received, but in the excitement, they are hardly noticed."

P2: One account indicates that Bemies staged basketball games at Geneva "in the early months of 1892." Another account suggests that a report on gymnasium football in the February 1892 edition of the college newspaper, the "Geneva Cabinet", may refer to the newly developed game of basketball. The newspaper account from February 1892 reported: "Football in the gym is a **favorite type** of exercise at present. Some severe knocks are received, but in the excitement, they are hardly noticed."

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **popular mode** and **favorite type** interchangeable (i.e., having the same meaning)?

Pair 751

P1: A signal on both channels would provide components on both axes and thus expand the plot into two dimensions: a mono signal would produce a straight line angled according to balance; whereas a stereo signal, being asymmetrical, would produce a jittery and fluffy-looking ball (see image). An audio technician would typically begin a session by adjusting the equipment (usually with a 1 kHz mono tone) so that the output produces a vertical plot line. If **one channel** were phase-inverted, it would result in the plot line being a horizontal instead of vertical, a sure sign of problems. As for mono

signals, a half-inverted signal would be reduced to (near) silence.

P2: A signal on both channels would provide components on both axes and thus expand the plot into two dimensions: a mono signal would produce a straight line angled according to balance; whereas a stereo signal, being asymmetrical, would produce a jittery and fluffy-looking ball (see image). An audio technician would typically begin a session by adjusting the equipment (usually with a 1 kHz mono tone) so that the output produces a vertical plot line. **If a path were phase-inverted, it would result in the plot line being a horizontal instead of vertical, a sure sign of problems.** As for mono signals, a half-inverted signal would be reduced to (near) silence.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one channel** and **a path** interchangeable (i.e., having the same meaning)?

Pair 752

P1: In 2002 it was renamed as the Center for Teaching and Scholarly Excellence to reflect a broader mission including researching and general faculty assistance. The primary purpose of the CTSE was to promote and encourage excellence in teaching, learning, research, publication, and other scholarly pursuits through a variety of academic activities. **Specifically, it provided a formal mechanism to support non-funded research and other scholarly activities in a general manner across the entire Hofstra campus.** The CTSE was a resource for the Hofstra community.

P2: In 2002 it was renamed as the Center for Teaching and Scholarly Excellence to reflect a broader mission including researching and general faculty assistance. The primary purpose of the CTSE was to promote and encourage excellence in teaching, learning, research, publication, and other scholarly pursuits through a variety of academic activities. **Specifically, it provided a formal mechanism to support non-funded research and other scholarly activities in a blanket approach across the entire Hofstra campus.** The CTSE was a resource for the Hofstra community.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **general manner** and **blanket approach** interchangeable (i.e., having the same meaning)?

Pair 753

P1: After basic training, the number of enlisted men came to 120 soldiers, including 20 instructors. From early on, the Bhutanese army operated security checkpoints in the southern region of the kingdom. **In 1947, as the British Empire left India, direct ties to the British ended, and Bhutan remained relatively isolated from international affairs, until 1949.** That year, India and Bhutan signed the Treaty of Peace and Friendship, providing that India would not interfere in Bhutan's internal affairs but that Bhutan would be guided by India in its foreign policy.

P2: After basic training, the number of enlisted men came to 120 soldiers, including 20 instructors. From early on, the Bhutanese army operated security checkpoints in the southern region of the kingdom. **In 1947, as the British Empire left India, immediate attachments to the British ended, and Bhutan remained relatively isolated from international affairs, until 1949.** That year, India and Bhutan signed the Treaty of Peace and Friendship, providing that India would not interfere in Bhutan's internal affairs but that Bhutan would be guided by India in its foreign policy.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **direct ties** and **immediate attachments** interchangeable (i.e., having the same meaning)?

Pair 754

P1: Tucson had a number of baseball teams between 1915 and 1958, including the Tucson Old Pueblos, the Tucson Waddies, the Tucson Cowboys (several teams), the Tucson Missions and the Tucson Lizards. None of these were part of the Pacific Coast League. **When the last iteration of the Cowboys folded in 1958, Tucson was left with no professional baseball until the advent of the Toros.** Pacific Coast League era begins.

P2: Tucson had a number of baseball teams between 1915 and 1958, including the Tucson Old Pueblos, the Tucson Waddies, the Tucson Cowboys (several teams), the Tucson Missions and the Tucson Lizards. None of these were part of the Pacific Coast League. When the **previous repetition** of the Cowboys folded in 1958, Tucson was left with no professional baseball until the advent of the Toros. Pacific Coast League era begins.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **last iteration** and **previous repetition** interchangeable (i.e., having the same meaning)?

Pair 755

P1: Many were purchased for keepsakes and were not used for rides. New versions of tokens were issued in 1980, 1986, and 1995. The **last iteration** of tokens, which started circulating in 1995, featured a pentagon-shaped hole in the middle and were called the "Five Borough Token". There were issues with the tokens, however.

P2: Many were purchased for keepsakes and were not used for rides. New versions of tokens were issued in 1980, 1986, and 1995. The **prior version** of tokens, which started circulating in 1995, featured a pentagon-shaped hole in the middle and were called the "Five Borough Token". There were issues with the tokens, however.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **last iteration** and **prior version** interchangeable (i.e., having the same meaning)?

Pair 756

P1: In July 2018, "Inside Higher Ed" reported that "faculty members have grown increasingly unsettled about Antioch College's future" after it required "a period of furloughs and pay cuts." Antioch has "lost a reported \$1.7 million for the year ending June 30, 2017, a year in which its expenses totaled \$17.6 million." Spring of 2020 saw furloughs for as many as 27 staff members, hour reductions for others, and pay cuts for faculty and other higher-earning personnel. On June 23, 2020, the college announced a spending cut of \$2.5 million for the fiscal year beginning July 1, 2020, down about 20% from the prior fiscal year's budget. Eight furloughed staff employees were laid off; and, faculty was reduced by six, through voluntary and negotiated departures and **one retirement**. Antioch also arranged the sale of the Glen Helen Nature Preserve to the Glen Helen Association, since the college could not afford to continue support of that facility.

Antioch also arranged the sale of the Glen Helen Nature Preserve to the Glen Helen Association, since the college could not afford to continue support of that facility.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one retirement** and **a separation** interchangeable (i.e., having the same meaning)?

Pair 757

P1: Built in 1929–30, the houses show the influence of 'Garden City' design ideas. Wellington City Council has designated Salisbury Garden Court a Heritage Area. During the Great Depression and War years, the earliest tenants made **full use** of the tennis court as a central activity area. In the 1950s, the Court briefly became a miniature 'Polish village', as at one point 13 of the 16 houses were occupied by Poles, many of whom had arrived in New Zealand in 1944 as child refugees.

P2: Built in 1929–30, the houses show the influence of 'Garden City' design ideas. Wellington City Council has designated Salisbury Garden Court a Heritage Area. During the Great Depression and War years, the earliest tenants made **sufficient operation** of the tennis court as a central activity area. In the 1950s, the Court briefly became a miniature

'Polish village', as at one point 13 of the 16 houses were occupied by Poles, many of whom had arrived in New Zealand in 1944 as child refugees.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **full use** and **sufficient operation** interchangeable (i.e., having the same meaning)?

Pair 758

P1: The systemic approach describes this by the term "Individual Core Process". Social Core Process (SCP). **Throughout the social core process, the humans in an organization work towards the goals of a system.** In the SCP, the individual core process and the task core process are linked such that synergy effects are yielded from collaboration.

P2: The systemic approach describes this by the term "Individual Core Process". Social Core Process (SCP). **Throughout the social core process, the humans in an associate endeavor towards the goals of a system.** In the SCP, the individual core process and the task core process are linked such that synergy effects are yielded from collaboration.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **organization work** and **associate endeavor** interchangeable (i.e., having the same meaning)?

Pair 759

P1: Consider a set in which a respondent evaluates four items: A, B, C and D. If the respondent says that A is best and D is worst, these two responses inform us on five of six possible implied paired comparisons: The only paired comparison that cannot be inferred is B vs. C. In a choice among five items, MaxDiff questioning informs on seven of ten implied paired comparisons. Overview. **In 1938 Richardson introduced a choice method in which subjects reported the most alike pair of a triad and the most different pair.** The component of this method involving the most different pair may be properly called "MaxDiff" in contrast to a "most-least" or "best-worst" method where both the most different pair and the direction of difference are obtained.

P2: Consider a set in which a respondent evaluates four items: A, B, C and D. If the respondent says that A is best and D is worst, these two responses inform us on five of six possible implied paired comparisons: The only paired comparison that cannot be inferred is B vs. C. In a choice among five items, MaxDiff questioning informs on seven of ten implied paired comparisons. Overview. **In 1938 Richardson introduced a selection procedure in which subjects reported the most alike pair of a triad and the most different pair.** The component of this method involving the most different pair may be properly called "MaxDiff" in contrast to a "most-least" or "best-worst" method where both the most different pair and the direction of difference are obtained.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **choice method** and **selection procedure** interchangeable (i.e., having the same meaning)?

Pair 760

P1: Out of 1.P-96 P-34 games, the most common third moves for Black include: First 3-move probabilities. Below are the joint probabilities of these common 3 move sequences along with their log probability. **The following table collapses different sequences that result in the same board position.** The adjacent diagrams show the eight most common positions found in the game records.

P2: Out of 1.P-96 P-34 games, the most common third moves for Black include: First 3-move probabilities. Below are the joint probabilities of these common 3 move sequences along with their log probability. **The following table collapses different sequences that result in the same panel arrangement.** The adjacent diagrams show the eight most common positions found in the game records.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **board position** and **panel arrangement** interchangeable (i.e., having the same meaning)?

Pair 761

P1: Parks. Church was instrumental in the acquisition and development of the Monterey County Parks system. When running for the **board position** in 1964 his "main plank was a county park system." Prior to 1966, Monterey County did not have a parks department, and was one of the last counties in California to have one.

P2: Parks. Church was instrumental in the acquisition and development of the Monterey County Parks system. When running for the **advisory post** in 1964 his "main plank was a county park system." Prior to 1966, Monterey County did not have a parks department, and was one of the last counties in California to have one.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **board position** and **advisory post** interchangeable (i.e., having the same meaning)?

Pair 762

P1: In a study conducted by John Anderson and Dale Level, the following were cited to be benefits of effective downward communication: In order for downward communication to be effective, the superior should remain respectful and concise when giving orders, they should make sure the subordinate clearly understands instructions, and they should give recognition for admirable performance. Upward Communication. Upward communication is the process of transmitting information from the **bottom levels** of an organization to the top levels. It includes judgments, estimations, propositions, complaints, grievance, appeals, reports, etc.

P2: In a study conducted by John Anderson and Dale Level, the following were cited to be benefits of effective downward communication: In order for downward communication to be effective, the superior should remain respectful and concise when giving orders, they should make sure the subordinate clearly understands instructions, and they should give recognition for admirable performance. Upward Communication. Upward communication is the process of transmitting information from the **base layer** of an organization to the top levels. It includes judgments, estimations, propositions, complaints, grievance, appeals, reports, etc.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **bottom levels** and **base layer** interchangeable (i.e., having the same meaning)?

Pair 763

P1: This is accordingly done to safeguard detention staff from receiving injuries from a resisting person often struggling with his or her entire body, especially their legs and feet. On the other side, bare feet are a common target for the application of force in situations of confrontation as they are overall highly pain-sensitive and usually within easy reach of the opponent. Moreover, the particular vulnerability of unprotected toes makes them an opportune target to exercise **physical control** over the barefooted person. These advantages are usually desired by correctional or police officers in situations with resisting arrestees or prisoners.

P2: This is accordingly done to safeguard detention staff from receiving injuries from a resisting person often struggling with his or her entire body, especially their legs and feet. On the other side, bare feet are a common target for the application of force in situations of confrontation as they are overall highly pain-sensitive and usually within easy reach of the opponent. Moreover, the particular vulnerability of unprotected toes makes them an opportune target to exercise **bodily power** over the barefooted person. These advantages are usually desired by correctional or police officers in situations with resisting arrestees or prisoners.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **physical control** and **bodily power** interchangeable (i.e., having the same meaning)?

Pair 764

P1: People's communes were subdivided into production brigades and production teams. Each team elected a people's public security committee, which sent a representative to the committee at the brigade level. **physical control was mostly the responsibility of the militia units organized at the team, brigade, and commune levels.** In the winter of 1982-83 communes were replaced by township governments, and grass-roots committees were patterned after urban committees.

P2: People's communes were subdivided into production brigades and production teams. Each team elected a people's public security committee, which sent a representative to the committee at the brigade level. **environmental command was mostly the responsibility of the militia units organized at the team, brigade, and commune levels.** In the winter of 1982-83 communes were replaced by township governments, and grass-roots committees were patterned after urban committees.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **physical control** and **environmental command** interchangeable (i.e., having the same meaning)?

Pair 765

P1: District 12. Democrat Jimmie L. Wilson narrowly won by 5 percentage points ahead of Republican David Tollett, but Wilson was unanimously ruled ineligible to serve as a State Representative by the Arkansas Supreme Court on October 26, 2020. **Wilson was convicted of a misdemeanor 30 years earlier for "illegal use of federal farm loans and selling mortgaged crops."** Despite being pardoned by President Bill Clinton in 2001, the court found a 2016 amendment to the Arkansas Constitution barring those who have been convicted of "deceit, fraud or false statement" from serving in public office barred Wilson from serving.

P2: District 12. Democrat Jimmie L. Wilson narrowly won by 5 percentage points ahead of Republican David Tollett, but Wilson was unanimously ruled ineligible to serve as a State Representative by the Arkansas Supreme Court on October 26, 2020. **Wilson was convicted of a misdemeanor 30 years earlier for "unlawful usage of federal farm loans and selling mortgaged crops."** Despite being pardoned by President Bill Clinton in 2001, the court found a 2016 amendment to the Arkansas Constitution barring those who have been convicted of "deceit, fraud or false statement" from serving in public office barred Wilson from serving.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **illegal use** and **unlawful usage** interchangeable (i.e., having the same meaning)?

Pair 766

P1: Multiple Pin Strike: As opposed to the standard 10-pin bowling setup, this trick is set up with more than 10 pins (usually between 30 and 120 pins) in the same triangular formation as the standard 10-pin setup and played on an open area instead of a bowling lane. The bowler usually releases the ball with a great strength and/or a very precision technique to ensure that the ball has enough strength to start a chain reaction that will knock down all pins. **This trick is often implemented in bowling video games, with "Wii Sports" being the most famous example.** Spinning Ball Spare Conversion: The bowler spins one ball slowly down the lane, and sends a second ball down the lane normally.

P2: Multiple Pin Strike: As opposed to the standard 10-pin bowling setup, this trick is set up with more than 10 pins (usually between 30 and 120 pins) in the same triangular formation as the standard 10-pin setup and played on an open area instead of a bowling lane. The bowler usually releases the ball with a great strength and/or a very precision technique to ensure that the ball has enough strength to start a chain reaction that will knock down all pins. **This trick is often implemented in bowling video games, with "Wii Sports" being the most popular model.** Spinning Ball Spare Conversion: The bowler spins one ball slowly down the lane, and sends a second ball down the lane normally.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **famous example** and **popular model** interchangeable (i.e., having the same meaning)?

Pair 767

P1: However, this situation only existed for a short period until more powerful aircraft engines emerged in the mid-1930s and once again a single-engine fighter could catch a twin-engine bomber. The other idea was the escort fighter that would attempt to break up attacks by the defense before they could reach the bombers. **To have the **desired range**, the aircraft had to carry a large fuel load, and at the time this demanded a twin-engine aircraft.** Such a design would not be able to maneuver with the single-engine day fighters, so attention was given to outright performance.

P2: However, this situation only existed for a short period until more powerful aircraft engines emerged in the mid-1930s and once again a single-engine fighter could catch a twin-engine bomber. The other idea was the escort fighter that would attempt to break up attacks by the defense before they could reach the bombers. **To have the **necessary magnitude**, the aircraft had to carry a large fuel load, and at the time this demanded a twin-engine aircraft.** Such a design would not be able to maneuver with the single-engine day fighters, so attention was given to outright performance.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **desired range** and **necessary magnitude** interchangeable (i.e., having the same meaning)?

Pair 768

P1: Sheriff Deputy Rick Grimes (Andrew Lincoln) is able to escape the tank and the swarm of walkers with help from Glenn Rhee (Steven Yeun), leading them to safety of a department store. Rick meets the other members of Glenn's scavenging group, including Merle Dixon (Michael Rooker), a virulent racist, and T-Dog (IronE Singleton), a black man dismayed by Merle's attitude. **When Merle attempts to beat up T-Dog and assert control, Rick subdues him and handcuffs him to a pipe on the **store's roof**.** Glenn makes contact with the survivors' camp outside the city, where, unknown to Rick, his friend Shane Walsh, and his wife Lori (Sarah Wayne Callies) and son Carl (Chandler Riggs), are safe.

P2: Sheriff Deputy Rick Grimes (Andrew Lincoln) is able to escape the tank and the swarm of walkers with help from Glenn Rhee (Steven Yeun), leading them to safety of a department store. Rick meets the other members of Glenn's scavenging group, including Merle Dixon (Michael Rooker), a virulent racist, and T-Dog (IronE Singleton), a black man dismayed by Merle's attitude. **When Merle attempts to beat up T-Dog and assert control, Rick subdues him and handcuffs him to a pipe on the **shop's upper covering**.** Glenn makes contact with the survivors' camp outside the city, where, unknown to Rick, his friend Shane Walsh, and his wife Lori (Sarah Wayne Callies) and son Carl (Chandler Riggs), are safe.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **store's roof** and **shop's upper covering** interchangeable (i.e., having the same meaning)?

Pair 769

P1: Throughout Catalonia many sectors of the economy fell under the control of the anarchist CNT and the socialist UGT trade unions, where workers' self-management was implemented. These included railways, streetcars, buses, taxicabs, shipping, electric light and power companies, gasworks and waterworks, engineering and automobile assembly plants, mines, mills, factories, food-processing plants, theaters, newspapers, bars, hotels, restaurants, department stores, and thousands of dwellings previously owned by the upper classes. **While the CNT was the **leading organization** in Catalonia, it often shared power with the UGT.** For example, control of the Spanish National telephone company, was put under a joint CNT-UGT committee.

P2: Throughout Catalonia many sectors of the economy fell under the control of the anarchist CNT and the socialist UGT trade unions, where workers' self-management was implemented. These included railways, streetcars, buses, taxicabs, shipping, electric light and power companies, gasworks and waterworks, engineering and automobile assembly plants, mines, mills, factories, food-processing plants, theaters, newspapers, bars, hotels, restaurants, department stores, and thousands of dwellings previously owned by the upper classes. **While the CNT was the **main assembly** in Catalonia,**

it often shared power with the UGT. For example, control of the Spanish National telephone company, was put under a joint CNT-UGT committee.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **leading organization** and **main assembly** interchangeable (i.e., having the same meaning)?

Pair 770

P1: The brokers who provide this service claim that they do not reveal the entire account number to the recipient, or do not themselves have access to the account number. It is possible a recipient might learn the account number in some other way, for example if it appears on his own credit report. However, this is often insufficient information to make use of the account - a PIN, expiration date, or **security code** is typically also required. These measures further lower the risk to the "donor".

P2: The brokers who provide this service claim that they do not reveal the entire account number to the recipient, or do not themselves have access to the account number. It is possible a recipient might learn the account number in some other way, for example if it appears on his own credit report. However, this is often insufficient information to make use of the account - a PIN, expiration date, or **protection cipher** is typically also required. These measures further lower the risk to the "donor".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **security code** and **protection cipher** interchangeable (i.e., having the same meaning)?

Pair 771

P1: For small values of "n" these conditions have more classical interpretations: It is known that for every "n" ≥ 1 there are groups of type "F"ⁿ which are not of type "F"ⁿ⁺¹. Finite groups are of type "F" ^{∞} but not of type "F". **thompson's group** formula_4 is an example of a torsion-free group which is of type "F" but not of type "F". A reformulation of the "F"ⁿ property is that a group has it if and only if it acts properly discontinuously, freely and cocompactly on a CW-complex whose homotopy groups formula_5 vanish.

P2: For small values of "n" these conditions have more classical interpretations: It is known that for every "n" ≥ 1 there are groups of type "F"ⁿ which are not of type "F"ⁿ⁺¹. Finite groups are of type "F" ^{∞} but not of type "F". **thompson's association** formula_4 is an example of a torsion-free group which is of type "F" but not of type "F". A reformulation of the "F"ⁿ property is that a group has it if and only if it acts properly discontinuously, freely and cocompactly on a CW-complex whose homotopy groups formula_5 vanish.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **thompson's group** and **thompson's association** interchangeable (i.e., having the same meaning)?

Pair 772

P1: General admission is ¥150. The park is open daily until 5 PM. It is a **quick walk** from Kami-Nakazato Station on the JR Keihin-Tōhoku Line or Nishigahara Station on the Tokyo Metro Nanboku Line. Popular Culture.

P2: General admission is ¥150. The park is open daily until 5 PM. It is a **speedy stretch** from Kami-Nakazato Station on the JR Keihin-Tōhoku Line or Nishigahara Station on the Tokyo Metro Nanboku Line. Popular Culture.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **quick walk** and **speedy stretch** interchangeable (i.e., having the same meaning)?

Pair 773

P1: The type has divided legs, similar to diverted skirts and pantskirts. The is everyday attire for Shinto priests who perform services at shrines. **Until the 1940s the used to be a required part of common men's wear.** Today Japanese men usually wear the only on formal occasions like tea ceremonies, weddings, and funerals.

P2: The type has divided legs, similar to diverted skirts and pantskirts. The is everyday attire for Shinto priests who perform services at shrines. **Until the 1940s the used to be a compulsory piece of common men's wear.** Today Japanese men usually wear the only on formal occasions like tea ceremonies, weddings, and funerals.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **required part** and **compulsory piece** interchangeable (i.e., having the same meaning)?

Pair 774

P1: White half-moves are shown above black half-moves. Ellipses (...) represent moves that, for the variation, are identical to the variation above. **bold type** indicates that another variation is considered elsewhere usually in another table. A hyphen (-) or en dash (–) indicates that the variation transposes to a variation elsewhere.

P2: White half-moves are shown above black half-moves. Ellipses (...) represent moves that, for the variation, are identical to the variation above. **highlighted lettering** indicates that another variation is considered elsewhere usually in another table. A hyphen (-) or en dash (–) indicates that the variation transposes to a variation elsewhere.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **bold type** and **highlighted lettering** interchangeable (i.e., having the same meaning)?

Pair 775

P1: The viewing stands are able to accommodate up to 5000 people. SAFTI MI was originally intended to be an "open camp" like the United States Military Academy and the United States Naval Academy. **Prior to the September 11 terrorist attacks, civilians did not need passes or security checks** before entering the complex. The only restricted areas were the offices and living quarters.

P2: The viewing stands are able to accommodate up to 5000 people. SAFTI MI was originally intended to be an "open camp" like the United States Military Academy and the United States Naval Academy. **Prior to the September 11 terrorist attacks, civilians did not need passes or safety inspections** before entering the complex. The only restricted areas were the offices and living quarters.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **security checks** and **safety inspections** interchangeable (i.e., having the same meaning)?

Pair 776

P1: He had a brother Thomas Harvey of London, whose daughter Audrey Harvey married William Jefferay. According to the "Dictionary of National Biography" William Harvey became a junior officer of the college of arms and was appointed the Bluemantle Pursuivant in ordinary on 18 June 1536. **Under this title he accompanied William Paget on an embassy visit to France.** After this he was awarded the Somerset Herald coat of arms.

P2: He had a brother Thomas Harvey of London, whose daughter Audrey Harvey married William Jefferay. According to the "Dictionary of National Biography" William Harvey became a junior officer of the college of arms and was appointed the Bluemantle Pursuivant in ordinary on 18 June 1536. **Under this title he accompanied William Paget on an**

appointment in the consulate to France. After this he was awarded the Somerset Herald coat of arms.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **embassy visit** and **appointment in the consulate** interchangeable (i.e., having the same meaning)?

Pair 777

P1: In 2018, a new tourism brand and a slogan "take another look" were introduced. Visas. **Tourist visas can be obtained from an Azerbaijani embassy or electronically online without an embassy visit.** In 2016, a tax-free shopping system was introduced to attract foreign shoppers.

P2: In 2018, a new tourism brand and a slogan "take another look" were introduced. Visas. **Tourist visas can be obtained from an Azerbaijani embassy or electronically online without an interview at the consular office.** In 2016, a tax-free shopping system was introduced to attract foreign shoppers.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **embassy visit** and **interview at the consular office** interchangeable (i.e., having the same meaning)?

Pair 778

P1: Lord Raglan developed his concept of the "Mythic Hero" as an archetype, based on a ritualistic interpretation of myth, in his 1936 book, "The Hero, A Study in Tradition, Myth and Drama". It is a set of 22 common traits that he said were shared by many heroes in various cultures, myths and religions throughout history and around the world. **Raglan argued that the higher the score, the more likely the figure's biography is mythical.** Raglan did not categorically deny the historicity of the Heroes he looked at, rather it was their common biographies he considered as nonhistorical.

P2: Lord Raglan developed his concept of the "Mythic Hero" as an archetype, based on a ritualistic interpretation of myth, in his 1936 book, "The Hero, A Study in Tradition, Myth and Drama". It is a set of 22 common traits that he said were shared by many heroes in various cultures, myths and religions throughout history and around the world. **Raglan argued that the greater the musical arrangement, the more likely the figure's biography is mythical.** Raglan did not categorically deny the historicity of the Heroes he looked at, rather it was their common biographies he considered as nonhistorical.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **higher the score** and **greater the musical arrangement** interchangeable (i.e., having the same meaning)?

Pair 779

P1: "Fly High" was eventually mastered and co-produced by Japanese musician Naoto Suzuki and Nagao. The album version is used as a lead-on for the titular opening song of "Lovepeppers". **Lyrically, "Fly High" was written in third person perspective, a trait that is shared with the rest of the album's tracks.** It was released by Avex Trax in Japan on February 9, 2000, marking her first single in the 2000s decade, and through Avex Entertainment Inc. worldwide in September 2008.

P2: "Fly High" was eventually mastered and co-produced by Japanese musician Naoto Suzuki and Nagao. The album version is used as a lead-on for the titular opening song of "Lovepeppers". **Lyrically, "Fly High" was written in outsider point of view, a trait that is shared with the rest of the album's tracks.** It was released by Avex Trax in Japan on February 9, 2000, marking her first single in the 2000s decade, and through Avex Entertainment Inc. worldwide in September 2008.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **third person perspective** and **outsider point of view** interchangeable (i.e., having the same meaning)?

Pair 780

P1: Culture and Ganges: The River Ganges (also referred to as Ganga) is a symbol of faith, hope, culture and sanity, as well as a source of livelihood for millions since time immemorial. She is the centre of social and religious tradition in the Indian sub-continent and particularly sacred in Hinduism. **The very special faith and respect for the River Ganges in India are as old as Indian culture itself.** These are amply reflected in such ancient Indian scriptures as: "Vedas, Puranas, Mahabharata, Ramayana" and several others.

P2: Culture and Ganges: The River Ganges (also referred to as Ganga) is a symbol of faith, hope, culture and sanity, as well as a source of livelihood for millions since time immemorial. She is the centre of social and religious tradition in the Indian sub-continent and particularly sacred in Hinduism. **The very distinguished conviction and respect for the River Ganges in India are as old as Indian culture itself.** These are amply reflected in such ancient Indian scriptures as: "Vedas, Puranas, Mahabharata, Ramayana" and several others.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **special faith** and **distinguished conviction** interchangeable (i.e., having the same meaning)?

Pair 781

P1: This ideology is something that social design is built on. In this view social design is an activity that should not be framed with connotations of charity, aid donations, help, etc. **It is not voluntary work, but it should be seen as professional contribution that plays a part in local economic development or livelihood.** At the same time Social Design also challenges the conventional market model of designing.

P2: This ideology is something that social design is built on. In this view social design is an activity that should not be framed with connotations of charity, aid donations, help, etc. **It is not voluntary work, but it should be seen as expert input that plays a part in local economic development or livelihood.** At the same time Social Design also challenges the conventional market model of designing.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **professional contribution** and **expert input** interchangeable (i.e., having the same meaning)?

Pair 782

P1: Australia. In Australia, most states and territories outlaw fireworks for consumers. **Tasmania, ACT and Northern Territory allow use with a permit (dependent on calendar date and circumstances).** However, on July 1 for Territory Day, one can freely use fireworks without a permit in the Northern Territory.

P2: Australia. In Australia, most states and territories outlaw fireworks for consumers. **Tasmania, ACT and Northern Territory allow use with a permit (dependent on calendar period and circumstances).** However, on July 1 for Territory Day, one can freely use fireworks without a permit in the Northern Territory.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **calendar date** and **calendar period** interchangeable (i.e., having the same meaning)?

Pair 783

P1: Stemming algorithms are used to improve the accuracy in information retrieval and in domain analysis. These algorithms help find variants of the terms being looked up. Stemming algorithms are helpful because it is likely that users who look up a particular word might be interested in related words. Stemming algorithms are prevalent in search engines, such as Google's, which did not implement word stemming until 2003.

P2: Stemming algorithms are used to improve the accuracy in information retrieval and in domain analysis. These algorithms help find variants of the terms being looked up. Stemming algorithms are helpful because it is likely that users who look up a distinct phrase might be interested in related words. Stemming algorithms are prevalent in search engines, such as Google's, which did not implement word stemming until 2003.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are particular word and distinct phrase interchangeable (i.e., having the same meaning)?

Pair 784

P1: Number of days with at least two birthdays. The above can be generalized from the distribution of the number of people with their birthday on any particular day, which is a Binomial distribution with probability $1/d$. Multiplying the relevant probability by d will then give the expected number of days. For example, the expected number of days which are shared; i.e.

P2: Number of days with at least two birthdays. The above can be generalized from the distribution of the number of people with their birthday on any particular day, which is a Binomial distribution with probability $1/d$. Multiplying the relevant probability by d will then give the predicted figure of days. For example, the expected number of days which are shared; i.e.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are expected number and predicted figure interchangeable (i.e., having the same meaning)?

Pair 785

P1: With all the information united, build a new improved plan of activities. This principle is based in the study of time-cost and time of delivery. The second principle consists in making a new method and give it as a written rule to be a standard for working. If the method is written down and given to the workers they can learn it and apply it in their work area.

P2: With all the information united, build a new improved plan of activities. This principle is based in the study of time-cost and time of delivery. The second principle consists in making a new method and give it as a recorded regulation to be a standard for working. If the method is written down and given to the workers they can learn it and apply it in their work area.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are written rule and recorded regulation interchangeable (i.e., having the same meaning)?

Pair 786

P1: Some of the texts are in the original language, while others are in English. These quotes are the 'good' ones, that express a humane approach to issues such as reconciliation, forgiveness, women's rights, care for the weak, equality, wisdom, beauty, compassion, faith, hope, charity, etc. On the inside of the circle is engraved the corresponding negation of a humane attitude which is found in the same book. There are quotes concerning persecution and intolerance with regard to religion, gender and race, i.e.

P2: Some of the texts are in the original language, while others are in English. These quotes are the 'good' ones, that express a humane approach to issues such as reconciliation, forgiveness, women's rights, care for the weak, equality, wis-

dom, beauty, compassion, faith, hope, charity, etc. On the inside of the circle is engraved the corresponding negation of a sympathetic perspective which is found in the same book. There are quotes concerning persecution and intolerance with regard to religion, gender and race, i.e.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are humane attitude and sympathetic perspective interchangeable (i.e., having the same meaning)?

Pair 787

P1: The Mirador Basin Project carried out the first systematic excavations at the site in 2004. The site has been heavily looted, with 2154 looters' trenches cut into the mapped structures, averaging 2.54 trenches per structure. The looters unearthed thousands of burials and have left human remains, ceramics and other artifacts judged of lesser value scattered throughout the site. A great deal of damage was done by looters mistakenly looking for Classic Period burials in Preclassic structures, resulting in extensive digging when such burials were not found.

P2: The Mirador Basin Project carried out the first systematic excavations at the site in 2004. The site has been heavily looted, with 2154 looters' trenches cut into the mapped structures, averaging 2.54 trenches per structure. The looters unearthed thousands of burials and have left human remains, ceramics and other artifacts judged of inferior worth scattered throughout the site. A great deal of damage was done by looters mistakenly looking for Classic Period burials in Preclassic structures, resulting in extensive digging when such burials were not found.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are lesser value and inferior worth interchangeable (i.e., having the same meaning)?

Pair 788

P1: Therefore, it would seem to be in each player's best interest to bid the maximum possible amount rather than an amount equal to or less than the value of the resource. There is a catch, however; if both players bid higher than "V", the high bidder does not so much win as lose less. The player who bid the lesser value "b" loses "b" and the one who bid more loses "b" - "V" (where, in this scenario, $b > V$). This situation is commonly referred to as a Pyrrhic victory.

P2: Therefore, it would seem to be in each player's best interest to bid the maximum possible amount rather than an amount equal to or less than the value of the resource. There is a catch, however; if both players bid higher than "V", the high bidder does not so much win as lose less. The player who bid the secondary rate "b" loses "b" and the one who bid more loses "b" - "V" (where, in this scenario, $b > V$). This situation is commonly referred to as a Pyrrhic victory.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are lesser value and secondary rate interchangeable (i.e., having the same meaning)?

Pair 789

P1: Chai, however, citing his battlefield accomplishments, refused to accept the punishment. However, Xu Zhigao then tried to restore discipline by intentionally "accidentally" intruding into the palace, and then immediately withdrawing and submitting a petition asking to be punished for this intrusion. Yang issued an edict declining any punishment, but Xu Zhigao insisted on being punished by being stripped of one month's salary. It was said that this move restored discipline among the Wu officials.

P2: Chai, however, citing his battlefield accomplishments, refused to accept the punishment. However, Xu Zhigao then tried to restore discipline by intentionally "accidentally" intruding into the palace, and then immediately withdrawing and submitting a petition asking to be punished for this intrusion. Yang issued an edict declining any punishment, but Xu Zhigao insisted on being punished by being stripped of four weeks' pay. It was said that this move restored discipline among the Wu officials.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one month's salary** and **four weeks' pay** interchangeable (i.e., having the same meaning)?

Pair 790

P1: What follows is the exchanging of the MERC in the customer account for monetary assets this includes the following steps: Target pollutants of mobile emission reduction credits. At present, the pollutant may be selected from a group consisting of nitrogen oxides (NO_x), carbon monoxides (CO), carbon dioxides (CO₂), hydrocarbons (HC), sulfur oxides (SO_x), particulate matter (PM) and volatile organic compounds (VOCs). **The emissions reduction technology may be selected from a group consisting of alternative fuels, vehicle repairs, vehicle replacements, vehicle retrofits and hybrid engines.** The mobile source may be selected from a group consisting of passenger cars, light trucks, large trucks, buses, motorcycles, off-road recreational vehicles, farm equipment, construction equipment, lawn and garden equipment, marine engines, aircraft, locomotives and water vessels.

P2: What follows is the exchanging of the MERC in the customer account for monetary assets this includes the following steps: Target pollutants of mobile emission reduction credits. At present, the pollutant may be selected from a group consisting of nitrogen oxides (NO_x), carbon monoxides (CO), carbon dioxides (CO₂), hydrocarbons (HC), sulfur oxides (SO_x), particulate matter (PM) and volatile organic compounds (VOCs). **The emissions reduction technology may be selected from a group consisting of alternative fuels, automobile upkeep, vehicle replacements, vehicle retrofits and hybrid engines.** The mobile source may be selected from a group consisting of passenger cars, light trucks, large trucks, buses, motorcycles, off-road recreational vehicles, farm equipment, construction equipment, lawn and garden equipment, marine engines, aircraft, locomotives and water vessels.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **vehicle repairs** and **automobile upkeep** interchangeable (i.e., having the same meaning)?

Pair 791

P1: Formal definition. Deterministic algorithms can be defined in terms of a state machine: a "state" describes what a machine is doing at a particular instant in time. **State machines pass in a discrete manner from one state to another.** Just after we enter the input, the machine is in its "initial state" or "start state".

P2: Formal definition. Deterministic algorithms can be defined in terms of a state machine: a "state" describes what a machine is doing at a particular instant in time. **State machines pass in a discrete manner from a part of the country to another.** Just after we enter the input, the machine is in its "initial state" or "start state".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one state** and **a part of the country** interchangeable (i.e., having the same meaning)?

Pair 792

P1: This gives South Korea's shipbuilding an advantage as it can bypass export restrictions imposed from another country. Indonesia purchased six Jang Bogo-class submarines from DSME; the first batch of three on December 20, 2011, for \$1.1 billion and a second batch of three on April 12, 2019, for ₩1.16 trillion (\$1.02 billion). **These purchases made South Korea the fifth largest submarine exporter in the world at the time of the second deal.** Similarly, DSME delivered the Bhumibol Adulyadej-class frigate, a modern variant of the Gwanggaeto the Great-class destroyer, to Thailand in December 2018.

P2: This gives South Korea's shipbuilding an advantage as it can bypass export restrictions imposed from another country. Indonesia purchased six Jang Bogo-class submarines from DSME; the first batch of three on December 20, 2011, for \$1.1 billion and a second batch of three on April 12, 2019, for ₩1.16 trillion (\$1.02 billion). **These purchases made South Korea the fifth largest submarine exporter in the world at the time of the duplicate agreement.** Similarly, DSME delivered the Bhumibol Adulyadej-class frigate, a modern variant of the Gwanggaeto the Great-class destroyer,

to Thailand in December 2018.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **second deal** and **duplicate agreement** interchangeable (i.e., having the same meaning)?

Pair 793

P1: Tony's excess transcends parody and becomes dangerous because he represents a complete lack of restraint which ultimately leads to his downfall. Tony's excess is manifested in the gang wars in the city. He is given **express instruction to leave O'Hara, Gaffney, and the rest of the North Side gang alone**. He disobeys because of his lust for more power, violence, and territory.

P2: Tony's excess transcends parody and becomes dangerous because he represents a complete lack of restraint which ultimately leads to his downfall. Tony's excess is manifested in the gang wars in the city. He is given **explicit mandate to leave O'Hara, Gaffney, and the rest of the North Side gang alone**. He disobeys because of his lust for more power, violence, and territory.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **express instruction** and **explicit mandate** interchangeable (i.e., having the same meaning)?

Pair 794

P1: Gallagher burst into the international spotlight with his runner-up finish in the 2005 Amateur Championship at Royal Birkdale. After his semi-final victory over heavily favored Lloyd Saltman the relatively unknown golfer was suddenly one match away from claiming one of the top two amateur titles in the world and earning coveted invitations to the Masters Tournament and The Open Championship. **Irishman Brian McElhinney, however, got ahead early in their final match and Gallagher could never mount a serious charge in the blustery conditions**. Gallagher's impressive run through one of the strongest fields in amateur golf put him on the international map and he was ranked 14th in the world among amateur golfers.

P2: Gallagher burst into the international spotlight with his runner-up finish in the 2005 Amateur Championship at Royal Birkdale. After his semi-final victory over heavily favored Lloyd Saltman the relatively unknown golfer was suddenly one match away from claiming one of the top two amateur titles in the world and earning coveted invitations to the Masters Tournament and The Open Championship. **Irishman Brian McElhinney, however, got ahead early in their final match and Gallagher could never mount a major attack in the blustery conditions**. Gallagher's impressive run through one of the strongest fields in amateur golf put him on the international map and he was ranked 14th in the world among amateur golfers.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **serious charge** and **major attack** interchangeable (i.e., having the same meaning)?

Pair 795

P1: When you feel ready to move on, change it to 30 min. If you are up for a challenge, add another day of exercise. **As long as you go at your own pace and make changes based on your comfort level, this will ensure safety**. Overtraining.

P2: When you feel ready to move on, change it to 30 min. If you are up for a challenge, add another day of exercise. **As long as you go at your own pace and make changes based on your degree of contentment, this will ensure safety**. Overtraining.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **comfort level** and **degree of contentment** interchangeable (i.e., having the same meaning)?

Pair 796

P1: By the war's end, Israel controlled 78% of Mandatory Palestine, and much of the local Arab populace had either been expelled or fled. According to the IDF, Palestinians constitute the majority of the population in the area Israel now controls (Israel, the Gaza Strip, and the West Bank). **Both Clinton's and the subsequent Trump plan confine most of that majority to an area less than a quarter of the land.** The West Bank and Gaza, occupied since 1948 by Jordan and Egypt, respectively, were captured by Israel during the 1967 Six-Day War.

P2: By the war's end, Israel controlled 78% of Mandatory Palestine, and much of the local Arab populace had either been expelled or fled. According to the IDF, Palestinians constitute the majority of the population in the area Israel now controls (Israel, the Gaza Strip, and the West Bank). **Both Clinton's and the subsequent Trump plan confine most of that majority to an area limited to 25% of the land.** The West Bank and Gaza, occupied since 1948 by Jordan and Egypt, respectively, were captured by Israel during the 1967 Six-Day War.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **less than a quarter** and **limited to 25%** interchangeable (i.e., having the same meaning)?

Pair 797

P1: Canadian institutions may apply to the PSB for accreditation for a period of five years, following a successful initial accreditation. Programs are evaluated annually to ensure compliance with accreditation standards. **For new programs, or after the five year period has elapsed, an intensive review takes place that ensure programs meet criteria for accreditation.** To be eligible for accreditation institutions must meet the following criteria: Graduation from a PSB accredited program allows a graduate to apply for certification as a planner, and for candidate membership in their Provincial or Territorial Association.

P2: Canadian institutions may apply to the PSB for accreditation for a period of five years, following a successful initial accreditation. Programs are evaluated annually to ensure compliance with accreditation standards. **For new programs, or after the sixty-month time frame has elapsed, an intensive review takes place that ensure programs meet criteria for accreditation.** To be eligible for accreditation institutions must meet the following criteria: Graduation from a PSB accredited program allows a graduate to apply for certification as a planner, and for candidate membership in their Provincial or Territorial Association.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **five year period** and **sixty-month time frame** interchangeable (i.e., having the same meaning)?

Pair 798

P1: A distance of zero indicates that it is likely a very similar picture or a variation of the same picture. A distance of 5 means a few things may be different, but they are probably still close enough to be similar. **A distance of 10 or more is a probable indication that the images are different.** Usage.

P2: A distance of zero indicates that it is likely a very similar picture or a variation of the same picture. A distance of 5 means a few things may be different, but they are probably still close enough to be similar. **A distance of 10 or more is a presumed signal that the images are different.** Usage.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **probable indication** and **presumed signal** interchangeable (i.e., having the same meaning)?

Pair 799

P1: The main entrance is at the building's south, directly approached by the south drive. The entrance is recessed, with a portico of Ionic columns over the entranceway. The house has been described as "low and spreading, notwithstanding its unusual height". It has between , making it one of the largest houses in the U.S.

P2: The main entrance is at the building's south, directly approached by the south drive. The entrance is recessed, with a portico of Ionic columns over the entranceway. The house has been described as "low and spreading, notwithstanding its odd altitude". It has between , making it one of the largest houses in the U.S.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **unusual height** and **odd altitude** interchangeable (i.e., having the same meaning)?

Pair 800

P1: This increased the amount of oxygen in the fuel mixture, and thereby improved high-altitude performance. GM-1 was used on a number of modifications of existing fighter designs in order to counter the increasing performance of Allied fighters at higher altitudes. A different system for low-altitude boost known as MW 50 was also used, although GM-1 and MW 50 were rarely used on the same engine. MW-50 was a "methanol"- "water" injection system, which injected a mixture of methanol and water into the cylinders to cool the mix.

P2: This increased the amount of oxygen in the fuel mixture, and thereby improved high-altitude performance. GM-1 was used on a number of modifications of existing fighter designs in order to counter the increasing performance of Allied fighters at higher altitudes. A contrasting structure for low-altitude boost known as MW 50 was also used, although GM-1 and MW 50 were rarely used on the same engine. MW-50 was a "methanol"- "water" injection system, which injected a mixture of methanol and water into the cylinders to cool the mix.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **different system** and **contrasting structure** interchangeable (i.e., having the same meaning)?

Pair 801

P1: The essential phenomenological aspect of the Museum of Prince Paul was the museum display itself. On the ground floor were exhibited prehistoric, ancient and medieval artifacts; the first floor was assigned for monuments of national culture and 19th-century Yugoslav art; on the second floor was the collection of contemporary European art, in which domestic artists occupied an important place. The New Palace housed the Museum of Prince Paul until 1948, when, under a different system of government, it was assigned a different role. Seat of Presidency of Serbia.

P2: The essential phenomenological aspect of the Museum of Prince Paul was the museum display itself. On the ground floor were exhibited prehistoric, ancient and medieval artifacts; the first floor was assigned for monuments of national culture and 19th-century Yugoslav art; on the second floor was the collection of contemporary European art, in which domestic artists occupied an important place. The New Palace housed the Museum of Prince Paul until 1948, when, under a separate scheme of government, it was assigned a different role. Seat of Presidency of Serbia.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **different system** and **separate scheme** interchangeable (i.e., having the same meaning)?

Pair 802

P1: This preference for the bleachers section changed when the UAAP games started to be held regularly at the Araneta Coliseum in the 2000s. Ateneo students watched the games from both the bleachers and upper box sections of the

coliseum, resulting in cheerleaders being thinly spread over a wider area. The Jesuits and faculty deserted totally the bleachers section and watched the games from the lower sections of the coliseum. This reference to the Ateneo gallery as the Blue Babble Battalion was lost over time.

P2: This preference for the bleachers section changed when the UAAP games started to be held regularly at the Araneta Coliseum in the 2000s. Ateneo students watched the games from both the bleachers and upper box sections of the coliseum, resulting in cheerleaders being thinly spread over a wider area. The Jesuits and faculty deserted totally the stands area and watched the games from the lower sections of the coliseum. This reference to the Ateneo gallery as the Blue Babble Battalion was lost over time.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are bleachers section and stands area interchangeable (i.e., having the same meaning)?

Pair 803

P1: She undertook the necessary work at evening classes in order to avoid disruption of her daytime responsibilities, passing the exam in 1968/69. Mature student. The way was now open for a belated return to university level education. Herta Leistner, by now aged 37, moved to Tübingen.

P2: She undertook the necessary work at evening classes in order to avoid disruption of her daytime responsibilities, passing the exam in 1968/69. Mature student. The way was now open for a delayed homecoming to university level education. Herta Leistner, by now aged 37, moved to Tübingen.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are belated return and delayed homecoming interchangeable (i.e., having the same meaning)?

Pair 804

P1: The field of a point dipole has a particularly simple form, and the order-1 term in the multipole expansion is precisely the point dipole field. Although there are no known magnetic monopoles in nature, there are magnetic dipoles in the form of the quantum-mechanical spin associated with particles such as electrons (although the accurate description of such effects falls outside of classical electromagnetism). A theoretical magnetic "point dipole" has a magnetic field of exactly the same form as the electric field of an electric point dipole. A very small current-carrying loop is approximately a magnetic point dipole; the magnetic dipole moment of such a loop is the product of the current flowing in the loop and the (vector) area of the loop.

P2: The field of a point dipole has a particularly simple form, and the order-1 term in the multipole expansion is precisely the point dipole field. Although there are no known magnetic monopoles in nature, there are magnetic dipoles in the form of the quantum-mechanical spin associated with particles such as electrons (although the accurate description of such effects falls outside of classical electromagnetism). A theoretical magnetic "point dipole" has a magnetic field of specifically a look-alike shape as the electric field of an electric point dipole. A very small current-carrying loop is approximately a magnetic point dipole; the magnetic dipole moment of such a loop is the product of the current flowing in the loop and the (vector) area of the loop.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are exactly the same form and specifically a look-alike shape interchangeable (i.e., having the same meaning)?

Pair 805

P1: Some reports claimed that such a large building, made of reinforced concrete, can't be supported by the settling ground below, so they predicted the building would collapse, so as the neighboring buildings. Others debunked the new, highly progressive construction techniques. Cases of residents from the surrounding building, who sold their apartments

in the fear of **possible collapse**, were recorded. Newssoaoers described the repeated design competition as "anything goes".

P2: Some reports claimed that such a large building, made of reinforced concrete, can't be supported by the settling ground below, so they predicted the building would collapse, so as the neighboring buildings. Others debunked the new, highly progressive construction techniques. **Cases of residents from the surrounding building, who sold their apartments in the fear of likely disintegration**, were recorded. Newssoaoers described the repeated design competition as "anything goes".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **possible collapse** and **likely disintegration** interchangeable (i.e., having the same meaning)?

Pair 806

P1: In addition, some vendors and insurance companies offer what is called "Total Loss Coverage." This is similar to ordinary GAP insurance but differs in that instead of paying off the negative equity on a vehicle that is a total loss, the policy provides a certain amount, usually up to \$5000, toward the purchase or lease of a new vehicle. **Thus, to some extent the distinction makes no difference, i.e., in either case the owner receives a certain sum of money.** However, in choosing which type of policy to purchase, the owner should consider whether, in case of a total loss, it is more advantageous for him or her to have the policy pay off the negative equity or provide a down payment on a new vehicle.

P2: In addition, some vendors and insurance companies offer what is called "Total Loss Coverage." This is similar to ordinary GAP insurance but differs in that instead of paying off the negative equity on a vehicle that is a total loss, the policy provides a certain amount, usually up to \$5000, toward the purchase or lease of a new vehicle. **Thus, to some extent the distinction makes no difference, i.e., in either case the owner receives a set quantity of money.** However, in choosing which type of policy to purchase, the owner should consider whether, in case of a total loss, it is more advantageous for him or her to have the policy pay off the negative equity or provide a down payment on a new vehicle.

Pair 830

P1: The empty row has a poor view; so he does not want to sit there. Instead, a person in the crowded row moves into the empty seat the first person left behind. **The empty seat moves one spot closer to the edge and the person waiting to sit down.** The next person follows, and the next, et cetera.

P2: The empty row has a poor view; so he does not want to sit there. Instead, a person in the crowded row moves into the empty seat the first person left behind. **The bare bench moves one spot closer to the edge and the person waiting to sit down.** The next person follows, and the next, et cetera.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **empty seat** and **bare bench** interchangeable (i.e., having the same meaning)?

Pair 831

P1: These gentlemen shared close familial and professional relationships and entrepreneurial drive to develop and implement new industries such as sugar production. Hamilton had acquired several close and influential West Indian connections who were heavily involved in the Caribbean sugar trade. **Hamilton sold the property and moved to Charleston, South Carolina in early 1819, leaving no documentation on the mill and its anticipated use.** Apparently, the sugar works were still operational when it was abandoned, as ashes were left uncleared from the furnace.

P2: These gentlemen shared close familial and professional relationships and entrepreneurial drive to develop and implement new industries such as sugar production. Hamilton had acquired several close and influential West Indian connections who were heavily involved in the Caribbean sugar trade. **Hamilton sold the property and moved to Charleston, South Carolina in early 1819, leaving no documentation on the mill and its expected application.** Apparently, the

sugar works were still operational when it was abandoned, as ashes were left uncleared from the furnace.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **anticipated use** and **expected application** interchangeable (i.e., having the same meaning)?

Pair 832

P1: The Athena Institute surveyed 227 commercial and residential buildings that were demolished in St. Paul, Minnesota, between 2000 and mid-2003. Thirty percent of the buildings were less than 50 years old, and 6% were less than 25 years old. The four top reasons for demolition were “area redevelopment (35%), “building’s physical condition (31%), “not suitable for **anticipated use** (22%), and “fire damage (7%). Lack of maintenance was cited as the specific problem for 54 of the 70 buildings where physical condition was given as the reason for demolition.

P2: The Athena Institute surveyed 227 commercial and residential buildings that were demolished in St. Paul, Minnesota, between 2000 and mid-2003. Thirty percent of the buildings were less than 50 years old, and 6% were less than 25 years old. The four top reasons for demolition were “area redevelopment (35%), “building’s physical condition (31%), “not suitable for **foreseen usage** (22%), and “fire damage (7%). Lack of maintenance was cited as the specific problem for 54 of the 70 buildings where physical condition was given as the reason for demolition.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **anticipated use** and **foreseen usage** interchangeable (i.e., having the same meaning)?

Pair 833

P1: Kirkintilloch. Having successfully established cruising at Ratho, the trustees looked to Kirkintilloch as the location for a second branch. Kirkintilloch sits on the Forth and Clyde Canal, and has a very **rich association** with the canal since its inception. After discussions with British Waterways, a substantial boathouse was built near the town centre, on the site of R. Hay and Sons Boatyard.

P2: Kirkintilloch. Having successfully established cruising at Ratho, the trustees looked to Kirkintilloch as the location for a second branch. Kirkintilloch sits on the Forth and Clyde Canal, and has a very **splendid relationship** with the canal since its inception. After discussions with British Waterways, a substantial boathouse was built near the town centre, on the site of R. Hay and Sons Boatyard.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **rich association** and **splendid relationship** interchangeable (i.e., having the same meaning)?

Pair 834

P1: More than half (53%) of Republicans owned guns, compared with 36% of political independents and 31% of Democrats. One criticism of the GSS survey and other proxy measures of gun ownership, is that they do not provide adequate macro-level detail to allow conclusions on the relationship between overall firearm ownership and gun violence. Gary Kleck compared **various survey** and proxy measures and found no correlation between overall firearm ownership and gun violence. In contrast, studies by David Hemenway and his colleagues, which used GSS data and the fraction of suicides committed with a gun as a proxy for gun ownership rates, found a strong positive association between gun ownership and homicide in the United States.

P2: More than half (53%) of Republicans owned guns, compared with 36% of political independents and 31% of Democrats. One criticism of the GSS survey and other proxy measures of gun ownership, is that they do not provide adequate macro-level detail to allow conclusions on the relationship between overall firearm ownership and gun violence. Gary Kleck compared **several inspection** and proxy measures and found no correlation between overall firearm ownership and gun violence. In contrast, studies by David Hemenway and his colleagues, which used GSS data and the fraction of suicides committed with a gun as a proxy for gun ownership rates, found a strong positive association between gun

ownership and homicide in the United States.

Please record your answer for the following question in the provided Google sheet

Pair 835

P1: The protagonists are about to get married after Eid, but Chand's father gets a heart attack, consequently, he demands to get her daughter married as soon as possible. Samia, Hassan's sister-in-law, is facing a tough time in the family because she belongs to a middle class. She wants Chand to enter the house so that the entire focus moves on her, since she belongs to a **lower income bracket**. Samia convinces the family to set another date, but Chand's family finds out that Hassan has been a failure in studies.

P2: The protagonists are about to get married after Eid, but Chand's father gets a heart attack, consequently, he demands to get her daughter married as soon as possible. Samia, Hassan's sister-in-law, is facing a tough time in the family because she belongs to a middle class. She wants Chand to enter the house so that the entire focus moves on her, since she belongs to a **reduced earnings classification**. Samia convinces the family to set another date, but Chand's family finds out that Hassan has been a failure in studies.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **lower income bracket** and **reduced earnings classification** interchangeable (i.e., having the same meaning)?

Pair 836

P1: Founding years 1913–1940. Heinrich Deichmann, born in 1888, opened a shoemaker's shop, called "Schuhreparatur Elektra", in 1913 at the age of 25 in what is now Johannes-Brokamp-Straße in Borbeck, which was incorporated into the city of Essen two years later. At first, his customers were mainly miners from the then up-and-coming Ruhr area who needed inexpensive shoe repairs, being part of the **lower income bracket**. After World War I, Deichmann and his shoemakers produced their own shoes for the first time.

P2: Founding years 1913–1940. Heinrich Deichmann, born in 1888, opened a shoemaker's shop, called "Schuhreparatur Elektra", in 1913 at the age of 25 in what is now Johannes-Brokamp-Straße in Borbeck, which was incorporated into the city of Essen two years later. At first, his customers were mainly miners from the then up-and-coming Ruhr area who needed inexpensive shoe repairs, being part of the **decreased wages grouping**. After World War I, Deichmann and his shoemakers produced their own shoes for the first time.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **lower income bracket** and **decreased wages grouping** interchangeable (i.e., having the same meaning)?

Pair 837

P1: The MVD was originally established as a union-republic ministry with headquarters in Moscow, but in 1960 the Khrushchev leadership, as part of its general downgrading of the police, abolished the central MVD, whose functions were assumed by republic ministries of internal affairs. Then, in 1962 the MVD was redesignated the Ministry for the Preservation of Public Order (; Ministerstvo okhrany obshchestvennogo poriadka — MOOP). This name change implied a break with the all-powerful MVD created by Beria, as well as a **narrower range** of functions. The changes were accompanied by increasing criticism of the regular police in the Soviet press for its shortcomings in combating crime.

P2: The MVD was originally established as a union-republic ministry with headquarters in Moscow, but in 1960 the Khrushchev leadership, as part of its general downgrading of the police, abolished the central MVD, whose functions were assumed by republic ministries of internal affairs. Then, in 1962 the MVD was redesignated the Ministry for the Preservation of Public Order (; Ministerstvo okhrany obshchestvennogo poriadka — MOOP). This name change

implied a break with the all-powerful MVD created by Beria, as well as a **more precise set** of functions. The changes were accompanied by increasing criticism of the regular police in the Soviet press for its shortcomings in combating crime.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **narrower range** and **more precise set** interchangeable (i.e., having the same meaning)?

Pair 838

P1: It contains the first two nature preserves in Delaware. These nature preserves are Tulip Tree Woods and Freshwater Marsh. Flint Woods is a **satellite area** of the park and has become the park's third nature preserve. Flint Woods is home to species of rare song birds and an old-growth forest.

P2: It contains the first two nature preserves in Delaware. These nature preserves are Tulip Tree Woods and Freshwater Marsh. Flint Woods is a **smaller zone** of the park and has become the park's third nature preserve. Flint Woods is home to species of rare song birds and an old-growth forest.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **satellite area** and **smaller zone** interchangeable (i.e., having the same meaning)?

Pair 839

P1: This rationale is being pushed forward to pass laws that help enforce socially acceptable conduct and thereby minimize undue losses to developers. Cheating thus negatively affects both developers and users alike, as unfair exploitation which ultimately lowers the value of both purchase and product, thereby warranting action to protect the whole of the industry. Criticism of this **policy shifts** the responsibility of anti-cheat policing to developers themselves. However, the Indie sector is especially vulnerable and often has limited resources with which to combat the trend.

P2: This rationale is being pushed forward to pass laws that help enforce socially acceptable conduct and thereby minimize undue losses to developers. Cheating thus negatively affects both developers and users alike, as unfair exploitation which ultimately lowers the value of both purchase and product, thereby warranting action to protect the whole of the industry. Criticism of this **plan revisions** the responsibility of anti-cheat policing to developers themselves. However, the Indie sector is especially vulnerable and often has limited resources with which to combat the trend.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **policy shifts** and **plan revisions** interchangeable (i.e., having the same meaning)?

Pair 840

P1: Schmidt's injury and team origins. On January 6, 2000, Sam Schmidt was in Orlando, Florida practicing at the Walt Disney World Speedway. As his car exited turn two, it hit the wall with a **tremendous impact**. Schmidt was airlifted to a nearby hospital in extremely critical condition.

P2: Schmidt's injury and team origins. On January 6, 2000, Sam Schmidt was in Orlando, Florida practicing at the Walt Disney World Speedway. As his car exited turn two, it hit the wall with a **colossal bang**. Schmidt was airlifted to a nearby hospital in extremely critical condition.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **tremendous impact** and **colossal bang** interchangeable (i.e., having the same meaning)?

Pair 841

P1: The "grinden" on the Enz heights were thus reforested by the 19th century. Flora and fauna. The "grinden" lie on nutrient-poor soils of the main conglomerate of the bunter sandstone, which has a **major effect** on the characteristic "grinde" ecology. Typical plants: matgrass, German deergrass, moor grass, heather, bilberry, cowberry, bog bilberry, mountain pine, peat moss and cottongrass.

P2: The "grinden" on the Enz heights were thus reforested by the 19th century. Flora and fauna. The "grinden" lie on nutrient-poor soils of the main conglomerate of the bunter sandstone, which has a **dominant result** on the characteristic "grinde" ecology. Typical plants: matgrass, German deergrass, moor grass, heather, bilberry, cowberry, bog bilberry, mountain pine, peat moss and cottongrass.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **major effect** and **dominant result** interchangeable (i.e., having the same meaning)?

Pair 842

P1: A shoulderbreaker is any move in which the wrestler slams their opponent's shoulder against any part of the wrestler's body, usually the shin or knee. This move is normally used to weaken the arm for a submission maneuver or to make it more difficult for the opponent to kick out of a possible pinfall attempt. The most **common version** sees the wrestler turn the opponent upside-down and drop the opponent shoulder-first on the wrestler's knee. Usually the opponent is held over the wrestler's shoulder in either a powerslam position, or less commonly an inverted powerslam position for what is sometimes called the inverted shoulderbreaker.

P2: A shoulderbreaker is any move in which the wrestler slams their opponent's shoulder against any part of the wrestler's body, usually the shin or knee. This move is normally used to weaken the arm for a submission maneuver or to make it more difficult for the opponent to kick out of a possible pinfall attempt. The most **average interpretation** sees the wrestler turn the opponent upside-down and drop the opponent shoulder-first on the wrestler's knee. Usually the opponent is held over the wrestler's shoulder in either a powerslam position, or less commonly an inverted powerslam position for what is sometimes called the inverted shoulderbreaker.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **common version** and **average interpretation** interchangeable (i.e., having the same meaning)?

Pair 843

P1: This practice of loft flying and tossing continues throughout a pigeon's career to keep their homing instincts sharp. There are many ways to train racing pigeons. Like **every sport** out there, racing pigeons is an evolving sport. One of the most popular systems is widowhood.

P2: This practice of loft flying and tossing continues throughout a pigeon's career to keep their homing instincts sharp. There are many ways to train racing pigeons. Like **all the athletic exercises** out there, racing pigeons is an evolving sport. One of the most popular systems is widowhood.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **every sport** and **all the athletic exercises** interchangeable (i.e., having the same meaning)?

Pair 844

P1: Secondly, since soups can be cooked with various vegetables or meat, such as pork ribs and carrot soup, chicken soup with spinach, etc. that provide different kinds of nutritions that people need. More over, seen as a comfort food in history, soups help lessen **cold symptoms** and warm the soul, especially in Winter. As Elizabeth Arndt said, soup

increase the feeling of fullness while reduce the total calorie intake.

P2: Secondly, since soups can be cooked with various vegetables or meat, such as pork ribs and carrot soup, chicken soup with spinach, etc. that provide different kinds of nutritions that people need. **More over, seen as a comfort food in history, soups help lessen influenza indicators and warm the soul, especially in Winter.** As Elizabeth Arndt said, soup increase the feeling of fullness while reduce the total calorie intake.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **cold symptoms** and **influenza indicators** interchangeable (i.e., having the same meaning)?

Pair 845

P1: Since no one wants to admit failure, especially public companies, the vast majority of internal corporate project cancellations are performed quietly and are not as widely reported as the FBI case. However, it is generally understood by most businesspeople that cancellations occur regularly in their organizations. **A related topic is deciding when to cancel a project.** Early identification and action permit project resources to be redeployed to other projects.

P2: Since no one wants to admit failure, especially public companies, the vast majority of internal corporate project cancellations are performed quietly and are not as widely reported as the FBI case. However, it is generally understood by most businesspeople that cancellations occur regularly in their organizations. **A similar subject is deciding when to cancel a project.** Early identification and action permit project resources to be redeployed to other projects.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **related topic** and **similar subject** interchangeable (i.e., having the same meaning)?

Pair 846

P1: Success and decline. Warwick's company appears to have flourished for around five years, before ill-health forced him to retire to his home in Hertfordshire. **On 13 May 1580 the Privy Council wrote to the Surrey justices about an unknown company** playing at Newington Butts despite a ban on theatre. It is known that John and Lawrence Dutton led members of Warwick's company to reform as the Earl of Oxford's players by April 1580, and Ingram speculates that it was they who were playing at their old home.

P2: Success and decline. Warwick's company appears to have flourished for around five years, before ill-health forced him to retire to his home in Hertfordshire. **On 13 May 1580 the Privy Council wrote to the Surrey justices about an unfamiliar conglomerate** playing at Newington Butts despite a ban on theatre. It is known that John and Lawrence Dutton led members of Warwick's company to reform as the Earl of Oxford's players by April 1580, and Ingram speculates that it was they who were playing at their old home.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **unknown company** and **unfamiliar conglomerate** interchangeable (i.e., having the same meaning)?

Pair 847

P1: The maternity leave, the number of weeks a biological mother is allowed to leave work is 16 weeks in France—6 weeks before birth and 10 weeks post-birth. Maternity leave is 26 weeks for the third and subsequent children, and 34 weeks for twins. **Maternity leave is mandatory, the mother must take at least part of the leave, complete renouncement of the leave is forbidden.** Paternity/partner leave is 25 days.

P2: The maternity leave, the number of weeks a biological mother is allowed to leave work is 16 weeks in France—6 weeks before birth and 10 weeks post-birth. Maternity leave is 26 weeks for the third and subsequent children, and 34 weeks for twins. **Maternity leave is mandatory, the mother must take at a minimum half of the leave, complete renouncement of**

the leave is forbidden. Paternity/partner leave is 25 days.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **least part** and **a minimum half** interchangeable (i.e., having the same meaning)?

Pair 848

P1: Copyright societies negotiate prices and create tariffs on behalf of the authors that they represent and offset the imbalance of power between the users and the copyright holders. The lobbying power of copyright societies is especially important in industries like the music industry, where authors and owners of copyright are often placed at a disadvantage. **The music streaming revolution was also projected as an attack on the power imbalance in the music industry.** The evolution of technology and influence of music aggregators like Spotify, Apple Music and Pandora are changing the existing system of copyright licensing and might make copyright societies obsolete.

P2: Copyright societies negotiate prices and create tariffs on behalf of the authors that they represent and offset the imbalance of power between the users and the copyright holders. The lobbying power of copyright societies is especially important in industries like the music industry, where authors and owners of copyright are often placed at a disadvantage. **The music streaming revolution was also projected as an attack on the disproportionate control in the music industry.** The evolution of technology and influence of music aggregators like Spotify, Apple Music and Pandora are changing the existing system of copyright licensing and might make copyright societies obsolete.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **power imbalance** and **disproportionate control** interchangeable (i.e., having the same meaning)?

Pair 849

P1: Serbun, Shih and Gutchess (2011) performed a study involving the effects of general and specific memory when using the self-reference effect. The study created a gap in research due to the experiments being tested. **The first experiment uses visuals details of objects where the second and third experiment use verbal memory to assess the self-reference effect.** The self-reference effect enhances both general and specific memory and can improve the accuracy and richness of a memory (Serbun et al., 2011).

P2: Serbun, Shih and Gutchess (2011) performed a study involving the effects of general and specific memory when using the self-reference effect. The study created a gap in research due to the experiments being tested. **The primary investigation uses visuals details of objects where the second and third experiment use verbal memory to assess the self-reference effect.** The self-reference effect enhances both general and specific memory and can improve the accuracy and richness of a memory (Serbun et al., 2011).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **first experiment** and **primary investigation** interchangeable (i.e., having the same meaning)?

Pair 850

P1: It was eventually determined that with the HST still in orbit that they could replace the WFPC with the improved Wide Field and Planetary Camera 2 which would incorporate corrective optics. This left solutions still to be found for the remaining instruments. **one potential option was to insert corrective optics, lenses or mirrors in the telescope tube between the primary mirror and the secondary reflector.** However the tube was too narrow for even the smallest astronaut to slither down it, leading to a search for a means of inserting the required corrective components into the tube.

P2: It was eventually determined that with the HST still in orbit that they could replace the WFPC with the improved Wide Field and Planetary Camera 2 which would incorporate corrective optics. This left solutions still to be found for the remaining instruments. **a promising possibility was to insert corrective optics, lenses or mirrors in the telescope tube between the primary mirror and the secondary reflector.** However the tube was too narrow for even the smallest

astronaut to slither down it, leading to a search for a means of inserting the required corrective components into the tube.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one potential option** and **a promising possibility** interchangeable (i.e., having the same meaning)?

Pair 851

P1: Helsinki-Vantaa airport is Finland's global gateway with scheduled non-stop flights to such places as Bangkok, Beijing, Guangzhou, Nagoya, New York, Osaka, Shanghai, Hong Kong and Tokyo. Helsinki has an optimal location for great circle airline traffic routes between Western Europe and the Far East. The airport is located approximately 19 kilometers north of Helsinki's downtown in the city of Vantaa, **thus the name** Helsinki-Vantaa. Other airports with regular scheduled international connections are Kokkola-Pietarsaari Airport, Mariehamn Airport, Tampere-Pirkkala Airport, Turku Airport and Vaasa Airport.

P2: Helsinki-Vantaa airport is Finland's global gateway with scheduled non-stop flights to such places as Bangkok, Beijing, Guangzhou, Nagoya, New York, Osaka, Shanghai, Hong Kong and Tokyo. Helsinki has an optimal location for great circle airline traffic routes between Western Europe and the Far East. The airport is located approximately 19 kilometers north of Helsinki's downtown in the city of Vantaa, **therefore the designation** Helsinki-Vantaa. Other airports with regular scheduled international connections are Kokkola-Pietarsaari Airport, Mariehamn Airport, Tampere-Pirkkala Airport, Turku Airport and Vaasa Airport.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **thus the name** and **therefore the designation** interchangeable (i.e., having the same meaning)?

Pair 852

P1: Leading the assault column, Captain Jacob Bower's company of the 6th Pennsylvania attacked the British pickets at Mount Airy. Conway's Brigade continued to attack and eventually drove "the enemy a mile and a half below Chew's house" before being forced to retire. **At least one company** of the regiment joined in the assaults on the Chew House and lost a number of men. December 19, 1777 — After an encampment of almost six weeks at Whitemarsh, Pennsylvania, the army moved into its winter quarters at Valley Forge where they would remain for the next six months.

P2: Leading the assault column, Captain Jacob Bower's company of the 6th Pennsylvania attacked the British pickets at Mount Airy. Conway's Brigade continued to attack and eventually drove "the enemy a mile and a half below Chew's house" before being forced to retire. **At a minimum a single unit** of the regiment joined in the assaults on the Chew House and lost a number of men. December 19, 1777 — After an encampment of almost six weeks at Whitemarsh, Pennsylvania, the army moved into its winter quarters at Valley Forge where they would remain for the next six months.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **least one company** and **a minimum a single unit** interchangeable (i.e., having the same meaning)?

Pair 853

P1: Having been founded by as the Intercollegiate Code of Academic Costume (ICC) was developing, Stanford did not have its own system of academic dress in place when caps and gowns were first worn by students so they used the forms that had been laid out by the code in 1895. It used a traditional hood with a lining of cardinal red. **Stanford University followed the suggestions of the Intercollegiate Code of Academic Costume until 1977 when a new set** of doctoral robes was introduced. The robes were designed by Eric Hutchinson—a professor of chemistry—who had earned his own doctorate from the University of Cambridge.

P2: Having been founded by as the Intercollegiate Code of Academic Costume (ICC) was developing, Stanford did not have its own system of academic dress in place when caps and gowns were first worn by students so they used the forms

that had been laid out by the code in 1895. It used a traditional hood with a lining of cardinal red. Stanford University followed the suggestions of the Intercollegiate Code of Academic Costume until 1977 when a contemporary assortment of doctoral robes was introduced. The robes were designed by Eric Hutchinson—a professor of chemistry—who had earned his own doctorate from the University of Cambridge.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **new set** and **contemporary assortment** interchangeable (i.e., having the same meaning)?

Pair 854

P1: Bucknall employed his friend Alfred Stansell to paint murals and the interior is richly decorated. Biblical scenes form a frieze and the ceiling and the walls are covered in Gothic patterns. Over the years fumes from a coke heater blackened every surface until the paintings were hardly visible. In 2007 the interior was restored to the original colours.

P2: Bucknall employed his friend Alfred Stansell to paint murals and the interior is richly decorated. Biblical scenes form a frieze and the ceiling and the walls are covered in Gothic patterns. Over the years fumes from a coke heater blackened each exterior until the paintings were hardly visible. In 2007 the interior was restored to the original colours.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **every surface** and **each exterior** interchangeable (i.e., having the same meaning)?

Pair 855

P1: Brief submersion in cold water was sometimes used, but not the usual practice of submersion to the point of near-drowning. He did not employ the practice of controlling patients by withdrawal of food to the point of near-starvation, but described different diets for different conditions. Chiarugi used a diverse mixture of remedies and drugs in his treatments, principally opium. Some were intended to be sedatives and some mild stimulants, the latter including irritants and blistering agents applied to the skin.

P2: Brief submersion in cold water was sometimes used, but not the usual practice of submersion to the point of near-drowning. He did not employ the practice of controlling patients by withdrawal of food to the point of near-starvation, but described different diets for different conditions. Chiarugi used a different blend of remedies and drugs in his treatments, principally opium. Some were intended to be sedatives and some mild stimulants, the latter including irritants and blistering agents applied to the skin.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **diverse mixture** and **different blend** interchangeable (i.e., having the same meaning)?

Pair 856

P1: As a consequence, most Italians favored the optimism shown in many American movies of the time. The views of the post-war Italian government of the time were also far from positive, and the remark of Giulio Andreotti, who was then a vice-minister in the De Gasperi cabinet, characterized the official view of the movement: Neorealism is "dirty laundry that shouldn't be washed and hung to dry in the open". Italy's move from individual concern with neorealism to the tragic frailty of the human condition can be seen through Federico Fellini's films. His early works "La Strada" (1954) and "Il bidone" (1955) are transitional movies.

P2: As a consequence, most Italians favored the optimism shown in many American movies of the time. The views of the post-war Italian government of the time were also far from positive, and the remark of Giulio Andreotti, who was then a vice-minister in the De Gasperi cabinet, characterized the official view of the movement: Neorealism is "dirty laundry that shouldn't be washed and hung to dry in the open". Italy's move from respective interest with neorealism to the tragic frailty of the human condition can be seen through Federico Fellini's films. His early works "La Strada" (1954) and "Il bidone" (1955) are transitional movies.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **individual concern** and **respective interest** interchangeable (i.e., having the same meaning)?

Pair 857

P1: Another heated issue was Communism in general, as the election was in the middle of the Cold War. Topics like the diplomatic relationships with the USSR (which candidate Jorge González Martén swear will end in his government). The Catholic Church made a public statement criticizing both Communism and savage Capitalism and calling for a **third option**. Both PLN (Social Democrats) and the Christian Democratic Party claim to be that option.

P2: Another heated issue was Communism in general, as the election was in the middle of the Cold War. Topics like the diplomatic relationships with the USSR (which candidate Jorge González Martén swear will end in his government). The Catholic Church made a public statement criticizing both Communism and savage Capitalism and calling for a **tertiary preference**. Both PLN (Social Democrats) and the Christian Democratic Party claim to be that option.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **third option** and **tertiary preference** interchangeable (i.e., having the same meaning)?

Pair 858

P1: A quilter can make one stitch at a time by first driving the needle through the fabric from the right side, then pushing it back up through the material from the wrong side to complete the stitch; this is called a stab stitch. Another option is called a rocking stitch, where the quilter has one hand, usually with a finger wearing a thimble, on top of the quilt, while the other hand is located beneath the piece to push the needle back up. A **third option** is called "loading the needle" and involves doing four or more stitches before pulling the needle through the cloth. Hand quilting is still practiced by the Amish and Mennonites within the United States and Canada, and is enjoying a resurgence worldwide.

P2: A quilter can make one stitch at a time by first driving the needle through the fabric from the right side, then pushing it back up through the material from the wrong side to complete the stitch; this is called a stab stitch. Another option is called a rocking stitch, where the quilter has one hand, usually with a finger wearing a thimble, on top of the quilt, while the other hand is located beneath the piece to push the needle back up. A **number three choice** is called "loading the needle" and involves doing four or more stitches before pulling the needle through the cloth. Hand quilting is still practiced by the Amish and Mennonites within the United States and Canada, and is enjoying a resurgence worldwide.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **third option** and **number three choice** interchangeable (i.e., having the same meaning)?

Pair 859

P1: As different motorcycles have varying design parameters (such as cost, complexity, weight distribution, stiffness, power output and speed), there is no single ideal frame design, and designers must make an informed decision of the optimum choice. Steel. In Europe and the USA, steel tubing was the **default material** until recent times. All the major manufacturers (AJS, Ariel, BSA, Matchless, Norton, Sunbeam, Triumph, Velocette, BMW, DKW, Ducati, Moto-Guzzi, Harley-Davidson and Indian) used steel tubing.

P2: As different motorcycles have varying design parameters (such as cost, complexity, weight distribution, stiffness, power output and speed), there is no single ideal frame design, and designers must make an informed decision of the optimum choice. Steel. In Europe and the USA, steel tubing was the **widely used** until recent times. All the major manufacturers (AJS, Ariel, BSA, Matchless, Norton, Sunbeam, Triumph, Velocette, BMW, DKW, Ducati, Moto-Guzzi, Harley-Davidson and Indian) used steel tubing.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **default material** and **widely used** interchangeable (i.e., having the same meaning)?

Pair 860

P1: Examples of descriptors include, but are not restricted to: Nationality caveat. Protectively marked material may bear a nationality "caveat", a descriptor defining which nationality groups it may be released to. **By default material in the UK is not caveated by nationality, the classification being sufficient protection.** Examples of nationality caveats include, but are not limited to: Codewords.

P2: Examples of descriptors include, but are not restricted to: Nationality caveat. Protectively marked material may bear a nationality "caveat", a descriptor defining which nationality groups it may be released to. **By lack of opposition supply in the UK is not caveated by nationality, the classification being sufficient protection.** Examples of nationality caveats include, but are not limited to: Codewords.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **default material** and **lack of opposition supply** interchangeable (i.e., having the same meaning)?

Pair 861

P1: The old piece of eight was valued at 10 reales of the new silver coin. The new 8-real coin was known as "peso sencillo", the old piece of eight as "peso fuerte". **Foreign exchange was quoted in "pesos de cambio", based on the old piece of eight, which continued to be produced in America.** After this, the monetary systems of Spain and of Spanish America differed significantly.

P2: The old piece of eight was valued at 10 reales of the new silver coin. The new 8-real coin was known as "peso sencillo", the old piece of eight as "peso fuerte". **Foreign exchange was quoted in "pesos de cambio", based on the original specimen of eight, which continued to be produced in America.** After this, the monetary systems of Spain and of Spanish America differed significantly.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **old piece** and **original specimen** interchangeable (i.e., having the same meaning)?

Pair 862

P1: 2002 season. Fox looked to the 2002 NFL Draft to begin revamping the franchise, starting with the second overall pick; defensive end Julius Peppers. **Peppers was a dominating defensive end at the University of North Carolina and he was a solid fit for Fox's defensive plan.** The Panthers also picked up linebacker Will Witherspoon and running back DeShaun Foster in the draft.

P2: 2002 season. Fox looked to the 2002 NFL Draft to begin revamping the franchise, starting with the second overall pick; defensive end Julius Peppers. **Peppers was a dominating defensive end at the University of North Carolina and he was a perfect match for Fox's defensive plan.** The Panthers also picked up linebacker Will Witherspoon and running back DeShaun Foster in the draft.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **solid fit** and **perfect match** interchangeable (i.e., having the same meaning)?

Pair 863

P1: "Through ties" are put through structure openings such as windows. A vertical inside tube crossing the opening is attached to the scaffold by a transom and a crossing horizontal tube on the outside called a bridle tube. The gaps between the tubes and the structure surfaces are packed or wedged with timber sections to ensure a **solid fit**. "Box ties" are used to attach the scaffold to suitable pillars or comparable features.

P2: "Through ties" are put through structure openings such as windows. A vertical inside tube crossing the opening is attached to the scaffold by a transom and a crossing horizontal tube on the outside called a bridle tube. The gaps between the tubes and the structure surfaces are packed or wedged with timber sections to ensure a **great arrangement**. "Box ties" are used to attach the scaffold to suitable pillars or comparable features.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **solid fit** and **great arrangement** interchangeable (i.e., having the same meaning)?

Pair 864

P1: Fish and Wildlife Service in its North American Waterfowl Management Plan, recognizes outstanding contributions toward the conservation of waterfowl habitat. The Mandan Refinery received the award in 1985 for its "North 40" project. The North 40 project began in 1974 as a **creative way** to expand the refinery's wastewater treating system. Championed by then refinery manager William "Bill" Burns, over half of the refinery's 960-acre was devoted to wastewater treatment and wildlife conservation.

P2: Fish and Wildlife Service in its North American Waterfowl Management Plan, recognizes outstanding contributions toward the conservation of waterfowl habitat. The Mandan Refinery received the award in 1985 for its "North 40" project. The North 40 project began in 1974 as a **visionary method** to expand the refinery's wastewater treating system. Championed by then refinery manager William "Bill" Burns, over half of the refinery's 960-acre was devoted to wastewater treatment and wildlife conservation.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **creative way** and **visionary method** interchangeable (i.e., having the same meaning)?

Pair 865

P1: If the deceased has a shroud, it is pulled over the face of the deceased. Finally, the coffin is closed. In some traditions, the priest will sprinkle a **little earth** on the remains, in the shape of a cross, before closing the coffin. Ceremony at the graveside.

P2: If the deceased has a shroud, it is pulled over the face of the deceased. Finally, the coffin is closed. In some traditions, the priest will sprinkle a **bit of dirt** on the remains, in the shape of a cross, before closing the coffin. Ceremony at the graveside.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **little earth** and **bit of dirt** interchangeable (i.e., having the same meaning)?

Pair 866

P1: The provincial government will commit about \$27 million to the project. Former Highways and Infrastructure Minister Wayne Elhard discussed expanding the Government's role in the next phase of the development project. The **average vehicles** per day on both Hwy 1 and Hwy 11 were examined in 5 year, and 25 year projections. The traffic on Hwy 1 is expected to have an average of 10,140 to 11,210 vehicles per day on the west and east side of the proposed interchange in five years.

P2: The provincial government will commit about \$27 million to the project. Former Highways and Infrastructure Minister Wayne Elhard discussed expanding the Government's role in the next phase of the development project. The **typical mechanism of conveyance** per day on both Hwy 1 and Hwy 11 were examined in 5 year, and 25 year projections. The traffic on Hwy 1 is expected to have an average of 10,140 to 11,210 vehicles per day on the west and east side

of the proposed interchange in five years.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **average vehicles** and **typical mechanism of conveyance** interchangeable (i.e., having the same meaning)?

Pair 867

P1: Many levels return from previous games, including an expanded Warehouse (which also serves as the Story Mode's training area), School and Downhill Jam from "Tony Hawk's Pro Skater", Canada, Los Angeles and Airport from "Tony Hawk's Pro Skater 3", and Philadelphia from "Tony Hawk's Pro Skater 2". A classic mode was added to "Underground 2", which allows players to skate through both new and remade classic levels in the traditional 10-goal, two-minute time limit mode that was present in "Pro Skater", "Pro Skater 2" and "Pro Skater 3", complete with the stat points scattered all around the levels. **In classic mode, the player chooses from one or two levels in which to attempt to complete enough goals to advance.** All of the "remade" levels are accessible only through "Classic Mode" although once unlocked, it is possible to play them in any mode except Story.

P2: Many levels return from previous games, including an expanded Warehouse (which also serves as the Story Mode's training area), School and Downhill Jam from "Tony Hawk's Pro Skater", Canada, Los Angeles and Airport from "Tony Hawk's Pro Skater 3", and Philadelphia from "Tony Hawk's Pro Skater 2". A classic mode was added to "Underground 2", which allows players to skate through both new and remade classic levels in the traditional 10-goal, two-minute time limit mode that was present in "Pro Skater", "Pro Skater 2" and "Pro Skater 3", complete with the stat points scattered all around the levels. **In classic mode, the player chooses from 1 or 2 layers in which to attempt to complete enough goals to advance.** All of the "remade" levels are accessible only through "Classic Mode" although once unlocked, it is possible to play them in any mode except Story.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one or two levels** and **1 or 2 layers** interchangeable (i.e., having the same meaning)?

Pair 868

P1: Zhuge Liang was aware that Liu Bei favoured and trusted Fa Zheng, which was why he refused to intervene in this matter. The historian Sun Sheng criticised Zhuge Liang's attitude towards Fa Zheng's abuse of power and called it a "lapse in justice". **He felt that no subject should be above the law, regardless of how great his past contributions were.** Role in the Hanzhong Campaign.

P2: Zhuge Liang was aware that Liu Bei favoured and trusted Fa Zheng, which was why he refused to intervene in this matter. The historian Sun Sheng criticised Zhuge Liang's attitude towards Fa Zheng's abuse of power and called it a "lapse in justice". **He felt that no subject should be above the law, regardless of how great his prior inputs were.** Role in the Hanzhong Campaign.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **past contributions** and **prior inputs** interchangeable (i.e., having the same meaning)?

Pair 869

P1: 26-game winner Dick Rudolph scattered five hits while striking out eight as the Braves won the opener in convincing fashion against the Athletics ace, Chief Bender. Catcher Hank Gowdy had a single, double and triple as well as a walk in leading Boston's offensive attack. **He was also on the back end of a double steal in the eighth inning, with Butch Schmidt's steal of home the Braves' final run.** According to Tom Meany's 1950 book "Baseball's Greatest Teams", with one chapter on each of the then 16 major league teams' one most outstanding season in the author's opinion, the chapter on the Boston Braves was naturally on their one world championship year, 1914.

P2: 26-game winner Dick Rudolph scattered five hits while striking out eight as the Braves won the opener in convincing fashion against the Athletics ace, Chief Bender. Catcher Hank Gowdy had a single, double and triple as well as a walk

in leading Boston's offensive attack. He was also on the **tail point** of a double steal in the eighth inning, with Butch Schmidt's steal of home the Braves' final run. According to Tom Meany's 1950 book "Baseball's Greatest Teams", with one chapter on each of the then 16 major league teams' one most outstanding season in the author's opinion, the chapter on the Boston Braves was naturally on their one world championship year, 1914.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **back end** and **tail point** interchangeable (i.e., having the same meaning)?

Pair 870

P1: Fairly renovated in 2020, one can highlight the elaborate wooden decoration of the door at No.2 and the twin entrance portal at No.4/6, confining the doors inside a portal framed by two pilasters and topped by a high triangular pediment. In the backyard of the tenement at No.6 stands one of the oldest hand pumps of the city (from 1897): they were originally made of wood and replaced to iron ones in the 1880s. Robert Schliefs's tenement at No.3 1895-1900 Eclecticism Robert Schlief was an engineer-mechanic in electrics, but also working in electrical telegraphs, **lightning conductors** or **power plants**. Robert's family lived there till 1920 and the return of Bydgoszcz under Polish rule, they then transferred to nearby Zduny street.

P2: Fairly renovated in 2020, one can highlight the elaborate wooden decoration of the door at No.2 and the twin entrance portal at No.4/6, confining the doors inside a portal framed by two pilasters and topped by a high triangular pediment. In the backyard of the tenement at No.6 stands one of the oldest hand pumps of the city (from 1897): they were originally made of wood and replaced to iron ones in the 1880s. Robert Schliefs's tenement at No.3 1895-1900 Eclecticism Robert Schlief was an engineer-mechanic in electrics, but also working in electrical telegraphs, **bolt direction** or **power plants**. Robert's family lived there till 1920 and the return of Bydgoszcz under Polish rule, they then transferred to nearby Zduny street.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **lightning conductors** and **bolt direction** interchangeable (i.e., having the same meaning)?

Pair 871

P1: In addition, the idea of scientific development stresses on scientific discovery and technological advance, engines for sustainable growth in the long run. Sustainable growth is a concept in macroeconomics that signifies GDP at potential (i.e. **all that is produced is being consumed and there is no cyclical unemployment**) for years to come. In addition, the Socialist Harmonious Society concept was a response to the problem of social inequality/ wealth gap, which if not dealt with immediately, could lead to social unrest and even turmoil.

P2: In addition, the idea of scientific development stresses on scientific discovery and technological advance, engines for sustainable growth in the long run. Sustainable growth is a concept in macroeconomics that signifies GDP at potential (i.e. **all that is produced is being consumed and there is no repetitive lack of employment**) for years to come. In addition, the Socialist Harmonious Society concept was a response to the problem of social inequality/ wealth gap, which if not dealt with immediately, could lead to social unrest and even turmoil.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **cyclical unemployment** and **repetitive lack of employment** interchangeable (i.e., having the same meaning)?

Pair 872

P1: Furthermore, the monetary authority of a country, such as the central bank, can influence the availability and cost for money through its monetary policy. In addition to theories of unemployment, a few categorisations of unemployment are used for more precisely modelling the effects of unemployment within the economic system. **Some of the main types of unemployment include structural unemployment, frictional unemployment, cyclical unemployment, involuntary unemployment and classical unemployment.** Structural unemployment focuses on foundational problems in the economy and

inefficiencies inherent in labor markets, including a mismatch between the supply and demand of laborers with necessary skill sets.

P2: Furthermore, the monetary authority of a country, such as the central bank, can influence the availability and cost for money through its monetary policy. In addition to theories of unemployment, a few categorisations of unemployment are used for more precisely modelling the effects of unemployment within the economic system. **Some of the main types of unemployment include structural unemployment, frictional unemployment, seasonal absence of jobs, involuntary unemployment and classical unemployment.** Structural unemployment focuses on foundational problems in the economy and inefficiencies inherent in labor markets, including a mismatch between the supply and demand of laborers with necessary skill sets.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **cyclical unemployment** and **seasonal absence of jobs** interchangeable (i.e., having the same meaning)?

Pair 873

P1: It was believed that those who pollute it, die a terrible death. Unfortunately, the temple was destroyed in the last half of the 1900s. **Zealous looters disregarded the historical value of the old buildings destroyed them for logs and stone.** Now there is little left that is untouched.

P2: It was believed that those who pollute it, die a terrible death. Unfortunately, the temple was destroyed in the last half of the 1900s. **Zealous looters disregarded the factual importance of the old buildings destroyed them for logs and stone.** Now there is little left that is untouched.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **historical value** and **factual importance** interchangeable (i.e., having the same meaning)?

Pair 874

P1: Modern European learning introduced by the Portuguese-Spanish Catholics and the Dutch Protestants to Indonesian native educational institutions in the 20th century influenced the definition of the word "Budi". In this intellectual period, "Budi" is re-defined and re-interpreted not as spiritual as understood before, but as human entity. **In 1961, for example, Nicolas Drijarkara defined "Budi" as "ethical reason" or "moral reason" as understood by the moralist Immanuel Kant.** Poedjawijatna, another philosopher, defined "Budi" as Indonesian translation of the English word "reason" or "reasoning" and "Filsafat Budi" as of the English word "Logics".

P2: Modern European learning introduced by the Portuguese-Spanish Catholics and the Dutch Protestants to Indonesian native educational institutions in the 20th century influenced the definition of the word "Budi". In this intellectual period, "Budi" is re-defined and re-interpreted not as spiritual as understood before, but as human entity. **In 1961, for example, Nicolas Drijarkara defined "Budi" as "moral ground" or "moral reason" as understood by the moralist Immanuel Kant.** Poedjawijatna, another philosopher, defined "Budi" as Indonesian translation of the English word "reason" or "reasoning" and "Filsafat Budi" as of the English word "Logics".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **ethical reason** and **moral ground** interchangeable (i.e., having the same meaning)?

Pair 875

P1: The competition system is the same as the one utilized in the first season; on Mondays and Wednesdays, the two teams compete in three events, each worth 100, 200 and 300 points. The winner of those days is saved from competing in elimination, while the loser has to compete among themselves on Tuesdays and Thursdays to elect a nominated team member. **The elimination competition was on Fridays, and the loser leaves "Calle 7" for ever.** The winners of this was

again Francisco "Chapu" Puelles.

P2: The competition system is the same as the one utilized in the first season; on Mondays and Wednesdays, the two teams compete in three events, each worth 100, 200 and 300 points. The winner of those days is saved from competing in elimination, while the loser has to compete among themselves on Tuesdays and Thursdays to elect a nominated team member. The displacement tournament was on Fridays, and the loser leaves "Calle 7" for ever. The winners of this was again Francisco "Chapu" Puelles.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are elimination competition and displacement tournament interchangeable (i.e., having the same meaning)?

Pair 876

P1: Shelling and air attacks intensified over the next five days, destroying communications between Allied units and their commanders. At 8.30 pm on 8 February, Australian machine gunners opened fire on vessels carrying a first wave of 16 infantry battalions, totalling around 4,000 Japanese troops, towards Singapore Island, concentrating on the positions occupied by the 3,000-strong 22nd Brigade. While the artillery fired thousands of rounds in response to support calls, confused and desperate fighting raged throughout the evening. Eventually the increasing Japanese numbers, poor siting of defensive positions, and lack of effective communications, allowed Japanese forces to exploit gaps in the Australian lines.

P2: Shelling and air attacks intensified over the next five days, destroying communications between Allied units and their commanders. At 8.30 pm on 8 February, Australian machine gunners opened fire on vessels carrying a first wave of 16 infantry battalions, totalling around 4,000 Japanese troops, towards Singapore Island, concentrating on the positions occupied by the 3,000-strong 22nd Brigade. While the artillery fired thousands of rounds in response to cries for help, confused and desperate fighting raged throughout the evening. Eventually the increasing Japanese numbers, poor siting of defensive positions, and lack of effective communications, allowed Japanese forces to exploit gaps in the Australian lines.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are support calls and cries for help interchangeable (i.e., having the same meaning)?

Pair 877

P1: As tech support problems are typically handled by the call center, contact center, or a help desk, either by telephone or remote desktop software, it's important that technicians be able to work independently (or virtually) to quickly troubleshoot computer issues. The following points provide a quick overview of the benefits to an organization virtualizing its help desk: 1. Increased productivity: Companies can increase the number of support calls handled per day and cut the costs of lengthy service calls. Also, companies can eliminate the time and travel expense of technicians going on-site to resolve customer tech problems, improving IT resource management.

P2: As tech support problems are typically handled by the call center, contact center, or a help desk, either by telephone or remote desktop software, it's important that technicians be able to work independently (or virtually) to quickly troubleshoot computer issues. The following points provide a quick overview of the benefits to an organization virtualizing its help desk: 1. Increased productivity: Companies can increase the number of assistance requests handled per day and cut the costs of lengthy service calls. Also, companies can eliminate the time and travel expense of technicians going on-site to resolve customer tech problems, improving IT resource management.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are support calls and assistance requests interchangeable (i.e., having the same meaning)?

Pair 878

P1: The video went on to win a Silver ADDY Award and first place at Dances With Films in 2009. Greenberg's Christmas CD, "Keep Silent; A Collection of Ancient Carols", produced by Dan Workman of SugarHill Recording Studios

released in 2007 on the independent record label, TLM Productions. Greenberg performs a "Christmas Tour of Texas" **nearly every year**, which includes stops in Houston, Austin, Dallas, and San Antonio. Greenberg broke ties with TLM Productions soon after the completion of her "Pretty Girls" music video.

P2: The video went on to win a Silver ADDY Award and first place at Dances With Films in 2009. Greenberg's Christmas CD, "Keep Silent; A Collection of Ancient Carols", produced by Dan Workman of SugarHill Recording Studios released in 2007 on the independent record label, TLM Productions. Greenberg performs a "Christmas Tour of Texas" **pretty much yearly**, which includes stops in Houston, Austin, Dallas, and San Antonio. Greenberg broke ties with TLM Productions soon after the completion of her "Pretty Girls" music video.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **nearly every year** and **pretty much yearly** interchangeable (i.e., having the same meaning)?

Pair 879

P1: Due to the lack of any frequency selective components besides the antenna, the bandwidth of the receiver was equal to the broad bandwidth of the antenna. This was acceptable and even necessary because the first Hertzian spark transmitters also lacked a tuned circuit. Due to the **impulsive nature** of the spark, the energy of the radio waves was spread over a very wide band of frequencies. To receive enough energy from this wideband signal the receiver had to have a wide bandwidth also.

P2: Due to the lack of any frequency selective components besides the antenna, the bandwidth of the receiver was equal to the broad bandwidth of the antenna. This was acceptable and even necessary because the first Hertzian spark transmitters also lacked a tuned circuit. Due to the **instinctive character** of the spark, the energy of the radio waves was spread over a very wide band of frequencies. To receive enough energy from this wideband signal the receiver had to have a wide bandwidth also.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **impulsive nature** and **instinctive character** interchangeable (i.e., having the same meaning)?

Pair 880

P1: Multiple heart-cutting (mLC-LC) utilizes a setup of multiple sampling loops. For 2D-LC, peak capacity is a very important issue. This can be generated using Gradient elution separation with much greater efficiency than an isocratic separation given a **reasonable amount** of time. While isocratic elution is much easier on a fast time scale, it is preferable to perform a gradient elution separation in the second dimension.

P2: Multiple heart-cutting (mLC-LC) utilizes a setup of multiple sampling loops. For 2D-LC, peak capacity is a very important issue. This can be generated using Gradient elution separation with much greater efficiency than an isocratic separation given a **moderate proportion** of time. While isocratic elution is much easier on a fast time scale, it is preferable to perform a gradient elution separation in the second dimension.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **reasonable amount** and **moderate proportion** interchangeable (i.e., having the same meaning)?

Pair 881

P1: CSKA dominated Levski for most of the match, as Dimitar Berbatov made several serious misses, but a last-minute goal from Georgi Ivanov secured the title for Levski. In the summer of 2000, the Italian Enrico Catuzzi was retained as head coach, who managed to revive the team. However, even though the "Army Men" played attractive matches under his leadership, Catuzzi resigned in the winter, citing **family problems**. Aleksandar Stankov was appointed as coach

again, but was replaced by Catuzzi again after two losses from Litex for the cup and the championship.

P2: CSKA dominated Levski for most of the match, as Dimitar Berbatov made several serious misses, but a last-minute goal from Georgi Ivanov secured the title for Levski. In the summer of 2000, the Italian Enrico Catuzzi was retained as head coach, who managed to revive the team. However, even though the "Army Men" played attractive matches under his leadership, Catuzzi resigned in the winter, citing household issues. Aleksandar Stankov was appointed as coach again, but was replaced by Catuzzi again after two losses from Litex for the cup and the championship.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are family problems and household issues interchangeable (i.e., having the same meaning)?

Pair 882

P1: Florence Henderson was also a host until she died in 2016. RLTV documented the last on-air footage of Walter Cronkite in the form of a series of editorials known as the "Cronkite Chronicles". Retirement Living TV, LLC announced the network would wind down operations as a traditional network, a process that ended around December 31, 2017. At the time, it stated that it would continue to produce content, and launch a streaming channel for Apple TV, Roku and Amazon Fire TV the next year.

P2: Florence Henderson was also a host until she died in 2016. RLTV documented the last on-air footage of Walter Cronkite in the form of a series of editorials known as the "Cronkite Chronicles". Retirement Living TV, LLC announced the network would wind down operations as a classical structure, a process that ended around December 31, 2017. At the time, it stated that it would continue to produce content, and launch a streaming channel for Apple TV, Roku and Amazon Fire TV the next year.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are traditional network and classical structure interchangeable (i.e., having the same meaning)?

Pair 883

P1: In mid-2006, Archon agreed to sell the property for \$450 million to Christopher Milam, a developer. Milam, along with Publishing and Broadcasting Limited, planned to build a skyscraper resort known as Crown Las Vegas. The cost of the project was estimated to be \$5 billion, and its original completion date was set for 2014. In March 2008, the project's cancellation was announced and the site was put up for sale.

P2: In mid-2006, Archon agreed to sell the property for \$450 million to Christopher Milam, a developer. Milam, along with Publishing and Broadcasting Limited, planned to build a skyscraper resort known as Crown Las Vegas. The cost of the project was estimated to be \$5 billion, and its first conclusion term was set for 2014. In March 2008, the project's cancellation was announced and the site was put up for sale.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are original completion date and first conclusion term interchangeable (i.e., having the same meaning)?

Pair 884

P1: Facts. Corel Corporation sold, in the UK, the US, and Canada, a CD-ROM called "Professional Photos CD Rom masters", which contained digitized images of paintings by European masters. Corel stated that it had obtained these images from a company called "Off the wall images", a company that no longer existed. Bridgeman Art Library possessed a large library of photographs of paintings by European masters, as both transparencies and in digital form.

P2: Facts. Corel Corporation sold, in the UK, the US, and Canada, a CD-ROM called "Professional Photos CD Rom masters", which contained digitized images of paintings by European masters. Corel stated that it had obtained these

images from a company called "Off the **facade photos**", a company that no longer existed. Bridgeman Art Library possessed a large library of photographs of paintings by European masters, as both transparencies and in digital form.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **wall images** and **facade photos** interchangeable (i.e., having the same meaning)?

Pair 885

P1: The curve is smooth unless it goes through a focus. The "n"-ellipse is in general a subset of the points satisfying a particular algebraic equation. If "n" is odd, the algebraic degree of the curve is formula_2, while if "n" is **even the degree** is formula_3. "n"-ellipses are special cases of spectrahedra.

P2: The curve is smooth unless it goes through a focus. The "n"-ellipse is in general a subset of the points satisfying a particular algebraic equation. If "n" is odd, the algebraic degree of the curve is formula_2, while if "n" is **divisible by two the power** is formula_3. "n"-ellipses are special cases of spectrahedra.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **even the degree** and **divisible by two the power** interchangeable (i.e., having the same meaning)?

Pair 886

P1: However, there are thriving populations of Coquí that, like the people of Puerto Rico, have been transported to the island of Hawaii. The Coquí is viewed as an ecological menace in Hawaii where its song of "co kee co kee" is found to be an irritant by many. **Needless to say that efforts to eradicate its presence in Hawaii is not a popular issue** among Puerto Ricans. Topography.

P2: However, there are thriving populations of Coquí that, like the people of Puerto Rico, have been transported to the island of Hawaii. The Coquí is viewed as an ecological menace in Hawaii where its song of "co kee co kee" is found to be an irritant by many. **Needless to say that efforts to eradicate its presence in Hawaii is not a well-liked affair** among Puerto Ricans. Topography.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **popular issue** and **well-liked affair** interchangeable (i.e., having the same meaning)?

Pair 887

P1: As for sales, they were to steadily decline over the next few years, and 2000 was a slight turning point showing signs of weakening, with only one million-seller, which compared to the 1990s was a poor turnout. Weekly sales for #1s tended to remain around the 110,000 bracket, with the exception of a few extremes. **An example of a very average week** would have been when Madison Avenue's "Don't Call Me Baby" hit No. 1 and sold 93,000 copies.

P2: As for sales, they were to steadily decline over the next few years, and 2000 was a slight turning point showing signs of weakening, with only one million-seller, which compared to the 1990s was a poor turnout. Weekly sales for #1s tended to remain around the 110,000 bracket, with the exception of a few extremes. **An example of a very typical 7 day span** would have been when Madison Avenue's "Don't Call Me Baby" hit No. 1 and sold 93,000 copies.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **average week** and **typical 7 day span** interchangeable (i.e., having the same meaning)?

Pair 888

P1: The Council was chaired by Valerie Jarrett and included the heads of every federal agency and major White House office. The Council was not convened during the Trump administration and was disbanded in 2017. A **successor body**, the White House Gender Policy Council, was formed under the Biden administration on January 20, 2021. Formation.

P2: The Council was chaired by Valerie Jarrett and included the heads of every federal agency and major White House office. The Council was not convened during the Trump administration and was disbanded in 2017. A **beneficiary party**, the White House Gender Policy Council, was formed under the Biden administration on January 20, 2021. Formation.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **successor body** and **beneficiary party** interchangeable (i.e., having the same meaning)?

Pair 889

P1: Sissel Kyrkjebø version. In 1994, Norwegian singer Sissel Kyrkjebø sang a cover version as first track on her album of the same name. Her album and **classical interpretation** of the famous song became very popular and would be part of many of her live performances. The album peaked at number 1 on VG-lista in Norway, also reaching number 15 on Sverigetopplistan, the Swedish Albums Chart.

P2: Sissel Kyrkjebø version. In 1994, Norwegian singer Sissel Kyrkjebø sang a cover version as first track on her album of the same name. Her album and **conventional depiction** of the famous song became very popular and would be part of many of her live performances. The album peaked at number 1 on VG-lista in Norway, also reaching number 15 on Sverigetopplistan, the Swedish Albums Chart.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **classical interpretation** and **conventional depiction** interchangeable (i.e., having the same meaning)?

Pair 890

P1: Males castrated as neonates exhibit low levels of aggression even when given testosterone throughout their development. Challenge hypothesis. The challenge hypothesis outlines the **dynamic relationship** between plasma testosterone levels and aggression in mating contexts in many species. It proposes that testosterone is linked to aggression when it is beneficial for reproduction, such as in mate guarding and preventing the encroachment of intrasexual rivals.

P2: Males castrated as neonates exhibit low levels of aggression even when given testosterone throughout their development. Challenge hypothesis. The challenge hypothesis outlines the **vital connection** between plasma testosterone levels and aggression in mating contexts in many species. It proposes that testosterone is linked to aggression when it is beneficial for reproduction, such as in mate guarding and preventing the encroachment of intrasexual rivals.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **dynamic relationship** and **vital connection** interchangeable (i.e., having the same meaning)?

Pair 891

P1: Also, God orders humans to spend time thinking carefully on creation while he refers to all creations as his signs of power and glory. These signs encompass all of the universe. Furthermore, there is a similarity between humans as the little world and the universe as the **large world**. God does not accept the faith of those who follow him without thinking and only with imitation, but also God blames them for such actions.

P2: Also, God orders humans to spend time thinking carefully on creation while he refers to all creations as his signs of power and glory. These signs encompass all of the universe. Furthermore, there is a similarity between humans as the

little world and the universe as the massive cosmos. God does not accept the faith of those who follow him without thinking and only with imitation, but also God blames them for such actions.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **large world** and **massive cosmos** interchangeable (i.e., having the same meaning)?

Pair 892

P1: After Okamoto left Capcom, the company stopped funding the game in July 2003 and formally canceled it in August. Rockstar Games acquired the rights to "Red Dead Revolver" in December and resumed its development. The game's "crunch time" increased for a **rapid release**, which came in May 2004 for the PlayStation 2 and Xbox. In 2003, Rockstar San Diego began developing "Agent", a stealth game with an open world for the PlayStation 2 and Xbox.

P2: After Okamoto left Capcom, the company stopped funding the game in July 2003 and formally canceled it in August. Rockstar Games acquired the rights to "Red Dead Revolver" in December and resumed its development. The game's "crunch time" increased for a **quick delivery**, which came in May 2004 for the PlayStation 2 and Xbox. In 2003, Rockstar San Diego began developing "Agent", a stealth game with an open world for the PlayStation 2 and Xbox.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **rapid release** and **quick delivery** interchangeable (i.e., having the same meaning)?

Pair 893

P1: By the end the month, "DSTLD had received more than \$7.6 million in indicated interest." In summer 2016, the company announced a Series A round open to the public. As of August 2016, it had gained funds "from more than **450 people** investing an average of \$2,400." By April 2017, using SeedInvest, the company had raised \$1.75 million.

P2: By the end the month, "DSTLD had received more than \$7.6 million in indicated interest." In summer 2016, the company announced a Series A round open to the public. As of August 2016, it had gained funds "from more than **five hundred less fifty individuals** investing an average of \$2,400." By April 2017, using SeedInvest, the company had raised \$1.75 million.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **450 people** and **five hundred less fifty individuals** interchangeable (i.e., having the same meaning)?

Pair 894

P1: Ramiro Villapadierna (Madrid, Spain, 1964) is a reporter and observer working on Centreuropean affaires and culture, and a former war correspondent. He's not engaged by the Instituto Cervantes, the global pan-Hispanic institution dedicated to culture diplomacy. Has been fired from its Frankfurt branche, and has presided over their EUNIC, the European Network of Institutes of Culture, **local clusters**. He's been a long time Berlin, Vienna and Prague based writer and commentator, on Central Europe transitions and contemporary culture, with several international media and political institutes.

P2: Ramiro Villapadierna (Madrid, Spain, 1964) is a reporter and observer working on Centreuropean affaires and culture, and a former war correspondent. He's not engaged by the Instituto Cervantes, the global pan-Hispanic institution dedicated to culture diplomacy. Has been fired from its Frankfurt branche, and has presided over their EUNIC, the European Network of Institutes of Culture, **sectional assemblage**. He's been a long time Berlin, Vienna and Prague based writer and commentator, on Central Europe transitions and contemporary culture, with several international media and political institutes.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **local clusters** and **sectional assemblage** interchangeable (i.e., having the same meaning)?

Pair 895

P1: LCHN is a protein that in humans is encoded by the "KIAA1147" gene (NCBI Gene ID 57189) located on chromosome 7. It is **likely part** of the tripartite DENN domain family of proteins that often function as Rab-GEFs to regulate vesicular trafficking. Both the mRNA and protein have been shown to be upregulated following ischemic stroke, and to be produced at altered levels in patients with FTD-ALS, however the gene's contribution to these states is not well understood.

P2: LCHN is a protein that in humans is encoded by the "KIAA1147" gene (NCBI Gene ID 57189) located on chromosome 7. It is **presumptively a piece** of the tripartite DENN domain family of proteins that often function as Rab-GEFs to regulate vesicular trafficking. Both the mRNA and protein have been shown to be upregulated following ischemic stroke, and to be produced at altered levels in patients with FTD-ALS, however the gene's contribution to these states is not well understood.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **likely part** and **presumptively a piece** interchangeable (i.e., having the same meaning)?

Pair 896

P1: GoDrive files and folders can be easily shared between users with advanced collaboration features including file revision tracking, commenting, trash bin, media viewing and synchronization with Windows and Mac devices. GoDrive is an alternative to cloud-based file sharing services. It provides on-site file storage with **localized control**, end-to-end encryption, and detailed audit trails. If an end-user device is lost or stolen, its GoDrive data can be deactivated and wiped remotely.

P2: GoDrive files and folders can be easily shared between users with advanced collaboration features including file revision tracking, commenting, trash bin, media viewing and synchronization with Windows and Mac devices. GoDrive is an alternative to cloud-based file sharing services. It provides on-site file storage with **regional command**, end-to-end encryption, and detailed audit trails. If an end-user device is lost or stolen, its GoDrive data can be deactivated and wiped remotely.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **localized control** and **regional command** interchangeable (i.e., having the same meaning)?

Pair 897

P1: History. Many tenor roles in the bel canto operas of the early 19th century have an exceptionally high tessitura with notes often well above C5 or D5. The **best-known example** is probably Arturo's arioso "Credeasi misera" from Vincenzo Bellini's I Puritani, which is composed up to F5. Normally, such high passages are beyond the vocal compass of modern tenors, raising the question of how tenors in the "primo ottocento" would have coped with such tessitura and extreme high notes.

P2: History. Many tenor roles in the bel canto operas of the early 19th century have an exceptionally high tessitura with notes often well above C5 or D5. The **most popular model** is probably Arturo's arioso "Credeasi misera" from Vincenzo Bellini's I Puritani, which is composed up to F5. Normally, such high passages are beyond the vocal compass of modern tenors, raising the question of how tenors in the "primo ottocento" would have coped with such tessitura and extreme high notes.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **best-known example** and **most popular model** interchangeable (i.e., having the same meaning)?

Pair 898

P1: About a hundred armed men surrounded Augusta Memorial Hospital, where they intended to prevent the escape of any suspect being brought before Mrs. Sherman. On November 12, posses raided black homes early in the morning and took six men to jail. **one group** fired three shots at a black man walking alone on Ninth Street South. A posse raiding a house in Methodist Town, where Evans had lived, found a bloodstained shirt and shoes, which another resident said were Evans'.

P2: About a hundred armed men surrounded Augusta Memorial Hospital, where they intended to prevent the escape of any suspect being brought before Mrs. Sherman. On November 12, posses raided black homes early in the morning and took six men to jail. **a party** fired three shots at a black man walking alone on Ninth Street South. A posse raiding a house in Methodist Town, where Evans had lived, found a bloodstained shirt and shoes, which another resident said were Evans'.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one group** and **a party** interchangeable (i.e., having the same meaning)?

Pair 899

P1: The government's total expenditure as a percentage of GDP ranks among the lowest internationally and allows for a competitive tax regime. Singapore is required under its constitution to keep a balanced budget over each term of government. **Singapore government debt is issued for investment purposes, not to fund expenditure.** Personal income taxes in Singapore range from 0% to 22% for incomes above S\$320,000.

P2: The government's total expenditure as a percentage of GDP ranks among the lowest internationally and allows for a competitive tax regime. Singapore is required under its constitution to keep a balanced budget over each term of government. **Singapore government debt is issued for making capital reasons only, not to fund expenditure.** Personal income taxes in Singapore range from 0% to 22% for incomes above S\$320,000.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **investment purposes** and **making capital reasons only** interchangeable (i.e., having the same meaning)?

Pair 900

P1: Pastries such as croissants or "pain au chocolat" have become increasingly common since the 1990s. Poland. **The traditional Polish breakfast is a large spread with a variety of sides eaten with bread or toast.** Sides include various cold cuts, meat spreads, the Polish sausage kielbasa, tomatoes, cheese, and sliced pickles.

P2: Pastries such as croissants or "pain au chocolat" have become increasingly common since the 1990s. Poland. **The traditional Polish breakfast is a big banquet with a variety of sides eaten with bread or toast.** Sides include various cold cuts, meat spreads, the Polish sausage kielbasa, tomatoes, cheese, and sliced pickles.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **large spread** and **big banquet** interchangeable (i.e., having the same meaning)?

Pair 901

P1: Collyer hosted the show for eleven years (1950–61), and he also co-produced it for part of its run. Collyer did an excellent job keeping the show fast-paced; he spoke quickly and brightly, and was often moving around the stage as much as the contestants. **Frequently Collyer would interrupt a stunt to offer helpful advice, or demonstrate a more**

efficient way to win the game. One of Collyer’s trademarks on the show was securing his long-tubed stage microphone in his armpit (particularly while demonstrating the basics of a stunt for his contestants).

P2: Collyer hosted the show for eleven years (1950–61), and he also co-produced it for part of its run. Collyer did an excellent job keeping the show fast-paced; he spoke quickly and brightly, and was often moving around the stage as much as the contestants. **Frequently Collyer would interrupt a stunt to offer helpful advice, or demonstrate a more adequate mode to win the game.** One of Collyer’s trademarks on the show was securing his long-tubed stage microphone in his armpit (particularly while demonstrating the basics of a stunt for his contestants).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **efficient way** and **adequate mode** interchangeable (i.e., having the same meaning)?

Pair 902

P1: Crime is one of the most urgent concerns facing Mexico, as Mexican drug trafficking rings play a major role in the flow of cocaine, methamphetamine, fentanyl, heroin, and marijuana transiting between Latin America and the United States. **Drug trafficking has led to corruption, which has had a deleterious effect on Mexico’s Federal Representative Republic.** Drug trafficking and organized crime have also been a major source of violent crime in Mexico.

P2: Crime is one of the most urgent concerns facing Mexico, as Mexican drug trafficking rings play a major role in the flow of cocaine, methamphetamine, fentanyl, heroin, and marijuana transiting between Latin America and the United States. **Drug trafficking has led to corruption, which has had a detrimental aftermath on Mexico’s Federal Representative Republic.** Drug trafficking and organized crime have also been a major source of violent crime in Mexico.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **deleterious effect** and **detrimental aftermath** interchangeable (i.e., having the same meaning)?

Pair 903

P1: “Guitar Hero World Tour” features another new controller known as the “Genericaster”. Unlike previous guitar controllers, this is not modeled after a real guitar design, but resembles a Fender Stratocaster, hence its name. **As well as a new shape, it features a longer, quieter strum bar, longer whammy bar, and repositioned start and select/back buttons.** It also features a new, touch sensitive “solo section” on the neck.

P2: “Guitar Hero World Tour” features another new controller known as the “Genericaster”. Unlike previous guitar controllers, this is not modeled after a real guitar design, but resembles a Fender Stratocaster, hence its name. **As well as a contemporary appearance, it features a longer, quieter strum bar, longer whammy bar, and repositioned start and select/back buttons.** It also features a new, touch sensitive “solo section” on the neck.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **new shape** and **contemporary appearance** interchangeable (i.e., having the same meaning)?

Pair 904

P1: On the Mass he published “Proclaim” on the Liturgy of the Word as well as “Crumbs from the Master’s Table” on essential Interior attitudes at the Table of the Eucharist. Next on the list was a study on the Liturgical Year, “The Presence of Jesus in Time” and one on Liturgical Music, “Let’s Sing the Paschal Mystery” (March 2005) which from its very cover page told cantors not to “sing”, unless they had something “relevant and appropriate to sing” for the celebration of the Mass. **Within a few years there were an increasing number of people who were eager to be educated on the new shape of the liturgy.** Ministers of the Word and of Holy Communion were now organized and trained.

P2: On the Mass he published “Proclaim” on the Liturgy of the Word as well as “Crumbs from the Master’s Table” on essential Interior attitudes at the Table of the Eucharist. Next on the list was a study on the Liturgical Year, “The

Presence of Jesus in Time” and one on Liturgical Music, “Let’s Sing the Paschal Mystery” (March 2005) which from its very cover page told cantors not to “sing”, unless they had something “relevant and appropriate to sing” for the celebration of the Mass. Within a few years there were an increasing number of people who were eager to be educated on the current structure of the liturgy. Ministers of the Word and of Holy Communion were now organized and trained.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **new shape** and **current structure** interchangeable (i.e., having the same meaning)?

Pair 905

P1: His pastoral ministry at St. Francis Xavier church Vile Parle was short-lived as he was soon called upon by Cardinal Gracias to teach liturgy and music at the seminary. His grounding in new revised post Vatican II Liturgy came from his Licentiate Studies at Sant Anselmo’s, Rome. When he returned to Bombay, it was his task to educate people on the new shape of the liturgy. He revived the Archdiocesan Liturgy Committee [ALC] and was its Secretary for 30 years.

P2: His pastoral ministry at St. Francis Xavier church Vile Parle was short-lived as he was soon called upon by Cardinal Gracias to teach liturgy and music at the seminary. His grounding in new revised post Vatican II Liturgy came from his Licentiate Studies at Sant Anselmo’s, Rome. When he returned to Bombay, it was his task to educate people on the recent configuration of the liturgy. He revived the Archdiocesan Liturgy Committee [ALC] and was its Secretary for 30 years.

Please record your answer for the following question in the provided Google sheet

Pair 906

P1: While packing to Sturtevant’s Camp, Charley passed through an oak-studded bench above Big Santa Anita Canyon’s bottom at the San Olene Gap. With a reliable spring in adjoining San Olene Canyon (a corruption of the original Santa Oline) and the relatively flat land of an ancient slide, Chantry imagined this to be an ideal site for a small ranch. The details of his official occupation of the flat are unclear, even from John Robinson’s “The San Gabriels”. The 1977 edition suggests that his plans for a home and orchard were thwarted by enactment of the Forest Homestead Act (1906), which forbade such development.

P2: While packing to Sturtevant’s Camp, Charley passed through an oak-studded bench above Big Santa Anita Canyon’s bottom at the San Olene Gap. With a reliable spring in adjoining San Olene Canyon (a corruption of the original Santa Oline) and the relatively flat land of an ancient slide, Chantry imagined this to be an ideal site for a small ranch. The details of his precise job of the flat are unclear, even from John Robinson’s “The San Gabriels”. The 1977 edition suggests that his plans for a home and orchard were thwarted by enactment of the Forest Homestead Act (1906), which forbade such development.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are wrong people and mistaken persons interchangeable (i.e., having the same meaning)?

Pair 910

P1: Superfund designation. Maywood Chemical Company was designated as a Superfund site in 1983. Since the designation, there has been state intervention which has involved community members filing a lawsuit against Stepan Company in 1997. National intervention has involved the U.S. Army Corps of Engineers, who helped with cleanup.

P2: Superfund designation. Maywood Chemical Company was designated as a Superfund site in 1983. Since the designation, there has been national intrusion which has involved community members filing a lawsuit against Stepan Company in 1997. National intervention has involved the U.S. Army Corps of Engineers, who helped with cleanup.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **state intervention** and **national intrusion** interchangeable (i.e., having the same meaning)?

Pair 911

P1: In terms of design, it is said to be an expanded and improved version of the submarine rescue mother ship , and while abolishing the submarine mother ship function, it is strengthening medical equipment. For DSRV operation, the basic configuration of having a moon pool in the center of the hull is the same as the 56AS, but the poop deck has been extended to the vicinity of the bridge structure, and the standard displacement has been increased by 1,800 tons. **As a result, the equipment that was previously stored in the exposed part can now be accommodated inside the ship.** In addition, attention was paid to high-speed cruising ability so that the vessel can quickly advance to the distress site, a bulbous bow was adopted to reduce wave-making resistance, and a ship bottom closing device was installed at the bottom of the center well.

P2: In terms of design, it is said to be an expanded and improved version of the submarine rescue mother ship , and while abolishing the submarine mother ship function, it is strengthening medical equipment. For DSRV operation, the basic configuration of having a moon pool in the center of the hull is the same as the 56AS, but the poop deck has been extended to the vicinity of the bridge structure, and the standard displacement has been increased by 1,800 tons. **As a result, the equipment that was previously stored in the bare portion can now be accommodated inside the ship.** In addition, attention was paid to high-speed cruising ability so that the vessel can quickly advance to the distress site, a bulbous bow was adopted to reduce wave-making resistance, and a ship bottom closing device was installed at the bottom of the center well.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **exposed part** and **bare portion** interchangeable (i.e., having the same meaning)?

Pair 912

P1: Through this association, the Archives receives support for additional staff and equipment, as well as funding for a range of preservation and outreach projects. 1988 Norma (Myers) Riddle becomes the Archives' third director. **The Archives holdings continue their robust growth, adding hundreds of new collections on a range of historical and cultural topics related to southern Appalachia.** Significant additions include: · the papers of the long-serving member of the US House of Representatives James H. Quillen · the Coal Employment Project Papers, which document the struggle for workers' rights for female coal miners · the records of the East Tennessee & Western North Carolina Railroad · unique recorded sound collections including the Mary Elizabeth Barnicle and Tillman Cadle Collection of field recordings (1930s-1950s) and the Stoneman Family Papers.

P2: Through this association, the Archives receives support for additional staff and equipment, as well as funding for a range of preservation and outreach projects. 1988 Norma (Myers) Riddle becomes the Archives' third director. **The Archives holdings continue their potent development, adding hundreds of new collections on a range of historical and cultural topics related to southern Appalachia.** Significant additions include: · the papers of the long-serving member of the US House of Representatives James H. Quillen · the Coal Employment Project Papers, which document the struggle for workers' rights for female coal miners · the records of the East Tennessee & Western North Carolina Railroad · unique recorded sound collections including the Mary Elizabeth Barnicle and Tillman Cadle Collection of field recordings (1930s-1950s) and the Stoneman Family Papers.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **robust growth** and **potent development** interchangeable (i.e., having the same meaning)?

Pair 913

P1: The sets and costumes were designed by Jean Monod. André Charlet directed the choirs and orchestra. **4,250 performers participated in a 15,776-seat arena organized around a large solar clock with four cardinal points indicating the four seasons.** The 1999 Fête des Vignerons took place from 29 July to 15 August.

P2: The sets and costumes were designed by Jean Monod. André Charlet directed the choirs and orchestra. 4,250 performers participated in a 15,776-seat arena organized around a large solar clock with 4 key marks indicating the four seasons. The 1999 Fête des Vignerons took place from 29 July to 15 August.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **four cardinal points** and **4 key marks** interchangeable (i.e., having the same meaning)?

Pair 914

P1: Trulia offers a variety of real estate and neighborhood products and services for consumers and realtors. In addition to its Android and iOS For Sale and Rentals apps, Trulia features: Trulia Neighborhoods. In August 2018, Trulia launched Trulia Neighborhoods to enable home buyers, sellers, and renters to find information about a **particular neighborhood**. The feature provides original photography, drone footage, reviews from local residents, and facts about each area.

P2: Trulia offers a variety of real estate and neighborhood products and services for consumers and realtors. In addition to its Android and iOS For Sale and Rentals apps, Trulia features: Trulia Neighborhoods. In August 2018, Trulia launched Trulia Neighborhoods to enable home buyers, sellers, and renters to find information about a **specific block**. The feature provides original photography, drone footage, reviews from local residents, and facts about each area.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **particular neighborhood** and **specific block** interchangeable (i.e., having the same meaning)?

Pair 915

P1: Mental health. North Korean refugees who resettle in South Korea have been exposed to various forms of traumatic experiences in their home countries before migration. 49-81% of adult North Korean refugees have reported to experiencing or witnessing at **least one type** of traumatic event, directly and/or indirectly. These events include witnessing public executions, starvation, torture, and being sent to a correctional facility.

P2: Mental health. North Korean refugees who resettle in South Korea have been exposed to various forms of traumatic experiences in their home countries before migration. 49-81% of adult North Korean refugees have reported to experiencing or witnessing at **a minimum a kind** of traumatic event, directly and/or indirectly. These events include witnessing public executions, starvation, torture, and being sent to a correctional facility.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **least one type** and **a minimum a kind** interchangeable (i.e., having the same meaning)?

Pair 916

P1: A few species in the genera "Blechnum, Leptopteris, Sadleria" and "Todea" could also be considered tree ferns in a liberal interpretation of the term. Like all ferns, tree ferns reproduce by means of spores developed in sporangia on the undersides of the fronds. The fronds of tree ferns are usually very large and multiple-pinnated, but at **least one type** has entire (undivided) fronds. The fronds of tree ferns also exhibit circinate vernation, meaning the young fronds emerge in coils that uncurl as they grow.

P2: A few species in the genera "Blechnum, Leptopteris, Sadleria" and "Todea" could also be considered tree ferns in a liberal interpretation of the term. The fronds of tree ferns also exhibit circinate vernation, meaning the young fronds emerge in coils that uncurl as they grow.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **least one type** and **a minimum a form** interchangeable (i.e., having the same meaning)?

Pair 917

P1: There were also reports of the insurgents co-opting disabled people as involuntary suicide bombers. Other major locations of suicide attack are Afghanistan (1059 attacks as of mid-2015) and Pakistan (490 attacks). **In the first eight months of 2008, Pakistan overtook Iraq and Afghanistan in suicide bombings, with 28 bombings killing 471 people.** Suicide bombings have become a tactic in Chechnya, first being used in the conflict in 2000 in Alkhan Kala, and spreading to Russia, notably with the Moscow theater hostage crisis in 2002 to the Beslan school hostage crisis in 2004.

P2: There were also reports of the insurgents co-opting disabled people as involuntary suicide bombers. Other major locations of suicide attack are Afghanistan (1059 attacks as of mid-2015) and Pakistan (490 attacks). **In the first eight months of 2008, Pakistan overtook Iraq and Afghanistan in suicide bombings, with 28 bombings killing four hundred seventy individuals plus seventy-one.** Suicide bombings have become a tactic in Chechnya, first being used in the conflict in 2000 in Alkhan Kala, and spreading to Russia, notably with the Moscow theater hostage crisis in 2002 to the Beslan school hostage crisis in 2004.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **471 people** and **four hundred seventy individuals plus seventy-one** interchangeable (i.e., having the same meaning)?

Pair 918

P1: However the species seems adaptable. Populations at the southern edge of their range switched from feeding on ice-associated Arctic cod to warmer-water capelin as ice break-up became earlier. **Dates for egg-laying advanced with the earlier disappearance of ice.** The growth of chicks is slower in years when ice break-up is early relative to egg-laying by the murre.

P2: However the species seems adaptable. Populations at the southern edge of their range switched from feeding on ice-associated Arctic cod to warmer-water capelin as ice break-up became earlier. **Dates for egg-laying advanced with the prior dissipation of ice.** The growth of chicks is slower in years when ice break-up is early relative to egg-laying by the murre.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **earlier disappearance** and **prior dissipation** interchangeable (i.e., having the same meaning)?

Pair 919

P1: The goal of the page is to obtain the visitor's email address; additional information could distract the user or cause them to "click away" to a different website. Navigation and hyperlinks are almost always absent from typical squeeze pages. **The absence of links is used to focus visitors' attention on one choice: register for the email list or leave the site.** Squeeze pages are often used in conjunction with an email autoresponder to begin delivering information as soon as the visitor confirms their email address.

P2: The goal of the page is to obtain the visitor's email address; additional information could distract the user or cause them to "click away" to a different website. Navigation and hyperlinks are almost always absent from typical squeeze pages. **The absence of links is used to focus caller consideration on one choice: register for the email list or leave the site.** Squeeze pages are often used in conjunction with an email autoresponder to begin delivering information as soon as the visitor confirms their email address.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **visitors' attention** and **caller consideration** interchangeable (i.e., having the same meaning)?

Pair 920

P1: In the book he removed several forthwith. Roberts received a mere four pages, and was praised mainly as a "breaker of trails". Carman received **even less space**; Brown saluted "the beauty of his music," but added that his poetry "as a whole is cloying." Of the other Confederation Poets, William Wilfred Campbell was cursorily dismissed as a "minor figure," while F.G. Scott and Pauline Johnson were not mentioned at all.

P2: In the book he removed several forthwith. Roberts received a mere four pages, and was praised mainly as a "breaker of trails". Carman received **increasingly reduced area**; Brown saluted "the beauty of his music," but added that his poetry "as a whole is cloying." Of the other Confederation Poets, William Wilfred Campbell was cursorily dismissed as a "minor figure," while F.G. Scott and Pauline Johnson were not mentioned at all.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **even less space** and **increasingly reduced area** interchangeable (i.e., having the same meaning)?

Pair 921

P1: A ring of holes is pierced into the top with a pin. Parts can be glued with silicone sealant, high-temperature epoxy, or sealed with aluminum (thermal) foil tape, although this is not necessary. Total height is less than two inches (50 mm), though dimensions may be increased to hold more fuel or decreased to take up **even less space**. The choice of aluminium has several advantages—light weight, low cost, and good thermal conductivity to aid vaporization of fuel.

P2: A ring of holes is pierced into the top with a pin. Parts can be glued with silicone sealant, high-temperature epoxy, or sealed with aluminum (thermal) foil tape, although this is not necessary. Total height is less than two inches (50 mm), though dimensions may be increased to hold more fuel or decreased to take up **progressively diminished room**. The choice of aluminium has several advantages—light weight, low cost, and good thermal conductivity to aid vaporization of fuel.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **even less space** and **progressively diminished room** interchangeable (i.e., having the same meaning)?

Pair 922

P1: Deville instead raised the stakes and changed the stipulation of their match to a no disqualification match where the loser leaves WWE. This stipulation change was brought about due to a real life incident involving Deville; her home had been broken into by a stalker in Florida. Her lawyers cited it was not a good idea to have a **shaved head** while in court. Event.

P2: Deville instead raised the stakes and changed the stipulation of their match to a no disqualification match where the loser leaves WWE. This stipulation change was brought about due to a real life incident involving Deville; her home had been broken into by a stalker in Florida. Her lawyers cited it was not a good idea to have a **bald skull** while in court. Event.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **shaved head** and **bald skull** interchangeable (i.e., having the same meaning)?

Pair 923

P1: Property damage and white flight. The property loss caused by the riots was extensive and included damage to 1,199 buildings, including 283 residential and 1,590 commercial units. Losses to at least partially insured properties in the **concentrated area** of looting and destruction were estimated at \$25 million. Insurance covered only 29% of the total loss suffered by these businesses.

P2: Property damage and white flight. The property loss caused by the riots was extensive and included damage to 1,199 buildings, including 283 residential and 1,590 commercial units. Losses to at least partially insured properties in the **thick location** of looting and destruction were estimated at \$25 million. Insurance covered only 29% of the total loss suffered by these businesses.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **concentrated area** and **thick location** interchangeable (i.e., having the same meaning)?

Pair 924

P1: As such, while most major corporations with venture capital arms are keeping cash close to home, some of the first positive movement within corporate venture capital as a whole is coming from healthcare. The new venture fund recently opened by Merck Serono and the fund just closed by Ascension Health Ventures are just a few examples of the optimism that is slowly reentering venture capital within healthcare. The **latest survey** on the top 75 most influential healthcare corporate venture capital divisions shows they are increasingly influential and larger than many independent VCs. Another trend that may see more action as venture capital funds continue to be scarce is an increasing number of strategic partnerships between firms that are based not on exchange of funds, but rather on exchange of technologies or process information.

P2: As such, while most major corporations with venture capital arms are keeping cash close to home, some of the first positive movement within corporate venture capital as a whole is coming from healthcare. The new venture fund recently opened by Merck Serono and the fund just closed by Ascension Health Ventures are just a few examples of the optimism that is slowly reentering venture capital within healthcare. The **most recent inquest** on the top 75 most influential healthcare corporate venture capital divisions shows they are increasingly influential and larger than many independent VCs. Another trend that may see more action as venture capital funds continue to be scarce is an increasing number of strategic partnerships between firms that are based not on exchange of funds, but rather on exchange of technologies or process information.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **latest survey** and **most recent inquest** interchangeable (i.e., having the same meaning)?

Pair 925

P1: Cushinstown Athletic club. Prior to 1972 there was a small soccer club in the locality that catered for the sporting needs of young boys. In order to accommodate girls a **dedicated group** decided in 1972 to start an athletic club. The catchment area of the club includes athletes from Cushinstown, Curraghera, Ardcaith, Rathfeigh, Dueek and north of Ashbourne.

P2: Cushinstown Athletic club. Prior to 1972 there was a small soccer club in the locality that catered for the sporting needs of young boys. In order to accommodate girls a **devoted collection** decided in 1972 to start an athletic club. The catchment area of the club includes athletes from Cushinstown, Curraghera, Ardcaith, Rathfeigh, Dueek and north of Ashbourne.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **dedicated group** and **devoted collection** interchangeable (i.e., having the same meaning)?

Pair 926

P1: The ombudsman is elected for a period of five years and may be re-elected. Consell Jurídic Consultiu. The Legal Advisory Council of the Valencian government is the **supreme branch** of the Consell, Regional Administration, and local governments that consults in legal matters. Debt of the Generalitat.

P2: The ombudsman is elected for a period of five years and may be re-elected. Consell Jurídic Consultiu. The Legal Advisory Council of the Valencian government is the **highest ranking department** of the Consell, Regional Administration, and local governments that consults in legal matters. Debt of the Generalitat.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **supreme branch** and **highest ranking department** interchangeable (i.e., having the same meaning)?

Pair 927

P1: The narrate relates an incident of his youth when a bed fell on his father. The father occasionally slept in the attic where he would think and eventually sleep on an old wooden bed. The house is filled with an **electric range** of family members including a nervous cousin who is afraid of falling asleep and stopping breathing. He shares a room with the narrator who promises the cousin that he will keep an ear open for breathing.

P2: The narrate relates an incident of his youth when a bed fell on his father. The father occasionally slept in the attic where he would think and eventually sleep on an old wooden bed. The house is filled with an **original variety** of family members including a nervous cousin who is afraid of falling asleep and stopping breathing. He shares a room with the narrator who promises the cousin that he will keep an ear open for breathing.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **electric range** and **original variety** interchangeable (i.e., having the same meaning)?

Pair 928

P1: Some early non-production plug-in hybrid electric vehicle conversions have been based on the version of Hybrid Synergy Drive (HSD) found in the 2004 and 2005 model year Toyota Prius. Early Pba conversions by CalCars have demonstrated of ev-only and of double mileage blended mode range. A company planning to offer conversions to consumers named EDrive systems will be using Valence Li-ion batteries and have of **electric range**. Both of these systems leave the existing HSD system mostly unchanged and would be similarly simply to apply to other hybrid powertrain flavors.

P2: Some early non-production plug-in hybrid electric vehicle conversions have been based on the version of Hybrid Synergy Drive (HSD) found in the 2004 and 2005 model year Toyota Prius. Early Pba conversions by CalCars have demonstrated of ev-only and of double mileage blended mode range. A company planning to offer conversions to consumers named EDrive systems will be using Valence Li-ion batteries and have of **magnetic span**. Both of these systems leave the existing HSD system mostly unchanged and would be similarly simply to apply to other hybrid powertrain flavors.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **electric range** and **magnetic span** interchangeable (i.e., having the same meaning)?

Pair 929

P1: Trading Card Game, a player may have a playing deck, an "extra deck" consisting of Fusion Monsters, Synchro Monsters, Xyz Monsters, and Link Monsters and an optional side deck of up to 15 cards. A player may exchange any number of cards between the side deck and the playing or extra deck after each duel, but the number of cards in the side deck after the exchange must be the same as the number of cards before the exchange. Versions of the rules before November 2009 did not allow exchanges between the side deck and the **extra deck**. Players must show each other their

side decks after shuffling and cutting their playing deck, and record the number of cards in the side deck.

P2: Trading Card Game, a player may have a playing deck, an "extra deck" consisting of Fusion Monsters, Synchro Monsters, Xyz Monsters, and Link Monsters and an optional side deck of up to 15 cards. A player may exchange any number of cards between the side deck and the playing or extra deck after each duel, but the number of cards in the side deck after the exchange must be the same as the number of cards before the exchange. **Versions of the rules before November 2009 did not allow exchanges between the side deck and the added.** Players must show each other their side decks after shuffling and cutting their playing deck, and record the number of cards in the side deck.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **extra deck** and **added** interchangeable (i.e., having the same meaning)?

Pair 930

P1: To determine facility needs and costs and benefits, we need to know the number of travelers on each route and link of the network (a route is simply a chain of links between an origin and destination). We need to undertake traffic (or trip) assignment. **Suppose there is a network of highways and transit systems and a proposed addition.** We first want to know the present pattern of traffic delay and then what would happen if the addition were made.

P2: To determine facility needs and costs and benefits, we need to know the number of travelers on each route and link of the network (a route is simply a chain of links between an origin and destination). We need to undertake traffic (or trip) assignment. **Suppose there is a network of highways and transit systems and a projected introduction.** We first want to know the present pattern of traffic delay and then what would happen if the addition were made.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **proposed addition** and **projected introduction** interchangeable (i.e., having the same meaning)?

Pair 931

P1: Background. "Yume ga Chikara" was one of two singles released after Kokia's commercially successful third album, "Remember Me". **During this stage of her career, Kokia had releases that generally charted in the low end of the top 40.** This song was the second official encouragement song picked by the Japanese Olympic Committee, after "" by Japanese band 19 was used for the 2000 Summer Olympics.

P2: Background. "Yume ga Chikara" was one of two singles released after Kokia's commercially successful third album, "Remember Me". **During this stage of her career, Kokia had releases that generally charted in the lower portion of the top 40.** This song was the second official encouragement song picked by the Japanese Olympic Committee, after "" by Japanese band 19 was used for the 2000 Summer Olympics.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **low end** and **lower portion** interchangeable (i.e., having the same meaning)?

Pair 932

P1: The standards are designed such that a certain amount of content will fit on each piece of media, with the best possible quality in terms of size. If more discs are required for sufficient quality, the standard will define the circumstances where it is acceptable to expand to a second or third disc. **Newer video standards moved away from the size constraints and replaced them with a quality based alternative such as the use of CRF.** New codecs are usually tested annually to check if any offer any conclusive enhancement in quality or compression time.

P2: The standards are designed such that a certain amount of content will fit on each piece of media, with the best possible quality in terms of size. If more discs are required for sufficient quality, the standard will define the circumstances where it is acceptable to expand to a second or third disc. **Newer video standards moved away from the proportion limitations and replaced them with a quality based alternative such as the use of CRF.** New codecs are usually tested annually to

check if any offer any conclusive enhancement in quality or compression time.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **size constraints** and **proportion limitations** interchangeable (i.e., having the same meaning)?

Pair 933

P1: Purdah as protection. Some scholars argue that purdah was originally designed to protect women from being harassed and seen as sexual objects. **In contemporary times, some men and women still interpret the purdah as a way to protect women's safety while moving in public sphere.** Observing purdah is also seen as a way to uphold women's honor and virtuous conduct.

P2: Purdah as protection. Some scholars argue that purdah was originally designed to protect women from being harassed and seen as sexual objects. **In contemporary times, some men and women still interpret the purdah as a way to protect female security while moving in public sphere.** Observing purdah is also seen as a way to uphold women's honor and virtuous conduct.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **women's safety** and **female security** interchangeable (i.e., having the same meaning)?

Pair 934

P1: As an invasive species. In the regions where the spotted tilapia has been introduced it is considered invasive. **one main problem with spotted tilapia in their introduced range is that they tend to become the dominant fish in many lakes, rivers and canals.** They have even been found to at times comprise over half of the total fish biomass and therefore, they cause other previously dominant fish populations to decrease.

P2: As an invasive species. In the regions where the spotted tilapia has been introduced it is considered invasive. **a big dilemma with spotted tilapia in their introduced range is that they tend to become the dominant fish in many lakes, rivers and canals.** They have even been found to at times comprise over half of the total fish biomass and therefore, they cause other previously dominant fish populations to decrease.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one main problem** and **a big dilemma** interchangeable (i.e., having the same meaning)?

Pair 935

P1: In some cases, this type of arrangement is needed for boat cruises that do not return to the departure city. In other cases, the traveller wishes to explore between two points and using alternative transport (e.g. **buses, trains, ferries or flights on another ticket**). For example, a traveller might fly from London to Bangkok, travel around Thailand by public transport and fly back home to London from Phuket.

P2: In some cases, this type of arrangement is needed for boat cruises that do not return to the departure city. In other cases, the traveller wishes to explore between two points and using alternative transport (e.g. **buses, trains, ferries or flights on a different passage**). For example, a traveller might fly from London to Bangkok, travel around Thailand by public transport and fly back home to London from Phuket.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **another ticket** and **a different passage** interchangeable (i.e., having the same meaning)?

Pair 936

P1: These biological variations are all based on linear curves based on human fetuses between 9 and 28 weeks of gestation. Co-relation of fetal weight and fetal growth. Body weight, for example, is an **important function** and parameter for growth with respect to gestational age of the fetus. There will be great variations in the body weight of a 16 weeks old fetus.

P2: These biological variations are all based on linear curves based on human fetuses between 9 and 28 weeks of gestation. Co-relation of fetal weight and fetal growth. Body weight, for example, is an **invaluable activity** and parameter for growth with respect to gestational age of the fetus. There will be great variations in the body weight of a 16 weeks old fetus.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **important function** and **invaluable activity** interchangeable (i.e., having the same meaning)?

Pair 937

P1: When in 1649 Coques was commissioned with the decoration of the Oranjezaal in the Huis ten Bosch, the country house in The Hague of the stadholder's widow, Amalia von Solms, he organized for his fellow townsmen such as Pieter Thijs, Justus Danneels and Pieter de Witte II to execute the commission. Coques occasionally worked on garland paintings in which he painted the staffage and the flower or fruit garland was painted by other artists. Garland paintings typically show a flower or fruit garland around a devotional image, portrait or other **religious symbol** (such as the host). Garland paintings were developed in Antwerp in the early 17th century as a special type of still life by the artists Jan Brueghel the Elder and Hendrick van Balen at the request of the Italian cardinal Federico Borromeo.

P2: When in 1649 Coques was commissioned with the decoration of the Oranjezaal in the Huis ten Bosch, the country house in The Hague of the stadholder's widow, Amalia von Solms, he organized for his fellow townsmen such as Pieter Thijs, Justus Danneels and Pieter de Witte II to execute the commission. Garland paintings typically show a flower or fruit garland around a devotional image, portrait or other **divine image** (such as the host). Garland paintings were developed in Antwerp in the early 17th century as a special type of still life by the artists Jan Brueghel the Elder and Hendrick van Balen at the request of the Italian cardinal Federico Borromeo.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **religious symbol** and **divine image** interchangeable (i.e., having the same meaning)?

Pair 938

P1: The amendment was written to block state funding for Catholic schools. However, decades later, the amendment was used for lawsuits against a state program allowing payment for special needs children to attend religious schools of any denomination. The amendment also formed the legal argument for removing the Ten Commandments monument from state property because it was a **religious symbol**. Question 790 was approved for consideration by a bi-partisan vote (39-5 in the Senate and 65-7 in the House).

P2: The amendment was written to block state funding for Catholic schools. However, decades later, the amendment was used for lawsuits against a state program allowing payment for special needs children to attend religious schools of any denomination. The amendment also formed the legal argument for removing the Ten Commandments monument from state property because it was a **theological figure**. Question 790 was approved for consideration by a bi-partisan vote (39-5 in the Senate and 65-7 in the House).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **religious symbol** and **theological figure** interchangeable (i.e., having the same meaning)?

Pair 939

P1: At age 16, her family moved to Houston, Texas where she graduated from Klein High School. Scott fell in love and "followed a boy" to Texas A&M University, which she attended for one year before dropping out to move to Austin, Texas at age 19 to help with her ill stepfather. Scott opened her first business, the **hat box**, which specializes in comfortable hats designed for women going through chemotherapy treatment. Scott sold "comfortable but stylish" pieces and donated a portion of the proceeds to cancer research.

P2: At age 16, her family moved to Houston, Texas where she graduated from Klein High School. Scott fell in love and "followed a boy" to Texas A&M University, which she attended for one year before dropping out to move to Austin, Texas at age 19 to help with her ill stepfather. Scott opened her first business, the **hat carton**, which specializes in comfortable hats designed for women going through chemotherapy treatment. Scott sold "comfortable but stylish" pieces and donated a portion of the proceeds to cancer research.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **hat box** and **hat carton** interchangeable (i.e., having the same meaning)?

Pair 940

P1: The PSTN versions of these applications are frequently known as 800 numbers in North America. The subscriber has to explicitly place a call to the application server. Application server applications are of two general types, those that are signaling only, and those that involve **media manipulation**. The former are often related to routing resolution – local number portability, free-call routing, and other services where the dialed number must be translated to a routable address.

P2: The PSTN versions of these applications are frequently known as 800 numbers in North America. The subscriber has to explicitly place a call to the application server. Application server applications are of two general types, those that are signaling only, and those that involve **news administration**. The former are often related to routing resolution – local number portability, free-call routing, and other services where the dialed number must be translated to a routable address.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **media manipulation** and **news administration** interchangeable (i.e., having the same meaning)?

Pair 941

P1: Cap guns were originally made of cast iron, but after World War II were made of zinc alloy, and most newer models are made of plastic. Model guns are Japanese full-size toy guns that highly replicate the appearance, design, and operation of the real ones but cannot shoot any projectile. It comes as either ignition models (a very **sophisticated type** of cap guns) or non-ignition dummy models. Both are subject to the strict Japanese Gun Control Law for identification and to prevent possible modification.

P2: Cap guns were originally made of cast iron, but after World War II were made of zinc alloy, and most newer models are made of plastic. Model guns are Japanese full-size toy guns that highly replicate the appearance, design, and operation of the real ones but cannot shoot any projectile. It comes as either ignition models (a very **refined style** of cap guns) or non-ignition dummy models. Both are subject to the strict Japanese Gun Control Law for identification and to prevent possible modification.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **sophisticated type** and **refined style** interchangeable (i.e., having the same meaning)?

Pair 942

P1: Resonant magnetic power transfer was pioneered by Nikola Tesla. Some of his later Tesla coils use a loosely coupled resonant magnetic power system. The lower coil was energised, and this **transferred power** via magnetic resonance to the resonant top coil where the high voltage was generated. This was predominantly done to avoid arcing and permit

higher voltages.

P2: Resonant magnetic power transfer was pioneered by Nikola Tesla. Some of his later Tesla coils use a loosely coupled resonant magnetic power system. The lower coil was energised, and this **relocated capacity** via magnetic resonance to the resonant top coil where the high voltage was generated. This was predominantly done to avoid arcing and permit higher voltages.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **transferred power** and **relocated capacity** interchangeable (i.e., having the same meaning)?

Pair 943

P1: Yuan Ang (Chinese: 袁盎, "Yuán Àng"; died 148 BC) was a Han minister who served the emperors Wen and Jing. His biography appears in the "Records of the Grand Historian" and a **parallel one** is included in the "Book of Han". During the Rebellion of the Seven States, he had advised Emperor Jing to execute Chao Cuo, with whom he was at loggerheads with.

P2: Yuan Ang (Chinese: 袁盎, "Yuán Àng"; died 148 BC) was a Han minister who served the emperors Wen and Jing. His biography appears in the "Records of the Grand Historian" and a **similar biography** is included in the "Book of Han". During the Rebellion of the Seven States, he had advised Emperor Jing to execute Chao Cuo, with whom he was at loggerheads with.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **parallel one** and **similar biography** interchangeable (i.e., having the same meaning)?

Pair 944

P1: Rather, motivation ebbs and flows, depending on many factors including the day, the topic, or the context, constantly changing over time. Vision, according to Dörnyei, is the highest-order of motivation, a goal combined with an imagined future reality, capable of overcoming these natural ebbs and flows, transforming action and engagement into long term effort. Directed motivational currents (DMCs) are intense and enduring motivational pathways, surges of energy people experience when pursuing a **personal goal** or vision. These Directed Motivational Currents spur focused and sustained action and are energy-producing, not energy-draining.

P2: Rather, motivation ebbs and flows, depending on many factors including the day, the topic, or the context, constantly changing over time. Vision, according to Dörnyei, is the highest-order of motivation, a goal combined with an imagined future reality, capable of overcoming these natural ebbs and flows, transforming action and engagement into long term effort. Directed motivational currents (DMCs) are intense and enduring motivational pathways, surges of energy people experience when pursuing a **distinctive aim** or vision. These Directed Motivational Currents spur focused and sustained action and are energy-producing, not energy-draining.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **personal goal** and **distinctive aim** interchangeable (i.e., having the same meaning)?

Pair 945

P1: The television series allowed interpersonal issues to be addressed more in depth. "The idea was to create a television show that exists as much more of a soap opera, or an exploration of human beings," said Berg in an interview, "than as a chronicle of a football team's pursuit of glory." The series was filmed partly in Austin, and a call went out for **local football players** to play part roles in the show. In an attempt to maintain an authentic Texas environment, elements were incorporated from local society.

P2: The television series allowed interpersonal issues to be addressed more in depth. "The idea was to create a television show that exists as much more of a soap opera, or an exploration of human beings," said Berg in an interview, "than as a chronicle of a football team's pursuit of glory." The series was filmed partly in Austin, and a call went out for

community soccer to play part roles in the show. In an attempt to maintain an authentic Texas environment, elements were incorporated from local society.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **local football players** and **community soccer** interchangeable (i.e., having the same meaning)?

Pair 946

P1: The gang later spotted three Malay teens walking along Boat Quay, and presuming the youths as members of the rival gang, the Salakau, led by their 21-year-old gang leader Norhisham bin Mohamad Dahlan (born on 18 May 1980), went to attack the three youths and began to grievously assault one of them, leading to the unfortunate teen's death while the two others boys (one of whom was stabbed on the back by a gang member) managed to escape to inform the police. Autopsy results showed that the boy was stabbed a total of 13 times, with two separate fatal knife wounds on his neck and chest. **The three teenagers whom the Salakau gang attacked, they were in fact not gang members but local football players** belonging to National U-18 team. It was a case of mistaken identity.

P2: The gang later spotted three Malay teens walking along Boat Quay, and presuming the youths as members of the rival gang, the Salakau, led by their 21-year-old gang leader Norhisham bin Mohamad Dahlan (born on 18 May 1980), went to attack the three youths and began to grievously assault one of them, leading to the unfortunate teen's death while the two others boys (one of whom was stabbed on the back by a gang member) managed to escape to inform the police. Autopsy results showed that the boy was stabbed a total of 13 times, with two separate fatal knife wounds on his neck and chest. **The three teenagers whom the Salakau gang attacked, they were in fact not gang members but nearby football teammates** belonging to National U-18 team. It was a case of mistaken identity.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **local football players** and **nearby football teammates** interchangeable (i.e., having the same meaning)?

Pair 947

P1: History. Applied behavior analysis is the applied side of the experimental analysis of behavior. **It is based on the principles of operant and respondent conditioning and represents a major approach** to behavior therapies. Its origin can be traced back to Teodoro Ayllon and Jack Michael's 1959 article "The psychiatric nurse as a behavioral engineer" as well as to initial efforts to implement teaching machines.

P2: History. Applied behavior analysis is the applied side of the experimental analysis of behavior. **It is based on the principles of operant and respondent conditioning and represents a main path** to behavior therapies. Its origin can be traced back to Teodoro Ayllon and Jack Michael's 1959 article "The psychiatric nurse as a behavioral engineer" as well as to initial efforts to implement teaching machines.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **major approach** and **main path** interchangeable (i.e., having the same meaning)?

Pair 948

P1: But after President Warren G. Harding was trapped in a three-hour traffic jam on the Highway Bridge while on his way to dedicate the Tomb of the Unknown Soldier on November 11, 1921, Harding began pushing Congress to move on constructing a new bridge. Congress approved funding for design work on June 12, 1922, and authorized construction of the Arlington Memorial Bridge on February 24, 1925. **The 1925 legislation specified that B Street NW be treated as a major approach** to Arlington Memorial Bridge. Several design problems presented themselves.

P2: But after President Warren G. Harding was trapped in a three-hour traffic jam on the Highway Bridge while on his way to dedicate the Tomb of the Unknown Soldier on November 11, 1921, Harding began pushing Congress to move on constructing a new bridge. Congress approved funding for design work on June 12, 1922, and authorized construction of

the Arlington Memorial Bridge on February 24, 1925. The 1925 legislation specified that B Street NW be treated as a **vital advance** to Arlington Memorial Bridge. Several design problems presented themselves.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **major approach** and **vital advance** interchangeable (i.e., having the same meaning)?

Pair 949

P1: He could use a day on matters other more practical persons finished in a couple of hours. He was eager to learn dance-tunes, and turned them around in his own way, making them longer and richer than before. Thus, he laid the ground for a **brand new way** of playing the hardanger fiddle in Telemark. Living conditions.

P2: He could use a day on matters other more practical persons finished in a couple of hours. He was eager to learn dance-tunes, and turned them around in his own way, making them longer and richer than before. Thus, he laid the ground for a **state-of-the-art manner** of playing the hardanger fiddle in Telemark. Living conditions.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **brand new way** and **state-of-the-art manner** interchangeable (i.e., having the same meaning)?

Pair 950

P1: Railway station. The ill-fated construction of the new railway station which was supposed to replace the old one in Savamala has lasted for decades. The **official work** began in 1977, it was halted in the 1980s, resumed in the 1990s and halted again in 2000. Originally, in the late 1960s, it was supposed to be constructed near the present interchange of Autokomanda, but the idea was suddenly dropped, and one of the major authorities at the time, Branko Žeželj, picked Prokop instead, which ultimately left the Autokomanda interchange unfinished.

P2: Railway station. The ill-fated construction of the new railway station which was supposed to replace the old one in Savamala has lasted for decades. The **formal labor** began in 1977, it was halted in the 1980s, resumed in the 1990s and halted again in 2000. Originally, in the late 1960s, it was supposed to be constructed near the present interchange of Autokomanda, but the idea was suddenly dropped, and one of the major authorities at the time, Branko Žeželj, picked Prokop instead, which ultimately left the Autokomanda interchange unfinished.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **official work** and **formal labor** interchangeable (i.e., having the same meaning)?

Pair 951

P1: Unity of Churches. The main principle of the Paris Basis is expressed: The Young Men's Christian Associations seek to unite those young men who, regarding Jesus Christ as their God and Saviour, according to the Holy Scriptures, desire to be his disciples in their faith and in their life and to associate their efforts for the extension of His Kingdom amongst young men. The **main principle** of the Paris Basis is often stated as the entire basis and the preamble and other articles are omitted. There are two versions of the Paris Basis, one in French and one in English.

P2: Unity of Churches. The main principle of the Paris Basis is expressed: The Young Men's Christian Associations seek to unite those young men who, regarding Jesus Christ as their God and Saviour, according to the Holy Scriptures, desire to be his disciples in their faith and in their life and to associate their efforts for the extension of His Kingdom amongst young men. The **principal precept** of the Paris Basis is often stated as the entire basis and the preamble and other articles are omitted. There are two versions of the Paris Basis, one in French and one in English.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **main principle** and **principal precept** interchangeable (i.e., having the same meaning)?

Pair 952

P1: The Canada Flight Supplement is made up of seven sections: Legal requirements. Carrying "current aeronautical charts and publications covering the route of the proposed flight and any probable diversionary route" is a requirement under CAR 602.60 (1) (b) for night VFR, VFR over-the-top and instrument flight rules (IFR) flights. This Canadian Aviation Regulation (CAR) does not specifically require carriage of a copy of the CFS, but that is **one way** to satisfy the regulation. NOTAMs.

P2: The Canada Flight Supplement is made up of seven sections: Legal requirements. Carrying "current aeronautical charts and publications covering the route of the proposed flight and any probable diversionary route" is a requirement under CAR 602.60 (1) (b) for night VFR, VFR over-the-top and instrument flight rules (IFR) flights. This Canadian Aviation Regulation (CAR) does not specifically require carriage of a copy of the CFS, but that is **a means** to satisfy the regulation. NOTAMs.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one way** and **a means** interchangeable (i.e., having the same meaning)?

Pair 953

P1: Alan Thomas was the first person to study the music of Tokelau in 1980s and submit a Master of Arts thesis on "fatele" in 1986. The venue, which is popular for holding music and dance performances, is known as "fiafia" or festival held at the meeting house where villagers congregate and the music groups arrange themselves according to their village affiliation known as (sides or halves). The performances are held in an atmosphere of fun and humor and are conducted till the elders in the **group order** it be stopped. Song and dance.

P2: Alan Thomas was the first person to study the music of Tokelau in 1980s and submit a Master of Arts thesis on "fatele" in 1986. The venue, which is popular for holding music and dance performances, is known as "fiafia" or festival held at the meeting house where villagers congregate and the music groups arrange themselves according to their village affiliation known as (sides or halves). The performances are held in an atmosphere of fun and humor and are conducted till the elders in the **association command** it be stopped. Song and dance.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **group order** and **association command** interchangeable (i.e., having the same meaning)?

Pair 954

P1: They also selected Hassan Whiteside, with the 33rd pick of the 2010 NBA draft. Despite the excellent play of Cousins and Evans, both of whom were front-runners in Rookie of the Year voting and received All-Rookie First Team honors, the Kings still ranked near the bottom of the NBA, going 25–57 in Evans' rookie year, and 24–58 in Cousins' rookie year. Much of this was due to the **poor fit** of the roster around Evans and Cousins, and the uninspired coaching of Westphal. The 2010–11 season was marked with uncertainty towards the end of the season.

P2: They also selected Hassan Whiteside, with the 33rd pick of the 2010 NBA draft. Despite the excellent play of Cousins and Evans, both of whom were front-runners in Rookie of the Year voting and received All-Rookie First Team honors, the Kings still ranked near the bottom of the NBA, going 25–57 in Evans' rookie year, and 24–58 in Cousins' rookie year. Much of this was due to the **bad arrangement** of the roster around Evans and Cousins, and the uninspired coaching of Westphal. The 2010–11 season was marked with uncertainty towards the end of the season.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **poor fit** and **bad arrangement** interchangeable (i.e., having the same meaning)?

Pair 955

P1: However, it is generally not as looked down upon for females to play with toys designed "for boys", an activity which has also become more common in recent years. Fathers are also more likely to reinforce typical play and discourage atypical play than mothers are. A study done by researcher Susan Witt suggests that stereotypes are oftentimes only strengthened by the environment, which perpetuates them to linger in older life. This stereotypical attribution of sex-typical toys for girls and boys is gradually changing, with toys companies creating more gender neutral toys, as the benefits associated with allowing children to play with toys that appeal to them far outweighs controlling their individual preferences.

P2: However, it is generally not as looked down upon for females to play with toys designed "for boys", an activity which has also become more common in recent years. Fathers are also more likely to reinforce typical play and discourage atypical play than mothers are. A study done by researcher Susan Witt suggests that stereotypes are oftentimes only strengthened by the environment, which perpetuates them to linger in later time. This stereotypical attribution of sex-typical toys for girls and boys is gradually changing, with toys companies creating more gender neutral toys, as the benefits associated with allowing children to play with toys that appeal to them far outweighs controlling their individual preferences.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **older life** and **later time** interchangeable (i.e., having the same meaning)?

Pair 956

P1: He recalls one instance of discovering a security flaw on the website of the Los Alamos National Laboratory. He called the lab to notify them of this and later received a call from a man thanking him and offering a job once he turned 18. Toward the end of his freshman year at Arundel High School, Snowden's parents were getting divorced and sold their crofton house. He moved into his mother's condo near Ellicott City.

P2: He recalls one instance of discovering a security flaw on the website of the Los Alamos National Laboratory. He called the lab to notify them of this and later received a call from a man thanking him and offering a job once he turned 18. Toward the end of his freshman year at Arundel High School, Snowden's parents were getting divorced and sold their crofton estate. He moved into his mother's condo near Ellicott City.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **crofton house** and **crofton estate** interchangeable (i.e., having the same meaning)?

Pair 957

P1: Barefoot running can be dangerous, especially to runners who do not adequately prepare or give their feet time to adapt to the new style. Many injuries are possible, such as injuries to the Achilles tendon or plantar fascia, or stress fractures in the metatarsal bones or lower leg. Barefoot runners who do not prepare their bodies could provide, "a stimulus plan for podiatrists, orthopedists, and physical therapists." The official position on barefoot running by the American Podiatric Medical Association states that there is not enough research on the immediate- and long-term benefits of the practice and that individuals should consult a podiatrist with a strong background in sports medicine to make an informed decision on all aspects of their running and training programs.

P2: Barefoot running can be dangerous, especially to runners who do not adequately prepare or give their feet time to adapt to the new style. Many injuries are possible, such as injuries to the Achilles tendon or plantar fascia, or stress fractures in the metatarsal bones or lower leg. Barefoot runners who do not prepare their bodies could provide, "a provocation proposition for podiatrists, orthopedists, and physical therapists." The official position on barefoot running by the American Podiatric Medical Association states that there is not enough research on the immediate- and long-term benefits of the practice and that individuals should consult a podiatrist with a strong background in sports medicine to make an informed decision on all aspects of their running and training programs.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **stimulus plan** and **provocation proposition** interchangeable (i.e., having the same meaning)?

Pair 958

P1: The CART series held the first American open wheel racing events at the circuit from 1979–1981. It was held during the waning years of the Formula One United States Grand Prix. At the time the popular track was starting to lose some of its image, and by 1981, fell into bankruptcy. The Formula One race was cancelled for 1981, and for that year, the CART race took over its traditional October date.

P2: The CART series held the first American open wheel racing events at the circuit from 1979–1981. It was held during the waning years of the Formula One United States Grand Prix. At the time the well-liked course was starting to lose some of its image, and by 1981, fell into bankruptcy. The Formula One race was cancelled for 1981, and for that year, the CART race took over its traditional October date.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are popular track and well-liked course interchangeable (i.e., having the same meaning)?

Pair 959

P1: The Society was intended to preserve slavery, rather than eliminate it. In the words of philanthropist Gerrit Smith, it was "quite as much an Anti-Abolition, as Colonization Society". "This Colonization Society had, by an invisible process, half conscious, half unconscious, been transformed into a serviceable organ and member of the Slave Power." The alternative to the colonization of Africa, project of the American Colonization Society, was the total and immediate abolition of slavery in the United States.

P2: The Society was intended to preserve slavery, rather than eliminate it. In the words of philanthropist Gerrit Smith, it was "quite as much an Anti-Abolition, as Colonization Society". "This Colonization Society had, by an inconspicuous undertaking, half conscious, half unconscious, been transformed into a serviceable organ and member of the Slave Power." The alternative to the colonization of Africa, project of the American Colonization Society, was the total and immediate abolition of slavery in the United States.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are invisible process and inconspicuous undertaking interchangeable (i.e., having the same meaning)?

Pair 960

P1: As a result of the weakened corneodesmosomes in the outer skin surface, the uppermost layers of corneocytes get exfoliated through frictional forces such as rubbing or washing. This process is a normal protective mechanism of the skin to prevent pathogens from colonizing the skin, and is referred to as desquamation. In healthy skin, desquamation is an invisible process and the stratum corneum is turned over completely within 2–4 weeks, while maintaining the tissue thickness. Dry skin (xerosis).

P2: As a result of the weakened corneodesmosomes in the outer skin surface, the uppermost layers of corneocytes get exfoliated through frictional forces such as rubbing or washing. This process is a normal protective mechanism of the skin to prevent pathogens from colonizing the skin, and is referred to as desquamation. In healthy skin, desquamation is an unseen procedure and the stratum corneum is turned over completely within 2–4 weeks, while maintaining the tissue thickness. Dry skin (xerosis).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are invisible process and unseen procedure interchangeable (i.e., having the same meaning)?

Pair 961

P1: Initial reports stated that the group was making a comeback in early 2017. However, due to member Solji's hyperthyroidism diagnosis, comeback plans were rescheduled for a spring of 2017 release. Banana Culture confirmed plans for an April comeback with no confirmation date, stating that the members were considering returning as a four-member group. On March 20, 2017, it was officially announced that the group would be making a comeback as a four-member group with LE, Junghwa, Hani and Hyerin on April 10.

P2: Initial reports stated that the group was making a comeback in early 2017. However, due to member Solji's hyperthyroidism diagnosis, comeback plans were rescheduled for a spring of 2017 release. Banana Culture confirmed plans for an April comeback with no affirmation day or time, stating that the members were considering returning as a four-member group. On March 20, 2017, it was officially announced that the group would be making a comeback as a four-member group with LE, Junghwa, Hani and Hyerin on April 10.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are confirmation date and affirmation day or time interchangeable (i.e., having the same meaning)?

Pair 962

P1: The records from Smičiklas book "Codex diplomaticus regni Croatiae Dalmatiae et Slavoniae" on page 398-th to 399-th, in the text of 10 December 1398. in Knin. Where it is mentioned so far the first known written record of the surname Mlinarić (Mlinarich). Therefore, it is assumed that this nobility is much older than confirmation date (M. Miklos 1621.-th, Mlinarics 1650-th and Mlinari 1655-th). Kačić clan.

P2: The records from Smičiklas book "Codex diplomaticus regni Croatiae Dalmatiae et Slavoniae" on page 398-th to 399-th, in the text of 10 December 1398. in Knin. Where it is mentioned so far the first known written record of the surname Mlinarić (Mlinarich). Therefore, it is assumed that this nobility is much older than authorized time period (M. Miklos 1621.-th, Mlinarics 1650-th and Mlinari 1655-th). Kačić clan.

Question: In both passages, are confirmation date and authorized time period interchangeable (i.e., having the same meaning)?

Pair 963

P1: Some experts believe that emetophobia may be linked to worries about lack of control. Many people try to control themselves and their environment in every possible way, but vomiting is difficult or impossible to control which can lead to anxiety or in other cases severe anxiety. There are many factors that can cause a legitimate case of emetophobia. Dr. Angela L. Davidson "et al".

P2: Some experts believe that emetophobia may be linked to worries about lack of control. Many people try to control themselves and their environment in every possible way, but vomiting is difficult or impossible to control which can lead to anxiety or in other cases severe anxiety. There are many factors that can cause a true manifestation of emetophobia. Dr. Angela L. Davidson "et al".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are legitimate case and true manifestation interchangeable (i.e., having the same meaning)?

Pair 964

P1: According to news reports it ceased operations in December 2013 and laid off all employees. Business trends. The key trends for Danube Wings were as shown below (although, because it was a private company, few figures were

publicly available). Figures as at year ending 31 December: Destinations.

P2: According to news reports it ceased operations in December 2013 and laid off all employees. Business trends. The **main shift** for Danube Wings were as shown below (although, because it was a private company, few figures were publicly available). Figures as at year ending 31 December: Destinations.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **key trends** and **main shift** interchangeable (i.e., having the same meaning)?

Pair 965

P1: A large number of both Early and High Gothic church murals can be found in the churches on Gotland, which experienced a period of economic growth in 1250–1350, and in Scania, where many older churches were rebuilt and equipped with brick vaults in the 14th century. In many murals on Gotland, e.g. those in Vamlingbo Church, a **particularly strong influence** from Westphalian contemporary art, Byzantinesque in style, has been noted. Although both Early and High Gothic murals in Scania remained conservative and stylistically close to Romanesque art, some new subjects, such as the Wheel of Fortune, were introduced.

P2: A large number of both Early and High Gothic church murals can be found in the churches on Gotland, which experienced a period of economic growth in 1250–1350, and in Scania, where many older churches were rebuilt and equipped with brick vaults in the 14th century. In many murals on Gotland, e.g. those in Vamlingbo Church, a **notably powerful part** from Westphalian contemporary art, Byzantinesque in style, has been noted. Although both Early and High Gothic murals in Scania remained conservative and stylistically close to Romanesque art, some new subjects, such as the Wheel of Fortune, were introduced.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **particularly strong influence** and **notably powerful part** interchangeable (i.e., having the same meaning)?

Pair 966

P1: The modern natural horsemanship movement, though not originally described as such, developed primarily in the United States Pacific Northwest and Rocky Mountain states, where the "buckaroo" or "vaquero"-style cowboy tradition was the strongest. Brothers Tom and Bill Dorrance were early modern practitioners, who had background in the Great Basin buckaroo tradition. They had a **particularly strong influence** on Ray Hunt, who in turn became a significant influence upon Buck Brannaman. Many practitioners claim influence from the Dorrance brothers and Hunt, some having trained directly with these individuals.

P2: The modern natural horsemanship movement, though not originally described as such, developed primarily in the United States Pacific Northwest and Rocky Mountain states, where the "buckaroo" or "vaquero"-style cowboy tradition was the strongest. Brothers Tom and Bill Dorrance were early modern practitioners, who had background in the Great Basin buckaroo tradition. They had a **specifically robust impact** on Ray Hunt, who in turn became a significant influence upon Buck Brannaman. Many practitioners claim influence from the Dorrance brothers and Hunt, some having trained directly with these individuals.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **particularly strong influence** and **specifically robust impact** interchangeable (i.e., having the same meaning)?

Pair 967

P1: This recipe has become popular lately because papaya is added to it which provides a different flavor and taste compared to the regular gajar ka halwa. "Red velvet carrot halwa" is another famous variation of the gajar ka halwa. It is made by heating a **comparatively large amount** of milk cream along with carrots, sugar, rose water and saffron

over low flame. Red velvet carrot halwa is also a very good source of Vitamin A and Calcium.

P2: This recipe has become popular lately because papaya is added to it which provides a different flavor and taste compared to the regular gajar ka halwa. "Red velvet carrot halwa" is another famous variation of the gajar ka halwa. It is made by heating a relatively big quantity of milk cream along with carrots, sugar, rose water and saffron over low flame. Red velvet carrot halwa is also a very good source of Vitamin A and Calcium.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are comparatively large amount and relatively big quantity interchangeable (i.e., having the same meaning)?

Pair 968

P1: Roberts cites a study which found that Black women were ten times more likely to be reported to law enforcement for drug usage than white women, despite marginally higher drug usage amongst white women. Finally, Roberts outlines initiatives to change the treatment of black women in America, writing that reproductive justice cannot occur without addressing racial oppression. She critiques liberalism for its focus on individual access to reproductive technologies over broader socioeconomic disparities. Roberts believes that money spent on in vitro fertilisation could be better redirected to improve reproductive rights of a greater number of women.

P2: Roberts cites a study which found that Black women were ten times more likely to be reported to law enforcement for drug usage than white women, despite marginally higher drug usage amongst white women. Finally, Roberts outlines initiatives to change the treatment of black women in America, writing that reproductive justice cannot occur without addressing racial oppression. She critiques liberalism for its focus on people's ability to obtain to reproductive technologies over broader socioeconomic disparities. Roberts believes that money spent on in vitro fertilisation could be better redirected to improve reproductive rights of a greater number of women.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **similar activity** and **comparable movement** interchangeable (i.e., having the same meaning)?

Pair 976

P1: Summerhill is a subway station on the Yonge–University line in Toronto, Ontario, Canada. **It is located on Shaftesbury Avenue just east of Yonge Street, with the entrance being at the north end of the train platforms.** The station opened in 1954 as part of the original Yonge line.

P2: Summerhill is a subway station on the Yonge–University line in Toronto, Ontario, Canada. **It is located on Shaftesbury Avenue just east of Yonge Street, with the entrance being at the north end of the locomotive stage.** The station opened in 1954 as part of the original Yonge line.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **train platforms** and **locomotive stage** interchangeable (i.e., having the same meaning)?

Pair 977

P1: Children's Aid works with the biological and foster parents to "achieve permanency". "From the mid-1800s to the eve of the Great Depression, orphan train children were placed with families who pre-selected them with an order form, specifying age, gender, hair and eye color. In other cases, trainloads of children were assembled on stages, **train platforms** or town halls and examined by prospective parents." Conjuring the image of picking the best apple from the bin.

P2: Children's Aid works with the biological and foster parents to "achieve permanency". "From the mid-1800s to the eve of the Great Depression, orphan train children were placed with families who pre-selected them with an order form, specifying age, gender, hair and eye color. In other cases, trainloads of children were assembled on stages, **railway carriage stands** or town halls and examined by prospective parents." Conjuring the image of picking the best apple from the bin.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **train platforms** and **railway carriage stands** interchangeable (i.e., having the same meaning)?

Pair 978

P1: As well as counting for standings in national and international gaming leagues such as the CPL there are regular events such as QuakeCon in which the very best players from around the world compete against one another, much like in popular sports. Practice matches are usually held prior to a match so competitors can get a rough idea of what they are up against. **often case** modders and overclockers attend these events to display their computers, which otherwise would be seen by few. Some come just to display their computers and look at others' computers.

P2: As well as counting for standings in national and international gaming leagues such as the CPL there are regular events such as QuakeCon in which the very best players from around the world compete against one another, much like in popular sports. Practice matches are usually held prior to a match so competitors can get a rough idea of what they are up against. **frequent occasion** modders and overclockers attend these events to display their computers, which otherwise would be seen by few. Some come just to display their computers and look at others' computers.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **often case** and **frequent occasion** interchangeable (i.e., having the same meaning)?

Pair 979

P1: For specifying the branch, that is, defining which value of the multivalued function is considered at each point, one generally define it at a particular point, and deduce the value everywhere in the domain of definition of the principal value by analytic continuation. When possible, it is better to define the principal value directly—without referring to analytic continuation. For example, for the square root, the **principal value** is defined as the square root that has a positive real part. This defines a single valued analytic function, which is defined everywhere, except for non-positive real values of the variables (where the two square roots have a zero real part).

P2: For specifying the branch, that is, defining which value of the multivalued function is considered at each point, one generally define it at a particular point, and deduce the value everywhere in the domain of definition of the principal value by analytic continuation. When possible, it is better to define the principal value directly—without referring to analytic continuation. For example, for the square root, the **main numerical amount** is defined as the square root that has a positive real part. This defines a single valued analytic function, which is defined everywhere, except for non-positive real values of the variables (where the two square roots have a zero real part).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **principal value** and **main numerical amount** interchangeable (i.e., having the same meaning)?

Pair 980

P1: The New Zealand standard for school stationery (known formally as NZS 8132:1984 - Specification for school stationery) was established in 1984 by the 'Standards Association Ltd', New Zealand's national standards body. It specifies various types of stationery to ensure that different manufacturers produce compatible products of **suitable quality**. Standardisation enables schools and businesses to request or order appropriate stationery without regard for brand.

P2: The New Zealand standard for school stationery (known formally as NZS 8132:1984 - Specification for school stationery) was established in 1984 by the 'Standards Association Ltd', New Zealand's national standards body. It specifies various types of stationery to ensure that different manufacturers produce compatible products of **acceptable character**. Standardisation enables schools and businesses to request or order appropriate stationery without regard for brand.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **suitable quality** and **acceptable character** interchangeable (i.e., having the same meaning)?

Pair 981

P1: "Nine Laments" () is one of the 17 major sections of the ancient Chinese poetry collection "Chu ci", also known as "The Songs of the South" or "The Songs of Chu". The "Nine Laments" consists of nine verses, each with an **individual name**, and each with a main part, paired with a concluding "lament". The "Nine Laments" is one of the several collections of poems grouped under the title of "Nine" something-or-others, which do not necessarily consist of 9 pieces of poetry.

P2: "Nine Laments" () is one of the 17 major sections of the ancient Chinese poetry collection "Chu ci", also known as "The Songs of the South" or "The Songs of Chu". The "Nine Laments" consists of nine verses, each with an **original designation**, and each with a main part, paired with a concluding "lament". The "Nine Laments" is one of the several collections of poems grouped under the title of "Nine" something-or-others, which do not necessarily consist of 9 pieces of poetry.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **individual name** and **original designation** interchangeable (i.e., having the same meaning)?

Pair 982

P1: Very similar trends for amino acids with a high (G, A, P, S, Q) and low (M, V, L, I, W, F, R, C) occurrence within LCRs have been observed in eukaryotes as well. This observed pattern of certain amino acids being over-represented (enriched for) or under-represented in LCRs could be partially explained by the energy cost for synthesis or metabolism of each of the amino acids. Another possible explanation, which does not exclude the **previous explanation** of energy cost could be the reactivity of certain amino acids. For example, Cysteine is a very reactive amino acid that would not be tolerated in high numbers within a small region of a protein.

P2: Very similar trends for amino acids with a high (G, A, P, S, Q) and low (M, V, L, I, W, F, R, C) occurrence within LCRs have been observed in eukaryotes as well. This observed pattern of certain amino acids being over-represented (enriched for) or under-represented in LCRs could be partially explained by the energy cost for synthesis or metabolism of each of the amino acids. Another possible explanation, which does not exclude the **prior account** of energy cost could be the reactivity of certain amino acids. For example, Cysteine is a very reactive amino acid that would not be tolerated in high numbers within a small region of a protein.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **previous explanation** and **prior account** interchangeable (i.e., having the same meaning)?

Pair 983

P1: Small investors have little effect but large mutual funds and hedge funds can determine the minute-to-minute pricing of stocks through supply and demand (Cramer, 2005, p. 96). Watching whether a stock is trending up or down can be a sure sign as to sell or buy in the short run. This is called the **moving average** or the average price of a stock over a specific period of time. As a stock is trending upward throughout a day or two it could be an opportunity for gains and as a stock trends downward it could be a great opportunity to short the stock.

P2: Small investors have little effect but large mutual funds and hedge funds can determine the minute-to-minute pricing of stocks through supply and demand (Cramer, 2005, p. 96). Watching whether a stock is trending up or down can be a sure sign as to sell or buy in the short run. This is called the **climbing standard** or the average price of a stock over a specific period of time. As a stock is trending upward throughout a day or two it could be an opportunity for gains and as a stock trends downward it could be a great opportunity to short the stock.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **moving average** and **climbing standard** interchangeable (i.e., having the same meaning)?

Pair 984

P1: At Turn 5, Biaggi slides past Bayliss on his Repsol Honda and takes third place. He however runs a bit wide exiting the fast bend, allowing the Australian to get back at him and retain his spot. Lap three and Rossi has pulled a **big gap** to Bayliss, who is starting to form a small train of riders behind him. Hayden still leads at the front.

P2: At Turn 5, Biaggi slides past Bayliss on his Repsol Honda and takes third place. He however runs a bit wide exiting the fast bend, allowing the Australian to get back at him and retain his spot. Lap three and Rossi has pulled a **wide break** to Bayliss, who is starting to form a small train of riders behind him. Hayden still leads at the front.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **big gap** and **wide break** interchangeable (i.e., having the same meaning)?

Pair 985

P1: MagtiCom renders various services to up to 3 million customers by means of 50 customer care offices and 85 Outlets in Community Centers. Unprecedented is the contribution of the Company to the development of Georgian economy: 2.085.523.806 lari; May 2021. Since 2016 MagtiCom has become an ISP and, as a result, a provider of **total range** of communications services. Since November, 2017 Magticom is the market leader ISP operator in Georgia.

P2: MagtiCom renders various services to up to 3 million customers by means of 50 customer care offices and 85 Outlets in Community Centers. Unprecedented is the contribution of the Company to the development of Georgian economy: 2.085.523.806 lari; May 2021. Since 2016 MagtiCom has become an ISP and, as a result, a provider of **complete variety** of communications services. Since November, 2017 Magticom is the market leader ISP operator in Georgia.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **total range** and **complete variety** interchangeable (i.e., having the same meaning)?

Pair 986

P1: The loose footed spritsail was suited to river work. The rig has the advantage of allowing a high stack of deck cargo. The entire sail can be quickly brailed to the mast, allowing **unimpeded access** to the deck and hold when loading and unloading. Barges are unballasted and, if overpressed, will heel excessively and must be pulled to wind.

P2: The loose footed spritsail was suited to river work. The rig has the advantage of allowing a high stack of deck cargo. The entire sail can be quickly brailed to the mast, allowing **unhampered entry** to the deck and hold when loading and unloading. Barges are unballasted and, if overpressed, will heel excessively and must be pulled to wind.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **unimpeded access** and **unhampered entry** interchangeable (i.e., having the same meaning)?

Pair 987

P1: To make matters worse, Ed seemed to be more concerned for Holly, and later Elaine "Lainie" Marler, Justin and Ross' younger sister (who had been a victim of a hit-and-run while training for a marathon), making Rita feel all the more neglected. She started having an affair with a former boyfriend from high school, Dr. Greg Fairbanks, who had just relocated to Springfield. Fairbanks was also dating Rita's younger sister Eve at the time, though **neither sister** initially knew that he was seeing the other. (Eve had just divorced her husband, artist Ben McFarren.)

P2: To make matters worse, Ed seemed to be more concerned for Holly, and later Elaine "Lainie" Marler, Justin and Ross' younger sister (who had been a victim of a hit-and-run while training for a marathon), making Rita feel all the more neglected. She started having an affair with a former boyfriend from high school, Dr. Greg Fairbanks, who had just relocated to Springfield. Fairbanks was also dating Rita's younger sister Eve at the time, though **none of the siblings** initially knew that he was seeing the other. (Eve had just divorced her husband, artist Ben McFarren.)

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **neither sister** and **none of the siblings** interchangeable (i.e., having the same meaning)?

Pair 988

P1: In addition, the idea of scientific development stresses on scientific discovery and technological advance, engines for sustainable growth in the long run. Sustainable growth is a concept in macroeconomics that signifies GDP at potential (i.e. **all that is produced is being consumed and there is no cyclical unemployment**) for years to come. In addition, the Socialist Harmonious Society concept was a response to the problem of social inequality/ wealth gap, which if not dealt with immediately, could lead to social unrest and even turmoil.

P2: In addition, the idea of scientific development stresses on scientific discovery and technological advance, engines for sustainable growth in the long run. Sustainable growth is a concept in macroeconomics that signifies GDP at potential (i.e. **all that is produced is being consumed and there is no periodic lack of work**) for years to come. In addition, the Socialist Harmonious Society concept was a response to the problem of social inequality/ wealth gap, which if not dealt with immediately, could lead to social unrest and even turmoil.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **cyclical unemployment** and **periodic lack of work** interchangeable (i.e., having the same meaning)?

Pair 989

P1: Like her predecessor, Joaquín Almunia, Vestager has since been focusing on state aid cases. Within a few months in the office, she brought antitrust charges against Google; Almunia had initially opened the investigation into Google in 2010, and had reached a settlement deal with Google by 2014 but was unable to convince the European Commission to accept it before his term ended. Vestager inherited Almunia's case but has shown **greater desire** to continue pursuing Google/Alphabet over the alleged antitrust violations. Also, she initiated investigations into the tax affairs of Fiat,

Starbucks, Amazon.com and Apple Inc. under competition rules.

P2: Like her predecessor, Joaquín Almunia, Vestager has since been focusing on state aid cases. Within a few months in the office, she brought antitrust charges against Google; Almunia had initially opened the investigation into Google in 2010, and had reached a settlement deal with Google by 2014 but was unable to convince the European Commission to accept it before his term ended. Vestager inherited Almunia's case but has shown **enhanced inclination** to continue pursuing Google/Alphabet over the alleged antitrust violations. Also, she initiated investigations into the tax affairs of Fiat, Starbucks, Amazon.com and Apple Inc. under competition rules.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **greater desire** and **enhanced inclination** interchangeable (i.e., having the same meaning)?

Pair 990

P1: Bill Allen provided the commentary. About 300 people in the New York City area saw the Rangers win, 6-2. Over the next few years, W2XBS (later WNBT) carried some New York Rangers home games on a **local basis**. A few New York Americans and Rangers games were on experimental TV stations in 1940-41 and 1941-42; then TV closed down until 1945-46.

P2: Bill Allen provided the commentary. About 300 people in the New York City area saw the Rangers win, 6-2. Over the next few years, W2XBS (later WNBT) carried some New York Rangers home games on a **regional source**. A few New York Americans and Rangers games were on experimental TV stations in 1940-41 and 1941-42; then TV closed down until 1945-46.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **local basis** and **regional source** interchangeable (i.e., having the same meaning)?

Pair 991

P1: He is best known for the so-called Baines Note, a list of accusations against the poet and playwright Christopher Marlowe, which has been described by Paul Kocher as the "master key to the mind of Marlowe" and that "for revolutionary impact and scope it stands alone, an extraordinary document in the history of free thought". Early life and education. Nothing is known about where and when Baines was born, but 1554 would seem to be a **reasonable estimate** for the latter. The first mention we have of him is his matriculation in November 1568 as a pensioner at Christ's College, Cambridge.

P2: He is best known for the so-called Baines Note, a list of accusations against the poet and playwright Christopher Marlowe, which has been described by Paul Kocher as the "master key to the mind of Marlowe" and that "for revolutionary impact and scope it stands alone, an extraordinary document in the history of free thought". Early life and education. Nothing is known about where and when Baines was born, but 1554 would seem to be a **feasible guess** for the latter. The first mention we have of him is his matriculation in November 1568 as a pensioner at Christ's College, Cambridge.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **reasonable estimate** and **feasible guess** interchangeable (i.e., having the same meaning)?

Pair 992

P1: Opening. The finishing year would be 1983. The active members of the observatory finished beside the self built dome **also a large part** of the interior design. The eventual opening was in 1984.

P2: Opening. The finishing year would be 1983. The active members of the observatory finished beside the self built dome **a big added piece** of the interior design. The eventual opening was in 1984.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **also a large part** and **a big added piece** interchangeable (i.e., having the same meaning)?

Pair 993

P1: The first probe intended to be a Mars impact lander was the Soviet "Mars 1962B", unsuccessfully launched in 1962. In 1970 the Soviet Union began the design of "Mars 4NM" and "Mars 5NM" missions with super-heavy uncrewed Martian spacecraft. First was "Marsokhod", with a **planned date** of early 1973, and second was the Mars sample return mission planned for 1975. Both spacecraft were intended to be launched on the "N1" rocket, but this rocket never flew successfully and the Mars 4NM and Mars 5NM projects were cancelled.

P2: The first probe intended to be a Mars impact lander was the Soviet "Mars 1962B", unsuccessfully launched in 1962. In 1970 the Soviet Union began the design of "Mars 4NM" and "Mars 5NM" missions with super-heavy uncrewed Martian spacecraft. First was "Marsokhod", with a **programmed time frame** of early 1973, and second was the Mars sample return mission planned for 1975. Both spacecraft were intended to be launched on the "N1" rocket, but this rocket never flew successfully and the Mars 4NM and Mars 5NM projects were cancelled.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **planned date** and **programmed time frame** interchangeable (i.e., having the same meaning)?

Pair 994

P1: The lime industry is now part of the Craven industrial heritage. The quarry and lime-kiln closed in 1931 as a result of falling sales due to outside competition; the kiln was fired-up again in 1937 but closed permanently in 1939. In 1951, arrangements to demolish the chimney were thwarted when it fell down of its own accord on the day before the **planned date**. Landmarks.

P2: The lime industry is now part of the Craven industrial heritage. The quarry and lime-kiln closed in 1931 as a result of falling sales due to outside competition; the kiln was fired-up again in 1937 but closed permanently in 1939. In 1951, arrangements to demolish the chimney were thwarted when it fell down of its own accord on the day before the **prospective time**. Landmarks.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **planned date** and **prospective time** interchangeable (i.e., having the same meaning)?

Pair 995

P1: What ensues brings both characters together and changes both of their lives forever in ways they could never have guessed or imagined. Themes. Friendship plays an **interesting role** in each of the characters' own personal story. For the majority of his story, Will Grayson 1 and Tiny Cooper have a scattered friendship, with visible cracks from the mistakes that Will has made in his past.

P2: What ensues brings both characters together and changes both of their lives forever in ways they could never have guessed or imagined. Themes. Friendship plays an **appealing part** in each of the characters' own personal story. For the majority of his story, Will Grayson 1 and Tiny Cooper have a scattered friendship, with visible cracks from the mistakes that Will has made in his past.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **interesting role** and **appealing part** interchangeable (i.e., having the same meaning)?

Pair 996

P1: The purpose is to reduce the possibility of an "ai-uchi" (simultaneous strike, usually resulting in mutual death), which often occurs harmlessly in kendo (whoever the judges believe struck the earliest gets the points), but is generally undesirable in actual combat. Other kamae (positions). **Some other kamae are: All of them have a hidari () left and migi () right version.** When indicated, hidari or migi will be prefixed to the stance, e.g.

P2: The purpose is to reduce the possibility of an "ai-uchi" (simultaneous strike, usually resulting in mutual death), which often occurs harmlessly in kendo (whoever the judges believe struck the earliest gets the points), but is generally undesirable in actual combat. Other kamae (positions). **Some other kamae are: All of them have a hidari () left and migi () opposite to left type.** When indicated, hidari or migi will be prefixed to the stance, e.g.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **right version** and **opposite to left type** interchangeable (i.e., having the same meaning)?

Pair 997

P1: His program "Jazz Classics" airs each Saturday night on WABE from 8 pm to 2 am; the program began in 1978. The program always begins with the Father Tom Vaughn version of "The Battle Hymn of the Republic" and usually ends with a version of "I'll Be Seeing You." **At midnight, Johnson plays a weekly selection of "just the right version" of "Round Midnight."** In the fall of 2013 the station introduced a second program hosted by him, "Blues Classics," on Friday evenings.

P2: His program "Jazz Classics" airs each Saturday night on WABE from 8 pm to 2 am; the program began in 1978. The program always begins with the Father Tom Vaughn version of "The Battle Hymn of the Republic" and usually ends with a version of "I'll Be Seeing You." **At midnight, Johnson plays a weekly selection of "just the correct kind" of "Round Midnight."** In the fall of 2013 the station introduced a second program hosted by him, "Blues Classics," on Friday evenings.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **right version** and **correct kind** interchangeable (i.e., having the same meaning)?

Pair 998

P1: Overall signal size does not affect encoder accuracy, however, signal-to-noise and jitter performance may degrade with smaller signals. Automatic signal compensation mechanisms can include "automatic offset compensation (AOC), automatic balance compensation (ABC) and automatic gain control (AGC)". **Phase is more difficult to compensate dynamically and is usually applied as one time compensation during installation or calibration.** Other forms of inaccuracy include signal distortion (frequently harmonic distortion of the sine/cosine signals).

P2: Overall signal size does not affect encoder accuracy, however, signal-to-noise and jitter performance may degrade with smaller signals. Automatic signal compensation mechanisms can include "automatic offset compensation (AOC), automatic balance compensation (ABC) and automatic gain control (AGC)". **Phase is more difficult to compensate dynamically and is usually applied as once only allowance during installation or calibration.** Other forms of inaccuracy include signal distortion (frequently harmonic distortion of the sine/cosine signals).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one time compensation** and **once only allowance** interchangeable (i.e., having the same meaning)?

Pair 999

P1: In such a situation, it is generally left to the authority to evaluate the meaning of the term. This is illustrated by "Puhlhofer v. Hillingdon London Borough Council" (1986), which involved a public authority that bore a statutory responsibility for providing homeless people with accommodation. **The applicants were a married couple who lived with their two children in a single room in a guest house.** Their application for permanent accommodation was rejected

because the authority claimed they were not "homeless" within the meaning of the statute.

P2: In such a situation, it is generally left to the authority to evaluate the meaning of the term. This is illustrated by "Puhlhofer v. Hillingdon London Borough Council" (1986), which involved a public authority that bore a statutory responsibility for providing homeless people with accommodation. The applicants were a married couple who lived with their two children in a one bedroom in a guest house. Their application for permanent accommodation was rejected because the authority claimed they were not "homeless" within the meaning of the statute.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **single room** and **one bedroom** interchangeable (i.e., having the same meaning)?

Pair 1000

P1: Indeed, for a while, things do progress as they did but eventually Mrs. Wickens drugs the children and they sleep, as Mr. Wickens starts a fire in the library beneath the nursery. Tom, the gardener's boy, attempts to rescue them and manages to climb up the outside of the house to the nursery window. By now the fire has taken a **firm hold** and Jamie cannot get into the house, to effect a rescue from below. Just as he's losing heart, Mr. Blunden appears, takes him by the hand and leads him through the flames.

P2: Indeed, for a while, things do progress as they did but eventually Mrs. Wickens drugs the children and they sleep, as Mr. Wickens starts a fire in the library beneath the nursery. Tom, the gardener's boy, attempts to rescue them and manages to climb up the outside of the house to the nursery window. By now the fire has taken a **tight grip** and Jamie cannot get into the house, to effect a rescue from below. Just as he's losing heart, Mr. Blunden appears, takes him by the hand and leads him through the flames.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **firm hold** and **tight grip** interchangeable (i.e., having the same meaning)?

Pair 1001

P1: They allegedly passed it around and took it home, potentially exposing dozens to toxic mercury vapors. Health officials conducted air quality tests. Fourteen classrooms had mercury vapor levels higher than the **recommended level** by the Environmental Protection Agency. The officials recovered most of the mercury from the boy's house buried in his backyard.

P2: They allegedly passed it around and took it home, potentially exposing dozens to toxic mercury vapors. Health officials conducted air quality tests. Fourteen classrooms had mercury vapor levels higher than the **approved amount** by the Environmental Protection Agency. The officials recovered most of the mercury from the boy's house buried in his backyard.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **recommended level** and **approved amount** interchangeable (i.e., having the same meaning)?

Pair 1002

P1: Accessing personal location data has been raised as a severe privacy concern, even with personal permission. Therefore, privacy-aware management of location information has been identified as an essential challenge, which is designed to provide privacy protection against abuse of location information. The overall idea of preserving location privacy is to introduce **enough noise** and quantization to reduce the chances of successful attacks. Spatial crowdsourcing uses devices that has GPS (global positioning system) and collects information.

P2: Accessing personal location data has been raised as a severe privacy concern, even with personal permission. Therefore, privacy-aware management of location information has been identified as an essential challenge, which is designed to provide privacy protection against abuse of location information. The overall idea of preserving location privacy is

to introduce **sufficient commotion** and quantization to reduce the chances of successful attacks. Spatial crowdsourcing uses devices that has GPS (global positioning system) and collects information.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **enough noise** and **sufficient commotion** interchangeable (i.e., having the same meaning)?

Pair 1003

P1: Quicc! was a concept car and a planned series of electric cars, by DuraCar from Heerlen, Netherlands. **Company bankruptcy in 2009 derailed the latter plan**, and the concept car design never entered production. QUICC!

P2: Quicc! was a concept car and a planned series of electric cars, by DuraCar from Heerlen, Netherlands. **Company bankruptcy in 2009 derailed the following idea**, and the concept car design never entered production. QUICC!

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **latter plan** and **following idea** interchangeable (i.e., having the same meaning)?

Pair 1004

P1: In October 2016, the government announced the formation of a reference group to formulate a strategy for the over 237 in store at Newport Workshops. In 2018, the results of the condition audit were published as part of the Daniel Andrews State Government's "Retired Trams Strategy". **The audit found there was 237 W-class trams in storage in 2018, with most not in a suitable condition** for tourist operations. Of the 237, 17 were operational for use on the City Circle line or the Colonial Tramcar Restaurant, 25 were in good overall condition and suitable for W8 upgrading, six were privately owned, 11 had historical significance, 20 were former Transporting Art trams, and 24 were of poor or incomplete condition but suitable for donors and spares.

P2: In October 2016, the government announced the formation of a reference group to formulate a strategy for the over 237 in store at Newport Workshops. In 2018, the results of the condition audit were published as part of the Daniel Andrews State Government's "Retired Trams Strategy". **The audit found there was 237 W-class trams in storage in 2018, with most not in a satisfactory state** for tourist operations. Of the 237, 17 were operational for use on the City Circle line or the Colonial Tramcar Restaurant, 25 were in good overall condition and suitable for W8 upgrading, six were privately owned, 11 had historical significance, 20 were former Transporting Art trams, and 24 were of poor or incomplete condition but suitable for donors and spares.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **suitable condition** and **satisfactory state** interchangeable (i.e., having the same meaning)?

Pair 1005

P1: Viscous dampers connect deep reinforced concrete outriggers from the central core of each building to the perimeter columns at one level. The added damping so derived, in excess of 6% of critical controls wind-induced motions, achieving occupant comfort objectives, and reduces the design wind overturning moment by a factor of 1.7. **Not only is this a lower-cost solution, it is also more sustainable as it uses less material, and leaves more valuable space** inside the building. Reductions in the quantities of concrete and reinforcing steel in the St Francis Towers structure due to the incorporation of the Arup damping system and performance based seismic design saved the building's developer in excess of \$5 million in construction cost and more net floor space (through smaller columns and core walls, and no need for space for TMDs).

P2: Viscous dampers connect deep reinforced concrete outriggers from the central core of each building to the perimeter columns at one level. The added damping so derived, in excess of 6% of critical controls wind-induced motions, achieving occupant comfort objectives, and reduces the design wind overturning moment by a factor of 1.7. **Not only is this a lower-cost solution, it is also more sustainable as it uses less material, and leaves more usable room** inside the building. Reductions in the quantities of concrete and reinforcing steel in the St Francis Towers structure due to the incorporation

of the Arup damping system and performance based seismic design saved the building's developer in excess of \$5 million in construction cost and more net floor space (through smaller columns and core walls, and no need for space for TMDs).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **valuable space** and **usable room** interchangeable (i.e., having the same meaning)?

Pair 1006

P1: Two of the T boats were had their bow external tubes omitted during reconstruction: "Thunderbolt" (ex-"Thetis") and "Triumph". Prior to the outbreak of war, there had been much debate over the introduction of stern torpedo tubes on British submarines. The effectiveness of a two-torpedo stern salvo was considered to be doubtful, and these tubes would take up **valuable space** on the submarine. However, combat experience soon led to complaints from British submarine commanders like Commander Miers ("Torbay") about the lack of stern torpedo tubes.

P2: Two of the T boats were had their bow external tubes omitted during reconstruction: "Thunderbolt" (ex-"Thetis") and "Triumph". Prior to the outbreak of war, there had been much debate over the introduction of stern torpedo tubes on British submarines. The effectiveness of a two-torpedo stern salvo was considered to be doubtful, and these tubes would take up **precious territory** on the submarine. However, combat experience soon led to complaints from British submarine commanders like Commander Miers ("Torbay") about the lack of stern torpedo tubes.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **valuable space** and **precious territory** interchangeable (i.e., having the same meaning)?

Pair 1007

P1: Polymorphism of celsian. There are four distinctive polymorphs of celsian, two of them are the natural minerals and the other two are synthetic products. The first are paracelsian and celsian, the **second ones** are hexacelsian and the other one is related to the mineral cymrite (Lin and foster, 1967). The order of increasing stability is paracelsian→hexacelsian→celsian in a temperature range between 500 °C to the 1000 °C.

P2: Polymorphism of celsian. There are four distinctive polymorphs of celsian, two of them are the natural minerals and the other two are synthetic products. The first are paracelsian and celsian, the **additional pieces** are hexacelsian and the other one is related to the mineral cymrite (Lin and foster, 1967). The order of increasing stability is paracelsian→hexacelsian→celsian in a temperature range between 500 °C to the 1000 °C.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **second ones** and **additional pieces** interchangeable (i.e., having the same meaning)?

Pair 1008

P1: At the western end is Bank Place, a significant old lane which provides pedestrian access to Collins Street between Queen Street and William Street. The block between Queen Street and William Street has a large number of weekday cafes. The section between Swanston Street and Elizabeth Street adjoins several lanes and arcades, with an **extensive array** of shops and cafes. Shopping.

P2: At the western end is Bank Place, a significant old lane which provides pedestrian access to Collins Street between Queen Street and William Street. The block between Queen Street and William Street has a large number of weekday cafes. The section between Swanston Street and Elizabeth Street adjoins several lanes and arcades, with an **expanded cluster** of shops and cafes. Shopping.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **extensive array** and **expanded cluster** interchangeable (i.e., having the same meaning)?

Pair 1009

P1: In March 2011, WPD applied to Cardiff County Council for planning permission for a mini-roundabout on Lisvane Road and listed building consent to alter the structure of the reservoir. Both of these were called in by the Welsh Government. During the appeal a number of changes to the **original appeal** were submitted by WPD and accepted by all parties. The appeal was heard during the Summer of 2011.

P2: In March 2011, WPD applied to Cardiff County Council for planning permission for a mini-roundabout on Lisvane Road and listed building consent to alter the structure of the reservoir. Both of these were called in by the Welsh Government. During the appeal a number of changes to the **first reconsideration** were submitted by WPD and accepted by all parties. The appeal was heard during the Summer of 2011.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **original appeal** and **first reconsideration** interchangeable (i.e., having the same meaning)?

Pair 1010

P1: It was built by Ravensett Properties Limited, and opened in 1974. Refurbished and partially extended in 1998 it comprises 330,000 sq. ft. on a **single level**, it was sold by Land Securities to Catalyst European Property Fund LP in 2010. In 2017, an acid attack involving a noxious substance took place at the centre.

P2: It was built by Ravensett Properties Limited, and opened in 1974. Refurbished and partially extended in 1998 it comprises 330,000 sq. ft. on a **one story**, it was sold by Land Securities to Catalyst European Property Fund LP in 2010. In 2017, an acid attack involving a noxious substance took place at the centre.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **single level** and **one story** interchangeable (i.e., having the same meaning)?

Pair 1011

P1: "I'm really excited about it," he said. "It's the high point of my life these days." In 1981 he said "the film will probably not exist at a **single level** of reality. It may be three movies."

P2: "I'm really excited about it," he said. "It's the high point of my life these days." In 1981 he said "the film will probably not exist at a **specific degree** of reality. It may be three movies."

Question: In both passages, are **single level** and **specific degree** interchangeable (i.e., having the same meaning)?

Pair 1012

P1: The group was formed through the website Craigslist, where bandmembers Alex Robins and Matt Sartain (guitar and vocals) posted an advertisement titled "Wanna Form a Sweet Country Rock Band?". They recruited fellow vocalist Lindsay Garfield from a listing she had written looking for a guitar player, and from there recruited bandmates Julie Ann Thomasson on keyboards and vocals, Justin Fantl on bass, Jesse Hunt on drums, and Tim Marcus on pedal steel guitar. Or, The Whale released their debut album, "**light poles** and Pines", in 2007 independently (in 2009 it was reissued on Seany Records). Their debut single "Call and Response" received airplay on over 135 radio stations, reaching No.

P2: The group was formed through the website Craigslist, where bandmembers Alex Robins and Matt Sartain (guitar and vocals) posted an advertisement titled "Wanna Form a Sweet Country Rock Band?". They recruited fellow vocalist Lindsay Garfield from a listing she had written looking for a guitar player, and from there recruited bandmates Julie

Ann Thomasson on keyboards and vocals, Justin Fantl on bass, Jesse Hunt on drums, and Tim Marcus on pedal steel guitar. Or, The Whale released their debut album, "illumination posts and Pines", in 2007 independently (in 2009 it was reissued on Seany Records). Their debut single "Call and Response" received airplay on over 135 radio stations, reaching No.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **light poles** and **illumination posts** interchangeable (i.e., having the same meaning)?

Pair 1013

P1: Bulk transfers in the United States (U.S.) were generally governed by Article 6 of the Uniform Commercial Code (UCC). However, Article 6 has now been repealed by most states, in favor of revisions to other provisions of the UCC that apply to sales and secured transactions. The sale of an **entire inventory** is not a bulk sale if it is sold to buyers in a manner that ensures adequate consideration. For example, if a merchant holds an auction sale for the entire contents of the business and the sale is in good faith, the buyer is not required to comply with bulk sales legislation.

P2: Bulk transfers in the United States (U.S.) were generally governed by Article 6 of the Uniform Commercial Code (UCC). However, Article 6 has now been repealed by most states, in favor of revisions to other provisions of the UCC that apply to sales and secured transactions. The sale of an **integrated catalog** is not a bulk sale if it is sold to buyers in a manner that ensures adequate consideration. For example, if a merchant holds an auction sale for the entire contents of the business and the sale is in good faith, the buyer is not required to comply with bulk sales legislation.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **entire inventory** and **integrated catalog** interchangeable (i.e., having the same meaning)?

Pair 1014

P1: There is some evidence that pets can facilitate social interaction. Assistant Professor of Sociology at the University of Colorado at Boulder, Leslie Irvine has focused her attention on pets of the homeless population. Her studies of pet ownership among the homeless found that many modify their **life activities** for fear of losing their pets. Pet ownership prompts them to act responsibly, with many making a deliberate choice not to drink or use drugs, and to avoid contact with substance abusers or those involved in any criminal activity for fear of being separated from their pet.

P2: There is some evidence that pets can facilitate social interaction. Assistant Professor of Sociology at the University of Colorado at Boulder, Leslie Irvine has focused her attention on pets of the homeless population. Her studies of pet ownership among the homeless found that many modify their **day-to-day movements** for fear of losing their pets. Pet ownership prompts them to act responsibly, with many making a deliberate choice not to drink or use drugs, and to avoid contact with substance abusers or those involved in any criminal activity for fear of being separated from their pet.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **life activities** and **day-to-day movements** interchangeable (i.e., having the same meaning)?

Pair 1015

P1: Major Hunt directed the charge at the Battle of Mine Creek when Confederate General John S. Marmaduke was captured and Confederate General Sterling Price was defeated. Additionally, Major Hunt served as Chief of Artillery under General Samuel Curtis at the Battle of Westport and was wounded by "being hit in the head by a piece of an exploding Confederate shell." For his contributions during this battle, **major hunt** was breveted lieutenant-colonel. In 1872, Colonel Hunt was elected the mayor of Kansas City, Missouri, serving one year.

P2: Major Hunt directed the charge at the Battle of Mine Creek when Confederate General John S. Marmaduke was captured and Confederate General Sterling Price was defeated. Additionally, Major Hunt served as Chief of Artillery under General Samuel Curtis at the Battle of Westport and was wounded by "being hit in the head by a piece of an

exploding Confederate shell.” For his contributions during this battle, **officer hunt** was breveted lieutenant-colonel. In 1872, Colonel Hunt was elected the mayor of Kansas City, Missouri, serving one year.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **major hunt** and **officer hunt** interchangeable (i.e., having the same meaning)?

Pair 1016

P1: Academics. In spring 2010 Juan Seguin High School narrowly missed TEA requirements to be named a Recognized school. The school was 1% low in **one sub**-population in mathematics. Since, Seguin has notably improved academic performance every year, working toward the credentials of a premiere school.

P2: Academics. In spring 2010 Juan Seguin High School narrowly missed TEA requirements to be named a Recognized school. The school was 1% low in **an alternate**-population in mathematics. Since, Seguin has notably improved academic performance every year, working toward the credentials of a premiere school.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one sub** and **an alternate** interchangeable (i.e., having the same meaning)?

Pair 1017

P1: In it, Schneur Zalman brings the new interpretations of Jewish mysticism by the Baal Shem Tov, founder of Hasidism, into philosophical articulation and definition. This intellectual form synthesises Hasidic Divine Omnipresence and Jewish soulfulness with other historical components of Rabbinic literature, embodied in the Talmud, Medieval philosophy, Musar (ethical) literature and Lurianic Kabbalah. The Tanya has therefore been seen in Chabad as the defining Hasidic text, and a **subsequent stage** of Jewish mystical evolution. Background to the Chabad approach.

P2: In it, Schneur Zalman brings the new interpretations of Jewish mysticism by the Baal Shem Tov, founder of Hasidism, into philosophical articulation and definition. This intellectual form synthesises Hasidic Divine Omnipresence and Jewish soulfulness with other historical components of Rabbinic literature, embodied in the Talmud, Medieval philosophy, Musar (ethical) literature and Lurianic Kabbalah. The Tanya has therefore been seen in Chabad as the defining Hasidic text, and a **successive phase** of Jewish mystical evolution. Background to the Chabad approach.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **subsequent stage** and **successive phase** interchangeable (i.e., having the same meaning)?

Pair 1018

P1: During the second stage of the project, the three companies were funded to conduct further studies to “provide the Army with information upon which to base realistic vehicle requirements” and consider the extent of Australian content in the vehicles. The studies would include further consideration of whether the vehicles should be tracked or wheeled, and what engines and armament should be fitted. It was planned that the **subsequent stage** of the project would involve a tender seeking formal proposals to design and build the new vehicles. This scoping work was completed in early 1983.

P2: During the second stage of the project, the three companies were funded to conduct further studies to “provide the Army with information upon which to base realistic vehicle requirements” and consider the extent of Australian content in the vehicles. The studies would include further consideration of whether the vehicles should be tracked or wheeled, and what engines and armament should be fitted. It was planned that the **ensuing step** of the project would involve a tender seeking formal proposals to design and build the new vehicles. This scoping work was completed in early 1983.

Question: In both passages, are **23rd year** and **23 year** interchangeable (i.e., having the same meaning)?

Pair 1026

P1: The disadvantage of this approach was that for any given amount of gun power, the shadow mask filtered out the majority of the signal. To ensure there was no overlap of the signal on the screen, the dots had to be separated and covered perhaps 25% of its surface. This led to very dim images, requiring **much greater power** in order to provide a useful picture. Moreover, the system was highly dependent on the relative angles of the beams between the three guns, which required constant adjustment by the user to ensure the guns hit the correct colors.

P2: The disadvantage of this approach was that for any given amount of gun power, the shadow mask filtered out the majority of the signal. To ensure there was no overlap of the signal on the screen, the dots had to be separated and covered perhaps 25% of its surface. This led to very dim images, requiring **increased intensity** in order to provide a useful picture. Moreover, the system was highly dependent on the relative angles of the beams between the three guns, which required constant adjustment by the user to ensure the guns hit the correct colors.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **much greater power** and **increased intensity** interchangeable (i.e., having the same meaning)?

Pair 1027

P1: He says for example that the ratio 2:1, and number in general, is the cause of the octave. Efficient. The efficient cause of a thing is the **primary agency** by which its matter took its form. For example, the efficient cause of a baby is a parent of the same species and that of a table is a carpenter, who knows the form of the table.

P2: He says for example that the ratio 2:1, and number in general, is the cause of the octave. Efficient. The efficient cause of a thing is the **essential company** by which its matter took its form. For example, the efficient cause of a baby is a parent of the same species and that of a table is a carpenter, who knows the form of the table.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **primary agency** and **essential company** interchangeable (i.e., having the same meaning)?

Pair 1028

P1: The Catholic Church states that its opposition to abortion follows from a belief that human life begins at conception and that "human life must be respected and protected absolutely from the moment of conception." Accordingly, it opposes procedures whose purpose is to destroy an embryo or fetus for whatever motive (even before implantation), but admits acts, such as chemotherapy or hysterectomy of a pregnant woman who has cervical cancer, which indirectly result in the death of the fetus. The Church holds that "the **first right** of the human person is his life" and that life is assumed to begin at fertilization. As such, Canon 1398 provides that "a person who procures a successful abortion incurs an automatic (latae sententiae) excommunication" from the Church, which can only be removed when that individual seeks penance and obtains absolution.

P2: The Catholic Church states that its opposition to abortion follows from a belief that human life begins at conception and that "human life must be respected and protected absolutely from the moment of conception." Accordingly, it opposes procedures whose purpose is to destroy an embryo or fetus for whatever motive (even before implantation), but admits acts, such as chemotherapy or hysterectomy of a pregnant woman who has cervical cancer, which indirectly result in the death of the fetus. The Church holds that "the **initial entitlement** of the human person is his life" and that life is assumed to begin at fertilization. As such, Canon 1398 provides that "a person who procures a successful abortion incurs an automatic (latae sententiae) excommunication" from the Church, which can only be removed when that individual seeks penance and obtains absolution.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **first right** and **initial entitlement** interchangeable (i.e., having the same meaning)?

Pair 1029

P1: On February 15, 2016, the "New York Times"'s editorial board published an article, "Don't Privatize Air Traffic Control." Most of the general aviation(GA) community strongly oppose privatizing air traffic control. Citing a similar switch Canada made in 1996(NavCanada), the high fees associated with a private air traffic control in Canada resulted in a significant decline in the GA community. **Flying in Canada with anything other than a major airline has become a privilege of the rich.** 115th Congress (2017-2018).

P2: On February 15, 2016, the "New York Times"'s editorial board published an article, "Don't Privatize Air Traffic Control." Most of the general aviation(GA) community strongly oppose privatizing air traffic control. Citing a similar switch Canada made in 1996(NavCanada), the high fees associated with a private air traffic control in Canada resulted in a significant decline in the GA community. **Flying in Canada with anything other than a commercial air service has become a privilege of the rich.** 115th Congress (2017-2018).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **major airline** and **commercial air service** interchangeable (i.e., having the same meaning)?

Pair 1030

P1: For a given cartridge, a bolt-action rifle is cheaper to build and maintain, more reliable, and lighter, due to fewer moving parts in the mechanism. In addition, the absence of uncontrolled automatic cartridge case ejection helps avoid revealing the shooter's position. **Semi-automatic weapons can serve both as battle rifle and sniper rifle, and allow for a greater rate (and hence volume) of fire.** As such rifles may be modified service rifles, an additional benefit can be commonality of operation with the issued infantry rifle.

P2: For a given cartridge, a bolt-action rifle is cheaper to build and maintain, more reliable, and lighter, due to fewer moving parts in the mechanism. In addition, the absence of uncontrolled automatic cartridge case ejection helps avoid revealing the shooter's position. **Semi-automatic weapons can serve both as battle rifle and sniper rifle, and allow for a greater rate (and for that reason size) of fire.** As such rifles may be modified service rifles, an additional benefit can be commonality of operation with the issued infantry rifle.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **hence volume** and **for that reason size** interchangeable (i.e., having the same meaning)?

Pair 1031

P1: The station began in 1978 as KHVN, playing a religious format. It underwent several changes in both format and callsigns throughout the late 1970s and 1980s. **KBFX debuted in 1989 as "100.5 The Fox", playing the strict version of Jacobs Media's Classic rock format.** It rose to be the number one radio station in Anchorage within its first year.

P2: The station began in 1978 as KHVN, playing a religious format. It underwent several changes in both format and callsigns throughout the late 1970s and 1980s. **KBFX debuted in 1989 as "100.5 The Fox", playing the precise rendition of Jacobs Media's Classic rock format.** It rose to be the number one radio station in Anchorage within its first year.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **strict version** and **precise rendition** interchangeable (i.e., having the same meaning)?

Pair 1032

P1: The inequality states that for every integer " r " ≥ 0 and every real number " x " ≥ -1 . If the exponent " r " is even, then the inequality is valid for "all" real numbers " x ". The **strict version** of the inequality reads for every integer " r " ≥ 2 and every real number " x " ≥ -1 with " x " $\neq 0$. There is also a generalized version that says for every real number " r " ≥ 1 and real number " x " ≥ -1 , while for $0 < r < 1$ and real number " x " ≥ -1 , Bernoulli's inequality is often used as the crucial step in the proof of other inequalities.

P2: The inequality states that for every integer " r " ≥ 0 and every real number " x " ≥ -1 . If the exponent " r " is even, then the inequality is valid for "all" real numbers " x ". The **exacting form** of the inequality reads for every integer " r " ≥ 2 and every real number " x " ≥ -1 with " x " $\neq 0$. There is also a generalized version that says for every real number " r " ≥ 1 and real number " x " ≥ -1 , while for $0 < r < 1$ and real number " x " ≥ -1 , Bernoulli's inequality is often used as the crucial step in the proof of other inequalities.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **strict version** and **exacting form** interchangeable (i.e., having the same meaning)?

Pair 1033

P1: The closest university with a program was 600 miles away. Colleges who did have programs either had few open dates, or requested large amounts of money for travel expenses. Consequently, BYU traveled to Colorado and California only, and did not have **home meets**. During their first year, the team finished with three wins and two losses.

P2: The closest university with a program was 600 miles away. Colleges who did have programs either had few open dates, or requested large amounts of money for travel expenses. Consequently, BYU traveled to Colorado and California only, and did not have **tournaments at their school**. During their first year, the team finished with three wins and two losses.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **home meets** and **tournaments at their school** interchangeable (i.e., having the same meaning)?

Pair 1034

P1: The roll back of the WAC-to-AWP spread led to a 4% reduction in their AWP. FDB also stopped publishing AWP data on September 26, 2011, two years after the rollback adjustments were implemented. First DataBank continues to publish non-AWP drug pricing information, including WAC, Direct Price, and suggested **wholesale price**. External links.

P2: The roll back of the WAC-to-AWP spread led to a 4% reduction in their AWP. FDB also stopped publishing AWP data on September 26, 2011, two years after the rollback adjustments were implemented. First DataBank continues to publish non-AWP drug pricing information, including WAC, Direct Price, and suggested **large-scale cost**. External links.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **wholesale price** and **large-scale cost** interchangeable (i.e., having the same meaning)?

Pair 1035

P1: and referred mostly to the excise tax on automobiles built for highway use and was used to pay for the expanding highway system. It also referred to operating overhead in selling the vehicle and handling charges. During the 50s the tax was 10% of the **wholesale price** of the vehicle and was used for highway construction. It was reduced to 6 and 7% during the 60s and then repealed in 1971.

P2: and referred mostly to the excise tax on automobiles built for highway use and was used to pay for the expanding highway system. It also referred to operating overhead in selling the vehicle and handling charges. During the 50s the tax was 10% of the **bulk fee** of the vehicle and was used for highway construction. It was reduced to 6 and 7% during

the 60s and then repealed in 1971.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **wholesale price** and **bulk fee** interchangeable (i.e., having the same meaning)?

Pair 1036

P1: In 1981, American singer Michael Jackson collaborated with Paul McCartney, writing and recording several songs together. Jackson stayed at the home of McCartney and his wife Linda during the recording sessions, becoming friendly with both. One evening while at the **dining table**, McCartney brought out a thick, bound notebook displaying all the songs to which he owned the publishing rights. Jackson grew more excited as he examined the pages.

P2: In 1981, American singer Michael Jackson collaborated with Paul McCartney, writing and recording several songs together. Jackson stayed at the home of McCartney and his wife Linda during the recording sessions, becoming friendly with both. One evening while at the **dining room counter**, McCartney brought out a thick, bound notebook displaying all the songs to which he owned the publishing rights. Jackson grew more excited as he examined the pages.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **dining table** and **dining room counter** interchangeable (i.e., having the same meaning)?

Pair 1037

P1: In Indian culture, in many an instance, being barefoot has a cultural significance. For example, it is customary to remove footwear when entering a home or a temple so as shoes are considered impure. Indians also traditionally sit on the floor when eating meals as opposed to at a **dining table**, which would normally entail taking off footwear. New Zealand.

P2: In Indian culture, in many an instance, being barefoot has a cultural significance. For example, it is customary to remove footwear when entering a home or a temple so as shoes are considered impure. Indians also traditionally sit on the floor when eating meals as opposed to at a **meal bar**, which would normally entail taking off footwear. New Zealand.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **dining table** and **meal bar** interchangeable (i.e., having the same meaning)?

Pair 1038

P1: Making good decisions and acting upon them can help a firm, but in the end there are other factors that must be taken into account before making a final decision. One issue is that a firm must find a way to at least limit, if not prevent, imitation, by, for example, applying for patent(s), creating a product that is too complicated to reverse engineer, or taking control of resources that are important to the production of its product and any imitation. The firm must also remember that first-mover advantages are not everlasting; eventually the competition will manage to take at least some piece of the market. Finally, a company must do its best to prevent incumbent inertia caused by self-righteousness, or possible changes in the market environment.

P2: Making good decisions and acting upon them can help a firm, but in the end there are other factors that must be taken into account before making a final decision. One issue is that a firm must find a way to at least limit, if not prevent, imitation, by, for example, applying for patent(s), creating a product that is too complicated to reverse engineer, or taking control of resources that are important to the production of its product and any imitation. The firm must also remember that first-mover advantages are not everlasting; eventually the competition will manage to take at a minimum a small portion of the market. Finally, a company must do its best to prevent incumbent inertia caused by self-righteousness, or possible changes in the market environment.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **least some piece** and **a minimum a small portion** interchangeable (i.e., having the same meaning)?

Pair 1039

P1: Their main influences included the Smiths, David Bowie, New Order and various singles from influential labels like Factory, Rough Trade, Cherry Red and Sarah. In negotiating these influences and impulses, they were contemporaries of Magnetic Fields and Belle and Sebastian, two bands they performed alongside in New York. **The band released two full-length albums ("Love at absolute zero" and "..."), and several EPs and limited-edition, vinyl-only singles.** They also made two music videos.

P2: Their main influences included the Smiths, David Bowie, New Order and various singles from influential labels like Factory, Rough Trade, Cherry Red and Sarah. In negotiating these influences and impulses, they were contemporaries of Magnetic Fields and Belle and Sebastian, two bands they performed alongside in New York. **The band released two full-length albums ("Love at total nothingness" and "..."), and several EPs and limited-edition, vinyl-only singles.** They also made two music videos.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **absolute zero** and **total nothingness** interchangeable (i.e., having the same meaning)?

Pair 1040

P1: Sanders said "I know where I came from, and that is something I will never forget. Unlike Donald Trump, who shut down the government and left 800,000 federal employees without income to pay the bills, I know what it's like to be in a family that lives paycheck to paycheck." **On March 3, Sanders spoke in Selma, Alabama, at a commemoration event held to remember the civil rights march known as Bloody Sunday.** Later that day, Sanders held his second rally in Chicago, Illinois.

P2: Sanders said "I know where I came from, and that is something I will never forget. Unlike Donald Trump, who shut down the government and left 800,000 federal employees without income to pay the bills, I know what it's like to be in a family that lives paycheck to paycheck." **On March 3, Sanders spoke in Selma, Alabama, at a ceremony appearance held to remember the civil rights march known as Bloody Sunday.** Later that day, Sanders held his second rally in Chicago, Illinois.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **commemoration event** and **ceremony appearance** interchangeable (i.e., having the same meaning)?

Pair 1041

P1: Treatment. Physical therapists focus on motor learning strategies when treating these patients. **Verbal cues, consistent feedback, practicing correct orientation and weight shifting are all effective strategies used to reduce the effects of this disorder.** Having a patient sit with their stronger side next to a wall and instructing them to lean towards the wall is an example of a possible treatment for pusher behaviour.

P2: Treatment. Physical therapists focus on motor learning strategies when treating these patients. **Verbal cues, consistent feedback, practicing appropriate direction and weight shifting are all effective strategies used to reduce the effects of this disorder.** Having a patient sit with their stronger side next to a wall and instructing them to lean towards the wall is an example of a possible treatment for pusher behaviour.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **correct orientation** and **appropriate direction** interchangeable (i.e., having the same meaning)?

Pair 1042

P1: Ideally, formal methods provide a mathematical guarantee that software meets its specifications. Building the product right implies the use of the Requirements Specification as input for the next phase of the development process, the design process, the output of which is the Design Specification. Then, it also implies the use of the Design Specification to feed the construction process. Every time the output of a process correctly implements its input specification, the software product is one step closer to final verification.

P2: Ideally, formal methods provide a mathematical guarantee that software meets its specifications. Building the product right implies the use of the Requirements Specification as input for the next phase of the development process, the design process, the output of which is the Design Specification. Then, it also implies the use of the Design Specification to feed the development procedure. Every time the output of a process correctly implements its input specification, the software product is one step closer to final verification.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are construction process and development procedure interchangeable (i.e., having the same meaning)?

Pair 1043

P1: function even(n : integer) : boolean; forward; function odd(n : integer) : boolean; When the actual declaration of the body of the function is made, either the parameters are omitted or must be absolutely identical to the original forward declaration, or an error will be flagged. Pre-processor recursion. When declaring complex data aggregates, a possible usage of functions Odd and Even could arise. Perhaps if a data aggregate X has a storage size that is an odd number of bytes, a single byte item might be added to it under the control of a test upon Odd(ByteSize(X)) so as to make an even number.

P2: function even(n : integer) : boolean; forward; function odd(n : integer) : boolean; When the actual declaration of the body of the function is made, either the parameters are omitted or must be absolutely identical to the original forward declaration, or an error will be flagged. Pre-processor recursion. When declaring complex data aggregates, a likely utilization of functions Odd and Even could arise. Perhaps if a data aggregate X has a storage size that is an odd number of bytes, a single byte item might be added to it under the control of a test upon Odd(ByteSize(X)) so as to make an even number.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are possible usage and likely utilization interchangeable (i.e., having the same meaning)?

Pair 1044

P1: Administration and practice. There are no religious courts in India, as it is a secular nation. Rather religious personal laws are adjudicated by the state on a case by case basis. Courts.

P2: Administration and practice. There are no religious courts in India, as it is a secular nation. Rather religious personal laws are adjudicated by the state on a case by instance premise. Courts.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are case basis and instance premise interchangeable (i.e., having the same meaning)?

Pair 1045

P1: Membership to the Maker's Asylum costs INR 3500, or INR 1700 if you are a student, but Maker's Asylum encourages participation by anyone who feels they can contribute. Nonmembers are welcome to attend meetups and other public events, as well as take part in classes on a variety of subjects. Visiting beyond this can be arranged on a case by

case basis with current members. Physical Space.

P2: Membership to the Maker’s Asylum costs INR 3500, or INR 1700 if you are a student, but Maker’s Asylum encourages participation by anyone who feels they can contribute. Nonmembers are welcome to attend meetups and other public events, as well as take part in classes on a variety of subjects. **Visiting beyond this can be arranged on a case by incident procedure** with current members. Physical Space.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **case basis** and **incident procedure** interchangeable (i.e., having the same meaning)?

Pair 1046

P1: In its complaint, ABC and NBC criticized SkyCable for its inaction to the request of the latter and subsequently non-inclusion of AksyonTV to its lineup, despite local laws instructing all cable and satellite companies operating in the Philippines to carry all free-to-air networks. Under Memorandum Circular 4-08-88 (or otherwise known as the “Must Carry Rule”), all entities in the cable and satellite businesses are required to include all free-to-air channels on its system regardless of its capabilities. **SkyCable on the other hand revoke its compliance to the order due to system capacity and will conform once an additional facility is in place.** On April 1, 2011, SkyCable announces the inclusion of AksyonTV on its channel lineup effective May 4, 2011 but made it earlier on April 30, four days from the planned May 4 launch.

P2: In its complaint, ABC and NBC criticized SkyCable for its inaction to the request of the latter and subsequently non-inclusion of AksyonTV to its lineup, despite local laws instructing all cable and satellite companies operating in the Philippines to carry all free-to-air networks. Pair 1049

P1: These include: OYO Partner Engagement. In April 2019, the company announced the launch of OPEN programme, an initiative for its partner hotels to help them reach their business goals. **It further Introduced upgraded Co-OYO app for hotel partners to provide complete visibility on all business & customer metrics.** Criticism.

P2: These include: OYO Partner Engagement. In April 2019, the company announced the launch of OPEN programme, an initiative for its partner hotels to help them reach their business goals. **It further Introduced upgraded Co-OYO app for hotel partners to provide comprehensive discernability on all business & customer metrics.** Criticism.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **complete visibility** and **comprehensive discernability** interchangeable (i.e., having the same meaning)?

Pair 1050

P1: In many of his newspaper articles on Irish politics, O'Connor strongly supports Fianna Fáil. He was also a supporter of Bertie Ahern and has described Ahern as "a great Taoiseach". **O'Connor frequently writes an article that appears on the bottom corner of the front page of the "Sunday Independent".** He also edits the paper's "Life" magazine, a glossy supplement to the paper.

P2: In many of his newspaper articles on Irish politics, O'Connor strongly supports Fianna Fáil. He was also a supporter of Bertie Ahern and has described Ahern as "a great Taoiseach". **O'Connor frequently writes an article that appears on the lower edge of the front page of the "Sunday Independent".** He also edits the paper's "Life" magazine, a glossy supplement to the paper.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **bottom corner** and **lower edge** interchangeable (i.e., having the same meaning)?

Pair 1051

P1: Death and Legacy. Apparently, the saint died at Andrott Island with his remains buried in Juma Mosque. **Juma Mosque, one of the top attractions in Lakshadweep is said to have been built during his time.** It is believed that 97% of the population in Lakshadweep being Muslim at present is a result of his preaching.

P2: Death and Legacy. Apparently, the saint died at Andrott Island with his remains buried in Juma Mosque. **Juma Mosque, one of the main sites in Lakshadweep is said to have been built during his time.** It is believed that 97% of the population in Lakshadweep being Muslim at present is a result of his preaching.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **top attractions** and **main sites** interchangeable (i.e., having the same meaning)?

Pair 1052

P1: A demonstrating behind a motorboat was made to the Swedish public at the 100th anniversary of the Royal Swedish Yacht Club in Sandhamn outside Stockholm in 1930. Water skiing gained international attention in the hands of famed promoter, Dick Pope, Sr., often referred to as the "Father of American Water Skiing" and founder of Cypress Gardens in Winter Haven, Florida. Pope cultivated a **distinct image** for his theme-park, which included countless photographs of the water skiers featured at the park. These photographs began appearing in magazines worldwide in the 1940s and 1950s, helping to bring international attention to the sport for the first time.

P2: A demonstrating behind a motorboat was made to the Swedish public at the 100th anniversary of the Royal Swedish Yacht Club in Sandhamn outside Stockholm in 1930. Water skiing gained international attention in the hands of famed promoter, Dick Pope, Sr., often referred to as the "Father of American Water Skiing" and founder of Cypress Gardens in Winter Haven, Florida. Pope cultivated a **definite concept** for his theme-park, which included countless photographs of the water skiers featured at the park. These photographs began appearing in magazines worldwide in the 1940s and 1950s, helping to bring international attention to the sport for the first time.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **distinct image** and **definite concept** interchangeable (i.e., having the same meaning)?

Pair 1053

P1: Postwar developments. After World War II, the newly reorganized Buddhist Churches of America temples resumed traditional Jōdo Shinshū rituals and services, and served as a refuge from continuing racial discrimination in wider American society. For this reason, there was **little or no desire** by many Japanese-American 'sanghas in propagating Jōdo Shinshū, with few exceptions. The internment legacy also created a stronger desire to assimilate into mainstream American society by many nisei ("second generation").

P2: Postwar developments. After World War II, the newly reorganized Buddhist Churches of America temples resumed traditional Jōdo Shinshū rituals and services, and served as a refuge from continuing racial discrimination in wider American society. For this reason, there was **nominal to no eagerness** by many Japanese-American 'sanghas in propagating Jōdo Shinshū, with few exceptions. The internment legacy also created a stronger desire to assimilate into mainstream American society by many nisei ("second generation").

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **little or no desire** and **nominal to no eagerness** interchangeable (i.e., having the same meaning)?

Pair 1054

P1: The U.S. Fish and Wildlife Service (USFWS) and the Natural Resources Conservation Service (NRCS) are also actively funding and assisting landowners to protect habitat, both where the fish currently occurs, as well as at sites where populations are currently being or may be restored in the near future. Through the aid of these organizations captive breeding programs have been successful and reintroduction to areas of the Barrens Plateau are under **current operation**. Management Recommendations.

P2: The U.S. Fish and Wildlife Service (USFWS) and the Natural Resources Conservation Service (NRCS) are also actively funding and assisting landowners to protect habitat, both where the fish currently occurs, as well as at sites where populations are currently being or may be restored in the near future. Through the aid of these organizations captive breeding programs have been successful and reintroduction to areas of the Barrens Plateau are under **ongoing application**. Management Recommendations.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **current operation** and **ongoing application** interchangeable (i.e., having the same meaning)?

Pair 1055

P1: They finally met—for the first time in the five years since Conrad’s 1878 suicide attempt in Marseilles—in July 1883 at Marienbad in Bohemia; then on 12 August they left for Teplice, likewise in Bohemia, where Conrad stayed two more weeks. Their meeting appears to have been pleasant. Bobrowski’s correspondence became more affectionate and friendly, with fewer admonitions; the prevailing mood became one of intimate understanding. Conrad’s own letters from the period, to his uncle and to , in Najder’s words, “allow... one to dispense with an occasionally advanced hypothesis that when [Konrad] left [Poland] he wanted to break once and for all with his Polish past.”

P2: They finally met—for the first time in the five years since Conrad’s 1878 suicide attempt in Marseilles—in July 1883 at Marienbad in Bohemia; then on 12 August they left for Teplice, likewise in Bohemia, where Conrad stayed two more weeks. Their meeting appears to have been pleasant. Bobrowski’s correspondence became more affectionate and friendly, with fewer admonitions; the prevailing mood became one of profound appreciation. Conrad’s own letters from the period, to his uncle and to , in Najder’s words, “allow... one to dispense with an occasionally advanced hypothesis that when [Konrad] left [Poland] he wanted to break once and for all with his Polish past.”

Please record your answer for the following question in the provided Google sheet

Pair 1056

P1: A former medieval hall house, it has gabled end cross wings with jettied first floors, curly bargeboards and moulded dragon posts to stairwell corners. Demography and housing. The average level of accommodation in the region composed of detached houses was 28%, the average that was apartments was 22.6%. The proportion of households in the civil parish who owned their home outright compares to the regional average of 35.1%.

P2: A former medieval hall house, it has gabled end cross wings with jettied first floors, curly bargeboards and moulded dragon posts to stairwell corners. Demography and housing. The typical standard of accommodation in the region composed of detached houses was 28%, the average that was apartments was 22.6%. The proportion of households in the civil parish who owned their home outright compares to the regional average of 35.1%.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are average level and typical standard interchangeable (i.e., having the same meaning)?

Pair 1057

P1: Some government expenditures might seem disproportionately high, as if the government did not endeavor to minimize expenditure costs. Opposed to that, private individuals and businesses spend their own money carefully and often more efficiently. They are likelier to aim to reach their desired level of utility at the minimum expenditure possible. To sum up this point, the same amount of money will be used more efficiently in the private sector than in the hands of the government.

P2: Some government expenditures might seem disproportionately high, as if the government did not endeavor to minimize expenditure costs. Opposed to that, private individuals and businesses spend their own money carefully and often more efficiently. They are likelier to aim to reach their appropriate measure of utility at the minimum expenditure possible. To sum up this point, the same amount of money will be used more efficiently in the private sector than in the hands of the government.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are desired level and appropriate measure interchangeable (i.e., having the same meaning)?

Pair 1058

P1: His objective in all his designs were to maintain his "billiard table" design philosophy. The main obstacle was a skew bridge crossing of the River Avon to link with the main Bath Spa station in the centre of the City. **At the approach to the Oldfield Park section a cutting was necessary to maintain the desired level.** It was into these cutting embankments that the two platforms were later accommodated.

P2: His objective in all his designs were to maintain his "billiard table" design philosophy. The main obstacle was a skew bridge crossing of the River Avon to link with the main Bath Spa station in the centre of the City. **At the approach to the Oldfield Park section a cutting was necessary to maintain the revered platform.** It was into these cutting embankments that the two platforms were later accommodated.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **desired level** and **revered platform** interchangeable (i.e., having the same meaning)?

Pair 1059

P1: When he was 13 he went to Kyoto to study swordsmanship and at the age of 26 he received kaiden (full transmission) and opened a school in Edo (now Tokyo). The school he studied is controversial. **The most accepted theory is that he learned Yamaguchi-ry swordsmanship under Yamaguchi Bokushinsai, but earlier documents state he studied under It Taizen.** Also, he studied Zen Buddhism and Classical Chinese literature under Zen monks Sekitan Ryōzen () and Shinshū () at Kyūkōji temple () in Azabu Sakurada-chō ().

P2: When he was 13 he went to Kyoto to study swordsmanship and at the age of 26 he received kaiden (full transmission) and opened a school in Edo (now Tokyo). The school he studied is controversial. **The most approved hypothesis is that he learned Yamaguchi-ry swordsmanship under Yamaguchi Bokushinsai, but earlier documents state he studied under It Taizen.** Also, he studied Zen Buddhism and Classical Chinese literature under Zen monks Sekitan Ryōzen () and Shinshū () at Kyūkōji temple () in Azabu Sakurada-chō ().

Please record your answer for the following question in the provided Google sheet

Pair 1060

P1: Hay is most nutritious when it is cut early on, before the seed heads are fully mature and before the stems of the plants become tough and thick. Hay that is very green can be a good indicator of the amount of nutrients in the hay; however, color is not the sole indicator of quality—smell and texture are also important. **Hay can be analyzed by many laboratories and that is the most reliable way to tell the nutritional values it contains.** Hay, particularly alfalfa, is sometimes compressed into pellets or cubes.

P2: Hay is most nutritious when it is cut early on, before the seed heads are fully mature and before the stems of the plants become tough and thick. Hay that is very green can be a good indicator of the amount of nutrients in the hay; however, color is not the sole indicator of quality—smell and texture are also important. **Hay can be analyzed by many laboratories and that is the most responsible manner to tell the nutritional values it contains.** Hay, particularly alfalfa, is sometimes compressed into pellets or cubes.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **reliable way** and **responsible manner** interchangeable (i.e., having the same meaning)?

Pair 1061

P1: At the beginning of the 20th century, the Riutort asphalt mine () was exploited by the Riutort Mining Company, which was owned by the Frenchmen Jules Claviez and Philipp Petit. They extracted bituminous loam and transported this on mules to the distillation factory, where petrol was extracted from the asphalt. **A few years after being set-up, the mine closed because of insufficient production.** It is open to the public in guided groups, which descend approximately

340 metres into its depths, to see its extensive galleries, which still drip petroleum from the rock walls and experience the strong smell associated with fossil fuels.

P2: At the beginning of the 20th century, the Riutort asphalt mine () was exploited by the Riutort Mining Company, which was owned by the Frenchmen Jules Claviez and Philipp Petit. They extracted bituminous loam and transported this on mules to the distillation factory, where petrol was extracted from the asphalt. **A few years after being set-up, the mine closed because of inadequate manufacturing.** It is open to the public in guided groups, which descend approximately 340 metres into its depths, to see its extensive galleries, which still drip petroleum from the rock walls and experience the strong smell associated with fossil fuels.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **insufficient production** and **inadequate manufacturing** interchangeable (i.e., having the same meaning)?

Pair 1062

P1: It has been engineered into a monomeric green fluorescent protein known as mNeonGreen, which is the brightest known monomeric green or yellow fluorescent protein. Feeding and digestive system. **Lancelets are inactive filter feeders, spending most of the time half-buried in sand with only their frontal part protruding.** They eat a wide variety of small planktonic organisms, such as bacteria, fungi, diatoms, dinoflagellates and zooplankton, and they will also take detritus.

P2: It has been engineered into a monomeric green fluorescent protein known as mNeonGreen, which is the brightest known monomeric green or yellow fluorescent protein. Feeding and digestive system. **Lancelets are inactive filter feeders, spending most of the time half-buried in sand with only their forward facing member protruding.** They eat a wide variety of small planktonic organisms, such as bacteria, fungi, diatoms, dinoflagellates and zooplankton, and they will also take detritus.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **frontal part** and **forward facing member** interchangeable (i.e., having the same meaning)?

Pair 1063

P1: {P}: open "parashah"; {S}: closed "parashah". Jeremiah's lament (12:1-6). **This part records Jeremiah's lament or 'confession' (could be in one combination with ; cf. ; ; ;)** which will gain a divine response in the following part (12:5-6).

P2: {P}: open "parashah"; {S}: closed "parashah". Jeremiah's lament (12:1-6). **This part records Jeremiah's lament or 'confession' (could be in a sequence with ; cf. ; ; ;)** which will gain a divine response in the following part (12:5-6).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one combination** and **a sequence** interchangeable (i.e., having the same meaning)?

Pair 1064

P1: The entire future of the community in the land is dependent on the covenant with YHWH as the formula "I will be your God and you will be my people" (verse 4) is linked closely to "YHWH's oath to give them a land 'flowing with milk and honey'". The first lament (11:18-23). **This part records Jeremiah's first lament or 'confession' (could be in one combination with ; cf. ; ; ;)** which will gain a divine response in the following part (-).

P2: The entire future of the community in the land is dependent on the covenant with YHWH as the formula "I will be your God and you will be my people" (verse 4) is linked closely to "YHWH's oath to give them a land 'flowing with milk and honey'". The first lament (11:18-23). **This part records Jeremiah's first lament or 'confession' (could be in a mix with ; cf. ; ; ;)** which will gain a divine response in the following part (-).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one combination** and **a mix** interchangeable (i.e., having the same meaning)?

Pair 1065

P1: Synopsis. Korea has over 1,200 km of oil pipeline, which is lifeline of the country. A drilling engineer prodigy spearheads an oil heist to drill into this pipeline against heavy odds fighting **catastrophic explosion** and corporate greed. Geon-woo (Lee Soo-hyuk), a rich oil refining company owner, sets up a plan to steal oil from pipeline between Honam and Seoul-Busan highway within a month.

P2: Synopsis. Korea has over 1,200 km of oil pipeline, which is lifeline of the country. A drilling engineer prodigy spearheads an oil heist to drill into this pipeline against heavy odds fighting **destructive blast** and corporate greed. Geon-woo (Lee Soo-hyuk), a rich oil refining company owner, sets up a plan to steal oil from pipeline between Honam and Seoul-Busan highway within a month.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **catastrophic explosion** and **destructive blast** interchangeable (i.e., having the same meaning)?

Pair 1066

P1: Unlike some other methods, mechanical shear is moderate during homogenization resulting in excellent membrane or subcellular preparations. The method, often called "beadbeating", works well for all types of cellular material - from spores to animal and plant tissues. It is the most widely used method of yeast lysis, and can yield breakage of **well over 50%** (up to 95%). It has the advantage over other mechanical cell disruption methods of being able to disrupt very small sample sizes, process many samples at a time with no cross-contamination concerns, and does not release potentially harmful aerosols in the process.

P2: Unlike some other methods, mechanical shear is moderate during homogenization resulting in excellent membrane or subcellular preparations. The method, often called "beadbeating", works well for all types of cellular material - from spores to animal and plant tissues. It is the most widely used method of yeast lysis, and can yield breakage of **above half** (up to 95%). It has the advantage over other mechanical cell disruption methods of being able to disrupt very small sample sizes, process many samples at a time with no cross-contamination concerns, and does not release potentially harmful aerosols in the process.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **well over 50%** and **above half** interchangeable (i.e., having the same meaning)?

Pair 1067

P1: A thermal relief pad, thermal pad or simply thermal, is a printed circuit board (PCB) pad connected to a copper pour using a "thermal connection". It looks like a normal pad with copper "spokes" connecting it to the surrounding copper. A typical pad on a printed circuit board is only connected to a few **narrow tracks**. A pad directly connected to the copper pour is difficult to solder, since the heat quickly leaks away from the pad into the copper pour due to high thermal conductivity of copper.

P2: A thermal relief pad, thermal pad or simply thermal, is a printed circuit board (PCB) pad connected to a copper pour using a "thermal connection". It looks like a normal pad with copper "spokes" connecting it to the surrounding copper. A typical pad on a printed circuit board is only connected to a few **confined trails**. A pad directly connected to the copper pour is difficult to solder, since the heat quickly leaks away from the pad into the copper pour due to high thermal conductivity of copper.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **narrow tracks** and **confined trails** interchangeable (i.e., having the same meaning)?

Pair 1068

P1: This fine control of the sail without need for the crew to leave the deck, is achieved by "brailing up". Rather than lowering the mainsail, it is gathered up against its own luff and head by means of lines called "brails". **This technique is an effective way of stowing the mainsail and gives fine control over the power obtained from the sail.** In narrow channels, and in the lee of tall buildings the mailsail and mizzen are brailed and the bowsprit topped up, and she sails on topsail and foresail alone.

P2: This fine control of the sail without need for the crew to leave the deck, is achieved by "brailing up". Rather than lowering the mainsail, it is gathered up against its own luff and head by means of lines called "brails". **This technique is an effective way of stowing the mainsail and gives good authority over the power obtained from the sail.** In narrow channels, and in the lee of tall buildings the mailsail and mizzen are brailed and the bowsprit topped up, and she sails on topsail and foresail alone.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **fine control** and **good authority** interchangeable (i.e., having the same meaning)?

Pair 1069

P1: Catholic Church. In 2011, Williams initiated the prosecution of what became known as the "Billy Doe" case - the prosecution of three priests and a schoolteacher for sexual abuse of an altar boy and student (pseudonym Billy Doe). **During proceedings, the youth's account of the alleged abuse changed, and doubts were raised about the veracity of the charges brought by Williams.** According to a "Newsweek" article by Ralph Cipriano, Williams "has not explained any of the factual discrepancies in Billy's many stories, and why the D.A.

P2: Catholic Church. In 2011, Williams initiated the prosecution of what became known as the "Billy Doe" case - the prosecution of three priests and a schoolteacher for sexual abuse of an altar boy and student (pseudonym Billy Doe). **During proceedings, the youth's account of the purported injury changed, and doubts were raised about the veracity of the charges brought by Williams.** According to a "Newsweek" article by Ralph Cipriano, Williams "has not explained any of the factual discrepancies in Billy's many stories, and why the D.A.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **alleged abuse** and **purported injury** interchangeable (i.e., having the same meaning)?

Pair 1070

P1: Bala's journey in the Indian film industry began with Feroz Abbas Khan's "Gandhi, My Father" in 2007, which was produced by Anil Kapoor. He had just wrapped up his agency and was taking a break, when the film came his way. **The film was his training ground and charted the future course of his film career.** Not only was he the Director's Assistant and Supervising Sound Editor on the film, he also managed to bag a small role in it.

P2: Bala's journey in the Indian film industry began with Feroz Abbas Khan's "Gandhi, My Father" in 2007, which was produced by Anil Kapoor. He had just wrapped up his agency and was taking a break, when the film came his way. **The film was his learning arena and charted the future course of his film career.** Not only was he the Director's Assistant and Supervising Sound Editor on the film, he also managed to bag a small role in it.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **training ground** and **learning arena** interchangeable (i.e., having the same meaning)?

Pair 1071

P1: The original design featured a proscenium but no fly tower. Upon opening, the venue was comparable to Derby’s Assembly Rooms—which also opened in 1977—but the Hexagon was described as architecturally and acoustically superior. As the building was designed to operate as a multi-use venue, the arena-style seating was used to avoid **limited visibility**. This proved useful for sports such as snooker or boxing, but rendered a number of seats unusable during performances that utilised the proscenium.

P2: The original design featured a proscenium but no fly tower. Upon opening, the venue was comparable to Derby’s Assembly Rooms—which also opened in 1977—but the Hexagon was described as architecturally and acoustically superior. As the building was designed to operate as a multi-use venue, the arena-style seating was used to avoid **decreased perceptibility**. This proved useful for sports such as snooker or boxing, but rendered a number of seats unusable during performances that utilised the proscenium.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **limited visibility** and **decreased perceptibility** interchangeable (i.e., having the same meaning)?

Pair 1072

P1: The instructions are issued in the form of a memorandum on official Department of the Navy letterhead. Each instruction is referenced with an OPNAVINST directive number and a date. Typically, when a new instruction supersedes a **previous instruction**, a cancellation notice citing the prior OPNAVINST number is included. References.

P2: The instructions are issued in the form of a memorandum on official Department of the Navy letterhead. Each instruction is referenced with an OPNAVINST directive number and a date. Typically, when a new instruction supersedes a **prior command**, a cancellation notice citing the prior OPNAVINST number is included. References.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **previous instruction** and **prior command** interchangeable (i.e., having the same meaning)?

Pair 1073

P1: Eager for any adventure, the two teenagers were soon climbing the lower part of the Wengeralp with skis and single ski-poles, so that they could zoom down to Grindelwald on the snow. As Hans Gertsch reported, it was not long before neighboring youngsters "requisitioned" barrel staves for makeshift skis, found old shoes which they nailed to the "skis," used packing string for bindings, and adapted broomsticks for poles. Groups would climb to the Grosse Scheidegg and then race downhill past trees and boulders without an hour of **previous instruction**. Early climbing career (1895-1897).

P2: Eager for any adventure, the two teenagers were soon climbing the lower part of the Wengeralp with skis and single ski-poles, so that they could zoom down to Grindelwald on the snow. As Hans Gertsch reported, it was not long before neighboring youngsters "requisitioned" barrel staves for makeshift skis, found old shoes which they nailed to the "skis," used packing string for bindings, and adapted broomsticks for poles. Groups would climb to the Grosse Scheidegg and then race downhill past trees and boulders without an hour of **past preparation**. Early climbing career (1895-1897).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **previous instruction** and **past preparation** interchangeable (i.e., having the same meaning)?

Pair 1074

P1: RAML and API Blueprint were also under consideration by the group. On 1 January 2016, the Swagger specification was renamed the OpenAPI Specification (OAS), and was moved to a new GitHub repository. In September 2016, the API World conference presented an API Infrastructure award to SmartBear for its **ongoing work** on Swagger. In July 2017, the OpenAPI Initiative released version 3.0.0 of its specification.

P2: RAML and API Blueprint were also under consideration by the group. On 1 January 2016, the Swagger specification was renamed the OpenAPI Specification (OAS), and was moved to a new GitHub repository. In September 2016, the API World conference presented an API Infrastructure award to SmartBear for its growing efforts on Swagger. In July 2017, the OpenAPI Initiative released version 3.0.0 of its specification.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are ongoing work and growing efforts interchangeable (i.e., having the same meaning)?

Pair 1075

P1: Therefore, there is no objective definition of art in aesthetics. Tolstoy condemns the focus on beauty/pleasure at length, calling aesthetics a discipline: according to which the difference between good art, conveying good feelings, and bad art, conveying wicked feelings, was totally obliterated, and one of the lowest manifestations of art, art for mere pleasure - against which all teachers of mankind have warned people - came to be regarded as the highest art. And art became, not the important thing it was intended to be, but the empty amusement of idle people. Professionalism.

P2: Therefore, there is no objective definition of art in aesthetics. Tolstoy condemns the focus on beauty/pleasure at length, calling aesthetics a discipline: according to which the difference between good art, conveying good feelings, and bad art, conveying wicked feelings, was totally obliterated, and one of the lowest manifestations of art, art for mere pleasure - against which all teachers of mankind have warned people - came to be regarded as the highest art. And art became, not the important thing it was intended to be, but the empty amusement of lazy persons. Professionalism.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are idle people and lazy persons interchangeable (i.e., having the same meaning)?

Pair 1076

P1: This is a strong metal rod with loops at the end. There usually are three lines to the actual towing line. The top one is shortest so that the center of gravity will be below the center of the boom. This to ensure that the message will hang vertical.

P2: This is a strong metal rod with loops at the end. There usually are three lines to the actual towing line. The above one is shortest so that the center of gravity will be below the center of the boom. This to ensure that the message will hang vertical.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are top one and above one interchangeable (i.e., having the same meaning)?

Pair 1077

P1: Condition. The Malay Club sustained damage during a storm in March 1988. The precinct has a relative degree of intactness. In 2001, it was reported that there had been some major changes nearby, with some demolition and new construction.

P2: Condition. The Malay Club sustained damage during a storm in March 1988. The precinct has a comparative amount of intactness. In 2001, it was reported that there had been some major changes nearby, with some demolition and new construction.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are relative degree and comparative amount interchangeable (i.e., having the same meaning)?

Pair 1078

P1: For example, and Relative degree. In our feedback linearized system made up of a state vector of the output formula_12 and its first formula_14 derivatives, we must understand how the input formula_28 enters the system. **To do this, we introduce the notion of relative degree.** Our system given by (1) and (2) is said to have relative degree formula_29 at a point formula_30 if, Considering this definition of relative degree in light of the expression of the time derivative of the output formula_12, we can consider the relative degree of our system (1) and (2) to be the number of times we have to differentiate the output formula_12 before the input formula_28 appears explicitly.

P2: For example, and Relative degree. In our feedback linearized system made up of a state vector of the output formula_12 and its first formula_14 derivatives, we must understand how the input formula_28 enters the system. **To do this, we introduce the notion of proportionate exponents.** Our system given by (1) and (2) is said to have relative degree formula_29 at a point formula_30 if, Considering this definition of relative degree in light of the expression of the time derivative of the output formula_12, we can consider the relative degree of our system (1) and (2) to be the number of times we have to differentiate the output formula_12 before the input formula_28 appears explicitly.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **relative degree** and **proportionate exponents** interchangeable (i.e., having the same meaning)?

Pair 1079

P1: The Project Management Triangle is considered insufficient as a model of project success because it omits crucial dimensions of success including impact on stakeholders, learning and user satisfaction. Overview. **The time constraint refers to the amount of time available to complete a project.** The cost constraint refers to the budgeted amount available for the project.

P2: The Project Management Triangle is considered insufficient as a model of project success because it omits crucial dimensions of success including impact on stakeholders, learning and user satisfaction. Overview. **The time restraint refers to the amount of time available to complete a project.** The cost constraint refers to the budgeted amount available for the project.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **time constraint** and **time restraint** interchangeable (i.e., having the same meaning)?

Pair 1080

P1: Council chair. On March 31, 2010, Brown announced that he would pursue the DC Council Chairmanship, one day after the current seat holder Vincent C. Gray announced his candidacy for Mayor for that year's election, making him ineligible to regain his office, which expired in January 2011. **This eliminated earlier speculation that Brown would pursue the mayoral seat against incumbent Adrian Fenty.** On September 14, 2010, Brown won the Democratic primary for chairperson, receiving 55 percent of the vote to former Ward 5 Councilman Vincent Orange's 39 percent and school board member Dorothy Douglas' 6 percent.

P2: Council chair. On March 31, 2010, Brown announced that he would pursue the DC Council Chairmanship, one day after the current seat holder Vincent C. Gray announced his candidacy for Mayor for that year's election, making him ineligible to regain his office, which expired in January 2011. **This eliminated previous thoughts that Brown would pursue the mayoral seat against incumbent Adrian Fenty.** On September 14, 2010, Brown won the Democratic primary for chairperson, receiving 55 percent of the vote to former Ward 5 Councilman Vincent Orange's 39 percent and school board member Dorothy Douglas' 6 percent.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **earlier speculation** and **previous thoughts** interchangeable (i.e., having the same meaning)?

Pair 1081

P1: Formally, there exist two functions `formula_1` and `formula_2` such that for all examples `formula_3`, `formula_4`. While ideal, this constraint is in fact too strong due to noise and other factors, and both algorithms instead seek to maximize the agreement between the two functions. **The second property is that the two views must not be highly correlated.** Algorithm.

P2: Formally, there exist two functions `formula_1` and `formula_2` such that for all examples `formula_3`, `formula_4`. While ideal, this constraint is in fact too strong due to noise and other factors, and both algorithms instead seek to maximize the agreement between the two functions. **The additional estate is that the two views must not be highly correlated.** Algorithm.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **second property** and **additional estate** interchangeable (i.e., having the same meaning)?

Pair 1082

P1: City staff mentioned that a tax freeze would have resulted in the closing of several community centres, 9 public libraries, fire stations, daycare centers, skating arenas and swimming pools as well as major cuts to transit service and a significant transit fare increase. The budget was approved unanimously by the Council and resulted in a 4.9% tax increase, including 1.4% for the police force budget, 2% for the infrastructure levy and 1.5% for capital and operation costs. **The budget also included a 7.5% OC Transpo fare increase until 2010, user fee increases such as rents and parking spaces, and cost cuts.** O'Brien and much of the Council had stated prior to the budget talks that cuts to essential services such as community centers, libraries and transit were unacceptable.

P2: City staff mentioned that a tax freeze would have resulted in the closing of several community centres, 9 public libraries, fire stations, daycare centers, skating arenas and swimming pools as well as major cuts to transit service and a significant transit fare increase. The budget was approved unanimously by the Council and resulted in a 4.9% tax increase, including 1.4% for the police force budget, 2% for the infrastructure levy and 1.5% for capital and operation costs. **The budget also included a 7.5% OC Transpo fare increase until 2010, user fee increases such as rents and parking spaces, and expenditure cutbacks.** O'Brien and much of the Council had stated prior to the budget talks that cuts to essential services such as community centers, libraries and transit were unacceptable.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **cost cuts** and **expenditure cutbacks** interchangeable (i.e., having the same meaning)?

Pair 1083

P1: Much of the extant fortifications around the complex date to the 13th century reconstruction undertaken by the Mamluk sultan Qalawun following the devastation of the earlier defenses by the Mongol army under Kitbuqa. This includes the great southeast tower. **The earliest round of fortifications were two walls to the southwest of the Temples of Jupiter and Bacchus.** The original southern gateway with two small towers was filled in and replaced by a new large tower flanked by curtains, probably under Buri or Zengi.

P2: Much of the extant fortifications around the complex date to the 13th century reconstruction undertaken by the Mamluk sultan Qalawun following the devastation of the earlier defenses by the Mongol army under Kitbuqa. This includes the great southeast tower. **The most primitive group of fortifications were two walls to the southwest of the Temples of Jupiter and Bacchus.** The original southern gateway with two small towers was filled in and replaced by a new large tower flanked by curtains, probably under Buri or Zengi.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **earliest round** and **most primitive group** interchangeable (i.e., having the same meaning)?

Pair 1084

P1: Dominica exports water to its Caribbean neighbors; shoes, cement blocks, furniture, and soap and toiletries are also exported. Home industries produce some leather work, ceramics, and straw products. Since the 1990s, the small manufacturing sector has been expanding at a **modest pace**, including electronic assembly, rum, candles, and paints. The Trafalgar Hydro Electric Power Station is now operational, making the island virtually energy self-sufficient.

P2: Dominica exports water to its Caribbean neighbors; shoes, cement blocks, furniture, and soap and toiletries are also exported. Home industries produce some leather work, ceramics, and straw products. Since the 1990s, the small manufacturing sector has been expanding at a **decent step**, including electronic assembly, rum, candles, and paints. The Trafalgar Hydro Electric Power Station is now operational, making the island virtually energy self-sufficient.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **modest pace** and **decent step** interchangeable (i.e., having the same meaning)?

Pair 1085

P1: Personal life. Chathuranga was born on 16 August 1995 in Homagama as the only child of the family. His father Mahinda Kodithuwakku was a **machine operator** at State printing cooperation and mother Mallika Alwis Jayasinghe is a housewife. He started primary education from Subharathi Mahamaathya Maha Vidyalaya, Godagama and then completed secondary education from D.S Senanayake College, Colombo.

P2: Personal life. Chathuranga was born on 16 August 1995 in Homagama as the only child of the family. His father Mahinda Kodithuwakku was a **mechanical engineer** at State printing cooperation and mother Mallika Alwis Jayasinghe is a housewife. He started primary education from Subharathi Mahamaathya Maha Vidyalaya, Godagama and then completed secondary education from D.S Senanayake College, Colombo.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **machine operator** and **mechanical engineer** interchangeable (i.e., having the same meaning)?

Pair 1086

P1: Marie, Michigan. KOTC: Excessive Damage. KOTC: **excessive damage** was an event held on May 13, 2010 at the San Manuel Casino in Highland, California. KOTC: Honor.

P2: Marie, Michigan. KOTC: Excessive Damage. KOTC: **too much disturbance** was an event held on May 13, 2010 at the San Manuel Casino in Highland, California. KOTC: Honor.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **excessive damage** and **too much disturbance** interchangeable (i.e., having the same meaning)?

Pair 1087

P1: Its first newspaper mention was in 1892 as Whisky Bottom. One resident who lived on the road since the 1890s explained that the road name came from the low point near the railroad tracks where trains would pick up wagon-delivered barrels of Maryland Rye whiskey from a distillery near the Laurel Mill. Others have referenced the road as **sandy bottom**, and Rural Route No. 1

P2: Its first newspaper mention was in 1892 as Whisky Bottom. One resident who lived on the road since the 1890s explained that the road name came from the low point near the railroad tracks where trains would pick up wagon-delivered barrels of Maryland Rye whiskey from a distillery near the Laurel Mill. Others have referenced the road as **granular ground**, and Rural Route No. 1

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **sandy bottom** and **granular ground** interchangeable (i.e., having the same meaning)?

Pair 1088

P1: The majority of citizens are farmers and the main crops are Paddy and cotton. While most farmers are men, women play an important role in rice transplanting. **Monsoon season, the rainy season in the late summer and early fall months, is the primary season for planting crops.** Herders also play an important role in agriculture.

P2: The majority of citizens are farmers and the main crops are Paddy and cotton. While most farmers are men, women play an important role in rice transplanting. **Monsoon season, the rainy season in the late summer and early fall months, is the initial term for planting crops.** Herders also play an important role in agriculture.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **primary season** and **initial term** interchangeable (i.e., having the same meaning)?

Pair 1089

P1: The ILO guidance document is one of the most basic and adaptable models for organisations to utilise when developing a safety management system. In the ILO guidance document, the basic safety management components are:

 Although other safety management models may use different terminology, the basic components and workflow for safety management systems will be the same. **The desired outcome is an effective plan, Do, Check, Act (PDCA) process where the goal is that of continual and measurable improvement.** Regulatory perspective.

P2: The ILO guidance document is one of the most basic and adaptable models for organisations to utilise when developing a safety management system. In the ILO guidance document, the basic safety management components are:

 Although other safety management models may use different terminology, the basic components and workflow for safety management systems will be the same. **The desired outcome is an impressive idea, Do, Check, Act (PDCA) process where the goal is that of continual and measurable improvement.** Regulatory perspective.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **effective plan** and **impressive idea** interchangeable (i.e., having the same meaning)?

Pair 1090

P1: Archbishop Curley High School celebrated its 25th anniversary during the 1985–1986 school year under principal Fr. Gregory Hartmayer (later Archbishop of Atlanta). **During that year, a smaller wing was added onto the building to house the instrumental music department facilities, including a concert practice room.** Additional athletic facilities were added in an adjacent wing, including the weight room and wrestling room.

P2: Archbishop Curley High School celebrated its 25th anniversary during the 1985–1986 school year under principal Fr. Gregory Hartmayer (later Archbishop of Atlanta). **During that year, a modest extension was added onto the building to house the instrumental music department facilities, including a concert practice room.** Additional athletic facilities were added in an adjacent wing, including the weight room and wrestling room.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **smaller wing** and **modest extension** interchangeable (i.e., having the same meaning)?

Pair 1091

P1: Radio and television. The state-run Republic of Yemen Television and Republic of Yemen Radio operate the country's television and radio networks, respectively. **There are two state-run TV stations; two state-run national radio**

stations and **five local stations**; stations from Oman and Saudi Arabia can be accessed (2007). Internet usage.

P2: Radio and television. The state-run Republic of Yemen Television and Republic of Yemen Radio operate the country's television and radio networks, respectively. **There are two state-run TV stations; two state-run national radio stations and 5 regional channels**; stations from Oman and Saudi Arabia can be accessed (2007). Internet usage.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **five local stations** and **5 regional channels** interchangeable (i.e., having the same meaning)?

Pair 1092

P1: The train concourse was another significant portion of the terminal, though no longer extant. It held all sixteen of Reiss's industrial murals, along with other significant art and design features. **The Cincinnati Union Terminal Company was created in 1927 to build a union station to replace five local stations** used by seven railroads. Construction, which lasted from 1928 to 1933, included the creation of viaducts, mail and express buildings, and utility structures: a power plant, water treatment facility, and roundhouse.

P2: The train concourse was another significant portion of the terminal, though no longer extant. It held all sixteen of Reiss's industrial murals, along with other significant art and design features. **The Cincinnati Union Terminal Company was created in 1927 to build a union station to replace a handful of stopping places** used by seven railroads. Construction, which lasted from 1928 to 1933, included the creation of viaducts, mail and express buildings, and utility structures: a power plant, water treatment facility, and roundhouse.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **five local stations** and **a handful of stopping places** interchangeable (i.e., having the same meaning)?

Pair 1093

P1: The Atomic Minerals Directorate (AMD) has identified almost 12 million tonnes of monazite resources (typically with 6-7% thorium). In stage 3, Advanced Heavy Water Reactors (AHWR) would burn thorium-plutonium fuels in such a manner that breeds U-233 which can eventually be used as a self-sustaining fissile driver for a fleet of breeding AHWRs. **An alternative stage 3 is molten salt breeder reactors (MSBR), which are believed to be another possible option for eventual large-scale deployment.** In June 2014, Kudankulam-1 became the single largest power generating unit in India (1000 MWe).

P2: The Atomic Minerals Directorate (AMD) has identified almost 12 million tonnes of monazite resources (typically with 6-7% thorium). In stage 3, Advanced Heavy Water Reactors (AHWR) would burn thorium-plutonium fuels in such a manner that breeds U-233 which can eventually be used as a self-sustaining fissile driver for a fleet of breeding AHWRs. **An additional level 3 is molten salt breeder reactors (MSBR), which are believed to be another possible option for eventual large-scale deployment.** In June 2014, Kudankulam-1 became the single largest power generating unit in India (1000 MWe).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **alternative stage** and **additional level** interchangeable (i.e., having the same meaning)?

Pair 1094

P1: On November 6, 2012, Kay released a short film along with a new song called "Rewind The Track". The film received positive reviews, praising Kay's new direction, and the haunting sound of the song. **The version of the song used in the video is slightly different, using less production than the album version.** The EP was released on November 13, 2012, as promised, and has a notably darker sound than Kay's previous works, possible due to the fact that she dedicated it to

”anyone who’s ever been betrayed.”

P2: On November 6, 2012, Kay released a short film along with a new song called ”Rewind The Track”. The film received positive reviews, praising Kay’s new direction, and the haunting sound of the song. **The version of the song used in the video is slightly different, using decreased staging than the album version.** The EP was released on November 13, 2012, as promised, and has a notably darker sound than Kay’s previous works, possible due to the fact that she dedicated it to ”anyone who’s ever been betrayed.”

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **less production** and **decreased staging** interchangeable (i.e., having the same meaning)?

Pair 1095

P1: After being told by Pruyn that the United States government would demand satisfaction and expect a statement from the Japanese concerning the offense, the Japanese diplomat begged that the Americans do nothing until his government at Edo took action. After the Japanese left, McDougal told Pruyn that he had decided to proceed instantly to the Shimonoseki Strait to seize and, if necessary, to destroy, the offending vessels. **The two men agreed that lack of punitive action would encourage further anti-foreign incidents.** Accordingly, ”Wyoming” prepared for sea.

P2: After being told by Pruyn that the United States government would demand satisfaction and expect a statement from the Japanese concerning the offense, the Japanese diplomat begged that the Americans do nothing until his government at Edo took action. After the Japanese left, McDougal told Pruyn that he had decided to proceed instantly to the Shimonoseki Strait to seize and, if necessary, to destroy, the offending vessels. **The two men agreed that lack of disciplinary activity would encourage further anti-foreign incidents.** Accordingly, ”Wyoming” prepared for sea.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **punitive action** and **disciplinary activity** interchangeable (i.e., having the same meaning)?

Pair 1096

P1: Similarly, in the first book, Max can ”see” the Institute for Higher Living. In ”School’s Out Forever”, it is revealed that Ari has a Voice. **Angel also has a Voice in ; Max thinks angel’s voice is imaginary because she wants to emulate Max and take over the Flock.** When Dylan joins the Flock Angel finally takes it over, later returning it to Max.

P2: Similarly, in the first book, Max can ”see” the Institute for Higher Living. In ”School’s Out Forever”, it is revealed that Ari has a Voice. **Angel also has a Voice in ; Max thinks Angle’s expression is imaginary because she wants to emulate Max and take over the Flock.** When Dylan joins the Flock Angel finally takes it over, later returning it to Max.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **angel’s voice** and **Angle’s expression** interchangeable (i.e., having the same meaning)?

Pair 1097

P1: After the game, the crowd would not leave the park until Fidrych came out of the dugout to tip his cap. For ABC’s coverage of the 1976 All-Star Game, the team of Bob Prince, Bob Uecker and Warner Wolf alternated roles for the broadcast. **For the first three innings, Prince did play-by-play with Wolf on color commentary and Uecker doing field interviews.** For the middle innings, Uecker worked play-by-play with Prince on color and Wolf doing the interviews.

P2: After the game, the crowd would not leave the park until Fidrych came out of the dugout to tip his cap. For ABC’s coverage of the 1976 All-Star Game, the team of Bob Prince, Bob Uecker and Warner Wolf alternated roles for the broadcast. **For the first three innings, Prince did play-by-play with Wolf on color commentary and Uecker doing informal questioning.** For the middle innings, Uecker worked play-by-play with Prince on color and Wolf doing the

interviews.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **field interviews** and **informal questioning** interchangeable (i.e., having the same meaning)?

Pair 1098

P1: Reddit conversations in various location-based subreddits were analyzed for the presence of grammatical forms unique to a regional dialect. These were then used to map the extent of the speaker population. **The results could roughly approximate large-scale surveys on the subject without engaging in field interviews.** In ornithology.

P2: Reddit conversations in various location-based subreddits were analyzed for the presence of grammatical forms unique to a regional dialect. These were then used to map the extent of the speaker population. **The results could roughly approximate large-scale surveys on the subject without engaging in spontaneous evaluations.** In ornithology.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **field interviews** and **spontaneous evaluations** interchangeable (i.e., having the same meaning)?

Pair 1099

P1: In 1983 the Wagner scholar John Deathbridge, in an article in "The Musical Times", outlined the need for a reliable catalogue. Two years later, in conjunction with Martin Gech and Egon Voss, he produced "Wagner-Werk-Verzeichnis", described by fellow-scholar Michael Saffle as "perhaps the single finest and most useful of all Wagner reference works." **Each of Wagner's known works, whether finished or unfinished, is listed in a number sequence running from 1 to 113.** The list includes all compositions and all prose drafts where the music is either lost or unwritten.

P2: In 1983 the Wagner scholar John Deathbridge, in an article in "The Musical Times", outlined the need for a reliable catalogue. Two years later, in conjunction with Martin Gech and Egon Voss, he produced "Wagner-Werk-Verzeichnis", described by fellow-scholar Michael Saffle as "perhaps the single finest and most useful of all Wagner reference works." **Each of Wagner's known works, whether finished or unfinished, is listed in a chronological order running from 1 to 113.** The list includes all compositions and all prose drafts where the music is either lost or unwritten.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **number sequence** and **chronological order** interchangeable (i.e., having the same meaning)?

Pair 1100

P1: Thus, the terminology has poor standardization and specificity, particularly as a database search term. Technical. **In engineering, technical peer review is a type of engineering review.** Technical peer reviews are a well defined review process for finding and fixing defects, conducted by a team of peers with assigned roles.

P2: Thus, the terminology has poor standardization and specificity, particularly as a database search term. Technical. **In engineering, technical peer review is a type of manufacturing audit.** Technical peer reviews are a well defined review process for finding and fixing defects, conducted by a team of peers with assigned roles.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **engineering review** and **manufacturing audit** interchangeable (i.e., having the same meaning)?

Pair 1101

P1: Though it had been established in 1960, OPEC did not gain effective control over oil prices until 1970, when Libyan leader Muammar Gaddafi forced oil companies in Libya to agree to a price increase; other countries followed suit. U.S. leaders did not attempt to block these price increases, as they believed that higher prices would help increase domestic production of oil. This increased production failed to materialize, and by 1973 the U.S. consumed over one and a half times the oil that it produced domestically. In 1973, in response to the U.S. support of Israel in the Yom Kippur War, OPEC countries cut oil production, raised prices, and initiated an embargo targeted against the United States and other countries that had supported Israel.

P2: Though it had been established in 1960, OPEC did not gain effective control over oil prices until 1970, when Libyan leader Muammar Gaddafi forced oil companies in Libya to agree to a price increase; other countries followed suit. U.S. leaders did not attempt to block these price increases, as they believed that higher prices would help increase domestic production of oil. This increased production failed to materialize, and by 1973 the U.S. consumed over 150% more the oil that it produced domestically. In 1973, in response to the U.S. support of Israel in the Yom Kippur War, OPEC countries cut oil production, raised prices, and initiated an embargo targeted against the United States and other countries that had supported Israel.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one and a half times** and **150% more** interchangeable (i.e., having the same meaning)?

Pair 1102

P1: By 07:30 the lead boats were nearing Beach White Two where a company of Lt. Col. Mercer M. Doty's 3/60th Infantry, was to land when the flotilla came under heavy rocket, automatic, and small arms fire from both sides of the stream (). Most VC fire came from the east, and the organic firepower of the American assault craft came primarily to the right flank of the force. In the smoke and confusion the assault craft maneuvered to fire weapons or to avoid other american craft temporarily out of control. One ATC proceeded north of the lead minesweepers and landed on Beach White Two with the company commander and one platoon of Company B, 3/60th Infantry.

P2: By 07:30 the lead boats were nearing Beach White Two where a company of Lt. Col. Mercer M. Doty's 3/60th Infantry, was to land when the flotilla came under heavy rocket, automatic, and small arms fire from both sides of the stream (). Most VC fire came from the east, and the organic firepower of the American assault craft came primarily to the right flank of the force. In the smoke and confusion the assault craft maneuvered to fire weapons or to avoid other u.s. vessels temporarily out of control. One ATC proceeded north of the lead minesweepers and landed on Beach White Two with the company commander and one platoon of Company B, 3/60th Infantry.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **american craft** and **u.s. vessels** interchangeable (i.e., having the same meaning)?

Pair 1103

P1: History. During the 18th century corporals might indicate their ranks with a shoulder knot and, later, an epaulette. Sergeants had clothing that was of slightly better quality, wore a sash, and had lace trim on their hats and uniforms. The chevrons worn by many non-commissioned officers are based on heraldic devices and their current use for NCOs originates from the time of the Napoleonic Wars in 1802.

P2: History. During the 18th century corporals might indicate their ranks with a shoulder knot and, later, an epaulette. Sergeants had clothing that was of marginally superior character, wore a sash, and had lace trim on their hats and uniforms. The chevrons worn by many non-commissioned officers are based on heraldic devices and their current use for NCOs originates from the time of the Napoleonic Wars in 1802.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **slightly better quality** and **marginally superior character** interchangeable (i.e., having the same meaning)?

Pair 1104

P1: There he received word from Union General Ulysses S. Grant that Confederate General Robert E. Lee had requested a meeting to discuss "the subjects of controversy between the belligerents." After consulting with Secretary of War Edwin M. Stanton and Secretary of State William Henry Seward, Lincoln responded through Stanton that Grant was not to confer with the Confederate general, "unless it be for the capitulation of General Lee's army," but should "press to the utmost your military advantages." Lee surrendered the Army of Northern Virginia to Grant the following month. A dozen years later, on March 3, 1877, President Grant used the President's Room to sign legislation enacted during the final days of the Forty-fourth Congress.

P2: There he received word from Union General Ulysses S. Grant that Confederate General Robert E. Lee had requested a meeting to discuss "the subjects of controversy between the belligerents." After consulting with Secretary of War Edwin M. Stanton and Secretary of State William Henry Seward, Lincoln responded through Stanton that Grant was not to confer with the Confederate general, "unless it be for the capitulation of General Lee's army," but should "press to the utmost your military advantages." Lee surrendered the Army of Northern Virginia to Grant the next four weeks. A dozen years later, on March 3, 1877, President Grant used the President's Room to sign legislation enacted during the final days of the Forty-fourth Congress.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **following month** and **next four weeks** interchangeable (i.e., having the same meaning)?

Pair 1105

P1: The A.V. Club gave the episode a "B-" rating, stating, "'Chuck Vs. The Wookiee' was less a step forward from last week than a confirmation that Chuck has found its bearings after a **shaky start**". IGN, however, was more enthusiastic about the show, giving it a "Great" 8.2/10 rating.

P2: The A.V. Club gave the episode a "B-" rating, stating, "'Chuck Vs. The Wookiee' was less a step forward from last week than a confirmation that Chuck has found its bearings after a **dubious beginning**". IGN, however, was more enthusiastic about the show, giving it a "Great" 8.2/10 rating.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **shaky start** and **dubious beginning** interchangeable (i.e., having the same meaning)?

Pair 1106

P1: Release. More than one month prior to its release, DJ John Peel broadcast the album on BBC radio 1 from an advance copy on a cassette, from the beginning to end, with no interruptions. "That's the **one boys** and girls,' he says when it's over. 'That's the one.'"

P2: Release. More than one month prior to its release, DJ John Peel broadcast the album on BBC radio 1 from an advance copy on a cassette, from the beginning to end, with no interruptions. "That's the **single males** and girls,' he says when it's over. 'That's the one.'"

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one boys** and **single males** interchangeable (i.e., having the same meaning)?

Pair 1107

P1: Improvements and additions were made by the sultans Qaytbay and Qansuh al-Ghuri, each of whom oversaw numerous repairs and erected minarets that still stand today. It was common practice among the Mamluk sultans to build minarets, perceived as symbols of power and the most effective way of cementing one's position in the Cairo cityscape.

The sultans wished to have a **noticeable association** with the prestigious al-Azhar. Al-Ghuri may also have rebuilt the dome in front of the original "mihrab".

P2: Improvements and additions were made by the sultans Qaytbay and Qansuh al-Ghuri, each of whom oversaw numerous repairs and erected minarets that still stand today. It was common practice among the Mamluk sultans to build minarets, perceived as symbols of power and the most effective way of cementing one's position in the Cairo cityscape. The sultans wished to have a **distinct relationship** with the prestigious al-Azhar. Al-Ghuri may also have rebuilt the dome in front of the original "mihrab".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **noticeable association** and **distinct relationship** interchangeable (i.e., having the same meaning)?

Pair 1108

P1: The most important of these is the proposed extension of the qualifying age for the Child Support Grant by 2006 from 13 years to the end of the school year the child turns 15 so as to avoid the current contradiction with the Basic Conditions of Employment Act prohibiting child work below that age, as well as the provisions on compulsory schooling. The programme also proposes a further roll out of the child support grant up to the age of 17 by 2008. **This will encourage children to remain in school and so help to avoid children's engagement** in hazardous works activities and other WFCL. See also.

P2: The most important of these is the proposed extension of the qualifying age for the Child Support Grant by 2006 from 13 years to the end of the school year the child turns 15 so as to avoid the current contradiction with the Basic Conditions of Employment Act prohibiting child work below that age, as well as the provisions on compulsory schooling. The programme also proposes a further roll out of the child support grant up to the age of 17 by 2008. **This will encourage children to remain in school and so help to avoid the child's entanglement** in hazardous works activities and other WFCL. See also.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **children's engagement** and **the child's entanglement** interchangeable (i.e., having the same meaning)?

Pair 1109

P1: History. Kasai shrine was founded in 1185 at the end of the Heian period. **To protect the regional area**, the same deity as the Katori jingu shrine, named Futsunushi no kami, was enshrined in Kasai shrine. Originally, Kasai shrine was called Katori-gu, but later on it happened to be called Kasai shrine.

P2: History. Kasai shrine was founded in 1185 at the end of the Heian period. **To protect the community space**, the same deity as the Katori jingu shrine, named Futsunushi no kami, was enshrined in Kasai shrine. Originally, Kasai shrine was called Katori-gu, but later on it happened to be called Kasai shrine.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **regional area** and **community space** interchangeable (i.e., having the same meaning)?

Pair 1110

P1: This forms a stable cold and moist layer of air above the snow surface, even if the surrounding air temperature is above freezing point. This cold layer induces downslope winds, which damper the growth of the PBL. **This surface winds are also drifting the snowpack**, leading to an increase of surface roughness and **therefore an increase** of wind shear (Forced convection). Vegetation.

P2: This forms a stable cold and moist layer of air above the snow surface, even if the surrounding air temperature is above freezing point. This cold layer induces downslope winds, which damper the growth of the PBL. **This surface**

winds are also drifting the snowpack, leading to an increase of surface roughness and **as a result a boost** of wind shear (Forced convection). Vegetation.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **therefore an increase** and **as a result a boost** interchangeable (i.e., having the same meaning)?

Pair 1111

P1: Their recommendations were incorporated into the Goldwater-Nichols Act of 1986. The Packard Commission reported that the lack of communication and lack of cooperation came from a lack of "a rational system" rather than from criminal conspiracy or incompetence. Their analysis was primarily a **business one**, which was to be expected, as their numbers were culled from corporate leaders. In business, questions of system are primarily addressed by changing the management.

P2: Their recommendations were incorporated into the Goldwater-Nichols Act of 1986. The Packard Commission reported that the lack of communication and lack of cooperation came from a lack of "a rational system" rather than from criminal conspiracy or incompetence. Their analysis was primarily a **corporate type**, which was to be expected, as their numbers were culled from corporate leaders. In business, questions of system are primarily addressed by changing the management.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **business one** and **corporate type** interchangeable (i.e., having the same meaning)?

Pair 1112

P1: The broker has a base rate which is usually the Broker's call rate. The broker's rate is published daily in publications such The Wall Street Journal and Investor's Business Daily. Depending on the amount borrowed the **effective rate** will have a percentage added or subtracted with the lowest rates for the most money borrowed. The dollar categories and amounts that are added or subtracted varies with the broker.

P2: The broker has a base rate which is usually the Broker's call rate. The broker's rate is published daily in publications such The Wall Street Journal and Investor's Business Daily. Depending on the amount borrowed the **active ratio** will have a percentage added or subtracted with the lowest rates for the most money borrowed. The dollar categories and amounts that are added or subtracted varies with the broker.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **effective rate** and **active ratio** interchangeable (i.e., having the same meaning)?

Pair 1113

P1: While taking the client's right hand in hers she will inquire about the situation aloud to the bush spirits who have taken residence within the figures. The Sando moves her hands in response to the spirits' replies to her questions. Her hand will make a short horizontal gesture similar to pushing something aside to indicate "no or a **searching movement to indicate uncertainty**. When the answer is "yes", she slaps her upper thigh with her hand or the client's hand once or several times depending on how definite the response.

P2: While taking the client's right hand in hers she will inquire about the situation aloud to the bush spirits who have taken residence within the figures. The Sando moves her hands in response to the spirits' replies to her questions. Her hand will make a short horizontal gesture similar to pushing something aside to indicate "no or a **scanning motion to indicate uncertainty**. When the answer is "yes", she slaps her upper thigh with her hand or the client's hand once or several times depending on how definite the response.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **searching movement** and **scanning motion** interchangeable (i.e., having the same meaning)?

Pair 1114

P1: Things changed rapidly in 1992, when the left-leaning Alignment Party under Yitzhak Rabin defeated the Likud Party in the elections. Soon after the elections, Loevy was informed that his proposal had been approved. **He immediately brought veteran producer Liora Amir-Barmatz on board, and began investigating the contentious topic.** It was at the point that Loevy and Amir-Barmatz decided that the series should consist of two distinct episodes.

P2: Things changed rapidly in 1992, when the left-leaning Alignment Party under Yitzhak Rabin defeated the Likud Party in the elections. Soon after the elections, Loevy was informed that his proposal had been approved. **He immediately brought veteran producer Liora Amir-Barmatz on board, and began investigating the combative subject.** It was at the point that Loevy and Amir-Barmatz decided that the series should consist of two distinct episodes.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **contentious topic** and **combative subject** interchangeable (i.e., having the same meaning)?

Pair 1115

P1: As the Lincoln Highway was one of the earliest transcontinental highways for automobiles across the United States and was widely publicized since its inception, the route of the Lincoln Highway was determined not only by civil engineering considerations but also by politics. In many regions, there was general consensus among those who had power or interest in influencing the route. **But in a few regions the choice of route was a contentious topic during the 1920s.** The highway followed the following route: New York.

P2: As the Lincoln Highway was one of the earliest transcontinental highways for automobiles across the United States and was widely publicized since its inception, the route of the Lincoln Highway was determined not only by civil engineering considerations but also by politics. In many regions, there was general consensus among those who had power or interest in influencing the route. **But in a few regions the choice of route was a testy matter during the 1920s.** The highway followed the following route: New York.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **contentious topic** and **testy matter** interchangeable (i.e., having the same meaning)?

Pair 1116

P1: The revised Medium of Instruction policy (MOI). According to the revised MOI policy, secondary schools were encouraged to adopt Chinese Medium of Instruction (CMI) teaching methods, starting in the 1998–99 school year. **This introduction of CMI started in the secondary 1 intake of pupils, and progressed each year to a higher form at junior secondary levels.** Not all school reacted to this suggestion however, because some schools remained using English as the medium of instruction.

P2: The revised Medium of Instruction policy (MOI). According to the revised MOI policy, secondary schools were encouraged to adopt Chinese Medium of Instruction (CMI) teaching methods, starting in the 1998–99 school year. **This introduction of CMI started in the secondary 1 intake of pupils, and progressed each year to a higher discipline at junior secondary levels.** Not all school reacted to this suggestion however, because some schools remained using English as the medium of instruction.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **higher form** and **higher discipline** interchangeable (i.e., having the same meaning)?

Pair 1117

P1: During the Tunisian revolution, Sami Fehri hosted a talk show in which he supported the “new freedom” granted by the former Tunisian president Zine El Abidine Ben Ali. In this talk show, Fehri displayed scenes of jubilation in the symbolic Bourguiba Avenue where manifestations against the old regime occurred. In 2012, Fehri faced corruption charges and was arrested upon allegations of “the illicit use of the Tunisian Television Establishment’s resources”. “I will go to prison with dignity,” said Sami Fahri, during his interview with Express FM.

P2: During the Tunisian revolution, Sami Fehri hosted a talk show in which he supported the “new freedom” granted by the former Tunisian president Zine El Abidine Ben Ali. In this talk show, Fehri displayed scenes of jubilation in the symbolic Bourguiba Avenue where manifestations against the old regime occurred. In 2012, Fehri faced corruption charges and was arrested upon allegations of “the forbidden employment of the Tunisian Television Establishment’s resources”. “I will go to prison with dignity,” said Sami Fahri, during his interview with Express FM.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **illicit use** and **forbidden employment** interchangeable (i.e., having the same meaning)?

Pair 1118

P1: BumperCar is a Mac OS X web browser by Freeverse Software that is aimed at kids. BumperCar contains extensive parental controls including filtering, personal information blocking, whitelists, blacklists, time limits and full support for ICRA tags. Version 2 is based on WebKit as well as some technologies from The Omni Group.

P2: BumperCar is a Mac OS X web browser by Freeverse Software that is aimed at kids. BumperCar contains extensive parental controls including filtering, personal information blocking, whitelists, blacklists, time limits and total abutment for ICRA tags. Version 2 is based on WebKit as well as some technologies from The Omni Group.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **full support** and **total abutment** interchangeable (i.e., having the same meaning)?

Pair 1119

P1: Background. An old rusty low fence swamped by shifting sand dunes had existed in the Negev desert along Israel’s Sinai Peninsula border with Egypt, mainly serving as a marker between the two countries. Smuggling of cigarettes and drugs often carried on camels by Bedouins whose tribal lands straddle the border, has been a long-term problem. In December 2005 armed infiltrations into Israel along the porous border led to calls for the construction of a security fence.

P2: Background. An old rusty low fence swamped by shifting sand dunes had existed in the Negev desert along Israel’s Sinai Peninsula border with Egypt, mainly serving as a marker between the two countries. Smuggling of cigarettes and drugs often carried on camels by Bedouins whose tribal lands straddle the border, has been a continuous issue. In December 2005 armed infiltrations into Israel along the porous border led to calls for the construction of a security fence.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **long-term problem** and **continuous issue** interchangeable (i.e., having the same meaning)?

Pair 1120

P1: Drug treatment may also be advised, particularly the use of NSAIDs, or other anti-inflammatory and analgesic medications. In all cases, the first step is to eliminate the root cause of pain to the horse so that the animal is not reinjured after treatment. Degenerative or arthritic back pain is much harder to treat, so prompt attention is advisable in order to avoid a long-term problem. If it seems the back pain is caused by an ill-fitting saddle, the saddle should be changed or adjusted, though as an interim measure a horse can be ridden without a saddle or with a saddle pad that is

either thicker or thinner, as needed to reduce saddle pressure.

P2: Drug treatment may also be advised, particularly the use of NSAIDs, or other anti-inflammatory and analgesic medications. In all cases, the first step is to eliminate the root cause of pain to the horse so that the animal is not reinjured after treatment. Degenerative or arthritic back pain is much harder to treat, so prompt attention is advisable in order to avoid a permanent complication. If it seems the back pain is caused by an ill-fitting saddle, the saddle should be changed or adjusted, though as an interim measure a horse can be ridden without a saddle or with a saddle pad that is either thicker or thinner, as needed to reduce saddle pressure.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are long-term problem and permanent complication interchangeable (i.e., having the same meaning)?

Pair 1121

P1: Before establishing his own label, Koski worked the major part of his career at the Finnish textile house Marimekko, where he started as an Assistant Designer in 2003. Two years later Koski was promoted to Fashion Designer and he began to design collections carrying his own name under the Marimekko brand. The working experience was significant for the young designer and allowed Koski to develop his own signature style early in his career. Koski's vision was well received, and in 2008 he became the Creative Director of the company.

P2: Before establishing his own label, Koski worked the major part of his career at the Finnish textile house Marimekko, where he started as an Assistant Designer in 2003. Two years later Koski was promoted to Fashion Designer and he began to design collections carrying his own name under the Marimekko brand. The job training was significant for the young designer and allowed Koski to develop his own signature style early in his career. Koski's vision was well received, and in 2008 he became the Creative Director of the company.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are working experience and job training interchangeable (i.e., having the same meaning)?

Pair 1122

P1: Edward King, Viscount Kingsborough (16 November 1795 – 27 February 1837) was an Irish antiquarian who sought to prove that the indigenous peoples of the Americas were a Lost Tribe of Israel. His principal contribution was in making available facsimiles of ancient documents and some of the earliest explorers' reports on pre-Columbian ruins and Maya civilisation. He was the eldest son of George King, 3rd Earl of Kingston, Lord Kingsborough, the latter a Tory, of Mitchelstown Castle, County Cork.

P2: Edward King, Viscount Kingsborough (16 November 1795 – 27 February 1837) was an Irish antiquarian who sought to prove that the indigenous peoples of the Americas were a Lost Tribe of Israel. His central improvement was in making available facsimiles of ancient documents and some of the earliest explorers' reports on pre-Columbian ruins and Maya civilisation. He was the eldest son of George King, 3rd Earl of Kingston, Lord Kingsborough, the latter a Tory, of Mitchelstown Castle, County Cork.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are principal contribution and central improvement interchangeable (i.e., having the same meaning)?

Pair 1123

P1: When NEAR disbanded SAR continued this work through its Academic Freedom Media Review, Scholars-in-Prison Project and Academic Freedom Monitoring Project. In 2002, SAR partnered with the Institute of International Education which was then establishing IIE's Scholar Rescue Fund. The Fund provides financial support to scholars facing grave threats so that they may escape dangerous conditions and continue their academic work in safety. In 2003,

the network headquarters relocated from the University of Chicago to the New York City campus of New York University.

P2: When NEAR disbanded SAR continued this work through its Academic Freedom Media Review, Scholars-in-Prison Project and Academic Freedom Monitoring Project. In 2002, SAR partnered with the Institute of International Education which was then establishing IIE's Scholar Rescue Fund. The Fund provides financial support to scholars facing heavy risks so that they may escape dangerous conditions and continue their academic work in safety. In 2003, the network headquarters relocated from the University of Chicago to the New York City campus of New York University.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are grave threats and heavy risks interchangeable (i.e., having the same meaning)?

Pair 1124

P1: A transmission line with a characteristic impedance of formula_2 may be universally considered to have a characteristic admittance of formula_3 where Any impedance, formula_5 expressed in ohms, may be normalised by dividing it by the characteristic impedance, so the normalised impedance using the lower case "z" is given by Similarly, for normalised admittance The SI unit of impedance is the ohm with the symbol of the upper case Greek letter omega (Ω) and the SI unit for admittance is the siemens with the symbol of an upper case letter S. Normalised impedance and normalised admittance are dimensionless. Actual impedances and admittances must be normalised before using them on a Smith chart. Once the result is obtained it may be de-normalised to obtain the actual result. The normalised impedance Smith chart.

P2: A transmission line with a characteristic impedance of formula_2 may be universally considered to have a characteristic admittance of formula_3 where Any impedance, formula_5 expressed in ohms, may be normalised by dividing it by the characteristic impedance, so the normalised impedance using the lower case "z" is given by Similarly, for normalised admittance The SI unit of impedance is the ohm with the symbol of the upper case Greek letter omega (Ω) and the SI unit for admittance is the siemens with the symbol of an upper case letter S. Normalised impedance and normalised admittance are dimensionless. Actual impedances and admittances must be normalised before using them on a Smith chart. Once the result is obtained it may be de-normalised to obtain the real decision. The normalised impedance Smith chart.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are actual result and real decision interchangeable (i.e., having the same meaning)?

Pair 1125

P1: Research about the treatment of apraxia has revealed four main categories: articulatory-kinematic, rate/rhythm control, intersystemic facilitation/reorganization treatments, and alternative/augmentative communication. One specific treatment method is referred to as PROMPT. This acronym stands for Prompts for Restructuring Oral Muscular Phonetic Targets, and takes a hands on multidimensional approach at treating speech production disorders. PROMPT therapists integrate physical-sensory, cognitive-linguistic, and social-emotional aspects of motor performance.

P2: Research about the treatment of apraxia has revealed four main categories: articulatory-kinematic, rate/rhythm control, intersystemic facilitation/reorganization treatments, and alternative/augmentative communication. One specific treatment method is referred to as PROMPT. This acronym stands for Prompts for Restructuring Oral Muscular Phonetic Targets, and takes a hands on multifaceted perspective at treating speech production disorders. PROMPT therapists integrate physical-sensory, cognitive-linguistic, and social-emotional aspects of motor performance.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are multidimensional approach and multifaceted perspective interchangeable (i.e., having the same meaning)?

Pair 1126

P1: 400 people were evacuated prior to Hernan's passing, while 18 people stuck on their roofs were rescued as well. Rescues were required for people trapped in houses where rainfall reached up to 2 meters (6.5 feet). Landslides and mudslides covered parts of Mexican federal highways 80 and 200 and were cleared by agency workers. Over 350 people

from Cihuatlán and Tomatlán, including 115 minors, were transferred to shelters.

P2: 400 people were evacuated prior to Hernan's passing, while 18 people stuck on their roofs were rescued as well. Rescues were required for people trapped in houses where rainfall reached up to 2 meters (6.5 feet). Landslides and mudslides covered parts of Mexican federal highways 80 and 200 and were cleared by department staff. Over 350 people from Cihuatlán and Tomatlán, including 115 minors, were transferred to shelters.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are agency workers and department staff interchangeable (i.e., having the same meaning)?

Pair 1127

P1: The rules of combat archery dictate that no archer may shoot at a light, however all may shoot at a heavy. Combat archery can be an interesting challenge for participants, as it involves shooting at moving targets, and can be used to re-create battles. In Australia, it is more common for 'lights' to wear enough protection that they can shoot at each other as well. It is important to note the strict separation between archery practised as a competitive sport and archery as an impalement art.

P2: The rules of combat archery dictate that no archer may shoot at a light, however all may shoot at a heavy. Combat archery can be an interesting challenge for participants, as it involves shooting at moving targets, and can be used to re-create battles. In Australia, it is more common for 'lights' to wear adequate security that they can shoot at each other as well. It is important to note the strict separation between archery practised as a competitive sport and archery as an impalement art.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are enough protection and adequate security interchangeable (i.e., having the same meaning)?

Pair 1128

P1: Protection of management frames as specified in the IEEE 802.11w amendment is also enforced by the WPA3 specifications. Hardware support. WPA has been designed specifically to work with wireless hardware produced prior to the introduction of WPA protocol, which provides inadequate security through WEP. Some of these devices support WPA only after applying firmware upgrades, which are not available for some legacy devices.

P2: Protection of management frames as specified in the IEEE 802.11w amendment is also enforced by the WPA3 specifications. Hardware support. WPA has been designed specifically to work with wireless hardware produced prior to the introduction of WPA protocol, which provides poor safety measures through WEP. Some of these devices support WPA only after applying firmware upgrades, which are not available for some legacy devices.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are inadequate security and poor safety measures interchangeable (i.e., having the same meaning)?

Pair 1129

P1: Pavilions were erected over the springs. Towards the end of the 18th century there was a new development: the spring houses were expanded with gallery sections. In the 19th century the drinking hall became a well-known type of building. Great thermal baths emerged in Germany especially after the gaming ban in 1872.

P2: Pavilions were erected over the springs. Towards the end of the 18th century there was a new development: the spring houses were expanded with gallery sections. In the 19th century the drinking hall became a favorite classification of building. Great thermal baths emerged in Germany especially after the gaming ban in 1872.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **well-known type** and **favorite classification** interchangeable (i.e., having the same meaning)?

Pair 1130

P1: According to a HSBC report in 2012, Malaysia will become the world's 21st largest economy by 2050, with a GDP of \$1.2 trillion (Year 2000 dollars) and a GDP per capita of \$29,247 (Year 2000 dollars). The report also says "The electronic equipment, petroleum, and liquefied natural gas producer will see a substantial increase in income per capita. Malaysian life expectancy, **relatively high level** of schooling, and above average fertility rate will help in its rapid expansion." Viktor Shvets, the managing director in Credit Suisse, has said "Malaysia has all the right ingredients to become a developed nation."

P2: According to a HSBC report in 2012, Malaysia will become the world's 21st largest economy by 2050, with a GDP of \$1.2 trillion (Year 2000 dollars) and a GDP per capita of \$29,247 (Year 2000 dollars). The report also says "The electronic equipment, petroleum, and liquefied natural gas producer will see a substantial increase in income per capita. Malaysian life expectancy, **considerably large degree** of schooling, and above average fertility rate will help in its rapid expansion." Viktor Shvets, the managing director in Credit Suisse, has said "Malaysia has all the right ingredients to become a developed nation."

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **relatively high level** and **considerably large degree** interchangeable (i.e., having the same meaning)?

Pair 1131

P1: Santa's Little Helper is tethered in the backyard. There is an empty beer can there. Santa's Little Helper flips the can into the air, balancing it on his nose and drinking the **last few drops**. A "Springfield Shopper" reporter takes a photo of it which appears on the front page of the newspaper.

P2: Santa's Little Helper is tethered in the backyard. There is an empty beer can there. Santa's Little Helper flips the can into the air, balancing it on his nose and drinking the **concluding several beads**. A "Springfield Shopper" reporter takes a photo of it which appears on the front page of the newspaper.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **last few drops** and **concluding several beads** interchangeable (i.e., having the same meaning)?

Pair 1132

P1: Adolescents who ate six to seven family meals per week, compared to those who ate three or fewer family meals per week, were 38% less likely to report poor consumption of vegetables, 31% less likely to report poor consumption of fruits, and 27% less likely to report poor consumption of dairy foods. The results of a survey in the UK published in 2010 imply that children raised by their grandparents are more likely to be obese as adults than those raised by their parents. **An american study** released in 2011 found the more mothers work the more children are more likely to be overweight or obese. Developmental factors.

P2: Adolescents who ate six to seven family meals per week, compared to those who ate three or fewer family meals per week, were 38% less likely to report poor consumption of vegetables, 31% less likely to report poor consumption of fruits, and 27% less likely to report poor consumption of dairy foods. The results of a survey in the UK published in 2010 imply that children raised by their grandparents are more likely to be obese as adults than those raised by their parents. **An investigation from the United States** released in 2011 found the more mothers work the more children are more likely to be overweight or obese. Developmental factors.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **american study** and **investigation from the United States** interchangeable (i.e., having the same meaning)?

Pair 1133

P1: The finals day of competition will be judged by a new panel of adjudicators, and will operate with the same three-round structure as the pre-2019 system. The number of dancers progressing to the set dance round, as a proportion of the original entry numbers, will remain the same. , An Coimisiún was considering retaining the pre-2019 system for all male sections and **female age groups** U11 and U12. Team championships.

P2: The finals day of competition will be judged by a new panel of adjudicators, and will operate with the same three-round structure as the pre-2019 system. The number of dancers progressing to the set dance round, as a proportion of the original entry numbers, will remain the same. , An Coimisiún was considering retaining the pre-2019 system for all male sections and **women in all age brackets** U11 and U12. Team championships.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **female age groups** and **women in all age brackets** interchangeable (i.e., having the same meaning)?

Pair 1134

P1: Series 8: 2014. This series again consists of three stories, each divided into two parts in the UK. In Belgium and the United States, the stories were not divided, rather each is shown as an **entire piece**. (Repeat showings in the UK, on ITV3, were similarly complete.)

P2: Series 8: 2014. This series again consists of three stories, each divided into two parts in the UK. In Belgium and the United States, the stories were not divided, rather each is shown as an **integral part**. (Repeat showings in the UK, on ITV3, were similarly complete.)

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **entire piece** and **integral part** interchangeable (i.e., having the same meaning)?

Pair 1135

P1: Appearance. Because the interior of the atrium presents a complex background of doors, windows, balconies and stairwells capped by a coffered ceiling, Calder stressed simplicity in the design of the sculpture. Similarly, because of the polished white marble that dominates the space, he decided on a matte black surface for the **entire piece**. The mountains-- the stabile-- are made up of four flat, angular steel plates with five mountain peaks among them and two archlike legs, one branching off the other.

P2: Appearance. Because the interior of the atrium presents a complex background of doors, windows, balconies and stairwells capped by a coffered ceiling, Calder stressed simplicity in the design of the sculpture. Similarly, because of the polished white marble that dominates the space, he decided on a matte black surface for the **complete section**. The mountains-- the stabile-- are made up of four flat, angular steel plates with five mountain peaks among them and two archlike legs, one branching off the other.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **entire piece** and **complete section** interchangeable (i.e., having the same meaning)?

Pair 1136

P1: Women were much less likely to migrate to other parts of Spain in this period. Economic demands for an increase in women's literacy rates improvement were also not present in the period between 1860 and 1910 in industries such as education, railways, religion, capital markets and the mining industry. Only in 1910 and only in the railway industry would there be an economic model that necessitated or influenced more women becoming literate. The inverse was true for men, with multiple industries having needs for a literate male population, which resulted in marked increased in male literacy over the same period.

P2: Women were much less likely to migrate to other parts of Spain in this period. Economic demands for an increase in women's literacy rates improvement were also not present in the period between 1860 and 1910 in industries such as education, railways, religion, capital markets and the mining industry. Only in 1910 and only in the railway industry would there be an economic framework that necessitated or influenced more women becoming literate. The inverse was true for men, with multiple industries having needs for a literate male population, which resulted in marked increased in male literacy over the same period.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are economic model and economic framework interchangeable (i.e., having the same meaning)?

Pair 1137

P1: We had cast another actor in the lead role. But when he couldn't do it due to certain personal issues, it was relatively easy for me to step into the shoes of the character." another important role was given to Jishnu, who had acted with Siddharth in "Nammal". "Nidra" marks Jishnu's comeback, who took a brief hiatus to pursue projects outside filmdom.

P2: We had cast another actor in the lead role. But when he couldn't do it due to certain personal issues, it was relatively easy for me to step into the shoes of the character." one more critical function was given to Jishnu, who had acted with Siddharth in "Nammal". "Nidra" marks Jishnu's comeback, who took a brief hiatus to pursue projects outside filmdom.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are another important role and one more critical function interchangeable (i.e., having the same meaning)?

Pair 1138

P1: She's just such a warm and outgoing person and just such a good distinct voice." He also added that they have been "looking forward to doing something together" ever since they covered "Hotline Bling" in 2015. "I made this record...I produced this after an unsuccessful party in L.A., which is what all these records are based off of on my album. But I just went home played these, I have my little Juno keyboard over there that I had.

P2: She's just such a warm and outgoing person and just such a good distinct voice." He also added that they have been "looking forward to doing something together" ever since they covered "Hotline Bling" in 2015. "I made this record...I produced this after an ill-fated blowout in L.A., which is what all these records are based off of on my album. But I just went home played these, I have my little Juno keyboard over there that I had.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are unsuccessful party and ill-fated blowout interchangeable (i.e., having the same meaning)?

Pair 1139

P1: Excessive Total Harmonic Distortions (THD) and low power factor are costly at every level of the electricity market. The impact of THD is difficult to estimate, but it can potentially cause heat, vibrations, malfunctioning and even meltdowns. The power factor is the ratio of real to apparent power in a power system. Drawing more current results

in a lower power factor.

P2: Excessive Total Harmonic Distortions (THD) and low power factor are costly at every level of the electricity market. The impact of THD is difficult to estimate, but it can potentially cause heat, vibrations, malfunctioning and even meltdowns. The power factor is the ratio of real to probable force in a power system. Drawing more current results in a lower power factor.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are apparent power and probable force interchangeable (i.e., having the same meaning)?

Pair 1140

P1: An avid hunter, Bracchio was one day pursuing a wild boar when the boar escaped into the hut of a Gallo-Roman hermit named Emilian, who offered the huntsman some wild fruit. Cowed by the hermit's presence, Bracchio's dogs refused to attack the boar. Intrigued by the hermit and his apparent power, Bracchio and the hermit discussed spiritual matters. After the death of his lord Sigiswald, Bracchio soon gave up his worldly life and became Emilian's spiritual student for three years.

P2: An avid hunter, Bracchio was one day pursuing a wild boar when the boar escaped into the hut of a Gallo-Roman hermit named Emilian, who offered the huntsman some wild fruit. Cowed by the hermit's presence, Bracchio's dogs refused to attack the boar. Intrigued by the hermit and his supposed abilities, Bracchio and the hermit discussed spiritual matters. After the death of his lord Sigiswald, Bracchio soon gave up his worldly life and became Emilian's spiritual student for three years.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are apparent power and supposed abilities interchangeable (i.e., having the same meaning)?

Pair 1141

P1: Parap became well known as the 2½ Mile in subsequent years, being near the Railway Workshop when the train ran in pre-World War II years. In 1919, when the England to Australia air race was announced, Darwin airport was established in the suburb of Parap to act as the Australian Terminal. Darwin hence operated two airports, a civilian airport and a military field. In 1945, the Department of Aviation made the existing Darwin military airfield available for civil aviation purposes.

P2: Parap became well known as the 2½ Mile in subsequent years, being near the Railway Workshop when the train ran in pre-World War II years. In 1919, when the England to Australia air race was announced, Darwin airport was established in the suburb of Parap to act as the Australian Terminal. Darwin hence operated two airports, a civilian airport and a soldier type runway. In 1945, the Department of Aviation made the existing Darwin military airfield available for civil aviation purposes.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are military field and soldier type runway interchangeable (i.e., having the same meaning)?

Pair 1142

P1: attributed a peak in thermo-stimulated depolarization (TSD) current to the existence of a proton-ordered ferroelectric phase. However, they could not conclusively prove that a phase transition had taken place, and Onsager pointed out that the peak could also arise from the movement of defects and lattice imperfections. Onsager suggested that experimentalists look for a dramatic change in heat capacity by performing a careful calorimetric experiment. A phase transition to ice XI was first identified experimentally in 1972 by Shuji Kawada and others.

P2: attributed a peak in thermo-stimulated depolarization (TSD) current to the existence of a proton-ordered ferroelectric phase. However, they could not conclusively prove that a phase transition had taken place, and Onsager pointed out that the peak could also arise from the movement of defects and lattice imperfections. **Onsager suggested that experimentalists look for a climactic variation in heat capacity by performing a careful calorimetric experiment.** A phase transition to ice XI was first identified experimentally in 1972 by Shuji Kawada and others.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **dramatic change** and **climactic variation** interchangeable (i.e., having the same meaning)?

Pair 1143

P1: It's undoubtedly one of the better feel-good-romantic films in recent times" and rated the film 3.5/5. Oneindia Entertainment gave a review stating "Though Oohalu Gusagusalde has simple storyline, Srinivas Avasarala has created fantastic screenplay. **The director has good grip on the narration of the whole show.** Overall, Oohalu Gusagusalde is a good romantic comedy entertainer and it will impress audience in A centres.

P2: It's undoubtedly one of the better feel-good-romantic films in recent times" and rated the film 3.5/5. Oneindia Entertainment gave a review stating "Though Oohalu Gusagusalde has simple storyline, Srinivas Avasarala has created fantastic screenplay. **The director has suitable grasp on the narration of the whole show.** Overall, Oohalu Gusagusalde is a good romantic comedy entertainer and it will impress audience in A centres.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **good grip** and **suitable grasp** interchangeable (i.e., having the same meaning)?

Pair 1144

P1: The Hong Kong government provides the following estimates for mid-2013: "Median age": 45.0 (2013 est.) Language. **As a former British colony, Hong Kong has 2 official languages: English, and Chinese, although the specific variety of Chinese is not specified.** The majority of the population uses Cantonese as their usual spoken language.

P2: The Hong Kong government provides the following estimates for mid-2013: "Median age": 45.0 (2013 est.) Language. **As a former British colony, Hong Kong has 2 official languages: English, and Chinese, although the particular assortment of Chinese is not specified.** The majority of the population uses Cantonese as their usual spoken language.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **specific variety** and **particular assortment** interchangeable (i.e., having the same meaning)?

Pair 1145

P1: The minimum technical requirements for this project are: broadcast standard DVB-T2, ensuring the coverage of up to 40% of the population until 1 July 2014, and 70% of the population up to 17 June 2015, and the possibility of using the broadcasting premises that belongs to Radiocom. On 17 June 2015, Romania turned off analog broadcasting, and started broadcasting with DVB-T2 technology, but with very low coverage, and a very reduced number of broadcasts available. **Because of low coverage, Romania will still broadcast TVR1 in analog format on VHF until 31 December 2015.** DVB-T continues to be available for an undetermined period of time, only in Sibiu (Ch 47 and Ch 54) and Bucharest (Ch 54 and Ch 59).

P2: The minimum technical requirements for this project are: broadcast standard DVB-T2, ensuring the coverage of up to 40% of the population until 1 July 2014, and 70% of the population up to 17 June 2015, and the possibility of using the broadcasting premises that belongs to Radiocom. On 17 June 2015, Romania turned off analog broadcasting, and started broadcasting with DVB-T2 technology, but with very low coverage, and a very reduced number of broadcasts available. **Because of poor range, Romania will still broadcast TVR1 in analog format on VHF until 31 December 2015.** DVB-T continues to be available for an undetermined period of time, only in Sibiu (Ch 47 and Ch 54) and Bucharest (

Ch 54 and Ch 59).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **low coverage** and **poor range** interchangeable (i.e., having the same meaning)?

Pair 1146

P1: The UWC Tag Team Championship is a tag team championship in the United Wrestling Coalition promotion. Being a professional wrestling championship, it is not won via direct competition; it is instead won via a predetermined ending to a match or awarded to a wrestler because of a wrestling angle. It became **official title** on March 21, 1998 when Mr. Meaner and The Menace were awarded the titles. The championships are currently held by the Perfect Hooligans (Kurt Bale and the Hollywood Hooligan), who are in their first reign as champions.

P2: The UWC Tag Team Championship is a tag team championship in the United Wrestling Coalition promotion. Being a professional wrestling championship, it is not won via direct competition; it is instead won via a predetermined ending to a match or awarded to a wrestler because of a wrestling angle. It became **formal label** on March 21, 1998 when Mr. Meaner and The Menace were awarded the titles. The championships are currently held by the Perfect Hooligans (Kurt Bale and the Hollywood Hooligan), who are in their first reign as champions.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **official title** and **formal label** interchangeable (i.e., having the same meaning)?

Pair 1147

P1: Heating. Two key factors to consider when irradiating gold nanoparticles in cancer cells are the lattice cooling rate and lattice heat content. The lattice cooling rate is how **fast heat** in the particle is distributed to its surroundings. If the cooling rate for a particle is too low, the lattice heat content can be increased with moderate energy radiation (40 $\mu\text{J}/\text{fs}$ with 100-fs laser at 800 nm) to the point where gold nanorods can be melted to create spherical nanoparticles which become photothermally inactive.

P2: Heating. Two key factors to consider when irradiating gold nanoparticles in cancer cells are the lattice cooling rate and lattice heat content. The lattice cooling rate is how **rapidly high temperature** in the particle is distributed to its surroundings. If the cooling rate for a particle is too low, the lattice heat content can be increased with moderate energy radiation (40 $\mu\text{J}/\text{fs}$ with 100-fs laser at 800 nm) to the point where gold nanorods can be melted to create spherical nanoparticles which become photothermally inactive.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **fast heat** and **rapidly high temperature** interchangeable (i.e., having the same meaning)?

Pair 1148

P1: Fire hydrant marker plates have a red border. Other water hydrants may have a blue border. A gas hydrant would have a yellow background instead of a **white one** for fire hydrants. All of them have large central T with the installation identification on top of it - an "H" or older "UH" is located in the ground, a "OH" is above ground, followed by the pipe inner diameter in millimeters (with a small 80 mm in residential areas).

P2: Fire hydrant marker plates have a red border. Other water hydrants may have a blue border. A gas hydrant would have a yellow background instead of a **colorless option** for fire hydrants. All of them have large central T with the installation identification on top of it - an "H" or older "UH" is located in the ground, a "OH" is above ground, followed by the pipe inner diameter in millimeters (with a small 80 mm in residential areas).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **white one** and **colorless option** interchangeable (i.e., having the same meaning)?

Pair 1149

P1: They traveled to Earth, and temporarily took up residence with the Fallen Angels in New York City. After several trips to the modern era of Earth-616 via magic, time travel, and teleportation by mutants, the pair eventually settled in the Savage Land of Earth-616. While residing in the Savage Land, the **forgotten world** was invaded by the power hungry **Roxxon Oil Company**. Ka-Zar, ruler of the Savage Land, recruited Moon-Boy and Devil Dinosaur to help fight off the invasion, and Moon-Boy proved his worth as fighter during the following war.

P2: They traveled to Earth, and temporarily took up residence with the Fallen Angels in New York City. After several trips to the modern era of Earth-616 via magic, time travel, and teleportation by mutants, the pair eventually settled in the Savage Land of Earth-616. While residing in the Savage Land, the **lost planet** was invaded by the power hungry **Roxxon Oil Company**. Ka-Zar, ruler of the Savage Land, recruited Moon-Boy and Devil Dinosaur to help fight off the invasion, and Moon-Boy proved his worth as fighter during the following war.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **forgotten world** and **lost planet** interchangeable (i.e., having the same meaning)?

Pair 1150

P1: Normative management. The normative management dimension deals with principles, norms, and strategies which are aimed to ensure the surviving capabilities of a company through the preservation of its identity. Bleicher states that “because of its **constitutive role**, normative management functions as the basis for all activities of management”. Through vision, mission, and purpose statements, normative management codifies the norms, principles, and strategies that fulfill the company’s general aim.

P2: Normative management. The normative management dimension deals with principles, norms, and strategies which are aimed to ensure the surviving capabilities of a company through the preservation of its identity. Bleicher states that “because of its **fundamental capacity**, normative management functions as the basis for all activities of management”. Through vision, mission, and purpose statements, normative management codifies the norms, principles, and strategies that fulfill the company’s general aim.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **constitutive role** and **fundamental capacity** interchangeable (i.e., having the same meaning)?

Pair 1151

P1: In 1972 the first solar watch, “Heliomat”, was produced as well as the first quartz movements. In the following years Kienzle was the first company to present a quartz travel alarm clock. In 1986 Kienzle developed the first solar watch with **light conditions** and a polycrystalline solar element. In the early 1990s, Kienzle developed the most water-resistant watch in the world which was resistant up to 12,000 metres.

P2: In 1972 the first solar watch, “Heliomat”, was produced as well as the first quartz movements. In the following years Kienzle was the first company to present a quartz travel alarm clock. In 1986 Kienzle developed the first solar watch with **illumination settings** and a polycrystalline solar element. In the early 1990s, Kienzle developed the most water-resistant watch in the world which was resistant up to 12,000 metres.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **light conditions** and **illumination settings** interchangeable (i.e., having the same meaning)?

Pair 1152

P1: Because the algae live in the vacuoles of the cells, they are protected from the digestive enzymes of the "Hydra". During long period of darkness, such as storms or blooms that block sunlight, algae loss starts from the tentacles, hypostome and growth region. When **light conditions** return, the algae undergo rapid multiplication and can repopulate the host in approximately two days. "Chlorella" undergo asexual reproduction which is in correlation with the division of the host.

P2: Because the algae live in the vacuoles of the cells, they are protected from the digestive enzymes of the "Hydra". During long period of darkness, such as storms or blooms that block sunlight, algae loss starts from the tentacles, hypostome and growth region. When **brightness circumstances** return, the algae undergo rapid multiplication and can repopulate the host in approximately two days. "Chlorella" undergo asexual reproduction which is in correlation with the division of the host.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **light conditions** and **brightness circumstances** interchangeable (i.e., having the same meaning)?

Pair 1153

P1: Attitudes Toward Premarital Sex. Dating in the Middle East is growing more and more popular amongst younger people in order to get to know the person before marriage. While it is becoming more socially acceptable to **date people**, premarital sex is still stigmatized for some. Various factors play a part in the attitudes toward premarital sex in the Middle East such as gender, religion, age, and general political attitudes, etc.

P2: Attitudes Toward Premarital Sex. Dating in the Middle East is growing more and more popular amongst younger people in order to get to know the person before marriage. While it is becoming more socially acceptable to **get to know individuals**, premarital sex is still stigmatized for some. Various factors play a part in the attitudes toward premarital sex in the Middle East such as gender, religion, age, and general political attitudes, etc.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **date people** and **get to know individuals** interchangeable (i.e., having the same meaning)?

Pair 1154

P1: Famous dishes. It was originally eaten by the poor monk Zhu Yuanhang. One day, he was hungry and found some old tofu in **someone's home**. He didn't care if it was cooked, he stuffed it in his mouth, and never forgot the deliciousness of this tofu.

P2: Famous dishes. It was originally eaten by the poor monk Zhu Yuanhang. One day, he was hungry and found some old tofu in **another individual's residence**. He didn't care if it was cooked, he stuffed it in his mouth, and never forgot the deliciousness of this tofu.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **someone's home** and **another individual's residence** interchangeable (i.e., having the same meaning)?

Pair 1155

P1: These boards with pointed tops are called "pickets" for their resemblance to the pointed stakes historically used by infantry to repel cavalry. Picket fences can be made of several types of materials. Historically, wood has been the most **popular material** used for picket fences. This wood can be untreated, treated, or naturally insect and rot resistant.

P2: These boards with pointed tops are called "pickets" for their resemblance to the pointed stakes historically used by infantry to repel cavalry. Picket fences can be made of several types of materials. **Historically, wood has been the most widely used element used for picket fences.** This wood can be untreated, treated, or naturally insect and rot resistant.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **popular material** and **widely used element** interchangeable (i.e., having the same meaning)?

Pair 1156

P1: He offers Grandfather and Uncle a pretty sum if they extract the bleeding heart of Frere Andre from the Cathedral so he can insert the heart into Hubert's corpse, and thus find out where the human soul dwells. On Hallowe'en, he revives Hubert, Marie strangles the British diplomat, and Jean-Baptiste is finally let out of jail. **Hubert comes back to the Desouche house, looking like a Zombie made of different body parts from different corpses.** When he sees Mother sleeping it becomes apparent that it is not Hubert at all but Angus dwelling in the mangled body.

P2: He offers Grandfather and Uncle a pretty sum if they extract the bleeding heart of Frere Andre from the Cathedral so he can insert the heart into Hubert's corpse, and thus find out where the human soul dwells. On Hallowe'en, he revives Hubert, Marie strangles the British diplomat, and Jean-Baptiste is finally let out of jail. **Hubert comes back to the Desouche house, looking like a Zombie made of various corporeal pieces from different corpses.** When he sees Mother sleeping it becomes apparent that it is not Hubert at all but Angus dwelling in the mangled body.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **different body parts** and **various corporeal pieces** interchangeable (i.e., having the same meaning)?

Pair 1157

P1: Some Circassians who emigrated to Circassia have returned after becoming disillusioned with the low standard of living in the Circassian homeland, though some have stayed. Socioeconomic position. **In 2012, it was reported that 80% of the younger generation of Circassians in Israel had a post-secondary degree.** Overall, in Israel, the percentage of adult citizens with a post-secondary degree is 49%.

P2: Some Circassians who emigrated to Circassia have returned after becoming disillusioned with the low standard of living in the Circassian homeland, though some have stayed. Socioeconomic position. **In 2012, it was reported that 80% of the adolescent group of Circassians in Israel had a post-secondary degree.** Overall, in Israel, the percentage of adult citizens with a post-secondary degree is 49%.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **younger generation** and **adolescent group** interchangeable (i.e., having the same meaning)?

Pair 1158

P1: The mouth forms a short, wide arch, and bears somewhat long furrows at the corners. Tooth rows number 24–32 in the upper and 36–42 in the lower jaw. **Each upper tooth has an angled, knife-like main cusp with smaller cusplets on the trailing side,** while each lower tooth has a single upright cusp. Five pairs of gill slits are seen.

P2: The mouth forms a short, wide arch, and bears somewhat long furrows at the corners. Tooth rows number 24–32 in the upper and 36–42 in the lower jaw. **Each upper tooth has an angled, knife-like main cusp with smaller cusplets on the rear end,** while each lower tooth has a single upright cusp. Five pairs of gill slits are seen.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **trailing side** and **rear end** interchangeable (i.e., having the same meaning)?

Pair 1159

P1: (2002: p. ?) interviewed Mohan Rai, a shaman from the **border area** of Nepal and Bhutan and belongs to the **Mongolian people of the Rai and/or Kirati**. Mohan Rai is the founder of the Shamanistic Studies and Research Centre, Baniya Goun, Naikap, Kathmandu, Nepal) In interview Rai says: 'Without the phurba inside himself, the shaman has no consciousness'...'The shaman himself is the phurba; he assumes its form in order to fly into other worlds and realities.'

P2: (2002: p. ?) interviewed Mohan Rai, a shaman from the **neighboring zone** of Nepal and Bhutan and belongs to the **Mongolian people of the Rai and/or Kirati**. Mohan Rai is the founder of the Shamanistic Studies and Research Centre, Baniya Goun, Naikap, Kathmandu, Nepal) In interview Rai says: 'Without the phurba inside himself, the shaman has no consciousness'...'The shaman himself is the phurba; he assumes its form in order to fly into other worlds and realities.'

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **border area** and **neighboring zone** interchangeable (i.e., having the same meaning)?

Pair 1160

P1: With regard to sexual orientation categories, asexuality may be argued as not being a meaningful category to add to the continuum, and instead argued as the lack of a sexual orientation or sexuality. Other arguments propose that asexuality is the denial of one's natural sexuality, and that it is a disorder caused by shame of sexuality, anxiety or sexual abuse, sometimes basing this belief on asexuals who masturbate or occasionally engage in sexual activity simply to please a romantic partner. **Within the context of sexual orientation identity politics, asexuality may pragmatically fulfill the political function of a sexual orientation identity category.** The suggestion that asexuality is a sexual dysfunction is controversial among the asexual community.

P2: With regard to sexual orientation categories, asexuality may be argued as not being a meaningful category to add to the continuum, and instead argued as the lack of a sexual orientation or sexuality. Other arguments propose that asexuality is the denial of one's natural sexuality, and that it is a disorder caused by shame of sexuality, anxiety or sexual abuse, sometimes basing this belief on asexuals who masturbate or occasionally engage in sexual activity simply to please a romantic partner. **Within the context of sexual orientation identity politics, asexuality may pragmatically fulfill the governmental role of a sexual orientation identity category.** The suggestion that asexuality is a sexual dysfunction is controversial among the asexual community.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **political function** and **governmental role** interchangeable (i.e., having the same meaning)?

Pair 1161

P1: The 16 political districts are covering only few parts of Gera, but not the central urban areas, instead usually rural districts got incorporated during the second half of the 20th century. Each political district can (but doesn't have to) consist of more than one village. **Each political district elects an own district council and a district mayor, whereas the statistical districts don't have any political function.** The main urban quarters are the city centre, Untermhaus (incorporated 1919) in the west, Langenberg (1950), Tinz (1919) and Bieblach (1905) in the north, Leumnitz (1919) in the east, Pforten (1919) and Zwötzen (1919) in the south-east as well as Debschwitz (1912) and Lusan (1919) in the south-west.

P2: The 16 political districts are covering only few parts of Gera, but not the central urban areas, instead usually rural districts got incorporated during the second half of the 20th century. Each political district can (but doesn't have to) consist of more than one village. **Each political district elects an own district council and a district mayor, whereas the statistical districts don't have any legislative purpose.** The main urban quarters are the city centre, Untermhaus (incorporated 1919) in the west, Langenberg (1950), Tinz (1919) and Bieblach (1905) in the north, Leumnitz (1919) in the east, Pforten (1919) and Zwötzen (1919) in the south-east as well as Debschwitz (1912) and Lusan (1919) in the south-west.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **political function** and **legislative purpose** interchangeable (i.e., having the same meaning)?

Pair 1162

P1: Some contemporary ivory tags show the Nebty name written with the single eye symbol only. Thus, the scholars also read Semerkhet's throne name as "Iry" (meaning "guardian") and the Nebty name as "Iry-Nebty" (meaning "guardian of the Two Ladies"). This reconstruction is strengthened by the observation that Semerkhet was the first king using the "Nebty" title in its **ultimate form**. For unknown reason Semerkhet did not use the "Nebuy" title of his predecessor.

P2: Some contemporary ivory tags show the Nebty name written with the single eye symbol only. Thus, the scholars also read Semerkhet's throne name as "Iry" (meaning "guardian") and the Nebty name as "Iry-Nebty" (meaning "guardian of the Two Ladies"). This reconstruction is strengthened by the observation that Semerkhet was the first king using the "Nebty" title in its **fundamental mode**. For unknown reason Semerkhet did not use the "Nebuy" title of his predecessor.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **ultimate form** and **fundamental mode** interchangeable (i.e., having the same meaning)?

Pair 1163

P1: Pocket tracks are a variation on the centre track, accessible only from one end. Some storage tracks have a short stub extending beyond the convergence back to the service tracks used to store work cars. Storage/centre tracks are found in the vicinity of the following stations: Other **track features**. Track configurations become more complicated where lines meet (at the Spadina–St.

P2: Pocket tracks are a variation on the centre track, accessible only from one end. Some storage tracks have a short stub extending beyond the convergence back to the service tracks used to store work cars. Storage/centre tracks are found in the vicinity of the following stations: Other **path characteristics**. Track configurations become more complicated where lines meet (at the Spadina–St.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **track features** and **path characteristics** interchangeable (i.e., having the same meaning)?

Pair 1164

P1: Each scenario is simulated on a dedicated computer. The simulations produce dynamic forecasts of traffic conditions at a detailed, local level for the next 30–60 minutes. Each simulation considers a **concrete set** of actions that might be applied in order to improve the network situation. One of the scenarios always corresponds to the 'do nothing' case.

P2: Each scenario is simulated on a dedicated computer. The simulations produce dynamic forecasts of traffic conditions at a detailed, local level for the next 30–60 minutes. Each simulation considers a **specific group** of actions that might be applied in order to improve the network situation. One of the scenarios always corresponds to the 'do nothing' case.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **concrete set** and **specific group** interchangeable (i.e., having the same meaning)?

Pair 1165

P1: The heresiographers, whose aim was to categorize the divergent beliefs of the Kharijites, invented the Sufriyya to accommodate those groups who did not fit neatly anywhere else. As such, there was only one moderate Kharijite current, which might have been called "Sufri". The moderates condemned the militancy of the Azariqa and Najdat but were otherwise lacking in a **concrete set** of doctrines. Jabir and Abu Ubayda may have been prominent figures in the moderate movement.

P2: The heresiographers, whose aim was to categorize the divergent beliefs of the Kharijites, invented the Sufriyya to accommodate those groups who did not fit neatly anywhere else. As such, there was only one moderate Kharijite current, which might have been called "Sufri". The moderates condemned the militancy of the Azariqa and Najdat but were otherwise lacking in a **detailed series** of doctrines. Jabir and Abu Ubayda may have been prominent figures in the moderate movement.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **concrete set** and **detailed series** interchangeable (i.e., having the same meaning)?

Pair 1166

P1: There are a select group of products that should be sold based primarily upon their price and this includes all: consumables that have very little direct impact upon the consumer. Examples include items like: sand, gravel, and aggregate used in construction. With the advent of the Internet, price, service and support are often the only **contact points** with the customer. Identical products shipped across state lines with no tax have no other differentiators.

P2: There are a select group of products that should be sold based primarily upon their price and this includes all: consumables that have very little direct impact upon the consumer. Examples include items like: sand, gravel, and aggregate used in construction. With the advent of the Internet, price, service and support are often the only **communication moments** with the customer. Identical products shipped across state lines with no tax have no other differentiators.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **contact points** and **communication moments** interchangeable (i.e., having the same meaning)?

Pair 1167

P1: This asteroid would originally have been 26% water by mass, close to the water content of Ceres. This evidence suggests that a planet, with a rocky surface similar to Earth's, may have existed in the past, with the asteroid thus being an artifact from this period, now possibly part of a debris field from the hypothetical planet's breakup. Such a planet would have had both a rocky surface and water, **two key ingredients** for life. The researchers used the Cosmic Origins Spectrograph on the Hubble Space Telescope to determine the elemental composition.

P2: This asteroid would originally have been 26% water by mass, close to the water content of Ceres. This evidence suggests that a planet, with a rocky surface similar to Earth's, may have existed in the past, with the asteroid thus being an artifact from this period, now possibly part of a debris field from the hypothetical planet's breakup. Such a planet would have had both a rocky surface and water, **2 important elements** for life. The researchers used the Cosmic Origins Spectrograph on the Hubble Space Telescope to determine the elemental composition.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **two key ingredients** and **2 important elements** interchangeable (i.e., having the same meaning)?

Pair 1168

P1: It is often called a collapsed lung, although that term may also refer to pneumothorax. It is a very common finding in chest x-rays and other radiological studies, and may be caused by normal exhalation or by various medical conditions. Although frequently described as a collapse of lung tissue, atelectasis is not synonymous with a pneumothorax, which is

a more **specific condition** that features atelectasis. Acute atelectasis may occur as a post-operative complication or as a result of surfactant deficiency.

P2: It is often called a collapsed lung, although that term may also refer to pneumothorax. It is a very common finding in chest x-rays and other radiological studies, and may be caused by normal exhalation or by various medical conditions. Although frequently described as a collapse of lung tissue, atelectasis is not synonymous with a pneumothorax, which is a more **specialized ailment** that features atelectasis. Acute atelectasis may occur as a post-operative complication or as a result of surfactant deficiency.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **specific condition** and **specialized ailment** interchangeable (i.e., having the same meaning)?

Pair 1169

P1: In 1902, Sir William J. Gage (owner of Gage Publishing, a publishing house specializing in school text books) purchased a 3.25 acres (1.3 hectares) part of the gardens and lawns of the Alder Lea estate (now called Alderlea) that had been built on Main Street by Kenneth Chisolm in 1867 to 1870. (Chisolm, a merchant and founding father of Brampton, had been the Town reeve, then warden of Peel County, then MPP for Brampton and eventually, Registrar of Peel County.) Sir William donated 1.7 acres (0.7 hectares) of the property to the town, with a **specific condition** that it be made into a park. Citizens donated \$1,054 and the town used the funds to purchase extra land to ensure a larger park.

P2: In 1902, Sir William J. Gage (owner of Gage Publishing, a publishing house specializing in school text books) purchased a 3.25 acres (1.3 hectares) part of the gardens and lawns of the Alder Lea estate (now called Alderlea) that had been built on Main Street by Kenneth Chisolm in 1867 to 1870. (Chisolm, a merchant and founding father of Brampton, had been the Town reeve, then warden of Peel County, then MPP for Brampton and eventually, Registrar of Peel County.) Sir William donated 1.7 acres (0.7 hectares) of the property to the town, with a **distinct constraint** that it be made into a park. Citizens donated \$1,054 and the town used the funds to purchase extra land to ensure a larger park.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **specific condition** and **distinct constraint** interchangeable (i.e., having the same meaning)?

Pair 1170

P1: Significantly, the French-language term contains no indication of subject-matter, unlike the American terms "comics" and "funnies", which imply an art form not to be taken seriously. The distinction of comics as "le neuvième art" (literally, "the ninth art") is prevalent in French scholarship on the form, as is the concept of comics criticism and scholarship itself. Relative to the **respective size** of their populations, the innumerable authors in France and Belgium publish a high volume of comic books. In North America, the more serious Franco-Belgian comics are often seen as equivalent to graphic novels, but whether they are long or short, bound or in magazine format, in Europe there is no need for a more sophisticated term, as the art's name does not itself imply something frivolous.

P2: Significantly, the French-language term contains no indication of subject-matter, unlike the American terms "comics" and "funnies", which imply an art form not to be taken seriously. The distinction of comics as "le neuvième art" (literally, "the ninth art") is prevalent in French scholarship on the form, as is the concept of comics criticism and scholarship itself. Relative to the **specific proportion** of their populations, the innumerable authors in France and Belgium publish a high volume of comic books. In North America, the more serious Franco-Belgian comics are often seen as equivalent to graphic novels, but whether they are long or short, bound or in magazine format, in Europe there is no need for a more sophisticated term, as the art's name does not itself imply something frivolous.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **respective size** and **specific proportion** interchangeable (i.e., having the same meaning)?

Pair 1171

P1: The Lord then revealed Himself and told Rangadasa that he had not been steadfast and had succumbed to temptation. However, in acceptance of Rangadasa's devoted service to Him till then, the Lord blessed Rangadasa that he would be reborn as an affluent ruler of a province and would enjoy the earthly pleasures. He would continue to serve the Lord, construct a beautiful temple with a vimana and high surrounding walls, and thereby earn eternal glory. Soon the site was forgotten and an ant-hill formed over the temple.

P2: The Lord then revealed Himself and told Rangadasa that he had not been steadfast and had succumbed to temptation. However, in acceptance of Rangadasa's devoted service to Him till then, the Lord blessed Rangadasa that he would be reborn as an affluent ruler of a province and would enjoy the earthly pleasures. He would continue to serve the Lord, construct a beautiful temple with a vimana and high surrounding walls, and thereby earn never-ending honor. Soon the site was forgotten and an ant-hill formed over the temple.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are eternal glory and never-ending honor interchangeable (i.e., having the same meaning)?

Pair 1172

P1: Around 875, wine production first expanded to Bohemia with the villagers of Mělník husbanding its first vineyard. According to legend, the Great Moravian Prince Svatopluk sent the Bohemian Prince Bořivoj a barrel of wine to celebrate the birth of his son Spytihněv. Bořivoj's wife Ludmila sacrificed some of the wine to Krosyn (goddess of the harvest) while making a plea for abundant rain. Her wish came true, the crop was saved, and Bořivoj and Ludmila planted the first Bohemian vineyards around Mělník.

P2: Around 875, wine production first expanded to Bohemia with the villagers of Mělník husbanding its first vineyard. According to legend, the Great Moravian Prince Svatopluk sent the Bohemian Prince Bořivoj a barrel of wine to celebrate the birth of his son Spytihněv. Bořivoj's wife Ludmila sacrificed some of the wine to Krosyn (goddess of the harvest) while making a plea for loads of precipitation. Her wish came true, the crop was saved, and Bořivoj and Ludmila planted the first Bohemian vineyards around Mělník.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are abundant rain and loads of precipitation interchangeable (i.e., having the same meaning)?

Pair 1173

P1: In Sindh, the majority of farms are located in Thatta, Badin and Dadu, the three districts through which the River Indus passes. Badin and Thatta have waterlogged floodplain areas suitable for fish farming. In Punjab, farms are located mostly in irrigated areas or where there is abundant rain and the soil is alluvial. Muzaffar Garh, Multan, Sheikhpura, Gujranwala and Attock districts have most farms.

P2: In Sindh, the majority of farms are located in Thatta, Badin and Dadu, the three districts through which the River Indus passes. Badin and Thatta have waterlogged floodplain areas suitable for fish farming. In Punjab, farms are located mostly in irrigated areas or where there is sufficient downpour and the soil is alluvial. Muzaffar Garh, Multan, Sheikhpura, Gujranwala and Attock districts have most farms.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are abundant rain and sufficient downpour interchangeable (i.e., having the same meaning)?

Pair 1174

P1: The NBA had six playoff teams that year, with the second and third place teams from each division, East and West, meeting in the first round. The winners of this play-in round would then meet the division winners to decide the finalists. Cincinnati, which had no **real center**, could not deal with Chamberlain, so Philadelphia advanced three games to one. But the 76ers had not gelled enough yet with the giant star to unseat the champion Celtics, who held off Philly by a single point in Game 7 when John Havlicek stole the ball in the final seconds.

P2: The NBA had six playoff teams that year, with the second and third place teams from each division, East and West, meeting in the first round. The winners of this play-in round would then meet the division winners to decide the finalists. Cincinnati, which had no **true capital**, could not deal with Chamberlain, so Philadelphia advanced three games to one. But the 76ers had not gelled enough yet with the giant star to unseat the champion Celtics, who held off Philly by a single point in Game 7 when John Havlicek stole the ball in the final seconds.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **real center** and **true capital** interchangeable (i.e., having the same meaning)?

Pair 1175

P1: Rodin was not initially considered for the work because at that point in time, around 1885, his career had not become as prominent. After the death of Chapu, the recently elected president of the Société, Émile Zola strongly supported Rodin for the job and, so, the artist submitted a proposal to have a completed three-meter statue of the French novelist within an eighteen-month period which was approved. The commission was in response to the **elevated importance** of Honoré de Balzac after his death. Balzac was one of the founders of the Société as well as the second president of the organization.

P2: Rodin was not initially considered for the work because at that point in time, around 1885, his career had not become as prominent. After the death of Chapu, the recently elected president of the Société, Émile Zola strongly supported Rodin for the job and, so, the artist submitted a proposal to have a completed three-meter statue of the French novelist within an eighteen-month period which was approved. The commission was in response to the **inflated prominence** of Honoré de Balzac after his death. Balzac was one of the founders of the Société as well as the second president of the organization.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **elevated importance** and **inflated prominence** interchangeable (i.e., having the same meaning)?

Pair 1176

P1: reprises his role as Tsuyoshi Kaijo. Aka Red. is the **physical embodiment** of the Spirit of the Super Sentai's Red Warriors, capable of using all of their powers via his Soul Advent ability. Before the beginning of the series, after the Legend War, Aka Red searched the universe for the Ranger Keys and formed the Red Pirates, taking Captain Marvelous and Basco Ta Jolokia under his wing.

P2: reprises his role as Tsuyoshi Kaijo. Aka Red. is the **visceral manifestation** of the Spirit of the Super Sentai's Red Warriors, capable of using all of their powers via his Soul Advent ability. Before the beginning of the series, after the Legend War, Aka Red searched the universe for the Ranger Keys and formed the Red Pirates, taking Captain Marvelous and Basco Ta Jolokia under his wing.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **physical embodiment** and **visceral manifestation** interchangeable (i.e., having the same meaning)?

Pair 1177

P1: As with all probabilistic events, it is possible, though improbable, to have multiple "1 in 100 Year Storms" in a single year. Forecasting. The Quantitative Precipitation Forecast (abbreviated QPF) is the **expected amount** of liquid precipitation accumulated over a specified time period over a specified area. A QPF will be specified when a measurable

precipitation type reaching a minimum threshold is forecast for any hour during a QPF valid period.

P2: As with all probabilistic events, it is possible, though improbable, to have multiple "1 in 100 Year Storms" in a single year. Forecasting. The Quantitative Precipitation Forecast (abbreviated QPF) is the predicted quantity of liquid precipitation accumulated over a specified time period over a specified area. A QPF will be specified when a measurable precipitation type reaching a minimum threshold is forecast for any hour during a QPF valid period.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are expected amount and predicted quantity interchangeable (i.e., having the same meaning)?

Pair 1178

P1: Such injury would occur when a patient has an acute myocardial infarct followed by reperfusion by either percutaneous coronary intervention or thrombolysis. Early Preconditioning. Is thought to be stimulated by local action of adenosine, opiates and bradykinin which are all endogenously released by ischemic cells. The presence of each substance is not required but the protection is more potent if they are.

P2: Such injury would occur when a patient has an acute myocardial infarct followed by reperfusion by either percutaneous coronary intervention or thrombolysis. Early Preconditioning. Is thought to be stimulated by contained activity of adenosine, opiates and bradykinin which are all endogenously released by ischemic cells. The presence of each substance is not required but the protection is more potent if they are.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are local action and contained activity interchangeable (i.e., having the same meaning)?

Pair 1179

P1: Moreover, the grid has to be computed after each time step which adds up to computational time. Hyperbolic schemes. This grid generation scheme is generally applicable to problems with open domains consistent with the type of PDE describing the physical problem. The advantage associated with hyperbolic PDEs is that the governing equations need to be solved only once for generating grid.

P2: Moreover, the grid has to be computed after each time step which adds up to computational time. Hyperbolic schemes. This grid generation scheme is generally applicable to problems with open domains consistent with the type of PDE describing the outer defect. The advantage associated with hyperbolic PDEs is that the governing equations need to be solved only once for generating grid.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are physical problem and outer defect interchangeable (i.e., having the same meaning)?

Pair 1180

P1: In 2010, Spears released her eighth fragrance, "Radiance". In March 2011, company Brand Sense filed a lawsuit against Spears and Elizabeth Arden seeking \$10 million in damages, claiming that she and her father, Jamie, stopped paying their thirty-five percent commission that was agreed as part of the contract terms. In July 2011, a Los Angeles judge denied the request by the company lawyers, claiming the fact that Spears is still under conservatorship. Brand Sense, however, stated that they would appeal the decision.

P2: In 2010, Spears released her eighth fragrance, "Radiance". In March 2011, company Brand Sense filed a lawsuit against Spears and Elizabeth Arden seeking \$10 million in damages, claiming that she and her father, Jamie, stopped paying their thirty-five percent commission that was agreed as part of the contract terms. In July 2011, a Los Angeles judge denied the request by the firms' attorney's, claiming the fact that Spears is still under conservatorship. Brand Sense, however, stated that they would appeal the decision.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **company lawyers** and **firms' attorney's** interchangeable (i.e., having the same meaning)?

Pair 1181

P1: If confronted, the establishment claims that they have no connection with the woman and indicates that she arrived with the man, and as such the man is responsible for all of the items on the bill. Often, a clip joint employee waits near a legitimate club, and invites passing pedestrians into a VIP area. The potential customers are led to believe that the person works for the **nearby club**, though they may not explicitly say so. Once inside, drinks are usually alcohol free (as the venues usually do not have a license) or watered down and overpriced with no prices listed on the menu.

P2: If confronted, the establishment claims that they have no connection with the woman and indicates that she arrived with the man, and as such the man is responsible for all of the items on the bill. Often, a clip joint employee waits near a legitimate club, and invites passing pedestrians into a VIP area. The potential customers are led to believe that the person works for the **local hangout**, though they may not explicitly say so. Once inside, drinks are usually alcohol free (as the venues usually do not have a license) or watered down and overpriced with no prices listed on the menu.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **nearby club** and **local hangout** interchangeable (i.e., having the same meaning)?

Pair 1182

P1: Over time, strategy won over twitch, especially in team- and objective-based games. A primary example of this would be the game "Counter-Strike" – originally a modification of the popular game "Half-Life" that quickly became one of the most popular competitive first-person shooters to date. The base game included objective-based game types that limited the player to a **single life** per round. Players obtained in-game cash to purchase better weapons and armor.

P2: Over time, strategy won over twitch, especially in team- and objective-based games. A primary example of this would be the game "Counter-Strike" – originally a modification of the popular game "Half-Life" that quickly became one of the most popular competitive first-person shooters to date. The base game included objective-based game types that limited the player to a **lone death** per round. Players obtained in-game cash to purchase better weapons and armor.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **single life** and **lone death** interchangeable (i.e., having the same meaning)?

Pair 1183

P1: However, this can be difficult, so, in this cases and some others (disabled people, etc.), the use of an anti-choking device is recommended. Due to the **forceful nature** of the procedure, even when done correctly, abdominal thrusts can injure the person on whom it is performed. Bruising to the abdomen is highly likely and more serious injuries can occur, including fracture of the xiphoid process or ribs.

P2: However, this can be difficult, so, in this cases and some others (disabled people, etc.), the use of an anti-choking device is recommended. Due to the **strong essence** of the procedure, even when done correctly, abdominal thrusts can injure the person on whom it is performed. Bruising to the abdomen is highly likely and more serious injuries can occur, including fracture of the xiphoid process or ribs.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **forceful nature** and **strong essence** interchangeable (i.e., having the same meaning)?

Pair 1184

P1: It was the first Hackney carriage model to have disc brakes as standard (from 1992), it also had a seven-passenger seat option, and wheelchair access. Many of the parts came from other car builders including headlights and front indicators from the Ford Granada Mk 2 (which had been out of production for two years by 1987), rear lights from the Escort Mk 4 Cabriolet and various switches and controls from the Austin Maestro/Montego range were used. **Due to the fibreglass construction and virtually bulletproof engine, many of these vehicles are still in daily use over 20 years later.** Spare parts and workshop advice is available from a small number of specialist repairers.

P2: It was the first Hackney carriage model to have disc brakes as standard (from 1992), it also had a seven-passenger seat option, and wheelchair access. Many of the parts came from other car builders including headlights and front indicators from the Ford Granada Mk 2 (which had been out of production for two years by 1987), rear lights from the Escort Mk 4 Cabriolet and various switches and controls from the Austin Maestro/Montego range were used. **Due to the fibreglass construction and virtually bulletproof engine, many of these vehicles are still in constant employment over 20 years later.** Spare parts and workshop advice is available from a small number of specialist repairers.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **daily use** and **constant employment** interchangeable (i.e., having the same meaning)?

Pair 1185

P1: Travelers may become lost, either if a group cannot find its way or if an individual becomes separated from the party and cannot find it again. Lost hikers who cannot find their way to their destination on time may run out of food and water, or experience a change in weather. **The absence of clearly marked trails increases the risk of losing one's way.** If a group splits up into several subgroups moving at different speeds, one of the subgroups may take a wrong turn at a trail junction.

P2: Travelers may become lost, either if a group cannot find its way or if an individual becomes separated from the party and cannot find it again. Lost hikers who cannot find their way to their destination on time may run out of food and water, or experience a change in weather. **The absence of clearly marked trails increases the risk of losing your course.** If a group splits up into several subgroups moving at different speeds, one of the subgroups may take a wrong turn at a trail junction.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one's way** and **your course** interchangeable (i.e., having the same meaning)?

Pair 1186

P1: Though she left for London immediately after the festival, her visit to France had unforeseen consequences. Later that month, it was announced that she would be the host of "High Adventure", a travelogue television series for CBS, but she never appeared in it. **As Scott put it: "out of the clear blue sky one morning, I woke and decided that I never wanted to make another film again.** It was just a spark, I can't explain it."

P2: Though she left for London immediately after the festival, her visit to France had unforeseen consequences. Later that month, it was announced that she would be the host of "High Adventure", a travelogue television series for CBS, but she never appeared in it. **As Scott put it: "out of the crystal-like aqua-colored heavens one morning, I woke and decided that I never wanted to make another film again.** It was just a spark, I can't explain it."

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **clear blue sky** and **crystal-like aqua-colored heavens** interchangeable (i.e., having the same meaning)?

Pair 1187

P1: He was a member of the House of Babenberg. Like his predecessors, he attempted to develop the land by founding monasteries. **His most important foundation** is Lilienfeld in the Lower Austrian valley of the Traisen river, where he was buried after his death. Besides that, he supported the then highly modern mendicant orders of the Franciscans and

Dominicans.

P2: He was a member of the House of Babenberg. Like his predecessors, he attempted to develop the land by founding monasteries. His most **critical groundwork** is Lilienfeld in the Lower Austrian valley of the Traisen river, where he was buried after his death. Besides that, he supported the then highly modern mendicant orders of the Franciscans and Dominicans.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **important foundation** and **critical groundwork** interchangeable (i.e., having the same meaning)?

Pair 1188

P1: In July 1947, he gave the inaugural lecture, stating: Our age has had no escape from an awareness of history. Much of that history has been hard and full of suffering. But now we have the luxury of an **historical awareness** of another sort, of an occasion not of anxiety but of promise. We may speak without exaggeration of this occasion as historic, since we have come here to enact anew the chief function of culture and humanism, to bring man again into communication with man.

P2: In July 1947, he gave the inaugural lecture, stating: Our age has had no escape from an awareness of history. Much of that history has been hard and full of suffering. But now we have the luxury of an **archival chain of events** of another sort, of an occasion not of anxiety but of promise. We may speak without exaggeration of this occasion as historic, since we have come here to enact anew the chief function of culture and humanism, to bring man again into communication with man.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **historical awareness** and **archival chain of events** interchangeable (i.e., having the same meaning)?

Pair 1189

P1: Most ambulance services require at least two crew members to be on every ambulance (one to drive, and one to attend the patient). It may be the case that only the attendant need be qualified, and the driver might have no medical training. In some locations, an advanced life support ambulance may be crewed by one paramedic and **one technician**. Common ambulance crew qualifications are: Military use.

P2: Most ambulance services require at least two crew members to be on every ambulance (one to drive, and one to attend the patient). It may be the case that only the attendant need be qualified, and the driver might have no medical training. In some locations, an advanced life support ambulance may be crewed by one paramedic and **a singular specialist**. Common ambulance crew qualifications are: Military use.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one technician** and **a singular specialist** interchangeable (i.e., having the same meaning)?

Pair 1190

P1: The number may be configured to automatically hang up on the caller when dialed. The number then calls or texts back with supplemental content, such as product information, offers, or sponsored celebrity messages. Advertisers can retain the phone numbers of callers to build a customer database, which can be used for **future engagement** and analytics. MCM is a prominent practice in India, where it appeals to the country's cultural and economic environment.

P2: The number may be configured to automatically hang up on the caller when dialed. The number then calls or texts back with supplemental content, such as product information, offers, or sponsored celebrity messages. Advertisers can retain the phone numbers of callers to build a customer database, which can be used for **succeeding commitment**

and analytics. MCM is a prominent practice in India, where it appeals to the country's cultural and economic environment.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **future engagement** and **succeeding commitment** interchangeable (i.e., having the same meaning)?

Pair 1191

P1: On Mars, heat from the impact melts ice in the ground. Water from the melting ice dissolves minerals, and then deposits them in cracks or faults that were produced with the impact. **This process, called hydrothermal alteration, is a major way in which ore deposits are produced.** The area around Martian craters may be rich in useful ores for the future colonization of Mars.

P2: On Mars, heat from the impact melts ice in the ground. Water from the melting ice dissolves minerals, and then deposits them in cracks or faults that were produced with the impact. **This process, called hydrothermal alteration, is a crucial manner in which ore deposits are produced.** The area around Martian craters may be rich in useful ores for the future colonization of Mars.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **major way** and **crucial manner** interchangeable (i.e., having the same meaning)?

Pair 1192

P1: This theory is also guided by the assumptions that relationship development is systematic and predictable. Through self-disclosure, relationship development follows particular trajectory, moving from superficial layers of exchanges to more intimate ones. **Self-disclosure is the major way to bring a relationship to a new level of intimacy.** SPT also examines the process of de-penetration and how some relationships regress over time and eventually end.

P2: This theory is also guided by the assumptions that relationship development is systematic and predictable. Through self-disclosure, relationship development follows particular trajectory, moving from superficial layers of exchanges to more intimate ones. **Self-disclosure is the leading means to bring a relationship to a new level of intimacy.** SPT also examines the process of de-penetration and how some relationships regress over time and eventually end.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **major way** and **leading means** interchangeable (i.e., having the same meaning)?

Pair 1193

P1: Low cost bridge chips are now available from a number of manufacturers to allow ccTalk to run over USB at baud rates of at least 1 Mbit/s. ccTalk protocol stacks have been implemented on a range of devices from tiny Microchip micro-controllers with 512 bytes of ROM to powerful ARM7 32-bit processors. **The protocol supports all standard operations for electronic devices such as flash upgrading of firmware, secure transfer of data and detailed diagnostic information.** Advantages of ccTalk include low cost UART technology, a simple-to-understand packet structure, an easily expandable command interface and no licensing requirements.

P2: Low cost bridge chips are now available from a number of manufacturers to allow ccTalk to run over USB at baud rates of at least 1 Mbit/s. ccTalk protocol stacks have been implemented on a range of devices from tiny Microchip micro-controllers with 512 bytes of ROM to powerful ARM7 32-bit processors. **The protocol supports all standard operations for electronic devices such as flash upgrading of firmware, dependable transmission of data and detailed diagnostic information.** Advantages of ccTalk include low cost UART technology, a simple-to-understand packet structure, an easily expandable command interface and no licensing requirements.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **secure transfer** and **dependable transmission** interchangeable (i.e., having the same meaning)?

Pair 1194

P1: The A and B notes are almost identical to one another in both frequency and duration. The black-capped chickadee possesses the ability to quickly notice the difference between these two notes. **As for the C and D notes, no real similarity is seen between them.** The C note fluctuates from low to high then back to low, whereas the D note has a constant frequency.

P2: The A and B notes are almost identical to one another in both frequency and duration. The black-capped chickadee possesses the ability to quickly notice the difference between these two notes. **As for the C and D notes, no actual likeness is seen between them.** The C note fluctuates from low to high then back to low, whereas the D note has a constant frequency.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **real similarity** and **actual likeness** interchangeable (i.e., having the same meaning)?

Pair 1195

P1: Cyclin D1 negative mantle cell lymphoma can be diagnosed by detecting SOX11 marker. The workup for Mantle cell lymphoma is similar to the workup for many indolent lymphomas and certain aggressive lymphomas. **Mantle cell lymphoma is a systemic disease with frequent involvement of the bone marrow and gastrointestinal tract (generally showing polyposis in the lining).** There is also a not-uncommon leukemic phase, marked by presence in the blood.

P2: Cyclin D1 negative mantle cell lymphoma can be diagnosed by detecting SOX11 marker. The workup for Mantle cell lymphoma is similar to the workup for many indolent lymphomas and certain aggressive lymphomas. **Mantle cell lymphoma is a systemic disease with repeated entanglement of the bone marrow and gastrointestinal tract (generally showing polyposis in the lining).** There is also a not-uncommon leukemic phase, marked by presence in the blood.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **frequent involvement** and **repeated entanglement** interchangeable (i.e., having the same meaning)?

Pair 1196

P1: Politically, in order for human trafficking to "thrive the slave trade requires the direct or indirect involvement of national governments, at both the source and the destination." In addition, according to a statistical study conducted by Kevin Bales, a scholar of modern slavery and trafficking, the level of corruption and instability in a country is a major factor in the rate of human trafficking. **Venezuelan policy on human trafficking, therefore, impacts the overall rate of the issue and the regulation of it.** In addition, as political instability in Venezuela persists, and the opposition party to Nicolás Maduro continues to "openly and repeatedly [push] for regime change by any means necessary," the policy platform on human trafficking is not being dealt with.

P2: Politically, in order for human trafficking to "thrive the slave trade requires the direct or indirect involvement of national governments, at both the source and the destination." In addition, according to a statistical study conducted by Kevin Bales, a scholar of modern slavery and trafficking, the level of corruption and instability in a country is a major factor in the rate of human trafficking. **Venezuelan policy on human trafficking, therefore, impacts the comprehensive movement of the issue and the regulation of it.** In addition, as political instability in Venezuela persists, and the opposition party to Nicolás Maduro continues to "openly and repeatedly [push] for regime change by any means necessary," the policy platform on human trafficking is not being dealt with.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **overall rate** and **comprehensive movement** interchangeable (i.e., having the same meaning)?

Pair 1197

P1: It is responsible for over 2,00,000 sales units each month. In November 2018, HMSI crossed the 2.5 crore sales mark in the scooter segment. It has become the first company to reach this milestone and the biggest contributor to this massive figure is the Honda Activa. It took Honda 13 years to achieve the one crore sales figure, but it managed to add another crore in the span of just three years.

P2: It is responsible for over 2,00,000 sales units each month. In November 2018, HMSI crossed the 2.5 crore sales mark in the scooter segment. It has become the first company to reach this milestone and the biggest contributor to this giant number is the Honda Activa. It took Honda 13 years to achieve the one crore sales figure, but it managed to add another crore in the span of just three years.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are massive figure and giant number interchangeable (i.e., having the same meaning)?

Pair 1198

P1: PNG Greens believe financial assistance from government, NGOs, business groups and others is needed to manage protected areas, and to stamp out inappropriate development. Papua New Guinea has one of the most significant timber resources in Asia. In the last 2 decades, PNG logging has seen the most forest loss and degradation in the world. PNG Greens oppose unsustainable logging practices and clear felling of PNG's forests.

P2: PNG Greens believe financial assistance from government, NGOs, business groups and others is needed to manage protected areas, and to stamp out inappropriate development. Papua New Guinea has one of the most significant timber resources in Asia. In the preceding two ten year periods, PNG logging has seen the most forest loss and degradation in the world. PNG Greens oppose unsustainable logging practices and clear felling of PNG's forests.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are last 2 decades and preceding two ten year periods interchangeable (i.e., having the same meaning)?

Pair 1199

P1: Other brands attempt counter FOMO, such as Nescafé's "Wake up to life" campaign. Harnessing TV viewers' FOMO is also perceived to foster higher broadcast ratings. Real-time updates about status and major social events allow for a more engaging media consumption experience and faster dissemination of information. Real-time tweets about the Super Bowl are considered to be correlated with higher TV ratings due to their appeal to FOMO and the prevalence of social media usage.

P2: Other brands attempt counter FOMO, such as Nescafé's "Wake up to life" campaign. Harnessing TV viewers' FOMO is also perceived to foster higher broadcast ratings. Real-time updates about status and big public affairs allow for a more engaging media consumption experience and faster dissemination of information. Real-time tweets about the Super Bowl are considered to be correlated with higher TV ratings due to their appeal to FOMO and the prevalence of social media usage.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are major social events and big public affairs interchangeable (i.e., having the same meaning)?

Pair 1200

P1: History. Saint Yared has been credited with the invention of the musical tradition of Ethiopian liturgical chants. Yared, who lived in the sixth century, represents the **first known case** of indigenous Ethiopian musical notation and religious music. He invented three forms of chanting.

P2: History. Saint Yared has been credited with the invention of the musical tradition of Ethiopian liturgical chants. Yared, who lived in the sixth century, represents the **initial established occurrence** of indigenous Ethiopian musical notation and religious music. He invented three forms of chanting.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **first known case** and **initial established occurrence** interchangeable (i.e., having the same meaning)?

Pair 1201

P1: In application proceedings, the equivalent documents to pleadings are called "processes"; these processes not only formulate the factual dispute but also offer the evidence in support of the factual allegations. Processes are drafted in the form of affidavits, which are written statements sworn under oath or affirmation, and may have extra documents attached as annexures, which further support the evidence adduced. **In contrast to summons proceedings, there is no distinction between the pleading stage and the trial stage in application proceedings.** In essence, application procedure condenses the action process; the pleadings as well as the evidence are contained in the applications papers which go before the court.

P2: In application proceedings, the equivalent documents to pleadings are called "processes"; these processes not only formulate the factual dispute but also offer the evidence in support of the factual allegations. Processes are drafted in the form of affidavits, which are written statements sworn under oath or affirmation, and may have extra documents attached as annexures, which further support the evidence adduced. **In contrast to summons proceedings, there is no distinction between the pleading stage and the litigation point in application proceedings.** In essence, application procedure condenses the action process; the pleadings as well as the evidence are contained in the applications papers which go before the court.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **trial stage** and **litigation point** interchangeable (i.e., having the same meaning)?

Pair 1202

P1: In other words, this is to say that the will of God concerning man is that His will shall be perfectly fulfilled in man. His will is expressed in His law of ten commandments, which is "the whole duty of man." **This law is perfect, and perfection of character is the perfect expression of this law in the life of the worshipper of God.** By this law is the knowledge of sin.

P2: In other words, this is to say that the will of God concerning man is that His will shall be perfectly fulfilled in man. His will is expressed in His law of ten commandments, which is "the whole duty of man." **This law is perfect, and perfection of character is the ideal statement of this law in the life of the worshipper of God.** By this law is the knowledge of sin.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **perfect expression** and **ideal statement** interchangeable (i.e., having the same meaning)?

Pair 1203

P1: Curt's Famous Meats (also known as Curt's Meat Market or shortened to Curt's) is a meat market located on East Truman Road in Independence, Missouri. **Although it is in Independence, they are a known part of Kansas City-style barbecue history.** Their products have won over 35 local and national barbecue awards, including their eight American Royal wins.

P2: Curt's Famous Meats (also known as Curt's Meat Market or shortened to Curt's) is a meat market located on East Truman Road in Independence, Missouri. **Although it is in Independence, they are a recognized zone of Kansas City-style barbecue history.** Their products have won over 35 local and national barbecue awards, including their eight

American Royal wins.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **known part** and **recognized zone** interchangeable (i.e., having the same meaning)?

Pair 1204

P1: In the 2008 and 2010 AFC Challenge Cup he would lead the team to third and fourth place respectively. However, the team did not attempt to qualify for the 2010 World Cup, being the only FIFA member in the 2010 qualifications to withdraw. **The cited reason** for this was a lack of preparation of the field before their game against Kuwait. From December 2014 to July 2015, Gytoku was head coach of Anghong of the Thai Division 1 League.

P2: In the 2008 and 2010 AFC Challenge Cup he would lead the team to third and fourth place respectively. However, the team did not attempt to qualify for the 2010 World Cup, being the only FIFA member in the 2010 qualifications to withdraw. **The specified justification** for this was a lack of preparation of the field before their game against Kuwait. From December 2014 to July 2015, Gytoku was head coach of Anghong of the Thai Division 1 League.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **cited reason** and **specified justification** interchangeable (i.e., having the same meaning)?

Pair 1205

P1: Hilgard termed this entity the "hidden observer." In one of his books, Hilgard described a classic test demonstrating how this hidden entity is part of our consciousness. **He wrote of a blind student who was hypnotized and, while in a trance state**, was told that he would become deaf. The suggestion was so strong that he failed to react to any form of noise, even large sounds next to his ear.

P2: Hilgard termed this entity the "hidden observer." In one of his books, Hilgard described a classic test demonstrating how this hidden entity is part of our consciousness. **He wrote of a blind student who was hypnotized and, while in a dazed position**, was told that he would become deaf. The suggestion was so strong that he failed to react to any form of noise, even large sounds next to his ear.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **trance state** and **dazed position** interchangeable (i.e., having the same meaning)?

Pair 1206

P1: On a raid with the Royal Air Force 14 October, his plane, a Sopwith Camel, was shot down and Lieutenant MacLeish was forced to crash land near Schore, Belgium and was found dead the following day by a local landlord, Alfred Rouse. MacLeish was initially buried where he fell and then later reinterred at the Lyssenthoek Military Cemetery in June 1919. **He received his final resting place at the Flanders Field American Cemetery in Waregem, Belgium at plot b**, row 4, grave 1. He was posthumously awarded the Navy Cross for his actions.

P2: On a raid with the Royal Air Force 14 October, his plane, a Sopwith Camel, was shot down and Lieutenant MacLeish was forced to crash land near Schore, Belgium and was found dead the following day by a local landlord, Alfred Rouse. MacLeish was initially buried where he fell and then later reinterred at the Lyssenthoek Military Cemetery in June 1919. **He received his final resting place at the Flanders Field American Cemetery in Waregem, Belgium at parcel b**, row 4, grave 1. He was posthumously awarded the Navy Cross for his actions.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **plot b** and **parcel b** interchangeable (i.e., having the same meaning)?

Pair 1207

P1: On a raid with the Royal Air Force 14 October, his plane, a Sopwith Camel, was shot down and Lieutenant MacLeish was forced to crash land near Schore, Belgium and was found dead the following day by a local landlord, Alfred Rouse. MacLeish was initially buried where he fell and then later reinterred at the Lyssenthoek Military Cemetery in June 1919. He received his final resting place at the Flanders Field American Cemetery in Waregem, Belgium at **plot b**, row 4, grave 1. He was posthumously awarded the Navy Cross for his actions.

MacLeish was initially buried where he fell and then later reinterred at the Lyssenthoek Military Cemetery in June 1919. He received his final resting place at the Flanders Field American Cemetery in Waregem, Belgium at **allotment 2**, row 4, grave 1. He was posthumously awarded the Navy Cross for his actions.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **plot b** and **allotment 2** interchangeable (i.e., having the same meaning)?

Pair 1208

P1: The regenerative dose measurement will vary with respect to the given dose at each stage. The equivalent dose (formula_5) is determined by drawing a line (red discontinuous line in Plot B) from the natural dose to intercept with the regenerative dose curve. The point of interception with the curve represent the equivalent dose by reading its value on the horizontal axis (See **plot b**). The corresponding dose value at the horizontal axis is recorded for the equivalent dose (formula_5).

P2: The regenerative dose measurement will vary with respect to the given dose at each stage. The equivalent dose (formula_5) is determined by drawing a line (red discontinuous line in Plot B) from the natural dose to intercept with the regenerative dose curve. The point of interception with the curve represent the equivalent dose by reading its value on the horizontal axis (See **the second chart**). The corresponding dose value at the horizontal axis is recorded for the equivalent dose (formula_5).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **plot b** and **the second chart** interchangeable (i.e., having the same meaning)?

Pair 1209

P1: AEMT-Critical Care and Paramedics in New York), a procedure can be both an on-line and a standing order depending on the level of the provider. Since no set of protocols can cover every patient situation, many systems work with protocols as guidelines and not "cook book" treatment plans. Finally, systems also have policies in place to handle medical direction when **communication failures** happen or in disaster situations. The NHTSA curriculum is the foundation Standard of Care for EMS providers in the US.

P2: AEMT-Critical Care and Paramedics in New York), a procedure can be both an on-line and a standing order depending on the level of the provider. Since no set of protocols can cover every patient situation, many systems work with protocols as guidelines and not "cook book" treatment plans. Finally, systems also have policies in place to handle medical direction when **information blunders** happen or in disaster situations. The NHTSA curriculum is the foundation Standard of Care for EMS providers in the US.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **communication failures** and **information blunders** interchangeable (i.e., having the same meaning)?

Pair 1210

P1: Even though the Red Blok and the U.N.A. are allied in their efforts against the Therian threat, they are by no means on friendly terms. The bitter taste left between the two sides has led to disastrous un-cooperation, and communication failures. There is still a deep underlying distrust between the two sides, and as time goes on these feelings only burn deeper and deeper.

P2: Even though the Red Blok and the U.N.A. are allied in their efforts against the Therian threat, they are by no means on friendly terms. The bitter taste left between the two sides has led to disastrous un-cooperation, and transmission collapse. There is still a deep underlying distrust between the two sides, and as time goes on these feelings only burn deeper and deeper.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are communication failures and transmission collapse interchangeable (i.e., having the same meaning)?

Pair 1211

P1: In spectral scanning, each 2-D sensor output represents a monochromatic ('single-colored'), spatial ("x","y") map of the scene. HSI devices for spectral scanning are typically based on optical band-pass filters (either tunable or fixed). The scene is spectrally scanned by exchanging one filter after another while the platform remains stationary. In such 'staring', wavelength scanning systems, spectral smearing can occur if there is movement within the scene, invalidating spectral correlation/detection.

P2: In spectral scanning, each 2-D sensor output represents a monochromatic ('single-colored'), spatial ("x","y") map of the scene. HSI devices for spectral scanning are typically based on optical band-pass filters (either tunable or fixed). The scene is spectrally scanned by exchanging a screen after another while the platform remains stationary. In such 'staring', wavelength scanning systems, spectral smearing can occur if there is movement within the scene, invalidating spectral correlation/detection.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are one filter and a screen interchangeable (i.e., having the same meaning)?

Pair 1212

P1: Reachable states for cubes of all sizes. The number of reachable states is based on: The number of different states that are reachable for cubes of any size can be simply related to the numbers that are applicable to the size 3 and size 4 cubes. Hofstadter in his 1981 paper provided a full derivation of the number of states for the standard size 3 Rubik's cube. More recent information sources that adequately justify the figures for the size 3 and size 4 cubes are also available.

P2: Reachable states for cubes of all sizes. The number of reachable states is based on: The number of different states that are reachable for cubes of any size can be simply related to the numbers that are applicable to the size 3 and size 4 cubes. Hofstadter in his 1981 paper provided a full derivation of the number of states for the accepted proportion 3 Rubik's cube. More recent information sources that adequately justify the figures for the size 3 and size 4 cubes are also available.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are standard size and accepted proportion interchangeable (i.e., having the same meaning)?

Pair 1213

P1: Notable persons who have visited the area include Thomas Edison, Henry Ford, John Burroughs, and Harvey Firestone, who camped at Muddy Creek Falls in the summers of 1918 and 1921. Activities and amenities. The park contains 65 campsites, a picnic area with a pavilion and playground, as well as a mile-long hiking trail through the

old growth forest. A trail for hiking and mountain biking connects the state park with Herrington Manor State Park.

P2: Notable persons who have visited the area include Thomas Edison, Henry Ford, John Burroughs, and Harvey Firestone, who camped at Muddy Creek Falls in the summers of 1918 and 1921. Activities and amenities. **The park contains 65 campsites, a picnic area with a pavilion and playground, as well as a mile-long hiking trail through the ancient untouched woodland.** A trail for hiking and mountain biking connects the state park with Herrington Manor State Park.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **old growth forest** and **ancient untouched woodland** interchangeable (i.e., having the same meaning)?

Pair 1214

P1: Many environmentalists are enthusiastic about the use of paulownia alai boards because of their minimal impact on the environment, while fiberglass and epoxy surfboards are known for their many pollutants and long decomposition time. Beyond avoiding fiberglass and epoxy resins, Wegener argues that modern Alaia boards have less impact on the environment based on the way the Paulownia wood is harvested, used and recycled. **“Paulownia is plantation grown. The trees grow like weeds, about in three years and they are never from an old growth forest.** Just sustainable tree farms...the leaves and flowers, is either fed to cattle or the dust and shavings are mulched... Paulownia dust (and shavings) is very good in the garden and breaks down quickly.

P2: Many environmentalists are enthusiastic about the use of paulownia alai boards because of their minimal impact on the environment, while fiberglass and epoxy surfboards are known for their many pollutants and long decomposition time. Beyond avoiding fiberglass and epoxy resins, Wegener argues that modern Alaia boards have less impact on the environment based on the way the Paulownia wood is harvested, used and recycled. **“Paulownia is plantation grown. The trees grow like weeds, about in three years and they are never from an aged virgin wood.** Just sustainable tree farms...the leaves and flowers, is either fed to cattle or the dust and shavings are mulched... Paulownia dust (and shavings) is very good in the garden and breaks down quickly.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **old growth forest** and **aged virgin wood** interchangeable (i.e., having the same meaning)?

Pair 1215

P1: In the late 1960s, however, this rural town dramatically changed course with its second boom. It had always been assumed by local leaders and citizens that Sandy would grow outward from its logical and historic center—the nexus of Main and Center streets. **However, population growth overwhelmed the physical center as neighborhoods spread out in every direction over the land.** During the 1970s, pocket communities took shape, providing the services, schools, and shopping traditionally offered by a city.

P2: In the late 1960s, however, this rural town dramatically changed course with its second boom. It had always been assumed by local leaders and citizens that Sandy would grow outward from its logical and historic center—the nexus of Main and Center streets. **However, population growth overwhelmed the main hub as neighborhoods spread out in every direction over the land.** During the 1970s, pocket communities took shape, providing the services, schools, and shopping traditionally offered by a city.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **physical center** and **main hub** interchangeable (i.e., having the same meaning)?

Pair 1216

P1: In the late 1960s, however, this rural town dramatically changed course with its second boom. It had always been assumed by local leaders and citizens that Sandy would grow outward from its logical and historic center—the nexus of

Main and Center streets. However, population growth overwhelmed the **physical center** as neighborhoods spread out in every direction over the land. During the 1970s, pocket communities took shape, providing the services, schools, and shopping traditionally offered by a city.

P2: In the late 1960s, however, this rural town dramatically changed course with its second boom. It had always been assumed by local leaders and citizens that Sandy would grow outward from its logical and historic center—the nexus of Main and Center streets. However, population growth overwhelmed the **central point** as neighborhoods spread out in every direction over the land. During the 1970s, pocket communities took shape, providing the services, schools, and shopping traditionally offered by a city.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **physical center** and **central point** interchangeable (i.e., having the same meaning)?

Pair 1217

P1: Classes of graph grammar and graph rewriting system. Graph rewriting systems naturally group into classes according to the kind of representation of graphs that are used and how the rewrites are expressed. The term graph grammar, otherwise equivalent to graph rewriting system or graph **replacement system**, is most often used in classifications. Some common types are: Implementations and applications.

P2: Classes of graph grammar and graph rewriting system. Graph rewriting systems naturally group into classes according to the kind of representation of graphs that are used and how the rewrites are expressed. The term graph grammar, otherwise equivalent to graph rewriting system or graph **substitute order**, is most often used in classifications. Some common types are: Implementations and applications.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **replacement system** and **substitute order** interchangeable (i.e., having the same meaning)?

Pair 1218

P1: On August 1, a video titled "Thank you, Grant" was uploaded to the YouTube channel, in which a somber Nate and Calli present a montage of Thompson's various experiments, spliced with clips of him discussing how far the channel had come. In this video, Nate confirmed that the channel would be continuing to upload, stating it was what Thompson would have wanted. It was the first time **either host** had appeared in a video since Thompson's death three days before. On August 8, the channel posted a video called "A Tribute To Grant From Fellow Creators".

P2: On August 1, a video titled "Thank you, Grant" was uploaded to the YouTube channel, in which a somber Nate and Calli present a montage of Thompson's various experiments, spliced with clips of him discussing how far the channel had come. In this video, Nate confirmed that the channel would be continuing to upload, stating it was what Thompson would have wanted. It was the first time **both presenters** had appeared in a video since Thompson's death three days before. On August 8, the channel posted a video called "A Tribute To Grant From Fellow Creators".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **either host** and **both presenters** interchangeable (i.e., having the same meaning)?

Pair 1219

P1: Often, a cell wall trauma is required for the virus to enter the cell. Uncoating is the removal of viral capsid, which makes the viral nucleic acids available for transcription. The capsid could have been degraded by **either host** or viral enzymes, releasing the viral genome into the cell. Replication is the multiplication of virus's genetic material.

P2: Often, a cell wall trauma is required for the virus to enter the cell. Uncoating is the removal of viral capsid, which makes the viral nucleic acids available for transcription. The capsid could have been degraded by **one or the other anchor**

or viral enzymes, releasing the viral genome into the cell. Replication is the multiplication of virus's genetic material.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **either host** and **one or the other anchor** interchangeable (i.e., having the same meaning)?

Pair 1220

P1: 6. The customer's brand: Customer's brand is mostly valuable for smaller businesses. **If a customer is a well known public figure** and he/she buys company's product and talks about it, it boosts the company's popularity. 7

P2: 6. The customer's brand: Customer's brand is mostly valuable for smaller businesses. **If a customer is a popular person in the public eye** and he/she buys company's product and talks about it, it boosts the company's popularity. 7

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **well known public figure** and **popular person in the public eye** interchangeable (i.e., having the same meaning)?

Pair 1221

P1: A land tax, military service and labor obligations were instituted on subjects. A permanent capital was also established in Nara, emulating the grid system of Tang China's capital Xi'an. **An exam system** was also established, although unlike in China, it was only open to those from noble families. The role of women became much more restricted in Japan, especially in official domains, in emulation of China.

P2: A land tax, military service and labor obligations were instituted on subjects. A permanent capital was also established in Nara, emulating the grid system of Tang China's capital Xi'an. **An assessment order** was also established, although unlike in China, it was only open to those from noble families. The role of women became much more restricted in Japan, especially in official domains, in emulation of China.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **exam system** and **assessment order** interchangeable (i.e., having the same meaning)?

Pair 1222

P1: In 1968 he joined the Department of Social and Economic Research in the University of Glasgow, as lecturer, rising through the ranks to Professor of Business Policy in the recently formed Department of Management Studies in 1978. He held the posts of Vice-Chairman of the Industry and Employment Committee of the Economic and Social Research Council from 1983 to 1985 and Chairman of the Joint Committee of the ESRC and the Science and Engineering Research Council. **He was also Dean of the Scottish Business School, a joint activity** of the Glasgow, Edinburgh and Strathclyde Universities, from 1983 until 1987. He was Chairman from 1985 to 1987 of the Council of University Management School.

P2: In 1968 he joined the Department of Social and Economic Research in the University of Glasgow, as lecturer, rising through the ranks to Professor of Business Policy in the recently formed Department of Management Studies in 1978. He held the posts of Vice-Chairman of the Industry and Employment Committee of the Economic and Social Research Council from 1983 to 1985 and Chairman of the Joint Committee of the ESRC and the Science and Engineering Research Council. **He was also Dean of the Scottish Business School, a collective venture** of the Glasgow, Edinburgh and Strathclyde Universities, from 1983 until 1987. He was Chairman from 1985 to 1987 of the Council of University Management School.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **joint activity** and **collective venture** interchangeable (i.e., having the same meaning)?

Pair 1223

P1: Champlain Township was created on January 1, 1998, as the result of municipal mergers. Champlain Township consists of these former municipalities: The Town of Vankleek Hill, The Village of L'Original, The Township of West Hawkesbury and The Township of Longueuil Vankleek Hill is part of the Glengarry-Prescott-Russell federal riding. Its federal Member of Parliament is Liberal Francis Drouin, a 31-year old political assistant and consultant, who won well over 50% of the vote. At the provincial level, the riding is represented by MPP Amanda Simard.

P2: Champlain Township was created on January 1, 1998, as the result of municipal mergers. Champlain Township consists of these former municipalities: The Town of Vankleek Hill, The Village of L'Original, The Township of West Hawkesbury and The Township of Longueuil Vankleek Hill is part of the Glengarry-Prescott-Russell federal riding. Its federal Member of Parliament is Liberal Francis Drouin, a 31-year old political assistant and consultant, who won considerably more than fifty percent of the vote. At the provincial level, the riding is represented by MPP Amanda Simard.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are well over 50% and considerably more than fifty percent interchangeable (i.e., having the same meaning)?

Pair 1224

P1: During the summer of 1948, grass was laid on the stadium. The stadium also received two change rooms. For a long time during winter, there were regular flood light practices for the public on Wednesdays and Sundays. The inner field was used for bandy, while the running track was used for speed skating.

P2: During the summer of 1948, grass was laid on the stadium. The stadium also received two change rooms. For a protracted period during winter, there were regular flood light practices for the public on Wednesdays and Sundays. The inner field was used for bandy, while the running track was used for speed skating.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are long time and protracted period interchangeable (i.e., having the same meaning)?

Pair 1225

P1: The Road Warriors mainly continued working in the independent circuit. In 2002, Animal once again returned to All Japan Pro Wrestling as Animal Warrior teaming with Keiji Muto. In 2003, The Road Warriors last stint was for Fighting of World Japan Pro Wrestling feuding with the Shane Twins. Hawk would die on October 19, 2003.

P2: The Road Warriors mainly continued working in the independent circuit. In 2002, Animal once again returned to All Japan Pro Wrestling as Animal Warrior teaming with Keiji Muto. In 2003, The Road Warriors closing duty was for Fighting of World Japan Pro Wrestling feuding with the Shane Twins. Hawk would die on October 19, 2003.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are last stint and closing duty interchangeable (i.e., having the same meaning)?

Pair 1226

P1: "Ladrillos" (conventional bricks) were manufactured in much the same manner as adobes, with one important difference: after forming and initial drying, the bricks were fired in outdoor kilns to ensure a much greater endurance than could be achieved through merely sun-drying them. Common bricks typically measured ten inches (250 mm) square and were thick. Square paving bricks were equal in thickness to the common variety, but ranged from across. Many of the structures erected with this type of brick remained standing long after their adobe counterparts had been reduced to

rubble.

P2: "Ladrillos" (conventional bricks) were manufactured in much the same manner as adobes, with one important difference: after forming and initial drying, the bricks were fired in outdoor kilns to ensure a much greater endurance than could be achieved through merely sun-drying them. Common bricks typically measured ten inches (250 mm) square and were thick. Square paving bricks were equal in thickness to the average assortment, but ranged from across. Many of the structures erected with this type of brick remained standing long after their adobe counterparts had been reduced to rubble.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are common variety and average assortment interchangeable (i.e., having the same meaning)?

Pair 1227

P1: Both countries established diplomatic relations on 28 May 1979. United Kingdom. The Maldives became a British Protectorate in the 19th century and the Maldivian monarchs were granted a good measure of self-governance. The Maldives gained total independence in 1965.

P2: Both countries established diplomatic relations on 28 May 1979. United Kingdom. The Maldives became a British Protectorate in the 19th century and the Maldivian monarchs were granted a satisfactory level of self-governance. The Maldives gained total independence in 1965.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are good measure and satisfactory level interchangeable (i.e., having the same meaning)?

Pair 1228

P1: The efficiency of this method depends on the blacklist used. For high volume mail sites, it is recommended to set up local copies of the DNSBLs of your choice and fill them through DNS zone transfers. This reduces the permanent traffic through external DNS lookups. Some DNSBLs also allow only a certain amount of queries by day for every IP address to keep their expenses on bandwidth low.

P2: The efficiency of this method depends on the blacklist used. For high volume mail sites, it is recommended to set up local copies of the DNSBLs of your choice and fill them through DNS zone transfers. This reduces the perpetual gridlock through external DNS lookups. Some DNSBLs also allow only a certain amount of queries by day for every IP address to keep their expenses on bandwidth low.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are permanent traffic and perpetual gridlock interchangeable (i.e., having the same meaning)?

Pair 1229

P1: The superhedging price is a coherent risk measure. The superhedging price of a portfolio (A) is equivalent to the smallest amount necessary to be paid for an admissible portfolio (B) at the current time so that at some specified future time the value of B is at least as great as A. In a complete market the superhedging price is equivalent to the price for hedging the initial portfolio. Mathematical definition.

P2: The superhedging price is a coherent risk measure. The superhedging price of a portfolio (A) is equivalent to the smallest amount necessary to be paid for an admissible portfolio (B) at the current time so that at some specified future time the value of B is at least as great as A. In a complete market the superhedging price is equivalent to the price for hedging the original catalog. Mathematical definition.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **initial portfolio** and **original catalog** interchangeable (i.e., having the same meaning)?

Pair 1230

P1: As "InSight" science goals are not related to any particular surface feature of Mars, potential landing sites were chosen on the basis of practicality. Candidate sites needed to be near the equator of Mars to provide sufficient sunlight for the solar panels year round, have a low elevation to allow for sufficient atmospheric braking during EDL, be flat and relatively rock-free to reduce the probability of complications during landing, and have soft enough terrain to allow the heat flow probe to penetrate well into the ground. **An optimal area that meets all these requirements is Elysium Planitia, so all 22 initial potential landing sites were located in this area.** The only two other areas on the equator and at low elevation, Isidis Planitia and Valles Marineris, are too rocky.

P2: As "InSight" science goals are not related to any particular surface feature of Mars, potential landing sites were chosen on the basis of practicality. Candidate sites needed to be near the equator of Mars to provide sufficient sunlight for the solar panels year round, have a low elevation to allow for sufficient atmospheric braking during EDL, be flat and relatively rock-free to reduce the probability of complications during landing, and have soft enough terrain to allow the heat flow probe to penetrate well into the ground. **An amazing place that meets all these requirements is Elysium Planitia, so all 22 initial potential landing sites were located in this area.** The only two other areas on the equator and at low elevation, Isidis Planitia and Valles Marineris, are too rocky.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **optimal area** and **amazing place** interchangeable (i.e., having the same meaning)?

Pair 1231

P1: Agoraphobia is the specific anxiety about being in a place or situation where escape is difficult or embarrassing or where help may be unavailable. Agoraphobia is strongly linked with panic disorder and is often precipitated by the fear of having a panic attack. **A common manifestation involves needing to be in constant view of a door or other escape route.** In addition to the fears themselves, the term agoraphobia is often used to refer to avoidance behaviors that sufferers often develop.

P2: Agoraphobia is the specific anxiety about being in a place or situation where escape is difficult or embarrassing or where help may be unavailable. Agoraphobia is strongly linked with panic disorder and is often precipitated by the fear of having a panic attack. **A common manifestation involves needing to be in perpetual field of vision of a door or other escape route.** In addition to the fears themselves, the term agoraphobia is often used to refer to avoidance behaviors that sufferers often develop.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **constant view** and **perpetual field of vision** interchangeable (i.e., having the same meaning)?

Pair 1232

P1: For small cache sizes (much smaller than the working set prior to expansion), the increased sequentiality dominates, and inlining improves cache performance. For cache sizes close to the working set, where inlining expands the working set so it no longer fits in cache, this dominates and cache performance decreases. **For cache sizes larger than the working set, inlining has negligible impact on cache performance.** Further, changes in cache design, such as load forwarding, can offset the increase in cache misses.

P2: For small cache sizes (much smaller than the working set prior to expansion), the increased sequentiality dominates, and inlining improves cache performance. For cache sizes close to the working set, where inlining expands the working set so it no longer fits in cache, this dominates and cache performance decreases. **For cache sizes larger than the working set, inlining has inconsequential effect on cache performance.** Further, changes in cache design, such as load forwarding,

can offset the increase in cache misses.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **negligible impact** and **inconsequential effect** interchangeable (i.e., having the same meaning)?

Pair 1233

P1: The video open with a scene of a school appears and the sound of children reciting the Pledge of Allegiance. There's a flying plane followed by a big explosion, a reference to the 9/11 terrorist events. **Even though the video is mostly animated, throughout the song, the actual figure of Eminem is seen lip-syncing to the lyrics of the song.** This is clear that even though the video is mostly animated, Eminem still physically shot scenes of himself rapping for this specific music video.

P2: The video open with a scene of a school appears and the sound of children reciting the Pledge of Allegiance. There's a flying plane followed by a big explosion, a reference to the 9/11 terrorist events. **Even though the video is mostly animated, throughout the song, the real image of Eminem is seen lip-syncing to the lyrics of the song.** This is clear that even though the video is mostly animated, Eminem still physically shot scenes of himself rapping for this specific music video.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **actual figure** and **real image** interchangeable (i.e., having the same meaning)?

Pair 1234

P1: A commonly used starting system for horse races was devised in the mid nineteenth century by Admiral Rous, a steward of the Jockey Club and public handicapper. A starter, standing alongside the jockeys and horses, dropped his flag to signal the start. **An assistant some 100 yards down the course raised a second flag to indicate false starts.** An official starter might be well paid, but his duties were very demanding.

P2: A commonly used starting system for horse races was devised in the mid nineteenth century by Admiral Rous, a steward of the Jockey Club and public handicapper. A starter, standing alongside the jockeys and horses, dropped his flag to signal the start. **An assistant some 100 yards down the course raised a duplicate banner to indicate false starts.** An official starter might be well paid, but his duties were very demanding.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **second flag** and **duplicate banner** interchangeable (i.e., having the same meaning)?

Pair 1235

P1: It originally saw action as C Battalion, Tank Corps in 1917. History. **In 1916 the Machine Gun Corps formed a Heavy Section, later branch, in order to crew the first tanks.** C Company was formed at Bisley and sent to France, after offensives in 1916 the Heavy Section became the Heavy Branch and "C" Company was expanded to Battalion strength.

P2: It originally saw action as C Battalion, Tank Corps in 1917. History. **In 1916 the Machine Gun Corps formed a Heavy Section, next chapter, in order to crew the first tanks.** C Company was formed at Bisley and sent to France, after offensives in 1916 the Heavy Section became the Heavy Branch and "C" Company was expanded to Battalion strength.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **later branch** and **next chapter** interchangeable (i.e., having the same meaning)?

Pair 1236

P1: The following winter, the band set a new ISD record with 12 students advancing to state finals for individual competition. Contemporary Academy of Music (CAM). Students create **original rock**, Hip-Hop, Pop, EDM, Gospel, and beyond in the state-of-the-art Southwest H.S. studio.

P2: The following winter, the band set a new ISD record with 12 students advancing to state finals for individual competition. Contemporary Academy of Music (CAM). Students create **classic rock and roll**, Hip-Hop, Pop, EDM, Gospel, and beyond in the state-of-the-art Southwest H.S. studio.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **original rock** and **classic rock and roll** interchangeable (i.e., having the same meaning)?

Pair 1237

P1: Prevailing Mechanism. Definitive mechanistic studies of rhodium-catalyzed cyclopropanation are lacking. However, the mechanism has been rationalized based on **product distribution** and stereoselectivity. Attack of the diazo compound on the metal center generates a zwitterionic metal alkyl complex, which expels nitrogen gas to afford a metal carbene intermediate.

P2: Prevailing Mechanism. Definitive mechanistic studies of rhodium-catalyzed cyclopropanation are lacking. However, the mechanism has been rationalized based on **compound delivery** and stereoselectivity. Attack of the diazo compound on the metal center generates a zwitterionic metal alkyl complex, which expels nitrogen gas to afford a metal carbene intermediate.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **product distribution** and **compound delivery** interchangeable (i.e., having the same meaning)?

Pair 1238

P1: The development of IoT also brings forward the development of digital twin technology. This technology shows many characteristics that have similarities with the character of the IoT, namely its connective nature. First and foremost, the technology enables connectivity between the **physical component** and its digital counterpart. The basis of digital twins is based on this connection, without it, digital twin technology would not exist.

P2: The development of IoT also brings forward the development of digital twin technology. This technology shows many characteristics that have similarities with the character of the IoT, namely its connective nature. First and foremost, the technology enables connectivity between the **personal factor** and its digital counterpart. The basis of digital twins is based on this connection, without it, digital twin technology would not exist.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **physical component** and **personal factor** interchangeable (i.e., having the same meaning)?

Pair 1239

P1: In Ukraine, a 2007 law requires open access publishing of research created through public funding. In January 2008, Ukrainian, Belarusian, and Russian academics issued the "Belgorod Declaration on open access to scientific knowledge and cultural heritage." Ukrainian academics issued **another statement** in June 2009 in support of open access. Repositories.

P2: In Ukraine, a 2007 law requires open access publishing of research created through public funding. In January 2008, Ukrainian, Belarusian, and Russian academics issued the "Belgorod Declaration on open access to scientific knowledge

and cultural heritage.” Ukrainian academics issued **an additional declaration** in June 2009 in support of open access. Repositories.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **another statement** and **an additional declaration** interchangeable (i.e., having the same meaning)?

Pair 1240

P1: References to multiple versions of the "Mona Lisa". Dianne Hales quotes sixteenth century painter and art theorist Gian Paolo Lomazzo as identifying two versions of the painting: "In 1584, in his Treatise on Painting, the Florentine artist and chronicler Giovanni Paolo Lomazzo, a supposed acquaintance of Leonardo's longtime secretary Melzi, wrote that 'the two most beautiful and important portraits by Leonardo are the "Mona Lisa" and the "Gioconda". **another statement considered as evidence for this purpose was made by Fra. Pietro da Nuvolaria** in a 1501 letter to Isabella d'Este, Marchesa of Mantua, detailing Leonardo's activities from a visit to his studio.

P2: References to multiple versions of the "Mona Lisa". Dianne Hales quotes sixteenth century painter and art theorist Gian Paolo Lomazzo as identifying two versions of the painting: "In 1584, in his Treatise on Painting, the Florentine artist and chronicler Giovanni Paolo Lomazzo, a supposed acquaintance of Leonardo's longtime secretary Melzi, wrote that 'the two most beautiful and important portraits by Leonardo are the "Mona Lisa" and the "Gioconda". **a different assertion considered as evidence for this purpose was made by Fra. Pietro da Nuvolaria** in a 1501 letter to Isabella d'Este, Marchesa of Mantua, detailing Leonardo's activities from a visit to his studio.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **another statement** and **a different assertion** interchangeable (i.e., having the same meaning)?

Pair 1241

P1: Their second reign was very short, for they lost the titles nine days later to YAMATO and Cyber Kong. However, Doi would go on to become the ace of the promotion by year's end: He won the King of Gate Tournament on December 19, and then nine days later he defeated Shingo Takagi to become the Open the Dream Gate Champion. **On May 5, he made a notable defense** of the title against the former sumo champion-turned-wrestler Akebono. Despite the huge size difference, he was able to defeat Akebono and retain the title, after hitting him with five consecutive Bakatate Sliding Kicks.

P2: Their second reign was very short, for they lost the titles nine days later to YAMATO and Cyber Kong. However, Doi would go on to become the ace of the promotion by year's end: He won the King of Gate Tournament on December 19, and then nine days later he defeated Shingo Takagi to become the Open the Dream Gate Champion. **On May 5, he made a memorable fight** of the title against the former sumo champion-turned-wrestler Akebono. Despite the huge size difference, he was able to defeat Akebono and retain the title, after hitting him with five consecutive Bakatate Sliding Kicks.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **notable defense** and **memorable fight** interchangeable (i.e., having the same meaning)?

Pair 1242

P1: When Lorie asks why he would have any interest in her, he remarks 'beggars can't be choosers.' The two stay in Salvation, and Arseface lands a job shoveling manure. **He also befriends Custer's one-armed mother, who has a maternal interest** in Lorie. In the AMC "Preacher" television series, Arseface is portrayed by Ian Colletti.

P2: When Lorie asks why he would have any interest in her, he remarks 'beggars can't be choosers.' The two stay in Salvation, and Arseface lands a job shoveling manure. **He also befriends Custer's one-armed mother, who has a motherly concern** in Lorie. In the AMC "Preacher" television series, Arseface is portrayed by Ian Colletti.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **maternal interest** and **motherly concern** interchangeable (i.e., having the same meaning)?

Pair 1243

P1: In the past, T-Mobile had operated the metro area network as part of its nationwide network. iWireless launched its 4G LTE network in November 2015 and expanded the network in 2016 and 2017. <http://www.iwireless.com/support/coverage.aspx> Services. iWireless offers No Contract (Paid in Advance) plans with unlimited Nationwide Talk, Text, and Data, that require no contracts, **credit checks**, or deposits. They also offer Freedom Plans and installment payment options to credit-qualified customers.

P2: In the past, T-Mobile had operated the metro area network as part of its nationwide network. iWireless launched its 4G LTE network in November 2015 and expanded the network in 2016 and 2017. <http://www.iwireless.com/support/coverage.aspx> Services. iWireless offers No Contract (Paid in Advance) plans with unlimited Nationwide Talk, Text, and Data, that require no contracts, **debt to income ratio inquiries**, or deposits. They also offer Freedom Plans and installment payment options to credit-qualified customers.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **credit checks** and **debt to income ratio inquiries** interchangeable (i.e., having the same meaning)?

Pair 1244

P1: Credit rating agencies provide credit references for companies while credit bureaus provide credit references for individuals. Other letters of credit reference might be written by banks, which would provide basic information about how long the applicant has held an account, what type of account it was, and whether there were any overdrafts or late payments noted. Individuals and companies can carry out **credit checks** on businesses in order to assess their credit worthiness How credit references are used. Credit references are used to help lenders quantify the risk of lending to a given applicant or to determine overall creditworthiness.

P2: Credit rating agencies provide credit references for companies while credit bureaus provide credit references for individuals. Other letters of credit reference might be written by banks, which would provide basic information about how long the applicant has held an account, what type of account it was, and whether there were any overdrafts or late payments noted. Individuals and companies can carry out **asset reviews** on businesses in order to assess their credit worthiness How credit references are used. Credit references are used to help lenders quantify the risk of lending to a given applicant or to determine overall creditworthiness.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **credit checks** and **asset reviews** interchangeable (i.e., having the same meaning)?

Pair 1245

P1: Following the incident, anti-government political activists accused the ruling Supreme Council of the Armed Forces (SCAF) and remnants of the old regime still in positions of power, asserting that the events were of a "counter revolutionary" nature. Activists cited a rise in crime levels in the week leading up to the event as evidence that the violence had been organized (in Cairo and Helwan: two bank robberies and the heist of an armored vehicle transporting money. In Sharm el-Sheikh: an armed robbery in a **currency exchange** led to the murder of a French tourist). The violence in Port Said took place on the eve of the first anniversary of what later became known as "the battle of the camel", when armed thugs stormed protesters in Tahrir Square on camel-back.

P2: Following the incident, anti-government political activists accused the ruling Supreme Council of the Armed Forces (SCAF) and remnants of the old regime still in positions of power, asserting that the events were of a "counter revolutionary" nature. Activists cited a rise in crime levels in the week leading up to the event as evidence that the violence had been organized (in Cairo and Helwan: two bank robberies and the heist of an armored vehicle transporting money.

In Sharm el-Sheikh: an armed robbery in a **money conversion establishment** led to the murder of a French tourist). The violence in Port Said took place on the eve of the first anniversary of what later became known as "the battle of the camel", when armed thugs stormed protesters in Tahrir Square on camel-back.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **currency exchange** and **money conversion establishment** interchangeable (i.e., having the same meaning)?

Pair 1246

P1: Non-operating income, in accounting and finance, is gains or losses from sources not related to the typical activities of the business or organization. **Non-operating income can include gains or losses from investments, property or asset sales, currency exchange, and other atypical gains or losses.** Non-operating income is generally not recurring and is therefore usually excluded or considered separately when evaluating performance over a period of time (e.g.

P2: Non-operating income, in accounting and finance, is gains or losses from sources not related to the typical activities of the business or organization. **Non-operating income can include gains or losses from investments, property or asset sales, cash transfer, and other atypical gains or losses.** Non-operating income is generally not recurring and is therefore usually excluded or considered separately when evaluating performance over a period of time (e.g.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **currency exchange** and **cash transfer** interchangeable (i.e., having the same meaning)?

Pair 1247

P1: Behind the town of Arslanbob are the Khrebet Babash-Ata Mountains. There are two waterfalls nearby. **one measures high and has a slippery scree slope; it is situated in a cliff face north of the village.** Another, to the east, is in height and has two prayer caves, one of which is known as the Cave of the 40 Angels.

P2: Behind the town of Arslanbob are the Khrebet Babash-Ata Mountains. There are two waterfalls nearby. **one rates high and has a slippery scree slope; it is situated in a cliff face north of the village.** Another, to the east, is in height and has two prayer caves, one of which is known as the Cave of the 40 Angels.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one measures** and **one rates** interchangeable (i.e., having the same meaning)?

Pair 1248

P1: Shobha (Nirupa Roy) and Asha (Veena) are friends married to two pilot officers (Rehman and Iftekhar respectively). Shobha is pregnant and her husband extracts a promise from her that if it's a boy she will make him join the Air Force. **The next morning the families have to vacate the Air Force station due to war activities.** The two pilots are killed when their plane is hit during a mission.

P2: Shobha (Nirupa Roy) and Asha (Veena) are friends married to two pilot officers (Rehman and Iftekhar respectively). Shobha is pregnant and her husband extracts a promise from her that if it's a boy she will make him join the Air Force. **The next morning the families have to vacate the Air Force station due to combat exercises.** The two pilots are killed when their plane is hit during a mission.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **war activities** and **combat exercises** interchangeable (i.e., having the same meaning)?

Pair 1249

P1: Bush then assembled the cast which included Carlotta Freeman, Dooley Wilson and Andrew Bishop. The play opened at the Lincoln Theatre in November 1915. For the next six weeks, Bush's company presented a **different play** every two weeks to much success. The Anita Bush Stock Company presented a one-act play titled "The Girl at the Fort".

P2: Bush then assembled the cast which included Carlotta Freeman, Dooley Wilson and Andrew Bishop. The play opened at the Lincoln Theatre in November 1915. For the next six weeks, Bush's company presented a **separate performance** every two weeks to much success. The Anita Bush Stock Company presented a one-act play titled "The Girl at the Fort".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **different play** and **separate performance** interchangeable (i.e., having the same meaning)?

Pair 1250

P1: Finite winning strategies. Winning strategies for quantifier-free formulas are always finite trees, whereas winning strategies for first-order formulas can, in general, be trees of countably infinitely many finite branches (each branch is a play). For example, if one player states some universal quantifier, then each choice of the adversary triggers a **different play**. In the following example the thesis is an existential that triggers infinite branches, each of them constituted by a choice of P: Infinite winning strategies for P can be avoided by introducing some restriction grounded on the following rationale These lead to the following restrictions: The rules for local and global meaning plus the notion of winning strategy mentioned above set the dialogical conception of classical and intuitionistic logic.

P2: Finite winning strategies. Winning strategies for quantifier-free formulas are always finite trees, whereas winning strategies for first-order formulas can, in general, be trees of countably infinitely many finite branches (each branch is a play). For example, if one player states some universal quantifier, then each choice of the adversary triggers a **distinct move**. In the following example the thesis is an existential that triggers infinite branches, each of them constituted by a choice of P: Infinite winning strategies for P can be avoided by introducing some restriction grounded on the following rationale These lead to the following restrictions: The rules for local and global meaning plus the notion of winning strategy mentioned above set the dialogical conception of classical and intuitionistic logic.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **different play** and **distinct move** interchangeable (i.e., having the same meaning)?

Pair 1251

P1: Leadership development coach Jack Zenger urges companies to find alternatives to annual performance reviews, and says that research supports the following: Seniority and labor contracts. Labor union contracts sometimes specify that promotions, layoffs, and various perks are assigned in order of seniority, rather than based on performance. Historically, this was **one means** to prevent cronyism, nepotism, and corruption, and could also be seen as a form of solidarity. If employers have a reliable way to distinguish productive from unproductive workers, then firing the worst employees and hiring replacements would be one way to increase the overall productivity of the firm, and possibly increase profits or lower consumer prices.

P2: Leadership development coach Jack Zenger urges companies to find alternatives to annual performance reviews, and says that research supports the following: Seniority and labor contracts. Labor union contracts sometimes specify that promotions, layoffs, and various perks are assigned in order of seniority, rather than based on performance. Historically, this was **a method** to prevent cronyism, nepotism, and corruption, and could also be seen as a form of solidarity. If employers have a reliable way to distinguish productive from unproductive workers, then firing the worst employees and hiring replacements would be one way to increase the overall productivity of the firm, and possibly increase profits or lower consumer prices.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one means** and **a method** interchangeable (i.e., having the same meaning)?

Pair 1252

P1: Back at the hospital, Ben gets into his car to find that Dreg, Glory's demon minion, is waiting in the backseat. It is revealed that Ben is the one who summoned the Queller, in order to reduce the growing number of crazy people left from Glory's "brain sucking". Meanwhile Joyce, because of her **brief experience** as an insane person, has realized the truth about Dawn, which Buffy confirms for her. Joyce insists that Dawn is nevertheless her daughter and urges Buffy to take care of Dawn in case anything goes wrong during the operation.

P2: Back at the hospital, Ben gets into his car to find that Dreg, Glory's demon minion, is waiting in the backseat. It is revealed that Ben is the one who summoned the Queller, in order to reduce the growing number of crazy people left from Glory's "brain sucking". Meanwhile Joyce, because of her **limited knowledge** as an insane person, has realized the truth about Dawn, which Buffy confirms for her. Joyce insists that Dawn is nevertheless her daughter and urges Buffy to take care of Dawn in case anything goes wrong during the operation.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **brief experience** and **limited knowledge** interchangeable (i.e., having the same meaning)?

Pair 1253

P1: East Flatbush is home to three major hospitals, Kings County Hospital, SUNY Downstate Medical Center, and Kingsbrook Jewish Medical Center. Transportation. East Flatbush does not have as **much access** to the New York City Subway as Flatbush. However, the IRT Nostrand Avenue Line () has some stops located in East Flatbush, including Newkirk Avenue, Beverly Road, and Church Avenue.

P2: East Flatbush is home to three major hospitals, Kings County Hospital, SUNY Downstate Medical Center, and Kingsbrook Jewish Medical Center. Transportation. East Flatbush does not have as **enough ingress** to the New York City Subway as Flatbush. However, the IRT Nostrand Avenue Line () has some stops located in East Flatbush, including Newkirk Avenue, Beverly Road, and Church Avenue.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **much access** and **enough ingress** interchangeable (i.e., having the same meaning)?

Pair 1254

P1: These accusations were leveled at BP, its contractors, local law enforcement, USCG, and other government officials. Scientists also complained about prevention of access to information controlled by BP and government sources. BP stated that its policy was to allow the media and other parties as **much access** as possible. On 30 June 2010, the USCG put new restrictions in place across the Gulf Coast that prevented vessels from coming within "of booming operations, boom, or oil spill response operations".

P2: These accusations were leveled at BP, its contractors, local law enforcement, USCG, and other government officials. Scientists also complained about prevention of access to information controlled by BP and government sources. BP stated that its policy was to allow the media and other parties as **unlimited contact** as possible. On 30 June 2010, the USCG put new restrictions in place across the Gulf Coast that prevented vessels from coming within "of booming operations, boom, or oil spill response operations".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **much access** and **unlimited contact** interchangeable (i.e., having the same meaning)?

Pair 1255

P1: Comments were accepted through 4 October 2010. On 20 June 2006, it was announced that Cannon AFB would transfer from Air Combat Command and become an Air Force Special Operations Command (AFSOC) installation. **initial word** was that the 16th Special Operations Wing would transfer from Hurlburt Field, Florida. It was later decided that the 27th Fighter Wing would transfer from ACC to AFSOC and become the 27th Special Operations Wing.

P2: Comments were accepted through 4 October 2010. On 20 June 2006, it was announced that Cannon AFB would transfer from Air Combat Command and become an Air Force Special Operations Command (AFSOC) installation. **first announcement** was that the 16th Special Operations Wing would transfer from Hurlburt Field, Florida. It was later decided that the 27th Fighter Wing would transfer from ACC to AFSOC and become the 27th Special Operations Wing.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **initial word** and **first announcement** interchangeable (i.e., having the same meaning)?

Pair 1256

P1: The service was officiated by the Reverend Billy Graham, a friend of Richard Nixon's, who called him "one of the most misunderstood men, and I think he was one of the greatest men of the century." Eulogies were delivered by Graham, Henry Kissinger, Senator Bob Dole, California Governor Pete Wilson and President Clinton. **Dole could not hold back his tears at the end of his speech, a rare show of emotion in public for the Senator.** Following the service, Nixon was buried beside his wife; Pat had died on June 22, 1993.

P2: The service was officiated by the Reverend Billy Graham, a friend of Richard Nixon's, who called him "one of the most misunderstood men, and I think he was one of the greatest men of the century." Eulogies were delivered by Graham, Henry Kissinger, Senator Bob Dole, California Governor Pete Wilson and President Clinton. **Dole could not hold back his tears at the end of his speech, a unique demonstration of emotion in public for the Senator.** Following the service, Nixon was buried beside his wife; Pat had died on June 22, 1993.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **rare show** and **unique demonstration** interchangeable (i.e., having the same meaning)?

Pair 1257

P1: The 2017 Rivers State budget was the financial statement of the Rivers State government presenting its proposed revenues and spending for the 2017 fiscal year. **It was named the "Golden Jubilee Budget for accelerated development" to mark the state's 50th anniversary in 2017.** It was presented before the House on 28 December 2016 by Governor Ezenwo Nyesom Wike.

P2: The 2017 Rivers State budget was the financial statement of the Rivers State government presenting its proposed revenues and spending for the 2017 fiscal year. **It was named the "Golden Jubilee Budget for rapid expansion" to mark the state's 50th anniversary in 2017.** It was presented before the House on 28 December 2016 by Governor Ezenwo Nyesom Wike.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **accelerated development** and **rapid expansion** interchangeable (i.e., having the same meaning)?

Pair 1258

P1: On 28 July 1943, the three men attacked the car, throwing a grenade, and succeeded in getting away. However, they missed their target; furthermore, it was not von Schaumburg who was in the car on that day, but lieutenant colonel Moritz von Maliber, a high-ranking member of von Schaumburgs staff. **Thenceforth, Rajman became a major target, and his hideaway at rue de Belleville, Paris, was soon known to the Renseignements généraux.** However, the RG preferred

to prolong their surveillance in the hope that it would lead to more arrests.

P2: On 28 July 1943, the three men attacked the car, throwing a grenade, and succeeded in getting away. However, they missed their target; furthermore, it was not von Schaumburg who was in the car on that day, but lieutenant colonel Moritz von Maliber, a high-ranking member of von Schaumburgs staff. **Thenceforth, Rajman became a huge object, and his hideaway at rue de Belleville, Paris, was soon known to the Renseignements généraux.** However, the RG preferred to prolong their surveillance in the hope that it would lead to more arrests.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **major target** and **huge object** interchangeable (i.e., having the same meaning)?

Pair 1259

P1: The plan owner uses this information to fill out lines 15 and 16 on Form 1040. Copy B of Form 1099-R is attached to Form 1040 only if federal income tax is withheld in box 4 of Form 1099-R. With regards to IRAs, Form 1099-R is used for reporting distributions from an IRA while Form 5498 is used for reporting contributions to an IRA. **Income earned (such as interest and dividends) through an IRA is not reported on either form 1099-R or Form 5498.** Form RRB-1099-R "Pension and Annuity Income by the Railroad Retirement Board" is the Railroad Retirement Board counterpart to Form 1099-R. Form W-4P "Withholding Certificate for Pension or Annuity Payments" is filed by payment recipients to inform payers the correct amount of tax to withhold from their payments.

P2: The plan owner uses this information to fill out lines 15 and 16 on Form 1040. Copy B of Form 1099-R is attached to Form 1040 only if federal income tax is withheld in box 4 of Form 1099-R. With regards to IRAs, Form 1099-R is used for reporting distributions from an IRA while Form 5498 is used for reporting contributions to an IRA. **Income earned (such as interest and dividends) through an IRA is not reported on any document 1099-R or Form 5498.** Form RRB-1099-R "Pension and Annuity Income by the Railroad Retirement Board" is the Railroad Retirement Board counterpart to Form 1099-R. Form W-4P "Withholding Certificate for Pension or Annuity Payments" is filed by payment recipients to inform payers the correct amount of tax to withhold from their payments.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **either form** and **any document** interchangeable (i.e., having the same meaning)?

Pair 1260

P1: The Bendeleben (/ b n.də le .b n/) Mountains are a mountain range on the heart of the Seward Peninsula in Nome Census Area, Alaska, United States. **This range forms a major divide between drainage basins draining into the Pacific Ocean and the Arctic Ocean.** The tallest peak, Mount Bendeleben is at the summit, and is located on the west end.

P2: The Bendeleben (/ b n.də le .b n/) Mountains are a mountain range on the heart of the Seward Peninsula in Nome Census Area, Alaska, United States. **This range forms a huge intersection between drainage basins draining into the Pacific Ocean and the Arctic Ocean.** The tallest peak, Mount Bendeleben is at the summit, and is located on the west end.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **major divide** and **huge intersection** interchangeable (i.e., having the same meaning)?

Pair 1261

P1: Wright considered Bright to be his greatest foe, and on every occasion possible attempted to thwart his political success. For his loyalty, Whitcomb guaranteed Wright's nomination for governor in the state's 1849 Democratic Convention where Whitcomb presided. **The state party had a major divide on the slavery issue and the internal improvement projects.** Whitcomb tried to accommodate both side by taking the anti-slavery position and the anti-internal-improvement position.

P2: Wright considered Bright to be his greatest foe, and on every occasion possible attempted to thwart his political success. For his loyalty, Whitcomb guaranteed Wright's nomination for governor in the state's 1849 Democratic Convention

where Whitcomb presided. The state party had a **chief difference** on the slavery issue and the internal improvement projects. Whitcomb tried to accommodate both side by taking the anti-slavery position and the anti-internal-improvement position.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **major divide** and **chief difference** interchangeable (i.e., having the same meaning)?

Pair 1262

P1: In the 2009 Superbike World Championship season, the highest race result achieved by Corser was fifth place in the Czech Republic, and Xaus achieved seventh place in Italy. During the 2010 FIM Superstock 1000 Championship season, Ayrton Badovini dominated by winning every single race but one on the S1000RR. This result was significant because the Superstock class of WSBK is where the machines most closely resemble the **stock offerings** at the showroom. On 13 May 2012, Italian rider Marco Melandri riding for the factory BMW Motorrad team was the first to secure a win for the S1000RR in World Superbike competition at the British round in Donington Park.

P2: In the 2009 Superbike World Championship season, the highest race result achieved by Corser was fifth place in the Czech Republic, and Xaus achieved seventh place in Italy. During the 2010 FIM Superstock 1000 Championship season, Ayrton Badovini dominated by winning every single race but one on the S1000RR. This result was significant because the Superstock class of WSBK is where the machines most closely resemble the **product sales** at the showroom. On 13 May 2012, Italian rider Marco Melandri riding for the factory BMW Motorrad team was the first to secure a win for the S1000RR in World Superbike competition at the British round in Donington Park.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **stock offerings** and **product sales** interchangeable (i.e., having the same meaning)?

Pair 1263

P1: The band supported "Gonzo" on their headlining "Gonzo Tour" from May to August 2014 across the United States. Recording and production. "Gonzo" was recorded, in its entirety, in a **single room** in Chicago, Illinois and produced by Steve Albini. The majority of the instrumentals and vocals on the album were recorded in the same room at the same time; only one overdub was used on the entire record.

P2: The band supported "Gonzo" on their headlining "Gonzo Tour" from May to August 2014 across the United States. Recording and production. "Gonzo" was recorded, in its entirety, in a **private area** in Chicago, Illinois and produced by Steve Albini. The majority of the instrumentals and vocals on the album were recorded in the same room at the same time; only one overdub was used on the entire record.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **single room** and **private area** interchangeable (i.e., having the same meaning)?

Pair 1264

P1: The Public Police Bureau also has numerous departments, including, but not limited to, the Preventive Service and Traffic Control Service. The Traffic Control Service is considered to be one of the most corrupt criminal justice bodies in Lithuania. Prior to 2002, Traffic Control officers used to be empowered to issue on the **spot fines** far greater than their own salaries. As such, a common form of police corruption was known to occur where members of the public bribe traffic officers to avoid receiving expensive fines.

P2: The Public Police Bureau also has numerous departments, including, but not limited to, the Preventive Service and Traffic Control Service. The Traffic Control Service is considered to be one of the most corrupt criminal justice bodies in Lithuania. Prior to 2002, Traffic Control officers used to be empowered to issue on the **location tickets** far greater than their own salaries. As such, a common form of police corruption was known to occur where members of the public bribe traffic officers to avoid receiving expensive fines.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **spot fines** and **location tickets** interchangeable (i.e., having the same meaning)?

Pair 1265

P1: For business-to-consumer companies, these other stakeholders (e.g., employees) are sometimes customers too, but they need not be (e.g., nontarget market members of the firm's local community). Similar terms. Kotler and Singh (1981) coined the term "marketing hyperopia", by which they mean a better vision of distant issues than of **near ones**. Baughman (1974) uses the term "marketing macropia" meaning an overly broad view of your industry.

P2: For business-to-consumer companies, these other stakeholders (e.g., employees) are sometimes customers too, but they need not be (e.g., nontarget market members of the firm's local community). Similar terms. Kotler and Singh (1981) coined the term "marketing hyperopia", by which they mean a better vision of distant issues than of **closer issues**. Baughman (1974) uses the term "marketing macropia" meaning an overly broad view of your industry.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **near ones** and **closer issues** interchangeable (i.e., having the same meaning)?

Pair 1266

P1: But since it is expected that Polgas would try to stop the event from taking place, Brother Jonas later unleashes his trump card: a super-stinky meat inspector named Boy Pantog that knocks him out with his body odor. The cultists arrive at the site, only to find a group of UFO watchers already there. Brother Jonas argues with the group leader over who reserved the site first; eventually the cult goes to a **dense part** of the mountain. He then instructs his bodyguards to secure the perimeter in case some of the cultists back out at the last minute.

P2: But since it is expected that Polgas would try to stop the event from taking place, Brother Jonas later unleashes his trump card: a super-stinky meat inspector named Boy Pantog that knocks him out with his body odor. The cultists arrive at the site, only to find a group of UFO watchers already there. Brother Jonas argues with the group leader over who reserved the site first; eventually the cult goes to a **concentrated area** of the mountain. He then instructs his bodyguards to secure the perimeter in case some of the cultists back out at the last minute.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **dense part** and **concentrated area** interchangeable (i.e., having the same meaning)?

Pair 1267

P1: She spoke to the convention on the topic "Personality in Business" in 1919. 1922 she was named third vice-president of the Association. "There is never a convention at which she is not present, either as a speaker or spectator," noted **one profile** of Surdam in 1919. Personal life.

P2: She spoke to the convention on the topic "Personality in Business" in 1919. 1922 she was named third vice-president of the Association. "There is never a convention at which she is not present, either as a speaker or spectator," noted **a single characterization** of Surdam in 1919. Personal life.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one profile** and **a single characterization** interchangeable (i.e., having the same meaning)?

Pair 1268

P1: The project includes track refurbishment and upgrades on the existing track sections of the Thessaloniki - Florina and Thessaloniki - Alexandroupolis railway lines, and brand new track between Florina and Krystallopigi, and Kozani to Igoumenitsa. The projected cost of this project is €10 billion. A new double track, standard gauge railway between Athens and Patras is also currently under construction or under tendering process. An expansion of the Proastikos Athens to Loutraki is currently underway.

P2: The project includes track refurbishment and upgrades on the existing track sections of the Thessaloniki - Florina and Thessaloniki - Alexandroupolis railway lines, and brand new track between Florina and Krystallopigi, and Kozani to Igoumenitsa. The projected cost of this project is €10 billion. A new double track, standard gauge railway between Athens and Patras is also currently under construction or under quotation phase. An expansion of the Proastikos Athens to Loutraki is currently underway.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are tendering process and quotation phase interchangeable (i.e., having the same meaning)?

Pair 1269

P1: Additional edible jellyfish species include "Aurelia aurita", "Crambionella orsini", "Chrysaora pacifica", "Lobonema smithi", "Lobonemoides gracilis" and Nomura's jellyfish ("Stomolophus nomuria"). Desalted ready-to-use jellyfish are low in calories and contain hardly any fat, about 5% protein and 95% water. They do not have much flavor, and may be used to add additional texture and mouthfeel to various dishes. In some areas of Asia, jellyfish is "associated with easing bone and muscle pain."

P2: Additional edible jellyfish species include "Aurelia aurita", "Crambionella orsini", "Chrysaora pacifica", "Lobonema smithi", "Lobonemoides gracilis" and Nomura's jellyfish ("Stomolophus nomuria"). Desalted ready-to-use jellyfish are low in calories and contain hardly any fat, about 5% protein and 95% water. They do not have much flavor, and may be used to add extra consistency and mouthfeel to various dishes. In some areas of Asia, jellyfish is "associated with easing bone and muscle pain."

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are additional texture and extra consistency interchangeable (i.e., having the same meaning)?

Pair 1270

P1: In describing her technique, Scaccia says: Her technique was influenced by how beeswax is used on furniture and similarly from its use in the Batik technique. She later incorporated paper techniques from workshops she attended in New York. In 2013, Scaccia exhibited her second body of work entitled "The Perfect Stage" at the BOSI Contemporary Gallery in New York. In the same period, she had begun working at the art studio of Jeff Koons.

P2: In describing her technique, Scaccia says: Her technique was influenced by how beeswax is used on furniture and similarly from its use in the Batik technique. She later incorporated paper techniques from workshops she attended in New York. In 2013, Scaccia exhibited her next piece of work entitled "The Perfect Stage" at the BOSI Contemporary Gallery in New York. In the same period, she had begun working at the art studio of Jeff Koons.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are second body and next piece interchangeable (i.e., having the same meaning)?

Pair 1271

P1: The use of the term "dumb" refers to the fact that the network operator does not affect the customer's accessibility of the Internet such as by either limiting the available services or applications to its own proprietary portal (like a walled garden) or offer additional capabilities and services beyond simple connectivity (like a smart pipe, the term with which it contrasts). A dumb pipe primarily provides simple bandwidth and network speeds greater than the maximum network

loads expected thus avoiding the need to discriminate between data types. Among the commonly understood operational models for a MNO are the dumb pipe, the smart pipe, and the walled garden. Description.

P2: The use of the term "dumb" refers to the fact that the network operator does not affect the customer's accessibility of the Internet such as by either limiting the available services or applications to its own proprietary portal (like a walled garden) or offer additional capabilities and services beyond simple connectivity (like a smart pipe, the term with which it contrasts). A dumb pipe primarily provides simple bandwidth and network speeds greater than the maximum network loads expected thus avoiding the need to discriminate between data types. Among the commonly understood operational models for a MNO are the dumb pipe, the smart pipe, and the enclosed back yard. Description.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are walled garden and enclosed back yard interchangeable (i.e., having the same meaning)?

Pair 1272

P1: The idea was proposed by Kazakhstan at the end of the Cold War and at the time of shifting geopolitics, provided a timely opportunity for the Asian nations to address modern challenges to the international peace and stability and set out the vision to tackle them. The fledgling forum's main purpose of bringing peace to all, including bringing together seemingly irreconcilable countries and interests, was immediately put to a real life test. The CICA Summit drew spotlight of the world's attention to Almaty, provided the background for laying the foundations for the first security organization in Asia. The 16 nations signed the Almaty Act, the Charter of the CICA and pledging to work "towards promoting peace, security and stability in Asia".

P2: The idea was proposed by Kazakhstan at the end of the Cold War and at the time of shifting geopolitics, provided a timely opportunity for the Asian nations to address modern challenges to the international peace and stability and set out the vision to tackle them. The fledgling forum's main purpose of bringing peace to all, including bringing together seemingly irreconcilable countries and interests, was immediately put to a real life test. The CICA Summit drew spotlight of the planet's concentration to Almaty, provided the background for laying the foundations for the first security organization in Asia. The 16 nations signed the Almaty Act, the Charter of the CICA and pledging to work "towards promoting peace, security and stability in Asia".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are world's attention and planet's concentration interchangeable (i.e., having the same meaning)?

Pair 1273

P1: Cassius Dio and the unreliable "Historia Augusta" accuse Faustina of ordering deaths by poison and execution; she has also been accused of instigating the revolt of Avidius Cassius against her husband. The "Historia Augusta" mentions adultery with sailors, gladiators, and men of rank; however, Faustina and Aurelius seem to have been very close and mutually devoted. Faustina accompanied her husband on various military campaigns and enjoyed the excessive love and reverence of Roman soldiers. Aurelius gave her the title of "Mater Castrorum" or 'Mother of the Camp'.

P2: Cassius Dio and the unreliable "Historia Augusta" accuse Faustina of ordering deaths by poison and execution; she has also been accused of instigating the revolt of Avidius Cassius against her husband. The "Historia Augusta" mentions adultery with sailors, gladiators, and men of rank; however, Faustina and Aurelius seem to have been very close and mutually devoted. Faustina accompanied her husband on various military campaigns and enjoyed the overwhelming adoration and reverence of Roman soldiers. Aurelius gave her the title of "Mater Castrorum" or 'Mother of the Camp'.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are excessive love and overwhelming adoration interchangeable (i.e., having the same meaning)?

Pair 1274

P1: Ketones evaporate quickly, so there is a chance of getting a false negative test result if testing older urine. The urine testing strip bottle has instructions and color charts to illustrate how the color on the strip will change given the level of ketones or glucose in the urine over 15 (ketones–Ketostix) or 30 (glucose–Ketodiastix) seconds. Reading the colors at those time intervals is important because the colors will continue to darken and a later reading will be an incorrect result. Timing with a clock or watch second hand instead of counting is more accurate.

P2: Ketones evaporate quickly, so there is a chance of getting a false negative test result if testing older urine. The urine testing strip bottle has instructions and color charts to illustrate how the color on the strip will change given the level of ketones or glucose in the urine over 15 (ketones–Ketostix) or 30 (glucose–Ketodiastix) seconds. Reading the colors at those time intervals is important because the colors will continue to darken and a succeeding examination will be an incorrect result. Timing with a clock or watch second hand instead of counting is more accurate.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are later reading and succeeding examination interchangeable (i.e., having the same meaning)?

Pair 1275

P1: To make the three whirls is rather a difficult matter, as it must be done very rapidly to accomplish a complete revolution to one beat of the music, but with a little practice it is soon learned. Troy Kinney describes the Castle Walk as part of One-Step as follows: This is a walking step of direct advance and retreat, not used to move to the side. The couple are in closed position, the woman, therefore, stepping backward as the man steps forward, and vice versa. The advancing foot is planted in fourth position, the knee straight, the toe down so that the ball of the foot strikes the floor first.

P2: To make the three whirls is rather a difficult matter, as it must be done very rapidly to accomplish a complete revolution to one beat of the music, but with a little practice it is soon learned. Troy Kinney describes the Castle Walk as part of One-Step as follows: This is a walking step of direct advance and retreat, not used to move to the side. The couple are in proximal location to one another, the woman, therefore, stepping backward as the man steps forward, and vice versa. The advancing foot is planted in fourth position, the knee straight, the toe down so that the ball of the foot strikes the floor first.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are closed position and proximal location to one another interchangeable (i.e., having the same meaning)?

Pair 1276

P1: Issues. Issues can have several aspects to them. Each issue in the system may have an urgency value assigned to it, based on the overall importance of that issue. Low or zero urgency issues are minor and should be resolved as time permits.

P2: Issues. Issues can have several aspects to them. Each issue in the system may have an urgency value assigned to it, based on the comprehensive value of that issue. Low or zero urgency issues are minor and should be resolved as time permits.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are overall importance and comprehensive value interchangeable (i.e., having the same meaning)?

Pair 1277

P1: "Laminaria" has an ash content of 33%, while wood has about a 2% ash content when burned. Algae have a high water content requiring much energy to dry the algae before being able to properly use it. More research is being done

with anaerobic digestion, which is the most **promising practice** to extract energy from "Laminaria". There are still barriers to overcome before moving forward with anaerobic digestion, such as its cost per kwh.

P2: "Laminaria" has an ash content of 33%, while wood has about a 2% ash content when burned. Algae have a high water content requiring much energy to dry the algae before being able to properly use it. **More research is being done with anaerobic digestion, which is the most hopeful method** to extract energy from "Laminaria". There are still barriers to overcome before moving forward with anaerobic digestion, such as its cost per kwh.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **promising practice** and **hopeful method** interchangeable (i.e., having the same meaning)?

Pair 1278

P1: Two firefighters employed by Oil India Limited died on 10 June 2020 while fighting the fire resulting from the gas leak. Four other fire fighters suffered injuries. **local reports** indicate that there have been more deaths in the area; an inquiry by a local magistrate is currently investigating these claims. On 10 September 2020, an engineer working with Oil India Limited, Arnab Kishore Bordoloi, died while working at the well site.

P2: Two firefighters employed by Oil India Limited died on 10 June 2020 while fighting the fire resulting from the gas leak. Four other fire fighters suffered injuries. **community data** indicate that there have been more deaths in the area; an inquiry by a local magistrate is currently investigating these claims. On 10 September 2020, an engineer working with Oil India Limited, Arnab Kishore Bordoloi, died while working at the well site.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **local reports** and **community data** interchangeable (i.e., having the same meaning)?

Pair 1279

P1: Fire did not spread through the enclosed elevator shafts, nor through the laundry or mail chutes. Open transoms between the rooms and the corridors admitted fresh air for combustion, eventually creating a flue-like effect with the fire climbing to all but the two top floors. **Once established in the corridors, the fire fed on the burlap wallcoverings and ignited room doors** and transoms. Doors and transoms were burned through on all but the fourteenth and fifteenth floors.

P2: Fire did not spread through the enclosed elevator shafts, nor through the laundry or mail chutes. Open transoms between the rooms and the corridors admitted fresh air for combustion, eventually creating a flue-like effect with the fire climbing to all but the two top floors. **Once established in the corridors, the fire fed on the burlap wallcoverings and ignited area openings** and transoms. Doors and transoms were burned through on all but the fourteenth and fifteenth floors.

Pair 1282

P1: The Montenegrin National Army, formed in April 1945 by Sekula Drljević with the support of the NDH government, to gather Montenegrins from NDH in the unit, were retreating together with Croatian forces. Thousands of Russian Cossacks of the XVth SS Cossack Cavalry Corps, stationed in Yugoslavia since 1943, were also retreating to Austria. On 7 May 1945, Germany surrendered unconditionally to the Allied powers, marking the practical end of World War II in Europe. The German Instrument of Surrender applied to German Wehrmacht forces in Yugoslavia, as well as to other armed forces under German control, such as the Croatian Armed Forces.

P2: The Montenegrin National Army, formed in April 1945 by Sekula Drljević with the support of the NDH government, to gather Montenegrins from NDH in the unit, were retreating together with Croatian forces. Thousands of Russian Cossacks of the XVth SS Cossack Cavalry Corps, stationed in Yugoslavia since 1943, were also retreating to Austria. On 7 May 1945, Germany surrendered unconditionally to the Allied powers, marking the combative conclusion of World War II in Europe. The German Instrument of Surrender applied to German Wehrmacht forces in Yugoslavia, as well as to other armed forces under German control, such as the Croatian Armed Forces.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are practical end and combative conclusion interchangeable (i.e., having the same meaning)?

Pair 1283

P1: Although it seems that resistin levels increase with obesity, can we conclude then that such serum resistin increases are accountable for the insulin resistance that appears to be associated with increased adiposity? Many researchers in their respective studies have shown that this is indeed the case by finding positive correlations between resistin levels and insulin resistance. This discovery is further supported by studies that confirm a direct correlation between resistin levels and subjects with T2DM. If resistin does contribute to the pathogenesis of insulin resistance in T2DM, then designing drugs to promote decreased serum resistin in T2DM subjects might deliver immense therapeutic benefits.

P2: Although it seems that resistin levels increase with obesity, can we conclude then that such serum resistin increases are accountable for the insulin resistance that appears to be associated with increased adiposity? Many researchers in their respective studies have shown that this is indeed the case by finding positive correlations between resistin levels and insulin resistance. This discovery is further supported by studies that confirm a **forthright link** between resistin levels and subjects with T2DM. If resistin does contribute to the pathogenesis of insulin resistance in T2DM, then designing drugs to promote decreased serum resistin in T2DM subjects might deliver immense therapeutic benefits.

Please record your answer for the following question in the provided Google sheet

Pair 1304

P1: However, in February 2007, "The New Yorker" claimed that the series was heavily tilted towards conservatives. Throughout the article, "Whatever It Takes: The Politics Behind the Man of '24'," Jane Mayer cites Surnow’s support for the Republican Party and in particular his admiration of Ronald Reagan, whom Surnow states was "the father this country needed" and "made me feel good that I was in his family". Mayer also characterizes Rick Santorum, to **whose campaign** Surnow donated money, as "hard line" and Surnow’s friend Cyrus Nowrasteh as a "hard-core conservative". Early in the article Mayer states that Surnow is a critic of the 2003 Iraq War, an "isolationist" and as someone who has "no faith in nation building".

P2: However, in February 2007, "The New Yorker" claimed that the series was heavily tilted towards conservatives. Throughout the article, "Whatever It Takes: The Politics Behind the Man of '24'," Jane Mayer cites Surnow’s support for the Republican Party and in particular his admiration of Ronald Reagan, whom Surnow states was "the father this country needed" and "made me feel good that I was in his family". Mayer also characterizes Rick Santorum, to **which candidacy** Surnow donated money, as "hard line" and Surnow’s friend Cyrus Nowrasteh as a "hard-core conservative". Early in the article Mayer states that Surnow is a critic of the 2003 Iraq War, an "isolationist" and as someone who has "no faith in nation building".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **whose campaign** and **which candidacy** interchangeable (i.e., having the same meaning)?

Pair 1305

P1: Another was John Northwood, and his son Harry C. Northwood who helped establish glassware in the USA. Yet another who established glassware in the USA was John Northwood’s friend, Frederick Carder. **One of the most accomplished glasscutters** was George Woodall, **whose campaign** led to the building of the Wordsley School of Art. The 'Red House Glassworks', a 100-foot high glassmaking cone, survives and has recently been restored.

P2: Another was John Northwood, and his son Harry C. Northwood who helped establish glassware in the USA. Yet another who established glassware in the USA was John Northwood's friend, Frederick Carder. One of the most accomplished glasscutters was George Woodall, his crusade led to the building of the Wordsley School of Art. The 'Red House Glassworks', a 100-foot high glassmaking cone, survives and has recently been restored.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are whose campaign and his crusade interchangeable (i.e., having the same meaning)?

Pair 1306

P1: Chris Andrews discovered the Chasers in his home town of Romford; this track is from their second of three singles. Lead guitarist Len Tuckey would later join the Riot Squad and the Nashville Teens, as well as the backing band for Suzi Quatro; they eventually married. "Take Away" is the flip side of the Couriers' only single; the "a" side is on "English Freakbeat, Volume 3". Members of the Rats included a young Mick Ronson.

P2: Chris Andrews discovered the Chasers in his home town of Romford; this track is from their second of three singles. Lead guitarist Len Tuckey would later join the Riot Squad and the Nashville Teens, as well as the backing band for Suzi Quatro; they eventually married. "Take Away" is the flip side of the Couriers' only single; the initial edge is on "English Freakbeat, Volume 3". Members of the Rats included a young Mick Ronson.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are "a" side and initial edge interchangeable (i.e., having the same meaning)?

Pair 1307

P1: It was destroyed in 1903. Description. The fountain is in the form of a monumental block of cut stone in a square section framed by columns. On each of its faces are affixed stone medallions representing figures whose name is honored by the streets that converge in the surrounding part of the 15th district.

P2: It was destroyed in 1903. Description. The fountain is in the form of a gigantic slab of cut stone in a square section framed by columns. On each of its faces are affixed stone medallions representing figures whose name is honored by the streets that converge in the surrounding part of the 15th district.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are monumental block and gigantic slab interchangeable (i.e., having the same meaning)?

Pair 1308

P1: It allowed association of primitive non-linear deformations such as bends and waves to geometry. It lacked a native undo feature. Like Model, included a command language that allowed for alias, or script development to automate tasks such as 'undo'. Other features included placement and preview of lights, manipulation of OBJ MTL files, and facilitation of scanline or wire frame rendering via an external render module.

P2: It allowed association of primitive non-linear deformations such as bends and waves to geometry. It lacked a native undo feature. Like Model, included a directive jargon that allowed for alias, or script development to automate tasks such as 'undo'. Other features included placement and preview of lights, manipulation of OBJ MTL files, and facilitation of scanline or wire frame rendering via an external render module.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are command language and directive jargon interchangeable (i.e., having the same meaning)?

Pair 1309

P1: Furthermore, it was ordered that the battalion had to accept all the qualified noblemen willing to enter the military career as non-commissioned officers, as long as they could pay the costs of living until they were promoted to commissioned officers and regular, paid commissioned officers' posts were vacant. As a result, the battalion became the career shortcut for young noblemen willing to enter a military career. In 1829, the **command language** of the battalion was changed to Russian replacing the former Swedish. The orders of the day orders and correspondence were conducted, however, in Swedish, until the end of the battalion and during the last years, a parallel diary was held in Finnish language.

P2: Furthermore, it was ordered that the battalion had to accept all the qualified noblemen willing to enter the military career as non-commissioned officers, as long as they could pay the costs of living until they were promoted to commissioned officers and regular, paid commissioned officers' posts were vacant. As a result, the battalion became the career shortcut for young noblemen willing to enter a military career. In 1829, the **instructional tongue** of the battalion was changed to Russian replacing the former Swedish. The orders of the day orders and correspondence were conducted, however, in Swedish, until the end of the battalion and during the last years, a parallel diary was held in Finnish language.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **command language** and **instructional tongue** interchangeable (i.e., having the same meaning)?

Pair 1310

P1: A few years later the Soviet mathematician Yuliy S. Il'yashenko and others started raising doubts about Plemelj's work. In fact, Plemelj correctly proves that any monodromy group can be realised by a regular linear system which is Fuchsian at all but one of the singular points. Plemelj's claim that the system can be made Fuchsian at the **last point** as well is wrong. (Il'yashenko has shown that if one of the monodromy operators is diagonalizable, then Plemelj's claim is true.)

P2: A few years later the Soviet mathematician Yuliy S. Il'yashenko and others started raising doubts about Plemelj's work. In fact, Plemelj correctly proves that any monodromy group can be realised by a regular linear system which is Fuchsian at all but one of the singular points. Plemelj's claim that the system can be made Fuchsian at the **closing moment** as well is wrong. (Il'yashenko has shown that if one of the monodromy operators is diagonalizable, then Plemelj's claim is true.)

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **last point** and **closing moment** interchangeable (i.e., having the same meaning)?

Pair 1311

P1: Worse, one must include contributions to the current matrix element where the external photon interacts with connected currents arising from vacuum fluctuations in order to obtain the correct frame-independent result. Such vacuum contributions do not arise in the light-front formalism, because all physical lines have positive formula_37; the vacuum has only formula_38, and formula_39 momentum is conserved. At large momentum transfers, the elastic helicity-conserving form factors fall-off as the **nominal power** formula_40 where formula_41 is the minimum number of constituents. For example, formula_42 for the three-quark Fock state of the proton.

P2: Worse, one must include contributions to the current matrix element where the external photon interacts with connected currents arising from vacuum fluctuations in order to obtain the correct frame-independent result. Such vacuum contributions do not arise in the light-front formalism, because all physical lines have positive formula_37; the vacuum has only formula_38, and formula_39 momentum is conserved. At large momentum transfers, the elastic helicity-conserving form factors fall-off as the **theoretical exponential** formula_40 where formula_41 is the minimum number of constituents. For example, formula_42 for the three-quark Fock state of the proton.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **nominal power** and **theoretical exponential** interchangeable (i.e., having the same

meaning)?

Pair 1312

P1: He was very active in resisting Portuguese colonial inroads into Sri Lanka. He also inherited his throne via palace intrigues in which number of heirs apparent died under mysterious circumstances. **At the end, he was removed from power by a local uprising that led to his son Puviraja Pandaram taking nominal power from him.** Biography.

P2: He was very active in resisting Portuguese colonial inroads into Sri Lanka. He also inherited his throne via palace intrigues in which number of heirs apparent died under mysterious circumstances. **At the end, he was removed from power by a local uprising that led to his son Puviraja Pandaram taking formal control from him.** Biography.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **nominal power** and **formal control** interchangeable (i.e., having the same meaning)?

Pair 1313

P1: Use of the elevators resulted in the three fire deaths when the car inadvertently stopped at the fire floor. Others were almost killed in the same way but were rescued by fire fighters. **The City of New York created the most restrictive law of its kind for high-rise buildings.** [Local Law # 5 of 1973], more than just steel and concrete as safety measures, adequate fire protection and a process to safely evacuate a high-rise building were introduced as a means to protect property and provide life safety for the occupants.

P2: Use of the elevators resulted in the three fire deaths when the car inadvertently stopped at the fire floor. Others were almost killed in the same way but were rescued by fire fighters. **The City of New York created the most limiting regulation of its kind for high-rise buildings.** [Local Law # 5 of 1973], more than just steel and concrete as safety measures, adequate fire protection and a process to safely evacuate a high-rise building were introduced as a means to protect property and provide life safety for the occupants.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **restrictive law** and **limiting regulation** interchangeable (i.e., having the same meaning)?

Pair 1314

P1: A study of 1801 found that more than half of the families that had converted to Catholicism were linked to the Silhak school. Largely because converts refused to perform Confucian ancestral rituals, the Joseon government prohibited the proselytisation of Christianity. **Some Catholics were executed during the early 19th century, but the restrictive law was not strictly enforced.** Protestant missionaries entered Korea during the 1880s and, along with Catholic priests, converted a remarkable number of Koreans, this time with the tacit support of the royal government.

P2: A study of 1801 found that more than half of the families that had converted to Catholicism were linked to the Silhak school. Largely because converts refused to perform Confucian ancestral rituals, the Joseon government prohibited the proselytisation of Christianity. **Some Catholics were executed during the early 19th century, but the impeding rule was not strictly enforced.** Protestant missionaries entered Korea during the 1880s and, along with Catholic priests, converted a remarkable number of Koreans, this time with the tacit support of the royal government.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **restrictive law** and **impeding rule** interchangeable (i.e., having the same meaning)?

Pair 1315

P1: Use of sarcasm, humor, exaggeration, and profanity is common. Thompson, who was among the forefathers of the new journalism movement, said in the February 15, 1973, issue of "Rolling Stone", "If I'd written the truth I knew for the past ten years, about 600 people—including me—would be rotting in prison cells from Rio to Seattle today. **absolute truth** is a very rare and dangerous commodity in the context of professional journalism." Origin of the term.

P2: Use of sarcasm, humor, exaggeration, and profanity is common. Thompson, who was among the forefathers of the new journalism movement, said in the February 15, 1973, issue of "Rolling Stone", "If I'd written the truth I knew for the past ten years, about 600 people—including me—would be rotting in prison cells from Rio to Seattle today. **complete honesty** is a very rare and dangerous commodity in the context of professional journalism." Origin of the term.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **absolute truth** and **complete honesty** interchangeable (i.e., having the same meaning)?

Pair 1316

P1: Mahadevi is the soul of the universe and the universe itself. She is the source of wealth, knowledge, forgiveness, peace, faith, fortitude, fame, modesty and mercy. **The purans mention her as Nirguna Mahalakshmi Devi Mahamaya, meaning "the absolute truth", and mother of all.** Along with Nirguna form Mahadevi is also mentioned as Sarguna (attributes) and Vagdevi (speech).

P2: Mahadevi is the soul of the universe and the universe itself. She is the source of wealth, knowledge, forgiveness, peace, faith, fortitude, fame, modesty and mercy. **The purans mention her as Nirguna Mahalakshmi Devi Mahamaya, meaning "the total sincerity", and mother of all.** Along with Nirguna form Mahadevi is also mentioned as Sarguna (attributes) and Vagdevi (speech).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **absolute truth** and **total sincerity** interchangeable (i.e., having the same meaning)?

Pair 1317

P1: These devices are usually combined with a motion sensor which is triggered by movement within the sensors range. This causes the device to emit high frequency noise which is uncomfortable to the cats, and inaudible to most humans (although they can still experience unpleasant subjective effects and, potentially, shifts in the hearing threshold). **The devices are available in both battery and mains operated forms, the latter generally having a higher output, greater range and requiring less attention.** Some cats are immune to ultrasonic cat deterrents, mainly the ones which are hard of hearing.

P2: These devices are usually combined with a motion sensor which is triggered by movement within the sensors range. This causes the device to emit high frequency noise which is uncomfortable to the cats, and inaudible to most humans (although they can still experience unpleasant subjective effects and, potentially, shifts in the hearing threshold). **The devices are available in both battery and mains operated forms, the latter generally having a higher output, greater range and requiring minimal consideration.** Some cats are immune to ultrasonic cat deterrents, mainly the ones which are hard of hearing.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **less attention** and **minimal consideration** interchangeable (i.e., having the same meaning)?

Pair 1318

P1: As stated in an interview for Okayplayer, all the lyrics on the album are from a rhyming book that she has written over the course of several years. During an interview with Jet in 2015, Lyte commented on the production of the songs: Most of the songs had the contribution in the composition and production of the rap duo Audio Two (who were also very close to Lyte since childhood), King of Chill and his group Alliance. **The track "Mc Lyte Likes Swingin" had**

Prince Paul of Stetsasonic in production, who later gained **much recognition** for his work with De La Soul. In addition to "I Cram to Understand U", three other songs were released as singles: 10% Dis (a diss track to then-Hurby Azor associate Antoinette), Paper Thin (in which she confronts her boyfriend for an infidelity) and the hononym Lyte as a Rock.

P2: As stated in an interview for Okayplayer, all the lyrics on the album are from a rhyming book that she has written over the course of several years. During an interview with Jet in 2015, Lyte commented on the production of the songs: Most of the songs had the contribution in the composition and production of the rap duo Audio Two (who were also very close to Lyte since childhood), King of Chill and his group Alliance. The track "Mc Lyte Likes Swingin" had Prince Paul of Stetsasonic in production, who later gained **abundant praise** for his work with De La Soul. In addition to "I Cram to Understand U", three other songs were released as singles: 10% Dis (a diss track to then-Hurby Azor associate Antoinette), Paper Thin (in which she confronts her boyfriend for an infidelity) and the hononym Lyte as a Rock.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **much recognition** and **abundant praise** interchangeable (i.e., having the same meaning)?

Pair 1319

P1: The first is an uncoerced confession. Alternatively, the testimony of two male witnesses can convict (four in the case of adultery), unless it is a hudud crime, in which case a confession is also required. Women's evidence normally carries **half the weight** of men in Sharia courts, however in criminal trials women's testimony is not allowed at all. Testimony from non-Muslims or Muslims whose doctrines are considered unacceptable (for example, Shia) may be discounted.

P2: The first is an uncoerced confession. Alternatively, the testimony of two male witnesses can convict (four in the case of adultery), unless it is a hudud crime, in which case a confession is also required. Women's evidence normally carries **fifty percent the importance** of men in Sharia courts, however in criminal trials women's testimony is not allowed at all. Testimony from non-Muslims or Muslims whose doctrines are considered unacceptable (for example, Shia) may be discounted.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **half the weight** and **fifty percent the importance** interchangeable (i.e., having the same meaning)?

Pair 1320

P1: In early 1992, the team constructed a prototype chassis based on the final vehicle design for Maize & Blue. This prototype chassis was tested in excess of 1,000 miles on closed courses, primarily the Michigan International Speedway in Brooklyn, Michigan. A final round of **vehicle testing** was conducted in San Angelo, Texas, at the Goodyear Proving Grounds and on nearby roads. Also, the team completed three days of testing on the actual race route the week prior to the start of the race (primarily to get a feel for the actual route and traffic patterns).

P2: In early 1992, the team constructed a prototype chassis based on the final vehicle design for Maize & Blue. This prototype chassis was tested in excess of 1,000 miles on closed courses, primarily the Michigan International Speedway in Brooklyn, Michigan. A final round of **automobile examination** was conducted in San Angelo, Texas, at the Goodyear Proving Grounds and on nearby roads. Also, the team completed three days of testing on the actual race route the week prior to the start of the race (primarily to get a feel for the actual route and traffic patterns).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **vehicle testing** and **automobile examination** interchangeable (i.e., having the same meaning)?

Pair 1321

P1: East is triple squeezed, and regardless of his discard South can squeeze him in his two remaining suits, to win all five tricks. Two threats opposite the squeeze card. The situation is different if North has not one but two threats,

accompanied by at **least one entry**. Then, the triple squeeze succeeds against an opponent, either one, who guards all three suits, with one exception.

P2: East is triple squeezed, and regardless of his discard South can squeeze him in his two remaining suits, to win all five tricks. Two threats opposite the squeeze card. **The situation is different if North has not one but two threats, accompanied by at a minimum a single entrance.** Then, the triple squeeze succeeds against an opponent, either one, who guards all three suits, with one exception.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **least one entry** and **a minimum a single entrance** interchangeable (i.e., having the same meaning)?

Pair 1322

P1: During his time as MLA, Inverarity pushed successfully for the Yukon Government to update the Yukon Driver's License, due to concerns that the licenses were not considered an acceptable form of identification in other jurisdictions and were prone to forgery. Inverarity announced his intention to seek re-election in the 2011 election, but he was narrowly defeated by Mike Nixon of the Yukon Party. **In that election, the Yukon Liberals lost their Official Opposition status and were reduced to third party.** Personal life.

P2: During his time as MLA, Inverarity pushed successfully for the Yukon Government to update the Yukon Driver's License, due to concerns that the licenses were not considered an acceptable form of identification in other jurisdictions and were prone to forgery. Inverarity announced his intention to seek re-election in the 2011 election, but he was narrowly defeated by Mike Nixon of the Yukon Party. **In that election, the Yukon Liberals lost their Official Opposition status and were reduced to tertiary faction.** Personal life.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **third party** and **tertiary faction** interchangeable (i.e., having the same meaning)?

Pair 1323

P1: FlexArray is NetApp FAS functionality allows to visualize third party storage systems and other NetApp storage systems over SAN protocols and use them instead of NetApp's disk shelves. With FlexArray functionality RAID protection must be done with third party storage array thus NetApp's RAID-4, RAID-DP and RAID-TEC not used in such configurations. **One or many LUNs from third party arrays could be added to a single aggregate similarly to RAID-0.** FlexArray is licensed feature.

P2: FlexArray is NetApp FAS functionality allows to visualize third party storage systems and other NetApp storage systems over SAN protocols and use them instead of NetApp's disk shelves. With FlexArray functionality RAID protection must be done with third party storage array thus NetApp's RAID-4, RAID-DP and RAID-TEC not used in such configurations. **One or many LUNs from different associate arrays could be added to a single aggregate similarly to RAID-0.** FlexArray is licensed feature.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **third party** and **different associate** interchangeable (i.e., having the same meaning)?

Pair 1324

P1: Mişeli is a time of feast, chanting and singing about Jumis, and flower giving, while also each dish was given to Houses gods, before they could eat themselves. Betting and proposing. **During Jumis catching unmarried maidens observed insects, who were believed to be an embodiment of natural fertility.** If the found beetle was beautiful, then maidens believed they would have a beautiful husband.

P2: Mişeli is a time of feast, chanting and singing about Jumis, and flower giving, while also each dish was given to Houses gods, before they could eat themselves. Betting and proposing. **During Jumis catching unmarried maidens ob-**

served insects, who were believed to be an embodiment of **pure virility**. If the found beetle was beautiful, then maidens believed they would have a beautiful husband.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **natural fertility** and **pure virility** interchangeable (i.e., having the same meaning)?

Pair 1325

P1: A snubnosed revolver (colloquially known as a snubbie, belly gun or bulldog revolver) is any small, medium, or large frame revolver with a short barrel, which is generally 3 inches or less in length. Smaller revolvers are often made with "bobbed" or "shrouded" hammers, and there are even "hammerless" models, all allowing the gun to be drawn quickly with little risk of it snagging on clothing. **The shrouded and hammerless models may even be fired through a coat or jacket pocket.** The design of these revolvers sacrifices power and range for maneuverability and concealment.

P2: A snubnosed revolver (colloquially known as a snubbie, belly gun or bulldog revolver) is any small, medium, or large frame revolver with a short barrel, which is generally 3 inches or less in length. Smaller revolvers are often made with "bobbed" or "shrouded" hammers, and there are even "hammerless" models, all allowing the gun to be drawn quickly with little risk of it snagging on clothing. **The shrouded and hammerless models may even be fired through a coat or coat compartment.** The design of these revolvers sacrifices power and range for maneuverability and concealment.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **jacket pocket** and **coat compartment** interchangeable (i.e., having the same meaning)?

Pair 1326

P1: Their influences include the immortal John Coltrane, the unique McCoy Tyner, the funky Horace Silver, and the Prince of Darkness himself, the great Miles Davis." Mr. Underwood went on to say, "'Concerto For Padré" marks an auspicious debut for the Cozzetti-Gemmill Quartet. **They display talent, conviction, enthusiasm, sensitivity and good taste.** By respecting the great past of American jazz, and by expressing the soul and vision of their living present, they show great promise for the ever-evolving future."

P2: Their influences include the immortal John Coltrane, the unique McCoy Tyner, the funky Horace Silver, and the Prince of Darkness himself, the great Miles Davis." Mr. Underwood went on to say, "'Concerto For Padré" marks an auspicious debut for the Cozzetti-Gemmill Quartet. **They display talent, conviction, enthusiasm, sensitivity and refined choice of style.** By respecting the great past of American jazz, and by expressing the soul and vision of their living present, they show great promise for the ever-evolving future."

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **good taste** and **refined choice of style** interchangeable (i.e., having the same meaning)?

Pair 1327

P1: Today Ingrian dialects are still spoken in Russia, Finland and Sweden. In 2010 there were only 20 300 Finns in Russia. **The Ingrian dialects are gradually dying, and mostly elderly people speak them anymore, and unlike Finnish, the dialects are not taught.** History.

P2: Today Ingrian dialects are still spoken in Russia, Finland and Sweden. In 2010 there were only 20 300 Finns in Russia. **The Ingrian dialects are gradually dying, and the majority of old persons speak them anymore, and unlike Finnish, the dialects are not taught.** History.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **mostly elderly people** and **the majority of old persons** interchangeable (i.e., having the same meaning)?

Pair 1328

P1: DGR believes that industrial civilization will inevitably collapse, that they must act decisively before the collapse to ensure that the Earth remains inhabitable for all organisms, and build a more sustainable society after the collapse. DGR supports an active resistance movement with the objective of accelerating the collapse of industrial civilization. Jensen has concluded that "the mass of **civilized people** will never be on our side." This has led to organizing a strategy that is pessimistic about popular involvement, and therefore aims at forcing change without the majority's consensus.

P2: DGR believes that industrial civilization will inevitably collapse, that they must act decisively before the collapse to ensure that the Earth remains inhabitable for all organisms, and build a more sustainable society after the collapse. DGR supports an active resistance movement with the objective of accelerating the collapse of industrial civilization. Jensen has concluded that "the mass of **educated individuals** will never be on our side." This has led to organizing a strategy that is pessimistic about popular involvement, and therefore aims at forcing change without the majority's consensus.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **civilized people** and **educated individuals** interchangeable (i.e., having the same meaning)?

Pair 1329

P1: The space capsule was towed in the Bon Marche holiday parade and was set on display at the Museum of Flight at Boeing Field, where it has been residing ever since. In the course of the event, a Russian-American Business Opportunity Conference was held at the Seattle Sheraton, and art and photo exhibits were on display. On Thanksgiving, Rotary Club members and **church groups** hosted the Krylov's 450 sailors and the 330 Russian visitors at their homes. Marshal Krylov, a previously top-secret vessel, was open to the public for several days.

P2: The space capsule was towed in the Bon Marche holiday parade and was set on display at the Museum of Flight at Boeing Field, where it has been residing ever since. In the course of the event, a Russian-American Business Opportunity Conference was held at the Seattle Sheraton, and art and photo exhibits were on display. Marshal Krylov, a previously top-secret vessel, was open to the public for several days.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **church groups** and **religious congregations** interchangeable (i.e., having the same meaning)?

Pair 1330

P1: In 2001 Dr Peter Gill, an orthopaedic surgeon in the United Kingdom, launched a trust to fund the project. The primary motive was to reduce the cost of providing electricity to the Kalene hospital, which serves people in Angola and the Democratic Republic of the Congo as well as Zambia, in a period when diesel fuel costs were continuing to rise. The **Zambian government provided some seed funding, and church groups in Britain managed to raise another \$2.5 million to cover construction costs.** Construction.

P2: In 2001 Dr Peter Gill, an orthopaedic surgeon in the United Kingdom, launched a trust to fund the project. The primary motive was to reduce the cost of providing electricity to the Kalene hospital, which serves people in Angola and the Democratic Republic of the Congo as well as Zambia, in a period when diesel fuel costs were continuing to rise. The **Zambian government provided some seed funding, and parish members in Britain managed to raise another \$2.5 million to cover construction costs.** Construction.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **church groups** and **parish members** interchangeable (i.e., having the same meaning)?

Pair 1331

P1: In computing, Oracle Identity Manager (OIM) enables enterprises to manage the entire user life-cycle across all enterprise resources both within and beyond a firewall. Within Oracle Identity Management it provides a mechanism for implementing the user-management aspects of a **corporate policy**. It can also audit users and their access privileges.

P2: In computing, Oracle Identity Manager (OIM) enables enterprises to manage the entire user life-cycle across all enterprise resources both within and beyond a firewall. Within Oracle Identity Management it provides a mechanism for implementing the user-management aspects of a **collective procedure**. It can also audit users and their access privileges.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **corporate policy** and **collective procedure** interchangeable (i.e., having the same meaning)?

Pair 1332

P1: In August 2016, the village board approved plans for a new casino to be opened at the Marriott hotel. These plans attracted opposition from some members of the community citing possible crime and traffic problems, while others supported the first new casino to be opened in Suffolk county. Marriott International sold the property to Delaware North for \$40.41 million because Marriott has a **corporate policy** against gambling. On February 27, 2017, Jake's 58 casino opened with 250 video lottery terminals.

P2: In August 2016, the village board approved plans for a new casino to be opened at the Marriott hotel. These plans attracted opposition from some members of the community citing possible crime and traffic problems, while others supported the first new casino to be opened in Suffolk county. Marriott International sold the property to Delaware North for \$40.41 million because Marriott has a **business regulation** against gambling. On February 27, 2017, Jake's 58 casino opened with 250 video lottery terminals.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **corporate policy** and **business regulation** interchangeable (i.e., having the same meaning)?

Pair 1333

P1: The ox and ass were also taken to symbolize the Jews and the Gentiles, and have remained a constant since the earliest depictions. Mary was soon seated on a throne as the Magi visited. Depictions of the Nativity soon became a **normal component** of cycles in art illustrating both the Life of Christ and the Life of the Virgin. Nativity images also carry the message of redemption: God's unification with matter forms the mystery of the Incarnation, a turning point in the Christian perspective on Salvation.

P2: The ox and ass were also taken to symbolize the Jews and the Gentiles, and have remained a constant since the earliest depictions. Mary was soon seated on a throne as the Magi visited. Depictions of the Nativity soon became a **routine part** of cycles in art illustrating both the Life of Christ and the Life of the Virgin. Nativity images also carry the message of redemption: God's unification with matter forms the mystery of the Incarnation, a turning point in the Christian perspective on Salvation.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **normal component** and **routine part** interchangeable (i.e., having the same meaning)?

Pair 1334

P1: It is located in Elmalı, Antalya Province, Turkey. The mosque, built entirely of cut stone, has a single dome. It reflects the classical Ottoman architecture. The mosque was built on a sloping area with a square plan. The mosque is the biggest Ottoman mosque in the Antalya area.

P2: It is located in Elmalı, Antalya Province, Turkey. The mosque, built entirely of cut stone, has a single dome. It reflects the classical Ottoman architecture. The mosque was built on a tilted region with a square plan. The mosque is the biggest Ottoman mosque in the Antalya area.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are sloping area and tilted region interchangeable (i.e., having the same meaning)?

Pair 1335

P1: This objective seeks to reconcile the competing resource-based and ecosystem-based hypotheses. NAAMES goal was to provide the mechanistic field studies necessary to understand a more holistic view of the annual bloom cycle. The effects of aerosols on clouds is an understudied topic despite the major implications it could have for predicting future climate change. This objective addressed this gap by using combined measurement methods to understand the contribution of various aerosols to cloud formation produced during each major phase of the annual phytoplankton cycle.

P2: This objective seeks to reconcile the competing resource-based and ecosystem-based hypotheses. NAAMES goal was to provide the mechanistic field studies necessary to understand a more holistic view of the annual bloom cycle. The effects of aerosols on clouds is an understudied topic despite the paramount suggestions it could have for predicting future climate change. This objective addressed this gap by using combined measurement methods to understand the contribution of various aerosols to cloud formation produced during each major phase of the annual phytoplankton cycle.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are major implications and paramount suggestions interchangeable (i.e., having the same meaning)?

Pair 1336

P1: Pregnant women are expected to fulfill their work obligations up until their delivery. It is normal for pregnant women to experience an increase in salivation and to spit frequently, since they do not believe in swallowing their excess saliva. Women may sometimes carry a spit cup with them and feel no embarrassment in using it in public. Pregnant women are restricted from eating spices, which they believe may irritate the fetus.

P2: Pregnant women are expected to fulfill their work obligations up until their delivery. It is normal for pregnant women to experience an increase in salivation and to spit frequently, since they do not believe in swallowing their excess saliva. Women may sometimes carry a container used for ejecting saliva with them and feel no embarrassment in using it in public. Pregnant women are restricted from eating spices, which they believe may irritate the fetus.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are spit cup and container used for ejecting saliva interchangeable (i.e., having the same meaning)?

Pair 1337

P1: The handset was molded in Bakelite, but the receiver and transmitter assemblies had an aluminum metal core. Its transmitter assembly that was extended by a hollow mouthpiece, known colloquially as a "spit cup", to focus sound more effectively into the transmitter. The "barrier-button" transmitter element exhibited a cone shape into the spit cup, known as a "bullet transmitter" among collectors. This feature was eliminated about halfway through the handset production run, when in 1934 the transmitter element was changed to a more efficient type (F1) with better voice reproduction.

P2: The handset was molded in Bakelite, but the receiver and transmitter assemblies had an aluminum metal core. Its transmitter assembly that was extended by a hollow mouthpiece, known colloquially as a "spit cup", to focus sound more effectively into the transmitter. The "barrier-button" transmitter element exhibited a cone shape into the dribble container, known as a "bullet transmitter" among collectors. This feature was eliminated about halfway through the handset production run, when in 1934 the transmitter element was changed to a more efficient type (F1) with better voice reproduction.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are spit cup and dribble container interchangeable (i.e., having the same meaning)?

Pair 1338

P1: Photos are geo-tagged, published and shared on the CTC blog and the photographers' own Picassa pages. CTC has published more than 30,000 photos taken during their treks. CTC's has an extensive presence on the Internet, mostly built using Google tools. Treks and photos are published using Blogger on their blog.

P2: Photos are geo-tagged, published and shared on the CTC blog and the photographers' own Picassa pages. CTC has published more than 30,000 photos taken during their treks. CTC's has an all-encompassing existence on the Internet, mostly built using Google tools. Treks and photos are published using Blogger on their blog.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are extensive presence and all-encompassing existence interchangeable (i.e., having the same meaning)?

Pair 1339

P1: Another incident came in 1951, when a fight broke out after a hard hit by a BGSU player on fullback Mel Triplett. Don Greenwood, then Toledo's coach, participated, and resigned after the university failed to back him up. In Greenwood's view, the officials should have called a penalty for excessive roughness, and he had a duty to protect his players. Individual awards and honors.

P2: Another incident came in 1951, when a fight broke out after a hard hit by a BGSU player on fullback Mel Triplett. Don Greenwood, then Toledo's coach, participated, and resigned after the university failed to back him up. In Greenwood's view, the officials should have called a penalty for unnecessary brusqueness, and he had a duty to protect his players. Individual awards and honors.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are excessive roughness and unnecessary brusqueness interchangeable (i.e., having the same meaning)?

Pair 1340

P1: Visual ageism. The term "visual ageism" was coined in 2018 by Loos and Ivan. They define "visual ageism" as "the social practice of visually underrepresenting older people or misrepresenting them in a prejudiced way". We are facing a shift from visual ageism characterized by underrepresentation and the negative representation of older people to a representation of older age characterized by images of stereotypically third age older adults (enjoying life and living their "golden years"), while older adults in their fourth age (inactive and unable to live independently) remain invisible.

P2: Visual ageism. The term "visual ageism" was coined in 2018 by Loos and Ivan. They define "visual ageism" as "the collective application of visually underrepresenting older people or misrepresenting them in a prejudiced way". We are facing a shift from visual ageism characterized by underrepresentation and the negative representation of older people to a representation of older age characterized by images of stereotypically third age older adults (enjoying life and living their "golden years"), while older adults in their fourth age (inactive and unable to live independently) remain invisible.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **social practice** and **collective application** interchangeable (i.e., having the same meaning)?

Pair 1341

P1: Rojkova qualified for the women's 100 m backstroke at the 2004 Summer Olympics in Athens, by receiving a Universality place from FINA, in an entry time of 1:18.00. She participated in heat one against two other swimmers Lenient Obia of Nigeria, and Ana Galindo of Honduras. She rounded out a **small field** of three to last place by a 5.53-second margin behind winner Obia, breaking a Turkmen record of 1:15.48. Rojkova failed to advance into the semifinals, as she placed forty-second overall in the preliminaries.

P2: Rojkova qualified for the women's 100 m backstroke at the 2004 Summer Olympics in Athens, by receiving a Universality place from FINA, in an entry time of 1:18.00. She participated in heat one against two other swimmers Lenient Obia of Nigeria, and Ana Galindo of Honduras. She rounded out a **modes group** of three to last place by a 5.53-second margin behind winner Obia, breaking a Turkmen record of 1:15.48. Rojkova failed to advance into the semifinals, as she placed forty-second overall in the preliminaries.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **small field** and **modes group** interchangeable (i.e., having the same meaning)?

Pair 1342

P1: The new computers were cheaper and faster than their predecessors, with the new Motorola 68040 processor. In 1992, NeXT launched "Turbo" variants of the NeXTcube and NeXTstation, with a 33 MHz 68040 processor and the maximum RAM capacity increased to 128 MB. NeXT sold 20,000 computers in 1992, and NeXT counted upgraded motherboards on **back order** as system sales. This is a small number compared with competitors, but the company reported sales of \$140 million for the year which encouraged Canon to invest a further \$30 million to keep the company afloat.

P2: The new computers were cheaper and faster than their predecessors, with the new Motorola 68040 processor. In 1992, NeXT launched "Turbo" variants of the NeXTcube and NeXTstation, with a 33 MHz 68040 processor and the maximum RAM capacity increased to 128 MB. NeXT sold 20,000 computers in 1992, and NeXT counted upgraded motherboards on **out-of-stock purchases** as system sales. This is a small number compared with competitors, but the company reported sales of \$140 million for the year which encouraged Canon to invest a further \$30 million to keep the company afloat.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **back order** and **out-of-stock purchases** interchangeable (i.e., having the same meaning)?

Pair 1343

P1: With the completion date estimated to be 1513 for "The Ugly Duchess" it is highly likely that Erasmus's essay influenced Matsys's production. Medical Condition: Paget's Disease. In 1877 Sir James Paget observed a **medical disorder** where the bones became inflamed and malformed. He formally coined the condition "osteitis deformans," but by the end of the century it became known as Paget's Disease.

P2: With the completion date estimated to be 1513 for "The Ugly Duchess" it is highly likely that Erasmus's essay influenced Matsys's production. Medical Condition: Paget's Disease. In 1877 Sir James Paget observed a **physical impairment** where the bones became inflamed and malformed. He formally coined the condition "osteitis deformans," but by the end of the century it became known as Paget's Disease.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **medical disorder** and **physical impairment** interchangeable (i.e., having the same meaning)?

Pair 1344

P1: During the session he asked the songwriter if he was happy with the direction the songs were taking, and was met with an affirmative "Yeh, yeh, I guess so yeh, yeh." Boyd later wrote "Despite [Cale's] domineering manner, [he] was very solicitous towards Nick, who seemed to be guardedly enjoying himself: his only choice was to relax and be carried along." Although Boyd is credited with production, he admits his **actual contribution** was putting the two men in contact. Reception.

P2: During the session he asked the songwriter if he was happy with the direction the songs were taking, and was met with an affirmative "Yeh, yeh, I guess so yeh, yeh." Boyd later wrote "Despite [Cale's] domineering manner, [he] was very solicitous towards Nick, who seemed to be guardedly enjoying himself: his only choice was to relax and be carried along." Although Boyd is credited with production, he admits his **real offering** was putting the two men in contact. Reception.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **actual contribution** and **real offering** interchangeable (i.e., having the same meaning)?

Pair 1345

P1: He also states that the individuals who understand the broad range of options a chance may give them, may also be given more opportunities by the market or be willing to share among the individuals respected class. Breen debriefs Weber's classification of social and how Weber classifies these classes not only through a social filter but by a grander economic one as well. He also makes note that social and economic mobility are a **great key** to the understanding class analysis. Here he dictates that although it is easier and more fluid to traverse through the social class, it is much more difficult to progress through the economic class, and a great limiter is a social class the individual is located in.

P2: He also states that the individuals who understand the broad range of options a chance may give them, may also be given more opportunities by the market or be willing to share among the individuals respected class. Breen debriefs Weber's classification of social and how Weber classifies these classes not only through a social filter but by a grander economic one as well. He also makes note that social and economic mobility are a **fantastic tool** to the understanding class analysis. Here he dictates that although it is easier and more fluid to traverse through the social class, it is much more difficult to progress through the economic class, and a great limiter is a social class the individual is located in.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **great key** and **fantastic tool** interchangeable (i.e., having the same meaning)?

Pair 1346

P1: "Symphonie fantastique" is a piece of program music that tells the story of an artist gifted with a lively imagination who has poisoned himself with opium in the depths of despair because of hopeless, unrequited love. Berlioz provided his own preface and program notes for each movement of the work. They exist in two principal versions one from 1845 in the **first score** of the work and the second from 1855. From the revised preface and notes, it can be seen how Berlioz, later in his life, downplayed the programmatic aspect of the work.

P2: "Symphonie fantastique" is a piece of program music that tells the story of an artist gifted with a lively imagination who has poisoned himself with opium in the depths of despair because of hopeless, unrequited love. Berlioz provided his own preface and program notes for each movement of the work. They exist in two principal versions one from 1845 in the **initial arrangement** of the work and the second from 1855. From the revised preface and notes, it can be seen how Berlioz, later in his life, downplayed the programmatic aspect of the work.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **first score** and **initial arrangement** interchangeable (i.e., having the same meaning)?

Pair 1347

P1: The sources are drawn mostly from the Old Testament. Even the birth and death of Jesus are told in the words of the prophet Isaiah, the most prominent source of the libretto. **The only true scene of the oratorio is taken from the Gospel of Luke, the annunciation to the shepherds.** The imagery of shepherd and lamb features prominently, in the aria "He shall feed His flock like a shepherd", the only extended piece to talk about the Messiah on earth, in the opening of Part II, "Behold the Lamb of God", in the chorus "All we like sheep", and in the closing chorus of the work, "Worthy is the Lamb".

P2: The sources are drawn mostly from the Old Testament. Even the birth and death of Jesus are told in the words of the prophet Isaiah, the most prominent source of the libretto. **The only accurate point of the oratorio is taken from the Gospel of Luke, the annunciation to the shepherds.** The imagery of shepherd and lamb features prominently, in the aria "He shall feed His flock like a shepherd", the only extended piece to talk about the Messiah on earth, in the opening of Part II, "Behold the Lamb of God", in the chorus "All we like sheep", and in the closing chorus of the work, "Worthy is the Lamb".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **true scene** and **accurate point** interchangeable (i.e., having the same meaning)?

Pair 1348

P1: After five rounds, the player with the most treasure is the winner. Differences between Incan Gold and Diamant. **In "Diamant" players are exploring a cave or diamond mine; in "Incan Gold", players are exploring a temple.** "Incan Gold" comes with artifact cards, but "Diamant" does not.

P2: After five rounds, the player with the most treasure is the winner. Differences between Incan Gold and Diamant. **In "Diamant" players are exploring a cave or precious stone quarry; in "Incan Gold", players are exploring a temple.** "Incan Gold" comes with artifact cards, but "Diamant" does not.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **diamond mine** and **precious stone quarry** interchangeable (i.e., having the same meaning)?

Pair 1349

P1: The project already accounts for an estimated five percent of Lesotho's GDP, and when fully completed, it could account for as much as 20 percent. The main mineral resource is diamonds from the Letseng diamond mine in the Maluti mountain range. **The mine produces very few stones, but has the highest dollar ratio per carat of any diamond mine in the world.** Other mineral resources include coal, galena, quartz, agate and uranium deposits, but their exploitation is not considered commercially viable.

P2: The project already accounts for an estimated five percent of Lesotho's GDP, and when fully completed, it could account for as much as 20 percent. The main mineral resource is diamonds from the Letseng diamond mine in the Maluti mountain range. **The mine produces very few stones, but has the highest dollar ratio per carat of any jewel excavation in the world.** Other mineral resources include coal, galena, quartz, agate and uranium deposits, but their exploitation is not considered commercially viable.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **diamond mine** and **jewel excavation** interchangeable (i.e., having the same meaning)?

Pair 1350

P1: History. "Bárðar saga Snæfellsáss" is a relatively late "Íslendingasaga", probably dating to the early 14th century. It is preserved in 16th- and 17th-century paper and vellum manuscripts and **one fragment** of about 1400. The saga falls into two sections that were distinguished in the early 18th century and are probably by different authors.

P2: History. "Bárðar saga Snæfellsáss" is a relatively late "Íslendingasaga", probably dating to the early 14th century. It is preserved in 16th- and 17th-century paper and vellum manuscripts and **a single part** of about 1400. The saga falls into two sections that were distinguished in the early 18th century and are probably by different authors.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one fragment** and **a single part** interchangeable (i.e., having the same meaning)?

Pair 1351

P1: Usually hydrolysis is a chemical process in which a molecule of water is added to a substance. Sometimes this addition causes both substance and water molecule to split into two parts. In such reactions, **one fragment** of the target molecule (or parent molecule) gains a hydrogen ion. It breaks a chemical bond in the compound.

P2: Usually hydrolysis is a chemical process in which a molecule of water is added to a substance. Sometimes this addition causes both substance and water molecule to split into two parts. In such reactions, **a portion** of the target molecule (or parent molecule) gains a hydrogen ion. It breaks a chemical bond in the compound.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one fragment** and **a portion** interchangeable (i.e., having the same meaning)?

Pair 1352

P1: A number of 60 to 100 was regarded as reasonable. This view was shared by many Polish historians after World War II, however, Błażej Śliwiński's presented numerous pieces of evidence that what occurred was indeed a "bloodbath" with a very high number of victims, although not as high as 10,000, and more likely around 1000. Loew adds that from the source material available to historians, the **definite number** of casualties is impossible to establish. William Urban says that the number of 10,000 dead has been considered greater than the city's population at the time.

P2: A number of 60 to 100 was regarded as reasonable. This view was shared by many Polish historians after World War II, however, Błażej Śliwiński's presented numerous pieces of evidence that what occurred was indeed a "bloodbath" with a very high number of victims, although not as high as 10,000, and more likely around 1000. Loew adds that from the source material available to historians, the **exact amount** of casualties is impossible to establish. William Urban says that the number of 10,000 dead has been considered greater than the city's population at the time.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **definite number** and **exact amount** interchangeable (i.e., having the same meaning)?

Pair 1353

P1: The exhausting of parts also meant that later new production bodies had all the new parts installed at the factory and would later become standard in the 67-badged models officially by and after 1990. Other changes were to the frame counting cam that shortened the 220 film frame count from 21 to 20 but the 120 mode remained the same. **This reduction was necessary as the new version** of the 'clutch' plate to improve durability was released. This change also tied to the switching from rubberized "Counter Roller" to an all-metal smooth version.

P2: The exhausting of parts also meant that later new production bodies had all the new parts installed at the factory and would later become standard in the 67-badged models officially by and after 1990. Other changes were to the frame counting cam that shortened the 220 film frame count from 21 to 20 but the 120 mode remained the same. **This reduction was necessary as the contemporary rendition** of the 'clutch' plate to improve durability was released. This change also tied to the switching from rubberized "Counter Roller" to an all-metal smooth version.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **new version** and **contemporary rendition** interchangeable (i.e., having the same meaning)?

Pair 1354

P1: Geologically the Bohus is a monzogranite, a subtype of granite. Besides the main minerals plagioclase, K-feldspar and quartz the Bohus granites contain lesser amounts of magnetite, apatite, zircon, titanite, garnet and monazite. In restricted areas alteration of the **original rock** has added prehnite, calcite and chlorite to the mineral assemblage. The texture of the granites varies from fine grained to coarse grained.

P2: Geologically the Bohus is a monzogranite, a subtype of granite. Besides the main minerals plagioclase, K-feldspar and quartz the Bohus granites contain lesser amounts of magnetite, apatite, zircon, titanite, garnet and monazite. In restricted areas alteration of the **first stone** has added prehnite, calcite and chlorite to the mineral assemblage. The texture of the granites varies from fine grained to coarse grained.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **original rock** and **first stone** interchangeable (i.e., having the same meaning)?

Pair 1355

P1: In others, the haftorah is read from printed Chumashim or specially-printed sifrei Haftarot, containing only the Haftarot, usually in enlarged type. As with the Torah scroll, handwritten scrolls for the haftorah contain no vowels, punctuation or , and so the reading must be memorized. When reading from a printed book which does contain these markings, **less preparation** is necessary. As with the Torah reading, blessings are recited before and after the reading, and the reader stands as he chants it.

P2: In others, the haftorah is read from printed Chumashim or specially-printed sifrei Haftarot, containing only the Haftarot, usually in enlarged type. As with the Torah scroll, handwritten scrolls for the haftorah contain no vowels, punctuation or , and so the reading must be memorized. When reading from a printed book which does contain these markings, **decreased readiness** is necessary. As with the Torah reading, blessings are recited before and after the reading, and the reader stands as he chants it.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **less preparation** and **decreased readiness** interchangeable (i.e., having the same meaning)?

Pair 1356

P1: Verenahof (also known as "Büttenharter Hof" or "Verenahöfe") was a German exclave in Switzerland, administratively part of the German town of Wiechs am Randen (which is now part of the town of Tengen). Geographically, it was separated from Wiechs am Randen by a **wide strip** of Swiss territory. It was absorbed into Switzerland in 1967 after diplomatic negotiations between Federal Republic of Germany and Switzerland.

P2: Verenahof (also known as "Büttenharter Hof" or "Verenahöfe") was a German exclave in Switzerland, administratively part of the German town of Wiechs am Randen (which is now part of the town of Tengen). Geographically, it was separated from Wiechs am Randen by a **large section** of Swiss territory. It was absorbed into Switzerland in 1967 after diplomatic negotiations between Federal Republic of Germany and Switzerland.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **wide strip** and **large section** interchangeable (i.e., having the same meaning)?

Pair 1357

P1: Most gymnasts apply powdered chalk (typically magnesium carbonate) to their grips, or to their hands if not using grips so that they do not slip. Construction. A grip consists of a **wide strip** of leather joined to a wrist strap. The leather strip, which covers and protects the palm of the hand, is approximately five centimeters wide and has finger holes at one end.

P2: Most gymnasts apply powdered chalk (typically magnesium carbonate) to their grips, or to their hands if not using grips so that they do not slip. Construction. A grip consists of a **spacious piece** of leather joined to a wrist strap. The leather strip, which covers and protects the palm of the hand, is approximately five centimeters wide and has finger holes at one end.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **wide strip** and **spacious piece** interchangeable (i.e., having the same meaning)?

Pair 1358

P1: Eventually, after a period for public comment and revisions based on comments received, a final version is published in the Federal Register. The regulations are codified and incorporated into the Code of Federal Regulations (CFR) which is published once a year on a rolling schedule. Besides regulations formally promulgated under the APA, federal agencies also frequently promulgate an enormous amount of forms, manuals, **policy statements**, letters, and rulings. These documents may be considered by a court as persuasive authority as to how a particular statute or regulation may be interpreted (known as "Skidmore" deference), but are not entitled to "Chevron" deference.

P2: Eventually, after a period for public comment and revisions based on comments received, a final version is published in the Federal Register. The regulations are codified and incorporated into the Code of Federal Regulations (CFR) which is published once a year on a rolling schedule. Besides regulations formally promulgated under the APA, federal agencies also frequently promulgate an enormous amount of forms, manuals, **administration guidelines**, letters, and rulings. These documents may be considered by a court as persuasive authority as to how a particular statute or regulation may be interpreted (known as "Skidmore" deference), but are not entitled to "Chevron" deference.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **policy statements** and **administration guidelines** interchangeable (i.e., having the same meaning)?

Pair 1359

P1: In partner dances, close embrace is a type of closed position where the leader and follower stand facing each other chest-to-chest in full or partial body contact. The dancers usually stand offset from one another, such that each has their right foot in between the feet of their partner. When in **close embrace**, the dance is led (and followed) with the whole body, rather than with the arms or with visual cues. Various partner dances make use of this position, most notably Argentine Tango, but also Balboa, Collegiate Shag, Swing Walk, Blues, and others.

P2: In partner dances, close embrace is a type of closed position where the leader and follower stand facing each other chest-to-chest in full or partial body contact. The dancers usually stand offset from one another, such that each has their right foot in between the feet of their partner. When in **intimate contact**, the dance is led (and followed) with the whole body, rather than with the arms or with visual cues. Various partner dances make use of this position, most notably Argentine Tango, but also Balboa, Collegiate Shag, Swing Walk, Blues, and others.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **close embrace** and **intimate contact** interchangeable (i.e., having the same meaning)?

Pair 1360

P1: The state will still pay even if the vaccination was not administered by them. Additionally, a person can still qualify if a vaccine against one of the diseases listed below was administered to the claimant's mother while the mother was pregnant. The claimant may also qualify if they have been in **close physical contact** with someone who had an oral vaccine against poliomyelitis. The vaccination must have been for one of the following diseases: The vaccination must also have been administered before the claimant's 18th birthday, unless the vaccination was administered during an outbreak of disease in the United Kingdom or the Isle of Man, or if it was a vaccine for poliomyelitis, rubella, Meningococcal Group C, human papillomavirus, or pandemic influenza A (H1N1) 2009 (swine flu).

P2: The state will still pay even if the vaccination was not administered by them. Additionally, a person can still qualify if a vaccine against one of the diseases listed below was administered to the claimant's mother while the mother was pregnant. The claimant may also qualify if they have been in **near a person** with someone who had an oral vaccine against poliomyelitis. The vaccination must have been for one of the following diseases: The vaccination must also have been administered before the claimant's 18th birthday, unless the vaccination was administered during an outbreak of disease in the United Kingdom or the Isle of Man, or if it was a vaccine for poliomyelitis, rubella, Meningococcal Group C, human papillomavirus, or pandemic influenza A (H1N1) 2009 (swine flu).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **close physical contact** and **near a person** interchangeable (i.e., having the same meaning)?

Pair 1361

P1: This gave Het Volk two advantages. First, it was fighting an election according to a constitution that it had written. Second, it was fighting an election at a time at which it was the **predominant force** in Transvaal politics. Nonetheless, neither Botha nor Smuts, the two leaders took the task of election too lightly.

P2: This gave Het Volk two advantages. First, it was fighting an election according to a constitution that it had written. Second, it was fighting an election at a time at which it was the **main effort** in Transvaal politics. Nonetheless, neither Botha nor Smuts, the two leaders took the task of election too lightly.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **predominant force** and **main effort** interchangeable (i.e., having the same meaning)?

Pair 1362

P1: House legislation. American Health Care Act. A **comprehensive plan** to replace the Affordable Care Act was announced by the House Republican leadership on March 6, 2017. It retains many features of the Affordable Care Act, but replaces ACT's system of subsidies with tax credits and federally-funded Medicaid coverage with a system of block grants to states based on the nature and number of recipients served.

P2: House legislation. American Health Care Act. A **far-reaching deal** to replace the Affordable Care Act was announced by the House Republican leadership on March 6, 2017. It retains many features of the Affordable Care Act, but replaces ACT's system of subsidies with tax credits and federally-funded Medicaid coverage with a system of block grants to states based on the nature and number of recipients served.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **comprehensive plan** and **far-reaching deal** interchangeable (i.e., having the same meaning)?

Pair 1363

P1: Henry made one of his chaplains, Tedald, archbishop of Milan, thereby contradicting the Pope's former decisions. Alarmed by these acts, the Pope announced he would excommunicate Henry unless he changed his policies. Henry regarded the Pope's words as a clear denial of the **sacred nature** of kingship. He held a synod in Worms on 24 January

1076.

P2: Henry made one of his chaplains, Tedald, archbishop of Milan, thereby contradicting the Pope's former decisions. Alarmed by these acts, the Pope announced he would excommunicate Henry unless he changed his policies. Henry regarded the Pope's words as a clear denial of the blessed essence of kingship. He held a synod in Worms on 24 January 1076.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **sacred nature** and **blessed essence** interchangeable (i.e., having the same meaning)?

Pair 1364

P1: Once word reached back to Mondt and McMahon, at first they simply ignored the title change. From January until April 1963, Buddy Rogers was promoted as the NWA World Champion or simply the World Heavyweight Champion in their area. The World Wide Wrestling Federation was not an immediate creation as once thought the day after Rogers' one fall loss to Thesz. Mondt and McMahon both eventually left the NWA in protest and formed the World Wide Wrestling Federation (WWWF) in the process.

P2: Once word reached back to Mondt and McMahon, at first they simply ignored the title change. From January until April 1963, Buddy Rogers was promoted as the NWA World Champion or simply the World Heavyweight Champion in their area. The World Wide Wrestling Federation was not an actual establishment as once thought the day after Rogers' one fall loss to Thesz. Mondt and McMahon both eventually left the NWA in protest and formed the World Wide Wrestling Federation (WWWF) in the process.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **immediate creation** and **actual establishment** interchangeable (i.e., having the same meaning)?

Pair 1365

P1: Both kinds of piñatas, those made with clay pots and those made entirely of paper are created here. Participants gather from various communities in the area and the main event is a piñata contest. There are also horse races, bullfighting, nativity scenes, "pastorelas" a type of play based on the Christmas season, regional dance, and popular music shows. Horse racing is a tradition that dates back to the Mexican Revolution.

P2: Both kinds of piñatas, those made with clay pots and those made entirely of paper are created here. Participants gather from various communities in the area and the main event is a piñata contest. There are also horse races, bullfighting, nativity scenes, "pastorelas" a type of play based on the Christmas season, regional dance, and recognizable singing programs. Horse racing is a tradition that dates back to the Mexican Revolution.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **popular music shows** and **recognizable singing programs** interchangeable (i.e., having the same meaning)?

Pair 1366

P1: The listener who sent the answer that was closest to the actual number of seconds, won the prize. Het Geluid. Het Geluid (The Sound) is a competition where the studio has recorded a sound by performing a specific action. That sound than gets played twice every hour.

P2: The listener who sent the answer that was closest to the actual number of seconds, won the prize. Het Geluid. Het Geluid (The Sound) is a competition where the studio has recorded a sound by performing a specified activity. That sound than gets played twice every hour.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **specific action** and **specified activity** interchangeable (i.e., having the same meaning)?

Pair 1367

P1: Participants. Over 200 senior U.S. officials arrived in Beijing for the meeting and a large delegation from China also participated. 15-18 U.S. cabinet officials and **agency heads** participated making it one of the largest U.S. delegation to travel to a foreign country. Economic Track.

P2: Participants. Over 200 senior U.S. officials arrived in Beijing for the meeting and a large delegation from China also participated. 15-18 U.S. cabinet officials and **managerial directors** participated making it one of the largest U.S. delegation to travel to a foreign country. Economic Track.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **agency heads** and **managerial directors** interchangeable (i.e., having the same meaning)?

Pair 1368

P1: Usually, members of a particular industry will voluntarily form a committee to study safety issues and propose standards. Those standards are then recommended to ANSI, which reviews and adopts them. **many government regulations** require that products sold or used must comply with a particular ANSI standard. Government agencies.

P2: Usually, members of a particular industry will voluntarily form a committee to study safety issues and propose standards. Those standards are then recommended to ANSI, which reviews and adopts them. **several governmental orders** require that products sold or used must comply with a particular ANSI standard. Government agencies.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **many government regulations** and **several governmental orders** interchangeable (i.e., having the same meaning)?

Pair 1369

P1: Constellation Space Suit system. On August 2, 2006, NASA indicated plans to issue a Request for Proposal (RFP) for the design, development, certification, production, and sustaining engineering of the Constellation Space Suit to meet the needs of the Constellation Program. **NASA foresaw a single suit capable of supporting: survivability during launch, entry and abort; zero-gravity EVA; lunar surface EVA; and Mars surface EVA.** On June 11, 2008, NASA awarded a US\$745 million contract to Oceaneering International to create the new space suit.

P2: Constellation Space Suit system. On August 2, 2006, NASA indicated plans to issue a Request for Proposal (RFP) for the design, development, certification, production, and sustaining engineering of the Constellation Space Suit to meet the needs of the Constellation Program. **NASA foresaw a lone costume capable of supporting: survivability during launch, entry and abort; zero-gravity EVA; lunar surface EVA; and Mars surface EVA.** On June 11, 2008, NASA awarded a US\$745 million contract to Oceaneering International to create the new space suit.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **single suit** and **lone costume** interchangeable (i.e., having the same meaning)?

Pair 1370

P1: Thus, parliamentary proceedings for the passing of the bill had to be started afresh. The bill was introduced for its first reading in Parliament once again on 12 June 1990. The second reading took place on 18 July 1990 and an **identical resolution** that the Bill be committed to a Select Committee was passed. The Bill was read for the third time and passed by Parliament on 9 November 1990.

P2: Thus, parliamentary proceedings for the passing of the bill had to be started afresh. The bill was introduced for its first reading in Parliament once again on 12 June 1990. The second reading took place on 18 July 1990 and an **exact legislation** that the Bill be committed to a Select Committee was passed. The Bill was read for the third time and passed by Parliament on 9 November 1990.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **identical resolution** and **exact legislation** interchangeable (i.e., having the same meaning)?

Pair 1371

P1: Carly Manning is a fictional character on the NBC soap opera "Days of Our Lives". Crystal Chappell portrayed the character from June 12, 1990 to October 18, 1993. After a **sixteen-year absence**, she reprised the role on October 2, 2009 to September 22, 2011. In between her first and second stints, Chappell played the role of businesswoman Olivia Spencer on the CBS soap opera "Guiding Light" from 1999 until its final episode in 2009.

P2: Carly Manning is a fictional character on the NBC soap opera "Days of Our Lives". Crystal Chappell portrayed the character from June 12, 1990 to October 18, 1993. After a **long time away**, she reprised the role on October 2, 2009 to September 22, 2011. In between her first and second stints, Chappell played the role of businesswoman Olivia Spencer on the CBS soap opera "Guiding Light" from 1999 until its final episode in 2009.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **sixteen-year absence** and **long time away** interchangeable (i.e., having the same meaning)?

Pair 1372

P1: The 1990 meeting between the two teams ended memorably. Having the ball inside the Ole Miss 20 and trailing by 4 with seconds remaining, Arkansas needed a score. The Hogs handed the ball to running back Ron Dickerson who seemed to have an **open path** to the endzone. At the goal line, Safety Chris Mitchell stopped Dickerson at the one yard line as time expired.

P2: The 1990 meeting between the two teams ended memorably. Having the ball inside the Ole Miss 20 and trailing by 4 with seconds remaining, Arkansas needed a score. The Hogs handed the ball to running back Ron Dickerson who seemed to have an **accessible route** to the endzone. At the goal line, Safety Chris Mitchell stopped Dickerson at the one yard line as time expired.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **open path** and **accessible route** interchangeable (i.e., having the same meaning)?

Pair 1373

P1: Departure (ejection) from Solar System. If a comet is traveling fast enough, it may leave the Solar System. Such comets follow the **open path** of a hyperbola, and as such, they are called hyperbolic comets. To date, comets are only known to be ejected by interacting with another object in the Solar System, such as Jupiter.

P2: Departure (ejection) from Solar System. If a comet is traveling fast enough, it may leave the Solar System. Such comets follow the **expansive shape** of a hyperbola, and as such, they are called hyperbolic comets. To date, comets are only known to be ejected by interacting with another object in the Solar System, such as Jupiter.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **open path** and **expansive shape** interchangeable (i.e., having the same meaning)?

Pair 1374

P1: (2001), Stewart and Stasser (1998) have asserted that the shared information bias is strongest for group members working on ambiguous, judgment-oriented tasks because their goal is to reach consensual agreement than to distinguish a correct solution. The shared information bias may also develop during group discussion in response to the interpersonal and psychological needs of individual group members. **For example, some group members tend to seek group support for their own personal opinions.** This psychological motivation to garner collective acceptance of one's own initial views has been linked to group preferences for shared information during decision-making activities (Greitemeyer & Schulz-Hardt, 2003; Henningsen & Henningsen, 2003) Lastly, the nature of the discussion between group members reflects whether biases for shared information will surface.

P2: (2001), Stewart and Stasser (1998) have asserted that the shared information bias is strongest for group members working on ambiguous, judgment-oriented tasks because their goal is to reach consensual agreement than to distinguish a correct solution. The shared information bias may also develop during group discussion in response to the interpersonal and psychological needs of individual group members. **For example, some group members tend to seek common agreement for their own personal opinions.** This psychological motivation to garner collective acceptance of one's own initial views has been linked to group preferences for shared information during decision-making activities (Greitemeyer & Schulz-Hardt, 2003; Henningsen & Henningsen, 2003) Lastly, the nature of the discussion between group members reflects whether biases for shared information will surface.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **group support** and **common agreement** interchangeable (i.e., having the same meaning)?

Pair 1375

P1: The DEA questioned this tactic, and counterpoised the need for emphasis on the support of social struggles. December 2008 riots. **A major landmark in the history of SYRIZA was the December revolt of 2008.** SYRIZA became the target of many right-wing parties in Greece after it supported riots following the death of a 16-year-old student by police.

P2: The DEA questioned this tactic, and counterpoised the need for emphasis on the support of social struggles. December 2008 riots. **A huge milestone in the history of SYRIZA was the December revolt of 2008.** SYRIZA became the target of many right-wing parties in Greece after it supported riots following the death of a 16-year-old student by police.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **major landmark** and **huge milestone** interchangeable (i.e., having the same meaning)?

Pair 1376

P1: I am very well known, very popular. My lectures are held before a packed assembly." **While in the USSR, Le Corbusier had a young Moscow architecture student named Sergei Kozhin, a former assistant to Ivan Zholtovsky, as his official guide.** Besides assisting the Swiss architect with the work for the commission of the Tsentrosoyuz, Kozhin would also introduce Le Corbusier to Russian society.

P2: I am very well known, very popular. My lectures are held before a packed assembly." **While in the USSR, Le Corbusier had a young Moscow architecture student named Sergei Kozhin, a former assistant to Ivan Zholtovsky, as his formal escort.** Besides assisting the Swiss architect with the work for the commission of the Tsentrosoyuz, Kozhin would also introduce Le Corbusier to Russian society.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **official guide** and **formal escort** interchangeable (i.e., having the same meaning)?

Pair 1377

P1: Indeed, for a while, things do progress as they did but eventually Mrs. Wickens drugs the children and they sleep, as Mr. Wickens starts a fire in the library beneath the nursery. Tom, the gardener's boy, attempts to rescue them and manages to climb up the outside of the house to the nursery window. **By now the fire has taken a firm hold and Jamie cannot get into the house, to effect a rescue from below.** Just as he's losing heart, Mr. Blunden appears, takes him by the hand and leads him through the flames.

P2: Indeed, for a while, things do progress as they did but eventually Mrs. Wickens drugs the children and they sleep, as Mr. Wickens starts a fire in the library beneath the nursery. Tom, the gardener's boy, attempts to rescue them and manages to climb up the outside of the house to the nursery window. **By now the fire has taken a sustained clutch and Jamie cannot get into the house, to effect a rescue from below.** Just as he's losing heart, Mr. Blunden appears, takes him by the hand and leads him through the flames.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **firm hold** and **sustained clutch** interchangeable (i.e., having the same meaning)?

Pair 1378

P1: Woodbine is the only horse racing track in North America which stages, or is capable of staging, thoroughbred and standardbred racing programs on the same day. Woodbine hosts two of the three legs of the Canadian Triple Crown of Thoroughbred Racing—the opening Queen's Plate on its Polytrack synthetic dirt course, and the closing Breeders' Stakes on grass. **In 1996 Woodbine became the first and only track outside the United States to host the Breeders' Cup World Championships.** The Woodbine facility is also home to the Canadian Horse Racing Hall of Fame.

P2: Woodbine is the only horse racing track in North America which stages, or is capable of staging, thoroughbred and standardbred racing programs on the same day. Woodbine hosts two of the three legs of the Canadian Triple Crown of Thoroughbred Racing—the opening Queen's Plate on its Polytrack synthetic dirt course, and the closing Breeders' Stakes on grass. **In 1996 Woodbine became the single horse raceway outside the United States to host the Breeders' Cup World Championships.** The Woodbine facility is also home to the Canadian Horse Racing Hall of Fame.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **first and only track** and **single horse raceway** interchangeable (i.e., having the same meaning)?

Pair 1379

P1: Season-by-season results. Source: Uniforms. **Traditionally, the Saints home jersey is white with scarlet shoulders and brown trim.** The end of the sleeves and bottom of the sweater feature scarlet and brown stripes.

P2: Season-by-season results. Source: Uniforms. **Traditionally, the Saints home jersey is white with scarlet shoulders and beige piping.** The end of the sleeves and bottom of the sweater feature scarlet and brown stripes.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **brown trim** and **beige piping** interchangeable (i.e., having the same meaning)?

Pair 1380

P1: Recipient's side. Technically the system is implemented with the following steps: If the hash string passes all of these tests, it is considered a valid hash string. All of these tests take far less time and disk space than receiving the body content of the e-mail. Required effort.

P2: Recipient's side. Technically the system is implemented with the following steps: If the hash string passes all of these tests, it is considered a valid hash string. All of these tests take much fewer hours and disk space than receiving the body content of the e-mail. Required effort.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are far less time and much fewer hours interchangeable (i.e., having the same meaning)?

Pair 1381

P1: The exact assumptions Tiebout made in his first statement of the model were: Evidence. The Tiebout model implies that when people have more choice, there will be uniformity in the tastes for public goods among town residents. supportive evidence comes from Gramlich and Rubinfeld (1982), who surveyed Michigan households on their demand for public goods. They found that in larger metropolitan areas, where people have greater choice of which community they can live in, preferences for public goods were more similar within towns than in smaller areas with fewer independent towns to choose from.

P2: The exact assumptions Tiebout made in his first statement of the model were: Evidence. The Tiebout model implies that when people have more choice, there will be uniformity in the tastes for public goods among town residents. Contributory documentation comes from Gramlich and Rubinfeld (1982), who surveyed Michigan households on their demand for public goods. They found that in larger metropolitan areas, where people have greater choice of which community they can live in, preferences for public goods were more similar within towns than in smaller areas with fewer independent towns to choose from.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are supportive evidence and Contributory documentation interchangeable (i.e., having the same meaning)?

Pair 1382

P1: It is not as resistant and perishes from a lack of water during the drought season. The environment has become ill-suited for it. Habitat pressure from pastoral activity is another reason for decline, as are introduced diseases from livestock. Human threats.

P2: It is not as resistant and perishes from a lack of water during the drought season. The environment has become ill-suited for it. Habitat pressure from agrarian conduct is another reason for decline, as are introduced diseases from livestock. Human threats.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are pastoral activity and agrarian conduct interchangeable (i.e., having the same meaning)?

Pair 1383

P1: Action. At certain places or due to events, the game world switches into a top-down perspective and the player assumes control of Dr. Bradley to navigate him around in a finer detail (in the adventure mode he can only drive to a discrete locations shown by name on the overview). The entire game world is reproduced from this perspective, however earlier in the game only a smaller section is visible and relevant. It is commonly triggered when several ants are approaching, while the player is the "adventure" mode.

P2: Action. At certain places or due to events, the game world switches into a top-down perspective and the player assumes control of Dr. Bradley to navigate him around in a finer detail (in the adventure mode he can only drive to a

discrete locations shown by name on the overview). The entire game world is reproduced from this perspective, however earlier in the game only a **reduced subset** is visible and relevant. It is commonly triggered when several ants are approaching, while the player is the "adventure" mode.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **smaller section** and **reduced subset** interchangeable (i.e., having the same meaning)?

Pair 1384

P1: In the Country of Santa Cruz, the Housing Authority allows both small and large pets. It defines small pets as "pets kept in cages / aquariums such as hamsters, turtles, birds, and fish". Each public housing unit can keep **one cage or one aquarium**. In either case two pets are allowed at maximum.

P2: In the Country of Santa Cruz, the Housing Authority allows both small and large pets. It defines small pets as "pets kept in cages / aquariums such as hamsters, turtles, birds, and fish". Each public housing unit can keep **a single bird enclosure or one aquarium**. In either case two pets are allowed at maximum.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one cage** and **a single bird enclosure** interchangeable (i.e., having the same meaning)?

Pair 1385

P1: He found the witch feeding the birds. She was unable to curse him. When she tried to take **one cage** away, he realized it was Jorinde. He touched the witch with the flower and her evil magic left her forever.

P2: He found the witch feeding the birds. She was unable to curse him. When she tried to take **a particular crate** away, he realized it was Jorinde. He touched the witch with the flower and her evil magic left her forever.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one cage** and **a particular crate** interchangeable (i.e., having the same meaning)?

Pair 1386

P1: Total length of this line will be 21.54 km or 13.35 miles. It will be the backbone of the whole network and will serve as a lifeline to the city traffic, it will also Interchange with every other line in the network. The **yellow line** will have the following stations listed here **Red Line**. The main east west line from Koharapeer to Shahjahanpur Road **Orange Line**.

P2: Total length of this line will be 21.54 km or 13.35 miles. It will be the backbone of the whole network and will serve as a lifeline to the city traffic, it will also Interchange with every other line in the network. The **amber metro transit railway** will have the following stations listed here **Red Line**. The main east west line from Koharapeer to Shahjahanpur Road **Orange Line**.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **yellow line** and **amber metro transit railway** interchangeable (i.e., having the same meaning)?

Pair 1387

P1: Certain other areas in the western sector also get flooded. A major problem in Murshidabad district is river bank erosion. As of 2013, an **estimated 2.4 million people** reside along the banks of the Ganges alone in Murshidabad district. See also - River bank erosion along the Ganges in Malda and Murshidabad districts Raghunathganj I CD Block

has an area of 140.91 km².

P2: Certain other areas in the western sector also get flooded. A major problem in Murshidabad district is river bank erosion. As of 2013, an **about 2.5 million** reside along the banks of the Ganges alone in Murshidabad district. See also - River bank erosion along the Ganges in Malda and Murshidabad districts Raghunathganj I CD Block has an area of 140.91 km².

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **estimated 2.4 million people** and **about 2.5 million** interchangeable (i.e., having the same meaning)?

Pair 1388

P1: "Nevertheless, this is still a highly-damaging exercise we are being forced into and will cost the club many thousands of pounds when we can least afford it." A week before the EGM, Chestnut Hill Ventures, the company of Lions chairman John Berylson, converted a £2.3m loan into shares in Millwall PLC – thereby becoming the club's major shareholder. Fellow directors Constantine Gonticas, Trevor Keyse and Stewart Till also converted a **combined sum** of £200,000 into shares. Berylson and the rest of the board hold a combined stake of 36.66% in the club, while Lacey's share has dropped to around 22.2%.

P2: "Nevertheless, this is still a highly-damaging exercise we are being forced into and will cost the club many thousands of pounds when we can least afford it." A week before the EGM, Chestnut Hill Ventures, the company of Lions chairman John Berylson, converted a £2.3m loan into shares in Millwall PLC – thereby becoming the club's major shareholder. Fellow directors Constantine Gonticas, Trevor Keyse and Stewart Till also converted a **complete aggregate amount** of £200,000 into shares. Berylson and the rest of the board hold a combined stake of 36.66% in the club, while Lacey's share has dropped to around 22.2%.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **combined sum** and **complete aggregate amount** interchangeable (i.e., having the same meaning)?

Pair 1389

P1: In this context, nanoparticles may be used as sorbents, as reactive agents (photocatalysts or redox agents), or in membranes used for nanofiltration. Trace contaminant detection. Nanoparticles may assist in detecting trace levels of contaminants in **field settings**, contributing to effective remediation. Instruments that can operate outside of a laboratory often are not sensitive enough to detect trace contaminants.

P2: In this context, nanoparticles may be used as sorbents, as reactive agents (photocatalysts or redox agents), or in membranes used for nanofiltration. Trace contaminant detection. Nanoparticles may assist in detecting trace levels of contaminants in **practical applications**, contributing to effective remediation. Instruments that can operate outside of a laboratory often are not sensitive enough to detect trace contaminants.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **field settings** and **practical applications** interchangeable (i.e., having the same meaning)?

Pair 1390

P1: Fingleton described Morris's effort as "one of the catches of the season". England were 17/3, and Crapp came in to join Hutton. At this point, Bradman began to put in place more attacking **field settings**. Johnston then hit Hutton on the fingers with a ball that rose sharply after pitching.

P2: Fingleton described Morris's effort as "one of the catches of the season". England were 17/3, and Crapp came in to join Hutton. At this point, Bradman began to put in place more attacking **ground plays**. Johnston then hit Hutton on

the fingers with a ball that rose sharply after pitching.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **field settings** and **ground plays** interchangeable (i.e., having the same meaning)?

Pair 1391

P1: Mark 3a is the production built loco-hauled Mk3 built by BR at Derby Litchurch Lane introduced on the West Coast Main Line from 1975. From 1979, seven First Open were used on the Glasgow to Edinburgh push pull service 11004–11010 with 11022 added later as 11004 was involved in the Polmont rail accident in 1984. **ScotRail later down graded its first open in 1986 to Open Composite were renumbered 119xx.** Two First Open 11021 and 11032 were fitted with BT15 bogies along with 11058 fitted with BTS bogies in the mid-1980s.

P2: Mark 3a is the production built loco-hauled Mk3 built by BR at Derby Litchurch Lane introduced on the West Coast Main Line from 1975. From 1979, seven First Open were used on the Glasgow to Edinburgh push pull service 11004–11010 with 11022 added later as 11004 was involved in the Polmont rail accident in 1984. **ScotRail later down graded its FO railway carriage in 1986 to Open Composite were renumbered 119xx.** Two First Open 11021 and 11032 were fitted with BT15 bogies along with 11058 fitted with BTS bogies in the mid-1980s.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **first open** and **FO railway carriage** interchangeable (i.e., having the same meaning)?

Pair 1392

P1: "Take care, and be on your guard against all covetousness, for one's life doesn't consist in the abundance of his possessions." Jesus also describes the sins that defile a person as sins from coming from untamed desires in the heart. **The Epistle of James portrays covetous desire residing in the heart as being the internal source of temptation and sin.** James goes on to describe how covetous desire leads to fighting and that lack of material possessions is caused by not asking God for them and by asking with wrong motives.

P2: "Take care, and be on your guard against all covetousness, for one's life doesn't consist in the abundance of his possessions." Jesus also describes the sins that defile a person as sins from coming from untamed desires in the heart. **The Epistle of James portrays covetous desire residing in the heart as being the interior impetus of temptation and sin.** James goes on to describe how covetous desire leads to fighting and that lack of material possessions is caused by not asking God for them and by asking with wrong motives.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **internal source** and **interior impetus** interchangeable (i.e., having the same meaning)?

Pair 1393

P1: In order to try and catch a track from the SSE of other "dry holes" that may not have yielded much, the primary focus, had to take a back seat, gratefully, to the very least, more than a hundred ISIS fighters, as well as IRGC-influenced proxies in various ACMs (Anti-Coalition Militias) were taken off the battlefield permanently. From everything from targeted strikes by Delta to armed ISR and AC-130s, the CENTCOM SOF made short work of the visible ISIL positions (but only the ones they were cleared to hit, said anonymous insiders who believed and still do, that ISIS could have been nearly 70% wiped out in their part of that battlespace) and still are from their bases in nearby countries like Jordan who are not sending their Special Operations in to not be heavy-handed. **The Jordanian assistance in the intervention has been crucial, as likely their GID is the best in the entire region.** On the night of May 15, 2015, U.S. special operations forces launched a raid on Deir Ezzor in eastern Syria.

P2: In order to try and catch a track from the SSE of other "dry holes" that may not have yielded much, the primary focus, had to take a back seat, gratefully, to the very least, more than a hundred ISIS fighters, as well as IRGC-influenced proxies in various ACMs (Anti-Coalition Militias) were taken off the battlefield permanently. From everything from

targeted strikes by Delta to armed ISR and AC-130s, the CENTCOM SOF made short work of the visible ISIL positions (but only the ones they were cleared to hit, said anonymous insiders who believed and still do, that ISIS could have been nearly 70% wiped out in their part of that battlespace) and still are from their bases in nearby countries like Jordan who are not sending their Special Operations in to not be heavy-handed. **The Jordanian assistance in the intervention has been crucial, as likely their GID is the best in the whole area.** On the night of May 15, 2015, U.S. special operations forces launched a raid on Deir Ezzor in eastern Syria.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **entire region** and **whole area** interchangeable (i.e., having the same meaning)?

Pair 1394

P1: Mali Bero or ("Mali" the "First" or "Eldest") is a mythical legendary leader of the Zarma people of western Niger who led them in their migration from an unknown region Mali eastward to western Niger several centuries ago. The story of "Mali Bero" has appeared in various forms in the Zarma society from poems, songs and oral narratives by griots. **No one, however, has published a linear version of the story of "Mali Bero" that is more than a few hundreds long.** Mali Bero, however, is believed to be the son of Zabarkane, another Zarma legendary figure Oral Tradition.

P2: Mali Bero or ("Mali" the "First" or "Eldest") is a mythical legendary leader of the Zarma people of western Niger who led them in their migration from an unknown region Mali eastward to western Niger several centuries ago. The story of "Mali Bero" has appeared in various forms in the Zarma society from poems, songs and oral narratives by griots. **No one, however, has published a chronological chronicle of the story of "Mali Bero" that is more than a few hundreds long.** Mali Bero, however, is believed to be the son of Zabarkane, another Zarma legendary figure Oral Tradition.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **linear version** and **chronological chronicle** interchangeable (i.e., having the same meaning)?

Pair 1395

P1: Under West Point's Biff Jones, the 1932 team tied for the Southern Conference championship in its last season as a member of the conference. The 1933 lost no games and was led by track and field athlete Jack Torrance. **Jones resigned after the 1934 season after a heated exchange with noted LSU supporter, Louisiana senator Huey P. Long.** In the last game of the season, Long was displeased after the team had lost two straight games and were trailing at halftime to Oregon.

P2: Under West Point's Biff Jones, the 1932 team tied for the Southern Conference championship in its last season as a member of the conference. The 1933 lost no games and was led by track and field athlete Jack Torrance. **Jones resigned after the 1934 season after a voracious argument with noted LSU supporter, Louisiana senator Huey P. Long.** In the last game of the season, Long was displeased after the team had lost two straight games and were trailing at halftime to Oregon.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **heated exchange** and **voracious argument** interchangeable (i.e., having the same meaning)?

Pair 1396

P1: Mashrabiya. Mashrabiya is a kind of traditional element which are widely used in Saudi Arabia's architecture and it is the beautiful wooden screens that built on the faced of the buildinglike the wooden bay window. **The function of mashrabiya is used to provide a private place and suppresses the strong desert sunlight to keep the room cool.** The working principle is with the evaporation of water n the surface of porous pots can be cooled the internal water to provide stable natural ventilation through the shade and open lattice.

P2: Mashrabiya. Mashrabiya is a kind of traditional element which are widely used in Saudi Arabia's architecture and it is the beautiful wooden screens that built on the faced of the buildinglike the wooden bay window. **The function of**

mashrabiya is used to provide a **hidden refuge** and suppresses the strong desert sunlight to keep the room cool. The working principle is with the evaporation of water on the surface of porous pots can be cooled the internal water to provide stable natural ventilation through the shade and open lattice.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **private place** and **hidden refuge** interchangeable (i.e., having the same meaning)?

Pair 1397

P1: COVID-19 response. On March 11, 2020, Johnson announced the cancellation of the St. Patrick's Day Parade, an annual event that draws more than 100,000 people to Lower Greenville, because of concerns about COVID-19. **The next night, after evidence emerged of community spread in Dallas, Johnson declared a local state of disaster.** The next week, the City Council extended the disaster declaration, and the mayor continued to enact regulations and restrictions.

P2: COVID-19 response. On March 11, 2020, Johnson announced the cancellation of the St. Patrick's Day Parade, an annual event that draws more than 100,000 people to Lower Greenville, because of concerns about COVID-19. **The next night, after evidence emerged of community spread in Dallas, Johnson declared a surrounding-area predicament of disaster.** The next week, the City Council extended the disaster declaration, and the mayor continued to enact regulations and restrictions.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **local state** and **surrounding-area predicament** interchangeable (i.e., having the same meaning)?

Pair 1398

P1: Following diagnosis of a potentially serious illness or injury, patients and their families are often in a state of shock and disbelief. At this time, the details and decisions of medical evaluation and treatment may be overwhelming and bewildering. **Very focused interventions are often needed to help them achieve some sense of basic understanding and control of the situation.** Consultation-liaison skills that enable psychologists to act in crisis situations include crisis intervention, needs assessment, providing direction, mobilization of social supports, identifying areas for parental or child control, and interpreting and reframing child or family reactions to staff.

P2: Following diagnosis of a potentially serious illness or injury, patients and their families are often in a state of shock and disbelief. At this time, the details and decisions of medical evaluation and treatment may be overwhelming and bewildering. **Very focused interventions are often needed to help them achieve some sense of fundamental comprehension and control of the situation.** Consultation-liaison skills that enable psychologists to act in crisis situations include crisis intervention, needs assessment, providing direction, mobilization of social supports, identifying areas for parental or child control, and interpreting and reframing child or family reactions to staff.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **basic understanding** and **fundamental comprehension** interchangeable (i.e., having the same meaning)?

Pair 1399

P1: Although these expressions are each exact, calculating the viscosity of a dense fluid using these relations currently requires the use of molecular dynamics computer simulations. On the other hand, much more progress can be made for a dilute gas. **Even elementary assumptions about how gas molecules move and interact lead to a basic understanding of the molecular origins of viscosity.** More sophisticated treatments can be constructed by systematically coarse-graining the equations of motion of the gas molecules.

P2: Although these expressions are each exact, calculating the viscosity of a dense fluid using these relations currently requires the use of molecular dynamics computer simulations. On the other hand, much more progress can be made for a dilute gas. **Even elementary assumptions about how gas molecules move and interact lead to a rudimentary apprehension**

of the molecular origins of viscosity. More sophisticated treatments can be constructed by systematically coarse-graining the equations of motion of the gas molecules.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **basic understanding** and **rudimentary apprehension** interchangeable (i.e., having the same meaning)?

Pair 1400

P1: This effect of the Mozilla trademark policy led to a long debate within the Debian Project in 2004 and 2005. During this debate, the name "Iceweasel" was coined to refer to rebranded versions of Firefox. **The first known use of the name in this context is by Nathanael Nerode, in reply to Eric Dorland's suggestion of "Icerabbit".** It was intended as a parody of "Firefox".

P2: This effect of the Mozilla trademark policy led to a long debate within the Debian Project in 2004 and 2005. During this debate, the name "Iceweasel" was coined to refer to rebranded versions of Firefox. **The foremost acknowledged of the name in this context is by Nathanael Nerode, in reply to Eric Dorland's suggestion of "Icerabbit".** It was intended as a parody of "Firefox".

Question: In both passages, are **first known use** and **foremost acknowledged** interchangeable (i.e., having the same meaning)?

Pair 1401

P1: This caused a heavy traffic jam until the flood receded. Fee. **Fees are charged in Rupiah as regulated by Minister of public work** Act No. 514/KPTS/M/2009 31 August 2009 in the table shown below.

P2: This caused a heavy traffic jam until the flood receded. Fee. **Fees are charged in Rupiah as regulated by Minister of "Public Work"** Act No. 514/KPTS/M/2009 31 August 2009 in the table shown below.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **public work** and **"Public Work"** interchangeable (i.e., having the same meaning)?

Pair 1402

P1: As the Germans subdued rebelling Africans, their expeditions also resulted in obtaining forced labourers for the coastal plantations. This activity led to the depopulation of inland zones. **The exploitative nature of the German regime swept the natives of Kamerun into a changed world.** The previous barter economy suddenly found itself replaced by a money economy.

P2: As the Germans subdued rebelling Africans, their expeditions also resulted in obtaining forced labourers for the coastal plantations. This activity led to the depopulation of inland zones. **The deceitful manner of the German regime swept the natives of Kamerun into a changed world.** The previous barter economy suddenly found itself replaced by a money economy.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **exploitative nature** and **deceitful manner** interchangeable (i.e., having the same meaning)?

Pair 1403

P1: However, the catalogs of some national libraries effectively serve as national bibliographies, as the national libraries own almost all their countries' publications. Descriptive bibliography. Fredson Bowers described and formulated a **standardized practice** of descriptive bibliography in his "Principles of Bibliographical Description" (1949). Scholars to this day treat Bowers' scholarly guide as authoritative.

P2: However, the catalogs of some national libraries effectively serve as national bibliographies, as the national libraries own almost all their countries' publications. Descriptive bibliography. Fredson Bowers described and formulated a **routine habit** of descriptive bibliography in his "Principles of Bibliographical Description" (1949). Scholars to this day treat Bowers' scholarly guide as authoritative.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **standardized practice** and **routine habit** interchangeable (i.e., having the same meaning)?

Pair 1404

P1: Much of this has to do with the employment security and the quality of working conditions and wages. The availability of quality, regulated childcare is an especially important policy option in support of early life. These are not issues that usually come under **individual control** but rather they are socially constructed conditions which require institutional responses. A policy-oriented approach places such findings within a broader policy context.

P2: Much of this has to do with the employment security and the quality of working conditions and wages. The availability of quality, regulated childcare is an especially important policy option in support of early life. These are not issues that usually come under **one person's autonomy** but rather they are socially constructed conditions which require institutional responses. A policy-oriented approach places such findings within a broader policy context.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **individual control** and **one person's autonomy** interchangeable (i.e., having the same meaning)?

Pair 1405

P1: With one of the longest main galleries of any Maginot position, it consists of two entrance blocks, three infantry blocks and four artillery blocks. A second phase of construction was planned to add nine more combat blocks and an anti-tank ditch, but was never executed. Anzeling saw **limited action** in World War II, and was rehabilitated for use during the cold war. It was de-activated in the 1970s and sold for private use.

P2: With one of the longest main galleries of any Maginot position, it consists of two entrance blocks, three infantry blocks and four artillery blocks. A second phase of construction was planned to add nine more combat blocks and an anti-tank ditch, but was never executed. Anzeling saw **minimal use** in World War II, and was rehabilitated for use during the cold war. It was de-activated in the 1970s and sold for private use.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **limited action** and **minimal use** interchangeable (i.e., having the same meaning)?

Pair 1406

P1: Since 1988, National Foster Care Month continues to be recognized and celebrated. Overview. The **original focus** was to give foster parents the recognition they deserved for opening their homes to foster children in need and caring for them. However, the main focus and theme changes with every passing year.

P2: Since 1988, National Foster Care Month continues to be recognized and celebrated. Overview. The **beginning target** was to give foster parents the recognition they deserved for opening their homes to foster children in need and caring for them. However, the main focus and theme changes with every passing year.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **original focus** and **beginning target** interchangeable (i.e., having the same meaning)?

Pair 1407

P1: The devotional movement in Hinduism is divine grace and is known as the Bhakti movement. Basava (1106–1167), also called Basavanna, protested against caste system and was for equality among all classes. His movement was called the Bhakti Movement and it had a **profound paradigm shift** in the socio-cultural ethos of the state of Karnataka. The basic tenet of this philosophy, propounded from the 12th century by the Virashaiva school or Virashaivism, was opposition to the caste system, rejection of the supremacy of the Brahmins, abhorrence to ritual sacrifice, and insistence on Bhakti and the worship of the one God, Shiva.

P2: The devotional movement in Hinduism is divine grace and is known as the Bhakti movement. Basava (1106–1167), also called Basavanna, protested against caste system and was for equality among all classes. His movement was called the Bhakti Movement and it had a **key metamorphosis** in the socio-cultural ethos of the state of Karnataka. The basic tenet of this philosophy, propounded from the 12th century by the Virashaiva school or Virashaivism, was opposition to the caste system, rejection of the supremacy of the Brahmins, abhorrence to ritual sacrifice, and insistence on Bhakti and the worship of the one God, Shiva.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **profound paradigm shift** and **key metamorphosis** interchangeable (i.e., having the same meaning)?

Pair 1408

P1: In Canada, bottled water must meet the standards in the Food and Drugs Act & Regulations (FDAR) as it is considered a food. The FDAR works in partnership with Health Canada and Canadian in developing the policies regarding bottled water. The CFIA focuses more on regulations pertaining to packaging, labeling, advertising, and other **safety practices**, whereas the FDAR focuses more on the water itself. For example, the bottled water must meet the Food Inspection Agency (CFIA) Regulations in Division 12, Part B of the Act must be met before it is approved for sale.

P2: In Canada, bottled water must meet the standards in the Food and Drugs Act & Regulations (FDAR) as it is considered a food. The FDAR works in partnership with Health Canada and Canadian in developing the policies regarding bottled water. The CFIA focuses more on regulations pertaining to packaging, labeling, advertising, and other **security measures**, whereas the FDAR focuses more on the water itself. For example, the bottled water must meet the Food Inspection Agency (CFIA) Regulations in Division 12, Part B of the Act must be met before it is approved for sale.

Please record your answer for the following question in the provided Google sheet

in Dubai in 1974. Dubai Polo & Equestrian Club owned and run by Emaar Properties has two polo fields and one stick & sports park. Its stables contains 150 polo ponies.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **ball field** and **sports park** interchangeable (i.e., having the same meaning)?

Pair 1413

P1: Under provisions of the Forest Reserve Act of March 3, 1891, President Benjamin Harrison created by an executive order the Afognak Island Forest and Fish Culture Reserve in Alaska, "including its adjacent bays and rocks and territorial waters, including among others the sea lion and sea otter islands." The action showed, in its executive history, that wildlife concerns were a paramount element in the proposal. However, possibly because of the emphasis on forest and fish resource protection, the value of this area as a wildlife refuge often escapes **deserved recognition**. This order also established the first reservation for fish.

P2: Under provisions of the Forest Reserve Act of March 3, 1891, President Benjamin Harrison created by an executive order the Afognak Island Forest and Fish Culture Reserve in Alaska, "including its adjacent bays and rocks and territorial waters, including among others the sea lion and sea otter islands." The action showed, in its executive history, that wildlife concerns were a paramount element in the proposal. However, possibly because of the emphasis on forest and fish resource protection, the value of this area as a wildlife refuge often escapes **justified acknowledgment**. This order also established the first reservation for fish.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **deserved recognition** and **justified acknowledgment** interchangeable (i.e., having the same meaning)?

Pair 1414

P1: Use of the elevators resulted in the three fire deaths when the car inadvertently stopped at the fire floor. Others were almost killed in the same way but were rescued by fire fighters. The City of New York created the most **restrictive law** of its kind for high-rise buildings. [Local Law # 5 of 1973], more than just steel and concrete as safety measures, adequate fire protection and a process to safely evacuate a high-rise building were introduced as a means to protect property and provide life safety for the occupants.

P2: Use of the elevators resulted in the three fire deaths when the car inadvertently stopped at the fire floor. Others were almost killed in the same way but were rescued by fire fighters. The City of New York created the most **strict legal regulations** of its kind for high-rise buildings. [Local Law # 5 of 1973], more than just steel and concrete as safety measures, adequate fire protection and a process to safely evacuate a high-rise building were introduced as a means to protect property and provide life safety for the occupants.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **restrictive law** and **strict legal regulations** interchangeable (i.e., having the same meaning)?

Pair 1415

P1: These seem to have been advantageous to the Venetians and to have guaranteed Byzantine sovereignty over them. War and peace, 806–814. **temporary shift** of Venetian loyalties toward the Franks resulted in somewhat permanent naval conflict in the Adriatic, only interrupted by a truce in 807–808. After Charlemagne's son and king of Italy Pippin's invasion of Dalmatia tension rose between the two Empires.

P2: These seem to have been advantageous to the Venetians and to have guaranteed Byzantine sovereignty over them. War and peace, 806–814. **impermanent transfer** of Venetian loyalties toward the Franks resulted in somewhat permanent naval conflict in the Adriatic, only interrupted by a truce in 807–808. After Charlemagne's son and king of Italy

Pippin's invasion of Dalmatia tension rose between the two Empires.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **temporary shift** and **impermanent transfer** interchangeable (i.e., having the same meaning)?

Pair 1416

P1: In a study by Donaldson and Vollmer, the efficacy of a fixed duration time-out and a release contingency time-out were compared. In the fixed duration condition, children were sent to time-out for a total of 4 minutes and were released from time-out whether or not they performed problem behavior during the time-out session. **In the release contingency condition, children were not released from time-out if they were performing problem behavior during the last 30 seconds of their time-out.** The time-out was extended until there were no occurrences of problem behavior for a total of 30 seconds or until the time-out reached the ten-minute mark.

P2: In a study by Donaldson and Vollmer, the efficacy of a fixed duration time-out and a release contingency time-out were compared. In the fixed duration condition, children were sent to time-out for a total of 4 minutes and were released from time-out whether or not they performed problem behavior during the time-out session. **In the release contingency condition, children were not released from time-out if they were performing problem behavior during the waning instants of their time-out.** The time-out was extended until there were no occurrences of problem behavior for a total of 30 seconds or until the time-out reached the ten-minute mark.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **last 30 seconds** and **waning instants** interchangeable (i.e., having the same meaning)?

Pair 1417

P1: The council will be made up of the following individuals: General conditions. If a continental confederation has at least 15 national federations as full members, it may nominate a council member for the continent that shall be confirmed by the IHF Congress. **Each continental confederation may nominate one vice-president if it has at least 23 national federations as full members.** The council shall convene at least twice a year.

P2: The council will be made up of the following individuals: General conditions. If a continental confederation has at least 15 national federations as full members, it may nominate a council member for the continent that shall be confirmed by the IHF Congress. **Each continental confederation may nominate a single VP-president if it has at least 23 national federations as full members.** The council shall convene at least twice a year.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one vice** and **a single VP** interchangeable (i.e., having the same meaning)?

Pair 1418

P1: The condition tends to be episodic. Anterior ischemic optic neuropathy is commonly known as "stroke of the optic nerve" and affects the optic nerve head (where the nerve exits the eyeball). **There is usually a sudden loss of blood supply and nutrients to the optic nerve head.** Vision loss is typically sudden and most commonly occurs upon waking up in the morning.

P2: The condition tends to be episodic. Anterior ischemic optic neuropathy is commonly known as "stroke of the optic nerve" and affects the optic nerve head (where the nerve exits the eyeball). **There is usually a quick diminishment of blood supply and nutrients to the optic nerve head.** Vision loss is typically sudden and most commonly occurs upon waking up in the morning.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **sudden loss** and **quick diminishment** interchangeable (i.e., having the same meaning)?

Pair 1419

P1: A quirky example would be estimating the speed of light, tea consumption in Taiwan, and hog weight in Montana, all together. The James–Stein estimator always improves upon the "total" MSE, i.e., the sum of the expected errors of each component. **Therefore, the total MSE in measuring light speed, tea consumption, and hog weight would improve by using the James–Stein estimator.** However, any particular component (such as the speed of light) would improve for some parameter values, and deteriorate for others.

P2: A quirky example would be estimating the speed of light, tea consumption in Taiwan, and hog weight in Montana, all together. The James–Stein estimator always improves upon the "total" MSE, i.e., the sum of the expected errors of each component. **Therefore, the total MSE in measuring light speed, cuppa ingestion, and hog weight would improve by using the James–Stein estimator.** However, any particular component (such as the speed of light) would improve for some parameter values, and deteriorate for others.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **tea consumption** and **cuppa ingestion** interchangeable (i.e., having the same meaning)?

Pair 1420

P1: Tea became a drink of the royal classes when Emperor Saga encouraged the growth of tea plants. Seeds were imported from China, and cultivation in Japan began. **tea consumption** became popular among the gentry during the 12th century, after the publication of Eisai's "Kissa Yōjōki". Uji, with its strategic location near the capital at Kyoto, became Japan's first major tea-producing region during this period.

P2: Tea became a drink of the royal classes when Emperor Saga encouraged the growth of tea plants. Seeds were imported from China, and cultivation in Japan began. **pekoe drinking** became popular among the gentry during the 12th century, after the publication of Eisai's "Kissa Yōjōki". Uji, with its strategic location near the capital at Kyoto, became Japan's first major tea-producing region during this period.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **tea consumption** and **pekoe drinking** interchangeable (i.e., having the same meaning)?

Pair 1421

P1: He married Irene E. Badowska (1904-2003) in 1927. Wegrocki was elected to the New Jersey State Assembly in 1938, and was re-elected in 1939, 1940, 1941 and 1942. **In 1939, a priest sued Wegrocki for failing to repay a personal loan he made to help set up a medical practice.** The priest was awarded a judgment of \$2,454.

P2: He married Irene E. Badowska (1904-2003) in 1927. Wegrocki was elected to the New Jersey State Assembly in 1938, and was re-elected in 1939, 1940, 1941 and 1942. **In 1939, a priest sued Wegrocki for failing to repay a private debt he made to help set up a medical practice.** The priest was awarded a judgment of \$2,454.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **personal loan** and **private debt** interchangeable (i.e., having the same meaning)?

Pair 1422

P1: A Walley jump is a full rotation jump in figure skating where the skater jumps off the backward inside edge, makes one full rotation in the air, and then lands on the backward outside edge of the same foot. For a counterclockwise jump, the takeoff and landing are on the right foot. The air position and landing of the Walley are similar to those for other figure skating jumps. Walley jumps are related to edge pulls, a technique for gaining power by means of changing edge while skating on one foot.

P2: A Walley jump is a full rotation jump in figure skating where the skater jumps off the backward inside edge, makes one full rotation in the air, and then lands on the backward outside edge of the same foot. For a counterclockwise jump, the takeoff and landing are on the right foot. The posture while jumping and landing of the Walley are similar to those for other figure skating jumps. Walley jumps are related to edge pulls, a technique for gaining power by means of changing edge while skating on one foot.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are air position and posture while jumping interchangeable (i.e., having the same meaning)?

Pair 1423

P1: John stayed with the circus as the Forepaugh show joined with the Sells Brothers Circus, which then joined with the Ringling Brothers Circus. Old John, as he came to be known, stayed on with the circus after he retired from performing. He babysat for the performers' children, did heavy lifting, and led the elephant herd to and from the show grounds and train. On 9 April 1922, John, with Dexter Fellows, began a 53 mile pilgrimage from Madison Square Garden to the Elephant Hotel in Somers, New York, to pay tribute to Old Bet, the first elephant in America.

Old John, as he came to be known, stayed on with the circus after he retired from performing. He babysat for the performers' children, did heavy lifting, and led the elephant herd to and from the performance field and train. On 9 April 1922, John, with Dexter Fellows, began a 53 mile pilgrimage from Madison Square Garden to the Elephant Hotel in Somers, New York, to pay tribute to Old Bet, the first elephant in America.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are show grounds and performance field interchangeable (i.e., having the same meaning)?

Pair 1424

P1: Reverend Cole urges Joseph to leave town and return to his tribe, but Joseph says he no longer belongs there either. He tells Cole he loves Ruth and will not abandon her, unlike her own father. Durant relents and gives into a silent Lily, who informs Cullen that Durant has authorized the brothers' release. Cullen says the butcher may inflict a worse fate on Sean and Mickey once they are free and he will not protect them.

P2: Reverend Cole urges Joseph to leave town and return to his tribe, but Joseph says he no longer belongs there either. He tells Cole he loves Ruth and will not abandon her, unlike her own father. Durant relents and gives into a silent Lily, who informs Cullen that Durant has authorized the father's sons freedom. Cullen says the butcher may inflict a worse fate on Sean and Mickey once they are free and he will not protect them.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are brothers' release and father's sons freedom interchangeable (i.e., having the same meaning)?

Pair 1425

P1: This ceremony is seeing increasing use among liberal couples. Public Positions. Linzer has taken a public stand on a number of controversial issues within the Orthodox Jewish community. In 2006, he was the only Orthodox rabbi to go

on record supporting the naming of Dina Najman as spiritual leader of the Orthodox congregation, Kehilat Orach Eliezer.

P2: This ceremony is seeing increasing use among liberal couples. Public Positions. Linzer has taken a verbal stance on a number of controversial issues within the Orthodox Jewish community. In 2006, he was the only Orthodox rabbi to go on record supporting the naming of Dina Najman as spiritual leader of the Orthodox congregation, Kehilat Orach Eliezer.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are public stand and verbal stance interchangeable (i.e., having the same meaning)?

Pair 1426

P1: In contrast, birds cannot adapt to total "blocking" methods or mild electrical low current "shocking" stimuli that modifies behavior. This is why netting, mesh, and low current electrical barriers are tested to be the most effective avian control devices. high quality materials and long lasting systems have the greatest return on investment because bird problems are perpetual year after year. In 2013, Dr. John Swaddle and Dr. Mark Hinders at the College of William and Mary created a new method of deterring birds and other animals using benign sounds projected by conventional and directional (parametric) speakers.

P2: In contrast, birds cannot adapt to total "blocking" methods or mild electrical low current "shocking" stimuli that modifies behavior. This is why netting, mesh, and low current electrical barriers are tested to be the most effective avian control devices. first-rate goods and long lasting systems have the greatest return on investment because bird problems are perpetual year after year. In 2013, Dr. John Swaddle and Dr. Mark Hinders at the College of William and Mary created a new method of deterring birds and other animals using benign sounds projected by conventional and directional (parametric) speakers.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are high quality materials and first-rate goods interchangeable (i.e., having the same meaning)?

Pair 1427

P1: A civil nuclear deal with the [[United States]] came into effect in 2008, a nuclear cooperation deal with [[South Korea]] was established in June 2010, and two more deals were signed with [[China]] in 2012. The following year, the [[International Atomic Energy Agency]] (IAEA) performed the Integrated Nuclear Infrastructure Review (INIR) in Turkey to evaluate the country's advancement in the planning for a new nuclear power scheme. Although the review was positive, the IAEA advised Turkey to complete the national nuclear energy strategy and to improve the regulating agency. Regulation and policy.

Pair 1428

P1: Inspectors will visit establishments unannounced and if the establishment fails to comply with laws and regulations, seizure of liquor, fine or suspension of licence may follow. Manitoba. Established in 1923, the Manitoba Liquor Control Commission (MLCC) serves as a regulating agency of alcohol sales and distributions in Manitoba. Its licensing board provides 12 types of liquor license applications, including Dining Room License, Cocktail Lounge Licence, Spectator

Activities Licence, etc.

P2: Inspectors will visit establishments unannounced and if the establishment fails to comply with laws and regulations, seizure of liquor, fine or suspension of licence may follow. Manitoba. Established in 1923, the Manitoba Liquor Control Commission (MLCC) serves as a rule-making authority of alcohol sales and distributions in Manitoba. Its licensing board provides 12 types of liquor license applications, including Dining Room License, Cocktail Lounge Licence, Spectator Activities Licence, etc.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **regulating agency** and **rule-making authority** interchangeable (i.e., having the same meaning)?

Pair 1429

P1: A compromise was reached with the introduction of West Riding narrowboats, which were short enough to work through both systems. Near the basin is the oldest surviving warehouse in the country, dating from before 1778. Commercial traffic ceased in 1953, but the canal remained open, and has seen **increased traffic** since the re-opening of the Huddersfield Narrow Canal. Huddersfield Narrow Canal.

P2: A compromise was reached with the introduction of West Riding narrowboats, which were short enough to work through both systems. Near the basin is the oldest surviving warehouse in the country, dating from before 1778. Commercial traffic ceased in 1953, but the canal remained open, and has seen **more transit activity** since the re-opening of the Huddersfield Narrow Canal. Huddersfield Narrow Canal.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **increased traffic** and **more transit activity** interchangeable (i.e., having the same meaning)?

Pair 1430

P1: The Australian Football League (AFL) started in 1897 and was originally called the Victorian Football League until the name was changed in 1990 due to the expansion to the other Australian states. AFL is seen as an iconic Australian sport which attracts large crowds averaging **around 35,000 people** per game. It is a very popular industry to be in since there are so many different job positions and roles.

P2: The Australian Football League (AFL) started in 1897 and was originally called the Victorian Football League until the name was changed in 1990 due to the expansion to the other Australian states. AFL is seen as an iconic Australian sport which attracts large crowds averaging **almost 40,000 persons** per game. It is a very popular industry to be in since there are so many different job positions and roles.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **around 35,000 people** and **almost 40,000 persons** interchangeable (i.e., having the same meaning)?

Pair 1431

P1: Sand smuggling is a cross-border environmental crime which describes the illegal transportation of often illegally extracted natural sand and gravel. While sand smuggling and illegal mining are global concerns, they are especially acute in Asia, where continuing urbanization and the region's large construction boom are driving the increasing demand for sand. The negative consequences of excessive sand mining and smuggling, which are strongly connected, reach from environmental degradation to **geopolitical tension**. Illegal sand smuggling and extraction, despite the enormous importance of the resource, remain under-researched, and for the most part hidden threats because they are often happening in isolated places.

P2: Sand smuggling is a cross-border environmental crime which describes the illegal transportation of often illegally extracted natural sand and gravel. While sand smuggling and illegal mining are global concerns, they are especially acute in Asia, where continuing urbanization and the region's large construction boom are driving the increasing demand for sand. The negative consequences of excessive sand mining and smuggling, which are strongly connected, reach from environmental degradation to international conflict. Illegal sand smuggling and extraction, despite the enormous importance of the resource, remain under-researched, and for the most part hidden threats because they are often happening in isolated places.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **geopolitical tension** and **international conflict** interchangeable (i.e., having the same meaning)?

Pair 1432

P1: Eisenhower, a Republican, took office as president following his victory over Democrat Adlai Stevenson in the 1952 presidential election. John F. Kennedy succeeded him after winning the 1960 presidential election. Eisenhower held office during the Cold War, a period of **geopolitical tension** between the United States and the Soviet Union. Eisenhower's New Look policy stressed the importance of nuclear weapons as a deterrent to military threats, and the United States built up a stockpile of nuclear weapons and nuclear weapons delivery systems during Eisenhower's presidency.

P2: Eisenhower, a Republican, took office as president following his victory over Democrat Adlai Stevenson in the 1952 presidential election. John F. Kennedy succeeded him after winning the 1960 presidential election. Eisenhower held office during the Cold War, a period of **intergovernmental unrest** between the United States and the Soviet Union. Eisenhower's New Look policy stressed the importance of nuclear weapons as a deterrent to military threats, and the United States built up a stockpile of nuclear weapons and nuclear weapons delivery systems during Eisenhower's presidency.

Please record your answer for the following question in the provided Google sheet

Pair 1433

P1: He first appeared in "Telethon", where Leslie invited him to make a guest appearance on a 24-hour diabetes telethon. Tom picked him up from the airport, but first took him for a drink to the Snakehole Lounge, where Detlef proved so popular that bar owner Freddy would not let them leave. After Tom got drunk on **two light beers**, Detlef took him to the telethon, where he made his scheduled appearance. Detlef made another appearance in the third-season finale "Li'l Sebastian", where Tom and Jean-Ralphio hired him to work for their new entertainment company, Entertainment 720.

P2: He first appeared in "Telethon", where Leslie invited him to make a guest appearance on a 24-hour diabetes telethon. Tom picked him up from the airport, but first took him for a drink to the Snakehole Lounge, where Detlef proved so popular that bar owner Freddy would not let them leave. After Tom got drunk on **reduced-alcohol ales**, Detlef took him to the telethon, where he made his scheduled appearance. Detlef made another appearance in the third-season finale "Li'l Sebastian", where Tom and Jean-Ralphio hired him to work for their new entertainment company, Entertainment 720.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **two light beers** and **reduced-alcohol ales** interchangeable (i.e., having the same meaning)?

Pair 1434

P1: He immediately threw himself into the problems surrounding the succession to the possessions of Frederick II, both as German Emperor and as King of Sicily. In both cases, Innocent continued Pope Gregory IX's policy of opposition to the Hohenstaufen, supporting whatever opposition there could be found to that House. This papal stance embroiled Italy in **one conflict** after another for the next three decades. Innocent IV himself, following after the papal army which

was seeking to destroy Frederick's son Manfred, died in Naples on 7 December 1254.

P2: He immediately threw himself into the problems surrounding the succession to the possessions of Frederick II, both as German Emperor and as King of Sicily. In both cases, Innocent continued Pope Gregory IX's policy of opposition to the Hohenstaufen, supporting whatever opposition there could be found to that House. **This papal stance embroiled Italy in continuous skirmishes after another for the next three decades.** Innocent IV himself, following after the papal army which was seeking to destroy Frederick's son Manfred, died in Naples on 7 December 1254.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one conflict** and **continuous skirmishes** interchangeable (i.e., having the same meaning)?

Pair 1435

P1: Sell side analysts generally have a personal need for a good reputation, and if an analyst cares about their reputation he or she will try to report truthful information. However, analysts also have the desire to receive incentives to make positive recommendations because brokerage firms in and of themselves have internal conflicts of interest between differing departments such as trading, underwriting and sales. **one conflict of interest would be the need for an analyst to provide this research mentioned above, i.e.** research that is unbiased and reliable, which could lead to higher trading business for the firms for which the analysts work.

P2: Sell side analysts generally have a personal need for a good reputation, and if an analyst cares about their reputation he or she will try to report truthful information. However, analysts also have the desire to receive incentives to make positive recommendations because brokerage firms in and of themselves have internal conflicts of interest between differing departments such as trading, underwriting and sales. **an example of an obstacle of interest would be the need for an analyst to provide this research mentioned above, i.e.** research that is unbiased and reliable, which could lead to higher trading business for the firms for which the analysts work.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one conflict** and **an example of an obstacle** interchangeable (i.e., having the same meaning)?

Pair 1436

P1: Within the bounds of classical military technology, however, Roman arms and armor were developed, discarded, and adopted from other peoples based on changing methods of engagement. It included at various times stabbing daggers and swords, stabbing or thrusting swords, long thrusting spears or pikes, lances, light throwing javelins and darts, slings, and bow and arrows. **Roman military personal equipment was produced in large numbers to established patterns and used in an established way.** It, therefore, varied little in design and quality within each historical period.

P2: Within the bounds of classical military technology, however, Roman arms and armor were developed, discarded, and adopted from other peoples based on changing methods of engagement. It included at various times stabbing daggers and swords, stabbing or thrusting swords, long thrusting spears or pikes, lances, light throwing javelins and darts, slings, and bow and arrows. **Roman military personal equipment was produced in large numbers to established patterns and used in an accepted manner.** It, therefore, varied little in design and quality within each historical period.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **established way** and **accepted manner** interchangeable (i.e., having the same meaning)?

Pair 1437

P1: Among the most innovative responses has been Panzagar, which in Burmese means "flower speech", a campaign launched by blogger and activist Nay Phone Latt to openly oppose hate speech. The goal of the initiative was offering a joyful example of how people can interact, both online and offline. **Local activists have been focussed upon local solutions,**

rather than trying to mobilize **global civil society** on these issues. This is in contrast to some other online campaigns that have been able to attract the world's attention towards relatively neglected problems.

P2: Among the most innovative responses has been Panzagar, which in Burmese means "flower speech", a campaign launched by blogger and activist Nay Phone Latt to openly oppose hate speech. The goal of the initiative was offering a joyful example of how people can interact, both online and offline. **Local activists have been focussed upon local solutions, rather than trying to mobilize world at large** on these issues. This is in contrast to some other online campaigns that have been able to attract the world's attention towards relatively neglected problems.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **global civil society** and **world at large** interchangeable (i.e., having the same meaning)?

Pair 1438

P1: As well as a large part of the Surabaya northern and western suburbs, it includes the offshore Bawean Island, some 125 km to the north of Java and Madura. The regency's administrative centre is the town of Gresik, about 25 km to the northwest of Surabaya. **Gresik Regency (excluding Bawean Island) is also part of Gerbangkertosusila, the metropolitan region** of Surabaya. Etymology.

P2: As well as a large part of the Surabaya northern and western suburbs, it includes the offshore Bawean Island, some 125 km to the north of Java and Madura. The regency's administrative centre is the town of Gresik, about 25 km to the northwest of Surabaya. **Gresik Regency (excluding Bawean Island) is also part of Gerbangkertosusila, the urban area** of Surabaya. Etymology.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **metropolitan region** and **urban area** interchangeable (i.e., having the same meaning)?

Pair 1439

P1: A U.S. ambassador or member of the cabinet has participated in the Menorah lighting each year. In 2004, all 50 U.S. governors issued proclamations in honor of the National Menorah. **Scholars have cited this initiative as a prime factor** in Hanukkah becoming a widely celebrated festival. Dignitary kindlers.

P2: A U.S. ambassador or member of the cabinet has participated in the Menorah lighting each year. In 2004, all 50 U.S. governors issued proclamations in honor of the National Menorah. **Scholars have cited this initiative as a central criterion** in Hanukkah becoming a widely celebrated festival. Dignitary kindlers.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **prime factor** and **central criterion** interchangeable (i.e., having the same meaning)?

Pair 1440

P1: Today some 11% of the District's labour force is now involved with agriculture, forestry and fishing. Demography. **The Waimakariri District has a population of (as of The district has experienced a rapidly growing population that is predicted to continue to increase.** Despite rapid growth, Waimakariri has retained its rural/small town character and a high proportion of residents are involved in an extensive range of community and recreational organisations.

P2: Today some 11% of the District's labour force is now involved with agriculture, forestry and fishing. Demography. **The Waimakariri District has a population of (as of The district has experienced a fast expanding society that is predicted to continue to increase.** Despite rapid growth, Waimakariri has retained its rural/small town character and a high proportion of residents are involved in an extensive range of community and recreational organisations.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **rapidly growing population** and **fast expanding society** interchangeable (i.e., having the same meaning)?

Pair 1441

P1: However, the term "molecular assembler" usually refers to theoretical human-made devices. Beginning in 2007, the British Engineering and Physical Sciences Research Council has funded development of ribosome-like molecular assemblers. **Clearly, molecular assemblers are possible in this limited sense.** A technology roadmap project, led by the Battelle Memorial Institute and hosted by several U.S. National Laboratories has explored a range of atomically precise fabrication technologies, including both early-generation and longer-term prospects for programmable molecular assembly; the report was released in December, 2007.

P2: However, the term "molecular assembler" usually refers to theoretical human-made devices. Beginning in 2007, the British Engineering and Physical Sciences Research Council has funded development of ribosome-like molecular assemblers. **Clearly, molecular assemblers are possible in this narrow way.** A technology roadmap project, led by the Battelle Memorial Institute and hosted by several U.S. National Laboratories has explored a range of atomically precise fabrication technologies, including both early-generation and longer-term prospects for programmable molecular assembly; the report was released in December, 2007.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **limited sense** and **narrow way** interchangeable (i.e., having the same meaning)?

Pair 1442

P1: If a fourth rung of "engagement" is added, then the whole can be seen as a ladder, with each level from the foot upwards representing a decreasing concentration on military engagement. Whereas the purest form of tactics or engagement are those free of political imperative, the purest form of political policy does not involve military engagement. **Strategy as a whole is the connection between political policy and the use of force to achieve it.** Grand strategy.

P2: If a fourth rung of "engagement" is added, then the whole can be seen as a ladder, with each level from the foot upwards representing a decreasing concentration on military engagement. Whereas the purest form of tactics or engagement are those free of political imperative, the purest form of political policy does not involve military engagement. **Strategy as a whole is the connection between public strategy and the use of force to achieve it.** Grand strategy.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **political policy** and **public strategy** interchangeable (i.e., having the same meaning)?

Pair 1443

P1: Production was moved the next year to a facility in St. Louis, Missouri and then finally ended up in 1981 at the Bowling Green Assembly Plant. General Motors opened the Bowling Green plant for production on June 1 that year, with most of the 900 Corvette workers from St. Louis transferring to the new plant. **What was once an abandoned Chrysler industrial air-conditioning unit factory is now a 1.7 million square foot facility that employs almost one thousand people.** The factory was built by the Chrysler Airtemp Division as the area provided the potential for skilled workers due to the high quality vocational training.

P2: Production was moved the next year to a facility in St. Louis, Missouri and then finally ended up in 1981 at the Bowling Green Assembly Plant. General Motors opened the Bowling Green plant for production on June 1 that year, with most of the 900 Corvette workers from St. Louis transferring to the new plant. **What was once an abandoned Chrysler industrial air-conditioning unit factory is now a 1.7 million square foot facility that employs about one K individuals.** The factory was built by the Chrysler Airtemp Division as the area provided the potential for skilled workers due to the high quality vocational training.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **almost one thousand people** and **about one K individuals** interchangeable (i.e., having the same meaning)?

Pair 1444

P1: "Chaunax" have modified fins which resemble legs. It was also found that they use these modified pelvic fins to assist with maneuvering their swimming, especially when as an escape response. Sea toads are mostly sedentary fish, and rely on a more **opportunistic way** of hunting where they prey on anything within reach. The sensory canals of the lateral lines are especially conspicuous, and confers advantages in avoidance of predators and consumption of prey.

P2: "Chaunax" have modified fins which resemble legs. It was also found that they use these modified pelvic fins to assist with maneuvering their swimming, especially when as an escape response. Sea toads are mostly sedentary fish, and rely on a more **resourceful method** of hunting where they prey on anything within reach. The sensory canals of the lateral lines are especially conspicuous, and confers advantages in avoidance of predators and consumption of prey.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **opportunistic way** and **resourceful method** interchangeable (i.e., having the same meaning)?

Pair 1445

P1: Aside from the Indianapolis 500, USAC events were not well attended, and the owners felt that USAC poorly negotiated television rights. The owners also wanted increases in payouts, especially at Indy. Though some think the plane crash was used as an **opportunistic way** to force change in the sport, it was merely an unfortunate coincidence. The seed of dissent had been growing for several years before the accident, and claims the crash was an immediate cause for the 1979 CART/USAC "split" are considered for the most part unfounded.

P2: Aside from the Indianapolis 500, USAC events were not well attended, and the owners felt that USAC poorly negotiated television rights. The owners also wanted increases in payouts, especially at Indy. Though some think the plane crash was used as an **unscrupulous means** to force change in the sport, it was merely an unfortunate coincidence. The seed of dissent had been growing for several years before the accident, and claims the crash was an immediate cause for the 1979 CART/USAC "split" are considered for the most part unfounded.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **opportunistic way** and **unscrupulous means** interchangeable (i.e., having the same meaning)?

Pair 1446

P1: During the occupation, Bulgarian soldiers carried out executions repeatedly in Kruševac, along with armed Arnauts in German uniforms and members of the Dimitrije Ljotić's Serbian Volunteer Corps. Numbers. According to available documents and salvaged German documents about the shooting, **1,650 people** were executed in Kruševac during the entire occupation. The executions were carried out in the following order: Slobodište Memorial Complex.

P2: During the occupation, Bulgarian soldiers carried out executions repeatedly in Kruševac, along with armed Arnauts in German uniforms and members of the Dimitrije Ljotić's Serbian Volunteer Corps. Numbers. According to available documents and salvaged German documents about the shooting, **one and a half thousand persons** were executed in Kruševac during the entire occupation. The executions were carried out in the following order: Slobodište Memorial Complex.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **1,650 people** and **one and a half thousand persons** interchangeable (i.e., having the same meaning)?

Pair 1447

P1: The lithium batteries are fully charged in the morning because of overnight grid charging. A trip between the two boat points takes 15 minutes and it was estimated to need the energy of 5 kWh. Hence a total of 22 trips would be made daily transporting 1,650 people daily, or 580,000 people every year without burning fuel. Trips on average sunny day: 7:00 AM to 7:00 PM (running hours 5.5 hours).

P2: The lithium batteries are fully charged in the morning because of overnight grid charging. A trip between the two boat points takes 15 minutes and it was estimated to need the energy of 5 kWh. Hence a total of 22 trips would be made daily transporting 1.5 K individuals daily, or 580,000 people every year without burning fuel. Trips on average sunny day: 7:00 AM to 7:00 PM (running hours 5.5 hours).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are 1,650 people and 1.5 K individuals interchangeable (i.e., having the same meaning)?

Pair 1448

P1: Two doors lead to the balcony. On the North side of this space, is the most ornamented doorway of Georgian decoration which is flanked by a set of doric pilasters crowned by a cornice. The hung ceiling of the living room is detailed in a pentagonal pattern of thin wooden slats. The North doorway leads into the enclosed terrace whose back wall is angled in four sections.

P2: Two doors lead to the balcony. On the North side of this space, is the most ornamented doorway of Georgian decoration which is flanked by a set of doric pilasters crowned by a cornice. The hung ceiling of the living room is detailed in a multi-angled ornamentation of thin wooden slats. The North doorway leads into the enclosed terrace whose back wall is angled in four sections.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are pentagonal pattern and multi-angled ornamentation interchangeable (i.e., having the same meaning)?

Pair 1449

P1: During World War II, Operation Narcissus was a raid by forty members of the Special Air Service on a lighthouse on the southeast coast of Sicily. The team landed on 10 July 1943 with the mission of capturing the lighthouse and the surrounding high ground. Despite intelligence reports, the area was deserted, and so the position was no threat to the nearby Husky landings.

P2: During World War II, Operation Narcissus was a raid by forty members of the Special Air Service on a lighthouse on the southeast coast of Sicily. The team landed on 10 July 1943 with the mission of capturing the lighthouse and the proximate elevated area. Despite intelligence reports, the area was deserted, and so the position was no threat to the nearby Husky landings.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are surrounding high ground and proximate elevated area interchangeable (i.e., having the same meaning)?

Pair 1450

P1: Hinduism is the second-largest religion in Suriname. According to the 2012 census of Suriname, Hindus constitute 22.3% of the population. Suriname has the second largest percentage of Hindus in the Western Hemisphere, after Guyana (24.8%). Indigenous creeds and rituals are still practised in countries with large percentages of Amerindians,

such as Bolivia and Peru.

P2: Hinduism is the second-largest religion in Suriname. According to the 2012 census of Suriname, Hindus constitute 22.3% of the population. Suriname has the **almost greatest portion** of Hindus in the Western Hemisphere, after Guyana (24.8%). Indigenous creeds and rituals are still practised in countries with large percentages of Amerindians, such as Bolivia and Peru.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **second largest percentage** and **almost greatest portion** interchangeable (i.e., having the same meaning)?

Pair 1451

P1: There was only a slight change in the 2006 census, with the population increasing by 25 to 2,522. The eight strongest religious affiliations in the area (based on the 2006 census figures) were (in descending order): Anglican, Catholic, Uniting, Lutheran, Orthodox Christian, Buddhist, Presbyterian, Church of Christ and Baptist (a combination of other Christian faiths came in somewhere between Presbyterians and the Church of Christ, with 31 adherents). Also of note is the **high occurrence** of religious affiliation (67.3%) in the region in comparison to the Adelaide (and national) average. Christian belief (64.4%) is most prominent, with little growth in other religions.

P2: There was only a slight change in the 2006 census, with the population increasing by 25 to 2,522. The eight strongest religious affiliations in the area (based on the 2006 census figures) were (in descending order): Anglican, Catholic, Uniting, Lutheran, Orthodox Christian, Buddhist, Presbyterian, Church of Christ and Baptist (a combination of other Christian faiths came in somewhere between Presbyterians and the Church of Christ, with 31 adherents). Also of note is the **significant number of incidences** of religious affiliation (67.3%) in the region in comparison to the Adelaide (and national) average. Christian belief (64.4%) is most prominent, with little growth in other religions.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **high occurrence** and **significant number of incidences** interchangeable (i.e., having the same meaning)?

Pair 1452

P1: ", 2001). Apert syndrome. Patients with Apert syndrome have a **high occurrence** of middle ear disease, otitis media and conductive hearing loss (Perterson-Fazone "et al. ", 2001).

P2: ", 2001). Apert syndrome. Patients with Apert syndrome have a **heightened experience** of middle ear disease, otitis media and conductive hearing loss (Perterson-Fazone "et al. ", 2001).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **high occurrence** and **heightened experience** interchangeable (i.e., having the same meaning)?

Pair 1453

P1: By definition this means that all field trials are held on live, unhandled game that is shot for the purpose of that field trial. Game that has been handled in any way, whether it be live or dead game, may not be used for testing dogs in any part of a field trial. The only exception to this rule is where **dead game** may be used in the conduct of a water test at a field trial. The reason this exception exists is to acknowledge the fact that game will not necessarily be shot over water, although for dogs to qualify for titles in field trials will be required to demonstrate their ability to retrieve from water.

P2: By definition this means that all field trials are held on live, unhandled game that is shot for the purpose of that field trial. Game that has been handled in any way, whether it be live or dead game, may not be used for testing dogs in any part of a field trial. The only exception to this rule is where **expired prey** may be used in the conduct of a water test at

a field trial. The reason this exception exists is to acknowledge the fact that game will not necessarily be shot over water, although for dogs to qualify for titles in field trials will be required to demonstrate their ability to retrieve from water.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **dead game** and **expired prey** interchangeable (i.e., having the same meaning)?

Pair 1454

P1: In 1759, five complete regiments (the 15th to 19th) of Light Dragoons were formed, and the distinction was made between the light cavalry (Light Dragoon regiments) and the heavy cavalry (Dragoon and Dragoon Guard regiments). Henceforth, all newly raised regiments of cavalry would be denoted Light Dragoons. By 1783, the 7th to 14th Dragoons had become the 7th to 14th Light Dragoons, changing from heavy to **light roles**. The various troops of Horse Guards and Horse Grenadier Guards were regimented in 1788, forming the 1st Regiment of Life Guards and 2nd Regiment of Life Guards; together with the Royal Regiment of Horse Guards they formed the Household Cavalry.

P2: In 1759, five complete regiments (the 15th to 19th) of Light Dragoons were formed, and the distinction was made between the light cavalry (Light Dragoon regiments) and the heavy cavalry (Dragoon and Dragoon Guard regiments). Henceforth, all newly raised regiments of cavalry would be denoted Light Dragoons. By 1783, the 7th to 14th Dragoons had become the 7th to 14th Light Dragoons, changing from heavy to **sparsely armed positions**. The various troops of Horse Guards and Horse Grenadier Guards were regimented in 1788, forming the 1st Regiment of Life Guards and 2nd Regiment of Life Guards; together with the Royal Regiment of Horse Guards they formed the Household Cavalry.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **light roles** and **sparsely armed positions** interchangeable (i.e., having the same meaning)?

Pair 1455

P1: Differences of opinion here often involved several tens of metres. In addition, many cartographers prefer to show even small islands of trees, while others – depending on the scale of the map – prefer more general, continuous lines to demarcate the forest or woodland edges. For **specialised work**, aerial photographs or satellite imagery are frequently utilised without having to revise the maps. Cadastral maps cannot show the current situation because for reasons of cost they can only be updated at fairly long intervals and cultural boundaries are not legally binding.

P2: Differences of opinion here often involved several tens of metres. In addition, many cartographers prefer to show even small islands of trees, while others – depending on the scale of the map – prefer more general, continuous lines to demarcate the forest or woodland edges. For **especially skillful jobs**, aerial photographs or satellite imagery are frequently utilised without having to revise the maps. Cadastral maps cannot show the current situation because for reasons of cost they can only be updated at fairly long intervals and cultural boundaries are not legally binding.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **specialised work** and **especially skillful jobs** interchangeable (i.e., having the same meaning)?

Pair 1456

P1: In early 1883, Moore, thinking he was still in legal control of "Western Slope", launched a legal complaint with the inspector of steamboats claiming that "Rithet" was not sufficiently seaworthy to cross the Strait of Georgia. The witnesses in support of the complaint were all officers or crew of, or persons interested in "Western Slope". Despite this **biased evidence** the steamboat inspector concurred and forbade "Rithet" from crossing the Strait until such time as her seaworthiness was established. In response, Alexander Watson, builder of "R.P.

P2: In early 1883, Moore, thinking he was still in legal control of "Western Slope", launched a legal complaint with the inspector of steamboats claiming that "Rithet" was not sufficiently seaworthy to cross the Strait of Georgia. The witnesses in support of the complaint were all officers or crew of, or persons interested in "Western Slope". Despite this

partial proof the steamboat inspector concurred and forbade "Rithet" from crossing the Strait until such time as her seaworthiness was established. In response, Alexander Watson, builder of "R.P.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **biased evidence** and **partial proof** interchangeable (i.e., having the same meaning)?

Pair 1457

P1: In Arabic, personal pronouns have 12 forms. In singular and plural, the 2nd and 3rd persons have separate masculine and feminine forms, while the 1st person does not. In the dual, there is no **1st person**, and only a single form for each 2nd and 3rd person. Traditionally, the pronouns are listed in the order 3rd, 2nd, 1st.

P2: In Arabic, personal pronouns have 12 forms. In singular and plural, the 2nd and 3rd persons have separate masculine and feminine forms, while the 1st person does not. In the dual, there is no **autobiographical speaker**, and only a single form for each 2nd and 3rd person. Traditionally, the pronouns are listed in the order 3rd, 2nd, 1st.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **1st person** and **autobiographical speaker** interchangeable (i.e., having the same meaning)?

Pair 1458

P1: 900. In October 2011, Schaar became the 8th person in history to land a 900 on a skateboard. In September 2016, Schaar became the **1st person** in history to land a Stalefish 900 on a skateboard. 1080

P2: 900. In October 2011, Schaar became the 8th person in history to land a 900 on a skateboard. In September 2016, Schaar became the **foremost individual** in history to land a Stalefish 900 on a skateboard. 1080

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **1st person** and **foremost individual** interchangeable (i.e., having the same meaning)?

Pair 1459

P1: The Mechthild Esser Nemmers Prize in Medical Science, established in 2016, is awarded every other year by Northwestern University Feinberg School of Medicine. The recipient is "a physician-scientist whose body of research exhibits outstanding achievement in their discipline as demonstrated by works of **lasting significance**". The winner is determined by a jury of biomedical scientists and receives \$200,000.

P2: The Mechthild Esser Nemmers Prize in Medical Science, established in 2016, is awarded every other year by Northwestern University Feinberg School of Medicine. The recipient is "a physician-scientist whose body of research exhibits outstanding achievement in their discipline as demonstrated by works of **enduring consequence**". The winner is determined by a jury of biomedical scientists and receives \$200,000.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **lasting significance** and **enduring consequence** interchangeable (i.e., having the same meaning)?

Pair 1460

P1: Frederick Winslow Taylor is considered the father of scientific management. Taylor evolved from a simple floor worker to be the boss in a former company. He considered that the management techniques would determine the **best way** to divide the tasks inside an enterprise. The methods developed by Taylor began with experiments counting the time it

takes for a machine to produce an object.

P2: Frederick Winslow Taylor is considered the father of scientific management. Taylor evolved from a simple floor worker to be the boss in a former company. He considered that the management techniques would determine the optimal method to divide the tasks inside an enterprise. The methods developed by Taylor began with experiments counting the time it takes for a machine to produce an object.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are best way and optimal method interchangeable (i.e., having the same meaning)?

Pair 1461

P1: First, nociception is required. This is the ability to detect noxious stimuli which evoke a reflex response that rapidly moves the entire animal, or the affected part of its body, away from the source of the stimulus. The concept of nociception does not imply any adverse, subjective "feeling" it is a reflex action. An example in humans would be the rapid withdrawal of a finger that has touched something hot – the withdrawal occurs before any sensation of pain is actually experienced.

P2: First, nociception is required. This is the ability to detect noxious stimuli which evoke a reflex response that rapidly moves the entire animal, or the affected part of its body, away from the source of the stimulus. The concept of nociception does not imply any adverse, subjective "feeling" it is a mechanical motion. An example in humans would be the rapid withdrawal of a finger that has touched something hot – the withdrawal occurs before any sensation of pain is actually experienced.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are reflex action and mechanical motion interchangeable (i.e., having the same meaning)?

Pair 1462

P1: Thus, transit time is less. If the freight does not need the entire space of a truck, it is called LTL. On the other hand, the entire space of weight limit of a trailer is required for full truckload (FTL) shipments. Efficiency and productivity of the package can also be improved in truckload shipping.

P2: Thus, transit time is less. If the freight does not need the entire space of a truck, it is called LTL. On the other hand, the entire space of maximum poundage of a trailer is required for full truckload (FTL) shipments. Efficiency and productivity of the package can also be improved in truckload shipping.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are weight limit and maximum poundage interchangeable (i.e., having the same meaning)?

Pair 1463

P1: Spanish-language books. In 1984, Parker Brothers' "Tales from the Care Bears" made their appearance in Spain as the "Un Cuento de Los Osos Amorosos" series. The titles in this version were published by that country's division of General Mills, and translated from the original English by Leopoldo Rodríguez Regueira. In 1987, Montena D.L.

P2: Spanish-language books. In 1984, Parker Brothers' "Tales from the Care Bears" made their appearance in Spain as the "Un Cuento de Los Osos Amorosos" series. The titles in this version were published by that nation's splitting of General Mills, and translated from the original English by Leopoldo Rodríguez Regueira. In 1987, Montena D.L.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **country's division** and **nation's splitting** interchangeable (i.e., having the same meaning)?

Pair 1464

P1: In round twelve, Ali became confident after blocking several, though not all, of Inoki's kicks. Inoki then got up and landed a clean low kick, but this drew protests, as rules impeded him from kicking standing. **Ali's corner told him to capitalize and attack Inoki, but the latter immediately returned to safe ground, impeding further action.** When the round ended, Ali's left leg was so swollen that, according to reviewers, it "appeared to be double the size of the right."

P2: In round twelve, Ali became confident after blocking several, though not all, of Inoki's kicks. Inoki then got up and landed a clean low kick, but this drew protests, as rules impeded him from kicking standing. **Ali's corner told him to capitalize and attack Inoki, but the latter immediately returned to stable territory, impeding further action.** When the round ended, Ali's left leg was so swollen that, according to reviewers, it "appeared to be double the size of the right."

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **safe ground** and **stable territory** interchangeable (i.e., having the same meaning)?

Pair 1465

P1: Conversation openers in sales settings. In sales settings, conversation openers often are used to probe the subject for information. **Topic chosen are on 'safe ground' like 'the weather' or 'how was your journey to get here'.** This information can then be used in attempts to counter objections.

P2: Conversation openers in sales settings. In sales settings, conversation openers often are used to probe the subject for information. **Topic chosen are on 'inoffensive conversation landscape' like 'the weather' or 'how was your journey to get here'.** This information can then be used in attempts to counter objections.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **safe ground** and **inoffensive conversation landscape** interchangeable (i.e., having the same meaning)?

Pair 1466

P1: The phrase "bird watching" appeared for the first time as the title of the book "Bird Watching" by Edmund Selous in 1901. In North America, the identification of birds, once thought possible only by shooting was made possible by the emergence of optics and field identification guides. **The earliest field guide in the US was "Birds through an opera glass" (1889) by Florence Bailey.** Birding in North America was focused in the early and mid-20th century in the eastern seaboard region, and was influenced by the works of Ludlow Griscom and later Roger Tory Peterson.

P2: The phrase "bird watching" appeared for the first time as the title of the book "Bird Watching" by Edmund Selous in 1901. In North America, the identification of birds, once thought possible only by shooting was made possible by the emergence of optics and field identification guides. **The earliest field guide in the US was "Opera Glass" (1889) by Florence Bailey.** Birding in North America was focused in the early and mid-20th century in the eastern seaboard region, and was influenced by the works of Ludlow Griscom and later Roger Tory Peterson.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **opera glass** and **"Opera Glass"** interchangeable (i.e., having the same meaning)?

Pair 1467

P1: However, instead of any of them succeeding him, "Nəgusä Nəgäst" Menelik II partitioned the province into three parts and appointed his own governors over each part. Menelik thus effectively removed the sons of Tekle Haymanot

Tesemma from power in Gojjam. Around 1906, Menelik became incapacitated and "Itege" Taytu Betul became the "de facto" power behind the throne. In 1907, Tekle Haymanot Tesemma successfully used the influence of the Taytu Betul to be appointed "Shum" of Gojjam.

P2: However, instead of any of them succeeding him, "Nəgusä Nəgäst" Menelik II partitioned the province into three parts and appointed his own governors over each part. Menelik thus effectively removed the sons of Tekle Haymanot Tesemma from power in Gojjam. Around 1906, Menelik became incapacitated and "Itege" Taytu Betul became the effective ruler behind the throne. In 1907, Tekle Haymanot Tesemma successfully used the influence of the Taytu Betul to be appointed "Shum" of Gojjam.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are "de facto" power and effective ruler interchangeable (i.e., having the same meaning)?

Pair 1468

P1: The Third Worcestershire Local Transport Plan (LTP3) cited Worcestershire Parkway Regional Interchange as the top transport priority for Worcestershire. It was also listed in the West Midlands Regional Spatial Strategy as a Sub Regional Priority, and featured in Policy T6 - Strategic Park and Ride. A revised business case was submitted to the Department for Transport's Rail Office, who gave their formal support to the project in 2012. In July 2014 the station was given funding as part of a government infrastructure fund distributed to local enterprise partnerships.

P2: The Third Worcestershire Local Transport Plan (LTP3) cited Worcestershire Parkway Regional Interchange as the top transport priority for Worcestershire. It was also listed in the West Midlands Regional Spatial Strategy as a Sub Regional Priority, and featured in Policy T6 - Strategic Park and Ride. A revised business case was submitted to the Department for Transport's Rail Office, who gave their certified sanction to the project in 2012. In July 2014 the station was given funding as part of a government infrastructure fund distributed to local enterprise partnerships.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are formal support and certified sanction interchangeable (i.e., having the same meaning)?

Pair 1469

P1: Following the Albanian party congress Tirana became the main centre the pro-Chinese wing of PKI in exile, rather than Beijing. The dominant view is that neither the Chinese government nor the PKI wished that the party would be perceived as too closely linked to China. another key factor was that Tirana was geographically close to other hubs of exiled Indonesian student activists across Eastern Europe. Notably the PKI had opted not to condemn the Albanian party at the 1961 Congress of the Communist Party of the Soviet Union in Moscow.

P2: Following the Albanian party congress Tirana became the main centre the pro-Chinese wing of PKI in exile, rather than Beijing. The dominant view is that neither the Chinese government nor the PKI wished that the party would be perceived as too closely linked to China. a second principal concern was that Tirana was geographically close to other hubs of exiled Indonesian student activists across Eastern Europe. Notably the PKI had opted not to condemn the Albanian party at the 1961 Congress of the Communist Party of the Soviet Union in Moscow.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are another key factor and a second principal concern interchangeable (i.e., having the same meaning)?

Pair 1470

P1: He is the head portion of an American bison. He is voiced by Disney legend Thurl Ravenscroft. Max Max is the head portion of a whitetail buck and is voiced by Peter Renaday. Melvin – Melvin, a bull moose head, is of the animal

head trio.

P2: He is the head portion of an American bison. He is voiced by Disney legend Thurl Ravenscroft. **Max** Max is the **top half** of a whitetail buck and is voiced by Peter Renaday. Melvin – Melvin, a bull moose head, is of the animal head trio.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **head portion** and **top half** interchangeable (i.e., having the same meaning)?

Pair 1471

P1: In 1879, a large monument was erected in St John's churchyard in Stratford Broadway, to commemorate the 13 and others who were executed or tortured in Stratford during the persecutions. Designed by J T Newman, it consists of an ornate hexagonal column, capped with a 12-sided spire rising to a height of 65 feet. **one side** of the column carries a terra cotta plaque, sculpted in relief, based on the illustration of the martyrdom in Foxe's book. The other panels carry the names of the 13 martyrs, together with Elizabeth Warne (burnt 23 August 1555), Stephen Harwood (burnt 30 August 1555), Hugh Laverock and John Apprice (both burnt 15 May 1556).

P2: In 1879, a large monument was erected in St John's churchyard in Stratford Broadway, to commemorate the 13 and others who were executed or tortured in Stratford during the persecutions. Designed by J T Newman, it consists of an ornate hexagonal column, capped with a 12-sided spire rising to a height of 65 feet. **a single boundary** of the column carries a terra cotta plaque, sculpted in relief, based on the illustration of the martyrdom in Foxe's book. The other panels carry the names of the 13 martyrs, together with Elizabeth Warne (burnt 23 August 1555), Stephen Harwood (burnt 30 August 1555), Hugh Laverock and John Apprice (both burnt 15 May 1556).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one side** and **a single boundary** interchangeable (i.e., having the same meaning)?

Pair 1472

P1: The gymnasium had a stage at one end and could be converted into an auditorium by placing four thousand folding chairs on the gymnasium floor and another fifteen hundred in the balcony. When not set up as an auditorium, it provided an open space for basketball games, dances and other events. **The second floor provided space for locker rooms, a trophy room and a dance studio.** The Gym/Armory was home to the LSU Tigers basketball team after it moved from the old downtown campus.

P2: The gymnasium had a stage at one end and could be converted into an auditorium by placing four thousand folding chairs on the gymnasium floor and another fifteen hundred in the balcony. When not set up as an auditorium, it provided an open space for basketball games, dances and other events. **The second floor provided space for locker rooms, a prize chamber and a dance studio.** The Gym/Armory was home to the LSU Tigers basketball team after it moved from the old downtown campus.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **trophy room** and **prize chamber** interchangeable (i.e., having the same meaning)?

Pair 1473

P1: The weight of the empty field pack is 8 pounds. The field pack has two major sections; the sleeping bag compartment, and the main compartment. **The main compartment has a false bottom that may be opened for full use of the field pack when a sleeping bag is not carried.** The outside of the field pack has one long tunneled pocket and two smaller cargo pockets, all using compression straps for securing contents.

P2: The weight of the empty field pack is 8 pounds. The field pack has two major sections; the sleeping bag compartment, and the main compartment. **The main compartment has a false bottom that may be opened for total employment of the field pack when a sleeping bag is not carried.** The outside of the field pack has one long tunneled pocket and two

smaller cargo pockets, all using compression straps for securing contents.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **full use** and **total employment** interchangeable (i.e., having the same meaning)?

Pair 1474

P1: Variations on the division between public and private property use can be found throughout the world. While the bundle of rights concept is strongly rooted in common law, there are comparable ideas in civil law systems and religious law systems. National, sub-national, and municipal laws strongly influence what title owners can do with their property in terms of **physical development**. Quasi-governmental bodies (such as utility companies) are also permitted to create easements across private property.

P2: Variations on the division between public and private property use can be found throughout the world. While the bundle of rights concept is strongly rooted in common law, there are comparable ideas in civil law systems and religious law systems. National, sub-national, and municipal laws strongly influence what title owners can do with their property in terms of **natural enhancement**. Quasi-governmental bodies (such as utility companies) are also permitted to create easements across private property.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **physical development** and **natural enhancement** interchangeable (i.e., having the same meaning)?

Pair 1475

P1: Between 1747 and 1751 a Cour d'honneur in U shape was built to the eastern side of the Renaissance building, which contained: the riding school, the stable, the carriage rooms and servants' quarters. An important achievement was the castle's park near the Someş (Szamos) River, with walkways, statues and fountains. In the integrative concept specific to Baroque art, the residence and the environment were in a relationship of **close interdependence** and mutual influence. Based on this concept, the park of 70 ha was set up after the design of architect Johann Christian Erras, which transposed into this space forms dominated by a strict geometry.

P2: Between 1747 and 1751 a Cour d'honneur in U shape was built to the eastern side of the Renaissance building, which contained: the riding school, the stable, the carriage rooms and servants' quarters. An important achievement was the castle's park near the Someş (Szamos) River, with walkways, statues and fountains. In the integrative concept specific to Baroque art, the residence and the environment were in a relationship of **intimate symbiosis** and mutual influence. Based on this concept, the park of 70 ha was set up after the design of architect Johann Christian Erras, which transposed into this space forms dominated by a strict geometry.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **close interdependence** and **intimate symbiosis** interchangeable (i.e., having the same meaning)?

Pair 1476

P1: Minneapolis finals. The Minneapolis Finals replaced the Floating Steps with the Archer Steps and replaced the Ring Jump with the Sky Hooks. One new obstacle was added to the **back half**, the Hinge. National Finals.

P2: Minneapolis finals. The Minneapolis Finals replaced the Floating Steps with the Archer Steps and replaced the Ring Jump with the Sky Hooks. One new obstacle was added to the **posterior section**, the Hinge. National Finals.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **back half** and **posterior section** interchangeable (i.e., having the same meaning)?

Pair 1477

P1: Eighty-five percent of the total cultivation in northeast India is by shifting cultivation. Due to the increasing requirement for cultivation of land, the cycle of cultivation followed by leaving land fallow has reduced from 25–30 years to 2–3 years. **This significant drop in uncultivated land does not give the land enough time to return to its natural condition.** Because of this, the resilience of the ecosystem has broken down and the land is increasingly deteriorating.. =Shifting cultivation in Odisha= Odisha accounts for the largest area under shifting cultivation in India.

P2: Eighty-five percent of the total cultivation in northeast India is by shifting cultivation. Due to the increasing requirement for cultivation of land, the cycle of cultivation followed by leaving land fallow has reduced from 25–30 years to 2–3 years. **This significant drop in untamed ground does not give the land enough time to return to its natural condition.** Because of this, the resilience of the ecosystem has broken down and the land is increasingly deteriorating.. =Shifting cultivation in Odisha= Odisha accounts for the largest area under shifting cultivation in India.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **uncultivated land** and **untamed ground** interchangeable (i.e., having the same meaning)?

Pair 1478

P1: There is only one building in the entire town (not including the outhouse), and this was a grocery store built in 1912. It was later sold to Helen and Roy Tuttle in 1982, who created a restaurant that serves their famous Moonburger. **one feature** is that the store/restaurant has a guest-book with visitors from all 50 states and around the world. During the 2011 Terry Hammond Memorial Moonshine Luncheon, held on April 9, 2011, a new record of 2068 burgers were served.

P2: There is only one building in the entire town (not including the outhouse), and this was a grocery store built in 1912. It was later sold to Helen and Roy Tuttle in 1982, who created a restaurant that serves their famous Moonburger. **a significant detail** is that the store/restaurant has a guest-book with visitors from all 50 states and around the world. During the 2011 Terry Hammond Memorial Moonshine Luncheon, held on April 9, 2011, a new record of 2068 burgers were served.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one feature** and **a significant detail** interchangeable (i.e., having the same meaning)?

Pair 1479

P1: Note that almost no other USB floppy drives supported Mac GCR floppies. The biggest hurdle standing in the way of success was that Iomega's Zip drive had been out for three years when SuperDisk had been released. **Zip had enough popularity to leave the public mostly uninterested in SuperDisk, despite its superior design and its compatibility with the standard floppy disk.** By 2000, the entire removable magnetic disk category was finally obsolete by the falling prices of CD-R and CD-RW drives, and later on solid-state (USB flash drives or USB keydrives).

P2: Note that almost no other USB floppy drives supported Mac GCR floppies. The biggest hurdle standing in the way of success was that Iomega's Zip drive had been out for three years when SuperDisk had been released. **Zip had enough popularity to leave the public mostly uninterested in SuperDisk, despite its more advanced blueprint and its compatibility with the standard floppy disk.** By 2000, the entire removable magnetic disk category was finally obsolete by the falling prices of CD-R and CD-RW drives, and later on solid-state (USB flash drives or USB keydrives).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **superior design** and **more advanced blueprint** interchangeable (i.e., having the same meaning)?

Pair 1480

P1: Another variation is when the fist is raised in the air then pumped up and down, or punched in a circular boxing motion. It is commonly seen in sporting events after a success, such as scoring a difficult goal. **Though the fist pump is commonly used in the sporting world it is also seen in broader culture.** The television show "Jersey Shore" has been credited as helping to popularize an Italian-American influenced bro culture dubbed 'fist pumping culture', characterized by "wolfish males—sometimes hunting in packs—getting ripped at the gym and making sure their haircuts and outfits are optimized for maximum courting potential".

P2: Another variation is when the fist is raised in the air then pumped up and down, or punched in a circular boxing motion. It is commonly seen in sporting events after a success, such as scoring a difficult goal. **Though the fist pump is commonly used in the physical-competition arena it is also seen in broader culture.** The television show "Jersey Shore" has been credited as helping to popularize an Italian-American influenced bro culture dubbed 'fist pumping culture', characterized by "wolfish males—sometimes hunting in packs—getting ripped at the gym and making sure their haircuts and outfits are optimized for maximum courting potential".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **sporting world** and **physical-competition arena** interchangeable (i.e., having the same meaning)?

Pair 1481

P1: In 2003 a star witness of Schrunk's ended up imprisoned himself, in a bizarre and complex case regarded as a blemish on Schrunk's record. By 2009, Schrunk was regarded as the most influential politician in the county. **That power was exemplified by his open refusal to try cases against a specific judge he believed was too sympathetic to suspects.** In 2010, due to budget constraints, he made a controversial decision to treat a number of illegal acts as crimes.

P2: In 2003 a star witness of Schrunk's ended up imprisoned himself, in a bizarre and complex case regarded as a blemish on Schrunk's record. By 2009, Schrunk was regarded as the most influential politician in the county. **That power was exemplified by his open refusal to try cases against a certain jurist he believed was too sympathetic to suspects.** In 2010, due to budget constraints, he made a controversial decision to treat a number of illegal acts as crimes.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **specific judge** and **certain jurist** interchangeable (i.e., having the same meaning)?

Pair 1482

P1: Based on the very long experience in executing the selection of new admissions through written examination, in 2013, MRPTNI held a written test as one form of admission to PTN in addition to SNMPTN. This test put forward the principle of trust and togetherness is called "Seleksi Bersama Masuk Perguruan Tinggi Negeri" (SBMPTN). **Written exams use test questions developed in such way that meet the requirements for validity, difficulty level, and sufficient distinguishing features.** The written exam of SBMPTN is designed to measure the general capabilities that allegedly determine the success of prospective students in all courses, namely higher-order thinking, which includes academic potential, mastery of basic subject areas: the field of "Saintek" ("Sains dan Teknologi", Science and Technology) or "Soshum" ("Sosial dan Humaniora", Social and Humanities) fields.

P2: Based on the very long experience in executing the selection of new admissions through written examination, in 2013, MRPTNI held a written test as one form of admission to PTN in addition to SNMPTN. This test put forward the principle of trust and togetherness is called "Seleksi Bersama Masuk Perguruan Tinggi Negeri" (SBMPTN). **Written exams use examination queries developed in such way that meet the requirements for validity, difficulty level, and sufficient distinguishing features.** The written exam of SBMPTN is designed to measure the general capabilities that allegedly determine the success of prospective students in all courses, namely higher-order thinking, which includes academic potential, mastery of basic subject areas: the field of "Saintek" ("Sains dan Teknologi", Science and Technology) or "Soshum" ("Sosial dan Humaniora", Social and Humanities) fields.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **test questions** and **examination queries** interchangeable (i.e., having the same

meaning)?

Pair 1483

P1: A pupil breathes in and out of the middle tube. The glass tubing is arranged in such a way that one flask bubbles as the pupils breathes in, the other as the pupil breathes out. A suitable carbon dioxide indicator, such as limewater or bicarbonate indicator shows the **increased presence** of carbon dioxide in the outgoing breath. This turns the bicarbonate into milky white substance.

P2: A pupil breathes in and out of the middle tube. The glass tubing is arranged in such a way that one flask bubbles as the pupils breathes in, the other as the pupil breathes out. A suitable carbon dioxide indicator, such as limewater or bicarbonate indicator shows the **enhanced existence** of carbon dioxide in the outgoing breath. This turns the bicarbonate into milky white substance.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **increased presence** and **enhanced existence** interchangeable (i.e., having the same meaning)?

Pair 1484

P1: In 1702 Many towns and villages were founded. All the smaller villages were merged. After giving a **proper shape** to his kingdom, he encouraged people to settle and thus facilitated trade & Commerce. His rule epitomizes an era of great reforms.

P2: In 1702 Many towns and villages were founded. All the smaller villages were merged. After giving a **suitable form** to his kingdom, he encouraged people to settle and thus facilitated trade & Commerce. His rule epitomizes an era of great reforms.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **proper shape** and **suitable form** interchangeable (i.e., having the same meaning)?

Pair 1485

P1: Armilos is described as bald having a leprous forehead and small eyes. Midrash. Messiah ben Joseph has an **established place** in the apocalypses of later centuries and in the midrash literature. The event surrounding Messiah ben Joseph's death vary.

P2: Armilos is described as bald having a leprous forehead and small eyes. Midrash. Messiah ben Joseph has an **accepted space** in the apocalypses of later centuries and in the midrash literature. The event surrounding Messiah ben Joseph's death vary.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **established place** and **accepted space** interchangeable (i.e., having the same meaning)?

Pair 1486

P1: In fact, Amr himself was the "discoverer" of Mahmoud Karim, another Egyptian squash player who dominated the British Open in the postwar period. Karim recalled in a 1965 interview how he had been secretly practicing squash when he was young at the Gezira Sporting Club, where he worked as a ball boy. When Amr, a **club member**, once saw him using his racket without permission, he reprimanded him. After Karim stated he liked the game, Amr was eager to show him that "squash was only for blue bloods and rich people" and thus challenged him to play with him.

P2: In fact, Amr himself was the "discoverer" of Mahmoud Karim, another Egyptian squash player who dominated the British Open in the postwar period. Karim recalled in a 1965 interview how he had been secretly practicing squash when he was young at the Gezira Sporting Club, where he worked as a ball boy. **When Amr, a coalition associate, once saw him using his racket without permission, he reprimanded him.** After Karim stated he liked the game, Amr was eager to show him that "squash was only for blue bloods and rich people" and thus challenged him to play with him.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **club member** and **coalition associate** interchangeable (i.e., having the same meaning)?

Pair 1487

P1: On 26 October 2014, the newly-elected Indonesian President Joko Widodo named him as the 37th Minister of Transportation. However, on 27 July 2016, President Joko Widodo terminated him in a cabinet reshuffle. **In response to the reshuffle, Ignasius Jonan, with a flat face, said, "I will come back".** On 14 October 2016 the president appointed Ignasius Jonan again, but now as Minister of Energy and Mineral Resources with Arcandra Tahar as his deputy.

P2: On 26 October 2014, the newly-elected Indonesian President Joko Widodo named him as the 37th Minister of Transportation. However, on 27 July 2016, President Joko Widodo terminated him in a cabinet reshuffle. **In response to the reshuffle, Ignasius Jonan, with a straight look, said, "I will come back".** On 14 October 2016 the president appointed Ignasius Jonan again, but now as Minister of Energy and Mineral Resources with Arcandra Tahar as his deputy.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **flat face** and **straight look** interchangeable (i.e., having the same meaning)?

Pair 1488

P1: Newspapers. Most National newspapers in the UK employ a tipster or columnist who provides horse racing tips. **Rather than pick a tip for each race that occurs on a given day the normal protocol is to provide a Nap and nb selection.** Nap (derived from the card game Napoleon) indicates this is the tipster's most confident selection of the day.

P2: Newspapers. Most National newspapers in the UK employ a tipster or columnist who provides horse racing tips. **Rather than pick a tip for each race that occurs on a given day the routine practice is to provide a Nap and nb selection.** Nap (derived from the card game Napoleon) indicates this is the tipster's most confident selection of the day.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **normal protocol** and **routine practice** interchangeable (i.e., having the same meaning)?

Pair 1489

P1: He immediately asks for schnapps and is chastised by wife, who is no longer sympathetic. The court which had sentenced him to hang in jest, then pardons him, and he is taken down from the gallows. He is given a significant sum of money by the magistrate. **The true nature of the events are finally revealed to Jeppe by Magnus.** Jeppe is much humiliated and becomes the laughingstock of the village.

P2: He immediately asks for schnapps and is chastised by wife, who is no longer sympathetic. The court which had sentenced him to hang in jest, then pardons him, and he is taken down from the gallows. He is given a significant sum of money by the magistrate. **The accurate depiction of the events are finally revealed to Jeppe by Magnus.** Jeppe is much humiliated and becomes the laughingstock of the village.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **true nature** and **accurate depiction** interchangeable (i.e., having the same meaning)?

Pair 1490

P1: Reviews concluded that there is no strong evidence to recommend changes to the diets of pregnant or nursing women as a means of preventing the development of food allergy in their infants. For mothers of infants considered at high risk of developing cow's milk allergy because of a family history, there is some evidence that the nursing mother avoiding allergens may reduce risk of the child developing eczema, but a Cochrane review concluded that more research is needed. **Guidelines from various government and international organizations recommend that for the lowest allergy risk, infants be exclusively breastfed for 4–6 months.** There does not appear to be any benefit to extending that period beyond six months.

P2: Reviews concluded that there is no strong evidence to recommend changes to the diets of pregnant or nursing women as a means of preventing the development of food allergy in their infants. For mothers of infants considered at high risk of developing cow's milk allergy because of a family history, there is some evidence that the nursing mother avoiding allergens may reduce risk of the child developing eczema, but a Cochrane review concluded that more research is needed. **Guidelines from multiple political and international organizations recommend that for the lowest allergy risk, infants be exclusively breastfed for 4–6 months.** There does not appear to be any benefit to extending that period beyond six months.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **various government** and **multiple political** interchangeable (i.e., having the same meaning)?

Pair 1491

P1: It may be voluntary, within the competency of one to remove. Moralists distinguish between a proximate occasion which is continuous and one which, whilst it is unquestionably proximate, yet confronts a person only at intervals. **Someone who is in the presence of a proximate occasion at once voluntary and continuous is bound to remove it.** In confession, a refusal on the part of a penitent to do so would make it imperative for the confessor to deny absolution.

P2: It may be voluntary, within the competency of one to remove. Moralists distinguish between a proximate occasion which is continuous and one which, whilst it is unquestionably proximate, yet confronts a person only at intervals. **Someone who is in the presence of a forthcoming instance at once voluntary and continuous is bound to remove it.** In confession, a refusal on the part of a penitent to do so would make it imperative for the confessor to deny absolution.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **proximate occasion** and **forthcoming instance** interchangeable (i.e., having the same meaning)?

Pair 1492

P1: It is clear through the poem that Yeats admires this and wishes for a return to the less egotistical and self-driven politics of a bygone era. Yeats does, however, appear to question whether these great historical figures, whom he admired and previously emulated in the style of his earlier work, are comprehensive in their understanding of the world in which they lived. **"September 1913" functions also as an iconic example of Yeats's own fidelity to the literary traditions of the 19th century British Romantic poets.** A devoted reader of both William Blake and Percy Shelley, Yeats' repetition of the phrase "Romantic Ireland" connects the politically motivated ideals of the Romantics "to an Irish national landscape."

P2: It is clear through the poem that Yeats admires this and wishes for a return to the less egotistical and self-driven politics of a bygone era. Yeats does, however, appear to question whether these great historical figures, whom he admired and previously emulated in the style of his earlier work, are comprehensive in their understanding of the world in which they lived. **"September 1913" functions also as an archetypal instance of Yeats's own fidelity to the literary traditions of the 19th century British Romantic poets.** A devoted reader of both William Blake and Percy Shelley, Yeats' repetition of the phrase "Romantic Ireland" connects the politically motivated ideals of the Romantics "to an Irish national landscape."

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **iconic example** and **archetypal instance** interchangeable (i.e., having the same meaning)?

Pair 1493

P1: Body weight and hormones. When it comes to body weight and hormones, it is dependent on a female's family background and what changes she can expect while she goes through puberty. **Fat distribution in women is at its highest from their early teens to late middle age.** Sex hormones play an important role in specific regions of the body helping with the regulation and accumulation of fat.

P2: Body weight and hormones. When it comes to body weight and hormones, it is dependent on a female's family background and what changes she can expect while she goes through puberty. **Fat distribution in women is at its highest from their early teens to past 40 years old.** Sex hormones play an important role in specific regions of the body helping with the regulation and accumulation of fat.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **late middle age** and **past 40 years old** interchangeable (i.e., having the same meaning)?

Pair 1494

P1: Kolt Church consists of Romanesque apse, chancel and nave with two late-Medieval additions: the porch in the south and the tower in the west. The Romanesque sections are built of rough and hewn granite boulders on a chamfered base; ashlar were used in the corners and around the windows and doors. **Gothic vaults were included in the chancel and nave in the late middle age.** In the masonry of the tower a quantity of re-used granite ashlar is included which may have been brought here from a demolished church.

P2: Kolt Church consists of Romanesque apse, chancel and nave with two late-Medieval additions: the porch in the south and the tower in the west. The Romanesque sections are built of rough and hewn granite boulders on a chamfered base; ashlar were used in the corners and around the windows and doors. **Gothic vaults were included in the chancel and nave in the end of medieval times.** In the masonry of the tower a quantity of re-used granite ashlar is included which may have been brought here from a demolished church.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **late middle age** and **end of medieval times** interchangeable (i.e., having the same meaning)?

Pair 1495

P1: Enrico Fermi built the first nuclear reactor (Chicago Pile-1) in an abandoned squash court at the University of Chicago. He ran the historic experiment for 28 minutes. **In April 2009 artist Matthew Day Jackson invited Olivia to participate in a ceremonial game of squash.** Jackson and the younger Fermi's game tied "the physics of a squash ball to the physics of the first nuclear reactor"; was filmed in Los Alamos, New Mexico and displayed in a 28-minute video loop at the M.I.T.

P2: Enrico Fermi built the first nuclear reactor (Chicago Pile-1) in an abandoned squash court at the University of Chicago. He ran the historic experiment for 28 minutes. **In April 2009 artist Matthew Day Jackson invited Olivia to participate in a commemorative match of squash.** Jackson and the younger Fermi's game tied "the physics of a squash ball to the physics of the first nuclear reactor"; was filmed in Los Alamos, New Mexico and displayed in a 28-minute video loop at the M.I.T.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **ceremonial game** and **commemorative match** interchangeable (i.e., having the same meaning)?

Pair 1496

P1: The answer seemed to be their new record signing from Watford, the Welsh international Iwan Roberts, signed for £275,000. In the early part of the season however, he only managed 3 goals in the first 13 league games, which actually made him Town's top scorer at the time along with Keith Edwards. **But despite this, Town kept producing wins on a regular period and many still thought that the play-offs at least were still a realistic possibility.** Between November and March, Town were on a very impressive run of only 5 losses in 26 games, including 12 wins.

P2: The answer seemed to be their new record signing from Watford, the Welsh international Iwan Roberts, signed for £275,000. In the early part of the season however, he only managed 3 goals in the first 13 league games, which actually made him Town's top scorer at the time along with Keith Edwards. **But despite this, Town kept producing wins on a consistent basis and many still thought that the play-offs at least were still a realistic possibility.** Between November and March, Town were on a very impressive run of only 5 losses in 26 games, including 12 wins.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **regular period** and **consistent basis** interchangeable (i.e., having the same meaning)?

Pair 1497

P1: The North Carolina Department of Transportation announced the completion of the Charlotte portion of the Little Sugar Creek Greenway at a celebration on April 24, 2012. Finished sections. **The completed part of the Little Sugar Creek Greenway can be divided into four sections going downstream from north to south.** Reviews.

P2: The North Carolina Department of Transportation announced the completion of the Charlotte portion of the Little Sugar Creek Greenway at a celebration on April 24, 2012. Finished sections. **The fully-constructed section of the Little Sugar Creek Greenway can be divided into four sections going downstream from north to south.** Reviews.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **completed part** and **fully-constructed section** interchangeable (i.e., having the same meaning)?

Pair 1498

P1: SR 149 begins at an interchange with SR 7 in Bellaire, just west of the Ohio River. The route heads west on 26th Street through Bellaire paralleling the McMahan Creek. **Shortly after leaving Bellaire, the route passes through a large cut as the creek bends to the south briefly.** As the route heads west along the creek, SR 149 passes through several unincorporated communities including Neffs and Glencoe.

P2: SR 149 begins at an interchange with SR 7 in Bellaire, just west of the Ohio River. The route heads west on 26th Street through Bellaire paralleling the McMahan Creek. **Shortly after leaving Bellaire, the route passes through a significant section as the creek bends to the south briefly.** As the route heads west along the creek, SR 149 passes through several unincorporated communities including Neffs and Glencoe.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **large cut** and **significant section** interchangeable (i.e., having the same meaning)?

Pair 1499

P1: During each level the player controls units called villagers. They have a stage based life cycle; from birth they go to childhood to a working adult after which comes their retirement and then eventually death. **There are some special tasks that can be performed by all the villagers, including children, adults and old age people of both genders.** There are also certain skills or tasks that can only be done by adults.

P2: During each level the player controls units called villagers. They have a stage based life cycle; from birth they go to childhood to a working adult after which comes their retirement and then eventually death. **There are some special**

tasks that can be performed by all the villagers, including children, adults and **infirm persons** of both genders. There are also certain skills or tasks that can only be done by adults.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **old age people** and **infirm persons** interchangeable (i.e., having the same meaning)?

Pair 1500

P1: There are no active and effective policies and programs to mainstream aging population in national, social and political discourse in Nepal. About 9% of the total population accounts for 60+ populations and the number is projected to be around 20% by 2050. **The decline in fertility rate and increased life expectancy is the main cause for the increased number of old age people in Nepal.** An increase in the number of aged people and availability of no healthcare services in a developing country like Nepal, aging could be a matter of challenge.

P2: There are no active and effective policies and programs to mainstream aging population in national, social and political discourse in Nepal. About 9% of the total population accounts for 60+ populations and the number is projected to be around 20% by 2050. **The decline in fertility rate and increased life expectancy is the main cause for the increased number of mature population in Nepal.** An increase in the number of aged people and availability of no healthcare services in a developing country like Nepal, aging could be a matter of challenge.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **old age people** and **mature population** interchangeable (i.e., having the same meaning)?

Pair 1501

P1: Origins and insertions. Four of the extraocular muscles have their origin in the back of the orbit in a fibrous ring called the annulus of Zinn: the four rectus muscles. **The four rectus muscles attach directly to the front half of the eye (anterior to the eye's equator),** and are named after their straight paths. Note that medial and lateral are relative terms.

P2: Origins and insertions. Four of the extraocular muscles have their origin in the back of the orbit in a fibrous ring called the annulus of Zinn: the four rectus muscles. **The four rectus muscles attach directly to the foremost part of the eye (anterior to the eye's equator),** and are named after their straight paths. Note that medial and lateral are relative terms.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **front half** and **foremost part** interchangeable (i.e., having the same meaning)?

Pair 1502

P1: Heritage Bank is currently Headquartered in Heritage Plaza Tower, located at 400 Ruthven St, Toowoomba, Queensland, Australia. Heritage Plaza Tower, built in 1983, was the first high-rise office building in Toowoomba. **The building houses Heritage Bank's various departments and contact centre and has a branch on the ground floor.** Heritage Plaza Tower is the workplace for approximately 400 Heritage staff.

P2: Heritage Bank is currently Headquartered in Heritage Plaza Tower, located at 400 Ruthven St, Toowoomba, Queensland, Australia. Heritage Plaza Tower, built in 1983, was the first high-rise office building in Toowoomba. **The building houses Heritage Bank's various departments and communication office and has a branch on the ground floor.** Heritage Plaza Tower is the workplace for approximately 400 Heritage staff.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **contact centre** and **communication office** interchangeable (i.e., having the same meaning)?

Pair 1503

P1: Some of the notable urban amenities located in the Sa'adat Abad district are Tehran's luxurious 5-star Espinas palace hotel, Arikeh Iranian shopping centre, Aren shopping centre, Sadaf shopping mall, Zeytoon sports complex, Tehran Jurassic park, Saadat Abad Park, Parvaz garden, Erfan hospital, Atieh hospital and Parsian hospital. Because of its location in the northern Tehran and its proximity to the Alborz mountains, Sa'adat Abad district is known to have better air quality and lower levels of air pollution. Located in Sa'adat Abad is the Tehran International School (**boys section**), located in Farhang square. The school has about two hundred students and is a registered IB (International Baccalaureate School).

P2: Some of the notable urban amenities located in the Sa'adat Abad district are Tehran's luxurious 5-star Espinas palace hotel, Arikeh Iranian shopping centre, Aren shopping centre, Sadaf shopping mall, Zeytoon sports complex, Tehran Jurassic park, Saadat Abad Park, Parvaz garden, Erfan hospital, Atieh hospital and Parsian hospital. Because of its location in the northern Tehran and its proximity to the Alborz mountains, Sa'adat Abad district is known to have better air quality and lower levels of air pollution. Located in Sa'adat Abad is the Tehran International School (**lads' division**), located in Farhang square. The school has about two hundred students and is a registered IB (International Baccalaureate School).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **boys section** and **lads' division** interchangeable (i.e., having the same meaning)?

Pair 1504

P1: When co-founder Hardy Martin and three other partners started IED (short for Innovative Electronic Designs), they chose Hopkins as one of their first voices. It was for the Typhoon Lagoon attraction at Disney World in Florida in 1989. Hopkins records all the **public address announcements** from her home studio in Hampden, Maine and sends them via email. Hopkins was named one of the 500 most important people in history by Mental Floss Magazine in December 2015.

P2: When co-founder Hardy Martin and three other partners started IED (short for Innovative Electronic Designs), they chose Hopkins as one of their first voices. It was for the Typhoon Lagoon attraction at Disney World in Florida in 1989. Hopkins records all the **PSA speeches** from her home studio in Hampden, Maine and sends them via email. Hopkins was named one of the 500 most important people in history by Mental Floss Magazine in December 2015.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **public address announcements** and **PSA speeches** interchangeable (i.e., having the same meaning)?

Pair 1505

P1: After the death of Torres García, he travelled extensively through Europe and Israel. While in Israel he stayed at the Ramot Menashe kibbutz, where his sister Myriam and his parents lived. In the kibbutz he worked as a shepherd and was asked to paint a mural for the **public dining room**. It was there that he came to grips with his Jewish ancestry and took part in what was the birth of the Jewish State.

P2: After the death of Torres García, he travelled extensively through Europe and Israel. While in Israel he stayed at the Ramot Menashe kibbutz, where his sister Myriam and his parents lived. In the kibbutz he worked as a shepherd and was asked to paint a mural for the **community eating hall**. It was there that he came to grips with his Jewish ancestry and took part in what was the birth of the Jewish State.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **public dining room** and **community eating hall** interchangeable (i.e., having the same meaning)?

Pair 1506

P1: Like other hummingbirds, fiery-tailed awlbills are completely independent, except for mating. They do not form flocks or have mates for life. The male will attempt to court a female by flying in a **u-shaped pattern** in front of her. Males will mate with several females (and vice versa), but will separate after copulation.

P2: Like other hummingbirds, fiery-tailed awlbills are completely independent, except for mating. They do not form flocks or have mates for life. The male will attempt to court a female by flying in a **arched fashion** in front of her. Males will mate with several females (and vice versa), but will separate after copulation.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **u-shaped pattern** and **arched fashion** interchangeable (i.e., having the same meaning)?

Pair 1507

P1: It is the only award at the NTAs that is not voted on by the general public. History. The Special Recognition Award has been given in **every ceremony** since the start of the NTAs with the exception of the 19th. The first recipient in 1995 was Julie Goodyear.

P2: It is the only award at the NTAs that is not voted on by the general public. History. The Special Recognition Award has been given in **all commemorations** since the start of the NTAs with the exception of the 19th. The first recipient in 1995 was Julie Goodyear.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **every ceremony** and **all commemorations** interchangeable (i.e., having the same meaning)?

Pair 1508

P1: Bargarh is popularly known for intensive cultivation of 'paddy', therefore called "Bhata Handi" of Odisha State. Geography. Bargarh is located in western odisha, close to the border of **neighboring state** of Chhattisgarh. It is positioned at with an average elevation of 171 meter (561 feet).

P2: Bargarh is popularly known for intensive cultivation of 'paddy', therefore called "Bhata Handi" of Odisha State. Geography. Bargarh is located in western odisha, close to the border of **adjacent nation** of Chhattisgarh. It is positioned at with an average elevation of 171 meter (561 feet).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **neighboring state** and **adjacent nation** interchangeable (i.e., having the same meaning)?

Pair 1509

P1: More modern ideas use sensors and networked parking meters that "bid up" (or down) the price of parking automatically with the goal of keeping 85–90% of the spaces in use at any given time to ensure perpetual parking availability. These ideas have been implemented in Redwood City, California and are being implemented in San Francisco and Los Angeles. **one empirical study** supports performance-based pricing by analyzing the block-level price elasticity of parking demand in the SFpark context. The study suggests that block-level elasticities vary so widely that urban planners and economists cannot accurately predict the response in parking demand to a given change in price.

P2: More modern ideas use sensors and networked parking meters that "bid up" (or down) the price of parking automatically with the goal of keeping 85–90% of the spaces in use at any given time to ensure perpetual parking availability. These ideas have been implemented in Redwood City, California and are being implemented in San Francisco and Los

Angeles. **a particular verifiable analysis** supports performance-based pricing by analyzing the block-level price elasticity of parking demand in the SFpark context. The study suggests that block-level elasticities vary so widely that urban planners and economists cannot accurately predict the response in parking demand to a given change in price.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one empirical study** and **a particular verifiable analysis** interchangeable (i.e., having the same meaning)?

Pair 1510

P1: The facility was previously known as the Arena AufSchalke and replaced the Parkstadion (capacity of 62,000) built in 1973. Prior to this, the club played its matches in the Glückauf-Kampfbahn, constructed in 1928 with a capacity of 35,000. **The facility was used for amateur matches during its later years with a reduced capacity of 5,000.** Fan culture.

P2: The facility was previously known as the Arena AufSchalke and replaced the Parkstadion (capacity of 62,000) built in 1973. Prior to this, the club played its matches in the Glückauf-Kampfbahn, constructed in 1928 with a capacity of 35,000. **The facility was used for amateur matches during its later years with a limited accommodation ability of 5,000.** Fan culture.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **reduced capacity** and **limited accommodation ability** interchangeable (i.e., having the same meaning)?

Pair 1511

P1: Senator Rockefeller, who had recently marshalled the MINER Act through the Senate to strengthen mine safety regulation, noted that Stickler had testified to Congress that he did not believe more legislation was necessary but rather that enforcement was an issue. Despite resistance from the Senate, and with the nomination being returned twice to his desk unaffirmed, President Bush later appointed Stickler as a recess appointment in October 2006. **The appointment, which was met by vocal criticism from members of the Senate - expired on December 31, 2007.** On January 4, 2008, President Bush again appointed Stickler as acting head of MSHA, and again renominated him to take the position on a permanent basis.

P2: Senator Rockefeller, who had recently marshalled the MINER Act through the Senate to strengthen mine safety regulation, noted that Stickler had testified to Congress that he did not believe more legislation was necessary but rather that enforcement was an issue. Despite resistance from the Senate, and with the nomination being returned twice to his desk unaffirmed, President Bush later appointed Stickler as a recess appointment in October 2006. **The appointment, which was met by outspoken reproval from members of the Senate - expired on December 31, 2007.** On January 4, 2008, President Bush again appointed Stickler as acting head of MSHA, and again renominated him to take the position on a permanent basis.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **vocal criticism** and **outspoken reproval** interchangeable (i.e., having the same meaning)?

Pair 1512

P1: Moreover, they also occupied the diamond mines in order to get access to funding and continued support of their actions. For example, during that time, RUF was mining up to \$125 million of diamonds yearly. **Since diamonds are used as a funding source, they also created opportunities for tax evasion and financial support of crime.** Therefore, United Nations Security Council imposed diamond sanctions in 2000, which were then lifted in 2003.

P2: Moreover, they also occupied the diamond mines in order to get access to funding and continued support of their actions. For example, during that time, RUF was mining up to \$125 million of diamonds yearly. **Since diamonds are used as a means of subsidizing, they also created opportunities for tax evasion and financial support of crime.** Therefore,

United Nations Security Council imposed diamond sanctions in 2000, which were then lifted in 2003.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **funding source** and **means of subsidizing** interchangeable (i.e., having the same meaning)?

Pair 1513

P1: In the return leg in Düsseldorf, both teams drew 2–2; Fortuna Düsseldorf won on aggregate 4–3. However, the match’s second half was marred by trouble, first after Hertha supports threw flares onto the pitch after Fortuna scored its second goal of the night to go up 2–1. **The other problem was when several Fortuna supporters ran onto the field with around one minute remaining in the match.** It took 21 minutes to restore order and stoppage time ended up being 28 minutes by the time the final whistle blew.

P2: In the return leg in Düsseldorf, both teams drew 2–2; Fortuna Düsseldorf won on aggregate 4–3. However, the match’s second half was marred by trouble, first after Hertha supports threw flares onto the pitch after Fortuna scored its second goal of the night to go up 2–1. **The other problem was when several Fortuna supporters ran onto the field with a matter of seconds remaining in the match.** It took 21 minutes to restore order and stoppage time ended up being 28 minutes by the time the final whistle blew.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **around one minute** and **a matter of seconds** interchangeable (i.e., having the same meaning)?

Pair 1514

P1: January 12, 1942, a prototype Primary School was opened using laboratories of Eddy’s experimental television station in the “Loop” of downtown Chicago. Initial students were admitted on the basis of prior radio experience, and were also tested against a draft of the Eddy Test. **The prototype school quickly evolved into an extensive operation called Radio Chicago; its functions included centralized grading all of the Eddy Tests.** A book was written by Eddy and his staff to prepare persons for taking the Eddy Test.

P2: January 12, 1942, a prototype Primary School was opened using laboratories of Eddy’s experimental television station in the “Loop” of downtown Chicago. Initial students were admitted on the basis of prior radio experience, and were also tested against a draft of the Eddy Test. **The prototype school quickly evolved into an elaborate system called Radio Chicago; its functions included centralized grading all of the Eddy Tests.** A book was written by Eddy and his staff to prepare persons for taking the Eddy Test.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **extensive operation** and **elaborate system** interchangeable (i.e., having the same meaning)?

Pair 1515

P1: They have been introduced, sometimes illegally, into environments worldwide, and are often considered an invasive species. Common carp are very hardy and can easily adapt to most conditions, though they prefer large bodies of slow or standing water and soft, vegetative sediments. **They can typically be found in small schools, although larger carp often lead a solitary existence.** They natively live in a temperate climate in fresh or brackish water with a 7.0 – 9.0 pH, and a temperature range of 35.0 – 85.0 °F.

P2: They have been introduced, sometimes illegally, into environments worldwide, and are often considered an invasive species. Common carp are very hardy and can easily adapt to most conditions, though they prefer large bodies of slow or standing water and soft, vegetative sediments. **They can typically be found in small schools, although larger carp often lead a solo presence.** They natively live in a temperate climate in fresh or brackish water with a 7.0 – 9.0 pH, and a

temperature range of 35.0 – 85.0 °F.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **solitary existence** and **solo presence** interchangeable (i.e., having the same meaning)?

Pair 1516

P1: Riser. A riser is a variation of the flat bar in which the outer sections of the bars rise from the center clamp area by about 15 to 50 mm. **Both flat and riser bars may be appended with bar ends, providing more hand positions.** Triathlon or aero bars.

P2: Riser. A riser is a variation of the flat bar in which the outer sections of the bars rise from the center clamp area by about 15 to 50 mm. **Both flat and riser bars may be appended with bar ends, providing more places to put your extremities.** Triathlon or aero bars.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **hand positions** and **places to put your extremities** interchangeable (i.e., having the same meaning)?

Pair 1517

P1: Major-General Andriamihaja most likely fathered the queen's only son, Prince Rakoto (later King Radama II), who was born eleven months after the death of his official father, King Radama I. In the early years of Ranavalona's reign, Andriamihaja was the leader of her court's progressive faction, who favored maintaining the relations with Europe initiated under Radama. **The conservative faction was led by the brothers Rainimaharo and Rainiharo, the latter being the official guardian** of one of the most powerful royal "sampy". These talismans were believed to embody and channel the supernatural powers of the kingship and had played a major role in the spiritual life of the Merina people since at least the 16th century reign of Ralambo.

P2: Major-General Andriamihaja most likely fathered the queen's only son, Prince Rakoto (later King Radama II), who was born eleven months after the death of his official father, King Radama I. In the early years of Ranavalona's reign, Andriamihaja was the leader of her court's progressive faction, who favored maintaining the relations with Europe initiated under Radama. **The conservative faction was led by the brothers Rainimaharo and Rainiharo, the latter being the formal minder** of one of the most powerful royal "sampy". These talismans were believed to embody and channel the supernatural powers of the kingship and had played a major role in the spiritual life of the Merina people since at least the 16th century reign of Ralambo.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **official guardian** and **formal minder** interchangeable (i.e., having the same meaning)?

Pair 1518

P1: While receiving the ball hitting and slaps are forbidden - the ball should be taken along the tangent trajectory and return to the opponent on a circular trajectory. It is also forbidden to hold the ball on the racket, to receive and give the ball by a flat racket. **Attack, when the ball is sent along a downward trajectory, is allowed only from the second zone.** Attack from the front zone is forbidden.

P2: While receiving the ball hitting and slaps are forbidden - the ball should be taken along the tangent trajectory and return to the opponent on a circular trajectory. It is also forbidden to hold the ball on the racket, to receive and give the ball by a flat racket. **Attack, when the ball is sent along a downward trajectory, is allowed only from the back lane.** Attack from the front zone is forbidden.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **second zone** and **back lane** interchangeable (i.e., having the same meaning)?

Pair 1519

P1: Later in AEEA merged and Football Club of Greeks of Alexandria, which was also founded in 1910. In the long history of the Union had parts football men and women, basketball men and women, volleyball men and women, gymnastics Athletics field hockey and table tennis. Owns a house and struggled in the **community stage** of Greek Community. He was a member of the local Ephorates SEGAS Egypt winning several local tournaments.

P2: Later in AEEA merged and Football Club of Greeks of Alexandria, which was also founded in 1910. In the long history of the Union had parts football men and women, basketball men and women, volleyball men and women, gymnastics Athletics field hockey and table tennis. Owns a house and struggled in the **fraternity environment** of Greek Community. He was a member of the local Ephorates SEGAS Egypt winning several local tournaments.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **community stage** and **fraternity environment** interchangeable (i.e., having the same meaning)?

Pair 1520

P1: His ninth stage play for adults, it premiered in 2012 at the Southwark Playhouse. Utilising a nonlinear structure the play weaves together the stories of two families living in the fictional new-town of Draylingstowe in Essex, with a plot that spans approximately twelve years. Described by some critics as a 'state of the nation play Ridley has instead called "Shivered" "more of a **dream state** of the nation play". Structure and Setting.

Pair 1525

P1: The island's Presbyterian "kirk" (church) is one of the smallest of the surrounding area (just some 14 families are members of it); the island's Catholic church, usually known simply as 'the Chapel', is dedicated to Our Lady of Lourdes

and was built in 1932. Nature. Inch island is a well known birdwatching site with a **relevant population** of migratory and wintering birds. Bird species on the island include Greenland white fronted goose, whooper swan and greylag goose.

P2: The island's Presbyterian "kirk" (church) is one of the smallest of the surrounding area (just some 14 families are members of it); the island's Catholic church, usually known simply as 'the Chapel', is dedicated to Our Lady of Lourdes and was built in 1932. Nature. Inch island is a well known birdwatching site with a **compatible community** of migratory and wintering birds. Bird species on the island include Greenland white fronted goose, whooper swan and greylag goose.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **relevant population** and **compatible community** interchangeable (i.e., having the same meaning)?

Pair 1526

P1: Following celebrities on social media sites makes it possible to interact personally with celebrities, which has been shown to influence male body image. A number of respondents also admitted to being affected by negative body talk from others. The ideal male body is perceived to feature a **narrow waist** and hips, broad shoulders, a well-developed upper body, [and] toned "six-pack" abs. The figure may be traced back to an idealized male doll, G.I.

P2: Following celebrities on social media sites makes it possible to interact personally with celebrities, which has been shown to influence male body image. A number of respondents also admitted to being affected by negative body talk from others. The ideal male body is perceived to feature a **slim midsection** and hips, broad shoulders, a well-developed upper body, [and] toned "six-pack" abs. The figure may be traced back to an idealized male doll, G.I.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **narrow waist** and **slim midsection** interchangeable (i.e., having the same meaning)?

Pair 1527

P1: Flowing east from this depression are the feeders of Measand Beck. This runs below Low Kop and Bampton Fell, entering Haweswater halfway along the northern edge. Before the raising of the lake, silt carried down Measand Beck formed The Straits, a **narrow waist** between the two halves of the original lake. The area was farmed from Measand Beck Hall, now submerged.

P2: Flowing east from this depression are the feeders of Measand Beck. This runs below Low Kop and Bampton Fell, entering Haweswater halfway along the northern edge. Before the raising of the lake, silt carried down Measand Beck formed The Straits, a **thin deposit** between the two halves of the original lake. The area was farmed from Measand Beck Hall, now submerged.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **narrow waist** and **thin deposit** interchangeable (i.e., having the same meaning)?

Pair 1528

P1: On August 2, while the ship was about 80 km (50 mi) north of Taiwan, a large wave washed overboard and flooded the engine room; this forced the crew to evacuate into two boats, and after two days they were rescued. Known as the De Witte typhoon, the storm continued to intensify until reaching a peak late on August 2, when a minimum barometric pressure of 920 mbar (27.17 inHg) was recorded. At its peak, the typhoon had an **elliptical eye**, moving west-north-westward at , with gale-force winds extending 565 km (360 mi) from the center. On August 3, the storm struck eastern China, near the border of Chekiang and Hokkien provinces.

P2: On August 2, while the ship was about 80 km (50 mi) north of Taiwan, a large wave washed overboard and flooded the engine room; this forced the crew to evacuate into two boats, and after two days they were rescued. Known as the De Witte typhoon, the storm continued to intensify until reaching a peak late on August 2, when a minimum barometric

pressure of 920 mbar (27.17 inHg) was recorded. At its peak, the typhoon had an **oblong midpoint**, moving west-northwestward at , with gale-force winds extending 565 km (360 mi) from the center. On August 3, the storm struck eastern China, near the border of Chekiang and Hokkien provinces.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **elliptical eye** and **oblong midpoint** interchangeable (i.e., having the same meaning)?

Pair 1529

P1: Special types of mittens include: Hunter's mittens – In the 1930s, special woolen mittens were introduced that had a flap located in the palm of the mitten so a hunter could have his finger free to fire his weapon. Scratch mitts do not separate the thumb, and are designed to prevent babies who do not yet have fine motor control from scratching their faces. However, they are usually not recommended anymore as they can prevent the newborn's natural behaviour of sucking on its hand and gaining **tactile experience**. Corded or "idiot" mittens are two mittens connected by a length of yarn, string or lace, threaded through the sleeves of a coat.

P2: Special types of mittens include: Hunter's mittens – In the 1930s, special woolen mittens were introduced that had a flap located in the palm of the mitten so a hunter could have his finger free to fire his weapon. Scratch mitts do not separate the thumb, and are designed to prevent babies who do not yet have fine motor control from scratching their faces. However, they are usually not recommended anymore as they can prevent the newborn's natural behaviour of sucking on its hand and gaining **an understanding of physicality**. Corded or "idiot" mittens are two mittens connected by a length of yarn, string or lace, threaded through the sleeves of a coat.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **tactile experience** and **an understanding of physicality** interchangeable (i.e., having the same meaning)?

Pair 1530

P2: Thursday, 14 May. Reporting format for the data changed from just "Local Transmission" to "Local Transmission Known Contact/Source" and "Local Transmission Unknown Contact/Source". This **information revision** has been reflected in the table above for May. Saturday, 16 May.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **data change** and **information revision** interchangeable (i.e., having the same meaning)?

Pair 1531

P1: When specific data is shared by several caches and a processor modifies the value of the shared data, the change must be propagated to all the other caches which have a copy of the data. This change propagation prevents the system from violating cache coherency. The notification of **data change** can be done by bus snooping. All the snoopers monitor every transaction on a bus.

P2: When specific data is shared by several caches and a processor modifies the value of the shared data, the change must be propagated to all the other caches which have a copy of the data. This change propagation prevents the system from violating cache coherency. The notification of **documentation modification** can be done by bus snooping. All the snoopers monitor every transaction on a bus.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **data change** and **documentation modification** interchangeable (i.e., having the same meaning)?

Pair 1532

P1: Once put into this class, it is very difficult to be classified out of it. During the 2000s, there was a lot of discussion in the United States about how to increase participation of players in this class. **One suggestion was to allow able bodied people to participate to give players in this class more time on the floor.** Another one involved changing the classification system used domestically to align with the one used internationally by the IWBF, People in this class include Australia players Grant Mizens and Kylie Gauci.

P2: Once put into this class, it is very difficult to be classified out of it. During the 2000s, there was a lot of discussion in the United States about how to increase participation of players in this class. **One suggestion was to allow physically unimpaired persons to participate to give players in this class more time on the floor.** Another one involved changing the classification system used domestically to align with the one used internationally by the IWBF, People in this class include Australia players Grant Mizens and Kylie Gauci.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **able bodied people** and **physically unimpaired persons** interchangeable (i.e., having the same meaning)?

Pair 1533

P1: Clausura title retracted, no relegation. At the FESFUT extraordinary meeting on 29 April 2020, it was decided that the Clausura 2020 season title originally awarded to Once Deportivo would be retracted and the title would not be awarded. **However, they would remain the third representative of El Salvador in the 2020 CONCACAF League.** Moreover, no promotion and relegation would be applied for this season.

P2: Clausura title retracted, no relegation. At the FESFUT extraordinary meeting on 29 April 2020, it was decided that the Clausura 2020 season title originally awarded to Once Deportivo would be retracted and the title would not be awarded. **However, they would remain the number-three member of El Salvador in the 2020 CONCACAF League.** Moreover, no promotion and relegation would be applied for this season.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **third representative** and **number-three member** interchangeable (i.e., having the same meaning)?

Pair 1534

P1: He consulted with a startup company, FireAnt, that was later sold to Sony Online Entertainment. He was also involved with several startups including Ageia, which aims to bring the first "physics accelerator" chip for games to market, and Emotiv Systems, a company building an EEG based game controller. **Fries is currently working on bringing his favorite game, World of Warcraft, to three-dimensional life with his startup company, Figure Prints.** The company makes 3D models of a player's characters using a fleet of Z Corporation printers.

P2: He consulted with a startup company, FireAnt, that was later sold to Sony Online Entertainment. He was also involved with several startups including Ageia, which aims to bring the first "physics accelerator" chip for games to market, and Emotiv Systems, a company building an EEG based game controller. **Fries is currently working on bringing his front-runner Xbox amusement, World of Warcraft, to three-dimensional life with his startup company, Figure Prints.** The company makes 3D models of a player's characters using a fleet of Z Corporation printers.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **favorite game** and **front-runner Xbox amusement** interchangeable (i.e., having the same meaning)?

Pair 1535

P1: Habitat loss is ongoing within its wild range, and an estimated 98% of its habitat already is gone. Habitat loss is driven both by logging, and land clearance for agriculture and cattle ranches. It is also threatened by hunting (in some regions it is the favorite game) and the wild animals trade. One study did not show a significant difference between population densities inside versus outside forest areas disturbed by loggers.

P2: Habitat loss is ongoing within its wild range, and an estimated 98% of its habitat already is gone. Habitat loss is driven both by logging, and land clearance for agriculture and cattle ranches. It is also threatened by hunting (in some regions it is the choice prey) and the wild animals trade. One study did not show a significant difference between population densities inside versus outside forest areas disturbed by loggers.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are favorite game and choice prey interchangeable (i.e., having the same meaning)?

Pair 1536

P1: The most expansive definition of crowdsourcing, drawn from a survey of thousands of papers on the topic, describes it as something for which: (a) there is a clearly defined crowd; (b) there exists a task with a clear goal; (c) the recompense received by the crowd is clear; (d) the crowdsourcer is clearly identified; (e) the compensation to be received by the crowdsourcer is clearly defined; (f) it is an online assigned process of participative type; (g) it uses an open call of variable extent; (h) it uses the internet Other definitions are less exhaustive and more case-specific. Helene Landemore, following a similar line of thought as Brabham, defines crowdsourcing as an online problem-solving and production model in which an undefined crowd helps to complete a task by submitting knowledge, information, or talent. In its unrefined form, there is no accountability mechanism, and the crowd, unlike contractors in an outsourcing system, is not vetted. She further distinguishes it from Wikipedia-esque "commons-based peer production," noting that crowdsourcing generally takes the form of individuals commenting and making suggestions in a vacuum as opposed to deliberating, discussing, and collaborating with one another.

P2: The most expansive definition of crowdsourcing, drawn from a survey of thousands of papers on the topic, describes it as something for which: (a) there is a clearly defined crowd; (b) there exists a task with a clear goal; (c) the recompense received by the crowd is clear; (d) the crowdsourcer is clearly identified; (e) the compensation to be received by the crowdsourcer is clearly defined; (f) it is an online assigned process of participative type; (g) it uses an open call of variable extent; (h) it uses the internet Other definitions are less exhaustive and more case-specific. Helene Landemore, following a similar line of thought as Brabham, defines crowdsourcing as an online problem-solving and production model in which an undefined crowd helps to complete a task by submitting knowledge, information, or talent. In its crudest mode, there is no accountability mechanism, and the crowd, unlike contractors in an outsourcing system, is not vetted. She further distinguishes it from Wikipedia-esque "commons-based peer production," noting that crowdsourcing generally takes the form of individuals commenting and making suggestions in a vacuum as opposed to deliberating, discussing, and collaborating with one another.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are unrefined form and crudest mode interchangeable (i.e., having the same meaning)?

Pair 1537

P1: The trick can also be performed without the false shuffle, making it accessible to the unskilled performer. The "Encyclopedia of Card Tricks" presents a more complex variation of this trick, called the Shuffled Spelling Bee. This version uses the entire deck, with the black suits, the spades and clubs, arranged in advance. An audience participant is given a magician's choice that results in the unwanted red suits, the hearts and diamonds, being removed.

P2: The trick can also be performed without the false shuffle, making it accessible to the unskilled performer. The "Encyclopedia of Card Tricks" presents a more complex variation of this trick, called the Shuffled Spelling Bee. This version uses the complete hand of cards, with the black suits, the spades and clubs, arranged in advance. An audience participant is given a magician's choice that results in the unwanted red suits, the hearts and diamonds, being removed.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **entire deck** and **complete hand of cards** interchangeable (i.e., having the same meaning)?

Pair 1538

P1: The rest of the regiment was forming in disarrayed squadrons by the church in the center of the village. Suddenly the fog lifted and the Poles caught sight of dense ranks of the Spanish cavalry, and two batteries of horse artillery as well. Colonel Konopka, seeing great predominance of the enemy, gave the only **possible order** which was to retreat toward the main French force. Squadrons turned around and - in the marching column - rushed toward Orgaz, with the colonel and major Andrzej Ruttie in the front.

P2: The rest of the regiment was forming in disarrayed squadrons by the church in the center of the village. Suddenly the fog lifted and the Poles caught sight of dense ranks of the Spanish cavalry, and two batteries of horse artillery as well. Colonel Konopka, seeing great predominance of the enemy, gave the only **potential directive** which was to retreat toward the main French force. Squadrons turned around and - in the marching column - rushed toward Orgaz, with the colonel and major Andrzej Ruttie in the front.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **possible order** and **potential directive** interchangeable (i.e., having the same meaning)?

Pair 1539

P1: Non-comparison sorts (such as the examples discussed below) can achieve $O(n)$ performance by using operations other than comparisons, allowing them to sidestep this lower bound (assuming elements are constant-sized). Comparison sorts may run faster on some lists; many adaptive sorts such as insertion sort run in $O(n^2)$ time on an already-sorted or nearly-sorted list. The $\Omega(n \log n)$ lower bound applies only to the case in which the input list can be in any **possible order**. Real-world measures of sorting speed may need to take into account the ability of some algorithms to optimally use relatively fast cached computer memory, or the application may benefit from sorting methods where sorted data begins to appear to the user quickly (and then user's speed of reading will be the limiting factor) as opposed to sorting methods where no output is available until the whole list is sorted.

P2: Non-comparison sorts (such as the examples discussed below) can achieve $O(n)$ performance by using operations other than comparisons, allowing them to sidestep this lower bound (assuming elements are constant-sized). Comparison sorts may run faster on some lists; many adaptive sorts such as insertion sort run in $O(n^2)$ time on an already-sorted or nearly-sorted list. The $\Omega(n \log n)$ lower bound applies only to the case in which the input list can be in any **achievable arrangement**. Real-world measures of sorting speed may need to take into account the ability of some algorithms to optimally use relatively fast cached computer memory, or the application may benefit from sorting methods where sorted data begins to appear to the user quickly (and then user's speed of reading will be the limiting factor) as opposed to sorting methods where no output is available until the whole list is sorted.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **possible order** and **achievable arrangement** interchangeable (i.e., having the same meaning)?

Pair 1540

P1: The official reason for the change of name was a new youth focus to the channel ("RTL9, c'est neuf !"), but the CLT stated that the move was to avoid confusion with the Belgian channel, RTL-TVI and the German channel RTL Television. In 1997, the CLT joined with the German audiovisual group UFA and so **controlled production**, broadcast, and rights for programmes. Faced with their Belgian and German cousins in direct competition in their countries, and with the increasing success of M6 in France, CLT-UFA faced questions regarding their audience in Lorraine and on French and Swiss cable.

P2: The official reason for the change of name was a new youth focus to the channel ("RTL9, c'est neuf! "), but the CLT stated that the move was to avoid confusion with the Belgian channel, RTL-TVI and the German channel RTL Television. In 1997, the CLT joined with the German audiovisual group UFA and so was in charge of radio programming, broadcast, and rights for programmes. Faced with their Belgian and German cousins in direct competition in their countries, and with the increasing success of M6 in France, CLT-UFA faced questions regarding their audience in Lorraine and on French and Swiss cable.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **controlled production** and **was in charge of radio programming** interchangeable (i.e., having the same meaning)?

Pair 1541

P1: Santa Claus is also present, tending bar. Bottweill starts to toast the season but before he can do so Kiernan interrupts. Everyone has champagne, but Bottweill's drink is Pernod he keeps an **entire case** of it in his office. Kiernan brings Bottweill a glass of Pernod.

P2: Santa Claus is also present, tending bar. Bottweill starts to toast the season but before he can do so Kiernan interrupts. Everyone has champagne, but Bottweill's drink is Pernod he keeps an **all-encompassing container** of it in his office. Kiernan brings Bottweill a glass of Pernod.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **entire case** and **all-encompassing container** interchangeable (i.e., having the same meaning)?

Pair 1542

P1: Evidence has also been found of almost twenty Roman villages ("vici") established in the 1st to 3rd century AD, as well as hundreds of villas of varying sizes built in the western and central part of the Swiss Plateau. The Legio XIII Gemina, was based in the permanent camp of Vindonissa (Windisch) and Aventicum (Avenches) was the capital of the Helvetii. Under pressure from internal and external forces, the Roman Army retreated and Switzerland became a **border province** in the 4th century. Nyon and Augusta Raurica were permanently abandoned during the 4th century, the stones of their ruins serving to fortify Geneva and Basel.

P2: Evidence has also been found of almost twenty Roman villages ("vici") established in the 1st to 3rd century AD, as well as hundreds of villas of varying sizes built in the western and central part of the Swiss Plateau. The Legio XIII Gemina, was based in the permanent camp of Vindonissa (Windisch) and Aventicum (Avenches) was the capital of the Helvetii. Under pressure from internal and external forces, the Roman Army retreated and Switzerland became a **neutral territory** in the 4th century. Nyon and Augusta Raurica were permanently abandoned during the 4th century, the stones of their ruins serving to fortify Geneva and Basel.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **border province** and **neutral territory** interchangeable (i.e., having the same meaning)?

Pair 1543

P1: Larvae. After hatching, larvae will emerge from the top of the egg, leaving behind an opening at the top of the egg. Once hatched, the larvae do not consume their egg shells as a **first source** of nutrition as other species of butterflies do. Instead, they go straight into feeding on their host plant's leaves and male flowers until fully grown.

P2: Larvae. After hatching, larvae will emerge from the top of the egg, leaving behind an opening at the top of the egg. Once hatched, the larvae do not consume their egg shells as a **foremost supply** of nutrition as other species of butterflies do. Instead, they go straight into feeding on their host plant's leaves and male flowers until fully grown.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **first source** and **foremost supply** interchangeable (i.e., having the same meaning)?

Pair 1544

P1: This was the first election to take place in Toronto since the enactment of a new fund raising by-law whereby unions and corporations could not donate to candidates. The nomination period for the 2010 municipal election opened on Monday, January 4, 2010 and closed on Friday, September 10, 2010. In the 2010 election, a record number of women was elected to council, with 15 female councillors comprising **exactly one third** of all council members. With this election, voting day moved to the fourth Monday of October from the second Monday of November which had been election day since 1978.

P2: This was the first election to take place in Toronto since the enactment of a new fund raising by-law whereby unions and corporations could not donate to candidates. The nomination period for the 2010 municipal election opened on Monday, January 4, 2010 and closed on Friday, September 10, 2010. In the 2010 election, a record number of women was elected to council, with 15 female councillors comprising **precisely 33 and a third percent** of all council members. With this election, voting day moved to the fourth Monday of October from the second Monday of November which had been election day since 1978.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **exactly one third** and **precisely 33 and a third percent** interchangeable (i.e., having the same meaning)?

Pair 1545

P1: The CRA is a member organisation for charities which run shops. British charity shops are mainly staffed by unpaid volunteers, with a paid shop manager. Goods for sale are predominantly from donations - 87% according to the **official estimate**. Donations should be taken directly to a charity shop during opening hours, as goods left on the street may be stolen or damaged by passers-by or inclement weather.

P2: The CRA is a member organisation for charities which run shops. British charity shops are mainly staffed by unpaid volunteers, with a paid shop manager. Goods for sale are predominantly from donations - 87% according to the **formal evaluation**. Donations should be taken directly to a charity shop during opening hours, as goods left on the street may be stolen or damaged by passers-by or inclement weather.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **official estimate** and **formal evaluation** interchangeable (i.e., having the same meaning)?

Pair 1546

P1: As the weight and sizes were changed frequently after 1937, these designs have been listed separate with their respective information. Collecting. The value of any given coin is determined by **survivability rate** and condition as collectors in general prefer uncleaned appealing coins. One sen coins with the dragon design (1873 to 1888) have two main key dates which are worth the most.

P2: As the weight and sizes were changed frequently after 1937, these designs have been listed separate with their respective information. Collecting. The value of any given coin is determined by **preservation degree** and condition as collectors in general prefer uncleaned appealing coins. One sen coins with the dragon design (1873 to 1888) have two main key dates which are worth the most.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **survivability rate** and **preservation degree** interchangeable (i.e., having the same meaning)?

Pair 1547

P1: In contrast, active mitigation is carried out in the initiation zone and prevents the rockfall event from ever occurring. Some examples of these measures are rock bolting, slope retention systems, shotcrete, etc. Other active measures might be by changing the geographic or climatic characteristics in the initiation zone, e.g. altering slope geometry, dewatering the slope, revegetation, etc.

P2: In contrast, active mitigation is carried out in the initiation zone and prevents the rockfall event from ever occurring. Some examples of these measures are rock bolting, slope retention systems, shotcrete, etc. Other effective methods might be by changing the geographic or climatic characteristics in the initiation zone, e.g. altering slope geometry, dewatering the slope, revegetation, etc.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are active measures and effective methods interchangeable (i.e., having the same meaning)?

Pair 1548

P1: The next and last head of FCD was born on March 24, 1935, in Moscow Leonid Shebarshin. First Chief Directorate organization. According to published sources, the KGB included the following directorates and departments in 1980s: active measures and assassinations. "Active measures" () were a form of political warfare conducted by the Soviet security services to influence the course of world events, "in addition to collecting intelligence and producing politically correct assessment of it".

P2: The next and last head of FCD was born on March 24, 1935, in Moscow Leonid Shebarshin. First Chief Directorate organization. According to published sources, the KGB included the following directorates and departments in 1980s: current undertakings and assassinations. "Active measures" () were a form of political warfare conducted by the Soviet security services to influence the course of world events, "in addition to collecting intelligence and producing politically correct assessment of it".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are active measures and current undertakings interchangeable (i.e., having the same meaning)?

Pair 1549

P1: Many Saudis do not see Islam as the main impediment to women's rights. According to one female journalist: "If the Quran does not address the subject, then the clerics will err on the side of caution and make it haram (forbidden). The driving ban for women is the best example." Another (Sabria Jawhar) believes that, "if all women were given the rights the Quran guarantees us, and not be supplanted by tribal customs, then the issue of whether Saudi women have equal rights would be reduced."

P2: Many Saudis do not see Islam as the main impediment to women's rights. According to one female journalist: "If the Quran does not address the subject, then the clerics will err on the side of caution and make it haram (forbidden). The driving ban for women is the optimal case." Another (Sabria Jawhar) believes that, "if all women were given the rights the Quran guarantees us, and not be supplanted by tribal customs, then the issue of whether Saudi women have equal rights would be reduced."

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are best example and optimal case interchangeable (i.e., having the same meaning)?

Pair 1550

P1: They co-wrote and produced a demonstration recording of "Sugar Baby Love", recorded October 1973 with "Tonight", "Juke Box Jive" and "Sugar Candy Kisses" (which became a hit for Mac and Katie Kissoon). They originally intended to submit it for the Eurovision Song Contest but instead offered it to Showaddywaddy and Carl Wayne, who both turned it down. They then offered it to the demo musicians, provided that they would become an **actual group**. With the exception of the recording's lead singer, Paul Da Vinci, who had signed a solo recording contract with Penny Farthing Records.

P2: They co-wrote and produced a demonstration recording of "Sugar Baby Love", recorded October 1973 with "Tonight", "Juke Box Jive" and "Sugar Candy Kisses" (which became a hit for Mac and Katie Kissoon). They originally intended to submit it for the Eurovision Song Contest but instead offered it to Showaddywaddy and Carl Wayne, who both turned it down. They then offered it to the demo musicians, provided that they would become an **authentic band**. With the exception of the recording's lead singer, Paul Da Vinci, who had signed a solo recording contract with Penny Farthing Records.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **full-time service** and **all-day assistance** interchangeable (i.e., having the same meaning)?

Pair 1552

P1: Refraction affects the estimated distance underwater by making objects appear 25% closer than they actually are; for example, an object that appears to be three feet away underwater (judged by size) is actually four feet away. Nikon assumed the user did not compensate for appearances underwater, so the distance markers on the lens are marked for apparent (not actual) distance. Thankfully the Nikonos wide-angle lenses have **ample depth** of field, so these discrepancies are often not a noticeable problem. The depth of field indicators on most Nikonos Nikkor lenses mechanically adjust with aperture.

P2: Refraction affects the estimated distance underwater by making objects appear 25% closer than they actually are; for example, an object that appears to be three feet away underwater (judged by size) is actually four feet away. Nikon assumed the user did not compensate for appearances underwater, so the distance markers on the lens are marked for apparent (not actual) distance. Thankfully the Nikonos wide-angle lenses have **lots of deepness** of field, so these discrepancies are often not a noticeable problem. The depth of field indicators on most Nikonos Nikkor lenses mechanically adjust with aperture.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **ample depth** and **lots of deepness** interchangeable (i.e., having the same meaning)?

Pair 1553

P1: Leaving the band in 1923 to study medicine, he returned in 1928 to perform on a number of Ellington's most recognizable pieces during Ellington's stint at the Cotton Club, including "Black Beauty", "Black and Tan", and "Mood Indigo". His sound provided a contrast with Bubber Miley, Ellington's other trumpeter during the period. He had a unique broad open tone of ample depth and sonority despite the elegant, soft quality of his muted play. Whetsel's behavior became erratic in 1938, and after an incident where he "went haywire" during a gig at Rutgers University, he was replaced by trumpeter Wallace Jones.

P2: Leaving the band in 1923 to study medicine, he returned in 1928 to perform on a number of Ellington's most recognizable pieces during Ellington's stint at the Cotton Club, including "Black Beauty", "Black and Tan", and "Mood Indigo". His sound provided a contrast with Bubber Miley, Ellington's other trumpeter during the period. He had a unique broad open tone of rich lower register and sonority despite the elegant, soft quality of his muted play. Whetsel's behavior became erratic in 1938, and after an incident where he "went haywire" during a gig at Rutgers University, he was replaced by trumpeter Wallace Jones.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are ample depth and rich lower register interchangeable (i.e., having the same meaning)?

Pair 1554

P1: The CASA C-102 was a military trainer aircraft designed in Spain in the late 1970s but never actually built. The project was initiated by a 1977 request to CASA by the Ejército del Aire for such an aircraft. The company's response was a conventional all-metal monoplane with a T-tail, fixed tricycle undercarriage and side-by-side seating for the pilot and instructor. At the end of the following year, the Air Force commenced the formal tendering process for the "Futuro Avión Ligeró Selectivo" ("Future Selective Light Aircraft"), to which CASA submitted a developed and refined version of the design, now known as the C-102S.

P2: The CASA C-102 was a military trainer aircraft designed in Spain in the late 1970s but never actually built. The project was initiated by a 1977 request to CASA by the Ejército del Aire for such an aircraft. The firm's reaction was a conventional all-metal monoplane with a T-tail, fixed tricycle undercarriage and side-by-side seating for the pilot and instructor. At the end of the following year, the Air Force commenced the formal tendering process for the "Futuro Avión Ligeró Selectivo" ("Future Selective Light Aircraft"), to which CASA submitted a developed and refined version of the design, now known as the C-102S.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are company's response and firm's reaction interchangeable (i.e., having the same meaning)?

Pair 1555

P1: Often the requirement of "relevance" means relevance to the performance of a specific task. Typically the information in question is in the hands of the employer. A common example is production plans or plans for restructuring, which will affect or cause retrenchment. The registered majority union has a right to information when the employer is actually involved in consultation or bargaining with the union, or when consultation or bargaining is about to start.

P2: Often the requirement of "relevance" means relevance to the performance of a specific task. Typically the information in question is in the hands of the employer. The registered majority union has a right to information when the employer is actually involved in consultation or bargaining with the union, or when consultation or bargaining is about to start.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are production plans and construction blueprints interchangeable (i.e., having the same meaning)?

Pair 1556

P1: Aoz Roon, who is a brutal and unimaginative man, opposes this. A guildmaster, defying the guild laws of secrecy, reveals to Shay Tal that the guilds have kept records for centuries, although many books have been destroyed. **These records reveal that the climate was once much colder, and hint at a warm period even longer ago, a tale widely regarded as myth.** Shay Tal realises that vast amounts of knowledge have been lost over the generations.

P2: Aoz Roon, who is a brutal and unimaginative man, opposes this. A guildmaster, defying the guild laws of secrecy, reveals to Shay Tal that the guilds have kept records for centuries, although many books have been destroyed. **These records reveal that the climate was once much colder, and hint at a moderate time even longer ago, a tale widely regarded as myth.** Shay Tal realises that vast amounts of knowledge have been lost over the generations.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **warm period** and **moderate time** interchangeable (i.e., having the same meaning)?

Pair 1557

P1: There is a small fountain in the center of the exposition and a pergola covered in climbing plants. In the rest territory of the park there are two fountains. **The main fountain, which is situated in the center of Bernardine garden, works all the day at weekends in a warm period of the year.** On work days the fountain works only from 9 p.m. to 10 p.m. as a light and music show.

P2: There is a small fountain in the center of the exposition and a pergola covered in climbing plants. In the rest territory of the park there are two fountains. **The main fountain, which is situated in the center of Bernardine garden, works all the day at weekends in a temperate season of the year.** On work days the fountain works only from 9 p.m. to 10 p.m. as a light and music show.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **warm period** and **temperate season** interchangeable (i.e., having the same meaning)?

Pair 1558

P1: Then, a particular solution is provide only that formula_27. Proof: Due to linearity of operator formula_28, the equation can be written as On the other hand, since substituting this into equation (3), produces Therefore, formula_32 is a particular solution to non-homogeneous differential equation. **Thus, the above equation for a particular response formula_32 is called the exponential response formula (ERF) for the given exponential input.** In particular, in case of formula_34, a solution to equation (2) is given by and is called the resonant response formula.

P2: Then, a particular solution is provide only that formula_27. Proof: Due to linearity of operator formula_28, the equation can be written as On the other hand, since substituting this into equation (3), produces Therefore, formula_32 is a particular solution to non-homogeneous differential equation. **Thus, the above equation for a certain answer formula_32 is called the exponential response formula (ERF) for the given exponential input.** In particular, in case of formula_34, a solution to equation (2) is given by and is called the resonant response formula.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **particular response** and **certain answer** interchangeable (i.e., having the same meaning)?

Pair 1559

P1: The palace had many owners during the centuries including the Grimani and Zeno families. In the 17th-century it was acquired by Ferdinand Charles Gonzaga Nevers, Duke of Mantua and Montferrat. **He is described as a prince enamoured by profligate delights, including women, specially those heavy and large, and of infamous character.** Tassini,

citing the History of Italy by Botta, describes him as keeping the palace as a debauched serraglio, governed by the Countess Calori.

P2: The palace had many owners during the centuries including the Grimani and Zeno families. In the 17th-century it was acquired by Ferdinand Charles Gonzaga Nevers, Duke of Mantua and Montferrat. He is described as a prince enamoured by profligate delights, including women, specially those heavy and large, and of disgraceful reputation. Tassini, citing the History of Italy by Botta, describes him as keeping the palace as a debauched serraglio, governed by the Countess Calori.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are infamous character and disgraceful reputation interchangeable (i.e., having the same meaning)?

Pair 1560

P1: Also in the quantum-optical approaches to the laser linewidth, based on the density-operator master equation, it can be verified that the gain is smaller than the losses. Schawlow-Townes approximation. As mentioned above, it is clear from its historical derivation that the original Schawlow-Townes equation is a four-fold approximation of the fundamental laser linewidth. Starting from the fundamental laser linewidth formula_88 derived above, by applying the four approximations i.–iv.

P2: Also in the quantum-optical approaches to the laser linewidth, based on the density-operator master equation, it can be verified that the gain is smaller than the losses. Schawlow-Townes approximation. As mentioned above, it is clear from its archival origin that the original Schawlow-Townes equation is a four-fold approximation of the fundamental laser linewidth. Starting from the fundamental laser linewidth formula_88 derived above, by applying the four approximations i.–iv.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are historical derivation and archival origin interchangeable (i.e., having the same meaning)?

Pair 1561

P1: There is still much ambiguity in the taxonomy of all mammals prior to the Eocene, so there is the possibility that "Eurotamandua" was a primitive xenarthran. However, this is highly unlikely because all known fossil evidence indicates that xenarthrans existed exclusively in South America from the beginning of the Cenozoic era until the formation of the Panama land bridge 3 million years ago, after which they spread to North America (but never to Eurasia or Africa). Another possibility is that "Eurotamandua" belongs to another groups of mammals which appeared around its time, the Afredentata (probably part of Afrotheria). "Eurotamandua" is currently thought to be a stem-pangolin, closer to crown pangolins than Palaeanodonta and "Euromanis" but more basal than "Eomanis" and "Necromanis".

P2: There is still much ambiguity in the taxonomy of all mammals prior to the Eocene, so there is the possibility that "Eurotamandua" was a primitive xenarthran. However, this is highly unlikely because all known fossil evidence indicates that xenarthrans existed exclusively in South America from the beginning of the Cenozoic era until the formation of the Panama land bridge 3 million years ago, after which they spread to North America (but never to Eurasia or Africa). Another possibility is that "Eurotamandua" belongs to another groups of mammals which appeared around its time, the Afredentata (plausibly a section of Afrotheria). "Eurotamandua" is currently thought to be a stem-pangolin, closer to crown pangolins than Palaeanodonta and "Euromanis" but more basal than "Eomanis" and "Necromanis".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are probably part and plausibly a section interchangeable (i.e., having the same meaning)?

Pair 1562

P1: Maintained by the General Services Administration, it is currently occupied by the Executive Office of the President, including the Office of the Vice President of the United States. Since 1999, it has been named for former president and general, Dwight D. Eisenhower. Located on 17th Street NW, between Pennsylvania Avenue and **state place**, and West Executive Drive, the building was commissioned by President Ulysses S. Grant. It was built between 1871 and 1888, on the site of the original 1800 War/State/Navy Building and the White House stables, in the French Second Empire style.

P2: Maintained by the General Services Administration, it is currently occupied by the Executive Office of the President, including the Office of the Vice President of the United States. Pair 1565

P1: A Battle of the Bands is a contest in which many bands, usually rock or metal bands, but often musical acts from a range of different styles, compete for the title of "best band". Its history though goes back to earlier times, at least the 1930s swing era, when big band battles between famous band leaders like Chick Webb, Casa Loma Orchestra, Benny Goodman, and Count Basie were regularly organised in big dancehalls, like the Savoy Ballroom. The winner is determined by a panel of judges, the **general response** of the audience, or a combination. The winning band usually

receives a prize in addition to bragging rights.

P2: A Battle of the Bands is a contest in which many bands, usually rock or metal bands, but often musical acts from a range of different styles, compete for the title of "best band". Its history though goes back to earlier times, at least the 1930s swing era, when big band battles between famous band leaders like Chick Webb, Casa Loma Orchestra, Benny Goodman, and Count Basie were regularly organised in big dancehalls, like the Savoy Ballroom. **The winner is determined by a panel of judges, the common reaction of the audience, or a combination.** The winning band usually receives a prize in addition to bragging rights.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **general response** and **common reaction** interchangeable (i.e., having the same meaning)?

Pair 1566

P1: The "Bionic Barrier" was designed to overcome some of the issues that arose in the trial, including increasing flexibility with hinge panels to adapt to tides and swell. The structural performance of this design could not be assessed although it potentially improves the current system. **The general response by the public towards the environmentally friendly shark barrier at Coogee was positive (95%).** It was also noted that the barrier acted as a form of artificial reef or FAD (fish attracting device) which was seen as a positive point of interest for the beach.

P2: The "Bionic Barrier" was designed to overcome some of the issues that arose in the trial, including increasing flexibility with hinge panels to adapt to tides and swell. The structural performance of this design could not be assessed although it potentially improves the current system. **The widespread feedback by the public towards the environmentally friendly shark barrier at Coogee was positive (95%).** It was also noted that the barrier acted as a form of artificial reef or FAD (fish attracting device) which was seen as a positive point of interest for the beach.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **general response** and **widespread feedback** interchangeable (i.e., having the same meaning)?

Pair 1567

P1: After assuring him that she will be more than willing later he convinces her to provide him with an incentive, namely shaking it for him, during which Poppy returns. He teases them both about it revealing his strong belief that a woman's behind has caused wars and rumors of wars claiming it says so in the Bible making them both laugh. **They tell him of Sheila's weight gain, some eighty pounds, and discuss other family issues until Mike (Cordell Moore) enters.** Diana had previously voiced her objections to both Mike's presence and existence feeling he is an unsuitable husband for her friend and a very unlikeable man.

P2: After assuring him that she will be more than willing later he convinces her to provide him with an incentive, namely shaking it for him, during which Poppy returns. He teases them both about it revealing his strong belief that a woman's behind has caused wars and rumors of wars claiming it says so in the Bible making them both laugh. **They tell him of Sheila's weight gain, some eighty pounds, and discuss other concerns among the relatives until Mike (Cordell Moore) enters.** Diana had previously voiced her objections to both Mike's presence and existence feeling he is an unsuitable husband for her friend and a very unlikeable man.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **family issues** and **concerns among the relatives** interchangeable (i.e., having the same meaning)?

Pair 1568

P1: They battled to within five points in the second half but could not overcome their poor start. Granger was selected by the Indiana Pacers with the 17th pick in the first round of the 2005 NBA draft and has placed among league lead-

ers in scoring and been named an All-Star during his career. McKay continued to attract strong transfer players, but discipline issues persisted in 2005–06. Versatile senior guard Mark Walters led the team with 16 points a game, but after winning four straight to build a 16–9 record, they lost four of five to finish 17–13 and did not receive a post-season bid.

P2: They battled to within five points in the second half but could not overcome their poor start. Granger was selected by the Indiana Pacers with the 17th pick in the first round of the 2005 NBA draft and has placed among league leaders in scoring and been named an All-Star during his career. McKay continued to attract strong transfer players, but conduct infractions persisted in 2005–06. Versatile senior guard Mark Walters led the team with 16 points a game, but after winning four straight to build a 16–9 record, they lost four of five to finish 17–13 and did not receive a post-season bid.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are discipline issues and conduct infractions interchangeable (i.e., having the same meaning)?

Pair 1569

P1: Simplicity was a focal point for the project, as the development team didn't wish to create something too easy it lacked difficulty or something too complex it confused players. A number of changes were made to the gameplay structure of "Legions" to accommodate the team's design goals. The level progression system, a linear series of stages in the original "Legions", was omitted and instead allows players to select whichever stage they choose. Iguchi didn't enjoy the first game's progression for having only one specific way to clear stage formations, believing the new non-linear structure allowed for variations within each level to accommodate different playstyles: "We want it to be both intuitive and flexible.

P2: Simplicity was a focal point for the project, as the development team didn't wish to create something too easy it lacked difficulty or something too complex it confused players. A number of changes were made to the gameplay structure of "Legions" to accommodate the team's design goals. The level progression system, a nonstop chain of stages in the original "Legions", was omitted and instead allows players to select whichever stage they choose. Iguchi didn't enjoy the first game's progression for having only one specific way to clear stage formations, believing the new non-linear structure allowed for variations within each level to accommodate different playstyles: "We want it to be both intuitive and flexible.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are linear series and nonstop chain interchangeable (i.e., having the same meaning)?

Pair 1570

P1: The claws are short and sharp, while the legs are yellow. Sexes are similar, though the female averages about three percent larger than the male. Immatures have a white crown and mantle, while the upper back has rounded brown or black spots that vanish as the bird ages. The wings and tail are greyish-brown and paler than those of the adults and are more darkly barred.

P2: The claws are short and sharp, while the legs are yellow. Sexes are similar, though the female averages about three percent larger than the male. Immatures have a white crown and mantle, while the topmost hindquarters has rounded brown or black spots that vanish as the bird ages. The wings and tail are greyish-brown and paler than those of the adults and are more darkly barred.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are upper back and topmost hindquarters interchangeable (i.e., having the same meaning)?

Pair 1571

P1: This illusion occurs because a bar or contour within a frame of reference provides ambiguous information about its "real" direction of movement. The actual motion of the line has many possibilities. The shape of the aperture thus tends to determine the perceived direction of motion for an otherwise identically moving contour. A vertically elongated

aperture makes vertical motion dominant whereas a horizontally elongated aperture makes horizontal motion dominant.

P2: This illusion occurs because a bar or contour within a frame of reference provides ambiguous information about its "real" direction of movement. The actual motion of the line has many possibilities. **The shape of the aperture thus tends to determine the recognized course of motion for an otherwise identically moving contour.** A vertically elongated aperture makes vertical motion dominant whereas a horizontally elongated aperture makes horizontal motion dominant.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **perceived direction** and **recognized course** interchangeable (i.e., having the same meaning)?

Pair 1572

P1: "Voanioala gerardii" is critically endangered because of its scarcity. Only 10-15 trees are found. **They are cut down for their edible palm hearts, and their seeds are used for market trade.** They are also rare because of its poor dispersal of seeds.

P2: "Voanioala gerardii" is critically endangered because of its scarcity. Only 10-15 trees are found. **They are cut down for their edible palm hearts, and their seeds are used for economic bartering.** They are also rare because of its poor dispersal of seeds.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **market trade** and **economic bartering** interchangeable (i.e., having the same meaning)?

Pair 1573

P1: Two days after the Penguin update was released Google prepared a feedback form, designed for two categories of users: those who want to report web spam that still ranks highly after the search algorithm change, and those who think that their site got unfairly hit by the update. Google also has a reconsideration form through Google Webmaster Tools. **In January 2015, Google's John Mueller said that a Penguin penalty can be removed by simply building good links.** The usual process is to remove bad links manually or by using Google's Disavow tool and then filing a reconsideration request.

P2: Two days after the Penguin update was released Google prepared a feedback form, designed for two categories of users: those who want to report web spam that still ranks highly after the search algorithm change, and those who think that their site got unfairly hit by the update. Google also has a reconsideration form through Google Webmaster Tools. **In January 2015, Google's John Mueller said that a Penguin penalty can be removed by simply building website connector URLs.** The usual process is to remove bad links manually or by using Google's Disavow tool and then filing a reconsideration request.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **good links** and **website connector URLs** interchangeable (i.e., having the same meaning)?

Pair 1574

P1: However, Ushaw Moor colliery closed in 1960, as part of the collapse of the Durham coal fields. In the last thirty years it has grown and become the centre of the Deerness Valley, becoming unusually prosperous where most pit villages have struggled. **good links with Durham and Newcastle and good local schools and amenities has meant it is very popular with first time buyers.** Geography.

P2: However, Ushaw Moor colliery closed in 1960, as part of the collapse of the Durham coal fields. In the last thirty years it has grown and become the centre of the Deerness Valley, becoming unusually prosperous where most pit villages have struggled. **favorable affiliations with Durham and Newcastle and good local schools and amenities has meant it**

is very popular with first time buyers. Geography.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **good links** and **favorable affiliations** interchangeable (i.e., having the same meaning)?

Pair 1575

P1: His story in SBT started when he participated in "Fathers and Sons" from Programa Silvio Santos, where he met the largest presenter of Brazilian television, Silvio Santos. In the wake, in 2010, Konstantino participated in the picture "Ask Maisa", where the small will answer questions and doubts about the most different subjects sent by children from all over Brazil. **Maisa Silva had the help of his friends, including Konstantino to find the best answer, always from the point of view of the children.** Between 2012 and 2013, played the dreamer Adriano Ramos, one of the protagonists from remake of the TV series "Carrossel".

P2: His story in SBT started when he participated in "Fathers and Sons" from Programa Silvio Santos, where he met the largest presenter of Brazilian television, Silvio Santos. In the wake, in 2010, Konstantino participated in the picture "Ask Maisa", where the small will answer questions and doubts about the most different subjects sent by children from all over Brazil. **Maisa Silva had the help of his friends, including Konstantino to find the greatest rejoinder, always from the point of view of the children.** Between 2012 and 2013, played the dreamer Adriano Ramos, one of the protagonists from remake of the TV series "Carrossel".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **best answer** and **greatest rejoinder** interchangeable (i.e., having the same meaning)?

Pair 1576

P1: Non-energy industrial global greenhouse gas emissions have lowered from 14% to 9%, mainly due to reduced emissions from aluminum production. This has been the result of two key elements: process changes that reduced CO₂ and PFC emissions per ton of aluminum generated, and the post-2000 decline in aluminum manufacturing rates. **Non-energy agricultural greenhouse emissions have remained fairly constant but their percentage contribution has lowered as total emissions have increased.** Here is a broken down list of pollution contributors in Washington State: 45% transportation, 16% in state electricity generation, 12% industry, 9% residential and commercial, 2% non-CO₂ (other gasses), 9% industry (non-energy), 7% agriculture (non-energy).

P2: Non-energy industrial global greenhouse gas emissions have lowered from 14% to 9%, mainly due to reduced emissions from aluminum production. This has been the result of two key elements: process changes that reduced CO₂ and PFC emissions per ton of aluminum generated, and the post-2000 decline in aluminum manufacturing rates. **Non-energy agricultural greenhouse emissions have remained fairly constant but their rate of impact has lowered as total emissions have increased.** Here is a broken down list of pollution contributors in Washington State: 45% transportation, 16% in state electricity generation, 12% industry, 9% residential and commercial, 2% non-CO₂ (other gasses), 9% industry (non-energy), 7% agriculture (non-energy).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **percentage contribution** and **rate of impact** interchangeable (i.e., having the same meaning)?

Pair 1577

P1: Recording. The current CD release is a combination of remixed recordings from the original Lorient concert as well as the Glasgow concert. **With a number of performances scheduled for the piece in the millennium year, Shaun took the opportunity to revise and extend the suite.** As the overall length of the suite was now beyond that of a conventional CD, the additional tracks were on a later release 'May We Never Have To Goodbye' also on the Tara Music label.

P2: Recording. The current CD release is a combination of remixed recordings from the original Lorient concert as well as the Glasgow concert. **With a number of performances scheduled for the piece in the turn of the century, Shaun**

took the opportunity to revise and extend the suite. As the overall length of the suite was now beyond that of a conventional CD, the additional tracks were on a later release 'May We Never Have To Goodbye' also on the Tara Music label.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **millennium year** and **turn of the century** interchangeable (i.e., having the same meaning)?

Pair 1578

P1: Organizers of the Austrian, British and Hungarian Grands Prix were the first to announce that their races could go ahead, but run without spectators and with teams staffed by minimal personnel. The summer break shut down period—which includes mandatory factory closures as a cost-cutting measure—was also brought forward from August to March and April and was originally extended to three weeks, allowing for postponed races to be held in August. The sport had planned to overhaul its technical regulations for the championship in one of the largest changes in its **seventy-year history**. The pandemic prompted these changes to be postponed until , with teams required to enter their cars in the 2021 championship to minimise the financial stress placed on the teams.

P2: Organizers of the Austrian, British and Hungarian Grands Prix were the first to announce that their races could go ahead, but run without spectators and with teams staffed by minimal personnel. The summer break shut down period—which includes mandatory factory closures as a cost-cutting measure—was also brought forward from August to March and April and was originally extended to three weeks, allowing for postponed races to be held in August. The sport had planned to overhaul its technical regulations for the championship in one of the largest changes in its **over-69-year period**. The pandemic prompted these changes to be postponed until , with teams required to enter their cars in the 2021 championship to minimise the financial stress placed on the teams.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **seventy-year history** and **over-69-year period** interchangeable (i.e., having the same meaning)?

Pair 1579

P1: "Head Lopper" #1 debuted at Heroes Con 2013. The first issue was a small print run and thus costly to produce. The **second issue** was funded via a Kickstarter campaign launched October 10, 2013. Image Comics issues.

P2: "Head Lopper" #1 debuted at Heroes Con 2013. The first issue was a small print run and thus costly to produce. The **number-two publication** was funded via a Kickstarter campaign launched October 10, 2013. Image Comics issues.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **second issue** and **number-two publication** interchangeable (i.e., having the same meaning)?

Pair 1580

P1: The Fly Mojo has a body and neck of solid mahogany, and Seymour Duncan pickups. The Fly Artist has a solid Sitka spruce body, basswood neck, and Dimarzio pickups. The Fly Supreme has a solid big leaf maple body (earliest production, **1 piece**; later, 2 pieces), basswood neck, and Dimarzio pickups. The Fly Concert/Bronze has a solid spruce body, basswood neck, light-gauge acoustic-style bronze strings, and no magnetic pickup.

P2: The Fly Mojo has a body and neck of solid mahogany, and Seymour Duncan pickups. The Fly Artist has a solid Sitka spruce body, basswood neck, and Dimarzio pickups. The Fly Supreme has a solid big leaf maple body (earliest production, **a solo item**; later, 2 pieces), basswood neck, and Dimarzio pickups. The Fly Concert/Bronze has a solid spruce body, basswood neck, light-gauge acoustic-style bronze strings, and no magnetic pickup.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **1 piece** and **a solo item** interchangeable (i.e., having the same meaning)?

Pair 1581

P1: When she arrives, she finds a camera strap with Henry's name embroidered on it. Wanting answers, Emma meets with Hook in Central Park where he tries to convince her to drink a memory potion. **Again Emma doesn't believe him and handcuffs Hook to a bike rack.** She flags down NYPD officers and insists that Hook assaulted her.

P2: When she arrives, she finds a camera strap with Henry's name embroidered on it. Wanting answers, Emma meets with Hook in Central Park where he tries to convince her to drink a memory potion. **Again Emma doesn't believe him and handcuffs Hook to a stand for cycles.** She flags down NYPD officers and insists that Hook assaulted her.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **bike rack** and **stand for cycles** interchangeable (i.e., having the same meaning)?

Pair 1582

P1: The floods were the region's most significant in two decades. Meteorological history. **The origins of Sally can be traced to the interaction of a trough of low pressure with a westward-propagating tropical wave.** This led to the development of a vortex over the Marshall Islands on September 2.

P2: The floods were the region's most significant in two decades. Meteorological history. **The origins of Sally can be traced to the interaction of a trough of light tension with a westward-propagating tropical wave.** This led to the development of a vortex over the Marshall Islands on September 2.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **low pressure** and **light tension** interchangeable (i.e., having the same meaning)?

Pair 1583

P1: First stage. The first stage of the regulator is mounted to the cylinder valve or manifold via one of the standard connectors (Yoke or DIN). **It reduces cylinder pressure to an intermediate pressure, usually about higher than the ambient pressure, also called interstage pressure, medium pressure or low pressure.** The breathing gas is then supplied to the second stage through a hose.

P2: First stage. The first stage of the regulator is mounted to the cylinder valve or manifold via one of the standard connectors (Yoke or DIN). **It reduces cylinder pressure to an intermediate pressure, usually about higher than the ambient pressure, also called interstage pressure, medium pressure or minor stress.** The breathing gas is then supplied to the second stage through a hose.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **low pressure** and **minor stress** interchangeable (i.e., having the same meaning)?

Pair 1584

P1: In those days 70 per cent of crime was not associated with drug prohibition: It did not exist because heroin was legal. The problems began only when heroin became illegal and a criminal fraternity developed around its sale, as occurred during the prohibition era of the 1930s when criminals made money by selling illegal alcohol. **When there is a profit motive involved people will push any illegal substance.** That is the key problem: If there were no profit motive there would be no incentive to push drugs on the streets of Cabramatta or anywhere else.

P2: In those days 70 per cent of crime was not associated with drug prohibition: It did not exist because heroin was legal. The problems began only when heroin became illegal and a criminal fraternity developed around its sale, as occurred

during the prohibition era of the 1930s when criminals made money by selling illegal alcohol. **When there is a profit motive at play, human beings will push any illegal substance.** That is the key problem: If there were no profit motive there would be no incentive to push drugs on the streets of Cabramatta or anywhere else.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **involved people** and **at play, human beings** interchangeable (i.e., having the same meaning)?

Pair 1585

P1: After this the Divine Liturgy is celebrated both on the day of dedication and on seven days afterwards. Anglican forms. **There is no authorized form** for the dedication of a church in the reformed Church of England. A form was drawn up and approved by both houses of the convocation of Canterbury under Archbishop Tenison in 1712, and an almost identical form was submitted to convocation in 1715, but its consideration was not completed by the Lower House, and neither form ever received royal sanction.

P2: After this the Divine Liturgy is celebrated both on the day of dedication and on seven days afterwards. Anglican forms. **There is no sanctioned methodology** for the dedication of a church in the reformed Church of England. A form was drawn up and approved by both houses of the convocation of Canterbury under Archbishop Tenison in 1712, and an almost identical form was submitted to convocation in 1715, but its consideration was not completed by the Lower House, and neither form ever received royal sanction.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **authorized form** and **sanctioned methodology** interchangeable (i.e., having the same meaning)?

Pair 1586

P1: The cost was formidable at £2.3 million, and the proposal soon collapsed. The Waterloo & City Railway Bill. **In 1891 the Corporation of the City of London made a statistical survey** which it published ancillary to the National Census taken in that year. 37,694 persons lived in the City, but the daytime occupation was 310,384.

P2: The cost was formidable at £2.3 million, and the proposal soon collapsed. The Waterloo & City Railway Bill. **In 1891 the Corporation of the City of London made a quantitative evaluation** which it published ancillary to the National Census taken in that year. 37,694 persons lived in the City, but the daytime occupation was 310,384.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **statistical survey** and **quantitative evaluation** interchangeable (i.e., having the same meaning)?

Pair 1587

P1: Between February 21 and February 28, the Yeezy Boost 750 "Light Brown" was available through a wider range of retailers and boutiques. Yeezy Boost 350. **On June 27, 2015, the second shoe** from the collaboration, the Yeezy Boost 350 was made available through a worldwide release. Yeezy 950.

P2: Between February 21 and February 28, the Yeezy Boost 750 "Light Brown" was available through a wider range of retailers and boutiques. Yeezy Boost 350. **On June 27, 2015, the next sneaker** from the collaboration, the Yeezy Boost 350 was made available through a worldwide release. Yeezy 950.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **second shoe** and **next sneaker** interchangeable (i.e., having the same meaning)?

Pair 1588

P1: The music video portrayed Madonna dancing in front of a white background, accompanied by two dancers. After the video was released, Madonna's style and mannerisms became a fashion trend among the younger generation. Scholars noted that in the video, Madonna portrayed herself as narcissistic and an **ambiguous character**. She referred to herself as the lucky star, unlike the lyrical meaning of the song.

P2: The music video portrayed Madonna dancing in front of a white background, accompanied by two dancers. After the video was released, Madonna's style and mannerisms became a fashion trend among the younger generation. Scholars noted that in the video, Madonna portrayed herself as narcissistic and an **obscure personality**. She referred to herself as the lucky star, unlike the lyrical meaning of the song.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **ambiguous character** and **obscure personality** interchangeable (i.e., having the same meaning)?

Pair 1589

P1: An example of "articulated" oars is the "RowVista" forward rowing system, whose patent was issued in 2019. An opposite four-bar linkage reverses the movement direction of the oar handle and transfers it through a coupling rod to the oar blade. This **specific mechanism** also allows manual feathering of the oar blade, which is an essential part of the sculling motion. "Push rowing", also called "back-watering" if used in a boat not designed for forward motion, uses regular oars with a pushing motion to achieve forward-facing travel, sometimes seated and sometimes standing.

P2: An example of "articulated" oars is the "RowVista" forward rowing system, whose patent was issued in 2019. An opposite four-bar linkage reverses the movement direction of the oar handle and transfers it through a coupling rod to the oar blade. This **distinct mode of action** also allows manual feathering of the oar blade, which is an essential part of the sculling motion. "Push rowing", also called "back-watering" if used in a boat not designed for forward motion, uses regular oars with a pushing motion to achieve forward-facing travel, sometimes seated and sometimes standing.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **specific mechanism** and **distinct mode of action** interchangeable (i.e., having the same meaning)?

Pair 1590

P1: Examples. A typical selection of gambling games offered at an online casino might include: Bonuses. Many online casinos offer sign-up bonuses to new players making their first deposit, and often on **subsequent play** as well. These bonuses are a form of marketing that may incur a cost (potentially justifiable in order to attract a new player who may return and deposit many more times), since the casino is essentially giving away money in return for a commitment from the player to wager a certain minimum amount before they are allowed to withdraw.

P2: Examples. A typical selection of gambling games offered at an online casino might include: Bonuses. Many online casinos offer sign-up bonuses to new players making their first deposit, and often on **successive games** as well. These bonuses are a form of marketing that may incur a cost (potentially justifiable in order to attract a new player who may return and deposit many more times), since the casino is essentially giving away money in return for a commitment from the player to wager a certain minimum amount before they are allowed to withdraw.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **subsequent play** and **successive games** interchangeable (i.e., having the same meaning)?

Pair 1591

P1: Furnace brazing is a semi-automatic process used widely in industrial brazing operations due to its adaptability to mass production and use of unskilled labor. There are many advantages of furnace brazing over other heating methods that make it ideal for mass production. **one main advantage** is the ease with which it can produce large numbers of small parts that are easily jigged or self-locating. The process also offers the benefits of a controlled heat cycle (allowing use of parts that might distort under localized heating) and no need for post braze cleaning.

P2: Furnace brazing is a semi-automatic process used widely in industrial brazing operations due to its adaptability to mass production and use of unskilled labor. There are many advantages of furnace brazing over other heating methods that make it ideal for mass production. **a principle benefit** is the ease with which it can produce large numbers of small parts that are easily jigged or self-locating. The process also offers the benefits of a controlled heat cycle (allowing use of parts that might distort under localized heating) and no need for post braze cleaning.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one main advantage** and **a principle benefit** interchangeable (i.e., having the same meaning)?

Pair 1592

P1: The claws are also serrated with large points on the insides. The carapace, or shell, of the crab can range from pale orange to light gray, and can be spotted with brown and red. **The carapace is a rough oval shape, and the front end has five teeth to either side of the eyes.** Paddle crabs can reach sizes ranging from 100–140 mm across the shell upon reaching maturity.

P2: The claws are also serrated with large points on the insides. The carapace, or shell, of the crab can range from pale orange to light gray, and can be spotted with brown and red. **The carapace is a rugged circular form, and the front end has five teeth to either side of the eyes.** Paddle crabs can reach sizes ranging from 100–140 mm across the shell upon reaching maturity.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **rough oval shape** and **rugged circular form** interchangeable (i.e., having the same meaning)?

Pair 1593

P1: Announcement. On March 14, 2019, O'Rourke officially announced that he is running for president for the 2020 election. **The first outlet confirming his announcement was KTSM-TV, El Paso's local NBC-affiliated TV station, where his former brother-in-law was once the news director.** Speaking events.

P2: Announcement. On March 14, 2019, O'Rourke officially announced that he is running for president for the 2020 election. **The first outlet confirming his announcement was KTSM-TV, El Paso's local NBC-affiliated TV station, where his ex-sibling (in-law)-in-law was once the news director.** Speaking events.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **former brother** and **ex-sibling (in-law)** interchangeable (i.e., having the same meaning)?

Pair 1594

P1: The pedestal rests on a plinth of blocked rusticated brown sandstone on a stepped concrete base. The lower portion of the pedestal is columnar, with leaded marble plaques, and rests on a block with shaped corners. **The upper portion has a central wreathed column surrounded by colonnettes, and the statue is mounted on rounded base which caps the colonnettes.** The memorial contributes to the townscape of Forest Hill in its axial location at the end of the main street.

P2: The pedestal rests on a plinth of blocked rusticated brown sandstone on a stepped concrete base. The lower portion of the pedestal is columnar, with leaded marble plaques, and rests on a block with shaped corners. The upper portion has a central wreathed column surrounded by colonnettes, and the statue is mounted on curved foundation which caps the colonnettes. The memorial contributes to the townscape of Forest Hill in its axial location at the end of the main street.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are rounded base and curved foundation interchangeable (i.e., having the same meaning)?

Pair 1595

P1: Some of the faculty continue to hold positions at their universities while also working for Apple. The instructors include: Courses. Some of the courses teach case studies about important business decisions that Apple made. These strategic decisions include the one to make the iPod and its iTunes software compatible with Microsoft's Windows system.

P2: Some of the faculty continue to hold positions at their universities while also working for Apple. The instructors include: Courses. Some of the courses teach practical examples about important business decisions that Apple made. These strategic decisions include the one to make the iPod and its iTunes software compatible with Microsoft's Windows system.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are case studies and practical examples interchangeable (i.e., having the same meaning)?

Pair 1596

P1: The Murphys are a musical family band from County Kerry, Ireland. The band, consisting of three sisters and their father, was the first band from County Kerry to make it to the top of the iTunes Country charts. The band began releasing singles in 2013, before releasing their first album "breaking ground" in 2016. They co-wrote "The Man Who Loved Me First" with Derek Ryan.

P2: The Murphys are a musical family band from County Kerry, Ireland. The band, consisting of three sisters and their father, was the first band from County Kerry to make it to the top of the iTunes Country charts. The band began releasing singles in 2013, before releasing their first album "Breaking Ground" in 2016. They co-wrote "The Man Who Loved Me First" with Derek Ryan.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are breaking ground and Breaking Ground interchangeable (i.e., having the same meaning)?

Pair 1597

P1: He had previously said that a post-Brexit trade deal "should be the easiest in human history". By July 2019 he recognised that a deal with the US would "take time" and that despite reaching "above 99% of agreement" on a deal based on Canada's existing deal with the EU, the Canadians were now looking at the zero-tariff access being promised in the event of no deal. On 30 November 2018, he came out in support for Theresa May's Brexit deal, calling it the best possible deal that safely delivers Brexit. World Trade Organisation candidate.

P2: He had previously said that a post-Brexit trade deal "should be the easiest in human history". By July 2019 he recognised that a deal with the US would "take time" and that despite reaching "above 99% of agreement" on a deal based on Canada's existing deal with the EU, the Canadians were now looking at the zero-tariff access being promised in the event of no deal. On 30 November 2018, he came out in support for Theresa May's Brexit deal, calling it the most ideal feasible plan that safely delivers Brexit. World Trade Organisation candidate.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **best possible deal** and **most ideal feasible plan** interchangeable (i.e., having the same meaning)?

Pair 1598

P1: There is also an Upland Hunter (UH) title awarded to dogs that pass a separate and distinct upland hunting test which can be run in conjunction with a regular test as a stand-alone test. To gain these titles there are four levels of testing where dogs earn points toward these specific titles. **Each of these tests are of increasing difficulty and require increasing refinement in skill level that a hunting retriever must demonstrate while under judgment.** These test levels are the; Started, Seasoned and Finished tests which are offered by regional HRC clubs.

P2: There is also an Upland Hunter (UH) title awarded to dogs that pass a separate and distinct upland hunting test which can be run in conjunction with a regular test as a stand-alone test. To gain these titles there are four levels of testing where dogs earn points toward these specific titles. **Each of these tests are of increasing difficulty and require increasing refinement in precise expertise that a hunting retriever must demonstrate while under judgment.** These test levels are the; Started, Seasoned and Finished tests which are offered by regional HRC clubs.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **skill level** and **precise expertise** interchangeable (i.e., having the same meaning)?

Pair 1599

P1: With the death of Saladin in 1193, the Ayyubid Empire disintegrated and was divided among his sons. This led to struggles between various principalities as alliances were formed and dissolved. **Jerusalem lost its status as the capital and religious center, and became a provincial city in an empire whose center was often Damascus or Cairo.** However, for the Crusaders it remained a focus for Christian–Muslim conflict.

P2: With the death of Saladin in 1193, the Ayyubid Empire disintegrated and was divided among his sons. This led to struggles between various principalities as alliances were formed and dissolved. **Jerusalem lost its status as the capital and religious center, and became a provincial city in an empire the heart of which was often Damascus or Cairo.** However, for the Crusaders it remained a focus for Christian–Muslim conflict.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **whose center** and **the heart of which** interchangeable (i.e., having the same meaning)?

Pair 1600

P1: But when racers started buying them over any other design, these companies started frantic efforts to produce similar designs. In 1996, Salomon introduced the Axendo and Rossignol the Cut, their first shaped designs. **For the 1995/6 season, the new designs accounted for only 3% of total sales.** By the next year, with all the major players involved, they accounted for 50%.

P2: But when racers started buying them over any other design, these companies started frantic efforts to produce similar designs. In 1996, Salomon introduced the Axendo and Rossignol the Cut, their first shaped designs. **For the 1995/96 period, the new designs accounted for only 3% of total sales.** By the next year, with all the major players involved, they accounted for 50%.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **1995/6 season** and **1995/96 period** interchangeable (i.e., having the same meaning)?

Pair 1601

P1: The Steelers didn't cross midfield until the 4th quarter as snow began to fall. They kept the game close until Dick Shiner came off the bench and led them to a touchdown drive. A drive sputtered out with less than 2 minutes left but the Steelers got **yet another chance**. Shiner hit Roy Jefferson on a long pass to the Dallas 20 yard line but the game ended.

P2: The Steelers didn't cross midfield until the 4th quarter as snow began to fall. They kept the game close until Dick Shiner came off the bench and led them to a touchdown drive. A drive sputtered out with less than 2 minutes left but the Steelers got **a second do-over**. Shiner hit Roy Jefferson on a long pass to the Dallas 20 yard line but the game ended.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **yet another chance** and **a second do-over** interchangeable (i.e., having the same meaning)?

Pair 1602

P1: Cast-iron and steel construction were both relatively new techniques, and construction of the Diamond Exchange suffered a major setback in October 1893 when a powerful windstorm caused the incomplete cage to shift about from plumb. The problem was eventually traced back to oversized holes in splices on the cast-iron columns. Each new story added to the cage permitted **additional movement**, and the force of the wind was sufficient to cause the whole structure to tilt. To resolve the problem, the builders were forced to install "knee braces" at the ceiling line of each story, converting the original unbraced cage to a braced design.

P2: Cast-iron and steel construction were both relatively new techniques, and construction of the Diamond Exchange suffered a major setback in October 1893 when a powerful windstorm caused the incomplete cage to shift about from plumb. The problem was eventually traced back to oversized holes in splices on the cast-iron columns. Each new story added to the cage permitted **further motion**, and the force of the wind was sufficient to cause the whole structure to tilt. To resolve the problem, the builders were forced to install "knee braces" at the ceiling line of each story, converting the original unbraced cage to a braced design.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **additional movement** and **further motion** interchangeable (i.e., having the same meaning)?

Pair 1603

P1: As part of its partnership with the Deutsche-Bank Group, DVAG has been distributing banking products of Deutsche Bank (DB) and investment funds of DB subsidiary DWS since 2001. Further partners of the Frankfurt-based financial services provider are Commerzbank, HypoVereinsbank, DSL Bank, Santander Bank, Allianz Global Investors, and RREEF Investment GmbH (formerly: DB Real Estate Investment GmbH). The Deutsche Verrechnungsstelle (DV), also based in Frankfurt am Main, specializes in professional invoice management for **craft trades** and the SME sector. It offers products and services to ensure the liquidity of these companies.

P2: As part of its partnership with the Deutsche-Bank Group, DVAG has been distributing banking products of Deutsche Bank (DB) and investment funds of DB subsidiary DWS since 2001. Further partners of the Frankfurt-based financial services provider are Commerzbank, HypoVereinsbank, DSL Bank, Santander Bank, Allianz Global Investors, and RREEF Investment GmbH (formerly: DB Real Estate Investment GmbH). It offers products and services to ensure the liquidity of these companies.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **craft trades** and **handiwork jobs** interchangeable (i.e., having the same meaning)?

Pair 1604

P1: In areas near water sources is where the most diversity in crops can be found. Cattle and goats are the primary animal husbandry products. Many residents also use local reeds and wood in **craft trades**, such as expert woodworkers and Panama hat weavers. The streets are lined with merchants selling a wide variety of products, from fruits and vegetables, to street food, to clothing and items for the home.

P2: In areas near water sources is where the most diversity in crops can be found. Cattle and goats are the primary animal husbandry products. Many residents also use local reeds and wood in **artisan vocations**, such as expert woodworkers and Panama hat weavers. The streets are lined with merchants selling a wide variety of products, from fruits and vegetables, to street food, to clothing and items for the home.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **craft trades** and **artisan vocations** interchangeable (i.e., having the same meaning)?

Pair 1605

P1: Shortly after the announcement, campaign manager Rania Batrice and consulting firm Revolution Messaging departed from the campaign. "Politico" reported that sources "familiar with the campaign" referred to Gabbard as "indecisive and impulsive". Her staff insists that the vacancy in the campaign manager position is the result of **careful deliberation**, not campaign dysfunction." Debates.

P2: Shortly after the announcement, campaign manager Rania Batrice and consulting firm Revolution Messaging departed from the campaign. "Politico" reported that sources "familiar with the campaign" referred to Gabbard as "indecisive and impulsive". Her staff insists that the vacancy in the campaign manager position is the result of **conscientious contemplation**, not campaign dysfunction." Debates.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **careful deliberation** and **conscientious contemplation** interchangeable (i.e., having the same meaning)?

Pair 1606

P1: The early bumblebee or early-nesting bumblebee ("Bombus pratorum") is a small bumblebee with a wide distribution in most of Europe and parts of Asia. It is very commonly found in the UK and emerges to begin its colony cycle as soon as February which is earlier than most other species, hence its common name. There is **even some evidence** that the early bumblebee may be able to go through two colony cycles in a year. Like other bumblebees, "Bombus pratorum" lives in colonies with queen and worker castes.

P2: The early bumblebee or early-nesting bumblebee ("Bombus pratorum") is a small bumblebee with a wide distribution in most of Europe and parts of Asia. It is very commonly found in the UK and emerges to begin its colony cycle as soon as February which is earlier than most other species, hence its common name. There is **unexpectedly, a little indication** that the early bumblebee may be able to go through two colony cycles in a year. Like other bumblebees, "Bombus pratorum" lives in colonies with queen and worker castes.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **even some evidence** and **unexpectedly, a little indication** interchangeable (i.e., having the same meaning)?

Pair 1607

P1: Marc Horowitz (born July 19, 1976, Columbus, Ohio) is an American artist who works in a large variety of media including painting, drawing, sculpture, photography, performance and video. Biography. Marc Horowitz is a Los Angeles-based artist working in painting, performance, video, photography, sculpture, and **social practice**. He combines traditional drawing and painting styles, commercial photography, and new media to explore entertainment, class, commerce, failure, success, and personal meaning.

P2: Marc Horowitz (born July 19, 1976, Columbus, Ohio) is an American artist who works in a large variety of media including painting, drawing, sculpture, photography, performance and video. Biography. **Marc Horowitz is a Los Angeles-based artist working in painting, performance, video, photography, sculpture, and societal traditions.** He combines traditional drawing and painting styles, commercial photography, and new media to explore entertainment, class, commerce, failure, success, and personal meaning.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **social practice** and **societal traditions** interchangeable (i.e., having the same meaning)?

Pair 1608

P1: The mean income per "unit of consumption" (a weighted count of persons) in 2010 was €17,800, which was 12% above the figure for Spain. Similarly, the mean annual spending per "household" in the same year was €35,683, again 12% above the Spanish average. **one downside** of Madrid's rapid economic development since 1992 has been the rising **cost of living**. Although residential property prices have fallen by 39% since 2007, the average price of dwelling space was €2,375.6 per sq.

P2: The mean income per "unit of consumption" (a weighted count of persons) in 2010 was €17,800, which was 12% above the figure for Spain. Similarly, the mean annual spending per "household" in the same year was €35,683, again 12% above the Spanish average. **a particular disadvantage** of Madrid's rapid economic development since 1992 has been the rising **cost of living**. Although residential property prices have fallen by 39% since 2007, the average price of dwelling space was €2,375.6 per sq.

Please record your answer for the following question in the provided Google sheet

Pair 1616

P1: Criminal proceedings against police officers are generally avoided because of a lack of resources or the lack of will to investigate police corruption cases. Lastly, the Argentine law enforcement lacks mechanisms for transparency and accountability, rendering the police force a very hard institution to control. **The most deleterious effect of police corruption is the inefficacy of law enforcement to fight crime.** According to an investigation by La Nación, the police

force in Argentina has only been able to capture 32% of the alleged perpetrators of the most heinous crimes committed between July and August 2010.

P2: Criminal proceedings against police officers are generally avoided because of a lack of resources or the lack of will to investigate police corruption cases. Lastly, the Argentine law enforcement lacks mechanisms for transparency and accountability, rendering the police force a very hard institution to control. **The most detrimental consequence of police corruption is the inefficacy of law enforcement to fight crime.** According to an investigation by La Nación, the police force in Argentina has only been able to capture 32% of the alleged perpetrators of the most heinous crimes committed between July and August 2010.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **deleterious effect** and **detrimental consequence** interchangeable (i.e., having the same meaning)?

Pair 1617

P1: In cases of severe infection or the need for surgery, intravenous immunoglobulin therapy may be used. Prognosis. **This form of neutropenia disappears in two to three years of a child's life in 95% of cases.** The use of prophylactic antibiotics has been successfully demonstrated to reduce infection incidence without causing adverse effects among the 5% of children whose condition does not resolve itself.

P2: In cases of severe infection or the need for surgery, intravenous immunoglobulin therapy may be used. Prognosis. **This form of neutropenia disappears in two to three years of a minor's youth in 95% of cases.** The use of prophylactic antibiotics has been successfully demonstrated to reduce infection incidence without causing adverse effects among the 5% of children whose condition does not resolve itself.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **child's life** and **minor's youth** interchangeable (i.e., having the same meaning)?

Pair 1618

P1: A Seaside Flirtation () was a 1906 French silent comedy film directed by Georges Méliès. Plot. **On the beach, a young woman enters a bathing box to change from her bathing costume to her street clothes.** A young dandy, attempting to flirt with the woman, stops at a seaside restaurant near the bathing box to write her an amorous note.

P2: A Seaside Flirtation () was a 1906 French silent comedy film directed by Georges Méliès. Plot. **On the beach, a young woman enters a bathing box to change from her one-piece swimsuit to her street clothes.** A young dandy, attempting to flirt with the woman, stops at a seaside restaurant near the bathing box to write her an amorous note.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **bathing costume** and **one-piece swimsuit** interchangeable (i.e., having the same meaning)?

Pair 1619

P1: The UK versions had better picture quality and were brightened in colour compared to the darker Australian/New Zealand Palace R18+/M15+ releases. Any other versions of the film that came out after the initial VHS releases were a heavily edited and re-dubbed version. **every version of the film released after 1995 on VHS, DVD and Blu-ray contain this inferior edited version.** Random important scenes were cut altogether, some scenes re-edited as well as character lines and voices inexplicably changed.

P2: The UK versions had better picture quality and were brightened in colour compared to the darker Australian/New Zealand Palace R18+/M15+ releases. Any other versions of the film that came out after the initial VHS releases were a heavily edited and re-dubbed version. **each adaptation of the film released after 1995 on VHS, DVD and Blu-ray contain this inferior edited version.** Random important scenes were cut altogether, some scenes re-edited as well as character

lines and voices inexplicably changed.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **every version** and **each adaptation** interchangeable (i.e., having the same meaning)?

Pair 1620

P1: There are three primary types of potential transformers (PT): electromagnetic, capacitor, and optical. The electromagnetic potential transformer is a wire-wound transformer. The capacitor voltage transformer (CVT) uses a capacitance potential divider and is used at higher voltages due to a **lower cost** than an electromagnetic PT. An optical voltage transformer exploits the Faraday effect, rotating polarized light, in optical materials.

P2: There are three primary types of potential transformers (PT): electromagnetic, capacitor, and optical. The electromagnetic potential transformer is a wire-wound transformer. The capacitor voltage transformer (CVT) uses a capacitance potential divider and is used at higher voltages due to a **reduced charge** than an electromagnetic PT. An optical voltage transformer exploits the Faraday effect, rotating polarized light, in optical materials.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **lower cost** and **reduced charge** interchangeable (i.e., having the same meaning)?

Pair 1621

P1: The volume may be low because the internal bellows has discharged a part of the previous breath to the environment, or because an increase in depth has caused the contents to be compressed, or a combination of these causes. The oxygen used by the diver also slowly decreases the volume of gas in the loop. The steady state partial pressure, formula_1, in a passive addition loop can be calculated from the formula: Where: in a **consistent system** of units. Oxygen consumption and feed rate are strongly related, and the steady state oxygen concentration in the loop is independent of oxygen uptake and is likely to remain within fairly close tolerances of the calculated value for a given depth.

P2: The volume may be low because the internal bellows has discharged a part of the previous breath to the environment, or because an increase in depth has caused the contents to be compressed, or a combination of these causes. The oxygen used by the diver also slowly decreases the volume of gas in the loop. The steady state partial pressure, formula_1, in a passive addition loop can be calculated from the formula: Where: in a **persistent arrangement of units**. Oxygen consumption and feed rate are strongly related, and the steady state oxygen concentration in the loop is independent of oxygen uptake and is likely to remain within fairly close tolerances of the calculated value for a given depth.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **consistent system** and **persistent arrangement** interchangeable (i.e., having the same meaning)?

Pair 1622

P1: Jerky is lean trimmed meat that has been cut into strips and dried (dehydrated) to prevent spoilage. Normally, this drying includes the addition of salt to prevent **bacteria growth** before the meat has finished the dehydrating process. The word "jerky" derives from the Quechua word "ch'arki" which means "dried, salted meat".

P2: Jerky is lean trimmed meat that has been cut into strips and dried (dehydrated) to prevent spoilage. Normally, this drying includes the addition of salt to prevent **formation of pathogens** before the meat has finished the dehydrating process. The word "jerky" derives from the Quechua word "ch'arki" which means "dried, salted meat".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **bacteria growth** and **formation of pathogens** interchangeable (i.e., having the same meaning)?

Pair 1623

P1: He withdrew from the post on March 10, 2009. ZOA has been highly critical of Israeli security procedures on the Temple Mount in Jerusalem, which they claim discriminate against religious Jews. It questioned Israeli claims that these restrictions were truly necessary to maintain security, and demanded "unimpeded access" to the Temple Mount. In 2012 ZOA lost its charitable status in the United States, having failed to provide the Internal Revenue Service with tax returns for three consecutive years.

P2: He withdrew from the post on March 10, 2009. ZOA has been highly critical of Israeli security procedures on the Temple Mount in Jerusalem, which they claim discriminate against religious Jews. It questioned Israeli claims that these restrictions were truly necessary to maintain security, and demanded "unrestricted entry" to the Temple Mount. In 2012 ZOA lost its charitable status in the United States, having failed to provide the Internal Revenue Service with tax returns for three consecutive years.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **unimpeded access** and **unrestricted entry** interchangeable (i.e., having the same meaning)?

Pair 1624

P1: According to Agustín Courtoisie: "Anarchist pacifism and the once fashionable eugenics seem to be the concepts one can associate with [Relgis]". In favoring this option, Relgis identified himself with those of his anarchist forerunners who were also dedicated neo-Malthusians, and especially with Manuel Devaldès. He praised Devaldès' call for vasectomy as a **regulatory practice**, calling the procedure "a true revolution" in population growth. His works defended other anarchists who recommended the practice, including the tried anarchist eugenis Norbert Bardoseck and Pierre Ramus.

P2: According to Agustín Courtoisie: "Anarchist pacifism and the once fashionable eugenics seem to be the concepts one can associate with [Relgis]". In favoring this option, Relgis identified himself with those of his anarchist forerunners who were also dedicated neo-Malthusians, and especially with Manuel Devaldès. He praised Devaldès' call for vasectomy as a **means of governing**, calling the procedure "a true revolution" in population growth. His works defended other anarchists who recommended the practice, including the tried anarchist eugenis Norbert Bardoseck and Pierre Ramus.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **regulatory practice** and **means of governing** interchangeable (i.e., having the same meaning)?

Pair 1625

P1: The 1997 Constitution further requires the establishment of "an independent regulator" who shall be authorized to allocate spectra and monitor and regulate communications in Thailand. In 1998, to comply with the constitutional mandate, the parliament passed a law establishing two independent regulators, the National Telecommunication Commission (NTC) and the National Broadcasting Commission (NBC). The **regulatory practice** began in Thailand when the NTC was appointed by the king through the complex nomination procedure in 2005. The inception of NTC automatically terminates and transfers all power and authority in telecommunication sector from the Post and Telegraph Department (PTD) to the newly established independent commission.

P2: The 1997 Constitution further requires the establishment of "an independent regulator" who shall be authorized to allocate spectra and monitor and regulate communications in Thailand. In 1998, to comply with the constitutional mandate, the parliament passed a law establishing two independent regulators, the National Telecommunication Commission (NTC) and the National Broadcasting Commission (NBC). The **rule-enforcing process** began in Thailand when the NTC was appointed by the king through the complex nomination procedure in 2005. The inception of NTC automatically terminates and transfers all power and authority in telecommunication sector from the Post and Telegraph Department (PTD) to the newly established independent commission.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **regulatory practice** and **rule-enforcing process** interchangeable (i.e., having the same meaning)?

Pair 1626

P1: Latinos, among other foreigners, were accused of stealing jobs from Americans and contributing to the decline of the economy. In response to the growing, Anglo-American, frustration, the United States government forcibly removed 2 million Latinos with the majority of them being American citizens. **During these repatriations, local governments denied aid to those of Mexican descent, offered train fares to Mexico and raided Latino communities.** Hospitals removed Latinos with disabilities and illness while employers laid off Latino workers.

P2: Latinos, among other foreigners, were accused of stealing jobs from Americans and contributing to the decline of the economy. In response to the growing, Anglo-American, frustration, the United States government forcibly removed 2 million Latinos with the majority of them being American citizens. **During these repatriations, local governments denied aid to those of Mexican descent, offered track expenses to Mexico and raided Latino communities.** Hospitals removed Latinos with disabilities and illness while employers laid off Latino workers.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **train fares** and **track expenses** interchangeable (i.e., having the same meaning)?

Pair 1627

P1: Mustapha Abdul-Hamid entered Tamale Secondary School in 1987 for his Advanced level. In 1991, he entered the University of Cape Coast to pursue a Bachelor of Arts course with English Language, Classics and Religious Studies. **He eventually majored in Religious Studies, obtaining a Second Class, upper division.** He also pursued a Diploma in Education concurrently with the Degree program.

P2: Mustapha Abdul-Hamid entered Tamale Secondary School in 1987 for his Advanced level. In 1991, he entered the University of Cape Coast to pursue a Bachelor of Arts course with English Language, Classics and Religious Studies. **He eventually majored in Religious Studies, obtaining a Second Class, honors degree.** He also pursued a Diploma in Education concurrently with the Degree program.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **upper division** and **honors degree** interchangeable (i.e., having the same meaning)?

Pair 1628

P1: In 1994, Haasan became the first actor to charge 15 million per film. Some of his films were inspired by Hollywood films. In 2015, Haasan was criticised by the-then Tamil Nadu Finance Minister O. Panneerselvam, who stated that Haasan was "confused" and had "blabbered", unaware of the ground reality for his statement on the government's response to rain relief efforts. **Haasan was also criticised by "Nayakan" producer Muktha Srinivasan for his article in "The Hindu" taking unnecessary credit for that film.** Haasan has been accused of self-indulgence, and has been criticised for sexually explicit scenes and themes, offending religious sentiments and superficiality on social issues depicted in his films.

P2: In 1994, Haasan became the first actor to charge 15 million per film. Some of his films were inspired by Hollywood films. In 2015, Haasan was criticised by the-then Tamil Nadu Finance Minister O. Panneerselvam, who stated that Haasan was "confused" and had "blabbered", unaware of the ground reality for his statement on the government's response to rain relief efforts. **Haasan was also criticised by "Nayakan" producer Muktha Srinivasan for his article in "The Hindu" taking gratuitous acknowledgment for that film.** Haasan has been accused of self-indulgence, and has been criticised for sexually explicit scenes and themes, offending religious sentiments and superficiality on social issues depicted in his films.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **unnecessary credit** and **gratuitous acknowledgment** interchangeable (i.e., having the same meaning)?

Pair 1629

P1: If one were to measure a stretch of coastline with a yardstick, one would get a shorter result than if the same stretch were measured with a ruler. This is because one would be laying the ruler along a more curvilinear route than that followed by the yardstick. **The empirical evidence suggests a rule which, if extrapolated, shows that the measure length increases without limit as the measurement scale decreases towards zero.** This discussion implies that it is meaningless to talk about the length of a coastline; some other means of quantifying coastlines are needed.

P2: If one were to measure a stretch of coastline with a yardstick, one would get a shorter result than if the same stretch were measured with a ruler. This is because one would be laying the ruler along a more curvilinear route than that followed by the yardstick. **The empirical evidence suggests a rule which, if extrapolated, shows that the measure length increases without limit as the calculation scope decreases towards zero.** This discussion implies that it is meaningless to talk about the length of a coastline; some other means of quantifying coastlines are needed.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **measurement scale** and **calculation scope** interchangeable (i.e., having the same meaning)?

Pair 1630

P1: The other initiatives which compose the HSP are: Funding. From the beginning, a decision was made that an important part of the funding would come from the sponsoring agencies themselves, with the remainder made up of funds from governmental agencies. **A little over a quarter** of the funds for phase 1 came from the SCHR and InterAction with the rest coming from 10 governments. As the budget expanded in Phases 2 and 3, so did the number of government donors, shifting the balance, with governments contributing about 85% of the funds for the latter two phases.

P2: The other initiatives which compose the HSP are: Funding. From the beginning, a decision was made that an important part of the funding would come from the sponsoring agencies themselves, with the remainder made up of funds from governmental agencies. **A less than 1/3** of the funds for phase 1 came from the SCHR and InterAction with the rest coming from 10 governments. As the budget expanded in Phases 2 and 3, so did the number of government donors, shifting the balance, with governments contributing about 85% of the funds for the latter two phases.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **little over a quarter** and **less than 1/3** interchangeable (i.e., having the same meaning)?

Pair 1631

P1: Many new painting skills/techniques were innovated and developed, calligraphy was much more closely and perfectly combined with the art of painting. Chinese painting reached another climax in the mid and late Ming. **The painting was derived in a broad scale,** many new schools were born, and many outstanding masters emerged. Development.

P2: Many new painting skills/techniques were innovated and developed, calligraphy was much more closely and perfectly combined with the art of painting. Chinese painting reached another climax in the mid and late Ming. **The painting was derived in a vast scope,** many new schools were born, and many outstanding masters emerged. Development.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **broad scale** and **vast scope** interchangeable (i.e., having the same meaning)?

Pair 1632

P1: The two main findings that led to the founding of the MCCE were a shortage of both strategic airlift and sealift capabilities and the absence of a coordinating body to optimise strategic lift efficiency. The MCCE was officially established on 1 July 2007 as the merger of the earlier European Airlift Centre and the Sealift Co-ordination Centre. **On this date, the initial 15 signatory countries became official members.** The MCCE has since been through several cycles of expansion: Mission.

P2: The two main findings that led to the founding of the MCCE were a shortage of both strategic airlift and sealift capabilities and the absence of a coordinating body to optimise strategic lift efficiency. The MCCE was officially established on 1 July 2007 as the merger of the earlier European Airlift Centre and the Sealift Co-ordination Centre. **On this date, the initial 15 signatory countries became recognized constituents.** The MCCE has since been through several cycles of expansion: Mission.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **official members** and **recognized constituents** interchangeable (i.e., having the same meaning)?

Pair 1633

P1: Taxonomy and systematics. As of 2017, "Ctenophryne" includes two other genera, "Nelsonophryne" and "Melanophryne", in synonymy. **The latter might represent valid genera, but molecular analyses could not resolve their relationships in a robust way.** Placing "Nelsonophryne" and "Melanophryne" in the synonymy of "Ctenophryne" is an interim measure that avoids paraphyly, until new data might resolve the relationships.

P2: Taxonomy and systematics. As of 2017, "Ctenophryne" includes two other genera, "Nelsonophryne" and "Melanophryne", in synonymy. **The latter might represent valid genera, but molecular analyses could not resolve their relationships in a sturdy manner.** Placing "Nelsonophryne" and "Melanophryne" in the synonymy of "Ctenophryne" is an interim measure that avoids paraphyly, until new data might resolve the relationships.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **robust way** and **sturdy manner** interchangeable (i.e., having the same meaning)?

Pair 1634

P1: Finland is also procuring a new surface-to-air missile, with possible contenders being the AMRAAM-ER, IRIS-T SL, EMADS, SPYDER MR/LR or David's Sling systems. France. **The French military is scheduled to receive a 46% increase to its annual budget by 2025, compared to 2018.** As part of this, Project Scorpion aims to replace almost all mechanized vehicles in the army and upgrade the Leclerc tanks.

P2: Finland is also procuring a new surface-to-air missile, with possible contenders being the AMRAAM-ER, IRIS-T SL, EMADS, SPYDER MR/LR or David's Sling systems. France. **The French military is scheduled to receive a almost a 50% addition to its annual budget by 2025, compared to 2018.** As part of this, Project Scorpion aims to replace almost all mechanized vehicles in the army and upgrade the Leclerc tanks.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **46% increase** and **almost a 50% addition** interchangeable (i.e., having the same meaning)?

Pair 1635

P1: Compared to regular walking, Nordic walking (also called pole walking) involves applying force to the poles with each stride. Nordic walkers use more of their entire body (with greater intensity) and receive fitness building stimulation not present in normal walking for the chest, latissimus dorsi muscle, triceps, biceps, shoulder, abdominals, spinal and other core muscles that may result in significant increases in heart rate at a given pace. **Nordic walking has been**

estimated as producing up to a **46% increase** in energy consumption, compared to walking without poles. According to the findings of the research, conducted by the group scientists from various universities*, both Nordic walking and conventional walking are beneficial for older adults.

P2: Compared to regular walking, Nordic walking (also called pole walking) involves applying force to the poles with each stride. Nordic walkers use more of their entire body (with greater intensity) and receive fitness building stimulation not present in normal walking for the chest, latissimus dorsi muscle, triceps, biceps, shoulder, abdominals, spinal and other core muscles that may result in significant increases in heart rate at a given pace. Nordic walking has been estimated as producing up to a **about a 46% improvement** in energy consumption, compared to walking without poles. According to the findings of the research, conducted by the group scientists from various universities*, both Nordic walking and conventional walking are beneficial for older adults.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **46% increase** and **about a 46% improvement** interchangeable (i.e., having the same meaning)?

Pair 1636

P1: The climate is cold and semi-arid. Administratively, the park is located in the Kosh-Agachsky District of the Altai Republic. While ecotourism has a **stated role**, visits to the territory currently require special passes from park administration, and activities are limited to roads and trails. Topography.

P2: The climate is cold and semi-arid. Administratively, the park is located in the Kosh-Agachsky District of the Altai Republic. While ecotourism has a **specified place of importance**, visits to the territory currently require special passes from park administration, and activities are limited to roads and trails. Topography.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **stated role** and **specified place of importance** interchangeable (i.e., having the same meaning)?

Pair 1637

P1: Though the title was originally used for pieces made in Canada by Mann, the company that came to be known as Contraband did not begin until the 1985 San Francisco group, starting as a research project for "Evol". Rehearsals were highly research-based, using contact improv and theatrical experimentation from which to develop material. Collaborators regularly contributed beyond their **stated role**: the lighting designer sang, the composer acted, and the dancers played music, sang, and acted. Related Projects.

P2: Though the title was originally used for pieces made in Canada by Mann, the company that came to be known as Contraband did not begin until the 1985 San Francisco group, starting as a research project for "Evol". Rehearsals were highly research-based, using contact improv and theatrical experimentation from which to develop material. Collaborators regularly contributed beyond their **designated position**: the lighting designer sang, the composer acted, and the dancers played music, sang, and acted. Related Projects.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **stated role** and **designated position** interchangeable (i.e., having the same meaning)?

Pair 1638

P1: So, a target decrease in the federal funds rate, formula_1, shifts the MP curve to the right, which results in a decrease in the real interest rate and an increase in the inflation rate. IS curve. The IS curve displays a **negative relationship** between the real interest rate, located on the vertical axis, and total output, on the horizontal axis. Shifts on the IS curve are produced by actions of the government and consumers.

P2: So, a target decrease in the federal funds rate, formula_1, shifts the MP curve to the right, which results in a decrease in the real interest rate and an increase in the inflation rate. IS curve. The IS curve displays a **diametric connection** between the real interest rate, located on the vertical axis, and total output, on the horizontal axis. Shifts on the IS curve are produced by actions of the government and consumers.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **negative relationship** and **diametric connection** interchangeable (i.e., having the same meaning)?

Pair 1639

P1: Peak Rail, a local preserved railway, has reopened the line from Matlock to Rowsley, a village a few miles east of Bakewell, near Haddon Hall. Reaching Bakewell is one of Peak Rail's long-term ambitions. To keep up intentions for a **future return** of the railway, Derbyshire County Council currently protects the track bed from development. Cuisine.

P2: Peak Rail, a local preserved railway, has reopened the line from Matlock to Rowsley, a village a few miles east of Bakewell, near Haddon Hall. Reaching Bakewell is one of Peak Rail's long-term ambitions. To keep up intentions for a **subsequent restoration** of the railway, Derbyshire County Council currently protects the track bed from development. Cuisine.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **future return** and **subsequent restoration** interchangeable (i.e., having the same meaning)?

Pair 1640

P1: Rebranding and expansion of transportation services. In January 2016, GrabTaxi was rebranded as "Grab", which encompasses all the company's products: GrabCar (personal cars), GrabBike (motorcycle taxis), GrabHitch (carpooling) and GrabExpress (last mile delivery) with a new, redesigned logo. In October 2016, Grab added an in-app instant messaging feature called "GrabChat" to allow **simple communication** between riders and drivers. GrabChat can even translate messages if the set languages of the driver and passenger are different.

P2: Rebranding and expansion of transportation services. In January 2016, GrabTaxi was rebranded as "Grab", which encompasses all the company's products: GrabCar (personal cars), GrabBike (motorcycle taxis), GrabHitch (carpooling) and GrabExpress (last mile delivery) with a new, redesigned logo. In October 2016, Grab added an in-app instant messaging feature called "GrabChat" to allow **basic conversations** between riders and drivers. GrabChat can even translate messages if the set languages of the driver and passenger are different.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **simple communication** and **basic conversations** interchangeable (i.e., having the same meaning)?

Pair 1641

P1: Other organizations, such as the Medical Protection Society and a number of university departments, are often consulted by British doctors regarding issues relating to ethics. Ethics committees. Often, **simple communication** is not enough to resolve a conflict, and a hospital ethics committee must convene to decide a complex matter. These bodies are composed primarily of healthcare professionals, but may also include philosophers, lay people, and clergy – indeed, in many parts of the world their presence is considered mandatory in order to provide balance.

P2: Other organizations, such as the Medical Protection Society and a number of university departments, are often consulted by British doctors regarding issues relating to ethics. Ethics committees. Often, **straightforward discussion** is not enough to resolve a conflict, and a hospital ethics committee must convene to decide a complex matter. These bodies are composed primarily of healthcare professionals, but may also include philosophers, lay people, and clergy –

indeed, in many parts of the world their presence is considered mandatory in order to provide balance.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **simple communication** and **straightforward discussion** interchangeable (i.e., having the same meaning)?

Pair 1642

P1: From 1749, the import of seal oil to England was being recorded annually, and was used as lighting oil, for cooking, in the manufacture of soap and for the treating of leather. South Atlantic. **It was in the South Seas that sealing became a major enterprise from the late 18th century.** Samuel Enderby, along with Alexander Champion and John St Barbe organized the first commercial expedition to the South Atlantic Ocean in 1776, initially with the primary aim of whaling, although sealing began to play a prominent part in the operation as well.

P2: From 1749, the import of seal oil to England was being recorded annually, and was used as lighting oil, for cooking, in the manufacture of soap and for the treating of leather. South Atlantic. **It was in the South Seas that sealing became a leading business operation from the late 18th century.** Samuel Enderby, along with Alexander Champion and John St Barbe organized the first commercial expedition to the South Atlantic Ocean in 1776, initially with the primary aim of whaling, although sealing began to play a prominent part in the operation as well.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **major enterprise** and **leading business operation** interchangeable (i.e., having the same meaning)?

Pair 1643

P1: In 1718–1719, Mattarnovi built a mansion for the Procurator General of the Senate, P. I. Yaguzhinsky, on the Palace Embankment. Mattarnovi built "Mytny (Gostinny) Dvor" on the intersection of Nevsky Prospect and Moyka River (1716–1720). **The building was destroyed by fire in 1736 and a new Gostiny Dvor was built on a different spot.** Mattarnovi was the originator of the "standard houses" built on Petrogradsky Island and the first version of Saint Isaac's Cathedral, built from 1717—1723.

P2: In 1718–1719, Mattarnovi built a mansion for the Procurator General of the Senate, P. I. Yaguzhinsky, on the Palace Embankment. Mattarnovi built "Mytny (Gostinny) Dvor" on the intersection of Nevsky Prospect and Moyka River (1716–1720). **The building was destroyed by fire in 1736 and a new Gostiny Dvor was built on a new space.** Mattarnovi was the originator of the "standard houses" built on Petrogradsky Island and the first version of Saint Isaac's Cathedral, built from 1717—1723.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **different spot** and **new space** interchangeable (i.e., having the same meaning)?

Pair 1644

P1: During their performance, Nação Zumbi's guitarist was seen with a sign reading "Fora Temer" ("Temer, Get Out"), referencing President of Brazil Michel Temer. Following the official handover ceremony, a cultural presentation was held to showcase Tokyo, host city of the 2020 Summer Paralympics. **A video segment highlighted Tokyo's past hosting of the second canonical Paralympics in 1964, which were the first to use the term "Paralympic".** The presentation, entitled "Positive Switch", starred Gimico—a Japanese top model with a prosthetic leg, along with Koichi Omae (a dancer who lost part of one of his legs following an accident involving a drunk driver), and visually-impaired performer Akira Hiyama—who "[shared] his view of Tokyo from his imagination".

P2: During their performance, Nação Zumbi's guitarist was seen with a sign reading "Fora Temer" ("Temer, Get Out"), referencing President of Brazil Michel Temer. Following the official handover ceremony, a cultural presentation was held to showcase Tokyo, host city of the 2020 Summer Paralympics. **A broadcast piece highlighted Tokyo's past hosting of the second canonical Paralympics in 1964, which were the first to use the term "Paralympic".** The presentation, enti-

tled "Positive Switch", starred Gimico—a Japanese top model with a prosthetic leg, along with Koichi Omae (a dancer who lost part of one of his legs following an accident involving a drunk driver), and visually-impaired performer Akira Hiyama—who "[shared] his view of Tokyo from his imagination".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **video segment** and **broadcast piece** interchangeable (i.e., having the same meaning)?

Pair 1645

P1: Given a well-defined economy[2][4], there could be many stable equilibrium states – some are more desirable than others from a social welfare point of view. Many factors contribute to the existence of undesirable equilibriums, among which two are crucial for underemployment equilibrium: oversupply and insufficient demand. **When the labor force are overeducated for the skill level of available employment opportunities in the economy, an underemployment equilibrium will occur.** Insufficient demand addresses the same issue at the macro level.

P2: Given a well-defined economy[2][4], there could be many stable equilibrium states – some are more desirable than others from a social welfare point of view. Many factors contribute to the existence of undesirable equilibriums, among which two are crucial for underemployment equilibrium: oversupply and insufficient demand. **When the labor force are overeducated for the necessary degree of competence of available employment opportunities in the economy, an underemployment equilibrium will occur.** Insufficient demand addresses the same issue at the macro level.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **skill level** and **necessary degree of competence** interchangeable (i.e., having the same meaning)?

Pair 1646

P1: Club colours. Orrell traditionally played in black and amber hooped shirts until they formed their first major technical partnership in 1993 with Nuttalls, seeing them switch to an all-black home kit with yellow, red and white hoops on the arms. **The away for that season was a reverse with amber the dominant color.** They employed a white version of this kit for their European tours and a red away version for the 1994–95 season.

P2: Club colours. Orrell traditionally played in black and amber hooped shirts until they formed their first major technical partnership in 1993 with Nuttalls, seeing them switch to an all-black home kit with yellow, red and white hoops on the arms. **The away for that season was a reverse with amber the main shade.** They employed a white version of this kit for their European tours and a red away version for the 1994–95 season.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **dominant color** and **main shade** interchangeable (i.e., having the same meaning)?

Pair 1647

P1: The greater part of disc three is devoted to two original compositions by Billy Strayhorn, inspired by Fitzgerald's life, character, and artistry. Fitzgerald's performance on this album won her the Grammy Award for Best Jazz Performance, Individual, at the 1st Annual Grammy Awards. **The album was released in two volumes: The first volume comprised Fitzgerald with the Ellington orchestra, the second of Fitzgerald with a small group setting.** This album marked the start of a fruitful artistic relationship for Fitzgerald and Ellington.

P2: The greater part of disc three is devoted to two original compositions by Billy Strayhorn, inspired by Fitzgerald's life, character, and artistry. Fitzgerald's performance on this album won her the Grammy Award for Best Jazz Performance, Individual, at the 1st Annual Grammy Awards. **The album was released in two volumes: The first volume comprised Fitzgerald with the Ellington orchestra, the second of Fitzgerald with a modest band arrangement.** This album marked the start of a fruitful artistic relationship for Fitzgerald and Ellington.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **small group setting** and **modest band arrangement** interchangeable (i.e., having the same meaning)?

Pair 1648

P1: thyroxine, cortisol, testosterone), drugs, and other molecules are bound to albumin in the bloodstream and must be released from albumin before becoming biologically active. For example, calcium binds to albumin; in hypoalbuminemia, there is an increased amount of free ionized calcium, its biologically active form. **In the presence of hypoalbuminemia, these functions are differentially affected, and the mechanisms by which they affect disease outcomes remains an area of active debate.** Diagnosis.

P2: thyroxine, cortisol, testosterone), drugs, and other molecules are bound to albumin in the bloodstream and must be released from albumin before becoming biologically active. For example, calcium binds to albumin; in hypoalbuminemia, there is an increased amount of free ionized calcium, its biologically active form. **In the presence of hypoalbuminemia, these functions are differentially affected, and the mechanisms by which they affect disease outcomes remains an area of continuous disagreement.** Diagnosis.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **active debate** and **continuous disagreement** interchangeable (i.e., having the same meaning)?

Pair 1649

P1: The series was regularly aired beginning September 10, 2005; 26 episodes by March 11, 2006. The show was then in rerun until August 19, 2006. **The show resumed its run on November 13, 2007, exclusively on the network's web site and released its finale episode on May 2, 2008.** Episode 30 was never released or dubbed in English.

P2: The series was regularly aired beginning September 10, 2005; 26 episodes by March 11, 2006. The show was then in rerun until August 19, 2006. **The show resumed its run on November 13, 2007, exclusively on the television station's internet profile and released its finale episode on May 2, 2008.** Episode 30 was never released or dubbed in English.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **network's web site** and **television station's internet profile** interchangeable (i.e., having the same meaning)?

Pair 1650

P1: Luleå Hamnfestival (Luleå harbor festival) is a big summer event in the center of Luleå, mostly centered around the north harbor. The festival has been a recurring event each summer since 2013. **Held in July, it is a free event not targeting a specific group.** The festival is the new version of Luleåkalaset which was held each summer from 2002 to 2012, which itself replaced sjöslaget, the summer festival from 1988 to 2002.

P2: Luleå Hamnfestival (Luleå harbor festival) is a big summer event in the center of Luleå, mostly centered around the north harbor. The festival has been a recurring event each summer since 2013. **Held in July, it is a free event not targeting a distinct category.** The festival is the new version of Luleåkalaset which was held each summer from 2002 to 2012, which itself replaced sjöslaget, the summer festival from 1988 to 2002.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **specific group** and **distinct category** interchangeable (i.e., having the same meaning)?

Pair 1651

P1: Demographics. Characteristics. Although 1.55 million people in Germany hold Turkish citizenship, this figure is not a true representation of the total Turkish population. This is because the German state does not categorise immigrants, or their descendants, in terms of ethnicity.

P2: Demographics. Characteristics. Although almost two million persons in Germany hold Turkish citizenship, this figure is not a true representation of the total Turkish population. This is because the German state does not categorise immigrants, or their descendants, in terms of ethnicity.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are 1.55 million people and almost two million persons interchangeable (i.e., having the same meaning)?

Pair 1652

P1: [19] Condition. The current condition of Wing Generator has no further structural damages as of 2016. In July of 2014, Wing Generator received severe damage from a falling tree (see location history). The sculpture was sent to McKay Lodge Conservation Laboratory in Ohio where the sculpture was separated into various portions.

P2: [19] Condition. The current condition of Wing Generator has no further structural damages as of 2016. In July of 2014, Wing Generator received severe damage from a falling tree (see chain of custody). The sculpture was sent to McKay Lodge Conservation Laboratory in Ohio where the sculpture was separated into various portions.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are location history and chain of custody interchangeable (i.e., having the same meaning)?

Pair 1653

P1: The boys were 6 and 11 years old when the abuse began in 1994, and the acts cited included touching, masturbation and fellatio. Borremans denied the criminal charges in one of the cases, stating that the acts were consensual and occurred when the victim was not a minor. He was found guilty based on the victims' testimony, supported by expert opinion. Vangheluwe's resignation came at a time of increased media coverage of clerical sex abuse in Europe.

P2: The boys were 6 and 11 years old when the abuse began in 1994, and the acts cited included touching, masturbation and fellatio. Borremans denied the criminal charges in one of the cases, stating that the acts were consensual and occurred when the victim was not a minor. He was found guilty based on the victims' testimony, supported by impressions of authoritative figures. Vangheluwe's resignation came at a time of increased media coverage of clerical sex abuse in Europe.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are expert opinion and impressions of authoritative figures interchangeable (i.e., having the same meaning)?

Pair 1654

P1: Located within a very favorable environment with low wind shear, warm sea surface temperatures, and abundant atmospheric moisture, the small tropical cyclone quickly intensified, reaching its peak intensity with maximum sustained winds of 65 mph (100 km/h) around 06:00 UTC on October 10. At that time, a well-defined eye feature was evident in microwave imagery. However, an abrupt increase in westerly wind shear brought an end to the strengthening trend, and Nadine began to weaken later that day. Turning sharply west-northwestward, Nadine encountered hostile environmental conditions which resulted in the cyclone weakening to a tropical depression at 18:00 UTC on October 12.

P2: Located within a very favorable environment with low wind shear, warm sea surface temperatures, and abundant atmospheric moisture, the small tropical cyclone quickly intensified, reaching its peak intensity with maximum sustained winds of 65 mph (100 km/h) around 06:00 UTC on October 10. At that time, a well-defined eye feature was evident in microwave imagery. However, an abrupt increase in westerly wind shear brought an end to the expanding course, and Nadine began to weaken later that day. Turning sharply west-northwestward, Nadine encountered hostile environmental conditions which resulted in the cyclone weakening to a tropical depression at 18:00 UTC on October 12.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **strengthening trend** and **expanding course** interchangeable (i.e., having the same meaning)?

Pair 1655

P1: Elfsborg lost with 2–1, after a goal by Daniel Alexandersson. The stadium was originally scheduled to be a tournament site for the 2009 UEFA European Under-21 Football Championship, but a sponsorship conflict with Max fast food chain's location at the stadium and official UEFA sponsor McDonald's, plus a contractual requirement for official sponsors to have a monopoly over the stadium's area, and a refusal to close the restaurant led to it losing its status as a site for the tournament. A strange conflict that led to Elfsborg and Borås Arena lost the championship as an arranger. 2006 was the highlight in Borås Arenas young history.

P2: Elfsborg lost with 2–1, after a goal by Daniel Alexandersson. The stadium was originally scheduled to be a tournament site for the 2009 UEFA European Under-21 Football Championship, but a sponsorship conflict with Max fast food chain's location at the stadium and official UEFA sponsor McDonald's, plus a contractual requirement for official sponsors to have a monopoly over the stadium's area, and a refusal to close the restaurant led to it losing its status as a site for the tournament. A bizarre clash that led to Elfsborg and Borås Arena lost the championship as an arranger. 2006 was the highlight in Borås Arenas young history.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **strange conflict** and **bizarre clash** interchangeable (i.e., having the same meaning)?

Pair 1656

P1: Although these quotas were subsequently removed, Raymond Franz claims "invisible" quotas remained, obliging Witnesses to meet certain levels of preaching work to remain in good standing in the congregation or to qualify for eldership. Franz describes repeated urging for adherents to "put kingdom interests first" and devote increasing amounts of time to door-to-door preaching efforts as coercive pressure. He says many Witnesses constantly feel guilty that they are not doing more in "field activity". Former Witnesses Heather and Gary Botting, claiming an emphasis on a personal track record would mean that salvation is effectively being "bought" with "good works", observed: "No matter how long a Witness remains an active distributor of literature, the moment he ceases to be active he is regarded by his peers as good as dead in terms of achieving the ultimate goal of life everlasting in an earthly paradise... Few realize upon entering the movement that the purchase price is open-ended and that the bill can never be paid in full until death or the advent of Armageddon."

P2: Although these quotas were subsequently removed, Raymond Franz claims "invisible" quotas remained, obliging Witnesses to meet certain levels of preaching work to remain in good standing in the congregation or to qualify for eldership. Franz describes repeated urging for adherents to "put kingdom interests first" and devote increasing amounts of time to door-to-door preaching efforts as coercive pressure. He says many Witnesses constantly feel guilty that they are not doing more in "neighborhood canvassing". Former Witnesses Heather and Gary Botting, claiming an emphasis on a personal track record would mean that salvation is effectively being "bought" with "good works", observed: "No matter how long a Witness remains an active distributor of literature, the moment he ceases to be active he is regarded by his peers as good as dead in terms of achieving the ultimate goal of life everlasting in an earthly paradise... Few realize upon entering the movement that the purchase price is open-ended and that the bill can never be paid in full until death or the advent of Armageddon."

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **field activity** and **neighborhood canvassing** interchangeable (i.e., having the same meaning)?

Pair 1657

P1: Black Mamba. Black Mamba was the team's fourteenth car, developed for the 2019 racing season, and utilized a sleeker, more aerodynamic design. During the 2019 World Solar Challenge, Black Mamba suffered a battery fire. The driver was able to escape and the burning battery was pulled from the frame of the car, leaving hopes that Black Mamba may be repairable for future events.

P2: Black Mamba. Black Mamba was the team's fourteenth car, developed for the 2019 racing season, and utilized a sleeker, more aerodynamic design. During the 2019 World Solar Challenge, Black Mamba suffered a combustion of its power supply. The driver was able to escape and the burning battery was pulled from the frame of the car, leaving hopes that Black Mamba may be repairable for future events.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are battery fire and combustion of its power supply interchangeable (i.e., having the same meaning)?

Pair 1658

P1: McBride was an administrator and member of the ethics committee at St. Joseph's Hospital and Medical Center, Phoenix, Arizona, which is owned by Catholic Healthcare West, later, Dignity Health. On 27 November 2009, the committee was consulted on the case of a 27-year-old woman who was eleven weeks pregnant with her fifth child and suffering from pulmonary hypertension. Her doctors stated that the woman's chance of dying if the pregnancy was allowed to continue was "close to 100 percent". McBride joined the ethics committee in approving the decision to terminate the pregnancy through an induced abortion.

P2: McBride was an administrator and member of the ethics committee at St. Joseph's Hospital and Medical Center, Phoenix, Arizona, which is owned by Catholic Healthcare West, later, Dignity Health. On 27 November 2009, the committee was consulted on the case of a 27-year-old woman who was eleven weeks pregnant with her fifth child and suffering from pulmonary hypertension. Her doctors stated that the woman's chance of dying if the pregnancy was allowed to continue was "almost a virtual certainty". McBride joined the ethics committee in approving the decision to terminate the pregnancy through an induced abortion.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are close to 100 percent and almost a virtual certainty interchangeable (i.e., having the same meaning)?

Pair 1659

P1: 37 watts of R.F. power is produced from 220 mW of drive but only a 50% duty cycle is allowed. The maximum allowable negative "control grid, g1" excursion allowable is -200 volts and average control grid current is 5mA in both A.M. and CW modes. Later versions could be used on CW with a supply voltage up to 750 V and a current of 100 mA to produce 50-55 watts of output power.

P2: 37 watts of R.F. power is produced from 220 mW of drive but only a 50% duty cycle is allowed. The maximum allowable negative "control grid, g1" excursion allowable is -200 volts and normal electrode grid current is 5mA in both A.M. and CW modes. Later versions could be used on CW with a supply voltage up to 750 V and a current of 100 mA to produce 50-55 watts of output power.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are average control and normal electrode interchangeable (i.e., having the same meaning)?

Pair 1660

P1: The Lutheran Church–Missouri Synod commemorates him as a patriarch on 31 March. Typological interpretation. In addition to honoring him, there was a **strong tendency** in the patristic period to view his life as a typological precursor to Christ. This tendency is represented in John Chrysostom who said that Joseph’s suffering was “a type of things to come”, Caesarius of Arles who interpreted Joseph’s famous coat as representative of the diverse nations who would follow Christ, Ambrose of Milan who interpreted the standing sheaf as prefiguring the resurrection of Christ, and others.

P2: The Lutheran Church–Missouri Synod commemorates him as a patriarch on 31 March. Typological interpretation. In addition to honoring him, there was a **fierce penchant** in the patristic period to view his life as a typological precursor to Christ. This tendency is represented in John Chrysostom who said that Joseph’s suffering was “a type of things to come”, Caesarius of Arles who interpreted Joseph’s famous coat as representative of the diverse nations who would follow Christ, Ambrose of Milan who interpreted the standing sheaf as prefiguring the resurrection of Christ, and others.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **strong tendency** and **fierce penchant** interchangeable (i.e., having the same meaning)?

Pair 1661

P1: Ghost Repeater is the third solo album from singer/songwriter Jeffrey Foucault. Produced by Bo Ramsey, “Ghost Repeater” was released on May 23, 2006, two years after the release of Foucault’s previous effort, “Stripping Cane”. The album represented a notable departure from Foucault’s previous records, favoring a rich texture over the **sparse nature** of Foucault’s earlier recordings. Reception.

P2: Ghost Repeater is the third solo album from singer/songwriter Jeffrey Foucault. Produced by Bo Ramsey, “Ghost Repeater” was released on May 23, 2006, two years after the release of Foucault’s previous effort, “Stripping Cane”. The album represented a notable departure from Foucault’s previous records, favoring a rich texture over the **austere character** of Foucault’s earlier recordings. Reception.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **sparse nature** and **austere character** interchangeable (i.e., having the same meaning)?

Pair 1662

P1: General selection separates out those who do not have physical and mental abilities to start the clearance diver course. A candidate must contest a strength test, fitness test and a water stress test. After passing the general selection, an applicant attends the **main selection**, performed in the winter. It comprises physical and mental exercises with little food and little sleep.

P2: General selection separates out those who do not have physical and mental abilities to start the clearance diver course. A candidate must contest a strength test, fitness test and a water stress test. After passing the general selection, an applicant attends the **primary trial**, performed in the winter. It comprises physical and mental exercises with little food and little sleep.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **main selection** and **primary trial** interchangeable (i.e., having the same meaning)?

Pair 1663

P1: “It’s being so cheerful that keeps me going” also remains in use, seen in British newspapers more than 100 times in the first two decades of the 21st century. Reputation. “The Times” commented that “ITMA” “achieved a humour of universal appeal and found eager listeners in **every rank** of society”. A 2002 history of Britain in the first half of the 20th century called the show “the most celebrated wartime radio programme ... praised by intellectuals for its surrealism

and wordplay, but loved by the mass listening public for its delirious silliness”.

P2: "It's being so cheerful that keeps me going" also remains in use, seen in British newspapers more than 100 times in the first two decades of the 21st century. Reputation. "The Times" commented that "ITMA" "achieved a humour of universal appeal and found eager listeners in each class of society". A 2002 history of Britain in the first half of the 20th century called the show "the most celebrated wartime radio programme ... praised by intellectuals for its surrealism and wordplay, but loved by the mass listening public for its delirious silliness".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are every rank and each class interchangeable (i.e., having the same meaning)?

Pair 1664

P1: In its later years, Pitch and Praise was criticized by some youth groups in attendance for hosting "controversial" speakers (i.e. LGBTQ+ affirming speakers, Peter Rollins, who considers himself Christian but not religious, and Drew Marshall, who titled himself an atheist at the time), while also drawing criticism from other groups for "playing it safe" with speakers (i.e. Hamilton pastor Kevin Makins was removed from the speaker lineup by denominational leadership for his open stance on LGBTQ+ issues.) Pitch and Praise was discontinued by the leadership of the Evangelical Missionary Church of Canada (EMCC), in 2018.

P2: In its later years, Pitch and Praise was criticized by some youth groups in attendance for hosting "controversial" speakers (i.e. LGBTQ+ affirming speakers, Peter Rollins, who considers himself Christian but not religious, and Drew Marshall, who titled himself an atheist at the time), while also drawing criticism from other groups for "playing it safe" with speakers (i.e. Hamilton pastor Kevin Makins was removed from the speaker lineup by denominational leadership for his tolerant viewpoint on LGBTQ+ issues.) Pitch and Praise was discontinued by the leadership of the Evangelical Missionary Church of Canada (EMCC), in 2018.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are open stance and tolerant viewpoint interchangeable (i.e., having the same meaning)?

Pair 1665

P1: In general relativity, the Aichelburg–Sexl ultraboost is an exact solution which models the spacetime of an observer moving towards or away from a spherically symmetric gravitating object at nearly the speed of light. It was introduced by Peter C. Aichelburg and Roman U. Sexl in 1971. The original motivation behind the ultraboost was to consider the gravitational field of massless point particles within general relativity. It can be considered an approximation to the gravity well of a photon or other lightspeed particle, although it does not take into account quantum uncertainty in particle position or momentum.

P2: In general relativity, the Aichelburg–Sexl ultraboost is an exact solution which models the spacetime of an observer moving towards or away from a spherically symmetric gravitating object at nearly the speed of light. It was introduced by Peter C. Aichelburg and Roman U. Sexl in 1971. The beginning impulse behind the ultraboost was to consider the gravitational field of massless point particles within general relativity. It can be considered an approximation to the gravity well of a photon or other lightspeed particle, although it does not take into account quantum uncertainty in particle position or momentum.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are original motivation and beginning impulse interchangeable (i.e., having the same meaning)?

Pair 1666

P1: The stocks will generally have wider forends, designed for use on stable sandbag rests, and high combs for easy use with optics. Since part of the definition of a "varmint" is that it is a nuisance, varmints are not stalked, but rather they are hunted from a fixed position. This makes weight of little consideration in a varmint rifle, so heavy bar-

rels are common. Varmints are also not subject to the same bag limits as game animals are, so far more shots may be fired.

P2: The stocks will generally have wider forends, designed for use on stable sandbag rests, and high combs for easy use with optics. Since part of the definition of a "varmint" is that it is a nuisance, varmints are not stalked, but rather they are hunted from a fixed position. This makes weight of slight regard in a varmint rifle, so heavy barrels are common. Varmints are also not subject to the same bag limits as game animals are, so far more shots may be fired.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are little consideration and slight regard interchangeable (i.e., having the same meaning)?

Pair 1667

P1: One Language Literature team went on to compete and receive honours at the State level. In 2018, the Social Sciences team won at the Sydney East Regional Finals, and are currently in the process of progressing to the State Final Green Edge. In 2009, green edge, the school's environmental committee began (unnamed until 2012). The aim of the team is to promote environmental sustainability within the school community.

P2: One Language Literature team went on to compete and receive honours at the State level. Pair 1670

P1: Only eleven states allow juries in any aspect of divorce litigation (Colorado, Georgia, Illinois, Louisiana, Maine, Nevada, New York, North Carolina, Tennessee, Texas and Wisconsin). Most of these limit the right to a jury to try issues regarding grounds or entitlement for divorce only. **Texas provides jury trial rights most broadly, including even the right to a jury trial on questions regarding child custody.** However, anyone who is charged with a criminal offense, breach of contract or federal offence has a Constitutional right to a trial by jury.

P2: Only eleven states allow juries in any aspect of divorce litigation (Colorado, Georgia, Illinois, Louisiana, Maine, Nevada, New York, North Carolina, Tennessee, Texas and Wisconsin). Most of these limit the right to a jury to try issues regarding grounds or entitlement for divorce only. **Texas provides jury trial rights most broadly, including also the privilege to a jury trial on questions regarding child custody.** However, anyone who is charged with a criminal offense, breach of contract or federal offence has a Constitutional right to a trial by jury.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **even the right** and **also the privilege** interchangeable (i.e., having the same meaning)?

Pair 1671

P1: Plot. The kidnapping of a wealthy Texas oil man is depicted in a "semi-documentary" style from differing points of view. **After the ransom is paid and the oil man is freed, he provides clues to assist investigators in locating the kidnappers.** The play was loosely based on the kidnapping of Charles F. Urschel.

P2: Plot. The kidnapping of a wealthy Texas oil man is depicted in a "semi-documentary" style from differing points of view. **After the ransom is paid and the petroleum guy is freed, he provides clues to assist investigators in locating the kidnappers.** The play was loosely based on the kidnapping of Charles F. Urschel.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **oil man** and **petroleum guy** interchangeable (i.e., having the same meaning)?

Pair 1672

P1: National Security Council executive director, Adm. Sidney Souers, appointed Jackson on February 13 to serve on the NSC's "Intelligence Survey Group" with Allen Dulles and Mathias Correa (an aide to then Sec. of Defense James Forrestal) for the purpose of analyzing departmental practices and inter-agency coordination. **The survey group, known as the "Dulles, Jackson, Correa Committee" or "Dulles Group", submitted its final report on February 28, 1949.** It was a scathing criticism of CIA and its operations under Director Roscoe H. Hillenkoetter, which resulted in the removal of several key persons at CIA and, eventually, the removal of Hillenkoetter.

P2: National Security Council executive director, Adm. Sidney Souers, appointed Jackson on February 13 to serve on the NSC's "Intelligence Survey Group" with Allen Dulles and Mathias Correa (an aide to then Sec. of Defense James Forrestal) for the purpose of analyzing departmental practices and inter-agency coordination. **The investigative team, known as the "Dulles, Jackson, Correa Committee" or "Dulles Group", submitted its final report on February 28, 1949.** It was a scathing criticism of CIA and its operations under Director Roscoe H. Hillenkoetter, which resulted in the removal of several key persons at CIA and, eventually, the removal of Hillenkoetter.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **survey group** and **investigative team** interchangeable (i.e., having the same meaning)?

Pair 1673

P1: As the heated game progresses, however, Bewstridge becomes determined to win. Crumbles reminds Bewstridge of his orders, but Bewstridge refuses to give up what he believes is his only chance of winning a cup. A tense match leads to an equal position at the eighteenth hole. A group comes consisting of Ponsford Botts, Irwin Botts, and the Botts dog, Alfonse.

P2: As the heated game progresses, however, Bewstridge becomes determined to win. Crumbles reminds Bewstridge of his orders, but Bewstridge refuses to give up what he believes is his only chance of winning a cup. A tense match leads to an equivalent spot at the eighteenth hole. A group comes consisting of Ponsford Botts, Irwin Botts, and the Botts dog, Alfonse.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are equal position and equivalent spot interchangeable (i.e., having the same meaning)?

Pair 1674

P1: Sometimes in this binary model, "sex", "gender" and "sexuality" are assumed by default to align. Gender systems around the world. In cultures where the gender binary is prominent and important, transgender people are a major exception to the societal norms related to gender. Intersex people, those who cannot be biologically determined as either male or female, are another obvious deviation.

P2: Sometimes in this binary model, "sex", "gender" and "sexuality" are assumed by default to align. Gender systems around the world. In cultures where the gender binary is prominent and important, transgender people are a significant deviation to the societal norms related to gender. Intersex people, those who cannot be biologically determined as either male or female, are another obvious deviation.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are major exception and significant deviation interchangeable (i.e., having the same meaning)?

Pair 1675

P1: This is something that is seen in two major magazines, "Newsweek" and "Time", which have been covering relations between the U.S. and Afghanistan over the last decade. Both of these publications distributed twenty leading articles that depicted about 57% of negative coverage in regards to current events in Afghanistan, about 37% neutral coverage, and only around 6% was positive information. This negative content would often consist of excessive mentioning of Al-Qaida and the Taliban, mistreatment of women, the recruitment of terrorists, etc. Numerous studies confirmed that the frequent repetition of a fact people might be convinced of it even if it is wrong, and this is called Illusory truth effect.

P2: This is something that is seen in two major magazines, "Newsweek" and "Time", which have been covering relations between the U.S. and Afghanistan over the last decade. Both of these publications distributed twenty leading articles that depicted about 57% of negative coverage in regards to current events in Afghanistan, about 37% neutral coverage, and only around 6% was positive information. This cynical coverage would often consist of excessive mentioning of Al-Qaida and the Taliban, mistreatment of women, the recruitment of terrorists, etc. Numerous studies confirmed that the frequent repetition of a fact people might be convinced of it even if it is wrong, and this is called Illusory truth effect.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are negative content and cynical coverage interchangeable (i.e., having the same meaning)?

Pair 1676

P1: An example of environmental racism that shows the enactment of environmental justice and reproductive justice is the Dakota access pipeline and protests at Standing Rock. The Standing Rock Sioux and other indigenous tribes have

been protesting the construction of the Dakota access pipeline and subsequent contamination of the surrounding waters since April 2016. Immigration and reproductive justice Reproductive justice includes the right to exercise autonomy over family structures and the right to reproduce. Oftentimes, deportation and immigration policy can affect family planning and structure in a fundamental way - if one parent is deported, it can lead to the restriction of a family's income and place an increased burden on a single parent.

P2: An example of environmental racism that shows the enactment of environmental justice and reproductive justice is the Dakota access pipeline and protests at Standing Rock. The Standing Rock Sioux and other indigenous tribes have been protesting the construction of the Dakota access pipeline and subsequent contamination of the surrounding waters since April 2016. Immigration and reproductive justice Reproductive justice includes the right to exercise autonomy over domestic arrangements and the right to reproduce. Oftentimes, deportation and immigration policy can affect family planning and structure in a fundamental way - if one parent is deported, it can lead to the restriction of a family's income and place an increased burden on a single parent.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are family structures and domestic arrangements interchangeable (i.e., having the same meaning)?

Pair 1677

P1: The consistent changes in the domestic structure and the gradual introduction of departmental teams was encouraged as it provided permanent jobs to players. Matches were rarely televised due to lack of quality cricket and lack of interest in departmental cricket. This inconsistent system was widely criticised on the basis of low quality cricket and reduced competition. In 2019, six regional teams were created on provincial lines.

P2: The consistent changes in the domestic structure and the gradual introduction of departmental teams was encouraged as it provided permanent jobs to players. Matches were rarely televised due to lack of quality cricket and lack of interest in departmental cricket. This inconsistent system was widely criticised on the basis of low quality cricket and decreased adversity in gameplay. In 2019, six regional teams were created on provincial lines.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are reduced competition and decreased adversity in gameplay interchangeable (i.e., having the same meaning)?

Pair 1678

P1: In 2007 the organization began hosting its competitions on the Open Architecture Network and every two years hosted its premier design competition, The Open Architecture Challenge. The year of the inaugural competition, the AMD Open Architecture Challenge, sought ideas to develop innovative off the grid technology centers. Clients included a chocolate co-operative in Ecuador, a youth center in Kenya and a medical organization in Nepal. The competition culminated in the construction of a youth community and resource center in Nairobi, Kenya.

Question: In both passages, are medical organization and health clinic interchangeable (i.e., having the same meaning)?

Pair 1679

P1: Teachers can also use short story collections as introduction or further exploration to a genre. By providing several works from that genre, students can get a feel of its conventions. Another potential use is to challenge students to evaluate and criticize literature by using short story collections as a **jumping off point**. The last idea is to use short story collections as a model for student writing since classical greats can be daunting or impossible for a student to replicate.

P2: Teachers can also use short story collections as introduction or further exploration to a genre. By providing several works from that genre, students can get a feel of its conventions. Another potential use is to challenge students to evaluate and criticize literature by using short story collections as a **springboard device**. The last idea is to use short story collections as a model for student writing since classical greats can be daunting or impossible for a student to replicate.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **jumping off point** and **springboard device** interchangeable (i.e., having the same meaning)?

Pair 1680

P1: The Swedish Transport Agency () is a Swedish government agency under the Ministry of Infrastructure. It was formed on 1 January 2009, through a merger of **several government agencies**, including the Civil Aviation Administration. It has its headquarters in Norrköping, Sweden.

P2: The Swedish Transport Agency () is a Swedish government agency under the Ministry of Infrastructure. It was formed on 1 January 2009, through a merger of **multiple administrative offices**, including the Civil Aviation Administration. It has its headquarters in Norrköping, Sweden.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **several government agencies** and **multiple administrative offices** interchangeable (i.e., having the same meaning)?

Pair 1681

P1: a dead-end or siding. Trains serving a bay platform must reverse in or out. A side platform is the more **usual type**, alongside tracks where the train arrives from one end and leaves towards the other. An island platform has through platforms on both sides; it may be indented on one or both ends, with bay platforms.

P2: a dead-end or siding. Trains serving a bay platform must reverse in or out. A side platform is the more **normal kind**, alongside tracks where the train arrives from one end and leaves towards the other. An island platform has through platforms on both sides; it may be indented on one or both ends, with bay platforms.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **usual type** and **normal kind** interchangeable (i.e., having the same meaning)?

Pair 1682

P1: She taught at the school for 12 years. Speicher was arrested and was being held on a \$75,000 cash bond at the Wayne County Jail. Speicher engaged in **sexual conduct** with one student in June 2008 and again sometime between August and October. She engaged in sexual conduct with a second student five times in January 2009, according to the indictment.

P2: She taught at the school for 12 years. Speicher was arrested and was being held on a \$75,000 cash bond at the Wayne County Jail. Speicher engaged in **sensual activity** with one student in June 2008 and again sometime between August and October. She engaged in sexual conduct with a second student five times in January 2009, according to the indictment.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **sexual conduct** and **sensual activity** interchangeable (i.e., having the same meaning)?

Pair 1683

P1: Furthermore, when the remaining 39 cards are included with all their combinations there are 53,644,737,765,488,792,839,237,4 (53.6 x 1027) different deals possible (formula_23) The immenseness of this number can be understood by answering the question "How large an area would you need to spread all possible bridge deals if each deal would occupy only one square millimeter?". The answer is: "an area more than a hundred million times the surface area of Earth". Obviously, the deals that are identical except for swapping—say—the 2 and the 3 would be unlikely to give a different result. To make the irrelevance of small cards explicit (which is not always the case though), in bridge such small cards are generally denoted by an 'x'.

P2: Furthermore, when the remaining 39 cards are included with all their combinations there are 53,644,737,765,488,792,839,237,4 (53.6 x 1027) different deals possible (formula_23) The immenseness of this number can be understood by answering the question "How large an area would you need to spread all possible bridge deals if each deal would occupy only one square millimeter?". The answer is: "an area more than a hundred million times the surface area of Earth". Obviously, the deals that are identical except for swapping—say—the 2 and the 3 would be unlikely to give a disparate outcome. To make the irrelevance of small cards explicit (which is not always the case though), in bridge such small cards are generally denoted by an 'x'.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are different result and disparate outcome interchangeable (i.e., having the same meaning)?

Pair 1684

P1: To accommodate the growth in the city, it moved to a larger facility from 1990-1998, located on Parker Road (and the current location of Plano West Senior High School). Shepton has since moved back to its original location and undergone many renovations to the building. In 2016, voters in Plano ISD approved a \$481 million dollar bond package, with a substantial amount dedicated to Shepton campus renovations. Awards.

P2: To accommodate the growth in the city, it moved to a larger facility from 1990-1998, located on Parker Road (and the current location of Plano West Senior High School). Shepton has since moved back to its original location and undergone many renovations to the building. In 2016, voters in Plano ISD approved a \$481 million dollar bond package, with a sizeable quantity dedicated to Shepton campus renovations. Awards.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are substantial amount and sizeable quantity interchangeable (i.e., having the same meaning)?

Pair 1685

P1: In Australia most licensed Customs Clearance Agents (commonly referred to as Customs Brokers) operate under a freight forwarder. Bangladesh. Freight forwarders must have a government license in Bangladesh. Canada.

P2: In Australia most licensed Customs Clearance Agents (commonly referred to as Customs Brokers) operate under a freight forwarder. Bangladesh. Freight forwarders must have a sanctioned permit in Bangladesh. Canada.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are government license and sanctioned permit interchangeable (i.e., having the same meaning)?

Pair 1686

P1: However, findings linking testosterone to status-seeking behaviours, especially in humans, are often inconsistent and leave room for critique. In some cases, testosterone has been seen to positively correlate with status-seeking behaviours such as aggression and competitiveness, however, testosterone has also been found to have weak or even null correlations with the same behaviours. Some scholars blame these inconsistencies on limitations in study methods, but the dual-hormone hypothesis has emerged as a theoretical explanation to some of these inconsistencies. Dual-Hormone Hypothesis.

P2: However, findings linking testosterone to status-seeking behaviours, especially in humans, are often inconsistent and leave room for critique. In some cases, testosterone has been seen to positively correlate with status-seeking behaviours such as aggression and competitiveness, however, testosterone has also been found to have weak or even null correlations with the same behaviours. Some scholars blame these inconsistencies on limitations in teaching approaches, but the dual-hormone hypothesis has emerged as a theoretical explanation to some of these inconsistencies. Dual-Hormone Hypothesis.

Question: In both passages, are high presence and significant existence interchangeable (i.e., having the same meaning)?

Pair 1709

P1: And now I was going to sit in the dark, and I could only see out of one eye. They put a big contact lens in." Initial versions of the costume were deemed "too human looking" and so a newer design was chosen. Lindala also created "Baby Mutato" costumes for the twin infants featured in "The Jerry Springer Show" scene, but the production crew had difficulty keeping the costumes on the children.

P2: And now I was going to sit in the dark, and I could only see out of one eye. They put a big contact lens in." Initial versions of the costume were deemed "too human looking" and so a more recent style was chosen. Lindala also created "Baby Mutato" costumes for the twin infants featured in "The Jerry Springer Show" scene, but the production crew had difficulty keeping the costumes on the children.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are newer design and more recent style interchangeable (i.e., having the same meaning)?

Pair 1710

P1: Briggs challenged Klitschko for a fight and accused Leapai of being an unworthy opponent for Klitschko. Leapai was knocked out by Klitschko in the fifth round of a fight scheduled for 12 rounds. Leapai was knocked down barely more than a minute into the bout. Klitschko retained his IBF, WBA, WBO and IBO championship belts and used his height and reach advantage to control the fight with Leapai.

P2: Briggs challenged Klitschko for a fight and accused Leapai of being an unworthy opponent for Klitschko. Leapai was knocked out by Klitschko in the fifth round of a fight scheduled for 12 rounds. Leapai was knocked down a little over a single moment into the bout. Klitschko retained his IBF, WBA, WBO and IBO championship belts and used his height and reach advantage to control the fight with Leapai.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **barely more than a minute** and **a little over a single moment** interchangeable (i.e., having the same meaning)?

Pair 1711

P1: They are heard reciting "Rama, Parasurama, Dasarathanandana Rama, Janakanandini Rama" while visiting houses. He never asks for alms during the entire course of his visit and accepts whatever is offered. Slowly this cultural presentation is diminishing delimiting the visit of Chakulia panda to houses and of them losing their livelihood. In popular culture.

P2: They are heard reciting "Rama, Parasurama, Dasarathanandana Rama, Janakanandini Rama" while visiting houses. He never asks for alms during the entire course of his visit and accepts whatever is offered. Slowly this traditional ethnic display is diminishing delimiting the visit of Chakulia panda to houses and of them losing their livelihood. In popular culture.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **cultural presentation** and **traditional ethnic display** interchangeable (i.e., having the same meaning)?

Pair 1712

P1: Medieval sails could be constructed with or without outer sailbars. Post-medieval mill sails have a lattice framework over which the sailcloth is spread. There are various "reefs" for the different spread of sails; these are "full sail", "dagger point", "sword point" and "first reef". The mill must be stopped in order to adjust the reefing of the sail.

P2: Medieval sails could be constructed with or without outer sailbars. Post-medieval mill sails have a lattice framework over which the sailcloth is spread. There are various "reefs" for the different spread of sails; these are "full sail", "dagger point", "a type of windmill sail configuration" and "first reef". The mill must be stopped in order to adjust the reefing of the sail.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **sword point** and **a type of windmill sail configuration** interchangeable (i.e., having the same meaning)?

Pair 1713

P1: The pope protested this but Emperor Henry IV agreed to permitting these reversions. The massacres began a new epoch for Jewry in Christendom. The Jews had preserved their faith from social pressure, now they had to preserve it at sword point. The massacres during the crusades strengthened Jewry from within spiritually.

P2: The pope protested this but Emperor Henry IV agreed to permitting these reversions. The massacres began a new epoch for Jewry in Christendom. The Jews had preserved their faith from social pressure, now they had to preserve it at a battle zone. The massacres during the crusades strengthened Jewry from within spiritually.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **sword point** and **a battle zone** interchangeable (i.e., having the same meaning)?

Pair 1714

P1: Their large frame and muscular bodies make them an ideal breed for meat production, however; they are also good for wool production as well. They are hardy sheep, a trait originating from their Norfolk Horn heritage. Suffolk rams are commonly used as a terminal sire on cross-bred ewes due to their ability to produce off-spring with excellent growth and carcass traits. Spider lamb syndrome is most common in the Suffolk breed.

P2: Their large frame and muscular bodies make them an ideal breed for meat production, however; they are also good for wool production as well. They are hardy sheep, a trait originating from their Norfolk Horn heritage. Suffolk rams are commonly used as a terminal sire on cross-bred ewes due to their ability to produce off-spring with successful development and carcass traits. Spider lamb syndrome is most common in the Suffolk breed.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are excellent growth and successful development interchangeable (i.e., having the same meaning)?

Pair 1715

P1: Mechanics. The StretchTrainer works by using the exerciser's own weight to stretch the major muscle groups. The user sits on the cushioned seat with their knees placed on the kneepad and hold the padded handlebars in front. The design ensures the correct stretching position to keep the spine aligned and prevent any straining.

P2: Mechanics. The StretchTrainer works by using the exerciser's own weight to stretch the major muscle groups. The user sits on the padded bench with their knees placed on the kneepad and hold the padded handlebars in front. The design ensures the correct stretching position to keep the spine aligned and prevent any straining.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are cushioned seat and padded bench interchangeable (i.e., having the same meaning)?

Pair 1716

P1: Additionally, Dewan is an Arabic term of Persian origin. The original meaning may refer to a "bundle (of written sheets)", hence "book", especially "book of accounts," and hence "office of accounts," "custom house," "council chamber". The meaning divan "long, cushioned seat" is due to such seats having been found along the walls in Middle Eastern council chambers. Purposes.

P2: Additionally, Dewan is an Arabic term of Persian origin. The original meaning may refer to a "bundle (of written sheets)", hence "book", especially "book of accounts," and hence "office of accounts," "custom house," "council chamber". The meaning divan "long, upholstered chair" is due to such seats having been found along the walls in Middle Eastern council chambers. Purposes.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are cushioned seat and upholstered chair interchangeable (i.e., having the same meaning)?

Pair 1717

P1: Democrats advocated universal suffrage for white males residing in the state for at least six months. They hoped to bring Irish immigrants, who were attracted to the state because of its canal projects, onto the voting rolls as Democrats. Lincoln supported the traditional Whig position that voting should be limited to property owners. Lincoln was elected on August 1, 1836, as the top vote getter in the Sangamon delegation.

P2: Democrats advocated universal suffrage for white males residing in the state for at least six months. They hoped to bring Irish immigrants, who were attracted to the state because of its canal projects, onto the voting rolls as Democrats. Lincoln supported the traditional Whig position that voting should be limited to residential proprietors. Lincoln was reelected on August 1, 1836, as the top vote getter in the Sangamon delegation.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are property owners and residential proprietors interchangeable (i.e., having the same meaning)?

Pair 1718

P1: Portsmouth Naval Base Property Trust (the "Trust") is responsible for the maintenance and the upkeep of all historic buildings within the heritage footprint of the Historic Dockyard, and operates an ongoing programme of conservation. In addition, The Trust founded the Memorial Flotilla, the finest collection of small boats involved in late 19th and 20th century conflicts, as well as the International Boatbuilding Training College (IBTC), in Boathouse 4, where traditional boat building skills are taught. A large volunteer force is engaged on the restoration and operation of the Trust's historic collection of boats. The Trust is also managing the regeneration of the 30 acre site at Priddy's Hard, Gosport.

P2: Portsmouth Naval Base Property Trust (the "Trust") is responsible for the maintenance and the upkeep of all historic buildings within the heritage footprint of the Historic Dockyard, and operates an ongoing programme of conservation. In addition, The Trust founded the Memorial Flotilla, the finest collection of small boats involved in late 19th and 20th century conflicts, as well as the International Boatbuilding Training College (IBTC), in Boathouse 4, where traditional boat building skills are taught. A sizeable assemblage of donative laborers is engaged on the restoration and operation of the Trust's historic collection of boats. The Trust is also managing the regeneration of the 30 acre site at Priddy's Hard, Gosport.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are large volunteer force and sizeable assemblage of donative laborers interchangeable (i.e., having the same meaning)?

Pair 1719

P1: The strategic importance of Nhat Tao canal to the French transport of rice led them to build three military outposts in close proximity. They were at Rach Kien to the north, Tân An to the east and Gia Thanh to the south. The canal had been the previous object of partisan activity with the objective of disrupting the French network. The attack against "L'Espérance" started at midday at Nhat Tao village, 10 km southwest of Tân An.

P2: The strategic importance of Nhat Tao canal to the French transport of rice led them to build three military outposts in close proximity. They were at Rach Kien to the north, Tân An to the east and Gia Thanh to the south. The canal had been the earlier focus of partisan activity with the objective of disrupting the French network. The attack against "L'Espérance" started at midday at Nhat Tao village, 10 km southwest of Tân An.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are previous object and earlier focus interchangeable (i.e., having the same meaning)?

Pair 1720

P1: Avignon. WEMSSA, under the direction of Eric Lutaud, contracted with GOAL Systems and eventually developer Leigh Lundin (author of DUCS Remote) for development, which focused on adding remote teleprocessing in Avignon, France. The result was WestiTAM, a 4k bi-sync module, which the florida group expressed an interest in. In 1978, WEMSSA resumed relations with the Florida group and eventually the two merged, coming under the new director of WEMSSA in London, David Hazlewood.

P2: Avignon. WEMSSA, under the direction of Eric Lutaud, contracted with GOAL Systems and eventually developer Leigh Lundin (author of DUCS Remote) for development, which focused on adding remote teleprocessing in Avignon,

France. The result was WestiTAM, a 4k bi-sync module, which the **members from the sunshine state** expressed an interest in. In 1978, WEMSSA resumed relations with the Florida group and eventually the two merged, coming under the new director of WEMSSA in London, David Hazlewood.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **florida group** and **members from the sunshine state** interchangeable (i.e., having the same meaning)?

Pair 1721

P1: Harriet hosted meetings of abolitionists in her house and was a leader of the Female Vigilant Society, which provided monies for transportation and clothing to the travelers. Education. She saw the need for anti-slavery legislation and means to affect greater equality for African Americans in **greater clarity** as a mother. Private schools for African Americans were not as good as the public schools for whites.

P2: Harriet hosted meetings of abolitionists in her house and was a leader of the Female Vigilant Society, which provided monies for transportation and clothing to the travelers. Education. She saw the need for anti-slavery legislation and means to affect greater equality for African Americans in **improved comprehension** as a mother. Private schools for African Americans were not as good as the public schools for whites.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **greater clarity** and **improved comprehension** interchangeable (i.e., having the same meaning)?

Pair 1722

P1: The wing's people began returning to George Air Force Base 23 March 1991, with its aircraft and pilots following three days later. The 35th became the host unit for George Air Force Base when the 831st Air Division there inactivated 31 March 1991. As a result, the wing gained **several support agencies**, including the 35th Combat Support Group and associated squadrons. In support of the Air Force's force reduction programs, the 21st Tactical Fighter Training Squadron inactivated 28 June 1991.

P2: The wing's people began returning to George Air Force Base 23 March 1991, with its aircraft and pilots following three days later. The 35th became the host unit for George Air Force Base when the 831st Air Division there inactivated 31 March 1991. As a result, the wing gained **numerous relief groups**, including the 35th Combat Support Group and associated squadrons. In support of the Air Force's force reduction programs, the 21st Tactical Fighter Training Squadron inactivated 28 June 1991.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **several support agencies** and **numerous relief groups** interchangeable (i.e., having the same meaning)?

Pair 1723

P1: President of Rice, David Leebron stated "We chose the name Ion because it's from the Greek ienai, which means 'go'. We see it as embodying the ever-forward motion of discovery, the spark at the center of a truly original idea. It also represents the **last three letters** in many of the words that define the building's mission, like inspiration, creation, acceleration and innovation." Project manager HR&A Advisors, with offices in New York and various other cities, is overseeing the design and construction, assisting with the master plan for the innovation district as well as the development strategy.

P2: President of Rice, David Leebron stated "We chose the name Ion because it's from the Greek ienai, which means 'go'. We see it as embodying the ever-forward motion of discovery, the spark at the center of a truly original idea. It also represents the **final three alphabets** in many of the words that define the building's mission, like inspiration, creation, acceleration and innovation." Project manager HR&A Advisors, with offices in New York and various other cities, is overseeing the design and construction, assisting with the master plan for the innovation district as well as the

development strategy.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **last three letters** and **final three alphabets** interchangeable (i.e., having the same meaning)?

Pair 1724

P1: Their patterns started as unprinted tissue paper cut to shape, folded and held together by a pinned (later pasted-on) label with an image and, later, brief instructions. In the early 1900s they began to use an envelope to hold the pattern. In the late 1910s they introduced a separate instruction sheet, called the "Deltor" (from the first three and **last three letters** of Delineator). In 1948, they purchased two new presses specially designed to print markings directly onto the pattern tissue.

P2: Their patterns started as unprinted tissue paper cut to shape, folded and held together by a pinned (later pasted-on) label with an image and, later, brief instructions. In the early 1900s they began to use an envelope to hold the pattern. In the late 1910s they introduced a separate instruction sheet, called the "Deltor" (from the first three and **trio of characters** of Delineator). In 1948, they purchased two new presses specially designed to print markings directly onto the pattern tissue.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **last three letters** and **trio of characters** interchangeable (i.e., having the same meaning)?

Pair 1725

P1: One news website reports that Rashid was reportedly transferred to the United States Guantanamo Bay detainment camps, in Cuba. Other reports have claimed that the Department of Defense stopped transferring prisoners to Guantanamo in 2004. **alternative source states** he was arrested and imprisoned without representation in Saudi Arabia for 5 years. The sentence was changed to 15 years, allegedly due to the defendant's behavior.

P2: One news website reports that Rashid was reportedly transferred to the United States Guantanamo Bay detainment camps, in Cuba. Other reports have claimed that the Department of Defense stopped transferring prisoners to Guantanamo in 2004. **a secondary authority said** he was arrested and imprisoned without representation in Saudi Arabia for 5 years. The sentence was changed to 15 years, allegedly due to the defendant's behavior.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **alternative source states** and **a secondary authority said** interchangeable (i.e., having the same meaning)?

Pair 1726

P1: The former candidate sent her nomination paperwork and endorsement signatures by facsimile from British Columbia, a half-hour before the nomination deadline on September 7, 2007. The returning officer from Elections NWT disqualified the paperwork on the grounds that the paperwork was not in the original ink. **Villebrun's official agent filed a complaint on the basis that submitting paper work** by fax is not forbidden under the "Elections Act". Arberry upheld the decision of the Returning Officer and advised the Villebrun campaign to seek legal counsel.

P2: The former candidate sent her nomination paperwork and endorsement signatures by facsimile from British Columbia, a half-hour before the nomination deadline on September 7, 2007. The returning officer from Elections NWT disqualified the paperwork on the grounds that the paperwork was not in the original ink. **Villebrun's official agent filed a complaint on the basis that submitting written documentation** by fax is not forbidden under the "Elections Act". Arberry upheld the decision of the Returning Officer and advised the Villebrun campaign to seek legal counsel.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **paper work** and **written documentation** interchangeable (i.e., having the same meaning)?

Pair 1727

P1: He is first seen stealing money from Randy and later he steals bootleg DVDs from Bubbles, after Bubbles attempted to report a robbery. He is the arresting officer for Omar Little, stealing a ring from him in the process. After Walker breaks Donut's fingers for giving him more **paper work** to do after a car chase, Michael orchestrates an act of revenge. When Walker exits a club late one night, Dukie runs down the sidewalk keying cars; Walker chases him into an alley, where Michael and Namond are waiting for him.

P2: He is first seen stealing money from Randy and later he steals bootleg DVDs from Bubbles, after Bubbles attempted to report a robbery. He is the arresting officer for Omar Little, stealing a ring from him in the process. After Walker breaks Donut's fingers for giving him more **written forms** to do after a car chase, Michael orchestrates an act of revenge. When Walker exits a club late one night, Dukie runs down the sidewalk keying cars; Walker chases him into an alley, where Michael and Namond are waiting for him.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **paper work** and **written forms** interchangeable (i.e., having the same meaning)?

Pair 1728

P1: During the third phase, or "adjustment phase", the lifter begins to position his body appropriately for the final explosive pull. The knees typically perform a "double knee bend", where the knee bends from the previous extension of the knee during the second phase, and the torso continues to become more vertical. During this phase, the lifter doesn't apply as **great a force** on the bar as in the previous phases. Fourth phase.

P2: During the third phase, or "adjustment phase", the lifter begins to position his body appropriately for the final explosive pull. The knees typically perform a "double knee bend", where the knee bends from the previous extension of the knee during the second phase, and the torso continues to become more vertical. During this phase, the lifter doesn't apply as **strong a pressure** on the bar as in the previous phases. Fourth phase.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **great a force** and **strong a pressure** interchangeable (i.e., having the same meaning)?

Pair 1729

P1: Two years later, he left Christ Church to become a studio musician and an independent producer. In the fall of 1994, Lindell Cooley visited Brownsville Assembly and met with Pastor John Kilpatrick. In February 1995, Kilpatrick needed a music minister and said Lindell was **god's choice** for the position. After initially turning down the job, Cooley accepted and arrived in April 1995.

P2: Two years later, he left Christ Church to become a studio musician and an independent producer. In the fall of 1994, Lindell Cooley visited Brownsville Assembly and met with Pastor John Kilpatrick. In February 1995, Kilpatrick needed a music minister and said Lindell was **the Creator's preference** for the position. After initially turning down the job, Cooley accepted and arrived in April 1995.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **god's choice** and **the Creator's preference** interchangeable (i.e., having the same meaning)?

Pair 1730

P1: The main grade of copper used for electrical applications, such as building wire, motor windings, cables and busbars, is electrolytic-tough pitch (ETP) copper (CW004A or ASTM designation C100140). If high conductivity copper must be welded or brazed or used in a reducing atmosphere, then oxygen-free high conductivity copper (CW008A or ASTM designation C10100) may be used. **Because of its ease of connection by soldering or clamping, copper is still the most common choice** for most light-gauge wires. Silver is 6% more conductive than copper, but due to cost it is not practical in most cases.

P2: The main grade of copper used for electrical applications, such as building wire, motor windings, cables and busbars, is electrolytic-tough pitch (ETP) copper (CW004A or ASTM designation C100140). If high conductivity copper must be welded or brazed or used in a reducing atmosphere, then oxygen-free high conductivity copper (CW008A or ASTM designation C10100) may be used. **Because of its ease of connection by soldering or clamping, copper is still the most routine selection** for most light-gauge wires. Silver is 6% more conductive than copper, but due to cost it is not practical in most cases.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **common choice** and **routine selection** interchangeable (i.e., having the same meaning)?

Pair 1731

P1: The daughter of household Sanjay Patal and Gloria Patal. She loves Theo and carries his child but marries Galen Strauss in an attempt to make Theo jealous. **After Theo's apparent death, she decides to leave first colony and ends up traveling with the Apostles.** Mausami eventually births Caleb Jaxon, and travels with Theo to Kerrville, Texas.

P2: The daughter of household Sanjay Patal and Gloria Patal. She loves Theo and carries his child but marries Galen Strauss in an attempt to make Theo jealous. **After Theo's apparent death, she decides to leave "First Colony" and ends up traveling with the Apostles.** Mausami eventually births Caleb Jaxon, and travels with Theo to Kerrville, Texas.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **first colony** and **"First Colony"** interchangeable (i.e., having the same meaning)?

Pair 1732

P1: Practice ice. Many ice rinks, particularly those that are municipally owned, do not sell practice ice directly to figure skaters. **Instead, the local figure skating club contracts with the rink for blocks of ice time, which the club then resells to its members.** At some clubs, the normal procedure is for skaters to contract in advance for an entire season's worth of ice time.

P2: Practice ice. Many ice rinks, particularly those that are municipally owned, do not sell practice ice directly to figure skaters. **Instead, the neighborhood Ice skating club contracts with the rink for blocks of ice time, which the club then resells to its members.** At some clubs, the normal procedure is for skaters to contract in advance for an entire season's worth of ice time.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **local figure** and **neighborhood Ice** interchangeable (i.e., having the same meaning)?

Pair 1733

P1: Nabeghlavi (also Nabeghlavi) () is a mineral water from Georgia. Georgian-Swiss joint stock company "Healthy Water" produces famous mineral water "Nabeghlavi" and spring water "Bakhmaro." The company was founded in 1997 and by now is a leader of the local mineral water market. **The new-found company's prime goal was to restore long time tradition** of bottling Nabeghlavi mineral water and it was successfully gained. Thus, the story of establishing

“Healthy Water” company leads back to the history of water Nabeghlavi.

P2: Nabeghlavi (also Nabeghlavi) () is a mineral water from Georgia. Georgian-Swiss joint stock company “Healthy Water” produces famous mineral water “Nabeghlavi” and spring water “Bakhmaro.” The company was founded in 1997 and by now is a leader of the local mineral water market. The new-found company’s prime goal was to restore enduring custom of bottling Nabeghlavi mineral water and it was successfully gained. Thus, the story of establishing “Healthy Water” company leads back to the history of water Nabeghlavi.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are long time tradition and enduring custom interchangeable (i.e., having the same meaning)?

Pair 1734

P1: This hierarchy is similar to that of the task hierarchy and contains: Interface objects. Users interacting with system build up a basic concept/model of computer related objects like files, buttons, dialog box etc. They also acquire a brief experience of the properties of the objects and how to manipulate the object through its properties. Moreover, they learn how to perform actions on those objects to achieve their computing goals.

P2: This hierarchy is similar to that of the task hierarchy and contains: Interface objects. Users interacting with system build up a basic concept/model of computer related objects like files, buttons, dialog box etc. They also acquire a condensed knowledge of the properties of the objects and how to manipulate the object through its properties. Moreover, they learn how to perform actions on those objects to achieve their computing goals.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are brief experience and condensed knowledge interchangeable (i.e., having the same meaning)?

Pair 1735

P1: The band recorded their first Live at the Wireless for JJJ at ABC Studio 1 in Darlinghurst. Bughouse returned to the studio some months later to record the “Bughouse” EP with engineer John Hresc at Powerhouse Studios. The EP included four tracks “Tax Stamp”, “Bruce’s Song”, “Salad Days” and “one more thing”. The EP reached number four on the Australian Independent Charts These two first records showcased the band’s assured and eclectic sound.

P2: The band recorded their first Live at the Wireless for JJJ at ABC Studio 1 in Darlinghurst. Question: In both passages, are one more thing and “One More Thing” interchangeable (i.e., having the same meaning)?

Pair 1736

P1: Community-based health insurance. A particular form of private health insurance that has often emerged, if financial risk protection mechanisms have only a limited impact, is community-based health insurance. Individual members of a specific community pay to a collective health fund which they can draw from when they need medical care. Contributions are not risk-related and there is generally a high level of community involvement in the running of these plans.

P2: Community-based health insurance. A particular form of private health insurance that has often emerged, if financial risk protection mechanisms have only a limited impact, is community-based health insurance. Individual members of a designated faction pay to a collective health fund which they can draw from when they need medical care. Contributions are not risk-related and there is generally a high level of community involvement in the running of these plans.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **specific community** and **designated faction** interchangeable (i.e., having the same meaning)?

Pair 1737

P1: The Danish authorities quickly ordered Lieutenant Wigelsen to the area as Receiver of Wreck. Despite the fact that England was at war with Denmark-Norway and the survivors thus were prisoners of war, they were treated well by the locals and the authorities. They were relatively quickly returned to England, in exchange for the **double number of Danish prisoners of war in English prisons.** The Danish Government promptly informed the Admiralty about the disaster and expressed their deepest empathy with what is still today the greatest loss of lives for the Royal Navy.

P2: The Danish authorities quickly ordered Lieutenant Wigelsen to the area as Receiver of Wreck. Despite the fact that England was at war with Denmark-Norway and the survivors thus were prisoners of war, they were treated well by the locals and the authorities. They were relatively quickly returned to England, in exchange for the **twice-increased quantity of Danish prisoners of war in English prisons.** The Danish Government promptly informed the Admiralty about the disaster and expressed their deepest empathy with what is still today the greatest loss of lives for the Royal Navy.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **double number** and **twice-increased quantity** interchangeable (i.e., having the same meaning)?

Pair 1738

P1: Customers of cannabis cultivation growshops. Europe. In Europe the development of Cannabis has taken the world of growing and growshops to a **whole new level.** Since 2010 it is possible to buy autoflowering cannabis and feminized seeds, which making growing at home fairly easy because the plants need a much shorter time to grow and stay very dense and small.

P2: Customers of cannabis cultivation growshops. Europe. In Europe the development of Cannabis has taken the world of growing and growshops to a **completely changed position.** Since 2010 it is possible to buy autoflowering cannabis and feminized seeds, which making growing at home fairly easy because the plants need a much shorter time to grow and stay very dense and small.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **whole new level** and **completely changed position** interchangeable (i.e., having the same meaning)?

Pair 1739

P1: Parks. Church was instrumental in the acquisition and development of the Monterey County Parks system. When running for the **board position** in 1964 his "main plank was a county park system." Prior to 1966, Monterey County did not have a parks department, and was one of the last counties in California to have one.

P2: Parks. Church was instrumental in the acquisition and development of the Monterey County Parks system. When running for the **committee post** in 1964 his "main plank was a county park system." Prior to 1966, Monterey County did not have a parks department, and was one of the last counties in California to have one.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **board position** and **committee post** interchangeable (i.e., having the same meaning)?

Pair 1740

P1: This area is known as the "Grabenstettener Halbinsel". Height above sea level is around 700 m. The outer fortifications delineate an area of over 1,700 hectares, making this oppidum the largest known in mainland Europe. The 2.5 km long walls make **strategic use** of the escarpment to create this large area surrounded either by wall or steep bluff. The walls cut off the inner area from the rest of the plateau and also divide it from three sections that are hard to fortify or oversee.

P2: This area is known as the "Grabenstettener Halbinsel". Height above sea level is around 700 m. The outer fortifications delineate an area of over 1,700 hectares, making this oppidum the largest known in mainland Europe. The 2.5 km long walls make **deliberate employment** of the escarpment to create this large area surrounded either by wall or steep bluff. The walls cut off the inner area from the rest of the plateau and also divide it from three sections that are hard to fortify or oversee.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **strategic use** and **deliberate employment** interchangeable (i.e., having the same meaning)?

Pair 1741

P1: If the model fit to the data were correct, the residuals would approximate the random errors that make the relationship between the explanatory variables and the response variable a statistical relationship. Therefore, if the residuals appear to behave randomly, it suggests that the model fits the data well. On the other hand, if non-random structure is evident in the residuals, it is a **clear sign** that the model fits the data poorly. The next section details the types of plots to use to test different aspects of a model and gives the correct interpretations of different results that could be observed for each type of plot.

P2: If the model fit to the data were correct, the residuals would approximate the random errors that make the relationship between the explanatory variables and the response variable a statistical relationship. Therefore, if the residuals appear to behave randomly, it suggests that the model fits the data well. On the other hand, if non-random structure is evident in the residuals, it is a **transparent indication** that the model fits the data poorly. The next section details the types of plots to use to test different aspects of a model and gives the correct interpretations of different results that could be observed for each type of plot.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **clear sign** and **transparent indication** interchangeable (i.e., having the same meaning)?

Pair 1742

P1: Throughout the series, Andonov is the only criminal who guesses Hristov's true identity. Because of his disdain for Hristov, Andonov tries to prove to his boss that Hristov is actually a police officer. In "Episode 1.2" we are introduced to his mother Cveta whose presence is hidden from everyone, showing a **clear sign** of weakness. She does not know that her son has turned to crime.

P2: Throughout the series, Andonov is the only criminal who guesses Hristov's true identity. Because of his disdain for Hristov, Andonov tries to prove to his boss that Hristov is actually a police officer. In "Episode 1.2" we are introduced to his mother Cveta whose presence is hidden from everyone, showing a **plain symptom** of weakness. She does not know that her son has turned to crime.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **clear sign** and **plain symptom** interchangeable (i.e., having the same meaning)?

Pair 1743

P1: Prior to the launch of CHATS as a RTGS system, interbank settlements in Hong Kong relied on a multi-tier system which settled on a daily net basis. About 170 banks settled with ten clearing banks. These ten banks, in turn, settled with Hongkong Bank, which then settled with the HKMA on a **one-to-one basis**. Hongkong Bank acted as the clearing house under this system, settling payments across its books on a net basis on the day following the transactions.

P2: Prior to the launch of CHATS as a RTGS system, interbank settlements in Hong Kong relied on a multi-tier system which settled on a daily net basis. About 170 banks settled with ten clearing banks. These ten banks, in turn, settled with Hongkong Bank, which then settled with the HKMA on a **direct approach**. Hongkong Bank acted as the clearing house under this system, settling payments across its books on a net basis on the day following the transactions.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one-to-one basis** and **direct approach** interchangeable (i.e., having the same meaning)?

Pair 1744

P1: , whose name is derived from the word "lovely", is a guild member and famous in the Sakura Cosmos who runs the aptly titled Labilia Channel. She is also an adversary and former friend of Rebecca, whom she regularly ridicules and subjects to malicious videos for her amateurish content. Despite her **dismissive attitude** towards others, she becomes fascinated with Shiki for his gravity powers when he publicly humiliates her for bullying Rebecca. After Labilia is imprisoned by Drakken Joe as a favor for Rebecca, she is sheltered by Amira while Rebecca attempts to rescue her herself, which leads Labilia to become more grateful to Rebecca, although the two remain on unfriendly terms.

P2: , whose name is derived from the word "lovely", is a guild member and famous in the Sakura Cosmos who runs the aptly titled Labilia Channel. She is also an adversary and former friend of Rebecca, whom she regularly ridicules and subjects to malicious videos for her amateurish content. Despite her **cavalier demeanor** towards others, she becomes fascinated with Shiki for his gravity powers when he publicly humiliates her for bullying Rebecca. After Labilia is imprisoned by Drakken Joe as a favor for Rebecca, she is sheltered by Amira while Rebecca attempts to rescue her herself, which leads Labilia to become more grateful to Rebecca, although the two remain on unfriendly terms.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **dismissive attitude** and **cavalier demeanor** interchangeable (i.e., having the same meaning)?

Pair 1745

P1: Albers, Kooi, and Schaafsma consider that without adding probability (or other) ingredients to the problem, Smullyan's arguments do not give any reason to swap or not to swap, in any case. Thus, there is no paradox. This **dismissive attitude** is common among writers from probability and economics: Smullyan's paradox arises precisely because he takes no account whatever of probability or utility. Conditional switching.

P2: Albers, Kooi, and Schaafsma consider that without adding probability (or other) ingredients to the problem, Smullyan's arguments do not give any reason to swap or not to swap, in any case. Thus, there is no paradox. This **antipathetic disposition** is common among writers from probability and economics: Smullyan's paradox arises precisely because he takes no account whatever of probability or utility. Conditional switching.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **dismissive attitude** and **antipathetic disposition** interchangeable (i.e., having the same meaning)?

Pair 1746

P1: Vent sexing, also known simply as venting, involves squeezing the feces out of the chick, which opens up the chick's anal vent (called a cloaca) slightly, allowing the chicken sexer to see if the chick has a small "bump", which would indicate that the chick is a male. Some females also have bumps, though they are rarely as large as those of male chicks. The

eminence or genital organ is found midway on the **lower rim** of the vent, and looks like a very small pimple. Most males have a relatively prominent eminence, most females have none.

P2: Vent sexing, also known simply as venting, involves squeezing the feces out of the chick, which opens up the chick's anal vent (called a cloaca) slightly, allowing the chicken sexer to see if the chick has a small "bump", which would indicate that the chick is a male. Some females also have bumps, though they are rarely as large as those of male chicks. **The eminence or genital organ is found midway on the posterior periphery of the vent, and looks like a very small pimple.** Most males have a relatively prominent eminence, most females have none.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **lower rim** and **posterior periphery** interchangeable (i.e., having the same meaning)?

Pair 1747

P1: She lobbied him for delivery preferences in return for campaigning before the Bulgarian authorities to buy his products rather than Western or other Soviet aircraft types. Indeed, Balkan never bought the Ilyushin Il-62 long-range airliner, preferring to misuse its Tu-154s for long-range work. **Similarly, it eschewed Ilyushin's Il-86 wide-body despite arguably having the precise role for it on its sea or ski charter flights.** The 1970s.

P2: She lobbied him for delivery preferences in return for campaigning before the Bulgarian authorities to buy his products rather than Western or other Soviet aircraft types. Indeed, Balkan never bought the Ilyushin Il-62 long-range airliner, preferring to misuse its Tu-154s for long-range work. **Similarly, it eschewed Ilyushin's Il-86 wide-body despite arguably having the exact part for it on its sea or ski charter flights.** The 1970s.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **precise role** and **exact part** interchangeable (i.e., having the same meaning)?

Pair 1748

P1: The special issue featured a photograph of Yost on the cover and included all manner of facts and figures on the popular team. Noting the popularity of the sport with Michigan's female students, "Detroit Free Press" in November 1902 wrote about the spectators in attendance at Michigan's home game against Minnesota: "But the dominant note of the gathering was the girl. **She was there in every type and style, in every section of the stands and on every row.** There was the college girl and the town girl, sweater girl and gown girl.

P2: The special issue featured a photograph of Yost on the cover and included all manner of facts and figures on the popular team. Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **every row** and **all the aisles** interchangeable (i.e., having the same meaning)?

Pair 1749

P1: McNamara fell short of asking Diệm to remove the Nhus; this was a matter Washington had left to his and Lodge's discretion. McNamara went on to say that Washington did not see value in supporting a government which could not command the confidence of its citizens, but his comments seemed to have little impact on Diệm. **Diệm cut off McNamara and asserted that "Vietnam will be a model democracy" in a few years time.** He asserted that this had been facilitated by the Strategic Hamlet Program and was shown in the high turnout in the recent legislative elections.

P2: McNamara fell short of asking Diệm to remove the Nhus; this was a matter Washington had left to his and Lodge's discretion. McNamara went on to say that Washington did not see value in supporting a government which could not

command the confidence of its citizens, but his comments seemed to have little impact on Diệm. Diệm cut off McNamara and asserted that "Vietnam will be a model democracy" in a few less than a half-century. He asserted that this had been facilitated by the Strategic Hamlet Program and was shown in the high turnout in the recent legislative elections.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are years time and less than a half-century interchangeable (i.e., having the same meaning)?

Pair 1750

P1: Defqon.1 Festival is a multiday festival on the festival terrain of Biddinghuizen, the Netherlands. The first edition of Defqon.1 took place on the Almere Beach in 2003. In a few years time, Defqon.1 grew to be one of the most popular hard dance festivals in the Netherlands. In 2011 the Defqon.1 festival moved to the festival terrain of Biddinghuizen, where visitors could stay camping for the first time.

P2: Defqon.1 Festival is a multiday festival on the festival terrain of Biddinghuizen, the Netherlands. The first edition of Defqon.1 took place on the Almere Beach in 2003. In a few short duration, Defqon.1 grew to be one of the most popular hard dance festivals in the Netherlands. In 2011 the Defqon.1 festival moved to the festival terrain of Biddinghuizen, where visitors could stay camping for the first time.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are years time and short duration interchangeable (i.e., having the same meaning)?

Pair 1751

P1: To date, one study comparing heterosexual and homosexual males found that homosexual men had similar scores for SIS2, but scored significantly higher for SIS1 and SES. Straight, lesbian, and bisexual women's scores on the SESII-W found that bisexual women scored higher on SES than the other groups and straight women scored higher on the sexual inhibition factor than both the lesbian and bisexual women. More studies need to be done using the dual control model to gain a more broad view of sexual orientation and sexual arousability. Assessment of genital arousal.

P2: To date, one study comparing heterosexual and homosexual males found that homosexual men had similar scores for SIS2, but scored significantly higher for SIS1 and SES. Straight, lesbian, and bisexual women's scores on the SESII-W found that bisexual women scored higher on SES than the other groups and straight women scored higher on the sexual inhibition factor than both the lesbian and bisexual women. More studies need to be done using the dual control model to gain a more expansive perspective of sexual orientation and sexual arousability. Assessment of genital arousal.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are broad view and expansive perspective interchangeable (i.e., having the same meaning)?

Pair 1752

P1: At that moment in time, the Directorate is known to have comprised five men: Tokan, Ivan Stepanovych Dunger, M. F. Liskun, Evhen V. Lisak, and I. I. Mardariiev. Three days later, one of the groups involved issued an appeal to the international community, including both Soviet Russia and the UNR, which referred to the sufferings of the "Bessarabian people" and to the Directorate as a legitimate government of Bessarabia. A similar text warned that all those "campaigning against the Directorate and against freedom from the Romanian yoke" would be shot, alongside rioters and looters. The Directors had by then deposed and arrested Khotyn's Mayor, Gachikevich (or Gocicherie), ordering the city population to pay them 1.5 million rubles within three days.

P2: At that moment in time, the Directorate is known to have comprised five men: Tokan, Ivan Stepanovych Dunger, M. F. Liskun, Evhen V. Lisak, and I. I. Mardariiev. Three days later, one of the groups involved issued an appeal to the international community, including both Soviet Russia and the UNR, which referred to the sufferings of the "Bessarabian people" and to the Directorate as a legitimate government of Bessarabia. A parallel publication warned that all those

"campaigning against the Directorate and against freedom from the Romanian yoke" would be shot, alongside rioters and looters. The Directors had by then deposed and arrested Khotyn's Mayor, Gachikevich (or Gocicherie), ordering the city population to pay them 1.5 million rubles within three days.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **similar text** and **parallel publication** interchangeable (i.e., having the same meaning)?

Pair 1753

P1: Both teams have four water bags per round. Elements and equipment. Waterbag - Waterbags (also known as waterballs) are the **primary object** required for the sport and is comparable to the ball in golf. While any sort of ball capable of floating will work, balls specifically designed for the water are preferred.

P2: Both teams have four water bags per round. Elements and equipment. Waterbag - Waterbags (also known as waterballs) are the **main thing** required for the sport and is comparable to the ball in golf. While any sort of ball capable of floating will work, balls specifically designed for the water are preferred.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **primary object** and **main thing** interchangeable (i.e., having the same meaning)?

Pair 1754

P1: In the scientific literature, the components of the trinary system are generically referred to as "Alpha", "Beta" and "Gamma", but these labels are not recognized by the IAU. Primary. , the **primary object** of this trinary system, is an unusual carbonaceous near-Earth asteroid of a C- or somewhat brighter B-type. It orbits the Sun at a distance of 1.0-2.9 AU once every 2 years and 10 months (1,023 days).

P2: In the scientific literature, the components of the trinary system are generically referred to as "Alpha", "Beta" and "Gamma", but these labels are not recognized by the IAU. Primary. , the **key goal** of this trinary system, is an unusual carbonaceous near-Earth asteroid of a C- or somewhat brighter B-type. It orbits the Sun at a distance of 1.0-2.9 AU once every 2 years and 10 months (1,023 days).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **primary object** and **key goal** interchangeable (i.e., having the same meaning)?

Pair 1755

P1: In geometry, central lines are certain special straight lines that lie in the plane of a triangle. The **special property** that distinguishes a straight line as a central line is manifested via the equation of the line in trilinear coordinates. This special property is related to the concept of triangle center also.

P2: In geometry, central lines are certain special straight lines that lie in the plane of a triangle. The **particular quality** that distinguishes a straight line as a central line is manifested via the equation of the line in trilinear coordinates. This special property is related to the concept of triangle center also.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **special property** and **particular quality** interchangeable (i.e., having the same meaning)?

Pair 1756

P1: The system works by placing the test head on the surface of the conformal coating. The measurement is almost instantaneous and provides an immediate repeatable result for thickness measurement. Test coupons are the ideal method for measuring coating thickness, and can be archived as a physical record. Apply the coating to test coupons at the same time as the circuit boards provides a permanent record of coating thickness.

P2: The system works by placing the test head on the surface of the conformal coating. The measurement is almost instantaneous and provides an immediate repeatable result for thickness measurement. Test coupons are the ideal method for measuring coating thickness, and can be archived as a tangible file. Apply the coating to test coupons at the same time as the circuit boards provides a permanent record of coating thickness.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are physical record and tangible file interchangeable (i.e., having the same meaning)?

Pair 1757

P1: The two teams had met in nine previous matches, including a 1958 FIFA World Cup group stage match won by Sweden 3–0. Sweden got the breakthrough five minutes into the second half, Ludwig Augustinsson volleyed past Guillermo Ochoa when Viktor Claesson's mishit sat him up. The referee pointed to the spot when Héctor Moreno slid in on Marcus Berg and Andreas Granqvist shot into the top-left corner. In the 74th minute, substitute Isaac Thelin flicked on a long throw-in and Edson Álvarez sent the ball into his own net with his arm.

P2: The two teams had met in nine previous matches, including a 1958 FIFA World Cup group stage match won by Sweden 3–0. Sweden got the breakthrough five minutes into the second half, Ludwig Augustinsson volleyed past Guillermo Ochoa when Viktor Claesson's mishit sat him up. The referee pointed to the spot when Héctor Moreno slid in on Marcus Berg and Andreas Granqvist shot into the upper edge at the 9 o'clock position. In the 74th minute, substitute Isaac Thelin flicked on a long throw-in and Edson Álvarez sent the ball into his own net with his arm.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are top-left corner and upper edge at the 9 o'clock position interchangeable (i.e., having the same meaning)?

Pair 1758

P1: Hygiene promotion. In many settings, provision of sanitation facilities alone does not guarantee good health of the population. Studies have suggested that the impact of hygiene practices have as great an impact on sanitation related diseases as the actual provision of sanitation facilities. Hygiene promotion is therefore an important part of sanitation and is usually key in maintaining good health.

P2: Hygiene promotion. In many settings, provision of sanitation facilities alone does not guarantee good health of the population. Studies have suggested that the impact of hygiene practices have as significant an effect on sanitation related diseases as the actual provision of sanitation facilities. Hygiene promotion is therefore an important part of sanitation and is usually key in maintaining good health.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are great an impact and significant an effect interchangeable (i.e., having the same meaning)?

Pair 1759

P1: College of Bishops, also known as the Ordo of Bishops, is a term used in the Catholic Church to denote the collection of those bishops who are in communion with the Pope. Under Canon Law, a college is a collection (Latin collegium) of persons united together for a common object so as to form one body. The Bishop of Rome (the Pope) is the head of the college.

P2: College of Bishops, also known as the Ordo of Bishops, is a term used in the Catholic Church to denote the collection of those bishops who are in communion with the Pope. Under Canon Law, a college is a collection (Latin collegium) of persons united together for a collective goal so as to form one body. The Bishop of Rome (the Pope) is the head of the college.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are common object and collective goal interchangeable (i.e., having the same meaning)?

Pair 1760

P1: It was supported upon a tripod; a circular orifice in the top received the basin, and smaller ones were provided for a soap dish and a water-bottle. Sometimes a stand for the water-jug when the basin was in use was provided below, and very commonly there was a drawer, sometimes even two drawers, below the basin. Great numbers of these stands were made to fit into corners, and a corner wash-stand is still a common object in old furniture shops. Thomas Chippendale designed such stands in an elaborate rococo fashion, as well as in simpler form.

P2: It was supported upon a tripod; a circular orifice in the top received the basin, and smaller ones were provided for a soap dish and a water-bottle. Sometimes a stand for the water-jug when the basin was in use was provided below, and very commonly there was a drawer, sometimes even two drawers, below the basin. Great numbers of these stands were made to fit into corners, and a corner wash-stand is still a usual item in old furniture shops. Thomas Chippendale designed such stands in an elaborate rococo fashion, as well as in simpler form.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are common object and usual item interchangeable (i.e., having the same meaning)?

Pair 1761

P1: In a preface written by Martin Davis Davis observes that Dawson states that these lectures were meant to clarify concerns that the "incompleteness theorems were somehow dependent on the particularities of formalization": Gödel's Lectures at Princeton. Kleene and Rosser transcribed Gödel's 1934 lectures in Princeton. In his paper "General Recursive Functions of Natural Numbers" Kleene states: church definition of "effectively calculable". Church's paper "An Unsolvable Problem of Elementary Number Theory" (1936) proved that the Entscheidungsproblem was undecidable within the λ -calculus and Gödel-Herbrand's general recursion; moreover Church cites two theorems of Kleene's that proved that the functions defined in the λ -calculus are identical to the functions defined by general recursion: The paper opens with a very long footnote, 3.

P2: In a preface written by Martin Davis Davis observes that Dawson states that these lectures were meant to clarify concerns that the "incompleteness theorems were somehow dependent on the particularities of formalization": Gödel's Lectures at Princeton. Kleene and Rosser transcribed Gödel's 1934 lectures in Princeton. In his paper "General Recursive Functions of Natural Numbers" Kleene states: Church meaning of "effectively calculable". Church's paper "An Unsolvable Problem of Elementary Number Theory" (1936) proved that the Entscheidungsproblem was undecidable within the λ -calculus and Gödel-Herbrand's general recursion; moreover Church cites two theorems of Kleene's that proved that the functions defined in the λ -calculus are identical to the functions defined by general recursion: The paper opens with a very long footnote, 3.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are church definition and Church meaning interchangeable (i.e., having the same meaning)?

Pair 1762

P1: As with all other donations, these are privately paid through donation slips or on the Internet. A ward or a family can fast in unity for a purpose, such as for an ill member or other personal or family needs. The church definition of a testimony is "a spiritual witness given by the Holy Ghost." The foundation of a testimony is the knowledge that Heavenly Father lives and loves His children; that Jesus Christ lives, that He is the Son of God, and that He carried out the infinite

Atonement; that Joseph Smith is the prophet of God who was called to restore the gospel; that The Church of Jesus Christ of Latter-day Saints is the Savior's true Church on the earth; and that the Church is led by a living prophet today.

P2: As with all other donations, these are privately paid through donation slips or on the Internet. A ward or a family can fast in unity for a purpose, such as for an ill member or other personal or family needs. **The ecclesiastical denotation of a testimony is "a spiritual witness given by the Holy Ghost.** The foundation of a testimony is the knowledge that Heavenly Father lives and loves His children; that Jesus Christ lives, that He is the Son of God, and that He carried out the infinite Atonement; that Joseph Smith is the prophet of God who was called to restore the gospel; that The Church of Jesus Christ of Latter-day Saints is the Savior's true Church on the earth; and that the Church is led by a living prophet today.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **church definition** and **ecclesiastical denotation** interchangeable (i.e., having the same meaning)?

Pair 1763

P1: Family denial. Imee Marcos denies that human rights abuses occurred during her family's regime and called them political accusations. **In a press briefing,** she said "Kung ang dinedemand ay admission (of guilt) ay palagay ko hindi pwede 'yun." (If what is demanded is an admission of guilt, I don't think that's possible) When asked why, she replied: "Bakit kami mag-aadmit sa hindi namin ginawa?"

P2: Family denial. Imee Marcos denies that human rights abuses occurred during her family's regime and called them political accusations. **In a public report,** she said "Kung ang dinedemand ay admission (of guilt) ay palagay ko hindi pwede 'yun." (If what is demanded is an admission of guilt, I don't think that's possible) When asked why, she replied: "Bakit kami mag-aadmit sa hindi namin ginawa?"

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **press briefing** and **public report** interchangeable (i.e., having the same meaning)?

Pair 1764

P1: BP stated that its policy was to allow the media and other parties as much access as possible. On 30 June 2010, the USCG put new restrictions in place across the Gulf Coast that prevented vessels from coming within "of booming operations, boom, or oil spill response operations". **In a press briefing,** USCG admiral Thad Allen said the new regulation was related to safety issues. On CNN's "360", host Anderson Cooper rejected the motivation for the restrictions outright.

P2: BP stated that its policy was to allow the media and other parties as much access as possible. On 30 June 2010, the USCG put new restrictions in place across the Gulf Coast that prevented vessels from coming within "of booming operations, boom, or oil spill response operations". **In a news statement,** USCG admiral Thad Allen said the new regulation was related to safety issues. Question: In both passages, are **whole scheme** and **entire plot** interchangeable (i.e., having the same meaning)?

Pair 1766

P1: Longlines intended for other species can easily catch gulper sharks. When a fish species other than the intended catch is caught, it is called bycatch. **Although bycatch is not always a significant cause of loss to population size, it highlights the unpredictable nature** of deepwater fish exploitation. Rules and regulations regarding bycatch treatment are difficult to enforce by the nature of the bycatch being unintentional.

P2: Longlines intended for other species can easily catch gulper sharks. When a fish species other than the intended catch is caught, it is called bycatch. **Although bycatch is not always a significant cause of loss to population size, it highlights the unreliable quality** of deepwater fish exploitation. Rules and regulations regarding bycatch treatment are difficult to enforce by the nature of the bycatch being unintentional.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **unpredictable nature** and **unreliable quality** interchangeable (i.e., having the same meaning)?

Pair 1767

P1: But this deleted scene shows where the fight really began. US release as "The Protector". **The Weinstein Company purchased the U.S. distribution rights for "Tom-Yum-Goong" and retitled it "The Protector" (also the name** of a 1985 film starring Jackie Chan). This version was released theatrically on 8 September 2006.

P2: But this deleted scene shows where the fight really began. US release as "The Protector". **The Weinstein Company purchased the U.S. distribution rights for "Tom-Yum-Goong" and retitled it "The Protector" (additionally the title** of a 1985 film starring Jackie Chan). This version was released theatrically on 8 September 2006.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **also the name** and **additionally the title** interchangeable (i.e., having the same meaning)?

Pair 1768

P1: Scott Ostelhoff, played by Steve Makaj, was an MIB operative with Department of Defense credentials, working for the First Elder. He was tasked with murdering the members of an expedition team that was attempting to excavate a recently discovered alien corpse, which was actually an elaborate hoax. **He was assigned for an unknown length of time to surveil Fox Mulder from the apartment above his.** He is killed in a confrontation with Mulder, and his face destroyed with his own shotgun so as to allow Mulder to fake his own death.

P2: Scott Ostelhoff, played by Steve Makaj, was an MIB operative with Department of Defense credentials, working for the First Elder. He was tasked with murdering the members of an expedition team that was attempting to excavate a recently discovered alien corpse, which was actually an elaborate hoax. **He was assigned for an unspecified duration of time to surveil Fox Mulder from the apartment above his.** He is killed in a confrontation with Mulder, and his face destroyed with his own shotgun so as to allow Mulder to fake his own death.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **unknown length** and **unspecified duration** interchangeable (i.e., having the same meaning)?

Pair 1769

P1: Where confidentiality is mandated by law, e.g. with classified information, a violation of password policy could be a criminal offense. Some consider a **convincing explanation** of the importance of security to be more effective than threats of sanctions. Selection process.

P2: Where confidentiality is mandated by law, e.g. with classified information, a violation of password policy could be a criminal offense. Some consider a **persuasive interpretation** of the importance of security to be more effective than threats of sanctions. Selection process.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **convincing explanation** and **persuasive interpretation** interchangeable (i.e., having the same meaning)?

Pair 1770

P1: Ismail translated many tombs of Sufi saints in the region to Marrakesh, and erected several new shrines for them. Seeking to replicate the great pilgrimage festivals of Essaouira, Ismail requested the Sufi sheikh Abu Ali al-Hassan al-Yusi to select seven of them to serve as the "Seven Saints" ("Sab'atu Rijal") of Marrakesh, and arranged a new pilgrimage festival. For one week in late March, the pilgrims have to visit all seven shrines in **required order** (roughly anticlockwise): 1. Yusuf ibn Ali al-Sanhaji ("Sidi Yussef Ben Ali", d.1197), just outside the Bab Aghmat in the southeast, 2.

P2: Ismail translated many tombs of Sufi saints in the region to Marrakesh, and erected several new shrines for them. Seeking to replicate the great pilgrimage festivals of Essaouira, Ismail requested the Sufi sheikh Abu Ali al-Hassan al-Yusi to select seven of them to serve as the "Seven Saints" ("Sab'atu Rijal") of Marrakesh, and arranged a new pilgrimage festival. For one week in late March, the pilgrims have to visit all seven shrines in **mandated sequence** (roughly anticlockwise): 1. Yusuf ibn Ali al-Sanhaji ("Sidi Yussef Ben Ali", d.1197), just outside the Bab Aghmat in the southeast, 2.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **required order** and **mandated sequence** interchangeable (i.e., having the same meaning)?

Pair 1771

P1: Unlike the contemporary orders of Calatrava and Alcántara, which followed the severe rule of the Benedictines of Cîteaux, Santiago adopted the milder rule of the Canons of St. Augustine. At León, they offered their services to the Canons Regular of Saint Eligius in that town for the protection of pilgrims to the shrine of St. James and the hospices on the roads leading to Compostela. This explains the **mixed character** of their order—hospitaller and military—like that of St. John of Jerusalem. They were recognized as religious by Pope Alexander III, whose Bull of 5 July 1175, was subsequently confirmed by more than twenty of his successors.

P2: Unlike the contemporary orders of Calatrava and Alcántara, which followed the severe rule of the Benedictines of Cîteaux, Santiago adopted the milder rule of the Canons of St. Augustine. At León, they offered their services to the Canons Regular of Saint Eligius in that town for the protection of pilgrims to the shrine of St. James and the hospices on the roads leading to Compostela. This explains the **blended nature** of their order—hospitaller and military—like that of St. John of Jerusalem. They were recognized as religious by Pope Alexander III, whose Bull of 5 July 1175, was subsequently confirmed by more than twenty of his successors.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **mixed character** and **blended nature** interchangeable (i.e., having the same meaning)?

Pair 1772

P1: These are promising demonstrations of how the switching of electric and magnetic properties in multiferroics, mediated by the mixed character of the magnetoelectric dynamics, may lead to ultrafast data processing, communication and quantum computing devices. Current research into MF dynamics aims to address various open questions; the practical realisation and demonstration of ultra-high speed domain switching, the development of further new applications based on tunable dynamics, e.g. frequency dependence of dielectric properties, the fundamental understanding of the mixed character of the excitations (e.g. in the ME case, mixed phonon-magnon modes – ‘electromagnons’), and the potential discovery of new physics associated with the MF coupling.

P2: These are promising demonstrations of how the switching of electric and magnetic properties in multiferroics, mediated by the mixed character of the magnetoelectric dynamics, may lead to ultrafast data processing, communication and quantum computing devices. Current research into MF dynamics aims to address various open questions; the practical realisation and demonstration of ultra-high speed domain switching, the development of further new applications based on tunable dynamics, e.g. frequency dependence of dielectric properties, the fundamental understanding of the mingled quality of the excitations (e.g. in the ME case, mixed phonon-magnon modes – ‘electromagnons’), and the potential discovery of new physics associated with the MF coupling.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are mixed character and mingled quality interchangeable (i.e., having the same meaning)?

Pair 1773

P1: At the Print Room, Bailey directed productions such as “Fabrication” by Pier Paolo Pasolini, Alan Ayckbourn’s “Snake in the Grass”, Tennessee Williams’ “Kingdom of Earth” and Chekhov’s “Uncle Vanya” with Iain Glen in the title role. Bailey and her producer renovated a 1950s warehouse into the theatre, situated just off Westbourne Grove, aiming to show challenging or unknown plays as well as classics. Bailey and Winters say that they first conceived the Print Room over a large glass of wine at the National Theatre. After Lucy Bailey’s departure, Anda Winters moved the theatre to the Coronet Cinema.

P2: At the Print Room, Bailey directed productions such as “Fabrication” by Pier Paolo Pasolini, Alan Ayckbourn’s “Snake in the Grass”, Tennessee Williams’ “Kingdom of Earth” and Chekhov’s “Uncle Vanya” with Iain Glen in the title role. Bailey and her producer renovated a 1950s warehouse into the theatre, situated just off Westbourne Grove, aiming to show challenging or unknown plays as well as classics. Bailey and Winters say that they first conceived the Print Room over a generous flute of wine at the National Theatre. After Lucy Bailey’s departure, Anda Winters moved the theatre to the Coronet Cinema.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are large glass and generous flute interchangeable (i.e., having the same meaning)?

Pair 1774

P1: Transmission electron microscopy is a major analytical method in the physical, chemical and biological sciences. TEMs find application in cancer research, virology, and materials science as well as pollution, nanotechnology and semiconductor research, but also in other fields such as paleontology and palynology. TEM instruments boast an enormous array of operating modes including conventional imaging, scanning TEM imaging (STEM), diffraction, spectroscopy, and combinations of these. Even within conventional imaging, there are many fundamentally different ways that contrast is produced, called “image contrast mechanisms.”

P2: Transmission electron microscopy is a major analytical method in the physical, chemical and biological sciences. TEMs find application in cancer research, virology, and materials science as well as pollution, nanotechnology and semiconductor research, but also in other fields such as paleontology and palynology. TEM instruments boast an extensive supply of operating modes including conventional imaging, scanning TEM imaging (STEM), diffraction, spectroscopy, and combinations of these. Even within conventional imaging, there are many fundamentally different ways that contrast is produced, called “image contrast mechanisms.”

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **enormous array** and **extensive supply** interchangeable (i.e., having the same meaning)?

Pair 1775

P1: State limitations on deductions may differ significantly from federal limitations. Business deductions in excess of business income result in losses that may offset other income. **However, losses from passive activities may be deferred to the extent they exceed income from other passive activities.** Passive activities include most rental activities (except for real estate professionals) and business activities in which the taxpayer does not materially participate.

P2: State limitations on deductions may differ significantly from federal limitations. Business deductions in excess of business income result in losses that may offset other income. **However, losses from inactive income sources may be deferred to the extent they exceed income from other passive activities.** Passive activities include most rental activities (except for real estate professionals) and business activities in which the taxpayer does not materially participate.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **passive activities** and **inactive income sources** interchangeable (i.e., having the same meaning)?

Pair 1776

P1: Sadly for inhabitants of Ile Saint-Jean, some were forced to be deported for the second time during Rollo's forces that occurred on the island. They were previously deported from the mainland in 1755 and shipped to the Carolinas where they had returned from since. **The real numbers of inhabitants of Ile Saint-Jean are not known when taking into account people who died along the way or escaped.** The occurrence of deportation of the Acadian people in 1758 represented the beginning of the journey that has taken Acadians around the world.

P2: Sadly for inhabitants of Ile Saint-Jean, some were forced to be deported for the second time during Rollo's forces that occurred on the island. They were previously deported from the mainland in 1755 and shipped to the Carolinas where they had returned from since. **The real numbers of inhabitants of Ile Saint-Jean are not known when taking into your thoughts those persons who died along the way or escaped.** The occurrence of deportation of the Acadian people in 1758 represented the beginning of the journey that has taken Acadians around the world.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **account people** and **your thoughts those persons** interchangeable (i.e., having the same meaning)?

Pair 1777

P1: He was selected to tour England with the second West Indies team in 1906. He was described pre-tour as "the best amateur bowler in the West Indies, bowls slow left hand; can also bat very well" and "he is regarded as the crack bowler of the side. **A left-hander with easy delivery who can make the ball break either way, and who sends down a deceptive fast ball.** He can hit with vigour and precision and cuts well.

P2: He was selected to tour England with the second West Indies team in 1906. He was described pre-tour as "the best amateur bowler in the West Indies, bowls slow left hand; can also bat very well" and "he is regarded as the crack bowler of the side. **A left-hander with effortless lobbing of the bowl who can make the ball break either way, and who sends down a deceptive fast ball.** He can hit with vigour and precision and cuts well.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **easy delivery** and **effortless lobbing of the bowl** interchangeable (i.e., having the same meaning)?

Pair 1778

P1: She found manga appealing, because of the wide range of narrative genres. She graduated from Savannah College of Art and Design with a Bachelor of Fine Arts in Sequential Art. Her short story "Doors" won a runner-up place in Tokyopop's 2004 Rising Stars of Manga contest. Inspired by her "vivid dreams," "Doors" focuses on two people, twenty-two-year-old Retrab and twenty-year-old Markesh, as they search for a door in a fantasy world.

P2: She found manga appealing, because of the wide range of narrative genres. She graduated from Savannah College of Art and Design with a Bachelor of Fine Arts in Sequential Art. Her short story "Doors" won a second-best finish in Tokyopop's 2004 Rising Stars of Manga contest. Inspired by her "vivid dreams," "Doors" focuses on two people, twenty-two-year-old Retrab and twenty-year-old Markesh, as they search for a door in a fantasy world.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are runner-up place and second-best finish interchangeable (i.e., having the same meaning)?

Pair 1779

P1: Muhle et al. (1991) reported that the responses to chronically inhaled copying toner, a plastic dust pigmented with carbon black, titanium dioxide and silica, were also similar qualitatively to titanium dioxide and diesel exhaust. Carbon black, one of the components of toner, is classified as "possibly carcinogenic" (group 2b) by the IARC. As a fine powder, toner can remain suspended in the air for some period, and is considered to have health effects comparable to inert dust.

P2: Muhle et al. (1991) reported that the responses to chronically inhaled copying toner, a plastic dust pigmented with carbon black, titanium dioxide and silica, were also similar qualitatively to titanium dioxide and diesel exhaust. Carbon black, one of the components of toner, is classified as "possibly carcinogenic" (Class 2B) by the IARC. As a fine powder, toner can remain suspended in the air for some period, and is considered to have health effects comparable to inert dust.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are group 2b and Class 2B interchangeable (i.e., having the same meaning)?

Pair 1780

P1: A continuous flow process using ethylene glycol as a solvent has been developed at Oregon State University which may be suitable for industrial scale mass production. Motivation for development. CIGS and CdTe are two of the most promising thin-film solar cells and have recently seen growing commercial success. Despite continued rapid cost reduction, concerns about material price and availability as well as toxicity have been raised.

P2: A continuous flow process using ethylene glycol as a solvent has been developed at Oregon State University which may be suitable for industrial scale mass production. Motivation for development. CIGS and CdTe are two of the most promising thin-film solar cells and have recently seen increasing prosperity. Despite continued rapid cost reduction, concerns about material price and availability as well as toxicity have been raised.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are growing commercial success and increasing prosperity interchangeable (i.e., having the same meaning)?

Pair 1781

P1: An Post is responsible for collection of the licence fee and commencement of prosecution proceedings in cases of non-payment. Licences can be purchased and renewed at post offices (in person or by post), or by using a credit card or debit card via a call centre or via the internet. An Post receives commission to cover the cost of its collection service.

In 2004, An Post had signalled its intention to withdraw from the business, but was still the agent in 2017.

P2: An Post is responsible for collection of the licence fee and commencement of prosecution proceedings in cases of non-payment. Licences can be purchased and renewed at post offices (in person or by post), or by using a credit card or debit card via a call centre or via the internet. **An Post receives commission to cover the cost of its acquisition operation.** In 2004, An Post had signalled its intention to withdraw from the business, but was still the agent in 2017.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **collection service** and **acquisition operation** interchangeable (i.e., having the same meaning)?

Pair 1782

P1: Since roughly the beginning of the 1990s, rail network operators have experienced increasing problems with rail surface defects. Head checks, squats, corrugation and slip waves all contribute to higher maintenance costs, intensified noise pollution, traffic obstructions, and ultimately a shortened rail lifespan. **These increasingly common flaws are exacerbated by the growing density and speed of both freight and passenger traffic.** The direct consequence of these problems is a growing need for rail maintenance.

P2: Since roughly the beginning of the 1990s, rail network operators have experienced increasing problems with rail surface defects. Head checks, squats, corrugation and slip waves all contribute to higher maintenance costs, intensified noise pollution, traffic obstructions, and ultimately a shortened rail lifespan. **These increasingly common flaws are exacerbated by the growing density and speed of both cargo and automotive transit.** The direct consequence of these problems is a growing need for rail maintenance.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **freight and passenger traffic** and **cargo and automotive transit** interchangeable (i.e., having the same meaning)?

Pair 1783

P1: Natural resources such as coal and iron existed but the transportation system was rudimentary, with few canals and navigable rivers. Road travel was slow and expensive. **British railroad builders were pessimistic about the potential for freight and passenger traffic and did not invest.** Eventually a small railway system was built radiating from Madrid, and bypassing the natural resources.

P2: Natural resources such as coal and iron existed but the transportation system was rudimentary, with few canals and navigable rivers. Road travel was slow and expensive. **British railroad builders were pessimistic about the potential for load-bearing and commuter travel and did not invest.** Eventually a small railway system was built radiating from Madrid, and bypassing the natural resources.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **freight and passenger traffic** and **load-bearing and commuter travel** interchangeable (i.e., having the same meaning)?

Pair 1784

P1: About 38.5% of families and 44.8% of the population were below the poverty line, including 59.4% of those under age 18 and 35.9% of those age 65 or over. Industry. **Shubuta was the second home of Hanson Scale Company, a bathroom scale manufacturer.** It was later owned by the Sunbeam Corporation.

P2: About 38.5% of families and 44.8% of the population were below the poverty line, including 59.4% of those under age 18 and 35.9% of those age 65 or over. Industry. **Shubuta was the additional dwelling of Hanson Scale Company, a bathroom scale manufacturer.** It was later owned by the Sunbeam Corporation.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **second home** and **additional dwelling** interchangeable (i.e., having the same meaning)?

Pair 1785

P1: Groynes are cost-effective, require little maintenance and are one of the most common defences. Breakwater. Breakwater, also called "offshore breakwater", are **offshore structure** constructed parallel to the shore to alter wave direction and tide energy. The waves break further offshore and therefore lose erosive power.

P2: Groynes are cost-effective, require little maintenance and are one of the most common defences. Breakwater. Breakwater, also called "offshore breakwater", are **seaside formation** constructed parallel to the shore to alter wave direction and tide energy. The waves break further offshore and therefore lose erosive power.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **offshore structure** and **seaside formation** interchangeable (i.e., having the same meaning)?

Pair 1786

P1: The video was directed by Joseph Kahn, and stars British actor Russ Bain as the protagonist (The Man With No Name), Richard Brake as the antagonist (Sheriff Baron Klaus Rottingham), and Cassandra Bell as the love interest (Princess Shane Kuriyami). Throughout the video, the actors mouth out the lyrics, such as Russ Bain pilloried in town square mouthing 'No one's going to take me alive', and Cassandra Bell at the gallows 'You and I must fight for our rights'. In both instances, the mouthed words occur after the song lyrics and complete before the song moves on to the **next line**. The band appears in some scenes, partly as holograms.

P2: The video was directed by Joseph Kahn, and stars British actor Russ Bain as the protagonist (The Man With No Name), Richard Brake as the antagonist (Sheriff Baron Klaus Rottingham), and Cassandra Bell as the love interest (Princess Shane Kuriyami). Throughout the video, the actors mouth out the lyrics, such as Russ Bain pilloried in town square mouthing 'No one's going to take me alive', and Cassandra Bell at the gallows 'You and I must fight for our rights'. In both instances, the mouthed words occur after the song lyrics and complete before the song moves on to the **following verse**. The band appears in some scenes, partly as holograms.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **next line** and **following verse** interchangeable (i.e., having the same meaning)?

Pair 1787

P1: Breathing apparatus. A number of factors dictate the type of breathing apparatus used by the diver. Typical considerations include the length of the dive, water contamination, space constraints and **vehicle access** for support vehicles. Commercial divers will rarely use scuba equipment for occupational health and safety reasons.

P2: Breathing apparatus. A number of factors dictate the type of breathing apparatus used by the diver. Typical considerations include the length of the dive, water contamination, space constraints and **car or truck approachability** for support vehicles. Commercial divers will rarely use scuba equipment for occupational health and safety reasons.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **vehicle access** and **car or truck approachability** interchangeable (i.e., having the same meaning)?

Pair 1788

P1: At Shelbourne Park (over 550 yards): Distances. neck, head, 5½, 5 (lengths) "0.07 sec = one length" Competition report. The **first night** of the first round provided several shock eliminations starting with Easter Cup champion Clona Blaze in the very first heat. Clonbrien Prince and Burgess Bucks and also crashed out and Ballymac Cooper and Ballymac Arminta also lost on the night but progressed.

P2: At Shelbourne Park (over 550 yards): Distances. neck, head, 5½, 5 (lengths) "0.07 sec = one length" Competition report. The **opening dawn** of the first round provided several shock eliminations starting with Easter Cup champion Clona Blaze in the very first heat. Clonbrien Prince and Burgess Bucks and also crashed out and Ballymac Cooper and Ballymac Arminta also lost on the night but progressed.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **first night** and **opening dawn** interchangeable (i.e., having the same meaning)?

Pair 1789

P1: As in some debating styles, such as World Schools Style, they often may not be offered in the first or last minute of any speech (known as "protected time"), or during reply speeches. Points of information may never be offered to a member of the same team. Points of information are an important part of any debate that includes them, as they offer a **much greater degree** of engagement between teams. In some styles of debate, such as British Parliamentary Style, they take on an even greater importance, as teams are forced to use them in order to maintain their relevance during a debate.

P2: As in some debating styles, such as World Schools Style, they often may not be offered in the first or last minute of any speech (known as "protected time"), or during reply speeches. Points of information may never be offered to a member of the same team. Points of information are an important part of any debate that includes them, as they offer a **considerably larger amount** of engagement between teams. In some styles of debate, such as British Parliamentary Style, they take on an even greater importance, as teams are forced to use them in order to maintain their relevance during a debate.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **much greater degree** and **considerably larger amount** interchangeable (i.e., having the same meaning)?

Pair 1790

P1: The left bank and right bank parts of the fortress are separated from each other by deep canyons; the right bank part is in the shape of the tall conical hill. According to the sources, there was the fortress which was fortified with semicircular towers on the peak of the hill. The **left coast** of the monument has two parts, and is surrounded by the steepness rocks from all sides. At this part has remained the ruins of the half-round towers.

P2: The left bank and right bank parts of the fortress are separated from each other by deep canyons; the right bank part is in the shape of the tall conical hill. According to the sources, there was the fortress which was fortified with semicircular towers on the peak of the hill. The **larboard perimeter** of the monument has two parts, and is surrounded by the steepness rocks from all sides. At this part has remained the ruins of the half-round towers.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **left coast** and **larboard perimeter** interchangeable (i.e., having the same meaning)?

Pair 1791

P1: Straight rail, unlike the balkline games, had no balk space restrictions, although one was later added. According to Mike Shamos, curator of the U.S. Billiard Archive, "the skill of dedicated players [of **straight rail**] was so great that they could essentially score at will." The development of balkline is characterized by a series of back and forth developments,

where new rules would be implemented to make the game more difficult and to decrease high runs to keep spectators interested, countered by skill development to account for each new rule.

P2: Straight rail, unlike the balkline games, had no balk space restrictions, although one was later added. According to Mike Shamos, curator of the U.S. Billiard Archive, "the skill of dedicated players [of the precursor to billiards] was so great that they could essentially score at will." The development of balkline is characterized by a series of back and forth developments, where new rules would be implemented to make the game more difficult and to decrease high runs to keep spectators interested, countered by skill development to account for each new rule.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **straight rail** and **the precursor to billiards** interchangeable (i.e., having the same meaning)?

Pair 1792

P1: The law records say that the act was committed around eleven at night on 24 May 1570, but Salisbury claims it happened between two and three in the morning of the following day, the Feast of Corpus Christi. Felton had received the bulls in Calais and given one to a friend, William Mellows of Lincoln's Inn. A general search of known Catholic houses in and near London was undertaken and the copy was soon discovered. After being racked, Mellows implicated Felton, who was arrested on 26 May.

P2: The law records say that the act was committed around eleven at night on 24 May 1570, but Salisbury claims it happened between two and three in the morning of the following day, the Feast of Corpus Christi. Felton had received the bulls in Calais and given one to a friend, William Mellows of Lincoln's Inn. A universal inspection of known Catholic houses in and near London was undertaken and the copy was soon discovered. After being racked, Mellows implicated Felton, who was arrested on 26 May.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **general search** and **universal inspection** interchangeable (i.e., having the same meaning)?

Pair 1793

P1: Emma Willis was presenter of new spin-off show "Big Brother's Bit on the Side". Marcus Bentley retained his role as off-screen narrator for the highlights shows. He also commentated on the live nights and provided voice-overs for the viewer competitions. Trailers.

P2: Emma Willis was presenter of new spin-off show "Big Brother's Bit on the Side". Marcus Bentley retained his role as off-screen narrator for the highlights shows. He also commentated on the twilight shows broadcast in real-time and provided voice-overs for the viewer competitions. Trailers.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **live nights** and **twilight shows broadcast in real-time** interchangeable (i.e., having the same meaning)?

Pair 1794

P1: Unlike traditional asset managers, who try to track and outperform a benchmark (a reference index such as the Dow Jones and S&P 500), hedge fund managers employ different strategies in order to produce a positive return regardless of the direction and the fluctuations of capital markets. This is one reason why hedge funds are referred to as alternative investment vehicles (see hedge funds for more details). Absolute return managers tend to be characterised by their use of short selling, leverage and high turnover in their portfolios. Benchmark.

P2: Unlike traditional asset managers, who try to track and outperform a benchmark (a reference index such as the Dow Jones and S&P 500), hedge fund managers employ different strategies in order to produce a positive return

regardless of the direction and the fluctuations of capital markets. This is one reason why hedge funds are referred to as alternative investment vehicles (see hedge funds for more details). Absolute return managers tend to be characterised by their use of short selling, leverage and large revenue in their portfolios. Benchmark.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are high turnover and large revenue interchangeable (i.e., having the same meaning)?

Pair 1795

P1: In 2014 deal worth US\$40 million was signed between Canadian Commercial Corporation and Bangladesh Agricultural Development Corporation for the potash export to Bangladesh. Saskatchewan Premier Brad Wall said "It provides Canpotex with new opportunities and access to a country that really needs our potash to boost its agricultural production and achieve its food security goals," Canada's main imports from Bangladesh include knit apparel, woven apparel, miscellaneous textile articles, headgear, fish and seafood, and footwear. Canada is a bright spot for Bangladeshi apparel, with garments and textile products making-up the bulk of Canada's merchandise imports from Bangladesh. Bangladesh has enjoyed duty-free market access since 2003.

P2: In 2014 deal worth US\$40 million was signed between Canadian Commercial Corporation and Bangladesh Agricultural Development Corporation for the potash export to Bangladesh. Saskatchewan Premier Brad Wall said "It provides Canpotex with new opportunities and access to a country that really needs our potash to boost its agricultural production and achieve its food security goals," Canada's main imports from Bangladesh include knit apparel, woven apparel, miscellaneous textile articles, headgear, fish and seafood, and footwear. Canada is a great market for Bangladeshi apparel, with garments and textile products making-up the bulk of Canada's merchandise imports from Bangladesh. Bangladesh has enjoyed duty-free market access since 2003.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are bright spot and great market interchangeable (i.e., having the same meaning)?

Pair 1796

P1: These are all present since birth and are able to handle simultaneous processing (e.g., food – taste it, smell it, see it). In general, learning benefits occur when there is a developed process of pattern recognition. The sensory register has a large capacity and its behavioral response is very short (1–3 seconds). Within this model, sensory store and short term memory or working memory has limited capacity.

P2: These are all present since birth and are able to handle simultaneous processing (e.g., food – taste it, smell it, see it). In general, learning benefits occur when there is a developed process of pattern recognition. The sensory register has a broad capability and its behavioral response is very short (1–3 seconds). Within this model, sensory store and short term memory or working memory has limited capacity.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are large capacity and broad capability interchangeable (i.e., having the same meaning)?

Pair 1797

P1: In his 2004 book, "Civic Agriculture: Reconnecting Farm, Food and Community" Lyson argues that in containing food production for a specific community to that community, one is further connecting the community so that it may be economically independent and socially unified. Lyson expounds on his ideas, arguing that because of the interlocked relationship between the food economy and consumers, people have a civic duty to support important agricultural engagements. Lyson claims that communities that show an active involvement in civic agriculture aid economic development by supporting their local food production. In committing to civic agriculture, local communities contribute to an economic growth in the local agricultural sector.

P2: In his 2004 book, "Civic Agriculture: Reconnecting Farm, Food and Community" Lyson argues that in containing food production for a specific community to that community, one is further connecting the community so that it may

be economically independent and socially unified. Lyson expounds on his ideas, arguing that because of the interlocked relationship between the food economy and consumers, people have a civic duty to support important agricultural engagements. Lyson claims that communities that show an active involvement in civic agriculture aid economic development by supporting their **community manufacturing of sustenance goods**. In committing to civic agriculture, local communities contribute to an economic growth in the local agricultural sector.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **local food production** and **community manufacturing of sustenance goods** interchangeable (i.e., having the same meaning)?

Pair 1798

P1: At its initiation, the task of the project was to address by analysis, the problem of the development of technology to use for an effective air defence of the U.S. The goal of the project was to create a network of computers connected to a command centre in order to organise a response to a threat from within U.S. air-space. The project was active during February 1951, and released its report during the **1st day** of August of the same year. MITRE Corporation assumed the responsibilities identified as the project from January the 1st 1959, and the work developed ultimately into the SAGE project.

P2: At its initiation, the task of the project was to address by analysis, the problem of the development of technology to use for an effective air defence of the U.S. The goal of the project was to create a network of computers connected to a command centre in order to organise a response to a threat from within U.S. air-space. The project was active during February 1951, and released its report during the **opening period from sunrise to sunset** of August of the same year. MITRE Corporation assumed the responsibilities identified as the project from January the 1st 1959, and the work developed ultimately into the SAGE project.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **1st day** and **opening period from sunrise to sunset** interchangeable (i.e., having the same meaning)?

Pair 1799

P1: MiRNA-146a/b-5p indirectly represses IL-8 expression by silencing the expression of IRAK1. Additionally, the 3'UTR of IL-8 contains a A/U-rich element that makes it extremely unstable under certain conditions. IL-8 and other inflammatory cytokines form a **vicious cycle** with the transcription factor NF- B in cystic fibrosis. NF- B regulation represents a novel anti-IL-8 therapy for use in inflammatory diseases such as cystic fibrosis.

P2: MiRNA-146a/b-5p indirectly represses IL-8 expression by silencing the expression of IRAK1. Additionally, the 3'UTR of IL-8 contains a A/U-rich element that makes it extremely unstable under certain conditions. IL-8 and other inflammatory cytokines form a **harmful sequential chain** with the transcription factor NF- B in cystic fibrosis. NF- B regulation represents a novel anti-IL-8 therapy for use in inflammatory diseases such as cystic fibrosis.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **vicious cycle** and **harmful sequential chain** interchangeable (i.e., having the same meaning)?

Pair 1800

P1: IDUs. Mexico's border cities account for the majority of intravenous drugs, methamphetamine and heroine, that are trafficked into the United States. Much of the cities, economy is an **informal one**, made up of different groups, all contributing to the drug trade. These groups include, gangs, drug dealers, corrupt police, corrupt government officials, immigrants who traffic the drugs across the border on foot, and sex workers, who by way of their clients, are indirectly involved.

P2: IDUs. Mexico's border cities account for the majority of intravenous drugs, methamphetamine and heroine, that are trafficked into the United States. Much of the cities, economy is an **unrecognized economy**, made up of different groups, all contributing to the drug trade. These groups include, gangs, drug dealers, corrupt police, corrupt government officials, immigrants who traffic the drugs across the border on foot, and sex workers, who by way of their clients, are indirectly involved.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **informal one** and **unrecognized economy** interchangeable (i.e., having the same meaning)?

Pair 1801

P1: As a Fifth Schedule company under the Singapore Constitution, GIC is accountable in various key areas to the President of Singapore who is empowered under the constitution to obtain information to enable her to safeguard the country's reserves. The Auditor-General, who is appointed by the President of Singapore, submits an annual report to the President and Parliament on his audit of the Government and other bodies managing public funds. GIC manages risk by investing in a well-diversified portfolio, with a **balanced distribution** of asset classes and their underlying business sectors and geographies. This, too, is why GIC's performance has to be measured on the basis of its overall portfolio rather than by how much it makes or loses on individual investments.

P2: As a Fifth Schedule company under the Singapore Constitution, GIC is accountable in various key areas to the President of Singapore who is empowered under the constitution to obtain information to enable her to safeguard the country's reserves. The Auditor-General, who is appointed by the President of Singapore, submits an annual report to the President and Parliament on his audit of the Government and other bodies managing public funds. GIC manages risk by investing in a well-diversified portfolio, with a **stabilized apportionment** of asset classes and their underlying business sectors and geographies. This, too, is why GIC's performance has to be measured on the basis of its overall portfolio rather than by how much it makes or loses on individual investments.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **balanced distribution** and **stabilized apportionment** interchangeable (i.e., having the same meaning)?

Pair 1802

P1: Expounding on that theme in 1943, in a review essay of A.J.M. Smith's anthology "The Book of Canadian Poetry", Frye stated that, in Canadian poetry: By the time "Brébeuf" was published the war had begun; and "in his next four volumes, Pratt returned to themes of patriotism and violence. Sea poetry merges with war poetry in Dunkirk (1941), which recounts the epic rescue of British forces while also emphasizing its **democratic nature**... Language plays a pivotal role as Churchill's call inspires the miraculous deliverance.

P2: Expounding on that theme in 1943, in a review essay of A.J.M. Smith's anthology "The Book of Canadian Poetry", Frye stated that, in Canadian poetry: By the time "Brébeuf" was published the war had begun; and "in his next four volumes, Pratt returned to themes of patriotism and violence. Sea poetry merges with war poetry in Dunkirk (1941), which recounts the epic rescue of British forces while also emphasizing its **egalitarian quality**... Language plays a pivotal role as Churchill's call inspires the miraculous deliverance.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **democratic nature** and **egalitarian quality** interchangeable (i.e., having the same meaning)?

Pair 1803

P1: In 1999 the independent label Unreleased Records was formed by CEO's Draztik and DJ IQ from Gaborone, Botswana and X-Amount from Johannesburg, South Africa. The idea was to create a platform for the emerging hip-hop talent in Southern Africa which they felt was being secluded from the musical landscape by the industry. **cashless society**

were amongst the first groups to sign with Unreleased Records in 1999. The group was made up of Draztik, X-Amount, Snazz D, Black Intellect, Slim a.k.a.

P2: In 1999 the independent label Unreleased Records was formed by CEO's Draztik and DJ IQ from Gaborone, Botswana and X-Amount from Johannesburg, South Africa. The idea was to create a platform for the emerging hip-hop talent in Southern Africa which they felt was being secluded from the musical landscape by the industry. "Cashless Society" were amongst the first groups to sign with Unreleased Records in 1999. The group was made up of Draztik, X-Amount, Snazz D, Black Intellect, Slim a.k.a.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **cashless society** and "Cashless Society" interchangeable (i.e., having the same meaning)?

Pair 1804

P1: Faced with the loss of his studio, Coetzee purchased a house in Finestrat, Spain and settled there. While living in Spain he became friends with Imme Reich and Frederico Van Ankum and exhibited at their Galeria Arrabal in Callosa d'En Sarrià. He also spent **significantly more time** in his home country, as is evidenced by more frequent exhibitions. During a short visit to South African, it was decided to show a retrospective exhibition of his work at the Pretoria Art Museum from December 1965 to January 1966, curated by Albert Werth.

P2: Faced with the loss of his studio, Coetzee purchased a house in Finestrat, Spain and settled there. While living in Spain he became friends with Imme Reich and Frederico Van Ankum and exhibited at their Galeria Arrabal in Callosa d'En Sarrià. He also spent **an increasing duration** in his home country, as is evidenced by more frequent exhibitions. During a short visit to South African, it was decided to show a retrospective exhibition of his work at the Pretoria Art Museum from December 1965 to January 1966, curated by Albert Werth.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **significantly more time** and **an increasing duration** interchangeable (i.e., having the same meaning)?

Pair 1805

P1: This is better than a linear search, but worse than a binary search. The advantage over the latter is that a jump search only needs to jump backwards once, while a binary can jump backwards up to log "n" times. This can be important if a jumping backwards takes **significantly more time** than jumping forward. The algorithm can be modified by performing multiple levels of jump search on the sublists, before finally performing the linear search.

P2: This is better than a linear search, but worse than a binary search. The advantage over the latter is that a jump search only needs to jump backwards once, while a binary can jump backwards up to log "n" times. This can be important if a jumping backwards takes **an additional interval** than jumping forward. The algorithm can be modified by performing multiple levels of jump search on the sublists, before finally performing the linear search.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **significantly more time** and **an additional interval** interchangeable (i.e., having the same meaning)?

Pair 1806

P1: Aquaculture is encouraged by many governments as a way to generate jobs and income, particularly when wild fisheries have been run down. However, this may not apply to offshore aquaculture. Offshore aquaculture entails high equipment and supply costs, and therefore will be under **severe pressure** to lower labor costs through automated production technologies. Employment is likely to expand more at processing facilities than grow-out industries as offshore aquaculture develops.

P2: Aquaculture is encouraged by many governments as a way to generate jobs and income, particularly when wild fisheries have been run down. However, this may not apply to offshore aquaculture. Offshore aquaculture entails high equipment and supply costs, and therefore will be under significant duress to lower labor costs through automated production technologies. Employment is likely to expand more at processing facilities than grow-out industries as offshore aquaculture develops.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are severe pressure and significant duress interchangeable (i.e., having the same meaning)?

Pair 1807

P1: Early formation of the heart and other primitive structures. In front of the buccopharyngeal area, where the lateral crescents of mesoderm fuse in the middle line, the pericardium is afterward developed, and this region is therefore designated the pericardial area. A second region where the mesoderm is absent, at least for a time, is that immediately in front of the pericardial area. This is termed the proamniotic area, and is the region where the proamnion is developed; in humans, however, it appears that a proamnion is never formed.

P2: Early formation of the heart and other primitive structures. In front of the buccopharyngeal area, where the lateral crescents of mesoderm fuse in the middle line, the pericardium is afterward developed, and this region is therefore designated the pericardial area. A different section where the mesoderm is absent, at least for a time, is that immediately in front of the pericardial area. This is termed the proamniotic area, and is the region where the proamnion is developed; in humans, however, it appears that a proamnion is never formed.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are second region and different section interchangeable (i.e., having the same meaning)?

Pair 1808

P1: For example, you have a row which has the following information about indication which are in the bracelets: UNU-KEY(001), Description (Central Heating (household installed)), EEE category under EU-10 (1), EEE category under EU-6 (4). The UNU-KEYs system closely follows the harmonized statistical (HS) coding. It is an international nomenclature which is an integrated system to allow classify common basis for customs purposes. Electronic waste substances.

P2: For example, you have a row which has the following information about indication which are in the bracelets: UNU-KEY(001), Description (Central Heating (household installed)), EEE category under EU-10 (1), EEE category under EU-6 (4). The UNU-KEYs system closely follows the harmonized statistical (HS) coding. It is an international nomenclature which is an integrated system to allow classify like categories for customs purposes. Electronic waste substances.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are common basis and like categories interchangeable (i.e., having the same meaning)?

Pair 1809

P1: Les Soirées de Nazelles, FP 84, is a set of variations for piano written by the French composer Francis Poulenc. During the evenings, the composer used to sit at the piano and improvise "portraits" of his friends, all based on a given theme. The work was begun in 1930, and completed at Noizay on October 1, 1936.

P2: Les Soirées de Nazelles, FP 84, is a set of variations for piano written by the French composer Francis Poulenc. During the evenings, the composer used to sit at the piano and improvise "portraits" of his friends, all based on a designated subject. The work was begun in 1930, and completed at Noizay on October 1, 1936.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **given theme** and **designated subject** interchangeable (i.e., having the same meaning)?

Pair 1810

P1: The dispute over who takes the lead in council is yet to be discussed. Significant events held by Student Council are Singing Contest and the Variety Show. **For the former event, it is an annual big activity for all students to participate.** It is a platform for those who are interested in singing and dancing to showcase their talent.

P2: The dispute over who takes the lead in council is yet to be discussed. Significant events held by Student Council are Singing Contest and the Variety Show. **For the first occasion, it is an annual big activity for all students to participate.** It is a platform for those who are interested in singing and dancing to showcase their talent.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **former event** and **first occasion** interchangeable (i.e., having the same meaning)?

Pair 1811

P1: He conducted his first research in Anatolia, more specifically in the south coast of Turkey. In 1951, he initiated a series of archaeological excavations (financed by the French Ministry of Foreign and European Affairs) at the ancient capital of Lycia, Xanthos, which was occupied from the 7th century BCE by the Lycians, Greeks, Romans and Byzantines for more than a thousand years. **His discoveries from Xanthos, including monumental and funeral architecture and inscriptions, were a decisive step in our understanding of ancient Lycian civilization today.** Pierre Demargne continued his research and publications into old age: from 1926, he was a member of the French School at Athens; and from 1969 to his death, he was a member of the "Académie des Inscriptions et Belles-Lettres".

P2: He conducted his first research in Anatolia, more specifically in the south coast of Turkey. In 1951, he initiated a series of archaeological excavations (financed by the French Ministry of Foreign and European Affairs) at the ancient capital of Lycia, Xanthos, which was occupied from the 7th century BCE by the Lycians, Greeks, Romans and Byzantines for more than a thousand years. **His discoveries from Xanthos, including monumental and funeral architecture and inscriptions, were a critical advancement in our understanding of ancient Lycian civilization today.** Pierre Demargne continued his research and publications into old age: from 1926, he was a member of the French School at Athens; and from 1969 to his death, he was a member of the "Académie des Inscriptions et Belles-Lettres".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **decisive step** and **critical advancement** interchangeable (i.e., having the same meaning)?

Pair 1812

P1: There was thus no merit in Komoco's contention that the Registrar had not given genuine consideration to its representation. Furthermore, Komoco had not provided new evidence not already presented to the Customs to justify a departure from the administrative convention. **Therefore, there had not been any compelling reason for the Registrar to re-evaluate her decision.** She had adequately justified her refusal to depart from the policy, and had not fettered her discretion.

P2: There was thus no merit in Komoco's contention that the Registrar had not given genuine consideration to its representation. Furthermore, Komoco had not provided new evidence not already presented to the Customs to justify a departure from the administrative convention. **Therefore, there had not been any persuasive grounds for the Registrar to re-evaluate her decision.** She had adequately justified her refusal to depart from the policy, and had not fettered her discretion.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **compelling reason** and **persuasive grounds** interchangeable (i.e., having the same meaning)?

Pair 1813

P1: Arrests and indictment. Some 14 people – twelve Pakistanis and two Indians – were arrested between 18 and 19 January 2008 in the Raval multicultural neighborhood in Barcelona. The police searched four private homes, an industrial site turned into an Islamic prayer room and a bakery. One of the arrested cooperated with the intelligence services and became a protected witness.

P2: Arrests and indictment. Some 14 people – twelve Pakistanis and two Indians – were arrested between 18 and 19 January 2008 in the Raval multicultural neighborhood in Barcelona. The police searched four private homes, an automated production spot turned into an Islamic prayer room and a bakery. One of the arrested cooperated with the intelligence services and became a protected witness.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are industrial site and automated production spot interchangeable (i.e., having the same meaning)?

Pair 1814

P1: The purpose of gas chambers within "Ventogyrus" would likely have been for buoyancy to stay in an upright position, and possibly to float above the sea floor. "Ventogyrus" also has three distinct longitudinal channels running along the central rod connecting the three modules. Each of these channels branches, and the branches move outward through the body, branching repeatedly to make up an internal network. It is possible this network was a circulatory system.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are internal network and interior system interchangeable (i.e., having the same meaning)?

Pair 1815

P1: If confronted, the establishment claims that they have no connection with the woman and indicates that she arrived with the man, and as such the man is responsible for all of the items on the bill. Often, a clip joint employee waits near a legitimate club, and invites passing pedestrians into a VIP area. The potential customers are led to believe that the person works for the nearby club, though they may not explicitly say so. Once inside, drinks are usually alcohol free (as the venues usually do not have a license) or watered down and overpriced with no prices listed on the menu.

P2: If confronted, the establishment claims that they have no connection with the woman and indicates that she arrived with the man, and as such the man is responsible for all of the items on the bill. Often, a clip joint employee waits near a legitimate club, and invites passing pedestrians into a VIP area. The potential customers are led to believe that the person works for the neighboring bar, though they may not explicitly say so. Once inside, drinks are usually alcohol free (as the venues usually do not have a license) or watered down and overpriced with no prices listed on the menu.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are nearby club and neighboring bar interchangeable (i.e., having the same meaning)?

Pair 1816

P1: Career. Born in Northumberland, Little played professionally for Croydon Common until the outbreak of World War I in 1914. When Croydon Common were wound up in 1917, Little signed for **nearby club** and Southern Football League rivals Crystal Palace. Little stayed at Palace as the club went from the Southern League to the Third Division, winning the new Division at the first attempt.

P2: Career. Born in Northumberland, Little played professionally for Croydon Common until the outbreak of World War I in 1914. When Croydon Common were wound up in 1917, Little signed for **proximately located team** and Southern Football League rivals Crystal Palace. Little stayed at Palace as the club went from the Southern League to the Third Division, winning the new Division at the first attempt.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **nearby club** and **proximately located team** interchangeable (i.e., having the same meaning)?

Pair 1817

P1: Zohry received his Ph.D. from the University of Sussex in 2002. He is a leading researcher in the field of migration studies in Egypt with a special focus on irregular migration. Dr. Zohry has about 20 years of experience in the field of **population studies** and migration research. He started his career working as a junior demographer at the National Population Council (Egypt) from 1987 until joining the Cairo Demographic Center in 1992 to study for two diplomas in demography and population and development, then a Master of Philosophy in Demography in 1995 with specialization in family planning programs and population policies.

P2: Zohry received his Ph.D. from the University of Sussex in 2002. He is a leading researcher in the field of migration studies in Egypt with a special focus on irregular migration. Dr. Zohry has about 20 years of experience in the field of **geographical group research** and migration research. He started his career working as a junior demographer at the National Population Council (Egypt) from 1987 until joining the Cairo Demographic Center in 1992 to study for two diplomas in demography and population and development, then a Master of Philosophy in Demography in 1995 with specialization in family planning programs and population policies.

Please record your answer for the following question in the provided Google sheet

Pair 1818

P1: Cowlings made the skates wider, especially at the bottom of the boot. When the modern goaltender went into a deep "butterfly" position, to see between the players in front of him, the cowl would lift the blade off the ice. The new goaltender skate is made out of newer materials, allowing the boot itself to provide the **needed protection**. The cowlings are being phased out of professional play.

P2: Cowlings made the skates wider, especially at the bottom of the boot. When the modern goaltender went into a deep "butterfly" position, to see between the players in front of him, the cowl would lift the blade off the ice. The new goaltender skate is made out of newer materials, allowing the boot itself to provide the **requisite cushioning**. The cowlings are being phased out of professional play.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **needed protection** and **requisite cushioning** interchangeable (i.e., having the same meaning)?

Pair 1819

P1: Upper floor lavatories and bathrooms were located above the ground floor lavatories at the east end of the north wing. Boarders used a second staircase on the rear verandah, rather than the grand central stair. At the rear, the kitchen, scullery and servant's room formed a **detached wing**, connected to the main building via a covered way. Stanley had

taken account of the Cooktown climate: the rooms were large, light and airy, and there were deep verandahs front and back.

P2: Upper floor lavatories and bathrooms were located above the ground floor lavatories at the east end of the north wing. Boarders used a second staircase on the rear verandah, rather than the grand central stair. **At the rear, the kitchen, scullery and servant's room formed a segregated branch, connected to the main building via a covered way.** Stanley had taken account of the Cooktown climate: the rooms were large, light and airy, and there were deep verandahs front and back.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **detached wing** and **segregated branch** interchangeable (i.e., having the same meaning)?

Pair 1820

P1: The Car of Tomorrow (CoT) was first tested in December 2005, and was first revealed to the public in 2006, with numerous safety improvements being touted. The CoT made its debut at the 2007 Food City 500, and was almost immediately criticized by both fans and drivers alike. **Many fans disliked the large and boxy design, its more generic appearance and the use of a detached wing.** Kyle Busch, who won the debut race of the CoT, proclaimed that the car "sucks" after his victory and expanded on this criticism at Dover in 2008 by noting how the CoT was "hitting a wall of air" in the wake of a leading car, thus neutralizing ability to close up on leaders.

P2: The Car of Tomorrow (CoT) was first tested in December 2005, and was first revealed to the public in 2006, with numerous safety improvements being touted. The CoT made its debut at the 2007 Food City 500, and was almost immediately criticized by both fans and drivers alike. **Many fans disliked the large and boxy design, its more generic appearance and the use of a separable spoiler.** Kyle Busch, who won the debut race of the CoT, proclaimed that the car "sucks" after his victory and expanded on this criticism at Dover in 2008 by noting how the CoT was "hitting a wall of air" in the wake of a leading car, thus neutralizing ability to close up on leaders.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **detached wing** and **separable spoiler** interchangeable (i.e., having the same meaning)?

Pair 1821

P1: The term "snuff" in this context is an English cognate of the aforementioned "snus", from Swedish. Dipping tobacco's Scandinavian roots impart a noticeable legacy on modern American brands such as Copenhagen and Skoal (referring to the interlinguistic term "skål", which in Danish, Norwegian, Icelandic, Faroese and Swedish roughly translates to "cheers", implying a toast). **A user of dipping tobacco will produce an excess amount of saliva which will be disposed of using a "spitter."** A spitter can be an empty bottle, cup or commercially produced spittoon.

P2: The term "snuff" in this context is an English cognate of the aforementioned "snus", from Swedish. Pair 1825

P1: Royal women in the Amarna period. Nefertiti. **Nefertiti, whose name means "the beautiful one has come," was the queen of Egypt and wife of king Akhenaten.** She and her husband established the religion of Aten, and promoted Egyptian art that was very different.

P2: Royal women in the Amarna period. Nefertiti. **Nefertiti, whose name means "the exquisite being has come," was the queen of Egypt and wife of king Akhenaten.** She and her husband established the religion of Aten, and promoted Egyptian art that was very different.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **beautiful one** and **exquisite being** interchangeable (i.e., having the same meaning)?

Pair 1826

P1: The award was acquisitive, and winners were brought into the collection displayed along the Sculpture Walk at Werribee Park. The local government authority, Wyndham City Council, would also purchase works for deployment as sculptural installations in the municipality. The future of the collection at Werribee Park remains unresolved; Perpetual Private Wealth has announced a **separate review**. Complete list of winners.

P2: The award was acquisitive, and winners were brought into the collection displayed along the Sculpture Walk at Werribee Park. The local government authority, Wyndham City Council, would also purchase works for deployment as sculptural installations in the municipality. The future of the collection at Werribee Park remains unresolved; Perpetual Private Wealth has announced a **distinct examination**. Complete list of winners.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **separate review** and **distinct examination** interchangeable (i.e., having the same meaning)?

Pair 1827

P1: The rates of extrapair paternity ranged from 0.03% to 11.8% although most of the locations had low percentages of extrapair paternity. The median rate of extrapair paternity was 1.8%. A **separate review** of 17 studies by Bellis, Hughes, Hughes, and Ashton found slightly higher rates of extrapair paternity. The rates varied from 0.8% to 30% in these studies, with a median rate of 3.7% extrapair paternity.

P2: The rates of extrapair paternity ranged from 0.03% to 11.8% although most of the locations had low percentages of extrapair paternity. The median rate of extrapair paternity was 1.8%. A **discrete survey** of 17 studies by Bellis, Hughes, Hughes, and Ashton found slightly higher rates of extrapair paternity. The rates varied from 0.8% to 30% in these studies, with a median rate of 3.7% extrapair paternity.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **separate review** and **discrete survey** interchangeable (i.e., having the same meaning)?

Pair 1828

P1: They were given Honorary status due to the fact that they were the examiners during the first 12 years of the CWM programme and could never write the exams themselves, and for doing the ground breaking and outstanding work to start the CWM programme. Dave Hughes was head of Consumer Relations at SFW at the time and was overall responsible for the CWA and had a wealth of wine experience. Phyllis Hands was Principal of the Cape Wine Academy from its inception in 1979 and well known for her **wine knowledge** and training wine people. Colin Frith was appointed as wine buyer at SFW in 1982, and brought with him a huge amount of knowledge regarding international wines with his vast background of wine in the UK retail trade.

P2: They were given Honorary status due to the fact that they were the examiners during the first 12 years of the CWM programme and could never write the exams themselves, and for doing the ground breaking and outstanding work to start the CWM programme. Dave Hughes was head of Consumer Relations at SFW at the time and was overall responsible for the CWA and had a wealth of wine experience. Phyllis Hands was Principal of the Cape Wine Academy from its inception in 1979 and well known for her **upscale alcohol intelligence** and training wine people. Colin Frith was appointed as wine buyer at SFW in 1982, and brought with him a huge amount of knowledge regarding international wines with his vast background of wine in the UK retail trade.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **wine knowledge** and **upscale alcohol intelligence** interchangeable (i.e., having the same meaning)?

Pair 1829

P1: In fourteen Philadelphia-area districts, Smith-supporting delegates were elected. Smith also performed strongly in Pittsburgh, with ten districts in Allegheny County electing Smith-supporting delegates. **Smith additionally received an immense amount** of backing from the state's coal country. Midwestern primaries.

P2: In fourteen Philadelphia-area districts, Smith-supporting delegates were elected. Smith also performed strongly in Pittsburgh, with ten districts in Allegheny County electing Smith-supporting delegates. **Smith additionally received an exorbitant sum** of backing from the state's coal country. Midwestern primaries.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **immense amount** and **exorbitant sum** interchangeable (i.e., having the same meaning)?

Pair 1830

P1: He manages: He has a yellow chasuble-like jacket with the inscription "Directeur des Secours Incendie et Sauvetage". The director of medical rescue (DSM). **The director of medical rescue (DSM) manages the medical chain** described below. He has a yellow chasuble-like jacket with the inscription "Directeur des Secours Médicaux".

P2: He manages: He has a yellow chasuble-like jacket with the inscription "Directeur des Secours Incendie et Sauvetage". The director of medical rescue (DSM). **The director of medical rescue (DSM) manages the therapeutic group** described below. He has a yellow chasuble-like jacket with the inscription "Directeur des Secours Médicaux".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **medical chain** and **therapeutic group** interchangeable (i.e., having the same meaning)?

Pair 1831

P1: Six hours later, Alma attained peak winds of 65 mph (100 km/h) in accordance with data from a reconnaissance aircraft. Early on August 14, Alma made landfall in Trinidad as a minimal tropical storm, becoming the southernmost-landfalling system on the island in 41 years. **The system's circulation** entered Venezuela and interacted with mountainous terrain, where it dissipated by 12:00 UTC on August 15. The storm produced a wind gust as high as on Trinidad at Savonetta.

P2: Six hours later, Alma attained peak winds of 65 mph (100 km/h) in accordance with data from a reconnaissance aircraft. Early on August 14, Alma made landfall in Trinidad as a minimal tropical storm, becoming the southernmost-landfalling system on the island in 41 years. **The tropical storm's path** entered Venezuela and interacted with mountainous terrain, where it dissipated by 12:00 UTC on August 15. The storm produced a wind gust as high as on Trinidad at Savonetta.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **system's circulation** and **tropical storm's path** interchangeable (i.e., having the same meaning)?

Pair 1832

P1: At the same time, HST was able to detect condensed oxygen trapped on the surface of Callisto. Atomic hydrogen has also been detected in Callisto's atmosphere via recent analysis of 2001 Hubble Space Telescope data. **Spectral images taken on 15 and 24 December 2001 were re-examined, revealing a faint signal** of scattered light that indicates a hydrogen corona. The observed brightness from the scattered sunlight in Callisto's hydrogen corona is approximately two times larger when the leading hemisphere is observed.

P2: At the same time, HST was able to detect condensed oxygen trapped on the surface of Callisto. Atomic hydrogen has also been detected in Callisto's atmosphere via recent analysis of 2001 Hubble Space Telescope data. Spectral images taken on 15 and 24 December 2001 were re-examined, revealing a barely perceptible shadow of scattered light that indicates a hydrogen corona. The observed brightness from the scattered sunlight in Callisto's hydrogen corona is approximately two times larger when the leading hemisphere is observed.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are faint signal and barely perceptible shadow interchangeable (i.e., having the same meaning)?

Pair 1833

P1: Ghani was an expert on Sufism and familiar with the various Islamic Sufi cults. On 10 January 1955 at 4 P.M., Baba broke a fast with rice and dal. During this period, Baba would trace letters with his finger on either a stool or any other convenient surface. But it was very difficult for the mandali to decipher them quickly.

P2: Ghani was an expert on Sufism and familiar with the various Islamic Sufi cults. On 10 January 1955 at 4 P.M., Baba broke a fast with rice and dal. During this period, Baba would trace letters with his finger on either a stool or any other readily available space. But it was very difficult for the mandali to decipher them quickly.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are convenient surface and readily available space interchangeable (i.e., having the same meaning)?

Pair 1834

P1: In 1925, Chen formally joined Kuomintang (KMT) in San Francisco after receiving his master's degree in mining engineering from the University of Pittsburgh. On January 9, 1926, Chiang Kai-shek hired Chen as his confidential secretary. Chen was later promoted in 1927 to head the investigation section of the Organization Department of the KMT. In 1938, Chen was again promoted, becoming the minister of education.

P2: In 1925, Chen formally joined Kuomintang (KMT) in San Francisco after receiving his master's degree in mining engineering from the University of Pittsburgh. On January 9, 1926, Chiang Kai-shek hired Chen as his confidential secretary. Chen was later promoted in 1927 to head the inspection division of the Organization Department of the KMT. In 1938, Chen was again promoted, becoming the minister of education.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are investigation section and inspection division interchangeable (i.e., having the same meaning)?

Pair 1835

P1: The controversy largely began after an accompanying "Mathematical" recap—a studio-endorsed behind the scenes video series implied that there were lesbian relations between Princess Bubblegum and Marceline and that the writing staff actively seeks input from fans. This incident was addressed by the show's producer, Fred Seibert, who said that "in trying to get the show's audience involved we got wrapped up by both fan conjecture and spicy fanart and went a little too far." Soon after, the video recap and the entire channel was pulled off of YouTube, although "What Was Missing" still airs during reruns. Seibert's decision to remove the video also proved controversial; "Bitch" magazine later wrote an article about how the episode "handled female desire—female queer desire at that—in a subtle but complex way", and that the removal of the recap and the studio's perceived treatment of the controversy was detrimental towards the acceptance of queer romance in children's television.

P2: The controversy largely began after an accompanying "Mathematical" recap—a studio-endorsed behind the scenes video series implied that there were lesbian relations between Princess Bubblegum and Marceline and that the writing staff actively seeks input from fans. This incident was addressed by the show's producer, Fred Seibert, who said that "in

trying to get the show’s audience involved we got wrapped up by both fan conjecture and spicy fanart and went a little too far.” Soon after, the video recap and the **complete video medium** was pulled off of YouTube, although “What Was Missing” still airs during reruns. Seibert’s decision to remove the video also proved controversial; “Bitch” magazine later wrote an article about how the episode “handled female desire—female queer desire at that—in a subtle but complex way”, and that the removal of the recap and the studio’s perceived treatment of the controversy was detrimental towards the acceptance of queer romance in children’s television.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **entire channel** and **complete video medium** interchangeable (i.e., having the same meaning)?

Pair 1836

P1: Other candidates for the capital were Zweibrücken, Kaiserslautern and Frankenthal. At the time, Speyer had a population of 6,000 and offered the best conditions because of its location and already existing buildings. **Because of its previous function** it also had an already existing administrative apparatus to build upon. The government was posted in the city hall.

P2: Other candidates for the capital were Zweibrücken, Kaiserslautern and Frankenthal. At the time, Speyer had a population of 6,000 and offered the best conditions because of its location and already existing buildings. **Because of its prior role** it also had an already existing administrative apparatus to build upon. The government was posted in the city hall.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **previous function** and **prior role** interchangeable (i.e., having the same meaning)?

Pair 1837

P1: The Pathfinder series is a completed series of novels by Orson Scott Card that is notable for its unusual fusion of the themes of science fiction and fantasy, with some elements of historical fiction. **one significant aspect** of the Pathfinder series is its uniquely complex but well documented set of time travel rules. Plot.

P2: The Pathfinder series is a completed series of novels by Orson Scott Card that is notable for its unusual fusion of the themes of science fiction and fantasy, with some elements of historical fiction. **a key element** of the Pathfinder series is its uniquely complex but well documented set of time travel rules. Plot.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one significant aspect** and **a key element** interchangeable (i.e., having the same meaning)?

Pair 1838

P1: In that episode, Edith relates an incident where she herself had been the victim of an attempted date rape as a teenager in the 1940s, during a double date visit to Rockaway Beach, but due to the social norms of the time she had not pursued justice. Response. **The New York Police Department showed this episode, along with other films, to convey the woman’s side** of rape. It was also shown at rape crisis centers.

P2: In that episode, Edith relates an incident where she herself had been the victim of an attempted date rape as a teenager in the 1940s, during a double date visit to Rockaway Beach, but due to the social norms of the time she had not pursued justice. Response. **The New York Police Department showed this episode, along with other films, to convey the female perspective** of rape. It was also shown at rape crisis centers.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **woman's side** and **female perspective** interchangeable (i.e., having the same meaning)?

Pair 1839

P1: The Burnley–Darling line, the Fawkner line, the reopened branch to Altona, and the Williamstown line followed in 1920. The line to Broadmeadows, the Whittlesea line to Reservoir, the Bendigo line to St Albans, and the inner sections of the Hurstbridge line were electrified in 1921. **The Gippsland line to Dandenong and Frankston line were electrified in 1922, as was the inner section of the Ringwood line due to regrading works.** The original electrification scheme was completed in 1923, but over the next three years a number of short extensions were carried out.

P2: The Burnley–Darling line, the Fawkner line, the reopened branch to Altona, and the Williamstown line followed in 1920. The line to Broadmeadows, the Whittlesea line to Reservoir, the Bendigo line to St Albans, and the inner sections of the Hurstbridge line were electrified in 1921. **The Gippsland line to Dandenong and Frankston line were electrified in 1922, as was the interior region of the Ringwood line due to regrading works.** The original electrification scheme was completed in 1923, but over the next three years a number of short extensions were carried out.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **inner section** and **interior region** interchangeable (i.e., having the same meaning)?

Pair 1840

P1: Astronomical albedos are usually given by the IRAS minor planet survey or the MSX minor planet survey (available at the PDS). These are "geometric albedos". **If there is no IRAS/MSX data a rough average of 0.1 can be used.** Surface temperature.

P2: Astronomical albedos are usually given by the IRAS minor planet survey or the MSX minor planet survey (available at the PDS). These are "geometric albedos". **If there is no IRAS/MSX data a basic median of 0.1 can be used.** Surface temperature.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **rough average** and **basic median** interchangeable (i.e., having the same meaning)?

Pair 1841

P1: Affine transformations in two real dimensions include: To visualise the general affine transformation of the Euclidean plane, take labelled parallelograms "ABCD" and "A B C D". Whatever the choices of points, there is an affine transformation "T" of the plane taking "A" to "A", and each vertex similarly. **Supposing we exclude the degenerate case where "ABCD" has zero area, there is a unique such affine transformation "T".** Drawing out a whole grid of parallelograms based on "ABCD", the image "T"("P") of any point "P" is determined by noting that "T"("A") = "A", "T" applied to the line segment "AB" is "A B", "T" applied to the line segment "AC" is "A C", and "T" respects scalar multiples of vectors based at "A".

P2: Affine transformations in two real dimensions include: To visualise the general affine transformation of the Euclidean plane, take labelled parallelograms "ABCD" and "A B C D". Whatever the choices of points, there is an affine transformation "T" of the plane taking "A" to "A", and each vertex similarly. **Supposing we exclude the degenerate case where "ABCD" has no dimensions, there is a unique such affine transformation "T".** Drawing out a whole grid of parallelograms based on "ABCD", the image "T"("P") of any point "P" is determined by noting that "T"("A") = "A", "T" applied to the line segment "AB" is "A B", "T" applied to the line segment "AC" is "A C", and "T" respects scalar multiples of vectors based at "A".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **zero area** and **no dimensions** interchangeable (i.e., having the same meaning)?

Pair 1842

P1: The Advanced Content runtime engine is responsible for responding to user navigation input (e.g., from a remote control) as well as events set to occur during playback of a movie, controlling all actions and interactive properties during the playback of a movie. The Advanced Content specification was developed by Microsoft and Disney with input from other members of the DVD Forum including Toshiba and Sonic Solutions. **Advanced Content also enables network access to download additional content and access to persistent storage which is used for storing bookmarks and other state information.** The ability to play back Advanced Content is a mandatory part of the HD DVD-Video specification.

P2: The Advanced Content runtime engine is responsible for responding to user navigation input (e.g., from a remote control) as well as events set to occur during playback of a movie, controlling all actions and interactive properties during the playback of a movie. The Advanced Content specification was developed by Microsoft and Disney with input from other members of the DVD Forum including Toshiba and Sonic Solutions. **Advanced Content also enables network access to download additional content and access to persistent storage which is used for storing bookmarks and other government data.** The ability to play back Advanced Content is a mandatory part of the HD DVD-Video specification.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **state information** and **government data** interchangeable (i.e., having the same meaning)?

Pair 1843

P1: María Evelia Marmolejo (born 1958) is a Colombian radical feminist performance artist, later based in Madrid and New York City. She is credited by the Colombian scholar María Lovino with staging the first work of feminist performance art in Colombia, in 1981. **She is best known for discussing controversial themes such as political oppression, feminism, environment, and socioeconomic issues within her performances.** Early life.

P2: María Evelia Marmolejo (born 1958) is a Colombian radical feminist performance artist, later based in Madrid and New York City. She is credited by the Colombian scholar María Lovino with staging the first work of feminist performance art in Colombia, in 1981. **She is best known for discussing controversial themes such as national tyranny, feminism, environment, and socioeconomic issues within her performances.** Early life.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **political oppression** and **national tyranny** interchangeable (i.e., having the same meaning)?

Pair 1844

P1: Rabinowitz was a finalist in 1996, and winner in 2001, of the Pulitzer Prize for Commentary for her newspaper columns on the issue, and made the Amiraults' case a centerpiece of her book "No Crueler Tyrannies: Accusation, False Witness, and Other Terrors of Our Times." Violet and Cheryl were granted a new trial in 1997, on the basis that they had been denied the right to face their accusers and had been represented inadequately at trial, but Violet died, and a judge reduced Cheryl's sentence to time served before the new trial could proceed. **During 2001, the Massachusetts Board of Pardons recommended that Gerald's sentence be commuted, citing "substantial doubt" about his guilt.** He was granted parole in 2003.

P2: Rabinowitz was a finalist in 1996, and winner in 2001, of the Pulitzer Prize for Commentary for her newspaper columns on the issue, and made the Amiraults' case a centerpiece of her book "No Crueler Tyrannies: Accusation, False Witness, and Other Terrors of Our Times." Violet and Cheryl were granted a new trial in 1997, on the basis that they had been denied the right to face their accusers and had been represented inadequately at trial, but Violet died, and a judge reduced Cheryl's sentence to time served before the new trial could proceed. **During 2001, the Massachusetts Board of Pardons recommended that Gerald's sentence be commuted, citing "considerable dubiousness" about his guilt.** He was granted parole in 2003.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **substantial doubt** and **considerable dubiousness** interchangeable (i.e., having the same meaning)?

Pair 1845

P1: Stewie feels as though that the baby songs in the show are lacking in quality. Challenged by Brian, Stewie decides to write songs for babies that address actual baby related issues. **Stewie and Brian form a band they call 'Red Shirt, Blue Shirt', and he books a gig at a children's party.** While there, they meet Olivia Fuller, who somehow managed to survive the playhouse fire in "Chick Cancer".

P2: Stewie feels as though that the baby songs in the show are lacking in quality. Challenged by Brian, Stewie decides to write songs for babies that address actual baby related issues. **Stewie and Brian form a band they call 'Red Shirt, Blue Shirt', and he books a gig at a youthful celebration.** While there, they meet Olivia Fuller, who somehow managed to survive the playhouse fire in "Chick Cancer".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **children's party** and **youthful celebration** interchangeable (i.e., having the same meaning)?

Pair 1846

P1: These cells are limited in their outputs and seem to only connect to the cortical layers and reticular thalamic neurons. Reticular neurons (RE), on the other hand, are highly interconnected and have their own intrinsic oscillatory properties. **These neurons are capable of inhibiting thalamocortical activity via their direct connections to TCs.** Corticothalamic neurons are the cortical neurons that TC neurons synapse on.

P2: These cells are limited in their outputs and seem to only connect to the cortical layers and reticular thalamic neurons. Reticular neurons (RE), on the other hand, are highly interconnected and have their own intrinsic oscillatory properties. **These neurons are capable of inhibiting thalamocortical activity via their uninterrupted hookups to TCs.** Corticothalamic neurons are the cortical neurons that TC neurons synapse on.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **direct connections** and **uninterrupted hookups** interchangeable (i.e., having the same meaning)?

Pair 1847

P1: "majestic") he described himself as "princeps senatus", or merely "first among senators". The illusion of being elected from the Senate continued when Tiberius succeeded to the purple. **Whilst over time the principle weakened as republican government passed into distant history to the effect that the Empire became, functionally, an absolute monarchy.** The office of Roman and Byzantine emperor remained vaguely elective (albeit with the election procedure never strictly defined, but generally understood to be a matter for the Senate).

P2: "majestic") he described himself as "princeps senatus", or merely "first among senators". The illusion of being elected from the Senate continued when Tiberius succeeded to the purple. **Whilst over time the principle weakened as republican government passed into ancient past to the effect that the Empire became, functionally, an absolute monarchy.** The office of Roman and Byzantine emperor remained vaguely elective (albeit with the election procedure never strictly defined, but generally understood to be a matter for the Senate).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **distant history** and **ancient past** interchangeable (i.e., having the same meaning)?

Pair 1848

P1: Charge transfer theory. The charge transfer theory states that a lightning strike to a protected structure can be prevented by reducing the electrical potential between the protected structure and the thundercloud. This is done by transferring electric charge (such as from the nearby earth to the sky or vice versa). Transferring electric charge from the Earth to the sky is done by installing engineered products composed of many points above the structure.

P2: Charge transfer theory. The charge transfer theory states that a lightning strike to a protected structure can be prevented by reducing the electrical potential between the protected structure and the thundercloud. This is done by transferring electric charge (such as from the immediate planet to the sky or vice versa). Transferring electric charge from the Earth to the sky is done by installing engineered products composed of many points above the structure.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are nearby earth and immediate planet interchangeable (i.e., having the same meaning)?

Pair 1849

P1: This is a list of presidents of the Municipality of Kragujevac and Mayors of Kragujevac since 1920. The Mayor of Kragujevac is the head of the City of Kragujevac (the fourth largest city in Serbia). He acts on behalf of the City, and performs an executive function in the City of Kragujevac. The current Mayor of Kragujevac is Nikola Dašić (SNS).

P2: This is a list of presidents of the Municipality of Kragujevac and Mayors of Kragujevac since 1920. The Mayor of Kragujevac is the head of the City of Kragujevac (the fourth largest city in Serbia). He acts on behalf of the City, and performs an administrative role in the City of Kragujevac. The current Mayor of Kragujevac is Nikola Dašić (SNS).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are executive function and administrative role interchangeable (i.e., having the same meaning)?

Pair 1850

P1: He didn't have much to say. But he did talk. He was current on world affairs and never talked about family stuff. I didn't even know his sister was marrying."

P2: He didn't have much to say. But he did talk. He was current on world affairs and never talked about domestic issues. I didn't even know his sister was marrying."

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are family stuff and domestic issues interchangeable (i.e., having the same meaning)?

Pair 1851

P1: For years, forecasters have focused on obtaining accurate point predictions. Computing probabilistic forecasts, on the other hand, is generally a much more complex task and has not been discussed in the literature nor developed by practitioners so extensively. Therefore, QRA may be found particularly attractive from a practical point of view as it allows to leverage existing development of point forecasting. Computation.

P2: For years, forecasters have focused on obtaining accurate point predictions. Computing probabilistic forecasts, on the other hand, is generally a much more complex task and has not been discussed in the literature nor developed by practitioners so extensively. Therefore, QRA may be found particularly attractive from a practical point of view as it allows to leverage currently available research of point forecasting. Computation.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **existing development** and **currently available research** interchangeable (i.e., having the same meaning)?

Pair 1852

P1: Attempts to introduce the Arctic hare and the muskox have both failed. There are fifteen to twenty types of marine mammals, including whales, dolphins, seals, walruses, and polar bears. **Polar bears are the iconic symbol of Svalbard, and one of the main tourist attractions.** While the bears are protected, anyone outside of settlements is required to carry a rifle to kill polar bears in self defense, as a last resort should they attack.

P2: Attempts to introduce the Arctic hare and the muskox have both failed. There are fifteen to twenty types of marine mammals, including whales, dolphins, seals, walruses, and polar bears. **Polar bears are the quintessential insignia of Svalbard, and one of the main tourist attractions.** While the bears are protected, anyone outside of settlements is required to carry a rifle to kill polar bears in self defense, as a last resort should they attack.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **iconic symbol** and **quintessential insignia** interchangeable (i.e., having the same meaning)?

Pair 1853

P1: The song experienced the second highest debut of 2008 on the chart, tying with David Cook's "The Time of My Life". On the Hot 100, "Love Lockdown" also became the 10th song of the 2000s decade to debut in the top three. **However, the song was the second entry in the top three of the chart by any artist unaffiliated with "American Idol".** As of May 31, 2018, the song stands as West's ninth biggest hit of all time on the Hot 100.

P2: The song experienced the second highest debut of 2008 on the chart, tying with David Cook's "The Time of My Life". On the Hot 100, "Love Lockdown" also became the 10th song of the 2000s decade to debut in the top three. **However, the song was the sophomore acceptance in the top three of the chart by any artist unaffiliated with "American Idol".** As of May 31, 2018, the song stands as West's ninth biggest hit of all time on the Hot 100.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **second entry** and **sophomore acceptance** interchangeable (i.e., having the same meaning)?

Pair 1854

P1: Like much of central, southern, and east San Diego County, City Heights sits on Kumeyaay territory. The area was occupied by Spanish Missionaries beginning in the 18th century, who founded the mission system at the Mission San Diego de Alcalá, just north of the area presently called City Heights, beginning the genocide and indigenous resistance. **When Mexico gained independence from Spain in 1821, it claimed the land and secularized the mission system, distributing the lands to rancheros.** When the United States annexed the land, the modern era of American settler colonialism began.

P2: Like much of central, southern, and east San Diego County, City Heights sits on Kumeyaay territory. The area was occupied by Spanish Missionaries beginning in the 18th century, who founded the mission system at the Mission San Diego de Alcalá, just north of the area presently called City Heights, beginning the genocide and indigenous resistance. **When Mexico gained independence from Spain in 1821, it claimed the land and secularized the church land-acquisition arrangement, distributing the lands to rancheros.** When the United States annexed the land, the modern era of American settler colonialism began.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **mission system** and **church land-acquisition arrangement** interchangeable (i.e., having the same meaning)?

Pair 1855

P1: Time management, organization and lifestyle changes. Often, improvements to the effectiveness of study may be achieved through changes to things unrelated to the study material itself, such as time-management, boosting motivation and avoiding procrastination, and in improvements to sleep and diet. **Time management in study sessions aims to ensure that activities that achieve the greatest benefit are given the greatest focus.** A traffic lights system is a simple way of identifying the importance of information, highlighting or underlining information in colours: This reminds students to start with the things which will provide the quickest benefit, while 'red' topics are only dealt with if time allows.

P2: Time management, organization and lifestyle changes. Often, improvements to the effectiveness of study may be achieved through changes to things unrelated to the study material itself, such as time-management, boosting motivation and avoiding procrastination, and in improvements to sleep and diet. **Time management in study sessions aims to ensure that activities that achieve the greatest benefit are given the most attention.** A traffic lights system is a simple way of identifying the importance of information, highlighting or underlining information in colours: This reminds students to start with the things which will provide the quickest benefit, while 'red' topics are only dealt with if time allows.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **greatest focus** and **most attention** interchangeable (i.e., having the same meaning)?

Pair 1856

P1: Paleomagnetism, or palaeomagnetism, is the study of the record of the Earth's magnetic field in rocks, sediment, or archeological materials. Magnetic minerals in rocks can lock-in a record of the direction and intensity of the magnetic field when they form. **This record provides information on the past behavior of Earth's magnetic field and the past location of tectonic plates.** The record of geomagnetic reversals preserved in volcanic and sedimentary rock sequences (magnetostratigraphy) provides a time-scale that is used as a geochronologic tool.

P2: Paleomagnetism, or palaeomagnetism, is the study of the record of the Earth's magnetic field in rocks, sediment, or archeological materials. Magnetic minerals in rocks can lock-in a record of the direction and intensity of the magnetic field when they form. **This record provides information on the prior conduct of Earth's magnetic field and the past location of tectonic plates.** The record of geomagnetic reversals preserved in volcanic and sedimentary rock sequences (magnetostratigraphy) provides a time-scale that is used as a geochronologic tool.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **past behavior** and **prior conduct** interchangeable (i.e., having the same meaning)?

Pair 1857

P1: They can be formulated as SMART criteria: Projects are often guided by a steering group. The evaluation (measurement) occurs at the project closure. **However a continuous guard on the project progress should be kept by monitoring and evaluating.** Civil and military construction and industry infrastructure.

P2: They can be formulated as SMART criteria: Projects are often guided by a steering group. The evaluation (measurement) occurs at the project closure. **However a ceaseless watch on the project progress should be kept by monitoring and evaluating.** Civil and military construction and industry infrastructure.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **continuous guard** and **ceaseless watch** interchangeable (i.e., having the same meaning)?

Pair 1858

P1: Golosov Ravine (), also known as Vlasov () ravine is a deep ravine in Moscow, Russia, between the Kolomenskoe Hill and Dyakovo Hill. The ravine has several springs and a brook streaming at its bottom. Up in the ravine, on the left side of it, there is a Neopagan shrine, organized around two venerated "sacred stones". In years 2006–2007, during the renovation of Kolomenskoe sides of the ravine were reinforced, and pedestrian paths and stairs were created on its sides.

P2: Golosov Ravine (), also known as Vlasov () ravine is a deep ravine in Moscow, Russia, between the Kolomenskoe Hill and Dyakovo Hill. The ravine has several springs and a brook streaming at its bottom. Up in the ravine, on the sinistral section of it, there is a Neopagan shrine, organized around two venerated "sacred stones". In years 2006–2007, during the renovation of Kolomenskoe sides of the ravine were reinforced, and pedestrian paths and stairs were created on its sides.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are left side and sinistral section interchangeable (i.e., having the same meaning)?

Pair 1859

P1: Pseudoporphyria can be induced by a wide range of medications, excessive UV-A exposure, and hemodialysis. One frequently reported drug is naproxen. A frequent source of UV-A exposure is tanning booths. As recognition of pseudoporphyria increases and the number of new medications expands, the list of etiologic agents associated with pseudoporphyria will most likely continue to grow.

P2: Pseudoporphyria can be induced by a wide range of medications, excessive UV-A exposure, and hemodialysis. One frequently reported drug is naproxen. A persistent cause of UV-A exposure is tanning booths. As recognition of pseudoporphyria increases and the number of new medications expands, the list of etiologic agents associated with pseudoporphyria will most likely continue to grow.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are frequent source and persistent cause interchangeable (i.e., having the same meaning)?

Pair 1860

P1: and a walk-in entrance at the Tower of Jewels. The admission fee is collected at these entrances; ride coupons and unlimited passes are sold inside the park. This fare structure is a frequent source of confusion for first-time visitors. Many patrons think that they are paying for parking because the admission fee is collected at the auto gate before the vehicle is parked.

P2: and a walk-in entrance at the Tower of Jewels. The admission fee is collected at these entrances; ride coupons and unlimited passes are sold inside the park. This fare structure is a constant catalyst of confusion for first-time visitors. Many patrons think that they are paying for parking because the admission fee is collected at the auto gate before the vehicle is parked.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are frequent source and constant catalyst interchangeable (i.e., having the same meaning)?

Pair 1861

P1: e The legislation placed the responsibility of developing a wellness policy at the local level so the individual needs of each district can be addressed. According to the requirements for the Local Wellness Policy, school districts must set goals for nutrition education, physical activity, campus food provision, and other school-based activities designed to promote student wellness. Additionally, districts were required to involve a broad group of individuals in policy development and to have a plan for measuring policy implementation. Districts were offered a choice of levels of implementation for

limiting or prohibiting low nutrition foods on the school campus.

P2: e The legislation placed the responsibility of developing a wellness policy at the local level so the individual needs of each district can be addressed. According to the requirements for the Local Wellness Policy, school districts must set goals for nutrition education, physical activity, campus food provision, and other school-based activities designed to promote student wellness. Additionally, districts were required to involve a vast set of individuals in policy development and to have a plan for measuring policy implementation. Districts were offered a choice of levels of implementation for limiting or prohibiting low nutrition foods on the school campus.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are broad group and vast set interchangeable (i.e., having the same meaning)?

Pair 1862

P1: The series was created in 2015 by Steve Goldbloom, who has interviewed more than 200 guests for the program. "Brief But Spectacular" is produced and owned through Goldbloom's Los Angeles based production company, Second Peninsula. Each episode is approximately 2–4 minutes in length, featuring a subject's personal take on a defining theme. While the show has profiled well-known figures like Ta-Nehisi Coates, Gloria Steinem, Steve Martin, Alec Baldwin, Carl Reiner, and Terry Gross, it has also featured lesser-known guests, such as Mahogany Browne, Clint Smith, and Flossie Lewis, whose take on growing old and living well generated more than 7 million views in two weeks.

P2: The series was created in 2015 by Steve Goldbloom, who has interviewed more than 200 guests for the program. "Brief But Spectacular" is produced and owned through Goldbloom's Los Angeles based production company, Second Peninsula. Each episode is approximately 2–4 minutes in length, featuring a subject's personal take on a critical topic. While the show has profiled well-known figures like Ta-Nehisi Coates, Gloria Steinem, Steve Martin, Alec Baldwin, Carl Reiner, and Terry Gross, it has also featured lesser-known guests, such as Mahogany Browne, Clint Smith, and Flossie Lewis, whose take on growing old and living well generated more than 7 million views in two weeks.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are defining theme and critical topic interchangeable (i.e., having the same meaning)?

Pair 1863

P1: Shortly thereafter, the attention of the government turned to the annexation of then Spanish Sahara from Spain, an issue on which all major domestic parties agreed. The Spanish enclave of Ifni in the south became part of the new Morocco in 1969, but other Spanish possessions in the north (Ceuta, Melilla and some small islands) remain under Madrid's control, with Morocco viewing them as "occupied territories". A defining theme of Moroccan history and foreign policy is the bitter struggle over Western Sahara. Moroccan claims to Western Sahara date to the 11th century.

P2: Shortly thereafter, the attention of the government turned to the annexation of then Spanish Sahara from Spain, an issue on which all major domestic parties agreed. The Spanish enclave of Ifni in the south became part of the new Morocco in 1969, but other Spanish possessions in the north (Ceuta, Melilla and some small islands) remain under Madrid's control, with Morocco viewing them as "occupied territories". A key idea of Moroccan history and foreign policy is the bitter struggle over Western Sahara. Moroccan claims to Western Sahara date to the 11th century.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are defining theme and key idea interchangeable (i.e., having the same meaning)?

Pair 1864

P1: With this grant, Dr. Theodore is leading the effort to treat patients with spinal cord injury by integrating injury stabilization, regenerative therapy, and functional restoration using targeted electrical ultrasound modalities. As the principal investigator for the program, Dr. Theodore will coordinate teams at Johns Hopkins and its Applied Physics Laboratory, Columbia University, and Sonic Concepts. In 2020, Dr. Theodore published the largest series of patients who had undergone vertebral column shortening for tethered spinal cord syndrome. This article, which has the longest

follow-up of other published series, established this procedure as a viable alternative to standard interventions.

P2: With this grant, Dr. Theodore is leading the effort to treat patients with spinal cord injury by integrating injury stabilization, regenerative therapy, and functional restoration using targeted electrical ultrasound modalities. As the principal investigator for the program, Dr. Theodore will coordinate teams at Johns Hopkins and its Applied Physics Laboratory, Columbia University, and Sonic Concepts. In 2020, Dr. Theodore published the **leading collection (of research) of patients who had undergone vertebral column shortening for tethered spinal cord syndrome**. This article, which has the longest follow-up of other published series, established this procedure as a viable alternative to standard interventions.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **largest series** and **leading collection (of research)** interchangeable (i.e., having the same meaning)?

Pair 1865

P1: Vanderbilt. After their victory over Tulane, Alabama moved into the No. **4 position** in the AP Poll prior to their game against Vanderbilt. In the first Legion Field game of the season, the Crimson Tide shut out the Commodores, 24–0, at Birmingham.

P2: Vanderbilt. After their victory over Tulane, Alabama moved into the No. **4th place** in the AP Poll prior to their game against Vanderbilt. In the first Legion Field game of the season, the Crimson Tide shut out the Commodores, 24–0, at Birmingham.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **4 position** and **4th place** interchangeable (i.e., having the same meaning)?

Pair 1866

P1: The group debuted eight days later with its single album "Warrior". In November 2014, the group filed a lawsuit against its agency. The members sought to nullify its contract with the company citing "unfair conditions and **profit distribution**". In August of the following year, the two parties ultimately settled and B.A.P resumed its activities under TS Entertainment.

P2: The group debuted eight days later with its single album "Warrior". In November 2014, the group filed a lawsuit against its agency. The members sought to nullify its contract with the company citing "unfair conditions and **interest dispensation**". In August of the following year, the two parties ultimately settled and B.A.P resumed its activities under TS Entertainment.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **profit distribution** and **interest dispensation** interchangeable (i.e., having the same meaning)?

Pair 1867

P1: Impact. The product range has been reviewed favourably by many commentators. Journalist Jenny Williams said "The scale on these kits is pretty small, though, so don't expect **exquisite detail**". But creating with Lego bricks is quite a fun way to pay homage to great architects".

P2: Impact. The product range has been reviewed favourably by many commentators. Journalist Jenny Williams said "The scale on these kits is pretty small, though, so don't expect **aesthetic precision**". But creating with Lego bricks is quite a fun way to pay homage to great architects".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **exquisite detail** and **aesthetic precision** interchangeable (i.e., having the same meaning)?

Pair 1868

P1: Santa Claus is also present, tending bar. Bottweill starts to toast the season but before he can do so Kiernan interrupts. **Everyone has champagne, but Bottweill's drink is Pernod he keeps an entire case of it in his office.** Kiernan brings Bottweill a glass of Pernod.

P2: Santa Claus is also present, tending bar. Bottweill starts to toast the season but before he can do so Kiernan interrupts. **Everyone has champagne, but Bottweill's drink is Pernod he keeps an all-inclusive crate of it in his office.** Kiernan brings Bottweill a glass of Pernod.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **entire case** and **all-inclusive crate** interchangeable (i.e., having the same meaning)?

Pair 1869

P1: The cognitio system was introduced some time after the Republic was replaced by the Empire. The main philosophical difference between the cognitio systems and those that had gone before was that, whereas the previous two essentially consisted of the State providing a system under which the two parties could resolve disputes between themselves - the basis of the case was agreed, but the case was then handed over to a private judge, and no judgement in default was available. **In the cognitio, however, the State basically resolved the entire case, in the same manner as our current systems.** Summons.

P2: The cognitio system was introduced some time after the Republic was replaced by the Empire. The main philosophical difference between the cognitio systems and those that had gone before was that, whereas the previous two essentially consisted of the State providing a system under which the two parties could resolve disputes between themselves - the basis of the case was agreed, but the case was then handed over to a private judge, and no judgement in default was available. **In the cognitio, however, the State basically resolved the complete legal action, in the same manner as our current systems.** Summons.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **entire case** and **complete legal action** interchangeable (i.e., having the same meaning)?

Pair 1870

P1: In the UK "Fracture" and "Reason To Believe" were significant fanzines in the early 2000s, both ending in late 2003. "Rancid News" filled the gap left by these two zines for a short while. **On its tenth issue "Rancid News" changed its name to "last hours" with 7 issues published under this title before going on hiatus.** "Last Hours" still operates as a webzine though with more focus on the anti-authoritarian movement than its original title.

P2: In the UK "Fracture" and "Reason To Believe" were significant fanzines in the early 2000s, both ending in late 2003. "Rancid News" filled the gap left by these two zines for a short while. **On its tenth issue "Rancid News" changed its name to "'Last Hours'" with 7 issues published under this title before going on hiatus.** "Last Hours" still operates as a webzine though with more focus on the anti-authoritarian movement than its original title.

Pair 1871

P1: Stock breeds. The stock horse breeds in the United States put more emphasis on quality of conformation in the stand-up presentation, though movement is also scored. Stock breeds include the American Quarter Horse, Appaloosa, American Paint Horse and breeds of **similar body type**. In most classes, horses are required to walk and trot in a straight line, usually walking toward the judge and trotting away from the judge, then assessed individually from a standstill.

P2: Stock breeds. The stock horse breeds in the United States put more emphasis on quality of conformation in the stand-up presentation, though movement is also scored. Stock breeds include the American Quarter Horse, Appaloosa, American Paint Horse and breeds of **comparable stature**. In most classes, horses are required to walk and trot in a straight line, usually walking toward the judge and trotting away from the judge, then assessed individually from a standstill.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **similar body type** and **comparable stature** interchangeable (i.e., having the same meaning)?

Pair 1872

P1: A relatively recent creation which is not mentioned by Wendell Levi in his text "The Pigeon". Some evidence exists that the breed has descended from "The Illyrian Pigeon". This would make the Serbian Highflyer a relative of the Archangel which has a **similar body type**. The crest (upturned feathers behind head) on the Archangel come to a "peak" whereas the crest of the Serbian Highflyer is best described as "spade" shaped.

P2: A relatively recent creation which is not mentioned by Wendell Levi in his text "The Pigeon". Some evidence exists that the breed has descended from "The Illyrian Pigeon". This would make the Serbian Highflyer a relative of the Archangel which has a **parallel physical makeup**. The crest (upturned feathers behind head) on the Archangel come to a "peak" whereas the crest of the Serbian Highflyer is best described as "spade" shaped.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **similar body type** and **parallel physical makeup** interchangeable (i.e., having the same meaning)?

Pair 1873

P1: Snow falls 24.3 days per year on average on Yushan, and the number is gradually decreasing. Yushan receives around of precipitation annually. It rains an average of 140 days per year, with the **greatest frequency** between May and August. From May until the first part of June is plum rain season or monsoon season.

P2: Snow falls 24.3 days per year on average on Yushan, and the number is gradually decreasing. Yushan receives around of precipitation annually. It rains an average of 140 days per year, with the **highest prevalence** between May and August. From May until the first part of June is plum rain season or monsoon season.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **greatest frequency** and **highest prevalence** interchangeable (i.e., having the same meaning)?

Pair 1874

P1: The G&U was electrified in 1902; passenger service was provided by streetcars operated by the Milford and Uxbridge Street Railway. North Grafton was a transfer point between B&A trains, G&U streetcars, and Worcester Consolidated Street Railway streetcars on the Worcester–Westborough line and Grafton Centre branch. Under **great financial strain**, the Worcester Consolidated cut its unprofitable suburban lines between 1925 and 1931. Westborough service ended in 1927; Grafton service lasted until 1931.

P2: The G&U was electrified in 1902; passenger service was provided by streetcars operated by the Milford and Uxbridge Street Railway. North Grafton was a transfer point between B&A trains, G&U streetcars, and Worcester Consolidated Street Railway streetcars on the Worcester–Westborough line and Grafton Centre branch. Under **significant economic duress**, the Worcester Consolidated cut its unprofitable suburban lines between 1925 and 1931. Westborough service ended in 1927; Grafton service lasted until 1931.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **great financial strain** and **significant economic duress** interchangeable (i.e., having the same meaning)?

Pair 1875

P1: The changed relationship between man and music has made aesthetic questions about the nature and purpose of music a public debate. In the history of music, transitional phases (epoch boundaries) arose in which the "old" and the "new" appeared simultaneously. The **traditional period** or epoch was still cultivated, but parallel to this a "Neue musik" was introduced which subsequently replaced it. These transitions were always understood by contemporaries as phases of renewal and were described accordingly.

P2: The changed relationship between man and music has made aesthetic questions about the nature and purpose of music a public debate. In the history of music, transitional phases (epoch boundaries) arose in which the "old" and the "new" appeared simultaneously. The **classic era** or epoch was still cultivated, but parallel to this a "Neue musik" was introduced which subsequently replaced it. These transitions were always understood by contemporaries as phases of renewal and were described accordingly.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **traditional period** and **classic era** interchangeable (i.e., having the same meaning)?

Pair 1876

P1: Funds in NAFI/entity accounts are Government funds, and NAF property, including buildings, is Government property. However, NAFs are separate from APFs of the U.S. Treasury. They are not commingled with APFs and are managed separately, even when supporting a **common program**. Each NAFI/entity operates under the authority of the U.S. Government in accordance with applicable Federal laws and departmental regulations.

P2: Funds in NAFI/entity accounts are Government funds, and NAF property, including buildings, is Government property. However, NAFs are separate from APFs of the U.S. Treasury. They are not commingled with APFs and are managed separately, even when supporting a **joint project**. Each NAFI/entity operates under the authority of the U.S. Government in accordance with applicable Federal laws and departmental regulations.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **common program** and **joint project** interchangeable (i.e., having the same meaning)?

Pair 1877

P1: So he decides to cooperate with the justice, represented by the judge Francesca De Santis, target of gangs and best friend of Tonio, with whom she has fallen in love. So he reveals to Francesca that many families are part of the Mafia's Dome: at the top there are the Mancuso, whose patriarch is don Tano, and to follow there are the Patrono, The Veneziano, The Romeo and what remains of the Di Venanzio (in fact now there is only Fortunato Di Venanzio, while Carmela lives in a convent, and is about to leave for New York, where an aunt is waiting her). A new character, however, will creep into **everyone's life**. She is Concetta De Nicola, called "Tripolina", an ex-prostitute who works for Mancuso.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are black color and ebony shade interchangeable (i.e., having the same meaning)?

Pair 1879

P1: The 2010 Standards set minimum requirements – both scoping and technical – for newly designed and constructed or altered State and local government facilities, public accommodations, and commercial facilities to be readily accessible to and usable by individuals with disabilities. According to ADA the height of toilet bowl shall be 17 inches (430 mm) at a minimum when measured from the floor to the top of the toilet seat. Flush controls shall be hand operated or automatic mounted on the wide side of the toilet area and easily reached and operated. Additionally, there is are important ADA requirement of clear floor space at water closet rooms.

P2: The 2010 Standards set minimum requirements – both scoping and technical – for newly designed and constructed or altered State and local government facilities, public accommodations, and commercial facilities to be readily accessible to and usable by individuals with disabilities. According to ADA the height of toilet bowl shall be 17 inches (430 mm) at a minimum when measured from the floor to the top of the toilet seat. Flush controls shall be hand operated or automatic mounted on the broad part of the toilet area and easily reached and operated. Additionally, there is are important ADA requirement of clear floor space at water closet rooms.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are wide side and broad part interchangeable (i.e., having the same meaning)?

Pair 1880

P1: Typical annual production has been in 12–18 mm ton range for the last several years though. In 2010, the mine produced just over 11,225,000 million short tons of coal, making it the 13th-largest producer of coal in the United States. The average quality of the coal shipped from Rawhide is 8,300 BTU/lb, 0.37% sulfur, 5.40% ash, and 1.60% sodium (of the ash). Train loading at the Rawhide mine is done in two passes.

P2: Typical annual production has been in 12–18 mm ton range for the last several years though. In 2010, the mine produced just over 11,225,000 million short tons of coal, making it the 13th-largest producer of coal in the United States. The standard integrity of the coal shipped from Rawhide is 8,300 BTU/lb, 0.37% sulfur, 5.40% ash, and 1.60% sodium

(of the ash). Train loading at the Rawhide mine is done in two passes.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **average quality** and **standard integrity** interchangeable (i.e., having the same meaning)?

Pair 1881

P1: Some critics believe that the 20-70-10 model fails to reflect actual human behavior. Among randomly selected people assigned to a task, such a model may be accurate. They contend, however, that at each iteration, the **average quality** of employees will increase, making for more "A" players and fewer "C" players. Eventually, the "C" players comprise less than 10% of the workforce.

P2: Some critics believe that the 20-70-10 model fails to reflect actual human behavior. Among randomly selected people assigned to a task, such a model may be accurate. They contend, however, that at each iteration, the **general skill level** of employees will increase, making for more "A" players and fewer "C" players. Eventually, the "C" players comprise less than 10% of the workforce.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **average quality** and **general skill level** interchangeable (i.e., having the same meaning)?

Pair 1882

P1: It has been noted that Referendum 71 is about Domestic Partnerships and does not grant marriage equality to same sex couples. Polls. A 2007 University of Washington poll found 73% of Washington voters support some **legal recognition** of same-sex relationships (civil union/domestic partnership or marriage). The same group in October 2009 conducted a poll (N = 754 registered voters) and found that 56% of respondents planned to vote 'approve', and 39% planned to vote 'reject.'

P2: It has been noted that Referendum 71 is about Domestic Partnerships and does not grant marriage equality to same sex couples. Polls. A 2007 University of Washington poll found 73% of Washington voters support some **authoritative acknowledgment** of same-sex relationships (civil union/domestic partnership or marriage). The same group in October 2009 conducted a poll (N = 754 registered voters) and found that 56% of respondents planned to vote 'approve', and 39% planned to vote 'reject.'

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **legal recognition** and **authoritative acknowledgment** interchangeable (i.e., having the same meaning)?

Pair 1883

P1: The influence is not only in Courbet's enormous scale, but in his willingness to portray ordinary people and current political events, and to record people, places and events in real, everyday surroundings. The 2004 exhibition at the Clark Art Institute, "Bonjour Monsieur Courbet: The Bruyas Collection from the Musee Fabre, Montpellier", sought to compare the 19th-century Realist painters Courbet, Honoré Daumier (1808–1879), and early Édouard Manet (1832–1883) with artists associated with Romanticism, including Géricault and Delacroix. Citing "The Raft of the Medusa" as an **instrumental influence** on Realism, the exhibition drew comparisons between all of the artists. The critic Michael Fried sees Manet directly borrowing the figure of the man cradling his son for the composition of "Angels at the Tomb of Christ".

P2: The influence is not only in Courbet's enormous scale, but in his willingness to portray ordinary people and current political events, and to record people, places and events in real, everyday surroundings. Citing "The Raft of the Medusa" as an

active force on Realism, the exhibition drew comparisons between all of the artists. The critic Michael Fried sees Manet directly borrowing the figure of the man cradling his son for the composition of "Angels at the Tomb of Christ".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **instrumental influence** and **active force** interchangeable (i.e., having the same meaning)?

Pair 1884

P1: Prehistoric evidence. The physical adaptation of fossoriality is widely accepted as being widespread among many prehistoric phyla and taxa, such as bacteria and early eukaryotes. Furthermore, fossoriality has evolved independently multiple times, even within a **single family**. Fossorial animals appeared simultaneously with the colonization of land by arthropods in the late Ordovician period (over 440 million years ago).

P2: Prehistoric evidence. The physical adaptation of fossoriality is widely accepted as being widespread among many prehistoric phyla and taxa, such as bacteria and early eukaryotes. Furthermore, fossoriality has evolved independently multiple times, even within a **one particular communal grouping**. Fossorial animals appeared simultaneously with the colonization of land by arthropods in the late Ordovician period (over 440 million years ago).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **single family** and **one particular communal grouping** interchangeable (i.e., having the same meaning)?

Pair 1885

P1: The creation of the company was spurred by an \$800,000 interest free loan, covering about 32% of the total purchase price, from the Saskatchewan government, which has a program to encourage the transfer of short lines to local ownership. Operations. Currently 90% of the freight is grain, although fracking sand is a **growing segment** of the railway's business. Other revenues derive from storing rail cars, mainly oil and asphalt tankers.

P2: The creation of the company was spurred by an \$800,000 interest free loan, covering about 32% of the total purchase price, from the Saskatchewan government, which has a program to encourage the transfer of short lines to local ownership. Operations. Currently 90% of the freight is grain, although fracking sand is a **blossoming part** of the railway's business. Other revenues derive from storing rail cars, mainly oil and asphalt tankers.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **growing segment** and **blossoming part** interchangeable (i.e., having the same meaning)?

Pair 1886

P1: Through a Sanskrit inscription, written in late Brahmi script, found on the Talagunda Stone-pillar in Shimoga district dated 455-470 A.D; it became known that a Kadamba king named Śāntivarman had saved the Brahmanahood in the "Kali Yuga". In his commentary on the Aitareya Upanishad (Sloka III.ii.3), Shankara states that the "Atman" is expanded only in human beings who are therefore endowed with intelligence; who see what is known, give expression to what is known and know what is to come; they know the visible and the invisible and perceive the immortal through the mortal. Thus, according to Shankara, the individual self is conscious living entity that makes the **individual body** eligible for action and knowledge. Accordingly, the term "Viprāta", here, refers to the inwardly inspired or awakened body and mind; it does not refer to persons born in the families of Brahmins as has been erroneously interpreted by the orthodox interpreters.

P2: Through a Sanskrit inscription, written in late Brahmi script, found on the Talagunda Stone-pillar in Shimoga district dated 455-470 A.D; it became known that a Kadamba king named Śāntivarman had saved the Brahmanahood in the "Kali Yuga". In his commentary on the Aitareya Upanishad (Sloka III.ii.3), Shankara states that the "Atman" is expanded only in human beings who are therefore endowed with intelligence; who see what is known, give expression to what

is known and know what is to come; they know the visible and the invisible and perceive the immortal through the mortal. Thus, according to Shankara, the individual self is conscious living entity that makes the **human physical structure** eligible for action and knowledge. Accordingly, the term "Viprata", here, refers to the inwardly inspired or awakened body and mind; it does not refer to persons born in the families of Brahmins as has been erroneously interpreted by the orthodox interpreters.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **individual body** and **human physical structure** interchangeable (i.e., having the same meaning)?

Pair 1887

P1: Today anthropometry can be performed with three-dimensional scanners. A global collaborative study to examine the uses of three-dimensional scanners for health care was launched in March 2007. The Body Benchmark Study will investigate the use of three-dimensional scanners to calculate volumes and segmental volumes of an **individual body scan**. The aim is to establish whether the Body Volume Index has the potential to be used as a long-term computer-based anthropometric measurement for health care.

P2: Today anthropometry can be performed with three-dimensional scanners. A global collaborative study to examine the uses of three-dimensional scanners for health care was launched in March 2007. The Body Benchmark Study will investigate the use of three-dimensional scanners to calculate volumes and segmental volumes of an **isolated anatomy scan**. The aim is to establish whether the Body Volume Index has the potential to be used as a long-term computer-based anthropometric measurement for health care.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **individual body** and **isolated anatomy** interchangeable (i.e., having the same meaning)?

Pair 1888

P1: Sexual rights. Unlike the other three aspects of SRHR, the struggle for sexual rights include, and focus on, sexual pleasure and emotional sexual expression. **one platform** for this struggle is the WAS Declaration of Sexual Rights. The World Association for Sexual Health (WAS) was founded in 1978 by a multidisciplinary, world-wide group of NGOs to promote the field of sexology.

P2: Sexual rights. Unlike the other three aspects of SRHR, the struggle for sexual rights include, and focus on, sexual pleasure and emotional sexual expression. **a particular medium** for this struggle is the WAS Declaration of Sexual Rights. The World Association for Sexual Health (WAS) was founded in 1978 by a multidisciplinary, world-wide group of NGOs to promote the field of sexology.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one platform** and **a particular medium** interchangeable (i.e., having the same meaning)?

Pair 1889

P1: Additionally, a British sport journalist pointed out that football academies are "really bad at letting players out of the system who aren't going to make it", frequently keeping players until age 17 or 18, beyond an age at which they can reasonably be developed for top-level basketball. Another issue is politically related. **Basketball is not played in the elite fee-paying secondary schools that produce a disproportionate share** of the UK's political leaders. Also, several British basketball insiders have cited problems with the sport's governance within the UK, with Kevin Routledge, chairman of the BBL's Leicester Riders, calling it "shambolic", and former NBA player John Amaechi saying "British basketball is dominated by people who are well meaning but poorly skilled".

P2: Additionally, a British sport journalist pointed out that football academies are "really bad at letting players out of the system who aren't going to make it", frequently keeping players until age 17 or 18, beyond an age at which they can reasonably be developed for top-level basketball. Another issue is politically related. **Basketball is not played in the elite fee-paying secondary schools that produce a disparate amount** of the UK's political leaders. Also, several British basketball insiders have cited problems with the sport's governance within the UK, with Kevin Routledge, chairman of the BBL's Leicester Riders, calling it "shambolic", and former NBA player John Amaechi saying "British basketball is dominated by people who are well meaning but poorly skilled".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **disproportionate share** and **disparate amount** interchangeable (i.e., having the same meaning)?

Pair 1890

P1: There has been virtually no rocket fire onto northern Israel following the war, and Hezbollah disavows the few attacks that do happen. Since the 2006 war, Hezbollah has continued to substantially grow its weapons arsenal, manpower, and intelligence apparatus. **The group is widely used as the textbook definition** of a hybrid actor, with conventional and unconventional warfare capabilities. As a hybrid actor, Hezbollah's main weakness is its need to maintain civilian support to hide among the population while causing great harm to civilians if war breaks out.

P2: There has been virtually no rocket fire onto northern Israel following the war, and Hezbollah disavows the few attacks that do happen. Since the 2006 war, Hezbollah has continued to substantially grow its weapons arsenal, manpower, and intelligence apparatus. **The group is widely used as the definitive prototype** of a hybrid actor, with conventional and unconventional warfare capabilities. As a hybrid actor, Hezbollah's main weakness is its need to maintain civilian support to hide among the population while causing great harm to civilians if war breaks out.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **textbook definition** and **definitive prototype** interchangeable (i.e., having the same meaning)?

Pair 1891

P1: (which was first published on July 12, 1977), he worried that his reputation would be adversely affected. Most of all, Elvis was concerned his daughter Lisa Marie Presley, would be adversely affected by the contents of the book. **The publication of the book bothered Elvis on a personal and professional level** during the last two weeks of his life. In numerous press conferences concerning the book "Elvis, What Happened?"

P2: (which was first published on July 12, 1977), he worried that his reputation would be adversely affected. Most of all, Elvis was concerned his daughter Lisa Marie Presley, would be adversely affected by the contents of the book. **The publication of the book bothered Elvis on a private and public grounds** during the last two weeks of his life. In numerous press conferences concerning the book "Elvis, What Happened?"

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **personal and professional level** and **private and public grounds** interchangeable (i.e., having the same meaning)?

Pair 1892

P1: OIM can also consist in more questionable practices such as the case of buying "likes", "friends", or "subscribers". Objective. **The Objective of Online Identity Management is to: Online Identity management can be utilized on a personal and professional level.** Online identity management utilizes web presence to gain attention from potential huge clients to followers.

P2: OIM can also consist in more questionable practices such as the case of buying "likes", "friends", or "subscribers". Objective. **The Objective of Online Identity Management is to: Online Identity management can be utilized on a**

business and individual basis. Online identity management utilizes web presence to gain attention from potential huge clients to followers.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **personal and professional level** and **business and individual basis** interchangeable (i.e., having the same meaning)?

Pair 1893

P1: It was noted as being cheaper than a previous limited production run of Mercedes-Benz G63 AMG 6x6 (old-style name) from 2013. (note in this period of the 2010s, transition AMG vehicles from Mercedes-Benz to Mercedes-AMG branding. **The us version** was previewed at the New York Auto Show in the spring of 2015 as a Mercedes-AMG model. The basic model was introduced in Europe in 2012 and in 2015 was introduced in the United States as a Mercedes-AMG brand model.

P2: It was noted as being cheaper than a previous limited production run of Mercedes-Benz G63 AMG 6x6 (old-style name) from 2013. (note in this period of the 2010s, transition AMG vehicles from Mercedes-Benz to Mercedes-AMG branding. **The States' variation** was previewed at the New York Auto Show in the spring of 2015 as a Mercedes-AMG model. The basic model was introduced in Europe in 2012 and in 2015 was introduced in the United States as a Mercedes-AMG brand model.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **us version** and **States' variation** interchangeable (i.e., having the same meaning)?

Pair 1894

P1: Leaks in the roof of one of the buildings caused \$121,000 worth of ammunition to be written off after being damaged by water. At this time \$NZ155 million worth of ammunition was stored at Kauri Point, with all but five of its 120 explosives storehouses having been built before or during the Second World War. **A long term plan** was in place to replace these storehouses with new facilities. The Kauri Point Armament Depot was assigned to the Defence Logistics Command on 1 July 2010, and renamed the Defence Armament Depot.

P2: Leaks in the roof of one of the buildings caused \$121,000 worth of ammunition to be written off after being damaged by water. At this time \$NZ155 million worth of ammunition was stored at Kauri Point, with all but five of its 120 explosives storehouses having been built before or during the Second World War. **A protracted strategy** was in place to replace these storehouses with new facilities. The Kauri Point Armament Depot was assigned to the Defence Logistics Command on 1 July 2010, and renamed the Defence Armament Depot.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **long term plan** and **protracted strategy** interchangeable (i.e., having the same meaning)?

Pair 1895

P1: This runs in parallel to several central themes of the novel regarding identity, as Yuniór's code switching alludes to a struggle between his Dominican identity and his identity as a writer. Code switching between Spanish and English is also central to the narrative itself of the book, as characters switch back and forth as they see fit. **The narration of the book also shifts away from Yuniór to another character at several key moments** in the story. In chapter two, Lola narrates her own story from the first person.

P2: This runs in parallel to several central themes of the novel regarding identity, as Yuniór's code switching alludes to a struggle between his Dominican identity and his identity as a writer. Code switching between Spanish and English is also central to the narrative itself of the book, as characters switch back and forth as they see fit. **The narration of the book also shifts away from Yuniór to another character at multiple significant times** in the story. In chapter two, Lola

narrates her own story from the first person.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **several key moments** and **multiple significant times** interchangeable (i.e., having the same meaning)?

Pair 1896

P1: Elgon and does not state that Misiri is Egypt. This Misiri homeland is realistically the Nile Valley region adjacent to modern day Ethiopia due to migration through the Rift Valley province of Kenya and settlement at the Mt. **Elgon region of Kenya largely part of the Rift Valley.**They migrated along a great mythical river called Riteru and passed through a **desert land**, Eroro. The Misiri homeland of Abagusii is unconnected to the so called popular Hamitic hypothesis by C.G.

P2: Elgon and does not state that Misiri is Egypt. This Misiri homeland is realistically the Nile Valley region adjacent to modern day Ethiopia due to migration through the Rift Valley province of Kenya and settlement at the Mt. **Elgon region of Kenya largely part of the Rift Valley.**They migrated along a great mythical river called Riteru and passed through a **barren wasteland**, Eroro. The Misiri homeland of Abagusii is unconnected to the so called popular Hamitic hypothesis by C.G.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **desert land** and **barren wasteland** interchangeable (i.e., having the same meaning)?

Pair 1897

P1: Real estate scams. After his defeat, Carlson left town for several real estate and railroad schemes in Los Angeles, Alaska, and Cuba. **In 1917 Carlson was caught in a scheme where he sold desert land multiple times to different people and was convicted of mail fraud.** He served half of his sentenced time in federal prison, gaining an early release in 1920.

P2: Real estate scams. After his defeat, Carlson left town for several real estate and railroad schemes in Los Angeles, Alaska, and Cuba. **In 1917 Carlson was caught in a scheme where he sold dried-up plots multiple times to different people and was convicted of mail fraud.** He served half of his sentenced time in federal prison, gaining an early release in 1920.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **desert land** and **dried-up plots** interchangeable (i.e., having the same meaning)?

Pair 1898

P1: Butt was playing cards on the night of April 14 in the first-class smoking room when the "Titanic" struck an iceberg. The ship sank two and a half hours later, with a loss of over 1,500 lives. **Butt's actions while the ship sank are largely unverified, but many accounts of a sensationalist nature were published by newspapers immediately after the disaster.** One account had the ship's captain, Edward J. Smith, telling Butt that the ship was doomed, after which Butt began to act like a ship's officer and supervised the loading and lowering of lifeboats.

P2: Butt was playing cards on the night of April 14 in the first-class smoking room when the "Titanic" struck an iceberg. The ship sank two and a half hours later, with a loss of over 1,500 lives. **Butt's actions while the ship sank are largely unverified, but many accounts of a melodramatic style were published by newspapers immediately after the disaster.** One account had the ship's captain, Edward J. Smith, telling Butt that the ship was doomed, after which Butt began to act like a ship's officer and supervised the loading and lowering of lifeboats.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **sensationalist nature** and **melodramatic style** interchangeable (i.e., having the same meaning)?

Pair 1899

P1: There are an estimated 5.5 million children with unauthorized immigrant parents, about three-quarters of whom are U.S. born citizens. The nature of immigration policy dehumanizes individuals in mixed status families through practices that threat and harm, such as deportation procedures, which is when a migrant is formally removed from the United States and is banned from reentering. Immigration policies and practices do not only affect the undocumented population itself. However, U.S. born children growing up in families where there are undocumented members living are negatively impacted by these policies.

P2: There are an estimated 5.5 million children with unauthorized immigrant parents, about three-quarters of whom are U.S. born citizens. The nature of immigration policy dehumanizes individuals in mixed status families through practices that threat and harm, such as deportation procedures, which is when a migrant is formally removed from the United States and is banned from reentering. Immigration policies and practices do not only affect the unauthorized community itself. However, U.S. born children growing up in families where there are undocumented members living are negatively impacted by these policies.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are undocumented population and unauthorized community interchangeable (i.e., having the same meaning)?

Pair 1900

P1: Monster Legend. Local residents have a number of stories about the alleged Iliamna Lake Monster, an unknown aquatic creature. Speculation exists that reported sightings may be an undocumented population of white sturgeon. If true, this would be the most northerly population known to exist, just a few hundred miles from the Arctic Circle.

P2: Monster Legend. Local residents have a number of stories about the alleged Iliamna Lake Monster, an unknown aquatic creature. Speculation exists that reported sightings may be an unrecorded group of white sturgeon. If true, this would be the most northerly population known to exist, just a few hundred miles from the Arctic Circle.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are undocumented population and unrecorded group interchangeable (i.e., having the same meaning)?

Pair 1901

P1: Using a standard checkers set, pieces are divided into Red (light) and Black (dark). Players are traditionally referred to by the color of their pieces. The colors are chosen either by a friendly agreement, by a game of chance or by a neutral third party. Each player begins with twelve pieces which they may arrange in a configuration of their choice, confined to the back three rows of their side.

P2: Using a standard checkers set, pieces are divided into Red (light) and Black (dark). Players are traditionally referred to by the color of their pieces. The colors are chosen either by a friendly agreement, by a game of chance or by a disinterested individual. Each player begins with twelve pieces which they may arrange in a configuration of their choice, confined to the back three rows of their side.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are neutral third party and disinterested individual interchangeable (i.e., having the same meaning)?

Pair 1902

P1: Design approach. The firm’s work has been noted for drawing on the principles of modern architecture that is also inspired by the natural setting and traditions of Canada’s West Coast and the Pacific Northwest. Their designs are known for their sculptural quality, multifaceted expression of material, comfort, and clear delineation of detail. Patkau Architects design in such a way that they attempt to respond to the natural environment that surrounds their building site, not impose on it.

P2: Design approach. The firm’s work has been noted for drawing on the principles of modern architecture that is also inspired by the natural setting and traditions of Canada’s West Coast and the Pacific Northwest. Their designs are known for their sculptural quality, multifaceted expression of material, comfort, and conspicuous demarcation of detail. Patkau Architects design in such a way that they attempt to respond to the natural environment that surrounds their building site, not impose on it.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are clear delineation and conspicuous demarcation interchangeable (i.e., having the same meaning)?

Pair 1903

P1: When Allan pulls Carreidas’ hat from under a stone head, he accidentally elbows Rastapopoulos, giving him a black eye. Later his bump on the head goes away, which he takes as a good omen. However a piece of rock falls onto his head just after he notices this as the result of an earthquake, causing another bump. When explosives are used by the gang to break through a stone barrier, a volcanic eruption is set off, forcing them to flee from the Island in a rubber dinghy.

P2: When Allan pulls Carreidas’ hat from under a stone head, he accidentally elbows Rastapopoulos, giving him a black eye. Later his bump on the head goes away, which he takes as a good omen. However a piece of rock falls onto his head just after he notices this as the result of an earthquake, causing a second knot. When explosives are used by the gang to break through a stone barrier, a volcanic eruption is set off, forcing them to flee from the Island in a rubber dinghy.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are another bump and a second knot interchangeable (i.e., having the same meaning)?

Pair 1904

P1: The lip of paper extending past the base of the bullet is then twisted together, and may be pushed into a depression cast into the base of the bullet. The lubricant may be allowed to evaporate after the jacket has been applied; and a different lubricant may be applied after the formed paper has dried. Very good accuracy has been obtained with paper-patched bullets, but the assembly procedure is relatively labor-intensive. There is some question about whether the accuracy improvements result from the paper jackets or from the greater uniformity of shooting procedures by people with the patience to apply the patches.

P2: The lip of paper extending past the base of the bullet is then twisted together, and may be pushed into a depression cast into the base of the bullet. The lubricant may be allowed to evaporate after the jacket has been applied; and a different lubricant may be applied after the formed paper has dried. Very exceptional precision has been obtained with paper-patched bullets, but the assembly procedure is relatively labor-intensive. There is some question about whether the accuracy improvements result from the paper jackets or from the greater uniformity of shooting procedures by people with the patience to apply the patches.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are good accuracy and exceptional precision interchangeable (i.e., having the same meaning)?

Pair 1905

P1: Style of play. According to Doncaster Rovers former manager Darren Ferguson, Lawlor is ”quick, he’s agile for a big lad...He plays at a good tempo and if he has to kick, he kicks a hell of a way. He’s got good accuracy...He’s got a

lot of potential, he's a good size, good with his feet." Personal life.

P2: Style of play. According to Doncaster Rovers former manager Darren Ferguson, Lawlor is "quick, he's agile for a big lad...He plays at a good tempo and if he has to kick, he kicks a hell of a way. He's got **impeccable skill**...He's got a lot of potential, he's a good size, good with his feet." Personal life.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **good accuracy** and **impeccable skill** interchangeable (i.e., having the same meaning)?

Pair 1906

P1: Duchess Park played host to the Girls AAA Volleyball Provincial Championships in 2010. Duchess Park has teams in eleven sports, including basketball, football, wrestling, volleyball, golf, badminton, soccer, rugby, track & field, cross country and Esports. Duchess Park has won 120+ North Central District Zone Championships across **nearly every sport** in which the school has participated in. The site was also used as a venue for the 2015 Canada Winter Games.

P2: Duchess Park played host to the Girls AAA Volleyball Provincial Championships in 2010. Duchess Park has teams in eleven sports, including basketball, football, wrestling, volleyball, golf, badminton, soccer, rugby, track & field, cross country and Esports. Duchess Park has won 120+ North Central District Zone Championships across **almost each game** in which the school has participated in. The site was also used as a venue for the 2015 Canada Winter Games.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **nearly every sport** and **almost each game** interchangeable (i.e., having the same meaning)?

Pair 1907

P1: Prior to the campaign, the Liberals had held only 36 seats—the fewest seats ever held at dissolution by any federal party that won the following election. The Liberals also became the first federal party in Canadian history to win a majority of seats without having been either the governing party or the Official Opposition in the previous parliament, and this was only the second time a party went from having the third-most seats to the most seats (the first being in 1925). It was the **second largest number** of seats won in a federal election for the Liberals, the best being 191 in 1949. The election also had the highest voter turnout since 1993.

P2: Prior to the campaign, the Liberals had held only 36 seats—the fewest seats ever held at dissolution by any federal party that won the following election. The Liberals also became the first federal party in Canadian history to win a majority of seats without having been either the governing party or the Official Opposition in the previous parliament, and this was only the second time a party went from having the third-most seats to the most seats (the first being in 1925). It was the **next-to-biggest amount** of seats won in a federal election for the Liberals, the best being 191 in 1949. The election also had the highest voter turnout since 1993.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **second largest number** and **next-to-biggest amount** interchangeable (i.e., having the same meaning)?

Pair 1908

P1: It is also known as the 'Anti-Prostitution Law'. The law came into force on April 1, 1957, and all provisions were fully effective on April 1 of the following year. As the law does not punish prostitution per se, (client and prostitute), it is viewed as a preventive law rather than a **prohibition law**. History.

P2: It is also known as the 'Anti-Prostitution Law'. The law came into force on April 1, 1957, and all provisions were fully effective on April 1 of the following year. As the law does not punish prostitution per se, (client and prostitute), it

is viewed as a preventive law rather than a **proscription regulation**. History.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **prohibition law** and **proscription regulation** interchangeable (i.e., having the same meaning)?

Pair 1909

P1: The design was very simple, consisting only of a central numeral of the denomination framed by a standard printer's ornament, with the denomination repeated in words at the bottom. The top line read "Hawaiian / Postage" for the 2- and 5-cent values, but "H.I. & U.S. / Postage" for the 13-cent value, reflecting its **unusual role** of paying two different countries' postage. A thin line surrounded by a thicker line framed the stamp as a whole.

P2: The design was very simple, consisting only of a central numeral of the denomination framed by a standard printer's ornament, with the denomination repeated in words at the bottom. The top line read "Hawaiian / Postage" for the 2- and 5-cent values, but "H.I. & U.S. / Postage" for the 13-cent value, reflecting its **unique duty** of paying two different countries' postage. A thin line surrounded by a thicker line framed the stamp as a whole.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **unusual role** and **unique duty** interchangeable (i.e., having the same meaning)?

Pair 1910

P1: In Wisconsin's lumberjack days, bouncers would physically remove drinkers who were too drunk to keep buying drinks, and thus free up space in the bar for new patrons. The slang term 'snake-room' was used to describe a "...room off a saloon, usually two or three steps down, into which a bar-keeper or the bouncer could slide drunk lumber-jacks head first through swinging doors from the bar-room." In the late 19th century, until Prohibition, bouncers also had the **unusual role** of protecting the saloon's buffet. To attract business, "...many saloons lured customers with offers of a "free lunch"—usually well salted to inspire drinking, and the saloon "bouncer" was generally on hand to discourage [those with too] hearty appetites".

P2: In Wisconsin's lumberjack days, bouncers would physically remove drinkers who were too drunk to keep buying drinks, and thus free up space in the bar for new patrons. The slang term 'snake-room' was used to describe a "...room off a saloon, usually two or three steps down, into which a bar-keeper or the bouncer could slide drunk lumber-jacks head first through swinging doors from the bar-room." In the late 19th century, until Prohibition, bouncers also had the **peculiar job** of protecting the saloon's buffet. To attract business, "...many saloons lured customers with offers of a "free lunch"—usually well salted to inspire drinking, and the saloon "bouncer" was generally on hand to discourage [those with too] hearty appetites".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **unusual role** and **peculiar job** interchangeable (i.e., having the same meaning)?

Pair 1911

P1: 52] Gender. English has lost the system of grammatical gender that was present in Old English, and while there is some disagreement over what has replaced it, generally speaking English is said to have a system of "natural gender", which applies only to the pronouns. A "natural gender" is one "in which there is a **clear correlation** between masculine and feminine nouns and biological traits in the referent." [p. 11] There is also a second system whereby "who" correlates with persons and pronoun "what" correlates with non-persons.

P2: 52] Gender. English has lost the system of grammatical gender that was present in Old English, and while there is some disagreement over what has replaced it, generally speaking English is said to have a system of "natural gender", which applies only to the pronouns. A "natural gender" is one "in which there is a **plain link** between masculine and feminine nouns and biological traits in the referent." [p. 11] There is also a second system whereby "who" correlates with

persons and pronoun "what" correlates with non-persons.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **clear correlation** and **plain link** interchangeable (i.e., having the same meaning)?

Pair 1912

P1: Cases of idiosyncratic or unusual reactions to fungi can also occur. Some are probably due to allergy, others to some other kind of sensitivity. It is not uncommon for an **individual person** to experience gastrointestinal upset associated with one particular mushroom species or genus. Some mushrooms might concentrate toxins from their growth substrate, such as Chicken of the Woods growing on yew trees.

P2: Cases of idiosyncratic or unusual reactions to fungi can also occur. Some are probably due to allergy, others to some other kind of sensitivity. It is not uncommon for an **isolated human being** to experience gastrointestinal upset associated with one particular mushroom species or genus. Some mushrooms might concentrate toxins from their growth substrate, such as Chicken of the Woods growing on yew trees.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **individual person** and **isolated human being** interchangeable (i.e., having the same meaning)?

Pair 1913

P1: Heavier turbines are also prone to higher malfunction rates which results in higher maintenance costs. In addition, the bigger the turbine is, the more resources that will have to be invested in transporting the massive parts from the factory to where they will be deployed. This is very rarely a viable option since it defeats the **whole purpose** of affordable alternative energy. Betz's law.

P2: Heavier turbines are also prone to higher malfunction rates which results in higher maintenance costs. In addition, the bigger the turbine is, the more resources that will have to be invested in transporting the massive parts from the factory to where they will be deployed. This is very rarely a viable option since it defeats the **complete intention** of affordable alternative energy. Betz's law.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **whole purpose** and **complete intention** interchangeable (i.e., having the same meaning)?

Pair 1914

P1: and other species of macrophytes growing on the substrate. Conservation. "Yunnanilus discoloris" has a very restricted range, the **single spring** in which it occurs contains introduced species and the spring has been modified by man. The spring is not protected and the IUCN assess the status of this species as Critically Endangered.

P2: and other species of macrophytes growing on the substrate. Conservation. "Yunnanilus discoloris" has a very restricted range, the **one particular aquifer** in which it occurs contains introduced species and the spring has been modified by man. The spring is not protected and the IUCN assess the status of this species as Critically Endangered.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **single spring** and **one particular aquifer** interchangeable (i.e., having the same meaning)?

Pair 1915

P1: Preventive maintenance is required to prevent recurring Rostral hooks. Ramps. When there is excessive height to the lower premolars, the horse has a condition known as ramps. They occur when the upper from the premolar deciduous cap or baby tooth is kept resulting in the abnormal growth of the permanent premolar.

P2: Preventive maintenance is required to prevent recurring Rostral hooks. Ramps. When there is exaggerated length to the lower premolars, the horse has a condition known as ramps. They occur when the upper from the premolar deciduous cap or baby tooth is kept resulting in the abnormal growth of the permanent premolar.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are excessive height and exaggerated length interchangeable (i.e., having the same meaning)?

Pair 1916

P1: This is turn, prevents various stomach complications such as acidity or indigestion that people usually complain after having their meals. Boosts metabolism. Apart from caloric intake and pattern of eating, leading an active physical life is one of the key reasons to boost metabolism. Hence, people are advised to go for a walk after having their dinner as it stimulates the metabolic process and influences the functioning of other organs in the body. Induces sleep.

P2: This is turn, prevents various stomach complications such as acidity or indigestion that people usually complain after having their meals. Boosts metabolism. Apart from caloric intake and pattern of eating, leading an active physical life is one of the main rationales to boost metabolism. Hence, people are advised to go for a walk after having their dinner as it stimulates the metabolic process and influences the functioning of other organs in the body. Induces sleep.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are key reasons and main rationales interchangeable (i.e., having the same meaning)?

Pair 1917

P1: The government also strengthened a Fair Wages Resolution, with a clause that required all employers getting government contracts to recognise the rights of their workers to join trade unions. The Trades Disputes Act 1927 was repealed, and a Dock Labour Scheme was introduced in 1947 to put an end to the casual system of hiring labour in the docks. This scheme gave registered dockers the legal right to minimum work and decent conditions. Through the National Dock Labour Board (on which trade unions and employers had equal representation) the unions acquired control over recruitment and dismissal.

P2: The government also strengthened a Fair Wages Resolution, with a clause that required all employers getting government contracts to recognise the rights of their workers to join trade unions. The Trades Disputes Act 1927 was repealed, and a Dock Labour Scheme was introduced in 1947 to put an end to the casual system of hiring labour in the docks. This scheme gave registered dockers the legal right to slight effort and decent conditions. Through the National Dock Labour Board (on which trade unions and employers had equal representation) the unions acquired control over recruitment and dismissal.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are minimum work and slight effort interchangeable (i.e., having the same meaning)?

Pair 1918

P1: In geometry, a near-miss Johnson solid is a strictly convex polyhedron whose faces are close to being regular polygons but some or all of which are not precisely regular. Thus, it fails to meet the definition of a Johnson solid, a polyhedron whose faces are all regular, though it "can often be physically constructed without noticing the discrepancy" between its regular and irregular faces. The precise number of near misses depends on how closely the faces of such a polyhedron are required to approximate regular polygons. Some high symmetry near-misses are also symmetrohedra with some perfect

regular polygon faces.

P2: In geometry, a near-miss Johnson solid is a strictly convex polyhedron whose faces are close to being regular polygons but some or all of which are not precisely regular. Thus, it fails to meet the definition of a Johnson solid, a polyhedron whose faces are all regular, though it "can often be physically constructed without noticing the discrepancy" between its regular and irregular faces. The precise number of **irregular polyhedrons** depends on how closely the faces of such a polyhedron are required to approximate regular polygons. Some high symmetry near-misses are also symmetrohedra with some perfect regular polygon faces.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **near misses** and **irregular polyhedrons** interchangeable (i.e., having the same meaning)?

Pair 1919

P1: Armstrong ultimately appeared in twenty-seven Star Trek episodes in twelve different roles. The other guest stars were Renée Elise Goldsberry as Crewman Kelly, and Joseph Will as Crewman Michael Rostov. Roxann Dawson praised the cast especially "Scott and Conner who spent days suspended in harnesses covered in slime without a **single complaint**." She said "This episode was difficult, challenging and... well, at times I thought it was almost impossible."

P2: Armstrong ultimately appeared in twenty-seven Star Trek episodes in twelve different roles. The other guest stars were Renée Elise Goldsberry as Crewman Kelly, and Joseph Will as Crewman Michael Rostov. Roxann Dawson praised the cast especially "Scott and Conner who spent days suspended in harnesses covered in slime without a **solitary criticism**." She said "This episode was difficult, challenging and... well, at times I thought it was almost impossible."

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **single complaint** and **solitary criticism** interchangeable (i.e., having the same meaning)?

Pair 1920

P1: The train operated with Montreal and Toronto sections which ran combined west of Sudbury, Ontario. The Montreal section (also serving Ottawa) was known as train 1 westbound and train 2 eastbound, while the Toronto section was known as train 11 westbound and train 12 eastbound. Matching its **streamlined appearance**, "The Canadian's 71-hour westbound schedule was 16 hours faster than that of "The Dominion". Although initially successful, passenger train ridership began to decline in Canada during the 1960s.

P2: The train operated with Montreal and Toronto sections which ran combined west of Sudbury, Ontario. The Montreal section (also serving Ottawa) was known as train 1 westbound and train 2 eastbound, while the Toronto section was known as train 11 westbound and train 12 eastbound. Matching its **stripped-down presentation**, "The Canadian's 71-hour westbound schedule was 16 hours faster than that of "The Dominion". Although initially successful, passenger train ridership began to decline in Canada during the 1960s.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **streamlined appearance** and **stripped-down presentation** interchangeable (i.e., having the same meaning)?

Pair 1921

P1: The whorls of the protoconch consist of curved longitudinal ribs and are, at the bottom, finely reticulated. A little below the middle of the subsequent whorls, occur a series of longitudinal, tuberculous plicae. These tubercles are protruding, rounded, very regularly arranged and give the whorls a **streamlined appearance**. There are 15 plicae on

the penultimate whorl, 20 on the body whorl These plicae do not extend to the suture.

P2: The whorls of the protoconch consist of curved longitudinal ribs and are, at the bottom, finely reticulated. A little below the middle of the subsequent whorls, occur a series of longitudinal, tuberculous plicae. **These tubercles are protruding, rounded, very regularly arranged and give the whorls a sleek look.** There are 15 plicae on the penultimate whorl, 20 on the body whorl These plicae do not extend to the suture.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **streamlined appearance** and **sleek look** interchangeable (i.e., having the same meaning)?

Pair 1922

P1: Ahle Quran is an organisation formed by Abdullah Chakralawi, who described the Quran as "ahsan Hadith", meaning most perfect hadith and consequently claimed it does not need any addition. His movement relies entirely on the chapters and verses of the Quran. **Chakralawi's position was that the Quran itself was the most perfect source of tradition and could be exclusively followed.** According to Chakralawi, Muhammad could receive only one form of revelation (wahy), and that was the Quran.

P2: Ahle Quran is an organisation formed by Abdullah Chakralawi, who described the Quran as "ahsan Hadith", meaning most perfect hadith and consequently claimed it does not need any addition. His movement relies entirely on the chapters and verses of the Quran. **Chakralawi's position was that the Quran itself was the most optimal authority of tradition and could be exclusively followed.** According to Chakralawi, Muhammad could receive only one form of revelation (wahy), and that was the Quran.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **perfect source** and **optimal authority** interchangeable (i.e., having the same meaning)?

Pair 1923

P1: The remains of British serial killers Myra Hindley, Dr Harold Shipman, and Fred West were treated in the same way. The headstone of disgraced television presenter and sex offender Jimmy Savile was removed and destroyed three weeks after being erected, when posthumous allegations of sexual abuse over decades came to light. **Cremation and secret scattering of the ashes has the additional effect of removing all possibility of there being a grave to visit in the future.** Judaism.

P2: The remains of British serial killers Myra Hindley, Dr Harold Shipman, and Fred West were treated in the same way. The headstone of disgraced television presenter and sex offender Jimmy Savile was removed and destroyed three weeks after being erected, when posthumous allegations of sexual abuse over decades came to light. **Cremation and secret scattering of the ashes has the extra advantage of removing all possibility of there being a grave to visit in the future.** Judaism.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **additional effect** and **extra advantage** interchangeable (i.e., having the same meaning)?

Pair 1924

P1: It has the highest average elevation of any island. Landmarks. **Many features on or near Ross Island have been charted and named by various survey and exploration groups.** Mount Erebus is the island's most prominent landmark.

P2: It has the highest average elevation of any island. Landmarks. **Many features on or near Ross Island have been charted and named by several expedition and exploration groups.** Mount Erebus is the island's most prominent landmark.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **various survey** and **several expedition** interchangeable (i.e., having the same meaning)?

Pair 1925

P1: This town was built on a hill high above the stream Sredice, where its remains still stand today. The župa had a noble court table of at least three judges, and although župans possibly were from the old Croatian noble tribe of Gusić, the Croatian nobles ("plemenitimi H'rvati") from the presumed tribe of Srbljani mentioned in 1451 were Marko and Martin Dijanišević, Juraj Henčić, Vojin Matijašević, Vlatko Anić and Jandrij Kovač. **Due to the Ottoman conquest in 1520, most of the old population fled to Northern Croatia and was replaced by pastoral Vlachs.** Part of the descendants of the new population also emigrated to Žumberak, while older also moved to Northern Dalmatia as well as converted to Islam.

P2: This town was built on a hill high above the stream Sredice, where its remains still stand today. The župa had a noble court table of at least three judges, and although župans possibly were from the old Croatian noble tribe of Gusić, the Croatian nobles ("plemenitimi H'rvati") from the presumed tribe of Srbljani mentioned in 1451 were Marko and Martin Dijanišević, Juraj Henčić, Vojin Matijašević, Vlatko Anić and Jandrij Kovač. **Due to the Ottoman conquest in 1520, most of the prior occupants fled to Northern Croatia and was replaced by pastoral Vlachs.** Part of the descendants of the new population also emigrated to Žumberak, while older also moved to Northern Dalmatia as well as converted to Islam.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **old population** and **prior occupants** interchangeable (i.e., having the same meaning)?

Pair 1926

P1: Floral formulae have been developed in the early 19th century and their use has declined since. Prenner "et al." (2010) devised an extension of the **existing model** to broaden the descriptive capability of the formula. The format of floral formulae differs in different parts of the world, yet they convey the same information.

P2: Floral formulae have been developed in the early 19th century and their use has declined since. Prenner "et al." (2010) devised an extension of the **current standard** to broaden the descriptive capability of the formula. The format of floral formulae differs in different parts of the world, yet they convey the same information.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **existing model** and **current standard** interchangeable (i.e., having the same meaning)?

Pair 1927

P1: In Switzerland many Romanesque churches and monasteries were built in the bishop's seat or were supported by the bishops. In contrast, Gothic churches were often built in growing towns and cities as a symbol of their wealth and power. **The newly founded mendicant orders built Gothic churches, plague houses and hospitals for much the same reason.** By the late Gothic era a number of smaller Gothic parish churches were being built across the country.

P2: In Switzerland many Romanesque churches and monasteries were built in the bishop's seat or were supported by the bishops. In contrast, Gothic churches were often built in growing towns and cities as a symbol of their wealth and power. **The newly founded mendicant orders built Gothic churches, plague houses and hospitals for an essentially indistinguishable mo** By the late Gothic era a number of smaller Gothic parish churches were being built across the country.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **much the same reason** and **an essentially indistinguishable motivation** interchangeable (i.e., having the same meaning)?

Pair 1928

P1: The limitation changed from physical to mental. Convinced that automation was the proper solution to the routing problem, in 1951 O.D. Lewis at **post office headquarters** in Ottawa started looking for ways to solve the **memory limitation**. Although Lewis did not have a technical background, he was aware of the IBM systems being used for tallying pencil-marked punched cards.

P2: The limitation changed from physical to mental. Convinced that automation was the proper solution to the routing problem, in 1951 O.D. Lewis at **the mail service depot** in Ottawa started looking for ways to solve the **memory limitation**. Although Lewis did not have a technical background, he was aware of the IBM systems being used for tallying pencil-marked punched cards.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **post office headquarters** and **the mail service depot** interchangeable (i.e., having the same meaning)?

Pair 1929

P1: Not all Javanese were once subjects of the Yogyakarta Sultanate and the Surakarta Sunanate. Priyayi. **The Priyayis were once part of the ruling aristocrats, they have little function today.** Some of Indonesia's ruling political figures are descendants of the priyayis.

P2: Not all Javanese were once subjects of the Yogyakarta Sultanate and the Surakarta Sunanate. Priyayi. **The Priyayis were once part of the ruling aristocrats, they have minimal purpose today.** Some of Indonesia's ruling political figures are descendants of the priyayis.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **little function** and **minimal purpose** interchangeable (i.e., having the same meaning)?

Pair 1930

P1: Also he had taken steps to groom them to perform better in their assigned tasks. He had directed the official to foster good eating habits and better choice of nutritious food amongst the school children. **Also he had fine tune the ministry procedures by introducing new systems to make affairs more transparent to the stake holders.** Apart from the entrusted duties on education the minister has taken up the responsibilities of Archeology and Heritage to preserve our culture to generations to come.

P2: Also he had taken steps to groom them to perform better in their assigned tasks. He had directed the official to foster good eating habits and better choice of nutritious food amongst the school children. **Also he had fine tune the ministry procedures by introducing new systems to make affairs more transparent to the vested partners.** Apart from the entrusted duties on education the minister has taken up the responsibilities of Archeology and Heritage to preserve our culture to generations to come.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **stake holders** and **vested partners** interchangeable (i.e., having the same meaning)?

Pair 1931

P1: While penetration testing concentrates on attacking software and computer systems from the start – scanning ports, examining known defects in protocols and applications running on the system and patch installations, for example – eth-

ical hacking may include other things. A full-blown ethical hack might include emailing staff to ask for password details, rummaging through executive's dustbins and usually breaking and entering, without the knowledge and consent of the targets. Only the owners, CEOs and Board Members (**stake holders**) who asked for such a security review of this magnitude are aware. To try to replicate some of the destructive techniques a real attack might employ, ethical hackers may arrange for cloned test systems, or organize a hack late at night while systems are less critical.

P2: While penetration testing concentrates on attacking software and computer systems from the start – scanning ports, examining known defects in protocols and applications running on the system and patch installations, for example – ethical hacking may include other things. A full-blown ethical hack might include emailing staff to ask for password details, rummaging through executive's dustbins and usually breaking and entering, without the knowledge and consent of the targets. Only the owners, CEOs and Board Members (**interested parties**) who asked for such a security review of this magnitude are aware. To try to replicate some of the destructive techniques a real attack might employ, ethical hackers may arrange for cloned test systems, or organize a hack late at night while systems are less critical.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **stake holders** and **interested parties** interchangeable (i.e., having the same meaning)?

Pair 1932

P1: Portraits. While Ingres believed that history painting was the highest form of art, his modern reputation rests largely upon the exceptional quality of his portraits. By the time of his retrospective at the Exposition Universelle in 1855, an **emerging consensus** viewed his portrait paintings as his masterpieces. Their consistently high quality belies Ingres's often-stated complaint that the demands of portraiture robbed him of time he could have spent painting historical subjects.

P2: Portraits. While Ingres believed that history painting was the highest form of art, his modern reputation rests largely upon the exceptional quality of his portraits. By the time of his retrospective at the Exposition Universelle in 1855, an **expanding concurrence** viewed his portrait paintings as his masterpieces. Their consistently high quality belies Ingres's often-stated complaint that the demands of portraiture robbed him of time he could have spent painting historical subjects.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **emerging consensus** and **expanding concurrence** interchangeable (i.e., having the same meaning)?

Pair 1933

P1: Such a multiple-item buffer is usually implemented as a first-in, first-out queue. The upstream stage may still have to be halted when the queue gets full, but the frequency of those events will decrease as more buffer slots are provided. Queueing theory can tell the number of buffer slots needed, depending on the variability of the processing times and on the **desired performance**. Nonlinear pipelines.

P2: Such a multiple-item buffer is usually implemented as a first-in, first-out queue. The upstream stage may still have to be halted when the queue gets full, but the frequency of those events will decrease as more buffer slots are provided. Queueing theory can tell the number of buffer slots needed, depending on the variability of the processing times and on the **intended execution**. Nonlinear pipelines.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **desired performance** and **intended execution** interchangeable (i.e., having the same meaning)?

Pair 1934

P1: The 2d value of this issue had a new design. On 15 April 1922, this stamp was also issued locally surcharged " ” after there was a shortage of ¼d stamps. In 1921, Malta was granted a **limited form** of self-government which led to the establishment of a Senate and Legislative Assembly. To commemorate this, 1899–1922 definitive stamps were locally

overprinted ' and were issued between 12 January and 29 April 1922.

P2: The 2d value of this issue had a new design. On 15 April 1922, this stamp was also issued locally surcharged "" after there was a shortage of ¼d stamps. In 1921, Malta was granted a **minor kind** of self-government which led to the establishment of a Senate and Legislative Assembly. To commemorate this, 1899–1922 definitive stamps were locally overprinted ' and were issued between 12 January and 29 April 1922.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **limited form** and **minor kind** interchangeable (i.e., having the same meaning)?

Pair 1935

P1: Males are not significantly larger than females. The fur on the upper body and flanks is mostly reddish-brown, but mixed with dark brown or black hairs, producing an overall colour that varies from orange-yellow or cinnamon to medium brown. The underparts are white or very pale grey, with a **clear dividing line** from the fur elsewhere on the body. The head is robust, with a heavy snout.

P2: Males are not significantly larger than females. The fur on the upper body and flanks is mostly reddish-brown, but mixed with dark brown or black hairs, producing an overall colour that varies from orange-yellow or cinnamon to medium brown. The underparts are white or very pale grey, with a **direct demarcation stripe** from the fur elsewhere on the body. The head is robust, with a heavy snout.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **clear dividing line** and **direct demarcation stripe** interchangeable (i.e., having the same meaning)?

Pair 1936

P1: Like the rest of the bagpipe, they are often decorated with a variety of substances, including metal (silver/nickel/gold/brass), bone, ivory, or plastic mountings. Cylindrical vs. conical bore. Chanters come in two main types, parallel and non-parallel bored (although there is no **clear dividing line** between the two). This refers to the shape of the internal bore of the chanter.

P2: Like the rest of the bagpipe, they are often decorated with a variety of substances, including metal (silver/nickel/gold/brass), bone, ivory, or plastic mountings. Cylindrical vs. conical bore. Chanters come in two main types, parallel and non-parallel bored (although there is no **distinct division marker** between the two). This refers to the shape of the internal bore of the chanter.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **clear dividing line** and **distinct division marker** interchangeable (i.e., having the same meaning)?

Pair 1937

P1: There he found Andrea Furtado de Mendoca with his galleons at anchor, awaiting him. The combined force besieged the fort at Terrenate. After having **considerable effect**, however, they found themselves without powder and were forced to raise the siege and return to Amboina. The second great fire of Manila.

P2: There he found Andrea Furtado de Mendoca with his galleons at anchor, awaiting him. The combined force besieged the fort at Terrenate. After having **a major impression**, however, they found themselves without powder and were forced to raise the siege and return to Amboina. The second great fire of Manila.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **considerable effect** and **a major impression** interchangeable (i.e., having the same meaning)?

Pair 1938

P1: No one immediately claimed responsibility for orchestrating the bombing, but Sheikh Sharif Sheikh Ahmed, the President of Somalia, blamed the Somali Islamist group al-Shabaab. In a news conference held in the Hotel Shamo after the attack, President Ahmed called for international assistance to Somalia. **He also displayed, according to a local journalist, what he identified as the bomber's body and remains of an explosive belt and a hijab.** The Danish newspaper "Berlingske Tidende" reported the bomber was a 23-year-old citizen of Denmark.

P2: No one immediately claimed responsibility for orchestrating the bombing, but Sheikh Sharif Sheikh Ahmed, the President of Somalia, blamed the Somali Islamist group al-Shabaab. In a news conference held in the Hotel Shamo after the attack, President Ahmed called for international assistance to Somalia. **He also displayed, according to a resident columnist, what he identified as the bomber's body and remains of an explosive belt and a hijab.** The Danish newspaper "Berlingske Tidende" reported the bomber was a 23-year-old citizen of Denmark.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **local journalist** and **resident columnist** interchangeable (i.e., having the same meaning)?

Pair 1939

P1: Chart performance. "Bob That Head" reached its peak position at number 15 on the "Billboard" Hot Country Songs charts for the week of September 13, 2008. **It became the first official country single of Rascal Flatts' career to miss the Top Ten on the country charts.** It is also the first single of their career not to enter the "Billboard" Hot 100 charts, although it peaked at number 2 on the Bubbling Under Hot 100.

P2: Chart performance. "Bob That Head" reached its peak position at number 15 on the "Billboard" Hot Country Songs charts for the week of September 13, 2008. **It became the only established C&W music single of Rascal Flatts' career to miss the Top Ten on the country charts.** It is also the first single of their career not to enter the "Billboard" Hot 100 charts, although it peaked at number 2 on the Bubbling Under Hot 100.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **first official country** and **only established C&W music** interchangeable (i.e., having the same meaning)?

Pair 1940

P1: Segregationists including William Jennings Bryan Dorn criticized the government for cooperating with the civil rights activists. Senator Olin D. Johnston rejected an invitation to attend, writing: "You are committing the worst possible mistake in promoting this March. **You should know that criminal, fanatical, and communistic elements, as well as crackpots, will move in to take every advantage of this mob.** You certainly will have no influence on any member of Congress, including myself."

P2: Segregationists including William Jennings Bryan Dorn criticized the government for cooperating with the civil rights activists. Senator Olin D. Johnston rejected an invitation to attend, writing: "You are committing the worst possible mistake in promoting this March. **You should know that criminal, fanatical, and communistic elements, as well as crackpots, will move in to take each opportunity of this mob.** You certainly will have no influence on any member of Congress, including myself."

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **every advantage** and **each opportunity** interchangeable (i.e., having the same meaning)?

Pair 1941

P1: Geographical expansion. At the start of the 1950s, Memphis was a compact city with limited boundaries, compared to the sprawl seen today. The southern boundary of the city was an **irregular line** starting on the Mississippi opposite President's Island, about two miles (3 km) north of Nonconnah Creek. The northern boundary was close to Chelsea Avenue, not much south of the Wolf River but with an unpopulated wetland area beyond the city before reaching the Wolf River.

P2: Geographical expansion. At the start of the 1950s, Memphis was a compact city with limited boundaries, compared to the sprawl seen today. The southern boundary of the city was an **uneven stripe** starting on the Mississippi opposite President's Island, about two miles (3 km) north of Nonconnah Creek. The northern boundary was close to Chelsea Avenue, not much south of the Wolf River but with an unpopulated wetland area beyond the city before reaching the Wolf River.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **irregular line** and **uneven stripe** interchangeable (i.e., having the same meaning)?

Pair 1942

P1: Renewable energy (RE) thermal generation includes both electricity generated from biofuels and electricity generated from the fraction of waste that is biodegradable. Since 2010, RE thermal generation in Denmark has accounted for approximately 4000 GWh per year. Biofuels also play an **increasingly important part** in Denmark's district heating. The proportion of heat generated by biofuels has been rising since the 1980s, and by 2013 close to 45% of district heat was produced by renewables.

P2: Renewable energy (RE) thermal generation includes both electricity generated from biofuels and electricity generated from the fraction of waste that is biodegradable. Since 2010, RE thermal generation in Denmark has accounted for approximately 4000 GWh per year. Biofuels also play an **enlarging-in-necessity function** in Denmark's district heating. The proportion of heat generated by biofuels has been rising since the 1980s, and by 2013 close to 45% of district heat was produced by renewables.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **increasingly important part** and **enlarging-in-necessity function** interchangeable (i.e., having the same meaning)?

Pair 1943

P1: By the 1970s, the concepts were extended into what Glasser then called "control theory", a term used in the title of several of his books. By the mid-1990s, the still evolving concepts were described as "choice theory", a term conceived and proposed by the Irish reality therapy practitioner Christine O'Brien Shanahan at the 1995 IRTI Conference in Waterford, Ireland and subsequently adopted by Glasser. The practice of reality therapy remains a cornerstone of the **larger body of his work**. Choice theory asserts that each of us is a self-determining being who can choose (many of our) future behaviors and hold ourselves consciously responsible for how we are acting, thinking, feeling, and also for our physiological states.

P2: By the 1970s, the concepts were extended into what Glasser then called "control theory", a term used in the title of several of his books. By the mid-1990s, the still evolving concepts were described as "choice theory", a term conceived and proposed by the Irish reality therapy practitioner Christine O'Brien Shanahan at the 1995 IRTI Conference in Waterford, Ireland and subsequently adopted by Glasser. The practice of reality therapy remains a cornerstone of the **wider collection of his work**. Choice theory asserts that each of us is a self-determining being who can choose (many of our) future behaviors and hold ourselves consciously responsible for how we are acting, thinking, feeling, and also for our physiological states.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **larger body** and **wider collection** interchangeable (i.e., having the same meaning)?

Pair 1944

P1: Outsourcing. Back office clerical processes outsourced by large organisations - particularly those sent offshore - tend to be simple and transactional in nature, requiring little (if any) analysis or subjective judgement. This would seem to make an **ideal starting point** for organizations beginning to adopt robotic automation for the back office. Whether client organisations choose to take outsourced processes back "in house" from their Business Process Outsourcing (BPO) providers, thus representing a threat to the future of the BPO business, or whether the BPOs implement such automations on their clients' behalf may well depend on a number of factors.

P2: Outsourcing. Back office clerical processes outsourced by large organisations - particularly those sent offshore - tend to be simple and transactional in nature, requiring little (if any) analysis or subjective judgement. This would seem to make an **exemplary jumping-off position** for organizations beginning to adopt robotic automation for the back office. Whether client organisations choose to take outsourced processes back "in house" from their Business Process Outsourcing (BPO) providers, thus representing a threat to the future of the BPO business, or whether the BPOs implement such automations on their clients' behalf may well depend on a number of factors.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **ideal starting point** and **exemplary jumping-off position** interchangeable (i.e., having the same meaning)?

Pair 1945

P1: There are two causes of the degradation of marine ecology and marine debris: the direct forces (population growth, technological development, and economic growth) and proximity forces (land transformation and industrial processes). We can think of the direct forces as underlying causes of why we consume an excessive amount of goods by industry process. The **excessive consumption** of goods causes marine debris because the goods have been packaged by manufactured cheap non-recycle materials such as plastic. Solid waste plastics cannot decompose easily in nature and their decomposition process takes thousands of years to million years but plastic breaks down into continuously smaller pieces (>5 mm) forming that is called micro-plastics.

P2: There are two causes of the degradation of marine ecology and marine debris: the direct forces (population growth, technological development, and economic growth) and proximity forces (land transformation and industrial processes). We can think of the direct forces as underlying causes of why we consume an excessive amount of goods by industry process. The **enormous procurement** of goods causes marine debris because the goods have been packaged by manufactured cheap non-recycle materials such as plastic. Solid waste plastics cannot decompose easily in nature and their decomposition process takes thousands of years to million years but plastic breaks down into continuously smaller pieces (>5 mm) forming that is called micro-plastics.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **excessive consumption** and **enormous procurement** interchangeable (i.e., having the same meaning)?

Pair 1946

P1: MEMS magnetic sensors have several parameters: Quality Factor (Q), Resonance Frequency, Mode Shape, Responsivity, and Resolution. Quality factor is a measure of how much energy can be maintained during vibration of the resonator. There might be several factors that can damp the resonator, such as mechanical damping of resonator itself or damping from **outside pressure** and temperature. Resonance frequency is the frequency at which the device vibrates with the highest amplitude (or the longest, as a struck bell or tuning fork).

P2: MEMS magnetic sensors have several parameters: Quality Factor (Q), Resonance Frequency, Mode Shape, Responsivity, and Resolution. Quality factor is a measure of how much energy can be maintained during vibration of the resonator. There might be several factors that can damp the resonator, such as mechanical damping of resonator itself or damping from **exterior strain** and temperature. Resonance frequency is the frequency at which the device vibrates with the highest amplitude (or the longest, as a struck bell or tuning fork).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **outside pressure** and **exterior strain** interchangeable (i.e., having the same meaning)?

Pair 1947

P1: Due to the large number of horses that had these patterns, as well as a significant number of double dilute creams also caught up by this rule, the American Paint Horse Association (APHA) formed, allowing these horses to be registered as "Paints". The APHA recognizes sabino as one of the "overo" family of color patterns. **Since the relaxation of the white rule, at least one registered Quarter Horse has tested homozygous for the SB1 allele.** Due to this example, as well as the extensive Quarter Horse breeding present in Paint bloodlines, it is clear that the SB1 allele exists in the breed's genepool and that there have been SB1 sabinos that had minimal markings classified as "solid".

P2: Due to the large number of horses that had these patterns, as well as a significant number of double dilute creams also caught up by this rule, the American Paint Horse Association (APHA) formed, allowing these horses to be registered as "Paints". The APHA recognizes sabino as one of the "overo" family of color patterns. **Since the relaxation of the sabino (spotting) restriction, at least one registered Quarter Horse has tested homozygous for the SB1 allele.** Due to this example, as well as the extensive Quarter Horse breeding present in Paint bloodlines, it is clear that the SB1 allele exists in the breed's genepool and that there have been SB1 sabinos that had minimal markings classified as "solid".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **white rule** and **sabino (spotting) restriction** interchangeable (i.e., having the same meaning)?

Pair 1948

P1: The "Time-Aware Shaper" (TAS) now specifies a clock pulse with which the individual queues are processed in a switch. This leads to a time-slot procedure where the isochronous, cyclical data is transmitted with the highest priority, the cyclical data with the second priority before all acyclic data. **This reduces the latency time and also the jitter for the cyclic data.** If a data telegram with low priority lasts too long, it can be interrupted by a cyclic data telegram with high priority and transmitted further afterwards.

P2: The "Time-Aware Shaper" (TAS) now specifies a clock pulse with which the individual queues are processed in a switch. This leads to a time-slot procedure where the isochronous, cyclical data is transmitted with the highest priority, the cyclical data with the second priority before all acyclic data. **This reduces the dormancy period and also the jitter for the cyclic data.** If a data telegram with low priority lasts too long, it can be interrupted by a cyclic data telegram with high priority and transmitted further afterwards.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **latency time** and **dormancy period** interchangeable (i.e., having the same meaning)?

Pair 1949

P1: Projects included physical electronics, microwave physics, electromagnetic properties of matter, and microwave communication principles. The "Rad Lab" designed almost half of the radar deployed in World War II, created over 100 different radar systems, and constructed \$1.5 billion worth of radar. **At the height of its activities, the Rad Lab employed nearly 4,000 people working on several continents.** What began as a British-American effort to make microwave radar work, evolved into a centralized laboratory committed to understanding the theories behind experimental radar while solving its engineering problems.

P2: Projects included physical electronics, microwave physics, electromagnetic properties of matter, and microwave communication principles. The "Rad Lab" designed almost half of the radar deployed in World War II, created over 100 different radar systems, and constructed \$1.5 billion worth of radar. **At the height of its activities, the Rad Lab employed over 3,700 folks working on several continents.** What began as a British-American effort to make microwave radar work, evolved into a centralized laboratory committed to understanding the theories behind experimental radar while

solving its engineering problems.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **nearly 4,000 people** and **over 3,7000 folks** interchangeable (i.e., having the same meaning)?

Pair 1950

P1: The Dasha Paddhati (system) of Directional Astrology is unique to the Hindus; it is found nowhere else. There are many kinds of Dasha systems, Parashara mentions forty-two of them, but of these only two are in vogue, namely, "Vimshottari" and "Ashtottari". "Dashas" provide a system to judge the effects of the planets throughout a **person's life**, by indicating how the planets distribute their effects. Each "dasha" is controlled by one of the nine planets, and the quality and relative benevolence of each period is determined by the condition and position of that planet in the natal chart.

P2: The Dasha Paddhati (system) of Directional Astrology is unique to the Hindus; it is found nowhere else. There are many kinds of Dasha systems, Parashara mentions forty-two of them, but of these only two are in vogue, namely, "Vimshottari" and "Ashtottari". "Dashas" provide a system to judge the effects of the planets throughout a **being's duration**, by indicating how the planets distribute their effects. Each "dasha" is controlled by one of the nine planets, and the quality and relative benevolence of each period is determined by the condition and position of that planet in the natal chart.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **person's life** and **being's duration** interchangeable (i.e., having the same meaning)?

Pair 1951

P1: These types of interview make the recruiting process more efficient and discovering employable talent easier. Interview process. The interviewer creates questions in text format, records their interview questions, or prepares sample scenarios/coding challenges for the **online interview**. The interviewer invites candidates for the online interview via email.

P2: These types of interview make the recruiting process more efficient and discovering employable talent easier. Interview process. The interviewer creates questions in text format, records their interview questions, or prepares sample scenarios/coding challenges for the **virtual dialogue**. The interviewer invites candidates for the online interview via email.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **online interview** and **virtual dialogue** interchangeable (i.e., having the same meaning)?

Pair 1952

P1: The song's lyrics speak of the female protagonist realizing that her relationship with her man is over and she is not going to return to what used to be. A demo version of "Don't Hold Your Breath" with lead vocals from Timbaland and Keri Hilson leaked in 2010. Then in early January 2011, a second demo version with an **altered production**, different lyrics and uncredited female vocals also leaked. This was followed by a third unfinished version, this time with Scherzinger's vocals, before the final version premiered on January 14, 2011.

P2: The song's lyrics speak of the female protagonist realizing that her relationship with her man is over and she is not going to return to what used to be. A demo version of "Don't Hold Your Breath" with lead vocals from Timbaland and Keri Hilson leaked in 2010. Then in early January 2011, a second demo version with an **amended arrangement**, different lyrics and uncredited female vocals also leaked. This was followed by a third unfinished version, this time with Scherzinger's vocals, before the final version premiered on January 14, 2011.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **altered production** and **amended arrangement** interchangeable (i.e., having the same meaning)?

Pair 1953

P1: It was a rank higher than the "shengyuan" rank, but a rank lower than the "jinshi" rank, which was the highest degree. To achieve the "juren" rank, candidates, who already held the "shengyuan" rank, had to pass the provincial examination. **The provincial qualifying examination occurred once every three years in the provincial capital.** A second, less widespread pathway to gaining the "juren" rank was through office purchase.

P2: It was a rank higher than the "shengyuan" rank, but a rank lower than the "jinshi" rank, which was the highest degree. To achieve the "juren" rank, candidates, who already held the "shengyuan" rank, had to pass the provincial examination. **The provincial qualifying examination occurred once every three years in the local administrative seat.** A second, less widespread pathway to gaining the "juren" rank was through office purchase.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **provincial capital** and **local administrative seat** interchangeable (i.e., having the same meaning)?

Pair 1954

P1: According to a Sega spokesperson, Sony paid Midway \$12 million for these timed exclusive rights. Continuing a tradition of simultaneous home version releases from the first two games in the series, it was announced that the Genesis, Super NES, Game Boy, and Game Gear versions would all be released on "Mortal Friday", October 13, 1995. **However, not all of the versions made the planned date, and the Game Gear version was never released in North America at all.** The publishing for the 16-bit console ports and portable versions in North America was handled by Williams Entertainment, rather than Acclaim Entertainment (who handled the console ports of the previous titles), although Acclaim still handled the publishing for "Mortal Kombat 3" in Europe.

P2: According to a Sega spokesperson, Sony paid Midway \$12 million for these timed exclusive rights. Continuing a tradition of simultaneous home version releases from the first two games in the series, it was announced that the Genesis, Super NES, Game Boy, and Game Gear versions would all be released on "Mortal Friday", October 13, 1995. **However, not all of the versions made the intended period, and the Game Gear version was never released in North America at all.** The publishing for the 16-bit console ports and portable versions in North America was handled by Williams Entertainment, rather than Acclaim Entertainment (who handled the console ports of the previous titles), although Acclaim still handled the publishing for "Mortal Kombat 3" in Europe.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **planned date** and **intended period** interchangeable (i.e., having the same meaning)?

Pair 1955

P1: The combined Mollie Gibson mine became the richest silver mine in the world until that time. Still suffering from the effects of tuberculosis, Hagerman moved to New Mexico in 1892. **But he retained his Colorado holdings, and took an active hand in managing his interests there.** The Panic of 1893 and repeal of the Sherman Silver Purchase Act caused the value of silver to collapse.

P2: The combined Mollie Gibson mine became the richest silver mine in the world until that time. Still suffering from the effects of tuberculosis, Hagerman moved to New Mexico in 1892. **But he retained his Colorado holdings, and took an instrumental role in managing his interests there.** The Panic of 1893 and repeal of the Sherman Silver Purchase Act caused the value of silver to collapse.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **active hand** and **instrumental role** interchangeable (i.e., having the same meaning)?

Pair 1956

P1: During these turns they may twist their handhold into intricate pretzels. Other choreographies are possible. Although the tempo of the music may be frenetic, the upper body is kept steady and turns are slow, typically four beats/steps per complete turn. In the social dancing of the United States the "empalizada" style is replaced by exaggerated Cuban motion, taught in chain ballroom studios for dances of Latin American origin (cha-cha-cha, rumba, mambo, salsa).

P2: During these turns they may twist their handhold into intricate pretzels. Other choreographies are possible. Although the tempo of the music may be frenetic, the upper body is kept steady and turns are slow, typically four beats/steps per full rotation. In the social dancing of the United States the "empalizada" style is replaced by exaggerated Cuban motion, taught in chain ballroom studios for dances of Latin American origin (cha-cha-cha, rumba, mambo, salsa).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are complete turn and full rotation interchangeable (i.e., having the same meaning)?

Pair 1957

P1: No One Left Behind operates as a nonprofit 501(c)(3) organization. Out of 45,000 veteran nonprofits, No One Left Behind is the only national organization solely dedicated to assisting SIVs throughout their application process for resettlement in the United States. As of March 2021, NOLB has provided direct aid to more than 2,000 SIV families in over 90 cities. The organization has partnered with State Department-funded Volunteer Agencies and the International Refugee Assistance Project (IRAP) to provide support to the SIV community.

P2: No One Left Behind operates as a nonprofit 501(c)(3) organization. Out of 45,000 veteran nonprofits, No One Left Behind is the only national organization solely dedicated to assisting SIVs throughout their application process for resettlement in the United States. As of March 2021, NOLB has provided unhindered assistance to more than 2,000 SIV families in over 90 cities. The organization has partnered with State Department-funded Volunteer Agencies and the International Refugee Assistance Project (IRAP) to provide support to the SIV community.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are direct aid and unhindered assistance interchangeable (i.e., having the same meaning)?

Pair 1958

P1: They therefore classify it as its own subfamily within Passeridae. Many early classifications of the Old World sparrows placed them as close relatives of the weavers among the various families of small seed-eating birds, based on the similarity of their breeding behaviour, bill structure, and moult, among other characters. Some, starting with P. P. Suskin in the 1920s, placed the sparrows in the weaver family as the subfamily Passerinae, and tied them to "Plocepasser". Another family sparrows were classed with was the finches (Fringillidae).

P2: They therefore classify it as its own subfamily within Passeridae. Many early classifications of the Old World sparrows placed them as close relatives of the weavers among the various families of small seed-eating birds, based on the similarity of their breeding behaviour, bill structure, and moult, among other characters. Some, starting with P. P. Suskin in the 1920s, placed the sparrows in the Ploceidae classification as the subfamily Passerinae, and tied them to "Plocepasser". Another family sparrows were classed with was the finches (Fringillidae).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are weaver family and Ploceidae classification interchangeable (i.e., having the same meaning)?

Pair 1959

P1: When the larva is mature it makes a silken cocoon around itself and pupates. The flea remains a pupa from one week to six months changing in a process called metamorphosis. **When the flea emerges, it begins the final cycle, called the adult stage.** A flea can now suck blood from host and mate with other fleas.

P2: When the larva is mature it makes a silken cocoon around itself and pupates. The flea remains a pupa from one week to six months changing in a process called metamorphosis. **When the flea emerges, it begins the ultimate phase, called the adult stage.** A flea can now suck blood from host and mate with other fleas.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **final cycle** and **ultimate phase** interchangeable (i.e., having the same meaning)?

Pair 1960

P1: Though he took some lessons at the "Amsterdamse Kunstnijverheidsschool" (Amsterdam School of Applied Arts), Nieuwenkamp was mainly a self-taught artist – reckoned more a graphic artist than a painter. Working primarily in ink, his drawings were executed in rich sepia tones. **There is a clear influence of Art Nouveau on his work, though he did not strictly belong to that movement.** In 1900, the year of his marriage to Anna Wilbrink, he built a houseboat called "De Zwerver" (The Wanderer), which was also his own nickname.

P2: Though he took some lessons at the "Amsterdamse Kunstnijverheidsschool" (Amsterdam School of Applied Arts), Nieuwenkamp was mainly a self-taught artist – reckoned more a graphic artist than a painter. Working primarily in ink, his drawings were executed in rich sepia tones. **There is a distinct impact of Art Nouveau on his work, though he did not strictly belong to that movement.** In 1900, the year of his marriage to Anna Wilbrink, he built a houseboat called "De Zwerver" (The Wanderer), which was also his own nickname.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **clear influence** and **distinct impact** interchangeable (i.e., having the same meaning)?

Pair 1961

P1: Swiss light signals are divided into two classes, recognizable by the difference in shape of the signal: type L (for Light) and type N (for "numérique" (digital)). Type L was developed many years ago. **The N system was developed for the Rail 2000 project and shows a clear influence of the Dutch NS'54 system.** In contrast to the latter the type N uses the 3 coloured lights in a triangular position, whereas the Dutch system positions them in a vertical line.

P2: Swiss light signals are divided into two classes, recognizable by the difference in shape of the signal: type L (for Light) and type N (for "numérique" (digital)). Type L was developed many years ago. **The N system was developed for the Rail 2000 project and shows a direct inspiration of the Dutch NS'54 system.** In contrast to the latter the type N uses the 3 coloured lights in a triangular position, whereas the Dutch system positions them in a vertical line.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **clear influence** and **direct inspiration** interchangeable (i.e., having the same meaning)?

Pair 1962

P1: Modern winemakers are developing new techniques and an understanding of the role that water stress plays in the development of quality wine grape production. Producers who do not irrigate will sometimes use the phrase "dryland" or "dry farmed" on their wine labels as a marketing angle. **Besides irrigation, an important concern for vineyard owners is the threat of vineyard pests such as mealy bugs and baboons.** To combat these hazards, some vineyard owners will utilise Integrated Pest Management (IPM) programmes such as the importation of ladybugs, a natural predator of mealy bugs.

P2: Modern winemakers are developing new techniques and an understanding of the role that water stress plays in the development of quality wine grape production. Producers who do not irrigate will sometimes use the phrase "dryland"

or "dry farmed" on their wine labels as a marketing angle. Besides irrigation, an **overriding source of apprehension** for vineyard owners is the threat of vineyard pests such as mealy bugs and baboons. To combat these hazards, some vineyard owners will utilise Integrated Pest Management (IPM) programmes such as the importation of ladybugs, a natural predator of mealy bugs.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **important concern** and **overriding source of apprehension** interchangeable (i.e., having the same meaning)?

Pair 1963

P1: This is achieved with a simple industrial air pressure compression system () which is a reliable and low cost solution. Furthermore, in the event of leakage, the environmental impact is practically zero compared to hydraulic oil leakages. Finally, brake actuators can be produced at very low cost from lightweight plastic materials thus significantly reducing the **overall cost** of the system. Yaw vane (passive systems).

P2: This is achieved with a simple industrial air pressure compression system () which is a reliable and low cost solution. Furthermore, in the event of leakage, the environmental impact is practically zero compared to hydraulic oil leakages. Finally, brake actuators can be produced at very low cost from lightweight plastic materials thus significantly reducing the **ultimate amount** of the system. Yaw vane (passive systems).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **overall cost** and **ultimate amount** interchangeable (i.e., having the same meaning)?

Pair 1964

P1: The irrationality of voters inherent in democracies can be explained by two major behavioral and cognitive patterns. Firstly, most of the voters think that the marginal contribution of their vote will not make a difference on election outcomes; therefore, they do not find it useful to inform themselves on political matters. In other terms, due to the **required time** and effort of acquiring new information, voters rationally prefer to remain ignorant. Moreover, it has been shown that most citizens process political information in deeply biased, partisan, motivated ways rather than in dispassionate, rational ways.

P2: The irrationality of voters inherent in democracies can be explained by two major behavioral and cognitive patterns. Firstly, most of the voters think that the marginal contribution of their vote will not make a difference on election outcomes; therefore, they do not find it useful to inform themselves on political matters. In other terms, due to the **necessary hours** and effort of acquiring new information, voters rationally prefer to remain ignorant. Moreover, it has been shown that most citizens process political information in deeply biased, partisan, motivated ways rather than in dispassionate, rational ways.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **required time** and **necessary hours** interchangeable (i.e., having the same meaning)?

Pair 1965

P1: The 2nd Brigade, 7th Infantry Division, originally known as the 13th Infantry Brigade was an infantry brigade of the United States Army, and a part of the 7th Infantry Division. The brigade was based at Fort Ord, California for most of its history. Activated for service in World War I, the unit saw brief service in the conflict, but never fought as an **entire unit**. After the Korean War, it was reactivated as a brigade, and was returned to the United States where it saw action in Operation Just Cause and Operation Golden Pheasant.

P2: The 2nd Brigade, 7th Infantry Division, originally known as the 13th Infantry Brigade was an infantry brigade of the United States Army, and a part of the 7th Infantry Division. The brigade was based at Fort Ord, California for most of its history. Activated for service in World War I, the unit saw brief service in the conflict, but never fought as an **all-inclusive contingent**. After the Korean War, it was reactivated as a brigade, and was returned to the United States

where it saw action in Operation Just Cause and Operation Golden Pheasant.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **entire unit** and **all-inclusive contingent** interchangeable (i.e., having the same meaning)?

Pair 1966

P1: For the komusō () monks of the Fuke sect, he was considered the traditional antecedent — at least in spiritual, mythological, or philosophical terms — of their order, which was formally established in Edo Japan. It is possible that the ideological roots of the sect derived from the Rinzai poet and iconoclast Ikkyū and the monk Shinchi Kakushin () who traveled to and from China and Japan in the 13th century. Still, according to some accounts, the sect is simply a more **direct derivative** of the Rinzai school and its teachings. The few records of Puhua’s life and affairs are those accounted, if only briefly, in several East Asian religious or historical references.

P2: For the komusō () monks of the Fuke sect, he was considered the traditional antecedent — at least in spiritual, mythological, or philosophical terms — of their order, which was formally established in Edo Japan. It is possible that the ideological roots of the sect derived from the Rinzai poet and iconoclast Ikkyū and the monk Shinchi Kakushin () who traveled to and from China and Japan in the 13th century. Still, according to some accounts, the sect is simply a more **straightforward descendant** of the Rinzai school and its teachings. The few records of Puhua’s life and affairs are those accounted, if only briefly, in several East Asian religious or historical references.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **direct derivative** and **straightforward descendant** interchangeable (i.e., having the same meaning)?

Pair 1967

P1: 19th century. In the 1837 edition of Foster’s Complete Hoyle, R. F. Foster wrote: “the game of poker, as first played in the United States, five cards to each player from a twenty-card pack, is undoubtedly the Persian game of As-Nas.” By the 1990s some gaming historians including David Parlett started to challenge the notion that poker is a **direct derivative** of As-Nas. There is evidence that a game called poque, a French game similar to poker, was played around the region where poker is said to have originated.

P2: 19th century. In the 1837 edition of Foster’s Complete Hoyle, R. F. Foster wrote: “the game of poker, as first played in the United States, five cards to each player from a twenty-card pack, is undoubtedly the Persian game of As-Nas.” By the 1990s some gaming historians including David Parlett started to challenge the notion that poker is a **straight outgrowth** of As-Nas. There is evidence that a game called poque, a French game similar to poker, was played around the region where poker is said to have originated.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **direct derivative** and **straight outgrowth** interchangeable (i.e., having the same meaning)?

Pair 1968

P1: Emery displayed not only the highest qualities of leadership and devotion to duty, but also showed an utter disregard for his own safety during a time of extreme danger. When not engaged actively in attacking and directing fire onto the enemy, Sgt. Emery was a **constant source** of encouragement and cheerfulness to his men, moving amongst them and directing the evacuation of the wounded. There is no doubt that it was in a very large part due to Sgt.

P2: Emery displayed not only the highest qualities of leadership and devotion to duty, but also showed an utter disregard for his own safety during a time of extreme danger. When not engaged actively in attacking and directing fire onto the enemy, Sgt. Emery was a **continuous font** of encouragement and cheerfulness to his men, moving amongst them and

directing the evacuation of the wounded. There is no doubt that it was in a very large part due to Sgt.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **constant source** and **continuous font** interchangeable (i.e., having the same meaning)?

Pair 1969

P1: In the event, Hitler failed to reach an agreement with the Spanish dictator Francisco Franco. Gibraltar's defences were tested several times by air raids carried out by Italy and Vichy France, which only caused limited damage and light casualties, and by Italian submarine and sabotage attacks which damaged or sank a number of ships in the bay. Despite the pinprick nature of the Axis attacks, a **huge amount** of work was done during the war to develop Gibraltar's fortifications further. A new network of tunnels was dug under the Rock to accommodate a vastly increased garrison.

P2: In the event, Hitler failed to reach an agreement with the Spanish dictator Francisco Franco. Gibraltar's defences were tested several times by air raids carried out by Italy and Vichy France, which only caused limited damage and light casualties, and by Italian submarine and sabotage attacks which damaged or sank a number of ships in the bay. Despite the pinprick nature of the Axis attacks, a **significant volume** of work was done during the war to develop Gibraltar's fortifications further. A new network of tunnels was dug under the Rock to accommodate a vastly increased garrison.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **huge amount** and **significant volume** interchangeable (i.e., having the same meaning)?

Pair 1970

P1: Montebello ("beautiful mountain" in Spanish and Italian) is a city in Los Angeles County, California, United States, located in the southwestern area of the San Gabriel Valley east of downtown Los Angeles. It is considered part of the Gateway Cities, and is a member of the Gateway Cities Council of Governments. In the early 20th century, Montebello was a **well-known source** for oil reserves. At the 2020 census, the population estimate was 63,833.

P2: Montebello ("beautiful mountain" in Spanish and Italian) is a city in Los Angeles County, California, United States, located in the southwestern area of the San Gabriel Valley east of downtown Los Angeles. It is considered part of the Gateway Cities, and is a member of the Gateway Cities Council of Governments. In the early 20th century, Montebello was a **prominent location** for oil reserves. At the 2020 census, the population estimate was 63,833.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **well-known source** and **prominent location** interchangeable (i.e., having the same meaning)?

Pair 1971

P1: Andrew Noz of "Complex" called it one of hip hop's "last grand displays of cultural unity as the Coastal fallout loomed imminent." The cover was issued in three different color schemes: red, black and green, with black being the rarest. The book goes into detail as to which artists were on which particular album cover using a **number scheme** to easily identify each artist. The complete list of artists is as follows: 3rd Bass, Afrika Bambaataa, AMG, Ant Banks, Beastie Boys, Awesome Two, Black Moon, Busta Rhymes, Casual, Chi-Ali, Chubb Rock, Chuck D, The Cold Crush Brothers, Daddy-O of Stetsasonic, Dallas Austin, Del the Funky Homosapien, Diamond D, De La Soul, Doctor Dré, Doug E. Fresh, Fab Five Freddy, Grandmaster Dee of Whodini, Grandmaster Flash, Heavy D, Ice-T, Jazzy Jay, DJ Jazzy Joyce, Jungle Brothers, Kid Capri, Kool DJ Red Alert, Kool Moe Dee, Large Professor, Litro, Lords of the Underground, MC Lyte, Neek the Exotic, Organized Konfusion, The Pharcyde, Rashad Smith, Rock Steady Crew (Crazy Legs, Mr. Wiggles, Pee Wee Dance and Ruel), DJ Ron G, DJ Silver D, Sean Combs, Skeff Anselm, Souls of Mischief, Special Ed, Sweet Tee, Too Short and Zulu Nation Supreme Council.

P2: Andrew Noz of "Complex" called it one of hip hop's "last grand displays of cultural unity as the Coastal fallout loomed imminent." The cover was issued in three different color schemes: red, black and green, with black being the rarest. The book goes into detail as to which artists were on which particular album cover using a **digital pattern** to easily identify each artist. The complete list of artists is as follows: 3rd Bass, Afrika Bambaataa, AMG, Ant Banks, Beastie Boys, Awesome Two, Black Moon, Busta Rhymes, Casual, Chi-Ali, Chubb Rock, Chuck D, The Cold Crush Brothers, Daddy-O of Stetsasonic, Dallas Austin, Del the Funky Homosapien, Diamond D, De La Soul, Doctor Dré, Doug E. Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **number scheme** and **digital pattern** interchangeable (i.e., having the same meaning)?

Pair 1972

P1: The ZIP Code is 64134. It is infamous for its high crime rates and poverty rates. As of February 2021, Ruskin Heights has no **known culture** or media sourced from Ruskin Heights. History.

P2: The ZIP Code is 64134. It is infamous for its high crime rates and poverty rates. As of February 2021, Ruskin Heights has no **recognized artistic endeavors** or media sourced from Ruskin Heights. History.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **known culture** and **recognized artistic endeavors** interchangeable (i.e., having the same meaning)?

Pair 1973

P1: At the weigh-in, Laura, who was criticized by Jillian as not doing the work, loses only 3 pounds. Mike, after his increase in food consumption, also increases his loss to 13 pounds. Mandi manages to lose 6 pounds despite her **family's presence**, but Aubrey loses only 1 pound. Black falls below the yellow line for the first time, as their weekly double-digit results falter.

P2: At the weigh-in, Laura, who was criticized by Jillian as not doing the work, loses only 3 pounds. Mike, after his increase in food consumption, also increases his loss to 13 pounds. Mandi manages to lose 6 pounds despite her **relatives' appearance**, but Aubrey loses only 1 pound. Black falls below the yellow line for the first time, as their weekly double-digit results falter.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **family's presence** and **relatives' appearance** interchangeable (i.e., having the same meaning)?

Pair 1974

P1: Upper motor neuron lesions which damage the descending pathways down to the spinal cord may cause increase in muscle tone, partly because alpha motoneurons respond more to muscle spindle afferent inputs. This causes increased resistance to passive movement (that the patient doesn't initiate), called spasticity, which is associated with another neurological sign, the clasp-knife response, in which the spastic muscle initially resists passive movement strongly, and then suddenly yields like the motion of a pocketknife. The increased initial resistance comes from the stretch reflex hyperactivity, and the **sudden collapse** may involve the Golgi tendon reflex. The response is also known as the lengthening reaction because of the spastic muscle's reaction to lengthening.

P2: Upper motor neuron lesions which damage the descending pathways down to the spinal cord may cause increase in muscle tone, partly because alpha motoneurons respond more to muscle spindle afferent inputs. This causes increased

resistance to passive movement (that the patient doesn't initiate), called spasticity, which is associated with another neurological sign, the clasp-knife response, in which the spastic muscle initially resists passive movement strongly, and then suddenly yields like the motion of a pocketknife. The increased initial resistance comes from the stretch reflex hyperactivity, and the abrupt disintegration may involve the Golgi tendon reflex. The response is also known as the lengthening reaction because of the spastic muscle's reaction to lengthening.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are sudden collapse and abrupt disintegration interchangeable (i.e., having the same meaning)?

Pair 1975

P1: Some A's games air on an alternate feed of NBCS, called NBCS Plus, if the main channel shows a Sacramento Kings game at the same time. On TV, Glen Kuiper covers play-by-play, and Ray Fosse typically provides color commentary. Kuiper and Fosse are frequently joined by former Oakland A's pitcher Dallas Braden, who adds additional color from the field level. In popular culture.

P2: Some A's games air on an alternate feed of NBCS, called NBCS Plus, if the main channel shows a Sacramento Kings game at the same time. On TV, Glen Kuiper covers play-by-play, and Ray Fosse typically provides color commentary. Kuiper and Fosse are frequently joined by former Oakland A's pitcher Dallas Braden, who adds extra vigor from the field level. In popular culture.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are additional color and extra vigor interchangeable (i.e., having the same meaning)?

Pair 1976

P1: It's perfect. It is a perfect song. And maybe if [the album] didn't have a toilet paper roll on the cover, it could have sold 20 million copies." Cover versions.

P2: It's perfect. It is a perfect song. And maybe if [the album] didn't have a TP container on the cover, it could have sold 20 million copies." Cover versions.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are toilet paper roll and TP container interchangeable (i.e., having the same meaning)?

Pair 1977

P1: After St Peter's, Roald's mother entered him for either Marlborough or Repton, but he chose Repton because it was easier to pronounce. Dahl soon realised that Marlborough may have been a better choice, as life at Repton was difficult and cruel. The prefects, named Boazers as per school tradition, were utmost sadists and patrolled the school like secret police. The headmaster treated students similarly, and Dahl describes an occasion when his friend received several brutal strokes of the cane from the headmaster as punishment for misbehaviour.

P2: After St Peter's, Roald's mother entered him for either Marlborough or Repton, but he chose Repton because it was easier to pronounce. Dahl soon realised that Marlborough may have been a better choice, as life at Repton was difficult and cruel. The prefects, named Boazers as per the institute's practice, were utmost sadists and patrolled the school like secret police. The headmaster treated students similarly, and Dahl describes an occasion when his friend received several brutal strokes of the cane from the headmaster as punishment for misbehaviour.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are school tradition and the institute's practice interchangeable (i.e., having the same meaning)?

Pair 1978

P1: The place part of each-way bets is calculated separately from the win part; the method is identical but the odds are reduced by whatever the place factor is for the particular event (see Accumulator below for detailed example). All bets are taken as 'win' bets unless 'each-way' is specifically stated. All **show use** of fractional odds: replace (fractional odds + 1) by decimal odds if decimal odds known. Non-runners are treated as winners with fractional odds of zero (decimal odds of 1).

P2: The place part of each-way bets is calculated separately from the win part; the method is identical but the odds are reduced by whatever the place factor is for the particular event (see Accumulator below for detailed example). All bets are taken as 'win' bets unless 'each-way' is specifically stated. All **demonstrate utilization** of fractional odds: replace (fractional odds + 1) by decimal odds if decimal odds known. Non-runners are treated as winners with fractional odds of zero (decimal odds of 1).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **show use** and **demonstrate utilization** interchangeable (i.e., having the same meaning)?

Pair 1979

P1: The other black models were Pat Cleveland, Bethann Hardison, Billie Blair, Jennifer Brice, Alva Chinn, Norma Jean Darden, Charlene Dash, Barbara Jackson, China Machado and Ramona Saunder. The show pitted five established French designers against five emerging American designers. The **show use** of eleven African-American models was unprecedented at the time and marked a new direction in fashion runways. Awards.

P2: The other black models were Pat Cleveland, Bethann Hardison, Billie Blair, Jennifer Brice, Alva Chinn, Norma Jean Darden, Charlene Dash, Barbara Jackson, China Machado and Ramona Saunder. The show pitted five established French designers against five emerging American designers. The **event's employment** of eleven African-American models was unprecedented at the time and marked a new direction in fashion runways. Awards.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **show use** and **event's employment** interchangeable (i.e., having the same meaning)?

Pair 1980

P1: Seong-beom is a foul-mouthed, hot-tempered detective with uncanny animal instincts in the violent crimes section who has never failed to solve a case. While he is on an undercover operation, he hears that a colleague of his has been brutally murdered by an unknown assailant. Seong-beom and the **police agency** instinctively know there is something behind this murder case. They set up a Special Investigations Unit (S.I.U).

P2: Seong-beom is a foul-mouthed, hot-tempered detective with uncanny animal instincts in the violent crimes section who has never failed to solve a case. While he is on an undercover operation, he hears that a colleague of his has been brutally murdered by an unknown assailant. Seong-beom and the **vice squad** instinctively know there is something behind this murder case. They set up a Special Investigations Unit (S.I.U).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **police agency** and **vice squad** interchangeable (i.e., having the same meaning)?

Pair 1981

P1: That group had also included Damon Davies on guitar and vocals; and Liz Smith on drums. They performed, "a mix of American-influenced roots music (New Orleans R&B, Tex Mex, Cajun, jazz) and British-styled pop." The Leisuremasters released two extended plays, "Unhappy Hour" (December 1992) and "**water moves**" (May 1994), before

disbanding. By October 1995 Gallagher was joined in Karma County by Stuart Eadie on drums, percussion and backing vocals (ex-the Clouds, Died Pretty, the Whitlams) and Michael Galeazzi on double bass, bass guitar and backing vocals (ex-Brookes).

P2: That group had also included Damon Davies on guitar and vocals; and Liz Smith on drums. They performed, "a mix of American-influenced roots music (New Orleans R&B, Tex Mex, Cajun, jazz) and British-styled pop." **The Leisuremasters released two extended plays, "Unhappy Hour" (December 1992) and "liquid stirs" (May 1994), before disbanding.** By October 1995 Gallagher was joined in Karma County by Stuart Eadie on drums, percussion and backing vocals (ex-the Clouds, Died Pretty, the Whitlams) and Michael Galeazzi on double bass, bass guitar and backing vocals (ex-Brookes).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **water moves** and **liquid stirs** interchangeable (i.e., having the same meaning)?

Pair 1982

P1: The Gili Eco Trust has various activities on the Gili islands. Gili Eco Trust's main project on land is improving waste management. **Waste is a permanent issue for Gili islands, especially because of their tourism.** The Gili Eco Trust works with the FMPL (the waste collection and treatment company on Gili Trawangan) which collects waste every day.

P2: The Gili Eco Trust has various activities on the Gili islands. Gili Eco Trust's main project on land is improving waste management. **Waste is a omnipotent problem for Gili islands, especially because of their tourism.** The Gili Eco Trust works with the FMPL (the waste collection and treatment company on Gili Trawangan) which collects waste every day.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **permanent issue** and **omnipotent problem** interchangeable (i.e., having the same meaning)?

Pair 1983

P1: 1 dress. Widely worn during the 1950s and 1960s (when Britain still maintained significant garrisons in tropical stations) this uniform is now usually restricted to military attachés in tropical postings and their personal staffs; units of the Royal Gibraltar Regiment and The Royal Bermuda Regiment (see below); plus a few army bands and officers of the battalion of the Royal Gurkha Rifles stationed in Brunei. **The band of the Royal Gibraltar Regiment is entitled to a permanent issue of No. 3 dress.**

P2: 1 dress. Widely worn during the 1950s and 1960s (when Britain still maintained significant garrisons in tropical stations) this uniform is now usually restricted to military attachés in tropical postings and their personal staffs; units of the Royal Gibraltar Regiment and The Royal Bermuda Regiment (see below); plus a few army bands and officers of the battalion of the Royal Gurkha Rifles stationed in Brunei. **The band of the Royal Gibraltar Regiment is entitled to a ongoing given command of No. 3 dress.**

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **permanent issue** and **ongoing given command** interchangeable (i.e., having the same meaning)?

Pair 1984

P1: "Fuck" (or "I Never Liked You"). Another tale of Brown's adolescence. **Brown has trouble relating with the opposite sex, even when they are the ones trying to connect with him.** He is an awkward teenager who never swears, which is picked up by some of the other boys in his school, who constantly pick on him and try to get him to swear.

P2: "Fuck" (or "I Never Liked You"). Another tale of Brown's adolescence. **Brown has trouble relating with the different sexuality, even when they are the ones trying to connect with him.** He is an awkward teenager who never

swears, which is picked up by some of the other boys in his school, who constantly pick on him and try to get him to swear.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **opposite sex** and **different sexuality** interchangeable (i.e., having the same meaning)?

Pair 1985

P1: A Slight Case of Murder is a 1938 American comedy film directed by Lloyd Bacon. The film is based on the 1935 play by Damon Runyon and Howard Lindsay. The offbeat comedy stars Edward G. Robinson spoofing his own **gangster image** as Remy Marco. Plot.

P2: A Slight Case of Murder is a 1938 American comedy film directed by Lloyd Bacon. The film is based on the 1935 play by Damon Runyon and Howard Lindsay. The offbeat comedy stars Edward G. Robinson spoofing his own **streetwise appearance** as Remy Marco. Plot.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **gangster image** and **streetwise appearance** interchangeable (i.e., having the same meaning)?

Pair 1986

P1: However, in the 1990s, a particular type of music for pantsula emerged: kwaito. This multilingual music is typical of the myriad of cultures in South Africa, and is a blend of seSotho, isiZulu, English, and Afrikaans. It is strong and sharp, like pantsula, and projects a streetwise, **gangster image**. Pantsula was featured in the 2018 music video "All the Stars" by the artist Kendrick Lamar.

P2: However, in the 1990s, a particular type of music for pantsula emerged: kwaito. This multilingual music is typical of the myriad of cultures in South Africa, and is a blend of seSotho, isiZulu, English, and Afrikaans. It is strong and sharp, like pantsula, and projects a streetwise, **ghetto facsimile**. Pantsula was featured in the 2018 music video "All the Stars" by the artist Kendrick Lamar.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **gangster image** and **ghetto facsimile** interchangeable (i.e., having the same meaning)?

Pair 1987

P1: Economic system. This and the following sections focus on the Tapirapé as they were observed by Wagley in 1939. The **last section** mentions Wagley's observations since that time. The Tapirapé lived from slash and burn horticulture, hunting and fishing.

P2: Economic system. This and the following sections focus on the Tapirapé as they were observed by Wagley in 1939. The **previous part** mentions Wagley's observations since that time. The Tapirapé lived from slash and burn horticulture, hunting and fishing.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **last section** and **previous part** interchangeable (i.e., having the same meaning)?

Pair 1988

P1: For example, a man who worked for a hospital for 10 years was fired for coming to work with blue hair after refusing to dye it back to its normal color. In two cases that were followed by lawsuits, students in the U.S. and Canada

were sanctioned for dying their hair blue. The American Civil Liberties Union intervened in the **american case**. Animals.

P2: For example, a man who worked for a hospital for 10 years was fired for coming to work with blue hair after refusing to dye it back to its normal color. In two cases that were followed by lawsuits, students in the U.S. and Canada were sanctioned for dying their hair blue. The American Civil Liberties Union intervened in the **US proceeding**. Animals.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **american case** and **US proceeding** interchangeable (i.e., having the same meaning)?

Pair 1989

P1: An example implementation of the quad-edge data-type is as follows `typedef struct { quadedge_ref e[4]; } quadedge;` `typedef struct { quadedge *next; unsigned int rot; } quadedge_ref;` Each quad-edge contains four references to adjacent quad-edges. Each of the four references points to the next edge counter-clockwise around either a vertex or a face. Each of these references represent either the origin vertex of the edge, the right face, the destination vertex, or the **left face**. Each quad-edge reference points to a quad-edge and the rotation (from 0 to 3) of the 'arm' it points at.

P2: An example implementation of the quad-edge data-type is as follows `typedef struct { quadedge_ref e[4]; } quadedge;` `typedef struct { quadedge *next; unsigned int rot; } quadedge_ref;` Each quad-edge contains four references to adjacent quad-edges. Each of the four references points to the next edge counter-clockwise around either a vertex or a face. Each of these references represent either the origin vertex of the edge, the right face, the destination vertex, or the **opposite of the right side**. Each quad-edge reference points to a quad-edge and the rotation (from 0 to 3) of the 'arm' it points at.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **left face** and **opposite of the right side** interchangeable (i.e., having the same meaning)?

Pair 1990

P1: Returning from Vietnam, Skip Delano was "very committed to fighting this whole machine that sent us there". He co-founded "Left Face", the GI underground newspaper at Fort McClellan in Alabama and was one of 1,366 active-duty servicemen who signed an antiwar petition printed in "The New York Times" on November 9, 1969. In his photo he wears a button saying "To Hell with Rambo and all He Represents" and holds copies of "**left face**." Dave Blalock's photo shows him holding the full page in NY Times petition which Skip Delano had signed.

P2: Returning from Vietnam, Skip Delano was "very committed to fighting this whole machine that sent us there". Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **entire generation** and **all the people** interchangeable (i.e., having the same meaning)?

Pair 1994

P1: The union will often enforce a basic code of conduct among its members to ensure smooth operation of the hiring hall (to prevent members from double-booking, for example). If a hiring hall is reputable, the relationship between the union and the employer can be relatively harmonious. There are arguments that this actually benefits contractors who hire employees for the duration of a **specific job**. This is primarily due to the union handling qualifications and other eligibility requirements.

P2: The union will often enforce a basic code of conduct among its members to ensure smooth operation of the hiring hall (to prevent members from double-booking, for example). If a hiring hall is reputable, the relationship between the union and the employer can be relatively harmonious. There are arguments that this actually benefits contractors who hire employees for the duration of a **definitive position**. This is primarily due to the union handling qualifications and other eligibility requirements.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **specific job** and **definitive position** interchangeable (i.e., having the same meaning)?

Pair 1995

P1: Competitors can be defined as other firms that are located in the same market category or sell similar products to the same segment of people. When this rivalry exist, each company must protect its brand, growth expectations, and profitability to maintain a competitive advantage and adequate reputation among other brands. **To reduce the risk of financial loss**, firms strive to take their competition away from the industry. Importance of defensive strategy.

P2: Competitors can be defined as other firms that are located in the same market category or sell similar products to the same segment of people. When this rivalry exist, each company must protect its brand, growth expectations, and profitability to maintain a competitive advantage and adequate reputation among other brands. **To reduce the risk of economic cost**, firms strive to take their competition away from the industry. Importance of defensive strategy.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **financial loss** and **economic cost** interchangeable (i.e., having the same meaning)?

Pair 1996

P1: The points are plotted on a graph with heart rate on one axis and power (or some correlated measurement such as running speed) on the other axis; the graph's deflection point indicates the aerobic threshold. The heart rate increases (approximately) linearly up to the deflection point, where the heart rate reaches AT (also known as LT, lactate threshold, in more modern nomenclature). **The test continues for a while, under increasing load**, until the subject has gone well past the anaerobic threshold. Accuracy.

P2: The points are plotted on a graph with heart rate on one axis and power (or some correlated measurement such as running speed) on the other axis; the graph's deflection point indicates the aerobic threshold. The heart rate increases (approximately) linearly up to the deflection point, where the heart rate reaches AT (also known as LT, lactate threshold, in more modern nomenclature). **The test continues for a while, under accumulating pressure**, until the subject has gone well past the anaerobic threshold. Accuracy.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **increasing load** and **accumulating pressure** interchangeable (i.e., having the same meaning)?

Pair 1997

P1: Mark II (Canadian). During World War II a version of the Sten gun was produced at the Long Branch Arsenal in Long Branch, Ontario (now part of Toronto, Ontario). **This was very similar to the regular Mark II, with a different stock ('skeleton' type instead of strut type) and improved quality of manufacture.** It was first used in combat in the Dieppe Raid in 1942.

P2: Mark II (Canadian). During World War II a version of the Sten gun was produced at the Long Branch Arsenal in Long Branch, Ontario (now part of Toronto, Ontario). **This was very similar to the regular Mark II, with a different stock ('skeleton' type instead of strut type) and bettered condition of manufacture.** It was first used in combat in the Dieppe Raid in 1942.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **improved quality** and **bettered condition** interchangeable (i.e., having the same meaning)?

Pair 1998

P1: Drafi () is a North American style residential area in the municipality Rafina–Pikermi, East Attica, Greece. It is situated east of Athens, on the slopes of the Penteliko Mountain. Drafi is the prototype model for **improved quality of life within a green environment, away from the pollution filled downtown Athens**. The master planned development was initiated and brought to fruition by Vasilis Polydoropoulos, the President of the borough of Drafi.

P2: Drafi () is a North American style residential area in the municipality Rafina–Pikermi, East Attica, Greece. It is situated east of Athens, on the slopes of the Penteliko Mountain. Drafi is the prototype model for **enhanced aspect of life within a green environment, away from the pollution filled downtown Athens**. The master planned development was initiated and brought to fruition by Vasilis Polydoropoulos, the President of the borough of Drafi.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **improved quality** and **enhanced aspect** interchangeable (i.e., having the same meaning)?

Pair 1999

P1: Snubfin dolphin consume a wide array of prey, that can be narrowed down to coastal, estuarine, and reef-associated fishes throughout the water column and at the bottom. The most common prey items by specie are cardinal fish ("Apogon"), proceeded by the cuttlefish ("Sepia"), the squid Uroteuthis ("Photololigo"), and the toothpony fish ("Gazza"). **another big part** of the snubfin diet are cephalopods. Range and status.

P2: Snubfin dolphin consume a wide array of prey, that can be narrowed down to coastal, estuarine, and reef-associated fishes throughout the water column and at the bottom. The most common prey items by specie are cardinal fish ("Apogon"), proceeded by the cuttlefish ("Sepia"), the squid Uroteuthis ("Photololigo"), and the toothpony fish ("Gazza"). **an extra large piece** of the snubfin diet are cephalopods. Range and status.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **another big part** and **an extra large piece** interchangeable (i.e., having the same meaning)?

Pair 2000

P1: Currently in its third edition, the book has sold over a quarter-million copies. Along with the book, Wattenberg publishes regularly on how names shed light on cultural issues. **In addition to contributing to a blog accompanying _The baby name Wizard_, she is a frequent contributor to the Huffington Post and Slate**. She is often quoted in the media on name news, on topics ranging from celebrity names to cultural implications of name trends.

P2: Currently in its third edition, the book has sold over a quarter-million copies. Along with the book, Wattenberg publishes regularly on how names shed light on cultural issues. **In addition to contributing to a blog accompanying _The newborn epithet Wizard_, she is a frequent contributor to the Huffington Post and Slate**. She is often quoted in the media on name news, on topics ranging from celebrity names to cultural implications of name trends.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **baby name** and **newborn epithet** interchangeable (i.e., having the same meaning)?

Pair 2001

P1: The concept was introduced/evidenced by experimental findings regarding the line bisection task. In this task, participants are supposed to mark the middle of a horizontal line. **On average, their deviations from the actual center of the line tend to be more to the left than to the right**. In other visuo-spatial tasks, a similar bias to the left hemifield is apparent.

P2: The concept was introduced/evidenced by experimental findings regarding the line bisection task. In this task, participants are supposed to mark the middle of a horizontal line. **On average, their deviations from the verified core of the**

line tend to be more to the left than to the right. In other visuo-spatial tasks, a similar bias to the left hemifield is apparent.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **actual center** and **verified core** interchangeable (i.e., having the same meaning)?

Pair 2002

P1: Five months earlier, NASA had launched an Agena Target Vehicle for Gemini 6, but the Atlas-Agena launch failed when the Agena's engine exploded during orbital injection and the mission had to be rescheduled. The next attempt succeeded. Everything worked perfectly; the Agena put itself into a 298 kilometre circular orbit and oriented itself to the **correct attitude** for the docking. The Gemini spacecraft itself was launched into a 160 by 272 kilometre orbit by a modified Titan II on March 16, 1966 (coincidentally the 40th anniversary of the launch of the world's first liquid-fuelled rocket by Dr. Robert H. Goddard), at 10:41:02 a.m. EST.

P2: Five months earlier, NASA had launched an Agena Target Vehicle for Gemini 6, but the Atlas-Agena launch failed when the Agena's engine exploded during orbital injection and the mission had to be rescheduled. The next attempt succeeded. Everything worked perfectly; the Agena put itself into a 298 kilometre circular orbit and oriented itself to the **right approach** for the docking. The Gemini spacecraft itself was launched into a 160 by 272 kilometre orbit by a modified Titan II on March 16, 1966 (coincidentally the 40th anniversary of the launch of the world's first liquid-fuelled rocket by Dr. Robert H. Goddard), at 10:41:02 a.m. EST.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **correct attitude** and **right approach** interchangeable (i.e., having the same meaning)?

Pair 2003

P1: If sensors collect multiple data points at a given time then another method of using threshold based detection is to measure the variance of the data and only send data to a gateway node if the variance reaches a certain threshold. Events may occur in only a small portion of the data set. In this case it is important to break the data into smaller segments and take into account the variance of each **individual segment**. Consider an N-dimensional data set that can be divided into four equal quadrants.

P2: If sensors collect multiple data points at a given time then another method of using threshold based detection is to measure the variance of the data and only send data to a gateway node if the variance reaches a certain threshold. Events may occur in only a small portion of the data set. In this case it is important to break the data into smaller segments and take into account the variance of each **original piece**. Consider an N-dimensional data set that can be divided into four equal quadrants.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **individual segment** and **original piece** interchangeable (i.e., having the same meaning)?

Pair 2004

P1: Historian / Librarian. Most lodges have a senior member who holds a particular interest in the lodge's history. In some jurisdictions, this interest may lead to appointment to **formal office** as the lodge's 'Historian'. The office involves the archiving of documents and artifacts, and the publishing and updating of historical information.

P2: Historian / Librarian. Most lodges have a senior member who holds a particular interest in the lodge's history. In some jurisdictions, this interest may lead to appointment to **legal appointment** as the lodge's 'Historian'. The office involves the archiving of documents and artifacts, and the publishing and updating of historical information.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **formal office** and **legal appointment** interchangeable (i.e., having the same meaning)?

Pair 2005

P1: When the car is picked up from the impound lot, the tape is played and all agree that it is good. Loving the music, Turtle gets a track into "Queens Boulevard" and agrees to manage the promising musician, played by real life rapper Saigon. He doesn't get a **formal office** until season four in Eric Murphy's "The Murphy Group" corporation. Saigon receives a great deal of interest from several record companies after Vince arranges for his music to be played by Big Boy on popular L.A. radio station Power 106.

P2: When the car is picked up from the impound lot, the tape is played and all agree that it is good. Loving the music, Turtle gets a track into "Queens Boulevard" and agrees to manage the promising musician, played by real life rapper Saigon. He doesn't get a **designated workspace** until season four in Eric Murphy's "The Murphy Group" corporation. Saigon receives a great deal of interest from several record companies after Vince arranges for his music to be played by Big Boy on popular L.A. radio station Power 106.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **formal office** and **designated workspace** interchangeable (i.e., having the same meaning)?

Pair 2006

P1: (D): The authors stated that all 8 failures were due to valve calcification and that 2 of them had additional tears. They find that their results with 'calcification' in all failed valves are contrary to Gabbay's results where failures occurred mainly through cusp tears. This table is only an attempt to give a general impression and to provide a basis for a more **detailed interpretation** of results. However, several conclusions can be formulated on the complex, varied, and in some cases controversial results published.

P2: (D): The authors stated that all 8 failures were due to valve calcification and that 2 of them had additional tears. They find that their results with 'calcification' in all failed valves are contrary to Gabbay's results where failures occurred mainly through cusp tears. This table is only an attempt to give a general impression and to provide a basis for a more **comprehensive explanation** of results. However, several conclusions can be formulated on the complex, varied, and in some cases controversial results published.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **detailed interpretation** and **comprehensive explanation** interchangeable (i.e., having the same meaning)?

Pair 2007

P1: (Pld)=Games Played, (W) = Wins, (D)=Draws, (L)=Losses, (GF)=Goals For, (GA)=Goals Against, (Pts)=Points, (Cup)= NSL Cup placing Youth system. The club had only a single 'first team' during its existence with no incorporated reserves or youth development system, owing in part to the structure of the NSL. Local players were drawn from the ACT leagues and formed a **major component** of the squads. While the "National Youth League" was in operation the ACT Academy of Sport provided the Cosmos youth side through the involvement of Soccer Canberra.

P2: (Pld)=Games Played, (W) = Wins, (D)=Draws, (L)=Losses, (GF)=Goals For, (GA)=Goals Against, (Pts)=Points, (Cup)= NSL Cup placing Youth system. The club had only a single 'first team' during its existence with no incorporated reserves or youth development system, owing in part to the structure of the NSL. Local players were drawn from the ACT leagues and formed a **large part** of the squads. While the "National Youth League" was in operation the ACT Academy of Sport provided the Cosmos youth side through the involvement of Soccer Canberra.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **major component** and **large part** interchangeable (i.e., having the same meaning)?

Pair 2008

P1: Even eyeglasses with thinner frames can reduce the effectiveness of hearing protection by 3-7 dB. One simple method for checking earmuff fit is to lift one or both muffs away from the head while in a noisy environment. **If the noise is considerably louder with the adjustment, then the earmuffs are providing at least some degree of noise reduction.** Improper earmuff fit can cause discomfort, which in turn may cause the individual to avoid wearing the hearing protection device, reducing its effectiveness.

P2: Even eyeglasses with thinner frames can reduce the effectiveness of hearing protection by 3-7 dB. One simple method for checking earmuff fit is to lift one or both muffs away from the head while in a noisy environment. **If the noise is considerably louder with the adjustment, then the earmuffs are providing at small amount of noise reduction.** Improper earmuff fit can cause discomfort, which in turn may cause the individual to avoid wearing the hearing protection device, reducing its effectiveness.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **least some degree** and **small amount** interchangeable (i.e., having the same meaning)?

Pair 2009

P1: Drusilla points out that they've met the real Dracula, but Spike argues that Lugosi is far more entertaining. Spike produces two third-row tickets; Drusilla asks if they were expensive, and Spike replies that they cost the original owner his life. **In Poughkeepsie, a boy tells his school class about his trip to see Béla Lugosi in L.A.** He had been excited to see the play, even though he didn't realize he'd meet "real" vampires that night.

P2: Drusilla points out that they've met the real Dracula, but Spike argues that Lugosi is far more entertaining. Spike produces two third-row tickets; Drusilla asks if they were expensive, and Spike replies that they cost the original owner his life. **In Poughkeepsie, a boy tells his peer group about his trip to see Béla Lugosi in L.A.** He had been excited to see the play, even though he didn't realize he'd meet "real" vampires that night.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **school class** and **peer group** interchangeable (i.e., having the same meaning)?

Pair 2010

P1: As it was fully mechanical, the camera could be used even if the battery was dead. Flash sync was set for 1/60 second. **The release button was placed in an uncommon spot, halfway down the front of the camera.** If the user used the middle finger for the shutter release, it was possible to have an unusually solid grip on the housing.

P2: As it was fully mechanical, the camera could be used even if the battery was dead. Flash sync was set for 1/60 second. **The release button was placed in an uncharacteristic location, halfway down the front of the camera.** If the user used the middle finger for the shutter release, it was possible to have an unusually solid grip on the housing.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **uncommon spot** and **uncharacteristic location** interchangeable (i.e., having the same meaning)?

Pair 2011

P1: Rajan then tries to evict the poor people living in small tenements with Anoop and his mother (Lalita Pawar), but Anoop and Seema intervene, and as a result Rajan orders the tenements to be burnt secretly by his henchman Sitaram (Jankidas). Anoop is blamed for the destruction and arrested by the police. **Seema's dad, Sachin Choudhury (Ashok Kumar) forbids Seema to see Anoop anymore as well as stay away from the poor people's lives.** Seema will now to

chose between her lover and her father.

P2: Rajan then tries to evict the poor people living in small tenements with Anoop and his mother (Lalita Pawar), but Anoop and Seema intervene, and as a result Rajan orders the tenements to be burnt secretly by his henchman Sitaram (Jankidas). Anoop is blamed for the destruction and arrested by the police. Seema's dad, Sachin Choudhury (Ashok Kumar) forbids Seema to see Anoop anymore as well as stay away from the **those with financial burdens**. Seema will now to chose between her lover and her father.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **poor people's lives** and **those with financial burdens** interchangeable (i.e., having the same meaning)?

Pair 2012

P1: The murder (1878). The actual atrocities were inflicted in the Northern Cape, at Luisdraai near Koegas (roughly within the modern Siyathemba Local Municipality). In October 1878, a group of Korana and San rebels were savagely attacked by a **military patrol** and 46 of them were killed. It later arose that they were killed in cold blood, after having been disarmed and taken prisoner, and among the 46 were 11 women and children.

P2: The murder (1878). The actual atrocities were inflicted in the Northern Cape, at Luisdraai near Koegas (roughly within the modern Siyathemba Local Municipality). In October 1878, a group of Korana and San rebels were savagely attacked by a **trained defense group** and 46 of them were killed. It later arose that they were killed in cold blood, after having been disarmed and taken prisoner, and among the 46 were 11 women and children.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **military patrol** and **trained defense group** interchangeable (i.e., having the same meaning)?

Pair 2013

P1: CD family receptors are typically monomers or dimers, though they are all primarily extracellular proteins. The CD4 receptor in particular interacts with murine MHC-II following the "ball-on-stick" model, where the Phe-43 ball fits into the conserved hydrophobic 2 and 2 domain residues. During binding with MHC-II, CD4 maintains **independent structure and does not form any bonds with the TCR receptor**. The members of the CD family of co-receptors have a wide range of function.

P2: CD family receptors are typically monomers or dimers, though they are all primarily extracellular proteins. The CD4 receptor in particular interacts with murine MHC-II following the "ball-on-stick" model, where the Phe-43 ball fits into the conserved hydrophobic 2 and 2 domain residues. During binding with MHC-II, CD4 maintains **its own build and does not form any bonds with the TCR receptor**. The members of the CD family of co-receptors have a wide range of function.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **independent structure** and **its own build** interchangeable (i.e., having the same meaning)?

Pair 2014

P1: Later history. Although they were correctly known as the "Thermae Traiani" throughout the Middle Ages and much of the Renaissance, in the late sixteenth century the ruins of the Baths of Trajan were confused with the nearby Baths of Titus and became known as the "Thermae Titiani". Doubt arose as to whether the Baths of Trajan had ever existed at all as an **independent structure**. Supporters of this theory argued that only the Baths of Titus stood on the Oppian, with the name of Trajan applied to them later because he undertook a restoration.

P2: Later history. Although they were correctly known as the "Thermae Traiani" throughout the Middle Ages and much of the Renaissance, in the late sixteenth century the ruins of the Baths of Trajan were confused with the nearby Baths of Titus and became known as the "Thermae Titiani". **Doubt arose as to whether the Baths of Trajan had ever existed at all as an original formation.** Supporters of this theory argued that only the Baths of Titus stood on the Oppian, with the name of Trajan applied to them later because he undertook a restoration.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **independent structure** and **original formation** interchangeable (i.e., having the same meaning)?

Pair 2015

P1: According to Ovid, Astraea abandoned the earth during the Iron Age. Fleeing from the new wickedness of humanity, she ascended to heaven to become the constellation Virgo. **The nearby constellation Libra reflected her symbolic association with Dike, who in latin culture as Justitia is said to preside over the constellation.** In the Tarot, the 8th card, Justice, with a figure of Justitia, can thus be considered related to the figure of Astraea on historical iconographic grounds.

P2: According to Ovid, Astraea abandoned the earth during the Iron Age. Fleeing from the new wickedness of humanity, she ascended to heaven to become the constellation Virgo. **The nearby constellation Libra reflected her symbolic association with Dike, who in Roman civilization as Justitia is said to preside over the constellation.** In the Tarot, the 8th card, Justice, with a figure of Justitia, can thus be considered related to the figure of Astraea on historical iconographic grounds.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **latin culture** and **Roman civilization** interchangeable (i.e., having the same meaning)?

Pair 2016

P1: Twenty African, indentured servants were brought over in a Portuguese ship in 1619. Anyone who was considered an indentured servant before this were white. Blacks were not enslaved until the case of Anthony Johnson v. John Casor in 1654. **Being an indentured servant meant that one had to work for a particular time frame to pay for their transportation to the New World.** They were also not allowed to be married while being an indentured servant.

P2: Twenty African, indentured servants were brought over in a Portuguese ship in 1619. Anyone who was considered an indentured servant before this were white. Blacks were not enslaved until the case of Anthony Johnson v. John Casor in 1654. **Being an indentured servant meant that one had to work for a specific amount to pay for their transportation to the New World.** They were also not allowed to be married while being an indentured servant.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **particular time frame** and **specific amount** interchangeable (i.e., having the same meaning)?

Pair 2017

P1: Grasshoppers eat large quantities of foliage both as adults and during their development, and can be serious pests of arid land and prairies. Pasture, grain, forage, vegetable and other crops can be affected. **Grasshoppers often bask in the sun, and thrive in warm sunny conditions,** so drought stimulates an increase in grasshopper populations. A single season of drought is not normally sufficient to stimulate a major population increase, but several successive dry seasons can do so, especially if the intervening winters are mild so that large numbers of nymphs survive.

P2: Grasshoppers eat large quantities of foliage both as adults and during their development, and can be serious pests of arid land and prairies. Pasture, grain, forage, vegetable and other crops can be affected. **Grasshoppers often bask in the sun, and thrive in balmy surroundings,** so drought stimulates an increase in grasshopper populations. A single season of drought is not normally sufficient to stimulate a major population increase, but several successive dry seasons can do

so, especially if the intervening winters are mild so that large numbers of nymphs survive.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **warm sunny conditions** and **balmy surroundings** interchangeable (i.e., having the same meaning)?

Pair 2018

P1: Tipperary and Cork had previously met on 60 occasions in the National Hurling League with Cork leading with 29 wins to Tipperary's 26, while there have been 5 draws. John Meagher and Willie Ryan made their first starts in the league while Tommy Heffernan made his league debut, goalkeeper Darren Gleeson started his first league game of the year. **In a match played in warm sunny conditions, Cork had a 0–14 to 2–6 lead at half-time.** The first half Tipperary goals came from Seamus Callanan with a close range finish after a rebound came back to him from a John McGrath shot and a minute later from John McGrath this time the finisher after a pass from Seamus Callanan.

P2: Tipperary and Cork had previously met on 60 occasions in the National Hurling League with Cork leading with 29 wins to Tipperary's 26, while there have been 5 draws. John Meagher and Willie Ryan made their first starts in the league while Tommy Heffernan made his league debut, goalkeeper Darren Gleeson started his first league game of the year. **In a match played in summery settings, Cork had a 0–14 to 2–6 lead at half-time.** The first half Tipperary goals came from Seamus Callanan with a close range finish after a rebound came back to him from a John McGrath shot and a minute later from John McGrath this time the finisher after a pass from Seamus Callanan.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **warm sunny conditions** and **summery settings** interchangeable (i.e., having the same meaning)?

Pair 2019

P1: The police arrested the group after they proceeded to hold a bingo game, which the police had said to be illegal, after promising they would hold a raffle instead. Moreno and the other candidates were freed after the Manila Prosecutor's Office ruled that there was not enough evidence to prolong their detention. **Moreno maintained that the bingo game is not illegal after President Ferdinand Marcos classified it as a parlor game.** Brillantes later said that Moreno's group did not violate any election law when they held a bingo game as the campaign period for local elections has not yet started.

P2: The police arrested the group after they proceeded to hold a bingo game, which the police had said to be illegal, after promising they would hold a raffle instead. Moreno and the other candidates were freed after the Manila Prosecutor's Office ruled that there was not enough evidence to prolong their detention. **Moreno maintained that the bingo game is not illegal after President Ferdinand Marcos classified it as a domestic amusement.** Brillantes later said that Moreno's group did not violate any election law when they held a bingo game as the campaign period for local elections has not yet started.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **actual coverage** and **genuine airtime** interchangeable (i.e., having the same meaning)?

Pair 2028

P1: Eating culture. The major elements of eating do not only include the process of eating itself but also the social setting and the social environment. **That means food and its consumption is a ritual artifact on a daily basis, such as a coffee break, dinner or a business lunch.** Furthermore, any food item may become a conveyor of meaningful messages because of a symbolic framing that is rooted not in the attributes of the food itself but in the expected function of the food.

P2: Eating culture. The major elements of eating do not only include the process of eating itself but also the social setting and the social environment. **That means food and its consumption is a ritual artifact on a daily basis, such as a coffee break, dinner or a meeting luncheon.** Furthermore, any food item may become a conveyor of meaningful messages because of a symbolic framing that is rooted not in the attributes of the food itself but in the expected function of the food.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **business lunch** and **meeting luncheon** interchangeable (i.e., having the same meaning)?

Pair 2029

P1: TERC has extensive secondary structural features over 4 principal conserved domains. The core domain, the largest domain at the 5' end of TERC, contains the CUAAC Telomere template sequence. **Its secondary structure consists of a large loop containing the template sequence, a P1 loop-closing helix, and a P2/P3 pseudoknot.** The core domain and CR4/CR5 conserved domain associate with TERT, and are the only domains of TERC necessary for in vitro catalytic activity of telomerase.

P2: TERC has extensive secondary structural features over 4 principal conserved domains. The core domain, the largest domain at the 5' end of TERC, contains the CUAAC Telomere template sequence. **Its secondary structure consists of a huge coil containing the template sequence, a P1 loop-closing helix, and a P2/P3 pseudoknot.** The core domain and CR4/CR5 conserved domain associate with TERT, and are the only domains of TERC necessary for in vitro catalytic activity of telomerase.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **large loop** and **huge coil** interchangeable (i.e., having the same meaning)?

Pair 2030

P1: Her Royal Highness. Age 57. **HRH derives enormous pleasure from making everyone around her as uncomfortable as possible.** Her private secretary, Captain Philip "Pip" St. Aubyn (Alastair Duncan) is always on hand to assist her.

P2: Her Royal Highness. Age 57. **HRH derives tons of amusement from making everyone around her as uncomfortable as possible.** Her private secretary, Captain Philip "Pip" St. Aubyn (Alastair Duncan) is always on hand to assist her.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **enormous pleasure** and **tons of amusement** interchangeable (i.e., having the same meaning)?

Pair 2031

P1: If it moves outward over time, a given level of vacancies would be associated with higher and higher levels of unemployment, which would imply decreasing efficiency in the labour market. Inefficient labour markets are caused by mismatches between available jobs and the unemployed and an immobile labour force. **The position on the curve can indicate the current state of the economy in the business cycle.** For example, recessionary periods are indicated by high unemployment and low vacancies, corresponding to a position on the lower side of the 45° line, and high vacancies and low unemployment indicate the expansionary periods on the upper side of the 45° line.

P2: If it moves outward over time, a given level of vacancies would be associated with higher and higher levels of unemployment, which would imply decreasing efficiency in the labour market. Inefficient labour markets are caused by mismatches between available jobs and the unemployed and an immobile labour force. **The position on the curve can indicate the prevailing circumstance of the economy in the business cycle.** For example, recessionary periods are indicated by high unemployment and low vacancies, corresponding to a position on the lower side of the 45° line, and high vacancies and low unemployment indicate the expansionary periods on the upper side of the 45° line.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **current state** and **prevailing circumstance** interchangeable (i.e., having the same meaning)?

Pair 2032

P1: Citoyen went to the front soon after the start with Olmeto in second. Nobiliary, Dahlia, Carolus, Un Kopeck and Allez France were also in contention in the early stages. **At half distance the field bunched and there was a good deal of bumping and interference.** Dahlia stumbled and lost any chance, whilst Allez France also lost ground.

P2: Citoyen went to the front soon after the start with Olmeto in second. Nobiliary, Dahlia, Carolus, Un Kopeck and Allez France were also in contention in the early stages. **At half distance the field bunched and there was a considerable portion of bumping and interference.** Dahlia stumbled and lost any chance, whilst Allez France also lost ground.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **good deal** and **considerable portion** interchangeable (i.e., having the same meaning)?

Pair 2033

P1: In June, he advanced into Wiltshire, inflicting a serious defeat on Waller's 'Army of the Southern Association' at Roundway Down on 13 July. Arguably the most comprehensive Royalist victory of the war, it isolated Parliament's garrisons in the west and Prince Rupert stormed Bristol on 26 July. **This gave the Royalists control of the second largest city in Britain and landing point for reinforcements from Ireland.** By late August, the Parliamentary cause was close to collapse but was saved by Pym's leadership and determination, which resulted in important reforms.

P2: In June, he advanced into Wiltshire, inflicting a serious defeat on Waller's 'Army of the Southern Association' at Roundway Down on 13 July. Arguably the most comprehensive Royalist victory of the war, it isolated Parliament's garrisons in the west and Prince Rupert stormed Bristol on 26 July. **This gave the Royalists control of the second largest city in Britain and entrance dock for reinforcements from Ireland.** By late August, the Parliamentary cause was close to collapse but was saved by Pym's leadership and determination, which resulted in important reforms.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **landing point** and **entrance dock** interchangeable (i.e., having the same meaning)?

Pair 2034

P1: Other film appearances are in the 2012 release "Amputace" as Aurora, "Román pro ženy" as Bludička, and appearances in "Blade II", "XXX" with Vin Diesel, and "Ripper". On stage she has starred in "Perfect Wedding", "Kat Mydlář", "Golem", "Dracula", and "Carmen". In the **late part** of 2014, she will appear as Rosie in the premiere of "Mamma Mia!" in Prague.

P2: Other film appearances are in the 2012 release "Amputace" as Aurora, "Román pro ženy" as Bludička, and appearances in "Blade II", "XXX" with Vin Diesel, and "Ripper". On stage she has starred in "Perfect Wedding", "Kat Mydlář", "Golem", "Dracula", and "Carmen". In the **more recent** of 2014, she will appear as Rosie in the premiere of "Mamma Mia!" in Prague.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **late part** and **more recent** interchangeable (i.e., having the same meaning)?

Pair 2035

P1: Parvaaz is an Indian rock band formed in 2010 in Bangalore. The **present line** up features Khalid Ahamed (vocals), Mir Kashif Iqbal (guitar), Fidel Dsouza (bass) and Sachin Banandur (drums and percussion). Parvaaz released their first single "Dil Khush" in 2011 followed by their five-track debut E.P "Behosh" in 2012.

P2: Parvaaz is an Indian rock band formed in 2010 in Bangalore. The **prevailing features** up features Khalid Ahamed (vocals), Mir Kashif Iqbal (guitar), Fidel Dsouza (bass) and Sachin Banandur (drums and percussion). Parvaaz released their first single "Dil Khush" in 2011 followed by their five-track debut E.P "Behosh" in 2012.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **present line** and **prevailing features** interchangeable (i.e., having the same meaning)?

Pair 2036

P1: The sensation they created in the toy world caused other toy companies to produce their own tiny dolls. Mattel founder Elliot Handler oversaw the project. The dolls were designed to have a **close resemblance** to little children in neighborhoods across America. Martha Armstrong-Hand, the famous doll sculptor at Mattel, made the first Kiddles in 1965.

P2: The sensation they created in the toy world caused other toy companies to produce their own tiny dolls. Mattel founder Elliot Handler oversaw the project. The dolls were designed to have a **look like** to little children in neighborhoods across America. Martha Armstrong-Hand, the famous doll sculptor at Mattel, made the first Kiddles in 1965.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **close resemblance** and **look like** interchangeable (i.e., having the same meaning)?

Pair 2037

P1: The song was released on February 4, 2014, as the lead single from his second official mixtape "I Promise I Will Never Stop Going In". "Walk Thru" was produced by Dupri of League of Starz and Problem, the latter which also makes a guest appearance. The music video was filmed on May 6, 2014, where Quan suffered from two seizures due to **heat exhaustion**. The song has since peaked at number 74 on the US "Billboard" Hot 100 chart.

P2: The song was released on February 4, 2014, as the lead single from his second official mixtape "I Promise I Will Never Stop Going In". "Walk Thru" was produced by Dupri of League of Starz and Problem, the latter which also makes a guest appearance. The music video was filmed on May 6, 2014, where Quan suffered from two seizures due to

high core temperature conditions. The song has since peaked at number 74 on the US "Billboard" Hot 100 chart.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **heat exhaustion** and **high core temperature conditions** interchangeable (i.e., having the same meaning)?

Pair 2038

P1: Firstly, education does not affect men's and women's sexual behaviour differently. Instead, it increases women's power, therefore women with the greatest amount of education are nearly equal in power with men. **On the other hand, women who are the least educated have the least power relative to men.** When comparing sexual behaviours of most educated and least educated men and women, they found that education actually increased the prevalence of many sexual activities in both sexes, including oral sex, anal sex, and having a same sex partner.

P2: Firstly, education does not affect men's and women's sexual behaviour differently. Instead, it increases women's power, therefore women with the greatest amount of education are nearly equal in power with men. **On the other hand, women who are the least educated have the minutest capability relative to men.** When comparing sexual behaviours of most educated and least educated men and women, they found that education actually increased the prevalence of many sexual activities in both sexes, including oral sex, anal sex, and having a same sex partner.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **least power** and **minutest capability** interchangeable (i.e., having the same meaning)?

Pair 2039

P1: They return home with a significant amount of financial capital, and a large portion of these savings is generally invested in housing and new businesses. Also, return migration has social networks around the world, which strengthens social networks within home countries and across the world (Adda et al., 2014). **When migrants return home, they enhance social networks in several key ways.** They build ties with other returnees and local non-migrants in job findings.

P2: They return home with a significant amount of financial capital, and a large portion of these savings is generally invested in housing and new businesses. Also, return migration has social networks around the world, which strengthens social networks within home countries and across the world (Adda et al., 2014). **When migrants return home, they enhance social networks in many important approaches.** They build ties with other returnees and local non-migrants in job findings.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **several key ways** and **many important approaches** interchangeable (i.e., having the same meaning)?

Pair 2040

P1: One sees also the countryside of the Huelgoat region and the town of Morlaix (the viaduct and the little streets around the church Saint-Melanie). The film was shot just a few months after the storm of 1987 of which there is visual evidence in the film. **The film deviates from the novel in several key ways.** Most notably, it imbues a homoerotic subtext in the relationship between Thomas and Charles.

P2: One sees also the countryside of the Huelgoat region and the town of Morlaix (the viaduct and the little streets around the church Saint-Melanie). The film was shot just a few months after the storm of 1987 of which there is visual evidence in the film. **The film deviates from the novel in a lot of interesting manners.** Most notably, it imbues a homoerotic subtext in the relationship between Thomas and Charles.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **several key ways** and **a lot of interesting manners** interchangeable (i.e., having the same meaning)?

Pair 2041

P1: The Village also carries special programs such as John McEuen’s “Acoustic Traveller”. The Village and host Mary-Sue Twohy won a Gracie Award in 2016 from the Alliance for Women in Media Foundation (AWMF). **As of April 2009 its logo has changed from the word “village” in green lowercase print to the word in black type and Capital letters.** Also lines are drawn on the “V” and lines drawn on the letters “l,l,a,g and e”.

P2: The Village also carries special programs such as John McEuen’s “Acoustic Traveller”. The Village and host Mary-Sue Twohy won a Gracie Award in 2016 from the Alliance for Women in Media Foundation (AWMF). **As of April 2009 its logo has changed from the word “village” in green lowercase print to the word in dark font and Capital letters.** Also lines are drawn on the “V” and lines drawn on the letters “l,l,a,g and e”.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **black type** and **dark font** interchangeable (i.e., having the same meaning)?

Pair 2042

P1: Elite and black type racing in Australia. The Australian Pattern Racing Committee is responsible for grading races under the auspices of the Australian Racing Board. **Traditionally, until the late 1970s, a series of stakes races were recognised as black type but there was no grading of races within this grouping.** Historically, handicaps have been extremely popular among Australian punters, owners and industry participants.

P2: Elite and black type racing in Australia. The Australian Pattern Racing Committee is responsible for grading races under the auspices of the Australian Racing Board. **Traditionally, until the late 1970s, a series of stakes races were recognised as racial stereotyping but there was no grading of races within this grouping.** Historically, handicaps have been extremely popular among Australian punters, owners and industry participants.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **black type** and **racial stereotyping** interchangeable (i.e., having the same meaning)?

Pair 2043

P1: He was not a candidate for election to a full term, and was succeeded by James M. Calhoun. He was commissioned as a colonel in the Georgia state militia. **As a violin soloist, he was a local favorite and played many recitals in Atlanta and Decatur, even during the war.** Lowe died in Mount Airy, Georgia, and is buried in Atlanta’s Oakland Cemetery.

P2: He was not a candidate for election to a full term, and was succeeded by James M. Calhoun. He was commissioned as a colonel in the Georgia state militia. **As a violin soloist, he was a community darling and played many recitals in Atlanta and Decatur, even during the war.** Lowe died in Mount Airy, Georgia, and is buried in Atlanta’s Oakland Cemetery.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **local favorite** and **community darling** interchangeable (i.e., having the same meaning)?

Pair 2044

P1: It also attracted opposition from the Mayor of San Diego Roger Hedgecock and a coalition of environmentalist groups including the Sierra Club, who supported a ballot in November 1985 requiring the city’s voters to approve any developmental projects in San Diego’s northern land reserve. In March 1986, Campus Crusade filed a lawsuit against San Diego for US\$70 million plus interest. **However, the lawsuit failed and Crusade’s subsidiary, university development,**

filed for bankruptcy when a lender foreclosed on the property in late 1986. The Texas land developer Glenn Terrell helped Crusade offset its debts by purchasing the property.

P2: It also attracted opposition from the Mayor of San Diego Roger Hedgecock and a coalition of environmentalist groups including the Sierra Club, who supported a ballot in November 1985 requiring the city's voters to approve any developmental projects in San Diego's northern land reserve. In March 1986, Campus Crusade filed a lawsuit against San Diego for US\$70 million plus interest. However, the lawsuit failed and Crusade's subsidiary, **real estate company**, filed for bankruptcy when a lender foreclosed on the property in late 1986. The Texas land developer Glenn Terrell helped Crusade offset its debts by purchasing the property.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **university development** and **real estate company** interchangeable (i.e., having the same meaning)?

Pair 2045

P1: Patricia Cardoso is a director, writer, and producer. Cardoso's feature film "**real women** Have Curves" was a box office and critical success and has become a landmark of Latino cinema. Cardoso is a graduate of UCLA's film school, an anthropologist, and a Fulbright scholar; her anthropological approach to directing guides her film and television work.

P2: Patricia Cardoso is a director, writer, and producer. Cardoso's feature film "**true females** Have Curves" was a box office and critical success and has become a landmark of Latino cinema. Cardoso is a graduate of UCLA's film school, an anthropologist, and a Fulbright scholar; her anthropological approach to directing guides her film and television work.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **real women** and **true females** interchangeable (i.e., having the same meaning)?

Pair 2046

P1: Meanwhile, Bart takes karate lessons but quits after learning it is not as interesting as he had hoped. The episode was written by Jon Vitti and directed by Jim Reardon. It had an **unusual amount** of animation glitches because the animation studio was training a new group of animators. The episode features cultural references to playwright William Shakespeare and the film "It's a Wonderful Life".

P2: Meanwhile, Bart takes karate lessons but quits after learning it is not as interesting as he had hoped. The episode was written by Jon Vitti and directed by Jim Reardon. It had an **atypical level** of animation glitches because the animation studio was training a new group of animators. The episode features cultural references to playwright William Shakespeare and the film "It's a Wonderful Life".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **unusual amount** and **atypical level** interchangeable (i.e., having the same meaning)?

Pair 2047

P1: The battle took place on 12 August between German forces, led by Georg von der Marwitz and the Belgian troops commanded by Léon de Witte. Belgian engineers had blown the bridge over the Gete but the structure only partly collapsed and the Germans got troops over it into the centre of Haelen. The main Belgian defence line was west of Haelen in terrain which gave only an **obstructed view** to the attacker. The 17th and 3rd Cavalry brigades assisted the in and south of Haelen, which enabled artillery to be brought to the fringe of the village but attacks into cornfields beyond were repulsed with many casualties, some cavalry becoming trapped by wire fences.

P2: The battle took place on 12 August between German forces, led by Georg von der Marwitz and the Belgian troops commanded by Léon de Witte. Belgian engineers had blown the bridge over the Gete but the structure only partly collapsed and the Germans got troops over it into the centre of Haelen. The main Belgian defence line was west of Haelen in terrain which gave only an **ambiguous sight** to the attacker. The 17th and 3rd Cavalry brigades assisted the in and

south of Haelen, which enabled artillery to be brought to the fringe of the village but attacks into cornfields beyond were repulsed with many casualties, some cavalry becoming trapped by wire fences.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **obstructed view** and **ambiguous sight** interchangeable (i.e., having the same meaning)?

Pair 2048

P1: Each villa is assigned to one of three booking categories: Magic Kingdom View, Bay Lake View, or Standard View, with the relative cost or number of required Disney Vacation Club points assigned accordingly. Although the Magic Kingdom can be seen from some standard and Bay Lake view rooms, the premium views of the park are given the Magic Kingdom view category. **Standard view rooms tend to be lower-level rooms that overlook either the parking lot, a service area or an obstructed view.** The remainder of the tower is assigned the Bay Lake View category, with views primarily of either Bay Lake or the pool.

P2: Each villa is assigned to one of three booking categories: Magic Kingdom View, Bay Lake View, or Standard View, with the relative cost or number of required Disney Vacation Club points assigned accordingly. Although the Magic Kingdom can be seen from some standard and Bay Lake view rooms, the premium views of the park are given the Magic Kingdom view category. **Standard view rooms tend to be lower-level rooms that overlook either the parking lot, a service area or an obscured vision.** The remainder of the tower is assigned the Bay Lake View category, with views primarily of either Bay Lake or the pool.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **obstructed view** and **obscured vision** interchangeable (i.e., having the same meaning)?

Pair 2049

P1: From then until 1911, a number of people formally shared the responsibility of chief minister to the Emperor. Even when one of them dominated government, such as in the case of Li Hongzhang, they were nevertheless formally just one of several ministers of equal status. **During much of the Qing dynasty, for example, the traditional role of the Chancellor was performed collectively by the Grand Council.** In mid 1911, the modern position of Premier was created, when the Qing Imperial Government created the "Princes' Cabinet" as a reform of Chinese politics, shortly before it was overthrown.

P2: From then until 1911, a number of people formally shared the responsibility of chief minister to the Emperor. Even when one of them dominated government, such as in the case of Li Hongzhang, they were nevertheless formally just one of several ministers of equal status. **During much of the Qing dynasty, for example, the expected portrayal of the Chancellor was performed collectively by the Grand Council.** In mid 1911, the modern position of Premier was created, when the Qing Imperial Government created the "Princes' Cabinet" as a reform of Chinese politics, shortly before it was overthrown.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **traditional role** and **expected portrayal** interchangeable (i.e., having the same meaning)?

Pair 2050

P1: A lead is usually allotted to an individual to follow up on. Once the individual (e.g. **salesperson**) reviews and qualifies it to have **potential business**, the lead gets converted to an opportunity for a business. The opportunity then has to undergo multiple sales stages before the deal is won.

P2: A lead is usually allotted to an individual to follow up on. Once the individual (e.g. **salesperson**) reviews and qualifies it to have **possible company**, the lead gets converted to an opportunity for a business. The opportunity then

has to undergo multiple sales stages before the deal is won.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **potential business** and **possible company** interchangeable (i.e., having the same meaning)?

Pair 2051

P1: The project was broken into three phases. Phase one was to create a satellite that could meet and inspect another satellite of 1 square meter (11 sq ft) radar cross-section that was in orbit at up to 740 kilometers (460 mi) high. Phase two was to create a satellite capable of making multiple inspections, with a **vertical range** up to 7,400 kilometers (4,600 mi) high. Phase three was to create a satellite that could destroy other satellites, based on the platform of the satellite of phase two.

P2: The project was broken into three phases. Phase one was to create a satellite that could meet and inspect another satellite of 1 square meter (11 sq ft) radar cross-section that was in orbit at up to 740 kilometers (460 mi) high. Phase two was to create a satellite capable of making multiple inspections, with a **perpendicular ceiling** up to 7,400 kilometers (4,600 mi) high. Phase three was to create a satellite that could destroy other satellites, based on the platform of the satellite of phase two.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **vertical range** and **perpendicular ceiling** interchangeable (i.e., having the same meaning)?

Pair 2052

P1: The best characterized endonucleases which are most widely used in research and genome engineering include I-SceI (discovered in the mitochondria of baker's yeast "Saccharomyces cerevisiae"), I-CreI (from the chloroplasts of the green algae "Chlamydomonas reinhardtii") and I-DmoI (from the archaebacterium "Desulfurococcus mobilis"). The best known LAGLIDADG endonucleases are homodimers (for example I-CreI, composed of two copies of the same protein domain) or internally symmetrical monomers (I-SceI). The DNA binding site, which contains the catalytic domain, is composed of two parts on **either side** of the cutting point. The half-binding sites can be extremely similar and bind to a palindromic or semi-palindromic DNA sequence (I-CreI), or they can be non-palindromic (I-SceI).

P2: The best characterized endonucleases which are most widely used in research and genome engineering include I-SceI (discovered in the mitochondria of baker's yeast "Saccharomyces cerevisiae"), I-CreI (from the chloroplasts of the green algae "Chlamydomonas reinhardtii") and I-DmoI (from the archaebacterium "Desulfurococcus mobilis"). The best known LAGLIDADG endonucleases are homodimers (for example I-CreI, composed of two copies of the same protein domain) or internally symmetrical monomers (I-SceI). The DNA binding site, which contains the catalytic domain, is composed of two parts on **two opposite parts** of the cutting point. The half-binding sites can be extremely similar and bind to a palindromic or semi-palindromic DNA sequence (I-CreI), or they can be non-palindromic (I-SceI).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **either side** and **two opposite parts** interchangeable (i.e., having the same meaning)?

Pair 2053

P1: He was an alternate on the U.S. men's Olympic figure skating team. Serious tendonitis in both of his knees and a motorcycle accident forced him to turn professional. Bradshaw was the **first figure** skater to successfully perform a double axel jump initiated and performed with the arms folded in competition. This variation of the Axel requires significant height to be able to complete the rotations, rather than the more common technique of performing a lower jump with very fast rotation generated by pulling the arms into the body.

P2: He was an alternate on the U.S. men's Olympic figure skating team. Serious tendonitis in both of his knees and a motorcycle accident forced him to turn professional. Bradshaw was the **inaugural person** skater to successfully perform

a double axel jump initiated and performed with the arms folded in competition. This variation of the Axel requires significant height to be able to complete the rotations, rather than the more common technique of performing a lower jump with very fast rotation generated by pulling the arms into the body.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **first figure** and **inaugural person** interchangeable (i.e., having the same meaning)?

Pair 2054

P1: It was completed in 1917 for a total cost of £1 million. Construction employed 500 or more men at the time. In mid-November 1917 construction started on two water tanks due to the **insufficient amount** of bore water available on the site. Of the six bores onsite only four worked, and they were not producing enough to meet the demands of the meatworks and fill the giant tank, which had a capacity of almost 5 million gallons (18.92 million litres).

P2: It was completed in 1917 for a total cost of £1 million. Construction employed 500 or more men at the time. In mid-November 1917 construction started on two water tanks due to the **not enough supply** of bore water available on the site. Of the six bores onsite only four worked, and they were not producing enough to meet the demands of the meatworks and fill the giant tank, which had a capacity of almost 5 million gallons (18.92 million litres).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **insufficient amount** and **not enough supply** interchangeable (i.e., having the same meaning)?

Pair 2055

P1: The critic also said the film was thought-provoking, not only about its heartwarming but "disturbing" theme, but from its being produced by students. "Reel-News" said that the direction was excellent and the acting was livened by its young stars. A review by "Screen India" stated that the **unusual part** of the film was its lack of usage of "the usual box-office devices." Reviewers from the South also praised the film.

P2: The critic also said the film was thought-provoking, not only about its heartwarming but "disturbing" theme, but from its being produced by students. "Reel-News" said that the direction was excellent and the acting was livened by its young stars. A review by "Screen India" stated that the **weird section** of the film was its lack of usage of "the usual box-office devices." Reviewers from the South also praised the film.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **unusual part** and **weird section** interchangeable (i.e., having the same meaning)?

Pair 2056

P1: Plot. The film is about a family on vacation. After 11 years of **continuous work**, Alex Peinado decides to spend a well earned holiday with his family. He goes on a road trip towards Cartagena, with his wife, his mother in law, his two teenage children and his dog Kaiser.

P2: Plot. The film is about a family on vacation. After 11 years of **non-stop labor**, Alex Peinado decides to spend a well earned holiday with his family. He goes on a road trip towards Cartagena, with his wife, his mother in law, his two teenage children and his dog Kaiser.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **continuous work** and **non-stop labor** interchangeable (i.e., having the same meaning)?

Pair 2057

P1: The new Delta offers a number of options and equipment including a Bose Hi-Fi radio incorporating a CD player and MP3 file reader with steering-wheel mounted controls, the Blue&Me system developed with Microsoft, and a new satellite navigation system developed with Magneti Marelli. Further technical equipment included to effect the ride and handling will include an advanced ESC (Electronic Stability Control) system and SDC suspension (with electronic damping control, also by Magneti Marelli). **The new delta also has a driving assistant featuring electric eye monitors that give feedback to the steering wheel to suggest corrections to the driver.** The car is available also with semi-automatic parking assistant.

P2: The new Delta offers a number of options and equipment including a Bose Hi-Fi radio incorporating a CD player and MP3 file reader with steering-wheel mounted controls, the Blue&Me system developed with Microsoft, and a new satellite navigation system developed with Magneti Marelli. Further technical equipment included to effect the ride and handling will include an advanced ESC (Electronic Stability Control) system and SDC suspension (with electronic damping control, also by Magneti Marelli). **The Lancia car also has a driving assistant featuring electric eye monitors that give feedback to the steering wheel to suggest corrections to the driver.** The car is available also with semi-automatic parking assistant.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **new delta** and **Lancia car** interchangeable (i.e., having the same meaning)?

Pair 2058

P1: Even his wife (Kaviyoor Ponnamma) and son (Vineeth) are secondary when it comes to that. In his quest for revenge, he bullies anyone and anything who dares to stand up to him. **Despite being uneducated during changes around him, he manages his empire with his wit and ruthless efficiency.** He plans to exact his ultimate vengeance by starting an illicit Arrack business in the kovilakam.

P2: Even his wife (Kaviyoor Ponnamma) and son (Vineeth) are secondary when it comes to that. In his quest for revenge, he bullies anyone and anything who dares to stand up to him. **Despite being uneducated during changes around him, he manages his empire with his wit and constant competence.** He plans to exact his ultimate vengeance by starting an illicit Arrack business in the kovilakam.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **ruthless efficiency** and **constant competence** interchangeable (i.e., having the same meaning)?

Pair 2059

P1: About three minutes later, two men approached them in the driveway, out of the view of Kyle's other guests. The man Eberhart identified as Anderson was wearing a green and orange Miami Hurricanes Starter jacket, and demanded money while pointing a gun at Eberhart's neck. **Eberhart slowly reached under the car seat for his wallet and handed \$15 to Anderson.** At that time, Dennis, whom Eberhart described as wearing a long, three-quarter-length dark coat, asked Kyle for money.

P2: About three minutes later, two men approached them in the driveway, out of the view of Kyle's other guests. The man Eberhart identified as Anderson was wearing a green and orange Miami Hurricanes Starter jacket, and demanded money while pointing a gun at Eberhart's neck. **Eberhart slowly reached under the sedan chair for his wallet and handed \$15 to Anderson.** At that time, Dennis, whom Eberhart described as wearing a long, three-quarter-length dark coat, asked Kyle for money.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **car seat** and **sedan chair** interchangeable (i.e., having the same meaning)?

Pair 2060

P1: They are ergonomic and have a rigid handle. Car safety harnesses. Safety harnesses were designed to restrain the animal in a car seat using the car's seat belt. In the event of an accident the harness distributes the pulling force.

P2: They are ergonomic and have a rigid handle. Car safety harnesses. Safety harnesses were designed to restrain the animal in a vehicle bench using the car's seat belt. In the event of an accident the harness distributes the pulling force.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are car seat and vehicle bench interchangeable (i.e., having the same meaning)?

Pair 2061

P1: Barden Inlet is the southernmost of the Outer Banks water inlets. Located just northwest of Cape Lookout in the U.S. state of North Carolina, the inlet connects Onslow Bay of the Atlantic Ocean with core sound. It separates the Shackleford Banks from the Core Banks.

P2: Barden Inlet is the southernmost of the Outer Banks water inlets. Located just northwest of Cape Lookout in the U.S. state of North Carolina, the inlet connects Onslow Bay of the Atlantic Ocean with water inlet. It separates the Shackleford Banks from the Core Banks.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are core sound and water inlet interchangeable (i.e., having the same meaning)?

Pair 2062

P1: In Robert Stockman's review of early Bahá'í history in America the "most startling" discovery of the group was that Abdu'l-Bahá contradicted Kheiralla's views on reincarnation but the stance of the religion on the idea was still not fully understood: Edward now understood that rather than his own soul being a reincarnation there were guardian angels who could "become as one in thought and volition" with the believer and in particular his own such angel was the Apostle John just as Kheiralla's was the Apostle Peter - this was a misunderstanding which became clarified in time. Circa April on returning to 'Akká Lua cried tears of happiness during a late morning Tea given by Abdu'l-Bahá. He kept alluding from a material example to a deed to be carried out in a certain spirit. He gave her honey dipped bread and asked her to speak with 'words of honey' and washed her face after the meal and urged her to 'wash faces with love'.

P2: In Robert Stockman's review of early Bahá'í history in America the "most startling" discovery of the group was that Abdu'l-Bahá contradicted Kheiralla's views on reincarnation but the stance of the religion on the idea was still not fully understood: Edward now understood that rather than his own soul being a reincarnation there were guardian angels who could "become as one in thought and volition" with the believer and in particular his own such angel was the Apostle John just as Kheiralla's was the Apostle Peter - this was a misunderstanding which became clarified in time. Circa April on returning to 'Akká Lua cried tears of happiness during a late morning Tea given by Abdu'l-Bahá. He kept alluding from a concrete object to a deed to be carried out in a certain spirit. He gave her honey dipped bread and asked her to speak with 'words of honey' and washed her face after the meal and urged her to 'wash faces with love'.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are material example and concrete object interchangeable (i.e., having the same meaning)?

Pair 2063

P1: For example, depending on the betting structure, a tournament might be described as no-limit, limit, or pot-limit. Games may include other variations on the rules governing the execution of the specific game such as shootout, eight or better, or heads up. With 54,288 total entries and a combined prize pool of \$159,796,918, the 2007 WSOP was the largest series of poker tournaments ever. For many, winning a share of the prize pool was all that mattered, while

others sought the glory associated with winning a bracelet.

P2: For example, depending on the betting structure, a tournament might be described as no-limit, limit, or pot-limit. With 54,288 total entries and a combined prize pool of \$159,796,918, the 2007 WSOP was the biggest group of poker tournaments ever. For many, winning a share of the prize pool was all that mattered, while others sought the glory associated with winning a bracelet.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are largest series and biggest group interchangeable (i.e., having the same meaning)?

Pair 2064

P1: For example, above the Tropic of Cancer, the sun will always be South at its zenith (highest point) so short shadows will point North. Animals tend to incorporate several types of navigation techniques, like magnetic orientation and landmarks, to their repertoire in order to perform normal navigation or to migrate. When animals use the sun for compass orientation, they must compensate for the apparent movement of the sun with the help of their internal clock. Animals associate the sun azimuth with time of day provided by their internal clock and a reference direction provided by their magnetic compass.

P2: For example, above the Tropic of Cancer, the sun will always be South at its zenith (highest point) so short shadows will point North. Animals tend to incorporate several types of navigation techniques, like magnetic orientation and landmarks, to their repertoire in order to perform normal navigation or to migrate. When animals use the sun for compass orientation, they must compensate for the visual change of the sun with the help of their internal clock. Animals associate the sun azimuth with time of day provided by their internal clock and a reference direction provided by their magnetic compass.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are apparent movement and visual change interchangeable (i.e., having the same meaning)?

Pair 2065

P1: Self-mentors are devoted and passionate in sustaining their success. A sense of accomplishment is motivational enough for them to continue their endeavor and maintain personal empowerment and self-efficacy. Beckford (2012) agrees with the influence of self-mentoring to one's position of personal power and ownership. Self-mentoring strengthens the existing culture in an organization.

P2: Self-mentors are devoted and passionate in sustaining their success. A sense of accomplishment is motivational enough for them to continue their endeavor and maintain personal empowerment and self-efficacy. Beckford (2012) agrees with the influence of self-mentoring to one's position of individual capability and ownership. Self-mentoring strengthens the existing culture in an organization.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are personal power and individual capability interchangeable (i.e., having the same meaning)?

Pair 2066

P1: Topology. 1905.1 provides a tool to get a global view of the network topology regardless of the technologies running in the home/office network. The Abstraction Layer generates different "topology messages" to build this protocol's topology: The group address used for Discovery and Notification messages is 01:80:c2:00:00:13. To detect a non-1905.1 bridge connected between two 1905.1 devices, the Abstraction Layer also generates a LLDP message with the nearest bridge address (01:80:c2:00:00:0e) that is not propagated by 802.1D bridges.

P2: Topology. 1905.1 provides a tool to get a global view of the network topology regardless of the technologies running in the home/office network. The Abstraction Layer generates different "topology messages" to build this protocol's topology: The overall location used for Discovery and Notification messages is 01:80:c2:00:00:13. To detect a non-1905.1 bridge connected between two 1905.1 devices, the Abstraction Layer also generates a LLDP message with the nearest bridge address (01:80:c2:00:00:0e) that is not propagated by 802.1D bridges.

Question: In both passages, are group address and overall location interchangeable (i.e., having the same meaning)?

Pair 2067

P1: In response to this, the New Zealand Parliament passing the Republic of Ireland Act the following year, which treated Ireland as if it were still a member of the Commonwealth. Meanwhile, newly independent India would have to leave the Commonwealth on becoming a republic also, although it was the Indian Prime Minister's view that India should remain a member of the Commonwealth as a republic. Fraser believed that the Commonwealth could as a group address the evils of colonialism and maintain the solidarity of common defence. To Fraser, the acceptance of India as a republican member would threaten the political unity of the Commonwealth.

P2: In response to this, the New Zealand Parliament passing the Republic of Ireland Act the following year, which treated Ireland as if it were still a member of the Commonwealth. Meanwhile, newly independent India would have to leave the Commonwealth on becoming a republic also, although it was the Indian Prime Minister's view that India should remain a member of the Commonwealth as a republic. Fraser believed that the Commonwealth could as a whole tackle the evils of colonialism and maintain the solidarity of common defence. To Fraser, the acceptance of India as a republican member would threaten the political unity of the Commonwealth.

Question: In both passages, are **system changes** and **state changes** interchangeable (i.e., having the same meaning)?

Pair 2070

P1: Critical response. The German nature of "Metzengerstein" and other stories in the collection "Tales of the Grotesque and Arabesque" was mentioned in a review by Joseph C. Neal in the "Pennsylvanian" on December 6, 1839: "These grotesque and arabesque delineations are full of variety, now irresistibly quaint and droll, and again marked with all the deep and painful interest of the German school". Rudyard Kipling was an admirer of Poe and once wrote, "My own personal debt to Poe is a **heavy one**". "Metzengerstein" was an inspiration to his story "The Phantom 'Rickshaw", where the main character is punished by the horse of someone he has murdered.

P2: Critical response. The German nature of "Metzengerstein" and other stories in the collection "Tales of the Grotesque and Arabesque" was mentioned in a review by Joseph C. Neal in the "Pennsylvanian" on December 6, 1839: "These grotesque and arabesque delineations are full of variety, now irresistibly quaint and droll, and again marked with all the deep and painful interest of the German school". Rudyard Kipling was an admirer of Poe and once wrote, "My own personal debt to Poe is a **considerable weight**". "Metzengerstein" was an inspiration to his story "The Phantom 'Rickshaw", where the main character is punished by the horse of someone he has murdered.

Pair 2086

P1: Those nanotube bundles can be mechanically manipulated by electricity and can be used to manipulate and transfer micro- and nano-structures. The nanotube bundles used for tweezers are about 50 nm in diameter and 2 μm in lengths. Under electric bias, **two close sets** of bundles are attracted and can be used as nanoscale tweezers. Nanotube on/off switches and random access memory.

P2: Those nanotube bundles can be mechanically manipulated by electricity and can be used to manipulate and transfer micro- and nano-structures. The nanotube bundles used for tweezers are about 50 nm in diameter and 2 μm in lengths. Under electric bias, **a pair of items** of bundles are attracted and can be used as nanoscale tweezers. Nanotube on/off switches and random access memory.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **two close sets** and **a pair of items** interchangeable (i.e., having the same meaning)?

Pair 2087

P1: Strand photographed "people hurrying to work past the banking building" situated on Wall Street, from which the photo takes its name. the subject depicted is a real-life subject without manipulation. **The depiction of the real nature of the medium and the subject is an example of straight photography.** There is no focal point, with the lines converging off of the frame of the image.

P2: Strand photographed "people hurrying to work past the banking building" situated on Wall Street, from which the photo takes its name. the subject depicted is a real-life subject without manipulation. **The depiction of the true extent of the medium and the subject is an example of straight photography.** There is no focal point, with the lines converging off of the frame of the image.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **real nature** and **true extent** interchangeable (i.e., having the same meaning)?

Pair 2088

P1: For instance, simply having plants in a lab can increase intrinsic aspirations, decrease extrinsic aspirations, and encourage more generous decision making. These effects were also mediated by nature connectedness and autonomy. **Also, virtual nature has been found to provide some psychological benefits (but not as much as real nature).** These studies demonstrate the positive relationship between nature exposure, feeling connected to nature, and subjective well-being.

P2: For instance, simply having plants in a lab can increase intrinsic aspirations, decrease extrinsic aspirations, and encourage more generous decision making. These effects were also mediated by nature connectedness and autonomy. **Also, virtual nature has been found to provide some psychological benefits (but not as much as actual surroundings).** These studies demonstrate the positive relationship between nature exposure, feeling connected to nature, and subjective well-being.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **real nature** and **actual surroundings** interchangeable (i.e., having the same meaning)?

Pair 2089

P1: The out-and-back course meant that the riders had a tailwind on the first half of the course and a headwind on the second. The early benchmark time was set by Daniel Oss (), who completed the course in 6' 08". A good time was also set by Peter Sagan (), whose time was 6' 10" and who was the best young rider in the stage. Sagan did well to set such a good time, since he hit a pavement early in his ride and nearly fell.

P2: The out-and-back course meant that the riders had a tailwind on the first half of the course and a headwind on the second. The early benchmark time was set by Daniel Oss (), who completed the course in 6' 08". A good time was also set by Peter Sagan (), personal record was 6' 10" and who was the best young rider in the stage. Sagan did well to set such a good time, since he hit a pavement early in his ride and nearly fell.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are whose time and personal record interchangeable (i.e., having the same meaning)?

Pair 2090

P1: Willy van der Kuijlen currently holds the record for the most league appearances and the most league goals. He played 528 matches and scored 308 goals between 1964 and 1981. Willy van de Kerkhof played the second-highest amount of league matches for PSV; he appeared in 418 Eredivisie fixtures. The second-highest goal scorer for PSV is Coen Dillen, with 288 goals.

P2: Willy van der Kuijlen currently holds the record for the most league appearances and the most league goals. He played 528 matches and scored 308 goals between 1964 and 1981. Willy van de Kerkhof played the next in order measure of league matches for PSV; he appeared in 418 Eredivisie fixtures. The second-highest goal scorer for PSV is Coen Dillen, with 288 goals.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are second-highest amount and next in order measure interchangeable (i.e., having the same meaning)?

Pair 2091

P1: The Turks, lacking anti-aircraft weapons, were the first to shoot down an airplane by rifle fire. The earliest military role filled by aircraft was reconnaissance, however, by the end of World War I, military aviation had rapidly embraced many specialized roles, such as artillery spotting, air superiority, bombing, ground attack, and anti-submarine patrols. Technological improvements were made at a frenzied pace, and the first all-metal cantilevered airplanes were going into service as the war ended. Between the major world wars incremental improvements made in many areas, especially powerplants, aerodynamics, structures, and weapons, led to an even more rapid advance in aircraft technology during World War II, with large performance increases and the introduction of aircraft into new roles, including Airborne Early Warning, electronic warfare, weather reconnaissance, and flying lifeboats.

P2: The Turks, lacking anti-aircraft weapons, were the first to shoot down an airplane by rifle fire. The earliest military role filled by aircraft was reconnaissance, however, by the end of World War I, military aviation had rapidly embraced many specialized roles, such as artillery spotting, air superiority, bombing, ground attack, and anti-submarine patrols. Technological improvements were made at a frantic rate, and the first all-metal cantilevered airplanes were going into service as the war ended. Between the major world wars incremental improvements made in many areas, especially powerplants, aerodynamics, structures, and weapons, led to an even more rapid advance in aircraft technology during World War II, with large performance increases and the introduction of aircraft into new roles, including Airborne Early Warning, electronic warfare, weather reconnaissance, and flying lifeboats.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are frenzied pace and frantic rate interchangeable (i.e., having the same meaning)?

Pair 2092

P1: There, Dr. Roth (Max Grodénchik) explains to Thomas that Cat’s weapon (the “phut BOOM” gun) and her bracelet (the “geosynchronator”) have an unusual mixture of organic and technological properties, and don’t appear to have been designed for human hands. Thomas is brought to Cat, who is being detained; and he gives her back her bracelet, which allows one of the dark-clad beings, Thane (Robert Knepper) to track her. **Cat escapes the holding facility with Thomas’ help, and together the two drive towards a “door”.** Cat explains that Thane is chasing her and that, unless they reach the “door” before it closes, she will be trapped and killed by Thane.

P2: There, Dr. Roth (Max Grodénchik) explains to Thomas that Cat’s weapon (the “phut BOOM” gun) and her bracelet (the “geosynchronator”) have an unusual mixture of organic and technological properties, and don’t appear to have been designed for human hands. Thomas is brought to Cat, who is being detained; and he gives her back her bracelet, which allows one of the dark-clad beings, Thane (Robert Knepper) to track her. **Cat escapes the detention center with Thomas’ help, and together the two drive towards a “door”.** Cat explains that Thane is chasing her and that, unless they reach the “door” before it closes, she will be trapped and killed by Thane.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **holding facility** and **detention center** interchangeable (i.e., having the same meaning)?

Pair 2093

P1: Eventually, a wide array of hues became available. Carbon tissue was a stock item in Europe and the US well into the 20th century, but by the 1950s carbon printing was very rare and supplies for it became an exotic specialty item. **Some companies produced small quantities of carbon tissue and transfer papers for monochrome and three-color work until around 1990.** Overview and history of carbon printing.

P2: Eventually, a wide array of hues became available. Carbon tissue was a stock item in Europe and the US well into the 20th century, but by the 1950s carbon printing was very rare and supplies for it became an exotic specialty item. **Some companies produced small quantities of carbon tissue and carbon copies for monochrome and three-color work until around 1990.** Overview and history of carbon printing.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **transfer papers** and **carbon copies** interchangeable (i.e., having the same meaning)?

Pair 2094

P1: The centralized police system steadily acquired responsibilities, until it controlled almost all aspects of daily life, including fire prevention and mediation of labor disputes. The system regulated public health, business, factories, and construction, and it issued permits and licenses. **The Peace Preservation Law of 1925 gave police the authority to arrest people for “wrong thoughts”.** Special Higher Police (Tokko) were created to regulate the content of motion pictures, political meetings, and election campaigns.

P2: The centralized police system steadily acquired responsibilities, until it controlled almost all aspects of daily life, including fire prevention and mediation of labor disputes. The system regulated public health, business, factories, and construction, and it issued permits and licenses. **The Peace Preservation Law of 1925 gave police the authority to arrest people for “incorrect character”.** Special Higher Police (Tokko) were created to regulate the content of motion pictures, political meetings, and election campaigns.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **wrong thoughts** and **incorrect character** interchangeable (i.e., having the same meaning)?

Pair 2095

P1: Sylvan revealed the inspiration behind the song on his Twitter following its release. I wrote "Fall From Grace" at the lowest time of my life last year...That song is all about asking God to save me from myself. **Imagine feeling invincible & knowing you're doing all the wrong things & thinking all the wrong thoughts.** That's what "Fall From Grace" is.

P2: Sylvan revealed the inspiration behind the song on his Twitter following its release. I wrote "Fall From Grace" at the lowest time of my life last year...That song is all about asking God to save me from myself. **Imagine feeling invincible & knowing you're doing all the wrong things & thinking all the false sentiments.** That's what "Fall From Grace" is.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **wrong thoughts** and **false sentiments** interchangeable (i.e., having the same meaning)?

Pair 2096

P1: Spellings of this word also vary. Powers of a weroance. **Paramount chiefs let their district and subordinate weroances make the final decision on how to handle a hostile situation.** This was made apparent with the events that took place in 1607 and the hostility with the newcomers (English settlers).

P2: Spellings of this word also vary. Powers of a weroance. **Paramount chiefs let their district and subordinate weroances make the final decision on how to handle a dangerous confrontation.** This was made apparent with the events that took place in 1607 and the hostility with the newcomers (English settlers).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **hostile situation** and **dangerous confrontation** interchangeable (i.e., having the same meaning)?

Pair 2097

P1: Today, Standard & Poor's, Moody's, and Risk Management Association can all provide banks with industry ratios. The univariate approach enables an analyst starting an inquiry to determine whether a particular ratio for a potential borrower differs markedly from the norm for its industry. **In reality, however, the unsatisfactory level of one ratio is frequently mitigated by the strength of some other measure.** A firm, for example, may have a poor profitability ratio but an above-average liquidity ratio.

P2: Today, Standard & Poor's, Moody's, and Risk Management Association can all provide banks with industry ratios. The univariate approach enables an analyst starting an inquiry to determine whether a particular ratio for a potential borrower differs markedly from the norm for its industry. **In reality, however, the unsuitable degree of one ratio is frequently mitigated by the strength of some other measure.** A firm, for example, may have a poor profitability ratio but an above-average liquidity ratio.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **unsatisfactory level** and **unsuitable degree** interchangeable (i.e., having the same meaning)?

Pair 2098

P1: The composition of this painting is highly stylised. Picasso used bright colours and bold lines to convey the figure in a complex series of angular shapes and planes. **Despite its abstract nature, the model for this portrait can be identified as Dora Maar, Picasso's lover."** Roland Penrose, commented on the use of colour in the painting in his biography of Picasso, "The result of using colour in a manner so totally unassociated with grief, for a face in which sorrow is evident in every line, is highly disconcerting.

P2: The composition of this painting is highly stylised. Picasso used bright colours and bold lines to convey the figure in a complex series of angular shapes and planes. **Despite its transcendent essence, the model for this portrait can be identified as Dora Maar, Picasso's lover**” Roland Penrose, commented on the use of colour in the painting in his biography of Picasso, ”The result of using colour in a manner so totally unassociated with grief, for a face in which sorrow is evident in every line, is highly disconcerting.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **abstract nature** and **transcendent essence** interchangeable (i.e., having the same meaning)?

Pair 2099

P1: For example, while most XML Document Type Definitions utilize left and right angle brackets as content delimiters, strictly speaking this is not a necessity (though a delimiter should be terse and concise). The left and right angle bracket codes are a convention, albeit clear and distinctive, not an absolute requirement. **The concept of well-formed document also allows for the comprehension of the abstract nature of XML.** In reality, there is no such thing as XML.

P2: For example, while most XML Document Type Definitions utilize left and right angle brackets as content delimiters, strictly speaking this is not a necessity (though a delimiter should be terse and concise). The left and right angle bracket codes are a convention, albeit clear and distinctive, not an absolute requirement. **The concept of well-formed document also allows for the comprehension of the conceptual quality of XML.** In reality, there is no such thing as XML.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **abstract nature** and **conceptual quality** interchangeable (i.e., having the same meaning)?

Pair 2100

P1: Nations differ on the political structure and policy options that govern the transfer of wealth. According to the American federal government statistics compiled by Mark Zandi in 1985, the average US inheritance was \$39,000. **In subsequent years, the overall amount of total annual inheritance more than doubled, reaching nearly \$200 billion.** By 2050, there will be an estimated \$25 trillion inheritance transmitted across generations.

P2: Nations differ on the political structure and policy options that govern the transfer of wealth. According to the American federal government statistics compiled by Mark Zandi in 1985, the average US inheritance was \$39,000. **In subsequent years, the sweeping rate of total annual inheritance more than doubled, reaching nearly \$200 billion.** By 2050, there will be an estimated \$25 trillion inheritance transmitted across generations.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **overall amount** and **sweeping rate** interchangeable (i.e., having the same meaning)?

Pair 2101

P1: Creative Expansions, Inc.. Lerner is the CEO of Creative Expansions, Inc., a multi-media company targeted at women and girls. Since its conception in 1994, Lerner has produced and hosted over twenty televised specials under Creative Expansions, Inc. Lerner's website for career women, WomenWorking.com, is the most active medium under the company's umbrella. **Lerner stars in and produces three online miniseries on YouTube, including "Unapologetically Honest", "career advice 101", and "Lifestyle Hacks."** Recent work.

P2: Creative Expansions, Inc.. Lerner is the CEO of Creative Expansions, Inc., a multi-media company targeted at women and girls. Since its conception in 1994, Lerner has produced and hosted over twenty televised specials under Creative Expansions, Inc. Lerner's website for career women, WomenWorking.com, is the most active medium under the company's umbrella. **Lerner stars in and produces three online miniseries on YouTube, including "Unapologetically Honest", "online episode 101", and "Lifestyle Hacks."** Recent work.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **career advice** and **online episode** interchangeable (i.e., having the same meaning)?

Pair 2102

P1: IFYC's Campus Partnerships department works directly with college faculty and staff to productively engage religious diversity on individual campuses. The organization offers three kinds of engagements: outreach engagements, deep engagements, and model campus engagements. **Outreach engagements, which typically last one or two days, introduce campus staff to IFYC's programs and methodology.** With six-month to year-long deep engagements, IFYC staff work with campus staff to build a community "ecology" that supports interfaith cooperation by targeting one sector of campus life (e.g., the freshman class, the interfaith center, etc.).

P2: IFYC's Campus Partnerships department works directly with college faculty and staff to productively engage religious diversity on individual campuses. The organization offers three kinds of engagements: outreach engagements, deep engagements, and model campus engagements. **Outreach engagements, which typically last at least a day, introduce campus staff to IFYC's programs and methodology.** With six-month to year-long deep engagements, IFYC staff work with campus staff to build a community "ecology" that supports interfaith cooperation by targeting one sector of campus life (e.g., the freshman class, the interfaith center, etc.).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one or two days** and **at least a day** interchangeable (i.e., having the same meaning)?

Pair 2103

P1: When children are closely related to the context of the endeavor as active participants, coordination is based on a shared reference, which helps to allow, maintain, and promote nonverbal communication. The idea of "context-embeddedness" allows nonverbal communication to be a means of learning within Native American Alaskan Athabaskans and Cherokee communities. **By observing various family and community social interactions, social engagement is dominated through nonverbal communication.** For example, when children elicit thoughts or words verbally to their elders, they are expected to structure their speech carefully.

P2: When children are closely related to the context of the endeavor as active participants, coordination is based on a shared reference, which helps to allow, maintain, and promote nonverbal communication. The idea of "context-embeddedness" allows nonverbal communication to be a means of learning within Native American Alaskan Athabaskans and Cherokee communities. **By observing several relative and community social interactions, social engagement is dominated through nonverbal communication.** For example, when children elicit thoughts or words verbally to their elders, they are expected to structure their speech carefully.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **various family** and **several relative** interchangeable (i.e., having the same meaning)?

Pair 2104

P1: The appellate court rejected the plaintiff's argument and found no liability on the part of Matchmaker. The court found that Matchmaker is not an "information content provider," but rather an "interactive computer service" which allows the public to post information on its Web site. **Under the Communications Decency Act, "interactive computer services" do not incur liability because users create the actual content.** Thus liability rests with the underlying contributor, not the interactive computer service.

P2: The appellate court rejected the plaintiff's argument and found no liability on the part of Matchmaker. The court found that Matchmaker is not an "information content provider," but rather an "interactive computer service" which allows the public to post information on its Web site. **Under the Communications Decency Act, "interactive computer services" do not incur liability because users create the real product.** Thus liability rests with the underlying contributor, not the interactive computer service.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **actual content** and **real product** interchangeable (i.e., having the same meaning)?

Pair 2105

P1: As for Fergus, the union bound Galloway more tightly to a neighbouring kingdom from which an invasion had been launched during the overlordship of Magnús Ólafsson, King of Norway. The alliance with Óláfr also ensured Fergus the protection of one of Britain's most formidable fleets, and further gave him a valuable ally outwith the orbit of the Scottish Crown. **one possible reason** for Fergus's apparent lack of further participation in Anglo-Scottish affairs may have been **due to events in the Isles**. Although the thirteenth- to fourteenth-century "Chronicle of Mann" portrays Óláfr's reign as one of tranquillity, a more accurate evaluation of his reign may be that he adeptly managed to navigate an uncertain political climate.

P2: As for Fergus, the union bound Galloway more tightly to a neighbouring kingdom from which an invasion had been launched during the overlordship of Magnús Ólafsson, King of Norway. The alliance with Óláfr also ensured Fergus the protection of one of Britain's most formidable fleets, and further gave him a valuable ally outwith the orbit of the Scottish Crown. **a single argument** for Fergus's apparent lack of further participation in Anglo-Scottish affairs may have been **due to events in the Isles**. Although the thirteenth- to fourteenth-century "Chronicle of Mann" portrays Óláfr's reign as one of tranquillity, a more accurate evaluation of his reign may be that he adeptly managed to navigate an uncertain political climate.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one possible reason** and **a single argument** interchangeable (i.e., having the same meaning)?

Pair 2106

P1: Florence Winger Bagley was one of the early investigators of this phenomenon. The perceptual mechanism of Fechner color is not entirely understood. **one possible reason** people see colors may be that the color receptors in the human eye respond at different rates to red, green, and blue. Or, more specifically, that the latencies of the center and the surrounding mechanisms differ for the different types of color-specific ganglion cells.

P2: Florence Winger Bagley was one of the early investigators of this phenomenon. The perceptual mechanism of Fechner color is not entirely understood. **a potential rationale** people see colors may be that the color receptors in the human eye respond at different rates to red, green, and blue. Or, more specifically, that the latencies of the center and the surrounding mechanisms differ for the different types of color-specific ganglion cells.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one possible reason** and **a potential rationale** interchangeable (i.e., having the same meaning)?

Pair 2107

P1: HM hired armed lugger "Aristocrat". On her first contract, "Aristocrat" served from 2 November 1794 to 9 December 1798. **The owner and original master** of the vessel was a Mr. Henry Wilkins. She was armed with four 6-pounder and eight 4-pounder guns.

P2: HM hired armed lugger "Aristocrat". On her first contract, "Aristocrat" served from 2 November 1794 to 9 December 1798. **The owner and first owner** of the vessel was a Mr. Henry Wilkins. She was armed with four 6-pounder and eight 4-pounder guns.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **original master** and **first owner** interchangeable (i.e., having the same meaning)?

Pair 2108

P1: Exhibits, educational programs and special events. This living history museum, which is part of the Pennsylvania State Museum system, celebrates the many inventions developed in Pennsylvania's Lancaster County region, birthplace of the Conestoga wagon and the Pennsylvania longrifle (also known as the Kentucky longrifle). Visitors are able to learn how Conestoga Wagons were made, including the **critical process** of making spoked wheels, and how 18th-century gunsmiths manufactured rifle barrels. In addition, guides dressed in period costumes explain the traditions and folklore of Pennsylvania Germans who resided in the area between 1740 and 1940 while specially trained artisans demonstrate the procedures for craftmaking and open-hearth cooking.

P2: Exhibits, educational programs and special events. This living history museum, which is part of the Pennsylvania State Museum system, celebrates the many inventions developed in Pennsylvania's Lancaster County region, birthplace of the Conestoga wagon and the Pennsylvania longrifle (also known as the Kentucky longrifle). Visitors are able to learn how Conestoga Wagons were made, including the **main operation** of making spoked wheels, and how 18th-century gunsmiths manufactured rifle barrels. In addition, guides dressed in period costumes explain the traditions and folklore of Pennsylvania Germans who resided in the area between 1740 and 1940 while specially trained artisans demonstrate the procedures for craftmaking and open-hearth cooking.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **critical process** and **main operation** interchangeable (i.e., having the same meaning)?

Pair 2109

P1: In some areas, there are purported "brujos" (Spanish for "witches") who masquerade as real shamans and who entice tourists to drink ayahuasca in their presence. Shamans believe one of the purposes for this is to steal one's energy and/or power, of which they believe every person has a limited stockpile. The shamans lead the ceremonial consumption of the ayahuasca beverage, in a rite that typically takes place over the **entire night**. During the ceremony, the effect of the drink lasts for hours.

P2: In some areas, there are purported "brujos" (Spanish for "witches") who masquerade as real shamans and who entice tourists to drink ayahuasca in their presence. Shamans believe one of the purposes for this is to steal one's energy and/or power, of which they believe every person has a limited stockpile. The shamans lead the ceremonial consumption of the ayahuasca beverage, in a rite that typically takes place over the **full evening**. During the ceremony, the effect of the drink lasts for hours.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **entire night** and **full evening** interchangeable (i.e., having the same meaning)?

Pair 2110

P1: The impact on wildlife stems primarily from disturbing, removing and redistributing the land surface. Some impacts are short-term and confined to the mine site however others have far-reaching, long-term effects. The most **direct effect** on wildlife is destruction or displacement of species in areas of excavation and spoil piling. Pit and spoil areas are not capable of providing food and cover for most species of wildlife.

P2: The impact on wildlife stems primarily from disturbing, removing and redistributing the land surface. Some impacts are short-term and confined to the mine site however others have far-reaching, long-term effects. The most **main consequence** on wildlife is destruction or displacement of species in areas of excavation and spoil piling. Pit and spoil areas are not capable of providing food and cover for most species of wildlife.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **direct effect** and **main consequence** interchangeable (i.e., having the same meaning)?

Pair 2111

P1: Each business process consists of two or more "subjects" which exchange "messages". Each subject has an "internal behavior" (capsulation), which is defined as a control flow between different states, which are "receive" and "send message" and "do something". For **practical usage** and for syntactical sugaring there are more elements available, but not necessary. In 2011 and 2012 S-BPM has been included in Gartner's Hype Cycle.

P2: Each business process consists of two or more "subjects" which exchange "messages". Each subject has an "internal behavior" (capsulation), which is defined as a control flow between different states, which are "receive" and "send message" and "do something". For **constructive purpose** and for syntactical sugaring there are more elements available, but not necessary. In 2011 and 2012 S-BPM has been included in Gartner's Hype Cycle.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **practical usage** and **constructive purpose** interchangeable (i.e., having the same meaning)?

Pair 2112

P1: In Finland, for example, dance is more advocated as part of the formal education in private sectors as opposed to Germany and Portugal. Australia and New Zealand. **The Australian Curriculum, Assessment and reporting authority has implemented a national dance curriculum.** Australia has also increased the number of generalist teachers to implement dance as part of their teaching techniques.

P2: In Finland, for example, dance is more advocated as part of the formal education in private sectors as opposed to Germany and Portugal. Australia and New Zealand. **The Australian Curriculum, Assessment and Australian curriculum has implemented a national dance curriculum.** Australia has also increased the number of generalist teachers to implement dance as part of their teaching techniques.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **reporting authority** and **Australian curriculum** interchangeable (i.e., having the same meaning)?

Pair 2113

P1: The home does not have a gas boiler, instead it uses a MVHR system to recycle heat from people and appliances. This means the home's small heating requirements can be satisfied entirely with renewable energy. **Citu supply all Citu Homes with 100% renewable energy via good energy, one of the UK's leading renewable electricity suppliers.** The homes timber framed design allows it to sequester several tonnes of CO₂ in the building's structure, whilst the fact it is powered by 100% renewable energy for all its energy needs (including heating) means people living in it can expect to reduce their carbon footprint by over two tonnes of CO₂ per year, as the average UK household emits 2.3 tonnes of CO₂ heating their home.

P2: The home does not have a gas boiler, instead it uses a MVHR system to recycle heat from people and appliances. This means the home's small heating requirements can be satisfied entirely with renewable energy. **Citu supply all Citu Homes with 100% renewable energy via renewable electricity supplier, one of the UK's leading renewable electricity suppliers.** The homes timber framed design allows it to sequester several tonnes of CO₂ in the building's structure, whilst the fact it is powered by 100% renewable energy for all its energy needs (including heating) means people living in it can expect to reduce their carbon footprint by over two tonnes of CO₂ per year, as the average UK household emits 2.3 tonnes of CO₂ heating their home.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **good energy** and **renewable electricity supplier** interchangeable (i.e., having the same meaning)?

Pair 2114

P1: Schroeder completed only 20 of 50 passes for a meager 3.8 yards per attempt. Keys to the victory were tackle Brad Benson's neutralizing of Redskins pass rusher Dexter Manley, who had 18.5 sacks on the season, and the team's defense. After the game, John Madden remarked: "Last year, I thought the Bears had the **best defense** I had ever seen. But in the last two weeks, I feel these Giants have as good a defense as has ever played in this league."

P2: Schroeder completed only 20 of 50 passes for a meager 3.8 yards per attempt. Keys to the victory were tackle Brad Benson's neutralizing of Redskins pass rusher Dexter Manley, who had 18.5 sacks on the season, and the team's defense. After the game, John Madden remarked: "Last year, I thought the Bears had the **greatest fortification** I had ever seen. But in the last two weeks, I feel these Giants have as good a defense as has ever played in this league."

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **best defense** and **greatest fortification** interchangeable (i.e., having the same meaning)?

Pair 2115

P1: The boxes used for this mission were converted luggage carriers obtained from the Air Transport Command. The smallest quantity of leaflets that could be released at one time using this method was about 350,000. Though this method of dissemination was **large scale**, it did not facilitate accuracy of where the leaflets would land. Leaflet bombs.

P2: The boxes used for this mission were converted luggage carriers obtained from the Air Transport Command. The smallest quantity of leaflets that could be released at one time using this method was about 350,000. Though this method of dissemination was **huge extent**, it did not facilitate accuracy of where the leaflets would land. Leaflet bombs.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **large scale** and **huge extent** interchangeable (i.e., having the same meaning)?

Pair 2116

P1: Environmental stress cracking may account for around 15-30% of all plastic component failures in service. This behavior is especially prevalent in glassy, amorphous thermoplastics. Amorphous polymers exhibit ESC because of their **loose structure** which makes it easier for the fluid to permeate into the polymer. Amorphous polymers are more prone to ESC at temperature higher than their glass transition temperature (T_g) due to the increased free volume.

P2: Environmental stress cracking may account for around 15-30% of all plastic component failures in service. This behavior is especially prevalent in glassy, amorphous thermoplastics. Amorphous polymers exhibit ESC because of their **flaccid design** which makes it easier for the fluid to permeate into the polymer. Amorphous polymers are more prone to ESC at temperature higher than their glass transition temperature (T_g) due to the increased free volume.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **loose structure** and **flaccid design** interchangeable (i.e., having the same meaning)?

Pair 2117

P1: He has authored or edited nearly twenty briefs prepared for the Supreme Court. Watford is an active member of the American Bar Association, serving as Co-Chair of the ABA Litigation Section's Appellate Practice Committee from 2005 to 2008 and as a member of the ABA's Amicus Curiae Committee from 2007 to 2010. From 2007 to 2009, he taught an **upper-level course** in judicial opinion writing at the University of Southern California's Gould School of Law. Since June 2012, he has served as treasurer and board member of Neighborhood Legal Services of Los Angeles County, a nonprofit providing pro bono legal services to the poor.

P2: He has authored or edited nearly twenty briefs prepared for the Supreme Court. Watford is an active member of the American Bar Association, serving as Co-Chair of the ABA Litigation Section's Appellate Practice Committee from 2005

to 2008 and as a member of the ABA's Amicus Curiae Committee from 2007 to 2010. From 2007 to 2009, he taught an exceptional class in judicial opinion writing at the University of Southern California's Gould School of Law. Since June 2012, he has served as treasurer and board member of Neighborhood Legal Services of Los Angeles County, a nonprofit providing pro bono legal services to the poor.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are upper-level course and exceptional class interchangeable (i.e., having the same meaning)?

Pair 2118

P1: Mail sources are motivated to make the answers yes, and it's easy for them to do so (unless their email flow is so toxic that no reputable independent accreditation service will vouch for them). CSV is designed to be efficient and elegant, and in this respect it certainly beats SPF's coverage of HELO identities. Client SMTP Authorization (CSA) was a proposed mechanism whereby a domain admin can advertise which mail servers are legitimate originators of mail from his/her domain. This is done by providing appropriate SRV RRs in the DNS infrastructure.

P2: Mail sources are motivated to make the answers yes, and it's easy for them to do so (unless their email flow is so toxic that no reputable independent accreditation service will vouch for them). CSV is designed to be efficient and elegant, and in this respect it certainly beats SPF's coverage of HELO identities. Client SMTP Authorization (CSA) was a suggested tool whereby a domain admin can advertise which mail servers are legitimate originators of mail from his/her domain. This is done by providing appropriate SRV RRs in the DNS infrastructure.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are proposed mechanism and suggested tool interchangeable (i.e., having the same meaning)?

Pair 2119

P1: In 1873, the Mohr couple permanently returned to Europe. They interceded on Miller's behalf at the Basel headquarters for the Home Committee to reduce her workload at the same salary. The home board rejected that idea saying a lighter teaching schedule would go with lower pay. Disappointed, Miller left the Basel Mission at the end of the 1873/4 year to work as an employee of the colonial government at the then newly opened Government Girls' School at Accra, where one of her colleagues was Caroline Svanikier (née Clerk), daughter of one of the West Indians, Alexander Worthy Clerk.

P2: In 1873, the Mohr couple permanently returned to Europe. They interceded on Miller's behalf at the Basel headquarters for the Home Committee to reduce her workload at the same salary. The housing commission rejected that idea saying a lighter teaching schedule would go with lower pay. Disappointed, Miller left the Basel Mission at the end of the 1873/4 year to work as an employee of the colonial government at the then newly opened Government Girls' School at Accra, where one of her colleagues was Caroline Svanikier (née Clerk), daughter of one of the West Indians, Alexander Worthy Clerk.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are home board and housing commission interchangeable (i.e., having the same meaning)?

Pair 2120

P1: The Protectorate Ordinances (passed in the Colony in 1896 and 1897) abolished the title of King and replaced it with "Paramount Chief". Chiefs and kings had formerly been selected by the leading members of their own communities; now all chiefs, even paramount ones, could be deposed or installed at the will of the Governor, and most of the judicial powers of the chiefs were removed and given to courts presided-over by British "District Commissioners". The Governor decreed that a house tax of 5"s" to 10"s" was to be levied annually on every dwelling in the Protectorate. To the chiefs,

these reductions in their power and prestige were unbearable.

P2: The Protectorate Ordinances (passed in the Colony in 1896 and 1897) abolished the title of King and replaced it with "Paramount Chief". Chiefs and kings had formerly been selected by the leading members of their own communities; now all chiefs, even paramount ones, could be deposed or installed at the will of the Governor, and most of the judicial powers of the chiefs were removed and given to courts presided-over by British "District Commissioners". **The Governor decreed that a house tax of 5"s" to 10"s" was to be levied annually on each abode in the Protectorate.** To the chiefs, these reductions in their power and prestige were unbearable.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **every dwelling** and **each abode** interchangeable (i.e., having the same meaning)?

Pair 2121

P1: Therefore, its scientific accuracy has been reassessed. Color rendering index is a metric for describing the appearance of a source and whether or not it is considered pleasing. **The color rendering index of a given source is a measure of that source's ability to faithfully reproduce colors of an object.** Light sources, like candles or incandescent light bulbs produce spectrums of electromagnetic energy that closely resemble Planckian black bodies; they look much like natural sources.

P2: Therefore, its scientific accuracy has been reassessed. Color rendering index is a metric for describing the appearance of a source and whether or not it is considered pleasing. **The color rendering index of a typical origin is a measure of that source's ability to faithfully reproduce colors of an object.** Light sources, like candles or incandescent light bulbs produce spectrums of electromagnetic energy that closely resemble Planckian black bodies; they look much like natural sources.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **given source** and **typical origin** interchangeable (i.e., having the same meaning)?

Pair 2122

P1: TMG has elaborate and detailed support for sources in a database format where a source can be referred to by any other record. In the GEDCOM database specification, sources can only refer to either a single individual or single family. **Because of GEDCOM's limitation, exporting a TMG database involves duplicating the sources into each place where a given source is used.** All of the information is exported, but the structure of each source is lost permanently.

P2: TMG has elaborate and detailed support for sources in a database format where a source can be referred to by any other record. In the GEDCOM database specification, sources can only refer to either a single individual or single family. **Because of GEDCOM's limitation, exporting a TMG database involves duplicating the sources into each place where a regular point is used.** All of the information is exported, but the structure of each source is lost permanently.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **given source** and **regular point** interchangeable (i.e., having the same meaning)?

Pair 2123

P1: In order to obtain physical results, these redundant degrees of freedom need to be discarded in a suitable way In Abelian gauge theory (i.e. in QED) it suffices to simply choose a gauge. **A popular one is the Lorenz gauge formula_1, which has the advantage of being Lorentz invariant.** In non-Abelian gauge theories (such as QCD) the situation is more complicated due to the more complex structure of the non-Abelian gauge group.

P2: In order to obtain physical results, these redundant degrees of freedom need to be discarded in a suitable way In Abelian gauge theory (i.e. in QED) it suffices to simply choose a gauge. **A famous thing is the Lorenz gauge formula_1, which has the advantage of being Lorentz invariant.** In non-Abelian gauge theories (such as QCD) the situation is more

complicated due to the more complex structure of the non-Abelian gauge group.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **popular one** and **famous thing** interchangeable (i.e., having the same meaning)?

Pair 2124

P1: He was approximately one year into his second term at the time of his assassination aboard EarthForce One, the "Babylon 5" equivalent of Air Force One, at the beginning of 2259. The incident occurs near the jump point off Io, one of Jupiter's moons. An **energy problem** with EarthForce One's jump engines is registered and the craft explodes live on ISN (the CNN of "Babylon 5's" universe). A slight suspicion of foul play is hinted at by the ISN feed.

P2: He was approximately one year into his second term at the time of his assassination aboard EarthForce One, the "Babylon 5" equivalent of Air Force One, at the beginning of 2259. The incident occurs near the jump point off Io, one of Jupiter's moons. An **efficiency issue** with EarthForce One's jump engines is registered and the craft explodes live on ISN (the CNN of "Babylon 5's" universe). A slight suspicion of foul play is hinted at by the ISN feed.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **energy problem** and **efficiency issue** interchangeable (i.e., having the same meaning)?

Pair 2125

P1: In 1998, Molok introduced a multi-compartment container suitable for sorting many waste fractions. The 1,200-liter container had three or four compartments and was also equipped with a separate biodegradable waste lifting container if needed. There was a separate lifting bag in each compartment and when the container was full, the **collection company** was notified by telephone. The pilot products were sold to Oulu.

P2: In 1998, Molok introduced a multi-compartment container suitable for sorting many waste fractions. The 1,200-liter container had three or four compartments and was also equipped with a separate biodegradable waste lifting container if needed. There was a separate lifting bag in each compartment and when the container was full, the **acquisition group** was notified by telephone. The pilot products were sold to Oulu.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **collection company** and **acquisition group** interchangeable (i.e., having the same meaning)?

Pair 2126

P1: Current research allows for the expansion of samples up to 16x larger than their initial size. This technique has been found useful in various laboratory settings, such as analyzing biological molecules. ExM allows researchers to use standard equipment in identifying small structures, but requires following of procedures in order to ensure **clear results**. Principles.

P2: Current research allows for the expansion of samples up to 16x larger than their initial size. This technique has been found useful in various laboratory settings, such as analyzing biological molecules. ExM allows researchers to use standard equipment in identifying small structures, but requires following of procedures in order to ensure **definite conclusions**. Principles.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **clear results** and **definite conclusions** interchangeable (i.e., having the same meaning)?

Pair 2127

P1: Sand bed filters are an example of a granular loose media depth filter. They are usually used to separate small amounts (<10 parts per million or <10 g per cubic metre) of fine solids (<100 micrometres) from aqueous solutions. In addition, they are usually used to purify the fluid rather than capture the solids as a **valuable material**. Therefore they find most of their uses in liquid effluent (wastewater) treatment.

P2: Sand bed filters are an example of a granular loose media depth filter. They are usually used to separate small amounts (<10 parts per million or <10 g per cubic metre) of fine solids (<100 micrometres) from aqueous solutions. In addition, they are usually used to purify the fluid rather than capture the solids as a **key element**. Therefore they find most of their uses in liquid effluent (wastewater) treatment.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **valuable material** and **key element** interchangeable (i.e., having the same meaning)?

Pair 2128

P1: As machinery for commercial applications has improved, parts are being spun with thicker materials in excess of 1in (25mm) thick steel. Conventional spinning also wastes a considerably smaller amount of material than other methods. Objects can be built using **one piece** of material to produce parts without seams. Without seams, a part can withstand higher internal or external pressure exerted on it.

P2: As machinery for commercial applications has improved, parts are being spun with thicker materials in excess of 1in (25mm) thick steel. Conventional spinning also wastes a considerably smaller amount of material than other methods. Objects can be built using **a bit** of material to produce parts without seams. Without seams, a part can withstand higher internal or external pressure exerted on it.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one piece** and **a bit** interchangeable (i.e., having the same meaning)?

Pair 2129

P1: During the 2009/2010 winter storm season, there was severe damage to the beaches, mangroves and residential areas from here to Paraíso. This included flooding of the Del Carmen-Pajonal-Machona lagoon system, which damaged 104 houses and eroded three km of beaches. In 2010, the state employed foreign experts, principally from the Netherlands to study the **erosion problem**. Economy.

P2: During the 2009/2010 winter storm season, there was severe damage to the beaches, mangroves and residential areas from here to Paraíso. This included flooding of the Del Carmen-Pajonal-Machona lagoon system, which damaged 104 houses and eroded three km of beaches. In 2010, the state employed foreign experts, principally from the Netherlands to study the **disintegration concern**. Economy.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **erosion problem** and **disintegration concern** interchangeable (i.e., having the same meaning)?

Pair 2130

P1: "Yaku" are somewhat similar to poker hands. They fit certain patterns based on the numbers or types of tiles included, as well as the relative value of the tiles. Unlike poker, however, multiple hand types may be combined to produce hands of **greater value**. There are three basic classes of yaku: Calling for another player's discard to make a meld makes the meld and the hand open.

P2: "Yaku" are somewhat similar to poker hands. They fit certain patterns based on the numbers or types of tiles included, as well as the relative value of the tiles. Unlike poker, however, multiple hand types may be combined to

produce hands of **higher degree**. There are three basic classes of yaku: Calling for another player's discard to make a meld makes the meld and the hand open.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **greater value** and **higher degree** interchangeable (i.e., having the same meaning)?

Pair 2131

P1: Green roof Green roofs are landscaped or vegetated areas on the roofs of buildings, usually built to mimic natural landscaping or ground-level parks. Green roofs help drainage systems by offsetting peak discharge from otherwise hardscape surfaces, and filtering rainwater directly as it falls. They also have the **added advantage** of reducing energy consumption for buildings that would otherwise be receiving direct sunlight onto their roofs throughout the day. As part of the 2015 United Nations Climate Change Conference, Argentina agreed to reduce greenhouse gas emissions as part of a global effort to combat climate change.

P2: Green roof Green roofs are landscaped or vegetated areas on the roofs of buildings, usually built to mimic natural landscaping or ground-level parks. Green roofs help drainage systems by offsetting peak discharge from otherwise hardscape surfaces, and filtering rainwater directly as it falls. They also have the **extra help** of reducing energy consumption for buildings that would otherwise be receiving direct sunlight onto their roofs throughout the day. As part of the 2015 United Nations Climate Change Conference, Argentina agreed to reduce greenhouse gas emissions as part of a global effort to combat climate change.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **added advantage** and **extra help** interchangeable (i.e., having the same meaning)?

Pair 2132

P1: Legacy and honors. In the book "Fifty Filmmakers", journalist Andrew J. Rausch argues, "There is a strong case to be made that Robert Towne is the most gifted scribe ever to write for film. There can be **little doubt** that he is one of the finest ever." Awards

P2: Legacy and honors. In the book "Fifty Filmmakers", journalist Andrew J. Rausch argues, "There is a strong case to be made that Robert Towne is the most gifted scribe ever to write for film. There can be **small concern** that he is one of the finest ever." Awards

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **little doubt** and **small concern** interchangeable (i.e., having the same meaning)?

Pair 2133

P1: Face was selected amongst hundreds of groups to compete. Having made it that far, Face performed "Living on a Prayer" by Bon Jovi and while the judges were impressed that they could "rock without instruments," it was not enough to keep them on the show. In particular, their lack of an **upper range** ultimately led to their elimination in the first round. According to "The New York Times" Members.

P2: Face was selected amongst hundreds of groups to compete. Having made it that far, Face performed "Living on a Prayer" by Bon Jovi and while the judges were impressed that they could "rock without instruments," it was not enough to keep them on the show. In particular, their lack of an **advanced scope** ultimately led to their elimination in the first round. According to "The New York Times" Members.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **upper range** and **advanced scope** interchangeable (i.e., having the same meaning)?

Pair 2134

P1: Dilawar said: "For me if we can't save a sparrow which is found around us then it is too ambitious to save a tiger. So first we have to save the sparrows and only then can we dream of saving the tiger." Since it started Nature Forever Society has spearheaded programs and projects that are making a **visible difference** to sparrow populations in cities. Some of the initiatives started by Nature Forever Society are CBMI, World Sparrow Day, Project SOS, NFS Sparrow Awards and Adopt a Feeder and Nest program, among others.

P2: Dilawar said: "For me if we can't save a sparrow which is found around us then it is too ambitious to save a tiger. So first we have to save the sparrows and only then can we dream of saving the tiger." Since it started Nature Forever Society has spearheaded programs and projects that are making a **distinct variation** to sparrow populations in cities. Some of the initiatives started by Nature Forever Society are CBMI, World Sparrow Day, Project SOS, NFS Sparrow Awards and Adopt a Feeder and Nest program, among others.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **visible difference** and **distinct variation** interchangeable (i.e., having the same meaning)?

Pair 2135

P1: Among the sexual questions asked in the Scientology security checks include, "Have you ever practiced sex with animals? ", "Have you ever practiced sodomy? ", "Have you ever slept with a member of a race of **another color**? ", and "Have you ever been involved in an abortion?"

P2: Among the sexual questions asked in the Scientology security checks include, "Have you ever practiced sex with animals? ", "Have you ever practiced sodomy? ", "Have you ever slept with a member of a race of **different pigmentation**? ", and "Have you ever been involved in an abortion?"

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **another color** and **different pigmentation** interchangeable (i.e., having the same meaning)?

Pair 2136

P1: The BBC television programme "Operation Stonehenge: What Lies Beneath Pt 2", broadcast on BBC Two in September 2014, describes the Ferriby boat as seagoing and describes the tons of cargo it could have taken across the Channel. However, Dover Museum consider that the Dover Bronze Age Boat is the oldest seagoing boat known, at only 1550 BC. They are backed by a **different channel** and programme from the BBC- Neil Oliver in the Bronze Age episode of "A History of Ancient Britain". They are also backed by a "Time Team Special", broadcast on 7 September 2014 on UK Channel 4, which stated that to be a proper sea-going, cross-channel vessel the boat would have to have the curved 'rocker' bottom and the (unproven) pointed bow that only the more modern Dover boat allegedly possesses.

P2: The BBC television programme "Operation Stonehenge: What Lies Beneath Pt 2", broadcast on BBC Two in September 2014, describes the Ferriby boat as seagoing and describes the tons of cargo it could have taken across the Channel. However, Dover Museum consider that the Dover Bronze Age Boat is the oldest seagoing boat known, at only 1550 BC. They are backed by a **separate program** and programme from the BBC- Neil Oliver in the Bronze Age episode of "A History of Ancient Britain". They are also backed by a "Time Team Special", broadcast on 7 September 2014 on UK Channel 4, which stated that to be a proper sea-going, cross-channel vessel the boat would have to have the curved 'rocker' bottom and the (unproven) pointed bow that only the more modern Dover boat allegedly possesses.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **different channel** and **separate program** interchangeable (i.e., having the same meaning)?

Pair 2137

P1: Two days after Floyd's death, an unarmed black man was grabbed and shoved by La Mesa Police and arrested at the Grossmont Trolley Station. The video of the incident went viral and led to more than 1000 protesters converging on the city. **An African-American grandmother was shot in the face with a bean bag round from police.** Geography.

P2: Two days after Floyd's death, an unarmed black man was grabbed and shoved by La Mesa Police and arrested at the Grossmont Trolley Station. The video of the incident went viral and led to more than 1000 protesters converging on the city. **An African-American grandmother was shot in the face with a flexible baton round from police.** Geography.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **bean bag** and **flexible baton** interchangeable (i.e., having the same meaning)?

Pair 2138

P1: Uche attended the University of Michigan on a football scholarship. As a freshman in 2016, Uche tore his meniscus, caught a "bad virus" and appeared in only four games. **As a sophomore in 2017, he sustained a stress fracture and saw limited action in 10 games.** After the 2017 season, Uche was frustrated with his lack of playing time.

P2: Uche attended the University of Michigan on a football scholarship. As a freshman in 2016, Uche tore his meniscus, caught a "bad virus" and appeared in only four games. **As a sophomore in 2017, he sustained a stress fracture and saw less exercise in 10 games.** After the 2017 season, Uche was frustrated with his lack of playing time.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **limited action** and **less exercise** interchangeable (i.e., having the same meaning)?

Pair 2139

P1: In the 1990s, ATV was unable to recover from setbacks due to a variety number of internal operation problems. The Chief Executive in Council rejected the license renewal application of ATV on April 1, 2015, and ATV ceased transmissions on April 1, 2016. **The closure of CTV and having the lower hand of ATV probably helps TVB to gain the greatest market share for over 48 years.** Indeed, TVB channels captured an overall 81% audience share against all TV channels in Hong Kong during weekday primetime.

P2: In the 1990s, ATV was unable to recover from setbacks due to a variety number of internal operation problems. The Chief Executive in Council rejected the license renewal application of ATV on April 1, 2015, and ATV ceased transmissions on April 1, 2016. **The closure of CTV and having the worse luck of ATV probably helps TVB to gain the greatest market share for over 48 years.** Indeed, TVB channels captured an overall 81% audience share against all TV channels in Hong Kong during weekday primetime.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **lower hand** and **worse luck** interchangeable (i.e., having the same meaning)?

Pair 2140

P1: Generally speaking, the partial opening of covered fingerholes raises the pitch of the sounding note while the partial closure of open fingerholes lowers the pitch. Holes 6 and 7. **On most "baroque" modeled modern recorders, the lower two fingers of the lower hand actually cover two holes each (called "double holes").** Whereas on the vast majority of baroque recorders and all earlier recorders these two fingers covered a single hole ("single holes"), double holes have become standard for baroque modeled modern recorders.

P2: Generally speaking, the partial opening of covered fingerholes raises the pitch of the sounding note while the partial closure of open fingerholes lowers the pitch. Holes 6 and 7. **On most "baroque" modeled modern recorders, the lower**

two fingers of the **low appendage** actually cover two holes each (called "double holes"). Whereas on the vast majority of baroque recorders and all earlier recorders these two fingers covered a single hole ("single holes"), double holes have become standard for baroque modeled modern recorders.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **lower hand** and **low appendage** interchangeable (i.e., having the same meaning)?

Pair 2141

P1: This made them another important source of trade for the Chinookans when visiting the PFC station. Another frequent item sold when fish supplies were low in the winter was the Wapato root. **Wapato provided a common source of calories for Chinookans and other nations.** The Astorians described the tuber as "a good substitute for potatoes" Purchases of Wapato occurred in such volumes that a small cellar had to be created specifically to house the produce.

P2: This made them another important source of trade for the Chinookans when visiting the PFC station. Another frequent item sold when fish supplies were low in the winter was the Wapato root. **Wapato provided a typical origin of calories for Chinookans and other nations.** The Astorians described the tuber as "a good substitute for potatoes" Purchases of Wapato occurred in such volumes that a small cellar had to be created specifically to house the produce.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **common source** and **typical origin** interchangeable (i.e., having the same meaning)?

Pair 2142

P1: Longitudinal studies indicate that problems are largely resolved by five years of age in around 40% of four-year-olds with early language delays who have no other presenting risk factors. However, for children who still have significant language difficulties at school entry, reading problems are common, even for children who receive specialist help, and educational attainments are typically poor. **poor outcomes are most common in cases where comprehension as well as expressive language is affected.** There is also evidence that scores on tests of nonverbal ability of children with DLD decrease over the course of development.

P2: Longitudinal studies indicate that problems are largely resolved by five years of age in around 40% of four-year-olds with early language delays who have no other presenting risk factors. However, for children who still have significant language difficulties at school entry, reading problems are common, even for children who receive specialist help, and educational attainments are typically poor. **bad issues are most common in cases where comprehension as well as expressive language is affected.** There is also evidence that scores on tests of nonverbal ability of children with DLD decrease over the course of development.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **poor outcomes** and **bad issues** interchangeable (i.e., having the same meaning)?

Pair 2143

P1: The WMA is heavily forested, primarily with mixed hardwoods and yellow poplar/black cherry forests in the coves. The WMA is accessed from U.S. Route 52 at Premier. **Several tracks and jeep trails provide walking access into the Tug Fork WMA from U.S. Route 52.** Hunting and fishing.

P2: The WMA is heavily forested, primarily with mixed hardwoods and yellow poplar/black cherry forests in the coves. The WMA is accessed from U.S. Route 52 at Premier. **Several tracks and jeep trails provide on-foot traffic into the Tug Fork WMA from U.S. Route 52.** Hunting and fishing.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **walking access** and **on-foot traffic** interchangeable (i.e., having the same meaning)?

Pair 2144

P1: After being asked whether he plans to continue to carry on the political momentum into the upcoming general election in 2018, he refused to make commitments, although he said that several people had already asked him to run. Miro Cerar, the Prime Minister, whose SMC endorsed none of the candidates, and Milan Brglez, the Speaker of the National Assembly, both congratulated Pahor, as did the presidents of Austria Alexander Van der Bellen and Croatia Kolinda Grabar-Kitarović. Janez Janša of SDS also send congratulations but warned of the low voter turnout, which was "below the legitimate level". Results.

P2: After being asked whether he plans to continue to carry on the political momentum into the upcoming general election in 2018, he refused to make commitments, although he said that several people had already asked him to run. Miro Cerar, the Prime Minister, whose SMC endorsed none of the candidates, and Milan Brglez, the Speaker of the National Assembly, both congratulated Pahor, as did the presidents of Austria Alexander Van der Bellen and Croatia Kolinda Grabar-Kitarović. Janez Janša of SDS also send congratulations but warned of the low voter turnout, which was "below the actual amount". Results.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **legitimate level** and **actual amount** interchangeable (i.e., having the same meaning)?

Pair 2145

P1: With this piece, the Gershwin's created something that was "less typical – and far more revealing of the struggles taking place in US theatre – is the cross-class romance that is homologous to a series of binary oppositions, dramatic, characterological, musical, and lyric. ""Tiptoes" highlights and uses class differences in order to point out the disconnect, as well as using it to entertain. Productions like this led to Gershwin's quality being seen as partially Carnegie and legitimate level while also mixing with Vaudeville-esque and cabaret qualities. Another influential musical from this age was "Show Boat."

P2: With this piece, the Gershwin's created something that was "less typical – and far more revealing of the struggles taking place in US theatre – is the cross-class romance that is homologous to a series of binary oppositions, dramatic, characterological, musical, and lyric. ""Tiptoes" highlights and uses class differences in order to point out the disconnect, as well as using it to entertain. Productions like this led to Gershwin's quality being seen as partially Carnegie and true grade while also mixing with Vaudeville-esque and cabaret qualities. Another influential musical from this age was "Show Boat."

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **legitimate level** and **true grade** interchangeable (i.e., having the same meaning)?

Pair 2146

P1: History. An old name for the island was "Coffin Island". It was generally barren and uninhabited until 1962, when it was taken over by the Society for the Aid and Rehabilitation of drug abusers. Features.

P2: History. An old name for the island was "Coffin Island". It was generally barren and uninhabited until 1962, when it was taken over by the Society for the Aid and Rehabilitation of rehab society. Features.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **drug abusers** and **rehab society** interchangeable (i.e., having the same meaning)?

Pair 2147

P1: In a 1995 poll of randomly selected police chiefs from across the U.S., the officers rank the death penalty last as a way of deterring or preventing violent crimes. They ranked it behind many other forms of crime control including reducing

drug abuse and use, lowering technical barriers when prosecuting, putting more officers on the streets, and making prison sentences longer. They responded that a **better economy** with more jobs would lessen crime rates more than the death penalty. In fact, only one percent of the police chiefs surveyed thought that the death penalty was the primary focus for reducing crime.

P2: In a 1995 poll of randomly selected police chiefs from across the U.S., the officers rank the death penalty last as a way of deterring or preventing violent crimes. They ranked it behind many other forms of crime control including reducing drug abuse and use, lowering technical barriers when prosecuting, putting more officers on the streets, and making prison sentences longer. They responded that a **more ideal monetary state** with more jobs would lessen crime rates more than the death penalty. In fact, only one percent of the police chiefs surveyed thought that the death penalty was the primary focus for reducing crime.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **better economy** and **more ideal monetary state** interchangeable (i.e., having the same meaning)?

Pair 2148

P1: Air path. External fans are provided to give sufficient air for combustion. The Primary air fan takes air from the atmosphere and, first warms the air in the air preheater for **better economy**. Primary air then passes through the coal pulverizers, and carries the coal dust to the burners for injection into the furnace.

P2: Air path. External fans are provided to give sufficient air for combustion. The Primary air fan takes air from the atmosphere and, first warms the air in the air preheater for **greater mileage**. Primary air then passes through the coal pulverizers, and carries the coal dust to the burners for injection into the furnace.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **better economy** and **greater mileage** interchangeable (i.e., having the same meaning)?

Pair 2149

P1: The scrapbooks also contained cuttings from other books and magazines and eventually, there were more than 200 different books generated by patrons and librarians. In 1938, four Tru-Vuers with 40 films were purchased to circulate through the different libraries so that people could see their first moving pictures. The books were in such demand that **one young man** walked to the closest pack horse library to get new books. In 1936, around 33,000 books were circulated to around 57,000 families.

P2: The scrapbooks also contained cuttings from other books and magazines and eventually, there were more than 200 different books generated by patrons and librarians. In 1938, four Tru-Vuers with 40 films were purchased to circulate through the different libraries so that people could see their first moving pictures. The books were in such demand that **a boyish lad** walked to the closest pack horse library to get new books. In 1936, around 33,000 books were circulated to around 57,000 families.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one young man** and **a boyish lad** interchangeable (i.e., having the same meaning)?

Pair 2150

P1: Teleportation is the hypothetical transfer of matter or energy from one point to another without traversing the physical space between them. It is a common subject in science fiction literature, film, video games, and television. Teleportation is often paired with time travel, being that the travelling between the two points takes an **unknown period** of time, sometimes being immediate. Teleportation has not yet been implemented in the real world.

P2: Teleportation is the hypothetical transfer of matter or energy from one point to another without traversing the physical space between them. It is a common subject in science fiction literature, film, video games, and television. Teleportation is often paired with time travel, being that the travelling between the two points takes an unidentified duration of time, sometimes being immediate. Teleportation has not yet been implemented in the real world.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are unknown period and unidentified duration interchangeable (i.e., having the same meaning)?

Pair 2151

P1: In given cycles, the plays came to be sponsored by the newly emerging Medieval craft guilds. Having grown out of the religiously based mystery plays of the Middle Ages, the morality play is a genre of Medieval and early Tudor theatrical entertainment, which represented a shift towards a more secular base for European theatre. In their own time, these plays were known as "interludes", a broader term given to dramas with or without a moral theme. Morality plays are a type of allegory in which the protagonist is met by personifications of various moral attributes who try to prompt him to choose a Godly life over one of evil.

P2: In given cycles, the plays came to be sponsored by the newly emerging Medieval craft guilds. Having grown out of the religiously based mystery plays of the Middle Ages, the morality play is a genre of Medieval and early Tudor theatrical entertainment, which represented a shift towards a more secular base for European theatre. In their own time, these plays were known as "interludes", a broader term given to dramas with or without a higher point. Morality plays are a type of allegory in which the protagonist is met by personifications of various moral attributes who try to prompt him to choose a Godly life over one of evil.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are moral theme and higher point interchangeable (i.e., having the same meaning)?

Pair 2152

P1: One may not claim performance for breach of promise. Contractual damages. Contractual damages (patrimonial loss from the breach of promise) are calculated on the basis of positive interest. The courts are not consistent in this regard; each case is determined on its specific merits.

P2: One may not claim performance for breach of promise. Contractual damages. Contractual damages (patrimonial loss from the breach of promise) are calculated on the basis of substantial earnings. The courts are not consistent in this regard; each case is determined on its specific merits.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are positive interest and substantial earnings interchangeable (i.e., having the same meaning)?

Pair 2153

P1: Halo recorded "Quarantine" between July 2011 and February 2012 primarily in her home studio, with some instrument tracks also recorded in London. She made over thirty demos, eighteen of which were deleted. In November 2011, Halo sent the LP demos to Hyperdub label head Steve Goodman, who responded with positive interest. Initially applying extensive echo and reverb to her vocals, which she found "supremely boring", Halo instead opted to leave them dry and unadorned, stating that "it was tempting to use autotune but I decided against it because there's this brutal, sensual ugliness in the vocals uncorrected, and painfully human vocals made sense."

P2: Halo recorded "Quarantine" between July 2011 and February 2012 primarily in her home studio, with some instrument tracks also recorded in London. She made over thirty demos, eighteen of which were deleted. In November 2011, Halo sent the LP demos to Hyperdub label head Steve Goodman, who responded with active engagement. Initially applying extensive echo and reverb to her vocals, which she found "supremely boring", Halo instead opted to leave them

dry and unadorned, stating that "it was tempting to use autotune but I decided against it because there's this brutal, sensual ugliness in the vocals uncorrected, and painfully human vocals made sense."

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **positive interest** and **active engagement** interchangeable (i.e., having the same meaning)?

Pair 2154

P1: Notable cases of life imprisonment. In the case of one Red Army Faction terrorist, the parole court ordered a deferment of at least 11 years (making his sentence a minimum of 26 years) before he again became eligible for parole. Such a **long length** was due to his involvement in multiple killings, lack of remorse, and his affiliation with a terrorist group. In another case, a court ruled the defendant had to serve at least 38 years in prison for the killings of five people.

P2: Notable cases of life imprisonment. In the case of one Red Army Faction terrorist, the parole court ordered a deferment of at least 11 years (making his sentence a minimum of 26 years) before he again became eligible for parole. Such a **great girth** was due to his involvement in multiple killings, lack of remorse, and his affiliation with a terrorist group. In another case, a court ruled the defendant had to serve at least 38 years in prison for the killings of five people.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **long length** and **great girth** interchangeable (i.e., having the same meaning)?

Pair 2155

P1: A severe type of anaphylaxis may occur. It may also cause inflammation of the lungs that can result in lung scarring. Chest X-rays **every couple** of weeks are recommended to check for this. Bleomycin may cause harm to the baby if used during pregnancy.

P2: A severe type of anaphylaxis may occur. It may also cause inflammation of the lungs that can result in lung scarring. Chest X-rays **all two** of weeks are recommended to check for this. Bleomycin may cause harm to the baby if used during pregnancy.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **every couple** and **all two** interchangeable (i.e., having the same meaning)?

Pair 2156

P1: The binned PDM approach is susceptible to period aliases when the cadence is semi-regular (e.g., nightly observations of a star brightness). Plavchan and colleagues avoided this aliasing by computing a box-car smoothed phased time-series, where the box-car width can be thought of as the old bin size. **The original folded time-series is compared to the smoothed time-series, and the best period is found when the time-series are most similar.** See the NASA Exoplanet Archive for more information on statistical significance and approaches.

P2: The binned PDM approach is susceptible to period aliases when the cadence is semi-regular (e.g., nightly observations of a star brightness). Plavchan and colleagues avoided this aliasing by computing a box-car smoothed phased time-series, where the box-car width can be thought of as the old bin size. **The original folded time-series is compared to the smoothed time-series, and the greatest duration is found when the time-series are most similar.** See the NASA Exoplanet Archive for more information on statistical significance and approaches.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **best period** and **greatest duration** interchangeable (i.e., having the same meaning)?

Pair 2157

P1: Natural England joined the project in 2009 in a bid to reduce its own carbon footprint. One year later they announced that they had reduced their carbon emissions (according to 10:10's criteria) by 13%. In 2008, Sir Martin Doughty, the Chairman of Natural England, warned the Prime Minister of the **potential danger** of genetically modified crops. However, in 2012, Poul Christensen, CBE, the next Chairman of Natural England, said that middle England should embrace new technologies like GM crops as long as there were adequate testing and safeguards.

P2: Natural England joined the project in 2009 in a bid to reduce its own carbon footprint. One year later they announced that they had reduced their carbon emissions (according to 10:10's criteria) by 13%. In 2008, Sir Martin Doughty, the Chairman of Natural England, warned the Prime Minister of the **possible crisis** of genetically modified crops. However, in 2012, Poul Christensen, CBE, the next Chairman of Natural England, said that middle England should embrace new technologies like GM crops as long as there were adequate testing and safeguards.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **potential danger** and **possible crisis** interchangeable (i.e., having the same meaning)?

Pair 2158

P1: Critical reception. "Music & Media" wrote, "Arena knows how to chain herself to radio. Bass guitar forms the stable base for a **solid piece** of FM pop rock. Walking exactly in the middle of the road, she takes the shortest way to your heart."

P2: Critical reception. "Music & Media" wrote, "Arena knows how to chain herself to radio. Bass guitar forms the stable base for a **stable portion** of FM pop rock. Walking exactly in the middle of the road, she takes the shortest way to your heart."

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **solid piece** and **stable portion** interchangeable (i.e., having the same meaning)?

Pair 2159

P1: Katju has been criticised for sexist comments on social media. In 2015, he made comments comparing Shazia Ilmi to Kiran Bedi, saying: "If Shazia had been made their chief minister candidate, the BJP would have definitely won the Delhi elections. People vote for beautiful faces [...] **even a person** like me who does not vote would have voted for Shazia." In 2020 he was criticized when screenshots of an exchange he had with a woman on Facebook went viral when he told her that "good girls go to sleep early."

P2: Katju has been criticised for sexist comments on social media. In 2015, he made comments comparing Shazia Ilmi to Kiran Bedi, saying: "If Shazia had been made their chief minister candidate, the BJP would have definitely won the Delhi elections. People vote for beautiful faces [...] **especially an individual** like me who does not vote would have voted for Shazia." In 2020 he was criticized when screenshots of an exchange he had with a woman on Facebook went viral when he told her that "good girls go to sleep early."

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **even a person** and **especially an individual** interchangeable (i.e., having the same meaning)?

Pair 2160

P1: As in brainstorm their own ways of how they want to make their own website. The wait and see approach was a better way to look at it; because this is an adjustment staff and community as well during the 21st century. 2009 has become one of the most challenging years for **every industry** in the country. After recovering from a 2nd Slightly Recession started back in 2007 was still continuing in 2009.

P2: As in brainstorm their own ways of how they want to make their own website. The wait and see approach was a better way to look at it; because this is an adjustment staff and community as well during the 21st century. 2009 has become one of the most challenging years for each company in the country. After recovering from a 2nd Slightly Recession started back in 2007 was still continuing in 2009.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are every industry and each company interchangeable (i.e., having the same meaning)?

Pair 2161

P1: Hal Cranmer writes, "For all these arguments against laziness, it is amazing we work so hard to achieve it. Even those hard-working Puritans were willing to break their backs every day in exchange for an eternity of lying around on a cloud and playing the harp. every industry is trying to do its part to give its customers more leisure time." Ludwig von Mises writes, "The expenditure of labor is deemed painful.

P2: Hal Cranmer writes, "For all these arguments against laziness, it is amazing we work so hard to achieve it. Even those hard-working Puritans were willing to break their backs every day in exchange for an eternity of lying around on a cloud and playing the harp. another manufacturer is trying to do its part to give its customers more leisure time." Ludwig von Mises writes, "The expenditure of labor is deemed painful.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are every industry and another manufacturer interchangeable (i.e., having the same meaning)?

Pair 2162

P1: The current design of Pin Multiplexing in hardware level raises security questions. For example, assume that an application uses a particular peripheral controller connected to a pin with a particular multiplexing setup. At one point another application (second application) changes the multiplexing setup of the pin used by the first application. Once the pin is multiplexed, the physical connection to the first peripheral controller gets disconnected.

P2: The current design of Pin Multiplexing in hardware level raises security questions. For example, assume that an application uses a particular peripheral controller connected to a pin with a particular multiplexing setup. At one point another application (follow-up process) changes the multiplexing setup of the pin used by the first application. Once the pin is multiplexed, the physical connection to the first peripheral controller gets disconnected.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are second application and follow-up process interchangeable (i.e., having the same meaning)?

Pair 2163

P1: After the analysis a JRipples Hierarchical View will appear. For this example there is only a single class "Main" to be analyzed, which is mark "next" in green. After the developer visits the main class, three options are presented by right clicking on the green "Next". They are "Located", "Propagating" and "Unchanged".

P2: After the analysis a JRipples Hierarchical View will appear. For this example there is only a single class "Main" to be analyzed, which is mark "next" in green. After the developer visits the primary section, three options are presented by right clicking on the green "Next". They are "Located", "Propagating" and "Unchanged".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are main class and primary section interchangeable (i.e., having the same meaning)?

Pair 2164

P1: It had been in use as the domain name for the institute's homepage, swisstopo.ch, since 1997. Maps. **The main class of products produced by Swisstopo are topographical maps on seven different scales.** Swiss maps have been praised for their accuracy and quality.

P2: It had been in use as the domain name for the institute's homepage, swisstopo.ch, since 1997. Maps. **The key type of products produced by Swisstopo are topographical maps on seven different scales.** Swiss maps have been praised for their accuracy and quality.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **main class** and **key type** interchangeable (i.e., having the same meaning)?

Pair 2165

P1: Whitmire said that a prison in that location would be less expensive to operate and would allow the state to alleviate a shortage of correction personnel by consolidating staff members. In 2007 TDCJ officials said that discussions to move the Central Unit from Sugar Land to Brazoria County were preliminary. **During the same year, Whitmire promoted a bill calling for a study for the feasibility of selling the land of the central unit.** The bill awaited the signature of Governor of Texas Rick Perry.

P2: Whitmire said that a prison in that location would be less expensive to operate and would allow the state to alleviate a shortage of correction personnel by consolidating staff members. In 2007 TDCJ officials said that discussions to move the Central Unit from Sugar Land to Brazoria County were preliminary. **During the same year, Whitmire promoted a bill calling for a study for the feasibility of selling the land of the Texas prison.** The bill awaited the signature of Governor of Texas Rick Perry.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **central unit** and **Texas prison** interchangeable (i.e., having the same meaning)?

Pair 2166

P1: When Donna gets better, Ringo tells her he loves her and proposes. Donna initially turns him down, but then proposes to him and he accepts. **Ringo wins a green card to work in the US and he and Donna bring forward their wedding.** Prue arrives in town and is forced to tell Ringo that she has split up with his father.

P2: When Donna gets better, Ringo tells her he loves her and proposes. Donna initially turns him down, but then proposes to him and he accepts. **Ringo wins a residency identification to work in the US and he and Donna bring forward their wedding.** Prue arrives in town and is forced to tell Ringo that she has split up with his father.

Please record your answer for the following question in the provided Google sheet

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **proposal stage** and **design point** interchangeable (i.e., having the same meaning)?

Pair 2170

P1: On March 11 or 12, Cockroft's replacement as Provincial Treasurer, Solon Low, introduced the government's budget. It included no implementation of social credit, and was attacked by the opposition parties as "the default budget" and by insurgent Social Crediters as a "banker's budget" (a harsh insult given Social Credit's dim view of the banking industry). Ronald Ansley rose immediately to attack it as containing "not **one single item** that even remotely resembled Social Credit." Blue, again echoing Duggan, threatened on March 16 to vote against the government's interim supply bill, the defeat of which, under the conventions of the Westminster parliamentary system, would force the government's resignation.

P2: On March 11 or 12, Cockroft's replacement as Provincial Treasurer, Solon Low, introduced the government's budget. It included no implementation of social credit, and was attacked by the opposition parties as "the default budget" and by insurgent Social Crediters as a "banker's budget" (a harsh insult given Social Credit's dim view of the banking industry). Ronald Ansley rose immediately to attack it as containing "not **an object** that even remotely resembled Social Credit."

Blue, again echoing Duggan, threatened on March 16 to vote against the government's interim supply bill, the defeat of which, under the conventions of the Westminster parliamentary system, would force the government's resignation.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one single item** and **an object** interchangeable (i.e., having the same meaning)?

Pair 2171

P1: The American Board of Obesity Medicine (ABOM) is a 501(c)(3) nonprofit, self-appointed physician-evaluation organization that certifies physicians practicing obesity medicine. The American Board of Obesity Medicine is not a membership society, educational institution, or **licensing body**. Certification is intended to signify that a physician possess specialized knowledge of obesity.

P2: The American Board of Obesity Medicine (ABOM) is a 501(c)(3) nonprofit, self-appointed physician-evaluation organization that certifies physicians practicing obesity medicine. The American Board of Obesity Medicine is not a membership society, educational institution, or **membership society**. Certification is intended to signify that a physician possess specialized knowledge of obesity.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **licensing body** and **membership society** interchangeable (i.e., having the same meaning)?

Pair 2172

P1: Video formats. AVCHD supports a variety of video resolutions and scanning methods, which was further extended with the 2011 amendment of the specification. The **licensing body** of the specification defines a variety of labels for products compliant with specific features. Most AVCHD camcorders support only a handful of the video and audio formats allowed in the AVCHD standard.

P2: Video formats. AVCHD supports a variety of video resolutions and scanning methods, which was further extended with the 2011 amendment of the specification. The **identification institution** of the specification defines a variety of labels for products compliant with specific features. Most AVCHD camcorders support only a handful of the video and audio formats allowed in the AVCHD standard.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **licensing body** and **identification institution** interchangeable (i.e., having the same meaning)?

Pair 2173

P1: As a wholesale provider of broadband access through its level two networks, NBN provides broadband access predominantly to retail service providers (RSPs); these businesses on sell access to end users; both residential and business customers to access the internet. At 30 June 2016, Telstra had 45.5%, TPG group had 24.8% and Optus had 12.4% of all end users connecting to the NBN. There has been a **significant failure** of the NBN to deliver nominal performance to end users. There has been contention between RSPs and NBN on the reasons for this.

P2: As a wholesale provider of broadband access through its level two networks, NBN provides broadband access predominantly to retail service providers (RSPs); these businesses on sell access to end users; both residential and business customers to access the internet. At 30 June 2016, Telstra had 45.5%, TPG group had 24.8% and Optus had 12.4% of all end users connecting to the NBN. There has been a **key issue** of the NBN to deliver nominal performance to end users. There has been contention between RSPs and NBN on the reasons for this.

Please record your answer for the following question in the provided Google sheet

Pair 2176

P1: Population ethical problems are particularly likely to arise when making large-scale policy-decisions, but they can also affect how we should evaluate certain choices made by individuals. Examples of practical questions that give rise to population ethical problems include the decision whether or not to have an additional child; how to allocate life-saving resources between young and old people; how many resources to dedicate to climate change mitigation; and whether or not to support family planning programs in the developing world. **The decisions made about all of these cases affect the number, the identity and the average quality of life of future people.** One's views regarding population ethics have the potential to significantly shape what one thinks of as the most pressing moral priorities.

P2: Population ethical problems are particularly likely to arise when making large-scale policy-decisions, but they can also affect how we should evaluate certain choices made by individuals. Examples of practical questions that give rise to population ethical problems include the decision whether or not to have an additional child; how to allocate life-saving resources between young and old people; how many resources to dedicate to climate change mitigation; and whether or not to support family planning programs in the developing world. **The decisions made about all of these cases affect the number, the identity and the average quality of life of all posterity.** One's views regarding population ethics have the potential to significantly shape what one thinks of as the most pressing moral priorities.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **future people** and **all posterity** interchangeable (i.e., having the same meaning)?

Pair 2177

P1: He chooses his career over her. Soon after Austin returns to Los Angeles and offers to be Adrianna's new manager, suggesting she start singing country music as a change of tune to her career after Dixon leaves town without saying goodbye. Austin enlists his father, Judd Ridge, to help launch Adrianna's new country-western career as a **side act**. Adrianna deals with Dixon leaving her by writing songs, two of which she sings live at different events.

P2: He chooses his career over her. Soon after Austin returns to Los Angeles and offers to be Adrianna's new manager, suggesting she start singing country music as a change of tune to her career after Dixon leaves town without saying goodbye. Austin enlists his father, Judd Ridge, to help launch Adrianna's new country-western career as a **small job**. Adrianna deals with Dixon leaving her by writing songs, two of which she sings live at different events.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **side act** and **small job** interchangeable (i.e., having the same meaning)?

Pair 2178

P1: The liberalisation of the law of defamation had a less positive effect, enabling an upsurge in personal innuendo and vague allegations. The sociologist Gabriel Tarde commented that "Pornography and slander have become the life-blood of the newspaper." French readers were treated to a **daily diet** of rumour, speculation and character assassination presented as "echos" and "faits divers". The French press became increasingly dominated by sensationalist and even malicious reporting as it abused the freedoms granted by the 1881 law to "slander and incite to violence with almost total impunity."

P2: The liberalisation of the law of defamation had a less positive effect, enabling an upsurge in personal innuendo and vague allegations. The sociologist Gabriel Tarde commented that "Pornography and slander have become the life-blood of the newspaper." French readers were treated to a **regular dose** of rumour, speculation and character assassination presented as "echos" and "faits divers". The French press became increasingly dominated by sensationalist and even malicious reporting as it abused the freedoms granted by the 1881 law to "slander and incite to violence with almost total impunity."

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **daily diet** and **regular dose** interchangeable (i.e., having the same meaning)?

Pair 2179

P1: She mentioned that she very well saw that her rapist wore yellow shoes, a detail which caught the attention of Commandant Bertrand, who noticed that Patrick Trémeau also wore yellow shoes. Officers then made him take off his shoes and brought them to the office, where Gladys was, and she immediately recognized them. The police conducted a lineup, and among the group of men, through a **beam splitter**, Gladys immediately pointed to her rapist: Patrick Trémeau. She identified him because she remembered his gaze.

P2: She mentioned that she very well saw that her rapist wore yellow shoes, a detail which caught the attention of Commandant Bertrand, who noticed that Patrick Trémeau also wore yellow shoes. Officers then made him take off his shoes and brought them to the office, where Gladys was, and she immediately recognized them. The police conducted a lineup, and among the group of men, through a **narrow slit**, Gladys immediately pointed to her rapist: Patrick Trémeau. She identified him because she remembered his gaze.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **beam splitter** and **narrow slit** interchangeable (i.e., having the same meaning)?

Pair 2180

P1: In a Michelson interferometer adapted for FTIR, light from the polychromatic infrared source, approximately a black-body radiator, is collimated and directed to a beam splitter. Ideally 50% of the light is refracted towards the fixed mirror and 50% is transmitted towards the moving mirror. Light is reflected from the two mirrors back to the **beam splitter** and some fraction of the original light passes into the sample compartment. There, the light is focused

on the sample.

P2: In a Michelson interferometer adapted for FTIR, light from the polychromatic infrared source, approximately a black-body radiator, is collimated and directed to a beam splitter. Ideally 50% of the light is refracted towards the fixed mirror and 50% is transmitted towards the moving mirror. Light is reflected from the two mirrors back to the light bender and some fraction of the original light passes into the sample compartment. There, the light is focused on the sample.

Please record your answer for the following question in the provided Google sheet

Pair 2181

P1: He has co-ordinated the work of his technical crew ably. It's an impressive cast of actors who lend credibility and conviction to their characters." "Nowrunning" wrote "Eppadi Manasukkul Vandhai has an average masala story that is given superior treatment by an above-average Kollywood director. It then becomes a gripping crime thriller that is steered into the masala format, from time to time, for purposes of accessibility."

P2: He has co-ordinated the work of his technical crew ably. It's an impressive cast of actors who lend credibility and conviction to their characters." "Nowrunning" wrote "Eppadi Manasukkul Vandhai has an average masala story that is given preferential act by an above-average Kollywood director. It then becomes a gripping crime thriller that is steered into the masala format, from time to time, for purposes of accessibility."

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **superior treatment** and **preferential act** interchangeable (i.e., having the same meaning)?

Pair 2182

P1: George M. Fredrickson has written that societal racism is deeply embedded in American culture and that in the 18th century, societal racism had already emerged with the purpose of maintaining a white-dominated society, and that "societal racism does not require an ideology to sustain it so long as it was taken for granted". When looking specifically at structural racism within the United States of America it is the formalization of practices that frequently put whites, or Caucasians, in a position of advantage while at the same time being consistently detrimental to people of color, such as African Americans, Hispanics, Native Americans, Pacific Islanders, Asians, and Middle Easterners. This position of advantage often entails: more opportunities to hold positions of power; privilege, white privilege; and superior treatment by institutions. This results in racial inequalities between whites and other ethnic groups which often manifest as issues of poverty or health disparities between the groups.

P2: George M. Fredrickson has written that societal racism is deeply embedded in American culture and that in the 18th century, societal racism had already emerged with the purpose of maintaining a white-dominated society, and that "societal racism does not require an ideology to sustain it so long as it was taken for granted". When looking specifically at structural racism within the United States of America it is the formalization of practices that frequently put whites, or Caucasians, in a position of advantage while at the same time being consistently detrimental to people of color, such as African Americans, Hispanics, Native Americans, Pacific Islanders, Asians, and Middle Easterners. This position of advantage often entails: more opportunities to hold positions of power; privilege, white privilege; and advantageous privilege by institutions. This results in racial inequalities between whites and other ethnic groups which often manifest as issues of poverty or health disparities between the groups.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **superior treatment** and **advantageous privilege** interchangeable (i.e., having the same meaning)?

Pair 2183

P1: In the porcelain selection, only white porcelain (Bone China and Royal Porcelain) which had been fired at the proper temperature (1150-1280 degree Celsius) for many hours, are selected. White ware must not have any flaws. **After we get the required white wares, cleaning is the next process.** During this process, it is necessary to avoid oily surfaces from sweaty and dirty hands.

P2: In the porcelain selection, only white porcelain (Bone China and Royal Porcelain) which had been fired at the proper temperature (1150-1280 degree Celsius) for many hours, are selected. White ware must not have any flaws. **After we get the required white wares, cleaning is the case afterward.** During this process, it is necessary to avoid oily surfaces from sweaty and dirty hands.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **next process** and **case afterward** interchangeable (i.e., having the same meaning)?

Pair 2184

P1: The highest point of the elevated section is the eastbound ramp from the Gardiner to the Don Valley Parkway which goes up and over the westbound lanes, then drops to ground level. The elevated sections of the Gardiner use a tall wall concrete barrier topped with green metal blades. **The blades act to reduce the glare of oncoming headlights from the opposing direction of traffic.** During the original construction concrete parapet walls with metal railings were used in the outer sections as well as a divider between westbound and eastbound traffic.

P2: The highest point of the elevated section is the eastbound ramp from the Gardiner to the Don Valley Parkway which goes up and over the westbound lanes, then drops to ground level. The elevated sections of the Gardiner use a tall wall concrete barrier topped with green metal blades. **The blades act to reduce the glare of oncoming headlights from the contrasting route of traffic.** During the original construction concrete parapet walls with metal railings were used in the outer sections as well as a divider between westbound and eastbound traffic.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **opposing direction** and **contrasting route** interchangeable (i.e., having the same meaning)?

Pair 2185

P1: RRM contains about 80-90 amino acids that form four-stranded anti-parallel -sheet with two helices (topology). The -sheet plays critical role for RNA recognition. **Usually, three conserved residues on the -sheet are very important for this recognition process.** Specifically, an Arg or Lys residue forms a salt bridge to the phosphodiester backbone and another two aromatic residues make stacking interactions with the nucleobases.

P2: RRM contains about 80-90 amino acids that form four-stranded anti-parallel -sheet with two helices (topology). The -sheet plays critical role for RNA recognition. **Usually, three conserved residues on the -sheet are very important for this understanding ability.** Specifically, an Arg or Lys residue forms a salt bridge to the phosphodiester backbone and another two aromatic residues make stacking interactions with the nucleobases.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **recognition process** and **understanding ability** interchangeable (i.e., having the same meaning)?

Pair 2186

P1: While you can get a communal life, such as family conversations, child care issues and family happiness, you have to give up much of your personal needs, such as salary and promotion at work. For an ideal world called Warabal to be realized, both welfare and basic income, the basic condition of human life, must be resolved. **Labor history of South Korea and the recognition process of Waravel.** Through economic development in the 1960s, Korean society changed from an agricultural society to an industrial one.

P2: While you can get a communal life, such as family conversations, child care issues and family happiness, you have to give up much of your personal needs, such as salary and promotion at work. For an ideal world called Warabal to be realized, both welfare and basic income, the basic condition of human life, must be resolved. **Labor history of South Korea and the independence procedure of Waravel.** Through economic development in the 1960s, Korean society changed from an agricultural society to an industrial one.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **recognition process** and **independence procedure** interchangeable (i.e., having the same meaning)?

Pair 2187

P1: The fairgrounds are best known for it being the location of the Vermont State Fair. Vermont State Fair. **The Vermont State Fair, the official state fair of Vermont, is located at the fairgrounds.** The fair contains a midway, entertainment, a restaurant, food stands, a petting zoo, and agricultural exhibits.

P2: The fairgrounds are best known for it being the location of the Vermont State Fair. Vermont State Fair. **The Vermont State Fair, the recognized land fair of Vermont, is located at the fairgrounds.** The fair contains a midway, entertainment, a restaurant, food stands, a petting zoo, and agricultural exhibits.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **official state** and **recognized land** interchangeable (i.e., having the same meaning)?

Pair 2188

P1: In the 33 years that Story sat on the Court, he would transition from being an ally of Marshall to the last of an old race. Joseph Story, throughout his time on the Marshall and Taney courts, championed the notion of legal science. **He believed that the Union could be made stronger through the proper application of law, in particular proper application necessitated uniformity of application.** Consequently, federal control and judicial oversight were important tools in order to craft a more centralized Union.

P2: In the 33 years that Story sat on the Court, he would transition from being an ally of Marshall to the last of an old race. Joseph Story, throughout his time on the Marshall and Taney courts, championed the notion of legal science. **He believed that the Union could be made stronger through the true use of law, in particular proper application necessitated uniformity of application.** Consequently, federal control and judicial oversight were important tools in order to craft a more centralized Union.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **proper application** and **true use** interchangeable (i.e., having the same meaning)?

Pair 2189

P1: The Voluntary Initiative. "The Voluntary Initiative" works towards promoting safe Pesticide use. **It is important when using pesticides to plan ahead, ensure proper application time, ensure proper application, and clean up properly.** To plan ahead farmers should avoid erosion and run off, be certain to use pesticides from a trusted source, and be certain to fill pesticides away from drains and waterways.

P2: The Voluntary Initiative. "The Voluntary Initiative" works towards promoting safe Pesticide use. **It is important when using pesticides to plan ahead, ensure actual administration time, ensure proper application, and clean up properly.** To plan ahead farmers should avoid erosion and run off, be certain to use pesticides from a trusted source, and be certain to fill pesticides away from drains and waterways.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **proper application** and **actual administration** interchangeable (i.e., having the same meaning)?

Pair 2190

P1: At baptism, Adventists may be asked the following question: "Do you accept and believe that the Seventh-day Adventist Church is the remnant church of Bible prophecy and that people of every nation, race, and language are invited and accepted into its fellowship?" (NB. In 2005 an **alternative set** of baptismal vows was created, which does not contain a reference to the Adventist church as the remnant. Candidates may now choose whether to take the original vow or the new one.)

P2: At baptism, Adventists may be asked the following question: "Do you accept and believe that the Seventh-day Adventist Church is the remnant church of Bible prophecy and that people of every nation, race, and language are invited and accepted into its fellowship?" (NB. In 2005 an **extra group** of baptismal vows was created, which does not contain a reference to the Adventist church as the remnant. Candidates may now choose whether to take the original vow or the new one.)

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **alternative set** and **extra group** interchangeable (i.e., having the same meaning)?

Pair 2191

P1: In 1931 "O 10", "O 9", , "Jacob van Heemskerck", "Z 7", "Z 8", made again a trip to the Baltic Sea for exercises. She sailed for the Baltics again in 1936 with her sisters "O 9", "O 11", "Hertog Hendrik" and "Z 5". In 1939 "O 10" together with her sisters "O 9", "O 11" where attached to the **coastal division**. They acted as the offensive part of Dutch coastal defense.

P2: In 1931 "O 10", "O 9", , "Jacob van Heemskerck", "Z 7", "Z 8", made again a trip to the Baltic Sea for exercises. She sailed for the Baltics again in 1936 with her sisters "O 9", "O 11", "Hertog Hendrik" and "Z 5". In 1939 "O 10" together with her sisters "O 9", "O 11" where attached to the **southern region**. They acted as the offensive part of Dutch coastal defense.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **coastal division** and **southern region** interchangeable (i.e., having the same meaning)?

Pair 2192

P1: The eight reverb effect types include three types of hall reverb, two types each of room and stage reverb, and a plate reverb. The voice signal initially passes through the variation and EQ sections in series, then on to the delay and reverb sections. The delay and reverb sections can be configured to operate in **either series** or parallel. Individual effects sections (variation, delay, reverb) or all effects, excluding the EQ, can be bypassed at will.

P2: The eight reverb effect types include three types of hall reverb, two types each of room and stage reverb, and a plate reverb. The voice signal initially passes through the variation and EQ sections in series, then on to the delay and reverb sections. The delay and reverb sections can be configured to operate in **end-to-end format** or parallel. Individual effects sections (variation, delay, reverb) or all effects, excluding the EQ, can be bypassed at will.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **either series** and **end-to-end format** interchangeable (i.e., having the same meaning)?

Pair 2193

P1: Visitors to the website can also ask questions to a long-time business expert affiliated with AmCham China. Criticism. In December 2020, Bloomberg News reported that AmCham China hosted Wang Chen, a **sanctioned member** of the CCP, at its annual appreciation dinner. Following the report, US Congressman Michael McCaul, Lead Republican on the House Committee on Foreign Affairs said in a statement, "It is unconscionable for the American Chamber of Commerce in China to host a Chinese Communist Party official under U.S. sanctions at its annual appreciation gala.

P2: Visitors to the website can also ask questions to a long-time business expert affiliated with AmCham China. Criticism. In December 2020, Bloomberg News reported that AmCham China hosted Wang Chen, a **confirmed user** of the CCP, at its annual appreciation dinner. Following the report, US Congressman Michael McCaul, Lead Republican on the House Committee on Foreign Affairs said in a statement, "It is unconscionable for the American Chamber of Commerce in China to host a Chinese Communist Party official under U.S. sanctions at its annual appreciation gala.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **sanctioned member** and **confirmed user** interchangeable (i.e., having the same meaning)?

Pair 2194

P1: Roller Derby. Memphis has an active presence in the derby world courtesy of Memphis Roller Derby. The team is a **sanctioned member** of the Women's Flat Track Derby Association and competes in the South Central Region. The Memphis league has four home teams that compete in intra-league bouts, plus one travel team that competes in other cities.

P2: Roller Derby. Memphis has an active presence in the derby world courtesy of Memphis Roller Derby. The team is a **certified part** of the Women's Flat Track Derby Association and competes in the South Central Region. The Memphis league has four home teams that compete in intra-league bouts, plus one travel team that competes in other cities.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **sanctioned member** and **certified part** interchangeable (i.e., having the same meaning)?

Pair 2195

P1: The main fish sources by country are: It takes 4 to 5 tons of fish to produce one ton of fish meal; about 6 million tons of fish are harvested each year solely to make fish meal. Environmental impact. Fish meal production is a significant contributor of over-fishing, and risks pushing fisheries beyond their **replacement rate**. Some areas of the world, such as Western Africa, have seen a large increase in fish meal production which in turn is hurting local fisheries and driving fisheries into collapse.

P2: The main fish sources by country are: It takes 4 to 5 tons of fish to produce one ton of fish meal; about 6 million tons of fish are harvested each year solely to make fish meal. Environmental impact. Fish meal production is a significant contributor of over-fishing, and risks pushing fisheries beyond their **replenishing time**. Some areas of the world, such as Western Africa, have seen a large increase in fish meal production which in turn is hurting local fisheries and driving fisheries into collapse.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **replacement rate** and **replenishing time** interchangeable (i.e., having the same meaning)?

Pair 2196

P1: Programs. Many of its more than 90 training programs include the teaching of terminology in both of Canada's official languages (French and English). The college also offers apprenticeship programs, in French, in the construction, **motive power**, service, and industrial sectors. La Cité offers postsecondary training in the following fields: La Cité offers

one degree program: Residence.

P2: Programs. Many of its more than 90 training programs include the teaching of terminology in both of Canada's official languages (French and English). The college also offers apprenticeship programs, in French, in the construction, vehicle mechanism, service, and industrial sectors. La Cité offers postsecondary training in the following fields: La Cité offers one degree program: Residence.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **motive power** and **vehicle mechanism** interchangeable (i.e., having the same meaning)?

Pair 2197

P1: Effect on sailing craft. True wind (VT) combines with the sailing craft's velocity (VB) to be the "apparent wind velocity" (VA); the air velocity experienced by instrumentation or crew on a moving sailing craft. Apparent wind velocity provides the **motive power** for the sails on any given point of sail. It varies from being the true wind velocity of a stopped craft in irons in the no-go zone to being faster than the true wind speed as the sailing craft's velocity adds to the true windspeed on a reach, to diminishing towards zero, as a sailing craft sails dead downwind.

P2: Effect on sailing craft. True wind (VT) combines with the sailing craft's velocity (VB) to be the "apparent wind velocity" (VA); the air velocity experienced by instrumentation or crew on a moving sailing craft. Apparent wind velocity provides the **driving forces** for the sails on any given point of sail. It varies from being the true wind velocity of a stopped craft in irons in the no-go zone to being faster than the true wind speed as the sailing craft's velocity adds to the true windspeed on a reach, to diminishing towards zero, as a sailing craft sails dead downwind.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **motive power** and **driving forces** interchangeable (i.e., having the same meaning)?

Pair 2198

P1: The two fatalities in action were sustained when dealing with armed deranged persons. On 9 December 2011, French Defense Minister Gérard Longuet, awarded the Cross for Military Valour to the unit for its participation in operation Harmattan in Libya. On 31 July 2013, the unit won a **second cross** for Military Valour for its participation in the Afghanistan War (2001-). In January 2015, GIGN was engaged for the very first time simultaneously with RAID, the national Police tactical unit, during the January 2015 Île-de-France attacks.

P2: The two fatalities in action were sustained when dealing with armed deranged persons. On 9 December 2011, French Defense Minister Gérard Longuet, awarded the Cross for Military Valour to the unit for its participation in operation Harmattan in Libya. On 31 July 2013, the unit won a **following medal** for Military Valour for its participation in the Afghanistan War (2001-). In January 2015, GIGN was engaged for the very first time simultaneously with RAID, the national Police tactical unit, during the January 2015 Île-de-France attacks.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **second cross** and **following medal** interchangeable (i.e., having the same meaning)?

Pair 2199

P1: Description. The inscription on Vg 8 consists of runes carved in the younger futhark on a serpent that runs up one edge of the runestone, across its face, and then down the other edge. On the face of the stone is a large cross, and a **second cross** is located above the end of the serpent's tail. The inscription is classified as being carved in runestone style Fp.

P2: Description. The inscription on Vg 8 consists of runes carved in the younger futhark on a serpent that runs up one edge of the runestone, across its face, and then down the other edge. On the face of the stone is a large cross, and a **consecutive marking** is located above the end of the serpent's tail. The inscription is classified as being carved in

runestone style Fp.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **second cross** and **consecutive marking** interchangeable (i.e., having the same meaning)?

Pair 2200

P1: Following his election to the Louisiana House of Representatives, he shaved his mustache. Gomez, in his 2000 autobiography, wrote about Duke: He once presented a bill on the floor, one of the few which he had managed to get out of committee. He finished his **opening presentation** and strolled with great self-satisfaction back up the aisle to his seat. In his mind, he had spoken, made his presentation and that was that.

P2: Following his election to the Louisiana House of Representatives, he shaved his mustache. Gomez, in his 2000 autobiography, wrote about Duke: He once presented a bill on the floor, one of the few which he had managed to get out of committee. He finished his **first demonstration** and strolled with great self-satisfaction back up the aisle to his seat. In his mind, he had spoken, made his presentation and that was that.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **opening presentation** and **first demonstration** interchangeable (i.e., having the same meaning)?

Pair 2201

P1: Willow Creek Community Church recently conducted a major survey that revealed that heavy involvement into programs and activities did not necessarily translate into discipleship unless the church had a clear path for believers' development. In response, Chuck Colson stated, "I am cheering Willow Creek on. Think what could happen if, instead of tickling ears, all the churches gave the people **real meat**." Colson does not outright praise or condemn the church growth movement, instead, he states, "During the Reformation, the reformers had a phrase for this spirit.

P2: Willow Creek Community Church recently conducted a major survey that revealed that heavy involvement into programs and activities did not necessarily translate into discipleship unless the church had a clear path for believers' development. In response, Chuck Colson stated, "I am cheering Willow Creek on. Think what could happen if, instead of tickling ears, all the churches gave the people **true steak**." Colson does not outright praise or condemn the church growth movement, instead, he states, "During the Reformation, the reformers had a phrase for this spirit.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **real meat** and **true steak** interchangeable (i.e., having the same meaning)?

Pair 2202

P1: Labinger postulated an inherent limit to OCM selectivity, concluding that "expecting substantial improvements in the OCM performance might not be wise". Labinger's argument, later demonstrated experimentally by Mazanec et al., is based on the mechanism of methane activation, which is a radical mechanism, forming H and CH₃ radicals by the homolytic cleavage of the C-H bond. Ethylene and ethane that are proposed products have C-H bonds of **similar strength**. Thus, any catalyst that can activate methane can also activate the products.

P2: Labinger postulated an inherent limit to OCM selectivity, concluding that "expecting substantial improvements in the OCM performance might not be wise". Labinger's argument, later demonstrated experimentally by Mazanec et al., is based on the mechanism of methane activation, which is a radical mechanism, forming H and CH₃ radicals by the homolytic cleavage of the C-H bond. Ethylene and ethane that are proposed products have C-H bonds of **matching magnitude**. Thus, any catalyst that can activate methane can also activate the products.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **similar strength** and **matching magnitude** interchangeable (i.e., having the same meaning)?

Pair 2203

P1: "The Night Larry Kramer Kissed Me". The triptych ends with a retelling of the performer's 22nd birthday. On June 27, 1985, he attends a performance of "The **normal heart**", the autobiographical play by activist and playwright Larry Kramer. The performer explains that the kiss he intended to witness, the performed, on stage kiss, was not the "kiss" he walked away with.

P2: "The Night Larry Kramer Kissed Me". The triptych ends with a retelling of the performer's 22nd birthday. On June 27, 1985, he attends a performance of "The **autobiographical play**", the autobiographical play by activist and playwright Larry Kramer. The performer explains that the kiss he intended to witness, the performed, on stage kiss, was not the "kiss" he walked away with.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **normal heart** and **autobiographical play** interchangeable (i.e., having the same meaning)?

Pair 2204

P1: He signed with the Yankees over a number of other clubs, including the Los Angeles Angels of Anaheim, Boston Red Sox, Washington Nationals and Baltimore Orioles. The signing with the Yankees reunited Teixeira with teammate Alex Rodriguez who played for the Texas Rangers from 2001 to 2003. Teixeira wore the number 25 instead of his **preferred number** 23, since 23 is retired in honor of Don Mattingly. Mattingly was Teixeira's childhood idol, and was the reason Teixeira wore 23 earlier in his career.

P2: He signed with the Yankees over a number of other clubs, including the Los Angeles Angels of Anaheim, Boston Red Sox, Washington Nationals and Baltimore Orioles. The signing with the Yankees reunited Teixeira with teammate Alex Rodriguez who played for the Texas Rangers from 2001 to 2003. Teixeira wore the number 25 instead of his **desired amount** 23, since 23 is retired in honor of Don Mattingly. Mattingly was Teixeira's childhood idol, and was the reason Teixeira wore 23 earlier in his career.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **preferred number** and **desired amount** interchangeable (i.e., having the same meaning)?

Pair 2205

P1: Very high-capacity, high-speed transfer molding equipment is used to produce drink trays, cup carriers, wine shippers, egg cartons, egg trays, pulp bedpan liners, pulp urinals, fruit trays, slipper pans, commode pans, end caps, etc. Thermoformed fiber. This **newest form** of molded pulp is the highest quality of thin-walled products available today. The process uses "cure-in-the-mold" technology which produces well defined, smooth-surfaced molded pulp products.

P2: Very high-capacity, high-speed transfer molding equipment is used to produce drink trays, cup carriers, wine shippers, egg cartons, egg trays, pulp bedpan liners, pulp urinals, fruit trays, slipper pans, commode pans, end caps, etc. Thermoformed fiber. This **latest substance** of molded pulp is the highest quality of thin-walled products available today. The process uses "cure-in-the-mold" technology which produces well defined, smooth-surfaced molded pulp products.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **newest form** and **latest substance** interchangeable (i.e., having the same meaning)?

Pair 2206

P1: The Accubrake reduces felt recoil by about 53%. Unlike the earlier Pendleton muzzle brake, the Accubrake is a removable, screw-on type brake. The use of muzzle brakes is frowned on by the **hunting community** in particularly in guided hunting situations involving dangerous game. Since the Accubrake is a removable accessory, it can be reserved for sighting in.

P2: The Accubrake reduces felt recoil by about 53%. Unlike the earlier Pendleton muzzle brake, the Accubrake is a removable, screw-on type brake. The use of muzzle brakes is frowned on by the **game society** in particularly in guided hunting situations involving dangerous game. Since the Accubrake is a removable accessory, it can be reserved for sighting in.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **hunting community** and **game society** interchangeable (i.e., having the same meaning)?

Pair 2207

P1: In 1913, the Woman's Club took over the library then eventually in 1915 it was relocated to the east wing of the Women's Club. The Sarasota City Council soon appropriated \$150 a year to locate the library in the old schoolhouse on Main Street rent free for five years. In 1940 the Women's Club requested that the city take **absolute control** of the library so the city moved it to Chidsey Library. As more individuals relocated into the county by the mid 1970s, the increasing need for additional books and materials was evident.

P2: In 1913, the Woman's Club took over the library then eventually in 1915 it was relocated to the east wing of the Women's Club. The Sarasota City Council soon appropriated \$150 a year to locate the library in the old schoolhouse on Main Street rent free for five years. In 1940 the Women's Club requested that the city take **unconditional autocracy** of the library so the city moved it to Chidsey Library. As more individuals relocated into the county by the mid 1970s, the increasing need for additional books and materials was evident.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **absolute control** and **unconditional autocracy** interchangeable (i.e., having the same meaning)?

Pair 2208

P1: In pathological cases, the individual may aim to gain absolute control over their environment, or quite contrarily, to fully submit to some external power (i.e. their partner, a political group etc.). The need for an **absolute control** cannot be fulfilled, therefore it frequently takes the form of fantasy, which sometimes becomes indistinguishable from reality (e.g. in schizophrenia).

P2: In pathological cases, the individual may aim to gain absolute control over their environment, or quite contrarily, to fully submit to some external power (i.e. their partner, a political group etc.). The need for an **unlimited possession** cannot be fulfilled, therefore it frequently takes the form of fantasy, which sometimes becomes indistinguishable from reality (e.g. in schizophrenia).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **absolute control** and **unlimited possession** interchangeable (i.e., having the same meaning)?

Pair 2209

P1: John Smith (15 shares); Ensign John Thaxter (16½ shares); and deacon John Leavitt (with 14½ shares). The layout of the town was distinctive. Many lots were laid out in **long narrow strips**, facilitating more lots with road frontage, and avoiding back lots. Cohasset was originally part of Suffolk County, and when the southern part of the

county was set off as Norfolk County in 1793, it included the towns of Cohasset, Hingham and Hull.

P2: John Smith (15 shares); Ensign John Thaxter (16½ shares); and deacon John Leavitt (with 14½ shares). The layout of the town was distinctive. Many lots were laid out in extended sections, facilitating more lots with road frontage, and avoiding back lots. Cohasset was originally part of Suffolk County, and when the southern part of the county was set off as Norfolk County in 1793, it included the towns of Cohasset, Hingham and Hull.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are long narrow strips and extended sections interchangeable (i.e., having the same meaning)?

Pair 2210

P1: The extrinsic factors include: age, broken grain, immature grain, foreign matter, infected grain and moisture content. Grain quality grade and specification. Grain grading and specification system assures that a particular lot of grain meets the required set standards customer. In many countries grading of grain depends on four main properties; (i) bushel (test) weight (ii) moisture contents (iii) broken foreign material or the percentage fragments example broken corn foreign materials (iv) damaged kernels (i.e.

P2: The extrinsic factors include: age, broken grain, immature grain, foreign matter, infected grain and moisture content. Grain quality grade and specification. In many countries grading of grain depends on four main properties; (i) bushel (test) weight (ii) moisture contents (iii) broken foreign material or the percentage fragments example broken corn foreign materials (iv) damaged kernels (i.e.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are particular lot and specific group interchangeable (i.e., having the same meaning)?

Pair 2211

P1: Most all such lots have had daily commercial use such as surface parking for the neighborhood's drive-in workforce by day, and for some of the neighborhood's automobile driving residents and drive-in bar and restaurant patrons by night. One such vacant lot on 14th Street at Madison, directly adjacent to the boundaries of the neighborhood, is used as a preschool playground for several neighborhood children who attend the school, as it is within walking distance for their 'car-free' parents. A developer recently proposed a project for this particular lot which has been tentatively titled "1301 Madison". Some developers purport that projects proposed for the district's parcels, developed and undeveloped, are substantially exempted from the environmental review provisions of the California Environmental Quality Act(CEQA) because they are considered "infill" parcels.

P2: Most all such lots have had daily commercial use such as surface parking for the neighborhood's drive-in workforce by day, and for some of the neighborhood's automobile driving residents and drive-in bar and restaurant patrons by night. One such vacant lot on 14th Street at Madison, directly adjacent to the boundaries of the neighborhood, is used as a preschool playground for several neighborhood children who attend the school, as it is within walking distance for their 'car-free' parents. A developer recently proposed a project for this unique set which has been tentatively titled "1301 Madison". Some developers purport that projects proposed for the district's parcels, developed and undeveloped, are substantially exempted from the environmental review provisions of the California Environmental Quality Act(CEQA) because they are considered "infill" parcels.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are particular lot and unique set interchangeable (i.e., having the same meaning)?

Pair 2212

P1: Most spacecraft radiators reject between 100 and 350 W of internally generated electronics waste heat per square meter. Radiators' weight typically varies from almost nothing, if an existing structural panel is used as a radiator, to

around 12 kg/m² for a heavy deployable radiator and its support structure. The radiators of the International Space Station are clearly visible as arrays of white square panels attached to the main truss. Heat pipes.

P2: Most spacecraft radiators reject between 100 and 350 W of internally generated electronics waste heat per square meter. Radiators' weight typically varies from almost nothing, if an existing structural panel is used as a radiator, to around 12 kg/m² for a heavy deployable radiator and its support structure. The radiators of the International Space Station are clearly visible as arrays of white square panels attached to the primary structure. Heat pipes.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are main truss and primary structure interchangeable (i.e., having the same meaning)?

Pair 2213

P1: The Methodist College is located in 50 Gascoigne Road in Yau Ma Tei. It's an EMI school for both boys and girls. There are also a few primary schools next to the fruit market. Tung Koon Society Fong Shu Chuen School () is one of them.

P2: The Methodist College is located in 50 Gascoigne Road in Yau Ma Tei. It's an EMI school for both boys and girls. There are also a few primary schools next to the historic area. Tung Koon Society Fong Shu Chuen School () is one of them.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are fruit market and historic area interchangeable (i.e., having the same meaning)?

Pair 2214

P1: Sheldon, looking on, notices the actual taxi driver tied up nearby and realizes Vince is in danger. Sheldon chases and leaps onto the roof of the taxi. Vince takes control of the car, crashing into a fruit market. After another shootout and car chase Vince and Shelly reach the General's estate.

P2: Sheldon, looking on, notices the actual taxi driver tied up nearby and realizes Vince is in danger. Sheldon chases and leaps onto the roof of the taxi. Vince takes control of the car, crashing into a business vendor. After another shootout and car chase Vince and Shelly reach the General's estate.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are fruit market and business vendor interchangeable (i.e., having the same meaning)?

Pair 2215

P1: The Cincinnati Reds had a policy against beards as an unwritten rule until 1999. Before the ban was lifted, the Reds had no players with facial hair since 1902. In 2016, when Mattingly became the field manager of the Miami Marlins, he introduced a complete ban on any facial hair on any players. However, Mattingly's facial hair policy came under scrutiny, as observers noted it bore too great of a resemblance to what "Simpsons" character Mr. Burns wanted from him in his 1992 "Simpsons" guest appearance.

P2: The Cincinnati Reds had a policy against beards as an unwritten rule until 1999. Before the ban was lifted, the Reds had no players with facial hair since 1902. In 2016, when Mattingly became the playing coach of the Miami Marlins, he introduced a complete ban on any facial hair on any players. However, Mattingly's facial hair policy came under scrutiny, as observers noted it bore too great of a resemblance to what "Simpsons" character Mr. Burns wanted from him in his 1992 "Simpsons" guest appearance.

Question: In both passages, are field manager and playing coach interchangeable (i.e., having the same meaning)?

Pair 2216

P1: In 1911 Williams and others formed the Temple Aero Club. The club was based at Woodlawn Field, Temple, Texas. Its officers in 1920 were President, Eldon Kent Williams (Williams' newspaperman brother); Secretary-Treasurer, George W Williams; and **field manager**, Lieutenant Eric A Locking, ex RAF. The club had its own airship in 1920.

P2: In 1911 Williams and others formed the Temple Aero Club. The club was based at Woodlawn Field, Temple, Texas. Its officers in 1920 were President, Eldon Kent Williams (Williams' newspaperman brother); Secretary-Treasurer, George W Williams; and **lieutenant position**, Lieutenant Eric A Locking, ex RAF. The club had its own airship in 1920.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **field manager** and **lieutenant position** interchangeable (i.e., having the same meaning)?

Pair 2217

P1: Clubs generally continued throughout New York City during 2006 and into 2007, but seemed to the clientele to keep their size smaller to avoid the attention that the larger clubs such as NYPC and PlayStation brought. However, robberies still remained common throughout 2007. This issue reached a crescendo when the **city limit**, at 251 Fifth Avenue in Manhattan, was robbed on November 2, 2007. Frank DeSena of Wayne, NJ was killed in an accidental weapons fire during the armed robbery.

P2: Clubs generally continued throughout New York City during 2006 and into 2007, but seemed to the clientele to keep their size smaller to avoid the attention that the larger clubs such as NYPC and PlayStation brought. However, robberies still remained common throughout 2007. This issue reached a crescendo when the **shop name**, at 251 Fifth Avenue in Manhattan, was robbed on November 2, 2007. Frank DeSena of Wayne, NJ was killed in an accidental weapons fire during the armed robbery.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **city limit** and **shop name** interchangeable (i.e., having the same meaning)?

Pair 2218

P1: In parallel a new report, Renewable Energy Tenders and Community [Em]power[ment]: Latin America and the Caribbean was launched. The bi-lingual report (English/Spanish) examines both the rise of tendering and community power projects in the region and proposes an accession process to reconcile the tension between maximising economic returns and social impact. MEXIREC was the **leading event** of the "Dialogues for the Future of Energy, Mexico 2017 (DEMEX)". It was held 11-13 September, 2017 at the Expo Santa Fe Convention Center, Mexico City and co-organised by SENER and REN21 with the support of the German government.

P2: In parallel a new report, Renewable Energy Tenders and Community [Em]power[ment]: Latin America and the Caribbean was launched. The bi-lingual report (English/Spanish) examines both the rise of tendering and community power projects in the region and proposes an accession process to reconcile the tension between maximising economic returns and social impact. MEXIREC was the **primary happening** of the "Dialogues for the Future of Energy, Mexico 2017 (DEMEX)". It was held 11-13 September, 2017 at the Expo Santa Fe Convention Center, Mexico City and co-organised by SENER and REN21 with the support of the German government.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **leading event** and **primary happening** interchangeable (i.e., having the same meaning)?

Pair 2219

P1: Sam Snead won the first tournament, in which the first place check was for \$500. After the war, the event resumed play in 1947 on golf courses in Pebble Beach, where it has been played ever since. Now the AT&T Pebble Beach Pro-Am, it has been a **leading event** in the world of professional golf. In 1950, he became the third person to win the William D. Richardson award, which is given to a non-professional golfer "who has consistently made an outstanding contribution to golf".

P2: Sam Snead won the first tournament, in which the first place check was for \$500. After the war, the event resumed play in 1947 on golf courses in Pebble Beach, where it has been played ever since. Now the AT&T Pebble Beach Pro-Am, it has been a **driving force** in the world of professional golf. In 1950, he became the third person to win the William D. Richardson award, which is given to a non-professional golfer "who has consistently made an outstanding contribution to golf".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **leading event** and **driving force** interchangeable (i.e., having the same meaning)?

Pair 2220

P1: The increased production of these ECM proteins turns the endometrium into the dense structure known as the decidua, which produces factors that promote trophoblast attachment and inhibit overly aggressive invasion. During pregnancy. The decidual reaction is seen in very early pregnancy in the **generalized area** where the blastocyst contacts the endometrial decidua. It consists of an increase in secretory functions of the endometrium at the area of implantation, as well as a surrounding stroma that becomes edematous.

P2: The increased production of these ECM proteins turns the endometrium into the dense structure known as the decidua, which produces factors that promote trophoblast attachment and inhibit overly aggressive invasion. During pregnancy. The decidual reaction is seen in very early pregnancy in the **blanketed region** where the blastocyst contacts the endometrial decidua. It consists of an increase in secretory functions of the endometrium at the area of implantation, as well as a surrounding stroma that becomes edematous.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **generalized area** and **blanketed region** interchangeable (i.e., having the same meaning)?

Pair 2221

P1: Ai Lao () was an ancient tribal alliance country in the west of Yunnan from the Spring and Autumn to the Eastern Han periods, and modern historians say the area included Dehong. In "Chronicles of Huayang", the record of Ailao mentions its territory "3,000 li from west to east, and 4,600 li from south to north", approximately equal to 1,300 km west to east and 1,994 km south to north in modern units. It includes the southwest of Yunnan and most of Myanmar, and in modern research, it is called the **generalized area** of Ailao. In the Han period, Ailao was an influential tribal country with a population of 20,000.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **generalized area** and **overall location** interchangeable (i.e., having the same meaning)?

Pair 2222

P1: These groups were rather conservative in their practices, emphasizing that "gay men and women are no different from those who are straight" and deserve full equality. This philosophy would be dominant again after AIDS, but by the very end of the 1960s, the movement's goals would change and become more radical, demanding a right to be different, and encouraging gay pride. **The symbolic birth of the gay rights movement would not come until the decade had almost come to a close.** Gays were not allowed by law to congregate.

P2: These groups were rather conservative in their practices, emphasizing that "gay men and women are no different from those who are straight" and deserve full equality. This philosophy would be dominant again after AIDS, but by the very end of the 1960s, the movement's goals would change and become more radical, demanding a right to be different, and encouraging gay pride. **The iconic revolution of the gay rights movement would not come until the decade had almost come to a close.** Gays were not allowed by law to congregate.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **symbolic birth** and **iconic revolution** interchangeable (i.e., having the same meaning)?

Pair 2223

P1: Occupiers also criticized finances within the university. Said one doctoral student studying slavery, "I am grateful for what the school has given me, but the lack of transparency about where all that lovely money comes from is something I do not feel comfortable with." **A constant theme, connected to the broader Occupy slogan of "people over profits", was the desire for Harvard to prioritize educating the populace above money.** One post-doc said that Occupy Harvard's "goal is to reaffirm Harvard as a marketplace of ideas where all viewpoints are discussed and analyzed without regard to the amount of money supporting the different ideas."

P2: Occupiers also criticized finances within the university. Said one doctoral student studying slavery, "I am grateful for what the school has given me, but the lack of transparency about where all that lovely money comes from is something I do not feel comfortable with." **A reoccurring motif, connected to the broader Occupy slogan of "people over profits", was the desire for Harvard to prioritize educating the populace above money.** One post-doc said that Occupy Harvard's "goal is to reaffirm Harvard as a marketplace of ideas where all viewpoints are discussed and analyzed without regard to the amount of money supporting the different ideas."

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **constant theme** and **reoccurring motif** interchangeable (i.e., having the same meaning)?

Pair 2224

P1: In 1971, the Bangladeshi liberation struggle against Pakistan was led by secular leaders and secularists hailed the Bangladeshi victory as the triumph of secular Bengali nationalism over religion-centred Pakistani nationalism. While Pakistan's government strives for an Islamic state, Bangladesh was established secular. **After the liberation victory, the Awami League attempted to build a secular order and the pro-Pakistan Islamist parties were barred from political participation.** The majority of East Pakistani ulama had either remained neutral or supported the Pakistani state, since they felt that the break-up of Pakistan would be detrimental for Islam.

P2: In 1971, the Bangladeshi liberation struggle against Pakistan was led by secular leaders and secularists hailed the Bangladeshi victory as the triumph of secular Bengali nationalism over religion-centred Pakistani nationalism. While Pakistan's government strives for an Islamic state, Bangladesh was established secular. **After the liberation victory, the Awami League attempted to build a non-religious sect and the pro-Pakistan Islamist parties were barred from political participation.** The majority of East Pakistani ulama had either remained neutral or supported the Pakistani state, since they felt that the break-up of Pakistan would be detrimental for Islam.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **secular order** and **non-religious sect** interchangeable (i.e., having the same meaning)?

Pair 2225

P1: Sun then visits her father (Byron Chung) and asks for the money. When he demands a reason, she tells him that she has never pried into his affairs, which are clearly illegal, and would like the same respect. **However, she admits that the money will prevent great shame coming to someone she loves.** Mr. Paik realizes she means Jin, and tells her that he will bear the debt by working for him directly, instead of as a floor manager.

P2: Sun then visits her father (Byron Chung) and asks for the money. When he demands a reason, she tells him that she has never pried into his affairs, which are clearly illegal, and would like the same respect. **However, she admits that the money will prevent big embarrassment coming to someone she loves.** Mr. Paik realizes she means Jin, and tells her that he will bear the debt by working for him directly, instead of as a floor manager.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **great shame** and **big embarrassment** interchangeable (i.e., having the same meaning)?

Pair 2226

P1: Properties. Anticommutativity. **Subtraction is anti-commutative, meaning that if one reverses the terms in a difference left-to-right, the result is the negative of the original result.** Symbolically, if "a" and "b" are any two numbers, then Non-associativity.

P2: Properties. Anticommutativity. **Subtraction is anti-commutative, meaning that if one reverses the terms in a difference left-to-right, the result is the negative of the intended consequence.** Symbolically, if "a" and "b" are any two numbers, then Non-associativity.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **original result** and **intended consequence** interchangeable (i.e., having the same meaning)?

Pair 2227

P1: However, on Thanksgiving Day 1963, aged 55, Gibson took to creating her own wrapping paper designs using tempera paint and brown paper grocery bags. This led to a fascination with creating art which lasted until her death. **Howell Raines wrote in June 1971 that "the paintings are not over-powering, they are truly fragile in the best sense.** The colors are very delicate, and while Sybil Gibson's work is figurative, her realism is tempered with a certain dream-like quality."

P2: However, on Thanksgiving Day 1963, aged 55, Gibson took to creating her own wrapping paper designs using tempera paint and brown paper grocery bags. This led to a fascination with creating art which lasted until her death. **Howell Raines wrote in June 1971 that "the paintings are not over-powering, they are truly fragile in the most ideal form.** The colors are very delicate, and while Sybil Gibson's work is figurative, her realism is tempered with a certain dream-like quality."

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **best sense** and **most ideal form** interchangeable (i.e., having the same meaning)?

Pair 2228

P1: The exterior has ornate scrollwork designs. Tapsel gate. **There is a rare design of gate on the north side of the churchyard.** Unique to Sussex, and named after the Sussex family who were responsible for its invention, the Tapsel gate is one of only six remaining in the county, although others may have existed in the past.

P2: The exterior has ornate scrollwork designs. Tapsel gate. **There is a particular layout of gate on the north side of the churchyard.** Unique to Sussex, and named after the Sussex family who were responsible for its invention, the Tapsel

gate is one of only six remaining in the county, although others may have existed in the past.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **rare design** and **particular layout** interchangeable (i.e., having the same meaning)?

Pair 2229

P1: Human pressures on bushmeat populations are growing more rapidly than national population statistics suggest. Over time the hunting of bushmeat has morphed from traditional subsistence to commercial trade. **An increasing population and spread of urbanization has been thought to be one of the leading causes of increases in commercial bushmeat sales.** Hunting bushmeat in West Africa is also an important part of the livelihood for many people who live there.

P2: Human pressures on bushmeat populations are growing more rapidly than national population statistics suggest. Over time the hunting of bushmeat has morphed from traditional subsistence to commercial trade. **An amplifying community and spread of urbanization has been thought to be one of the leading causes of increases in commercial bushmeat sales.** Hunting bushmeat in West Africa is also an important part of the livelihood for many people who live there.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **increasing population** and **amplifying community** interchangeable (i.e., having the same meaning)?

Pair 2230

P1: Going into the final race of the season at Sint Anthonis, Holland, Bauer was still holding the points lead but, the Suzukis were showing improvement. The Sint Anthonis track was composed of deep sand which robbed engines of power and increased fuel consumption. **A Suzuki engineer calculated that their bike's gas tanks did not have sufficient capacity to finish the race.** De Coster then took one of their tanks and drove two and a half hours to have the tank modified to increase its volume.

P2: Going into the final race of the season at Sint Anthonis, Holland, Bauer was still holding the points lead but, the Suzukis were showing improvement. The Sint Anthonis track was composed of deep sand which robbed engines of power and increased fuel consumption. **A Suzuki engineer calculated that their bike's gas tanks did not have adequate space to finish the race.** De Coster then took one of their tanks and drove two and a half hours to have the tank modified to increase its volume.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **sufficient capacity** and **adequate space** interchangeable (i.e., having the same meaning)?

Pair 2231

P1: The field relies upon neuroimaging, isolation of the virus from brain tissue or CSF, serological testing of serum and CSF, and microscopic examination of tissue to diagnose nervous system infections. History. **Neurovirology only became an official field within the past 30 years.** However, the true origin of neurovirology can be accredited to the discovery that some viruses may have an affinity for nervous system tissue.

P2: The field relies upon neuroimaging, isolation of the virus from brain tissue or CSF, serological testing of serum and CSF, and microscopic examination of tissue to diagnose nervous system infections. History. **Neurovirology only became an authorized practice within the past 30 years.** However, the true origin of neurovirology can be accredited to the discovery that some viruses may have an affinity for nervous system tissue.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **official field** and **authorized practice** interchangeable (i.e., having the same meaning)?

Pair 2232

P1: Environment. The area has a main green space of Stockwood Park to enjoy, but also sees the River Lea leave Luton through this area, meaning plenty of wildlife to enjoy as well. The area has **good links** with the local manor house, Luton Hoo with the countryside surrounding the area. Politics.

P2: Environment. The area has a main green space of Stockwood Park to enjoy, but also sees the River Lea leave Luton through this area, meaning plenty of wildlife to enjoy as well. The area has **apt connections** with the local manor house, Luton Hoo with the countryside surrounding the area. Politics.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **good links** and **apt connections** interchangeable (i.e., having the same meaning)?

Pair 2233

P1: Hardy and some of his musician friends made some home recordings on wax phonograph cylinders for their own amusement. As Hardy's tuberculosis worsened and his death seemed inevitable, the friends decided to preserve the cylinders as a memento of Hardy's playing. At least one cylinder survived to the start of the 1950s; the relative who heard it then said Hardy's playing reminded him of Sharkey Bonano. When Tulane University's Jazz Archive was established in the late 1950s, however, a diligent search failed to turn up any of these recordings, which are, alas, presumed lost forever.

P2: Hardy and some of his musician friends made some home recordings on wax phonograph cylinders for their own amusement. As Hardy's tuberculosis worsened and his death seemed inevitable, the friends decided to preserve the cylinders as a memento of Hardy's playing. At single or additional phonograph instrument survived to the start of the 1950s; the relative who heard it then said Hardy's playing reminded him of Sharkey Bonano. When Tulane University's Jazz Archive was established in the late 1950s, however, a diligent search failed to turn up any of these recordings, which are, alas, presumed lost forever.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **least one cylinder** and **single or additional phonograph instrument** interchangeable (i.e., having the same meaning)?

Pair 2234

P1: 1955-65 – The technology for cheap, effective home and commercial air conditioning developed rapidly after World War II. By 1960, the indirect effect on salmon of widespread adoption of air conditioning was clear: (1) greatly increased demand for electricity; and (2) increased overall regional population growth because previously undesirable areas became, with the advent of air conditioning, more desirable places to live. Much of the West Coast is hot during summer months, thus air conditioners found a **receptive market**. Directly relevant to salmon runs, electricity demand is now high for "both" winter and summer, necessitating more generating capacity and transmission lines.

P2: 1955-65 – The technology for cheap, effective home and commercial air conditioning developed rapidly after World War II. Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **former network** and **previous relationship** interchangeable (i.e., having the same meaning)?

Pair 2237

P1: Elaine breaks up with her boyfriend Kevin, but they decide to remain friends. Kevin proves to be a much more reliable friend than Jerry. **Jerry suggests to Elaine that Kevin is "Bizarro Jerry", and explains how the Superman character Bizarro does everything in an opposite manner.** While using the restrooms at a company called Brandt/Leland, Kramer aids an employee with a scanner and is mistaken for a co-worker by the staff.

P2: Elaine breaks up with her boyfriend Kevin, but they decide to remain friends. Kevin proves to be a much more reliable friend than Jerry. **Jerry suggests to Elaine that Kevin is "Bizarro Jerry", and explains how the Superman character Bizarro does everything in an adverse way.** While using the restrooms at a company called Brandt/Leland, Kramer aids an employee with a scanner and is mistaken for a co-worker by the staff.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **opposite manner** and **adverse way** interchangeable (i.e., having the same meaning)?

Pair 2238

P1: The chorale theme assigned to "", first appeared in print in Johannes Bugenhagen's Braunschweig church order, published in Wittenberg in 1525. Luther assigned it then to the "Kyrie eleison" of his "Deutsche Messe". Bach possibly led the **audition performance** of the work in Leipzig in the Thomaskirche on 7 February 1723, probably after the sermon. It is unclear whether a "test" performance of the 1723 revised version took place in Köthen before Bach's audition.

P2: The chorale theme assigned to "", first appeared in print in Johannes Bugenhagen's Braunschweig church order, published in Wittenberg in 1525. Luther assigned it then to the "Kyrie eleison" of his "Deutsche Messe". Bach possibly led the **preliminary show** of the work in Leipzig in the Thomaskirche on 7 February 1723, probably after the sermon. It is unclear whether a "test" performance of the 1723 revised version took place in Köthen before Bach's audition.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **audition performance** and **preliminary show** interchangeable (i.e., having the same meaning)?

Pair 2239

P1: On September 26, the Southeastern Conference announced that Texas A&M would leave the Big 12 Conference and become the league's 13th member in July 2012. Missouri also announced plans to depart the Big 12 to join the SEC on November 6, bringing SEC conference membership to 14 schools. Facing the **imminent loss** of four members, the Big 12 announced the addition of TCU from the Mountain West Conference on October 10. In order to join the Big 12, TCU had to renege on an agreement it had made less than year earlier to join the Big East.

P2: On September 26, the Southeastern Conference announced that Texas A&M would leave the Big 12 Conference and become the league's 13th member in July 2012. Missouri also announced plans to depart the Big 12 to join the SEC on November 6, bringing SEC conference membership to 14 schools. Facing the **upcoming cost** of four members, the Big 12 announced the addition of TCU from the Mountain West Conference on October 10. In order to join the Big 12, TCU had to renege on an agreement it had made less than year earlier to join the Big East.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **imminent loss** and **upcoming cost** interchangeable (i.e., having the same meaning)?

Pair 2240

P1: Since 2013 it has also housed Puddletown Community Library, which is operated solely by volunteers. On Athelhampton Road there is a doctor's surgery, which also treats patients who live in surrounding villages. Puddletown has a recreation ground on Three Lanes Way; it has one cricket pitch and two grass football pitches (**one junior**, one full-size). Literary connections.

P2: Since 2013 it has also housed Puddletown Community Library, which is operated solely by volunteers. On Athelhampton Road there is a doctor's surgery, which also treats patients who live in surrounding villages. Puddletown has a recreation ground on Three Lanes Way; it has one cricket pitch and two grass football pitches (**single small size**, one full-size). Literary connections.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one junior** and **single small size** interchangeable (i.e., having the same meaning)?

Pair 2241

P1: The program was supposedly a part of 5 Star Specials. Plot. “Lady Dada tells the story of hard luck Dindo (Ryan Agoncillo) who barely succeeds in every business and job he gets into. His star-crossed ventures eventually ruined his marriage with Rina (Mylene Dizon).

P2: The program was supposedly a part of 5 Star Specials. Plot. “Lady Dada tells the story of hard luck Dindo (Ryan Agoncillo) who barely succeeds in all endeavors and job he gets into. His star-crossed ventures eventually ruined his marriage with Rina (Mylene Dizon).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are every business and all endeavors interchangeable (i.e., having the same meaning)?

Pair 2242

P1: Prometheus is the site of a volcanic eruption that has been ongoing since at least the “Voyager 1” encounter in 1979. Between the Voyager encounters and the first observations by “Galileo”, a flow field was emplaced. Later “Galileo” observations of this flow field revealed numerous small breakouts, particularly on the western end of the flow field. Prometheus is the site of two volcanic eruption plumes: a small, sulfur-rich plume erupting from the magma-source vent at the eastern end of the flow field and a -tall, -rich dust plume erupting from the active flow front at the other end.

P2: Prometheus is the site of a volcanic eruption that has been ongoing since at least the “Voyager 1” encounter in 1979. Between the Voyager encounters and the first observations by “Galileo”, a flow field was emplaced. Later “Galileo” observations of this flow field revealed numerous small breakouts, particularly on the opposite of east point of the flow field. Prometheus is the site of two volcanic eruption plumes: a small, sulfur-rich plume erupting from the magma-source vent at the eastern end of the flow field and a -tall, -rich dust plume erupting from the active flow front at the other end.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are western end and opposite of east point interchangeable (i.e., having the same meaning)?

Pair 2243

P1: Usually each of the protagonists is an only child and oftentimes at least one parent is dead. Song Geng comments that by having one or more of the parents dead, the number of characters is reduced and “this plotline may also serve to emphasize the extraordinary value and peerless perfection of the scholar and beauty”. The story, Hu Wanchuan continues, characteristically opens with an unexpected meeting between the two and love at first sight. The woman often has a female servant who serves as a matchmaker and mediates between the lovers.

P2: Usually each of the protagonists is an only child and oftentimes at least one parent is dead. Song Geng comments that by having one or more of the parents dead, the number of characters is reduced and “this plotline may also serve to emphasize the extraordinary value and peerless perfection of the scholar and beauty”. The story, Hu Wanchuan continues, characteristically opens with an astonishing gathering between the two and love at first sight. The woman often has a female servant who serves as a matchmaker and mediates between the lovers.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are unexpected meeting and astonishing gathering interchangeable (i.e., having the same meaning)?

Pair 2244

P1: There is a distinction between what is termed work-to-family conflict and what is termed family-to-work conflict. Work-to-family conflict occurs when experiences and commitments at work interfere with family life, such as extensive, irregular, or inflexible work hours, work overload and other forms of job stress, interpersonal conflict at work, extensive travel, career transitions, or an unsupportive supervisor or organization. For example, an unexpected meeting late

in the day may prevent a parent from picking up his or her child from school. Family-to-work conflict occurs when experiences and commitments in the family interfere with work life, such as the presence of young children, primary responsibility for children, elder care responsibilities, interpersonal conflict within the family unit, or unsupportive family members.

P2: There is a distinction between what is termed work-to-family conflict and what is termed family-to-work conflict. Work-to-family conflict occurs when experiences and commitments at work interfere with family life, such as extensive, irregular, or inflexible work hours, work overload and other forms of job stress, interpersonal conflict at work, extensive travel, career transitions, or an unsupportive supervisor or organization. For example, an **impromptu rendezvous late in the day may prevent a parent from picking up his or her child from school**. Family-to-work conflict occurs when experiences and commitments in the family interfere with work life, such as the presence of young children, primary responsibility for children, elder care responsibilities, interpersonal conflict within the family unit, or unsupportive family members.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **unexpected meeting** and **impromptu rendezvous** interchangeable (i.e., having the same meaning)?

Pair 2245

P1: The police deployed the Police Tactical Unit (PTU) to disperse the crowd. At 5 AM, the riot subsided and 18 were arrested. The same day, the Government of Hong Kong increased the number of policemen patrolling **major business areas** and kept cars away from the Central District. The day after the incident, Secretary for Home Affairs Denis Bray dismissed characterisations of the event as rioting, calling it "just some disturbances caused by kids who had too much to drink".

P2: The police deployed the Police Tactical Unit (PTU) to disperse the crowd. At 5 AM, the riot subsided and 18 were arrested. The same day, the Government of Hong Kong increased the number of policemen patrolling **important market locations** and kept cars away from the Central District. The day after the incident, Secretary for Home Affairs Denis Bray dismissed characterisations of the event as rioting, calling it "just some disturbances caused by kids who had too much to drink".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **major business areas** and **important market locations** interchangeable (i.e., having the same meaning)?

Pair 2246

P1: Clark was born in Adelaide. He is a graduate of St Peter's College, and was a keen participant in several high school theatre productions, including a main role in "West Side Story". In 2006, Clark formed a group (originally a duo) called, **solid white line** with members, Jake Long and James Brown. Acting career.

P2: Clark was born in Adelaide. He is a graduate of St Peter's College, and was a keen participant in several high school theatre productions, including a main role in "West Side Story". In 2006, Clark formed a group (originally a duo) called, **music group** with members, Jake Long and James Brown. Acting career.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **solid white line** and **music group** interchangeable (i.e., having the same meaning)?

Pair 2247

P1: Haul trucks are off-highway, rigid dump trucks specifically engineered for use in high-production mining and heavy-duty construction environments. Haul trucks are also used for transporting construction equipment from **job site** to job site. Some are multi-axle in order to support the equipment that is being hauled.

P2: Haul trucks are off-highway, rigid dump trucks specifically engineered for use in high-production mining and heavy-duty construction environments. Haul trucks are also used for transporting construction equipment from **occupation location**

to job site. Some are multi-axle in order to support the equipment that is being hauled.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **job site** and **occupation location** interchangeable (i.e., having the same meaning)?

Pair 2248

P1: Mora reports that he was "disturbed" and felt he had to learn more. Mora described his reaction to learning of the authorization for coercive interrogation techniques in these words: To my mind, there's no moral or practical distinction [between cruelty and torture]. If cruelty is no longer declared unlawful, but instead is applied as a matter of policy, it alters the **fundamental relationship** of man to government. It destroys the whole notion of individual rights.

P2: Mora reports that he was "disturbed" and felt he had to learn more. Mora described his reaction to learning of the authorization for coercive interrogation techniques in these words: To my mind, there's no moral or practical distinction [between cruelty and torture]. If cruelty is no longer declared unlawful, but instead is applied as a matter of policy, it alters the **important agreement** of man to government. It destroys the whole notion of individual rights.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **fundamental relationship** and **important agreement** interchangeable (i.e., having the same meaning)?

Pair 2249

P1: By chemical structure. In general, corticosteroids are grouped into four classes, based on chemical structure. Allergic reactions to **one member** of a class typically indicate an intolerance of all members of the class. This is known as the "Coopman classification".

P2: By chemical structure. In general, corticosteroids are grouped into four classes, based on chemical structure. Allergic reactions to **single person** of a class typically indicate an intolerance of all members of the class. This is known as the "Coopman classification".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one member** and **single person** interchangeable (i.e., having the same meaning)?

Pair 2250

P1: At approximately , the coffee will emit a cracking sound. This point is referred to as "first crack," marking the beginnings of a very "light roast". At **first crack**, a large amount of the coffee's moisture has been evaporated and the beans will begin to increase in size. When the coffee reaches approximately , it emits a "second crack", this sound represents the structure of the coffee becoming brittle and fracturing as the bean continues to swell and enlarge from internal pressure.

P2: At approximately , the coffee will emit a cracking sound. This point is referred to as "first crack," marking the beginnings of a very "light roast". At **new split**, a large amount of the coffee's moisture has been evaporated and the beans will begin to increase in size. When the coffee reaches approximately , it emits a "second crack", this sound represents the structure of the coffee becoming brittle and fracturing as the bean continues to swell and enlarge from internal pressure.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **first crack** and **new split** interchangeable (i.e., having the same meaning)?

Pair 2251

P1: Jan-Feb. 2011 L'oeil de la Photographie. Edward Albee and Dimitris Yeros Another Narcissus. December 2, 2016 The **quarterly review** "Harbours hitherto unseen the charm of Constantine Cavafy, by Derek Turner. March 25, 2013 Η ΦΑΝΤΑΣΙΑ ΤΟΥ ΓΕΡΟΥ, ΣΥΝΕΝΤΕΥΞΗ ΣΤΟΝ ΧΑΡΗ ΒΗΜΑΖΙΝΟ 13 March 2016 La fortuna de retratar a García Márquez, El Universal, 9-12-2015 Inauguran exposición con imágenes de Dimitris Yeros, La Jornada 10-12-2015 EL HERALDO - Dimitris Yeros, el griego que retrató a Gabo, 27-11-2015 THE OPÉRA, Vol.

P2: Jan-Feb. 2011 L'oeil de la Photographie. Edward Albee and Dimitris Yeros Another Narcissus. December 2, 2016 The **magazine title** "Harbours hitherto unseen the charm of Constantine Cavafy, by Derek Turner. March 25, 2013 Η ΦΑΝΤΑΣΙΑ ΤΟΥ ΓΕΡΟΥ, ΣΥΝΕΝΤΕΥΞΗ ΣΤΟΝ ΧΑΡΗ ΒΗΜΑΖΙΝΟ 13 March 2016 La fortuna de retratar a García Márquez, El Universal, 9-12-2015 Inauguran exposición con imágenes de Dimitris Yeros, La Jornada 10-12-2015 EL HERALDO - Dimitris Yeros, el griego que retrató a Gabo, 27-11-2015 THE OPÉRA, Vol.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **quarterly review** and **magazine title** interchangeable (i.e., having the same meaning)?

Pair 2252

P1: While the debate and political situation as regards the policing of nationalist areas in Northern Ireland is losing heat and becoming less hostile, it remains to be thought that the adequacy of Derry's own security personnel discards the need for state policing of games as far as the safety of match-goers is concerned. Financial difficulties and flirtation with relegation (2000–04). Despite the club's successes, Derry City's path has not always been a **smooth one**. In September 2000, the club was in a crippled position from a financial perspective and on the verge of bankruptcy due to an unpaid tax bill.

P2: While the debate and political situation as regards the policing of nationalist areas in Northern Ireland is losing heat and becoming less hostile, it remains to be thought that the adequacy of Derry's own security personnel discards the need for state policing of games as far as the safety of match-goers is concerned. Financial difficulties and flirtation with relegation (2000–04). Despite the club's successes, Derry City's path has not always been a **painless path**. In September 2000, the club was in a crippled position from a financial perspective and on the verge of bankruptcy due to an unpaid tax bill.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **smooth one** and **painless path** interchangeable (i.e., having the same meaning)?

Pair 2253

P1: Most of the research is done taking advantage of RA-6, a 1 MW experimental reactor. Experiments done with the RA-6 include irradiation and radioactive activation of several materials. Some research groups also focus on refining reactor calculations and **performance measurements** and designing mechanical devices for those tasks. Various companies have sprung out of the Bariloche Atomic Center, such as INVAP y ALTEC.

P2: Most of the research is done taking advantage of RA-6, a 1 MW experimental reactor. Experiments done with the RA-6 include irradiation and radioactive activation of several materials. Some research groups also focus on refining reactor calculations and **key metrics** and designing mechanical devices for those tasks. Various companies have sprung out of the Bariloche Atomic Center, such as INVAP y ALTEC.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **performance measurements** and **key metrics** interchangeable (i.e., having the same meaning)?

Pair 2254

P1: In tests where the dog and handler team are judged against a standard, in some instances it has been adjudged that none of the dogs reached the required standard and awards have been withheld. This is, however, an unusual occurrence.

It is more common for awards to be limited to **one or two places** than not to be awarded. An award is any placing in a stake decided by the judges which may be first, second, third or fourth position.

P2: In tests where the dog and handler team are judged against a standard, in some instances it has been adjudged that none of the dogs reached the required standard and awards have been withheld. This is, however, an unusual occurrence. It is more common for awards to be limited to **first few spaces** than not to be awarded. An award is any placing in a stake decided by the judges which may be first, second, third or fourth position.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one or two places** and **first few spaces** interchangeable (i.e., having the same meaning)?

Pair 2255

P1: The line opened on May 23, 2015. Route. The Purple Line begins at its northern terminus at Smith Street with **split tracks** on Capitol and Rusk Streets. The northbound track will run along Capitol Street in downtown, while its southbound counterpart will run down Rusk Street.

P2: The line opened on May 23, 2015. Route. The Purple Line begins at its northern terminus at Smith Street with **not joined paths** on Capitol and Rusk Streets. The northbound track will run along Capitol Street in downtown, while its southbound counterpart will run down Rusk Street.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **split tracks** and **not joined paths** interchangeable (i.e., having the same meaning)?

Pair 2256

P1: In July 2007, following widespread storms over parts of the United Kingdom, Dow stated that he believed the resulting flooding (in which several people were killed) was an act of divine retribution, the result of God's "strong and definite judgement" on the "moral degradation" of British society. In particular, he blamed the economic exploitation of poorer nations and the United Kingdom's introduction of laws aimed at reducing discrimination against gay people, notably the proposals to introduce same-sex marriage. He stated that "the Sexual Orientation Regulations are part of a **general scene** of permissiveness. We are in a situation where we are liable for God's judgement."

P2: In July 2007, following widespread storms over parts of the United Kingdom, Dow stated that he believed the resulting flooding (in which several people were killed) was an act of divine retribution, the result of God's "strong and definite judgement" on the "moral degradation" of British society. In particular, he blamed the economic exploitation of poorer nations and the United Kingdom's introduction of laws aimed at reducing discrimination against gay people, notably the proposals to introduce same-sex marriage. He stated that "the Sexual Orientation Regulations are part of a **regular background** of permissiveness. We are in a situation where we are liable for God's judgement."

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **general scene** and **regular background** interchangeable (i.e., having the same meaning)?

Pair 2257

P1: Following the death of Pope Miltiades (311–14), Sylvester is elected pope in which his charity and pastoral care are notable signatures of his papacy. Part two (Mombritius, 510–515). The second part is the most **well-known section** of the "Acts", and arguably had the most influential aspect on Catholic apologetics. Constantine, stricken with leprosy, consults numerous magicians and physicians to no avail, when he is finally advised by the pagan priests to bathe in the warm blood of children.

P2: Following the death of Pope Miltiades (311–14), Sylvester is elected pope in which his charity and pastoral care are notable signatures of his papacy. Part two (Mombritius, 510–515). The second part is the most **influential piece**

of the "Acts", and arguably had the most influential aspect on Catholic apologetics. Constantine, stricken with leprosy, consults numerous magicians and physicians to no avail, when he is finally advised by the pagan priests to bathe in the warm blood of children.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **well-known section** and **influential piece** interchangeable (i.e., having the same meaning)?

Pair 2258

P1: Due to the method, much of the subjects' data will be excluded from analysis, leaving a bias in data findings. For instance, a questionnaire may include questions about respondents drug use history, current earnings, or sexual persuasions. Many of the subjects in the sample may not answer due to the **intrusive nature** of the questions, but may answer all other items. Listwise deletion will exclude these respondents from analysis.

P2: Due to the method, much of the subjects' data will be excluded from analysis, leaving a bias in data findings. For instance, a questionnaire may include questions about respondents drug use history, current earnings, or sexual persuasions. Many of the subjects in the sample may not answer due to the **invasive manner** of the questions, but may answer all other items. Listwise deletion will exclude these respondents from analysis.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **intrusive nature** and **invasive manner** interchangeable (i.e., having the same meaning)?

Pair 2259

P1: The University of Twente is known for its international population (>40%), its student-activism and its strong focus on interdisciplinary collaboration, hence its slogan "High Tech, Human Touch." Within one year after his installation, Victor van der Chijs designed a more focused strategy for the future of the university together with students, staff, alumni and external stakeholders. Known as Vision 2020, the University's current strategic direction aims to find innovative solutions for **major societal issues**. Van der Chijs' appointment has contributed strongly to the international profile of the University, with growing numbers in influx of students and researchers.

P2: The University of Twente is known for its international population (>40%), its student-activism and its strong focus on interdisciplinary collaboration, hence its slogan "High Tech, Human Touch." Within one year after his installation, Victor van der Chijs designed a more focused strategy for the future of the university together with students, staff, alumni and external stakeholders. Known as Vision 2020, the University's current strategic direction aims to find innovative solutions for **key community problems**. Van der Chijs' appointment has contributed strongly to the international profile of the University, with growing numbers in influx of students and researchers.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **major societal issues** and **key community problems** interchangeable (i.e., having the same meaning)?

Pair 2260

P1: Advocacy. Through her autobiography and her preachings, Foote shed light on the discrimination that African American people face in the United States, and also the prejudices against women that exist. She used her religious voice and impact to spread far-reaching messages about these **major societal issues**. She felt that if women read, heard, and grasped the power of the gospel they would be free from prejudices and discrimination, and she actively sought for women to be able to preach in churches.

P2: Advocacy. Through her autobiography and her preachings, Foote shed light on the discrimination that African American people face in the United States, and also the prejudices against women that exist. She used her religious voice and impact to spread far-reaching messages about these **important worldly concerns**. She felt that if women

read, heard, and grasped the power of the gospel they would be free from prejudices and discrimination, and she actively sought for women to be able to preach in churches.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **major societal issues** and **important worldly concerns** interchangeable (i.e., having the same meaning)?

Pair 2261

P1: Also recently, traditionally rock-oriented acts like They Might Be Giants have released albums marketed directly to children, such as "No!" and "Here Come the ABCs". Jimmy Buffett simply remade his "Cheeseburger in Paradise" song into children's music with cleaned up lyrics ("Root Beer" instead of "draft beer"). His songs were already kid friendly with catchy lyrics and simple melodies punctuated with penny whistles and ship bell sound effects.

P2: Also recently, traditionally rock-oriented acts like They Might Be Giants have released albums marketed directly to children, such as "No!" and "Here Come the ABCs". Jimmy Buffett simply remade his "Cheeseburger in Paradise" song into children's music with cleaned up lyrics ("Root Beer" instead of "on tap beverage"). His songs were already kid friendly with catchy lyrics and simple melodies punctuated with penny whistles and ship bell sound effects.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **draft beer** and **on tap beverage** interchangeable (i.e., having the same meaning)?

Pair 2262

P1: A light variety was launched in 2008. Modelo Negra. Modelo Negra is a 5.4% abv Dunkel-style lager first brewed in Mexico by Austrian immigrants, and was introduced as a **draft beer** in 1926. Modelo Negra comes in an unusually shaped, wide brown bottle with a trademark gold label.

P2: A light variety was launched in 2008. Modelo Negra. Modelo Negra is a 5.4% abv Dunkel-style lager first brewed in Mexico by Austrian immigrants, and was introduced as a **drink of the alcoholic nature** in 1926. Modelo Negra comes in an unusually shaped, wide brown bottle with a trademark gold label.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **draft beer** and **drink of the alcoholic nature** interchangeable (i.e., having the same meaning)?

Pair 2263

P1: Although there is some specialization, the vast majority of racers compete in both classic and sprint. Competitors are placed in classes based on gender and boat type as follows: The competitors are numbered within their class based on results from previous races and compete in reverse order (best paddler last), usually at one-minute intervals. To race successfully, paddlers must possess refined technical skill, as well as strength, endurance, **aerobic capacity**, and the ability to "read" whitewater. Whitewater racing is also practiced by competing teams; each team is made by a group of three competitors belonging to the same class.

P2: Although there is some specialization, the vast majority of racers compete in both classic and sprint. Competitors are placed in classes based on gender and boat type as follows: The competitors are numbered within their class based on results from previous races and compete in reverse order (best paddler last), usually at one-minute intervals. To race successfully, paddlers must possess refined technical skill, as well as strength, endurance, **air volume**, and the ability to "read" whitewater. Whitewater racing is also practiced by competing teams; each team is made by a group of three competitors belonging to the same class.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **aerobic capacity** and **air volume** interchangeable (i.e., having the same meaning)?

Pair 2264

P1: In the NAIA playoffs, they defeated Cumberlands (48–41), Concordia (54–38) and Kansas Wesleyan (43–21) to advance to the NAIA title game. Top-ranked Morningside defeated Benedictine 35–28 in Daytona Beach, Fla. More than 3,000 Benedictine fans traveled to the game. **St. Benedict's started football in 1920 and the program enjoyed several high points in its early years.** The school dropped football after the 1962 season.

P2: In the NAIA playoffs, they defeated Cumberlands (48–41), Concordia (54–38) and Kansas Wesleyan (43–21) to advance to the NAIA title game. Top-ranked Morningside defeated Benedictine 35–28 in Daytona Beach, Fla. More than 3,000 Benedictine fans traveled to the game. **St. Benedict's started football in 1920 and the program enjoyed many key moments in its early years.** The school dropped football after the 1962 season.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **several high points** and **many key moments** interchangeable (i.e., having the same meaning)?

Pair 2265

P1: Members of a free union may refer to each other as partners, spouses, or any other title, but may find themselves subject to the laws of common law marriage if they consistently refer to themselves as husband and wife according to their local jurisdiction. Roman Catholic criticism. **According to Catholicism, the expression "free union" includes situations such as concubinage, rejection of marriage as such, or inability to make long-term commitments.** According to the Catechism of the Catholic Church, being in a "free union" is a grave offense against the dignity of marriage, which it sees as a Sacrament.

P2: Members of a free union may refer to each other as partners, spouses, or any other title, but may find themselves subject to the laws of common law marriage if they consistently refer to themselves as husband and wife according to their local jurisdiction. Roman Catholic criticism. **According to Catholicism, the expression "marriage alternative" includes situations such as concubinage, rejection of marriage as such, or inability to make long-term commitments.** According to the Catechism of the Catholic Church, being in a "free union" is a grave offense against the dignity of marriage, which it sees as a Sacrament.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **free union** and **marriage alternative** interchangeable (i.e., having the same meaning)?

Pair 2266

P1: Originally an island with fishing villages, it has been developed since the late 20th century with the construction of Tung Chung New Town on its north-western coast and the completion of several major infrastructure projects, including Lantau Link (1997), Hong Kong International Airport (1998), Hong Kong Disneyland (2005) and Ngong Ping 360 (2006). Geography. **With a land mass of , it is the largest island in Hong Kong, almost twice the size of Hong Kong Island.** Lantau Island primarily consists of mountainous terrain.

P2: Originally an island with fishing villages, it has been developed since the late 20th century with the construction of Tung Chung New Town on its north-western coast and the completion of several major infrastructure projects, including Lantau Link (1997), Hong Kong International Airport (1998), Hong Kong Disneyland (2005) and Ngong Ping 360 (2006). Geography. **With a land mass of , it is the largest island in Hong Kong, two times magnitude of Hong Kong Island.** Lantau Island primarily consists of mountainous terrain.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **almost twice the size** and **two times magnitude** interchangeable (i.e., having the same meaning)?

Pair 2267

P1: During this time, the Middle School Orchestra plays music. After everyone is seated, there are multiple performances from the HB Singers, Bravuras, and Upper School Orchestra. Afterwards, girls from many grades give speeches for their thankfulness, as well as the headmaster delivering the **final speech** until dismissal. Winterfest.

P2: During this time, the Middle School Orchestra plays music. After everyone is seated, there are multiple performances from the HB Singers, Bravuras, and Upper School Orchestra. Afterwards, girls from many grades give speeches for their thankfulness, as well as the headmaster delivering the **ultimate testament** until dismissal. Winterfest.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **final speech** and **ultimate testament** interchangeable (i.e., having the same meaning)?

Pair 2268

P1: The card readers were developed entirely by Cubic, whereas development of the back office systems was started by Fujitsu and completed by Cubic. The system has the capability to interface with equipment or services provided by other suppliers. The Oyster website is not part of the **closed system** but interfaces with it. Similarly, Oyster readers are now embedded into ticket machines produced by Shere and Scheidt and Bachmann on the national rail network.

P2: The card readers were developed entirely by Cubic, whereas development of the back office systems was started by Fujitsu and completed by Cubic. The system has the capability to interface with equipment or services provided by other suppliers. The Oyster website is not part of the **restricted structure** but interfaces with it. Similarly, Oyster readers are now embedded into ticket machines produced by Shere and Scheidt and Bachmann on the national rail network.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **closed system** and **restricted structure** interchangeable (i.e., having the same meaning)?

Pair 2269

P1: They reconnoitred the surrounding area for about two hours and filmed it with an 8 mm camera. The following day, "Matsu Kikan" personnel again reconnoitred the area, before returning to Kupang. "Matsu Kikan" did not see any signs of **recent human activity**, and little of military significance was learnt from the mission. An officer involved with the mission reportedly returned to Japan shortly afterward, where he suggested landing 200 Japanese convicts in Australia, to launch a guerrilla campaign.

P2: They reconnoitred the surrounding area for about two hours and filmed it with an 8 mm camera. The following day, "Matsu Kikan" personnel again reconnoitred the area, before returning to Kupang. "Matsu Kikan" did not see any signs of **current people usage**, and little of military significance was learnt from the mission. An officer involved with the mission reportedly returned to Japan shortly afterward, where he suggested landing 200 Japanese convicts in Australia, to launch a guerrilla campaign.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **recent human activity** and **current people usage** interchangeable (i.e., having the same meaning)?

Pair 2270

P1: *Lucanus datunensis* is a species of stag beetle endemic to the Tatun Mountain of Taiwan's Yangmingshan. It is first discovered in 1984. It is the smallest stag beetle in Taiwan and is an endangered species threatened by

recent human activity. Etymology.

P2: *Lucanus datunensis* is a species of stag beetle endemic to the Tatun Mountain of Taiwan's Yangmingshan. It is first discovered in 1984. **It is the smallest stag beetle in Taiwan and is an endangered species threatened by modern *Homo sapiens* population.** Etymology.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **recent human activity** and **modern *Homo sapiens* population** interchangeable (i.e., having the same meaning)?

Pair 2271

P1: Jon's origins are retconned in the story arc "Superman Reborn". In the four-part story, two different versions of Superman and Lois Lane (the New 52 and Post-"Crisis") are merged into one complete version, creating a new DC Universe and a new origin story for Jon. **Jon is the most recent character in DC Comics to assume the mantle of Superboy.** He was officially introduced as Superboy in "Superman" vol.

P2: Jon's origins are retconned in the story arc "Superman Reborn". In the four-part story, two different versions of Superman and Lois Lane (the New 52 and Post-"Crisis") are merged into one complete version, creating a new DC Universe and a new origin story for Jon. **Jon is the most current person in DC Comics to assume the mantle of Superboy.** He was officially introduced as Superboy in "Superman" vol.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **recent character** and **current person** interchangeable (i.e., having the same meaning)?

Pair 2272

P1: A CTT tax rate designed with a pragmatic goal of raising revenue for various development projects, rather than to fulfill Tobin's original goals (of "slowing the flow of capital across borders" and "preventing or managing exchange rate crises"), should avoid altering the existing "fundamental market behavior", and thus, according to Schmidt, must not exceed 0.00005, i.e., the observed levels of currency transaction costs (bid-ask spreads). The mathematician Paul Wilmott has pointed out that while perhaps some trading ought to be discouraged, trading for the hedging of derivatives is generally considered a good thing in that it can reduce risk, and this should not be punished. **He estimates that any financial tax should be at most one basis point so as to have negligible effect on hedging.** Assuming that all currency market participants incur the same maximum level of transaction costs (the full cost of the bid-ask spread), as opposed to earning them in their capacity of market makers, and assuming that no untaxed substitutes exist for spot currency markets transactions (such as currency futures and currency exchange-traded funds), Schmidt (2007) finds that a CTT rate of 0.00005 would be nearly volume-neutral, reducing foreign exchange transaction volumes by only 14%.

P2: A CTT tax rate designed with a pragmatic goal of raising revenue for various development projects, rather than to fulfill Tobin's original goals (of "slowing the flow of capital across borders" and "preventing or managing exchange rate crises"), should avoid altering the existing "fundamental market behavior", and thus, according to Schmidt, must not exceed 0.00005, i.e., the observed levels of currency transaction costs (bid-ask spreads). The mathematician Paul Wilmott has pointed out that while perhaps some trading ought to be discouraged, trading for the hedging of derivatives is generally considered a good thing in that it can reduce risk, and this should not be punished. **He estimates that any financial tax should be at most one basis point so as to have minor impact on hedging.** Assuming that all currency market participants incur the same maximum level of transaction costs (the full cost of the bid-ask spread), as opposed to earning them in their capacity of market makers, and assuming that no untaxed substitutes exist for spot currency markets transactions (such as currency futures and currency exchange-traded funds), Schmidt (2007) finds that a CTT rate of 0.00005 would be nearly volume-neutral, reducing foreign exchange transaction volumes by only 14%.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **negligible effect** and **minor impact** interchangeable (i.e., having the same meaning)?

Pair 2273

P1: A 22 pin board can be plugged into a 12 pin harness and will work correctly except for the paintball detection system. Anti-chop system. An anti-chop eye system known as PDS (Paintball Detection System) is available stock on 2003 and newer models or can be installed by qualified sources. PDS uses a sender and receiver photocell that detects whether or not a paintball has been loaded into the breech of the marker.

P2: A 22 pin board can be plugged into a 12 pin harness and will work correctly except for the paintball detection system. Anti-chop system. An anti-chop eye system known as PDS (Paintball Detection System) is part of the OEM on 2003 and newer models or can be installed by qualified sources. PDS uses a sender and receiver photocell that detects whether or not a paintball has been loaded into the breech of the marker.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are available stock and part of the OEM interchangeable (i.e., having the same meaning)?

Pair 2274

P1: It had its basis in over forty years of high education of seafarers at the Maritime Faculty of Dubrovnik and more than thirty years of education Business economics (tourism, marketing and foreign trade). The higher education in Dubrovnik has gone through various phases, with their ups and downs. However, there always remained a strong wish to preserve the identity of the City in this field as well. When the Croatian Parliament ("Hrvatski sabor") adopted the new Higher Education Act in 1994, introducing two separate systems in higher education: one scientific, i.e.

P2: It had its basis in over forty years of high education of seafarers at the Maritime Faculty of Dubrovnik and more than thirty years of education Business economics (tourism, marketing and foreign trade). The higher education in Dubrovnik has gone through various phases, with their ups and downs. However, there always remained a big hope to preserve the identity of the City in this field as well. When the Croatian Parliament ("Hrvatski sabor") adopted the new Higher Education Act in 1994, introducing two separate systems in higher education: one scientific, i.e.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are strong wish and big hope interchangeable (i.e., having the same meaning)?

Pair 2275

P1: The following is the Deyunshe statement (with abridged): "It is decided to suspend the regular performances of all the small theatres (Beijing Deyunshe Theater, Deyunshe Sanlitun Theatre, Zhangyiyuan Tianqiao Teahouse, Guangdelou Theater) from August 9, 2010 (Monday). Check and carry out internal rectification. The specific performance recovery time will be announced separately according to the actual situation." Many Xiangsheng actors oppose the huge market share of Deyunshe in the Xiangsheng performance industry, they believe that Deyunshe's success has taken away their audience and made their performance despised.

P2: The following is the Deyunshe statement (with abridged): "It is decided to suspend the regular performances of all the small theatres (Beijing Deyunshe Theater, Deyunshe Sanlitun Theatre, Zhangyiyuan Tianqiao Teahouse, Guangdelou Theater) from August 9, 2010 (Monday). Check and carry out internal rectification. The specific performance recovery time will be announced separately according to the individual position." Many Xiangsheng actors oppose the huge market share of Deyunshe in the Xiangsheng performance industry, they believe that Deyunshe's success has taken away their audience and made their performance despised.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are actual situation and individual position interchangeable (i.e., having the same meaning)?

Pair 2276

P1: Design and development. In the late 1950s a collaboration between Paul Legrand, an aviation engineer employed by SNECMA and Michel Simon of Breguet Aviation led to the LS.50 two seat light aircraft, built as a one-off prototype. They developed this into the LS.60 which was intended for production and was entered into a **government competition** for a club trainer. The LS.60 has a high, braced wing of constant chord, mounted with 5° of dihedral.

P2: Design and development. In the late 1950s a collaboration between Paul Legrand, an aviation engineer employed by SNECMA and Michel Simon of Breguet Aviation led to the LS.50 two seat light aircraft, built as a one-off prototype. They developed this into the LS.60 which was intended for production and was entered into a **certified test** for a club trainer. The LS.60 has a high, braced wing of constant chord, mounted with 5° of dihedral.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **government competition** and **certified test** interchangeable (i.e., having the same meaning)?

Pair 2277

P1: The "Architectura". Dietterlin's architectural treatise "Architectvra: Von Außtheilung, Symmetria vnd Proportion der Fünff Seulen" was first published in separate parts in 1593 and 1594, and finally in a combined and expanded edition in 1598. The book described the classical orders and their character and **proper use**, as was traditional in such books. Dietterlin, however, showed less interest in the proportions of the order than in their ornamentation.

P2: The "Architectura". Dietterlin's architectural treatise "Architectvra: Von Außtheilung, Symmetria vnd Proportion der Fünff Seulen" was first published in separate parts in 1593 and 1594, and finally in a combined and expanded edition in 1598. The book described the classical orders and their character and **intended purpose**, as was traditional in such books. Dietterlin, however, showed less interest in the proportions of the order than in their ornamentation.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **proper use** and **intended purpose** interchangeable (i.e., having the same meaning)?

Pair 2278

P1: The latter explains that when $3 \leq k$, $P=4$ may be used, hence the earlier search is not necessary. The starting value u_0 is then equal to the modular Lucas sequence $V_k(P,1) \bmod N$. This process takes very little time compared to the **main test**. How the test works.

P2: The latter explains that when $3 \leq k$, $P=4$ may be used, hence the earlier search is not necessary. The starting value u_0 is then equal to the modular Lucas sequence $V_k(P,1) \bmod N$. This process takes very little time compared to the **key event**. How the test works.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **main test** and **key event** interchangeable (i.e., having the same meaning)?

Pair 2279

P1: Hans Riegel Sr., a candy maker from Bonn, started the Haribo company in 1920. Middle East. **Turkish delight and rock candy** are commonly found in Middle East. South America.

P2: Hans Riegel Sr., a candy maker from Bonn, started the Haribo company in 1920. Middle East. **Turkish delight and hard sweets** are commonly found in Middle East. South America.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **rock candy** and **hard sweets** interchangeable (i.e., having the same meaning)?

Pair 2280

P1: Many live music venues in Seattle, San Francisco, and New York organized shows to benefit Home Alive, where there would be music and spoken word performances. These performances were put on by a variety of people including bands, such as The Posies, and founders of Home Alive, such as Christien Storm, who performed spoken word, Valerie Agnew, who performed with her band 7 Year Bitch, and Gretta Harley, who performed with her band Maxi Bad. **The first show took place at Seattle venue, RKCNDY (also known as rock candy).** During these shows organizers and volunteers would talk about Home Alive and there would be tables with information about Home Alive, as well.

P2: Many live music venues in Seattle, San Francisco, and New York organized shows to benefit Home Alive, where there would be music and spoken word performances. These performances were put on by a variety of people including bands, such as The Posies, and founders of Home Alive, such as Christien Storm, who performed spoken word, Valerie Agnew, who performed with her band 7 Year Bitch, and Gretta Harley, who performed with her band Maxi Bad. **The first show took place at Seattle venue, RKCNDY (also known as Seattle venue).** During these shows organizers and volunteers would talk about Home Alive and there would be tables with information about Home Alive, as well.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **rock candy** and **Seattle venue** interchangeable (i.e., having the same meaning)?

Pair 2281

P1: Shunting and subsidiary signals. Shunting signals and subsidiary signals also exist in semaphore form, with smaller arms and lights than are provided for main signals. **These signals may also take the form of a disc with a horizontal stripe which is rotated 45 degrees to the clear position.** Train order signals.

P2: Shunting and subsidiary signals. Shunting signals and subsidiary signals also exist in semaphore form, with smaller arms and lights than are provided for main signals. **These signals may also take the form of a disc with a horizontal stripe which is rotated 45 degrees to the obvious place.** Train order signals.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **clear position** and **obvious place** interchangeable (i.e., having the same meaning)?

Pair 2282

P1: HVQFN housing). Generally a reader system consists of a microcontroller and a reader IC to communicate over the RF interface with a contactless smartcard. **The microcontroller takes the part of controlling the reader IC functions such as protocol handling, command flow and data interpretation.** By integrating a SAM into the reader system, the SAM handles all the key management and cryptography in a secure way.

P2: HVQFN housing). Generally a reader system consists of a microcontroller and a reader IC to communicate over the RF interface with a contactless smartcard. **The microcontroller takes the part of controlling the reader IC functions such as protocol handling, command flow and metric extrapolation.** By integrating a SAM into the reader system, the SAM handles all the key management and cryptography in a secure way.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **data interpretation** and **metric extrapolation** interchangeable (i.e., having the same meaning)?

Pair 2283

P1: It is considered one of the most prestigious and competitive study abroad programs in the world and there are no exchange agreements with any institution and each applicant is judged solely on their own merits. Successful applicants demonstrate excellence in the social sciences and are usually within the top 10% of the class at their home institution.

Notable alumni of the **general course** include David Rockefeller, U.S Supreme Court Justice Anthony Kennedy and U.S. President John F. Kennedy. Students must have completed at least two years of university level study prior to joining LSE, and enroll in mid to upper level courses alongside 2nd and 3rd year undergraduates and some graduate students.

P2: It is considered one of the most prestigious and competitive study abroad programs in the world and there are no exchange agreements with any institution and each applicant is judged solely on their own merits. Students must have completed at least two years of university level study prior to joining LSE, and enroll in mid to upper level courses alongside 2nd and 3rd year undergraduates and some graduate students.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **general course** and **study abroad program** interchangeable (i.e., having the same meaning)?

Pair 2284

P1: Stefan accepts the offer, excited to finally cheat his way into impersonating the Queen, and skips school the next day to wait for the delivery after his parents went to work. At 12:10pm, two men in suits and sunglasses arrive with a man dressed in a boilersuit and baseball cap holding a gas cylinder—the Gas Man with his two bodyguards. **Stefan offers to pay but the gas man gives the gas cylinder to him for free and leads the bodyguards out of the house.** Stefan reads the instructions thoroughly and rushes to the phone, using the helium every few minutes and speaking whenever the high-pitched vocals began.

P2: Stefan accepts the offer, excited to finally cheat his way into impersonating the Queen, and skips school the next day to wait for the delivery after his parents went to work. At 12:10pm, two men in suits and sunglasses arrive with a man dressed in a boilersuit and baseball cap holding a gas cylinder—the Gas Man with his two bodyguards. **Stefan offers to pay but the petrol guy gives the gas cylinder to him for free and leads the bodyguards out of the house.** Stefan reads the instructions thoroughly and rushes to the phone, using the helium every few minutes and speaking whenever the high-pitched vocals began.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **gas man** and **petrol guy** interchangeable (i.e., having the same meaning)?

Pair 2285

P1: When Spitz was 14, his family moved to Santa Clara, where he joined the Santa Clara Swim Club and was trained by coach George F. Haines. From 1964 to 1968, Mark trained with Haines at SCSC and Santa Clara High School. **During his four years there, Mark held national high school records in every stroke and in every distance.** In 1966 at age 16, he won the 100-meter butterfly at the AAU national championships, the first of his 24 total AAU titles.

P2: When Spitz was 14, his family moved to Santa Clara, where he joined the Santa Clara Swim Club and was trained by coach George F. Haines. From 1964 to 1968, Mark trained with Haines at SCSC and Santa Clara High School. **During his four years there, Mark held national high school records in all events and in every distance.** In 1966 at age 16, he won the 100-meter butterfly at the AAU national championships, the first of his 24 total AAU titles.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **every stroke** and **all events** interchangeable (i.e., having the same meaning)?

Pair 2286

P1: On resignation, Roberts was appointed titular Archbishop of Sugdaea in Crimea (modern Sudak). His resignation was announced in "L'Osservatore Romano" as on grounds of ill health, perhaps because at that time resignations of bishops were unusual except on grounds of senility. **However, the announcement that he was ill did not help Roberts in**

his quest for a new position, **even a temporary one**. Talk of other full-time episcopal appointments perhaps in Guyana or the West Indies came to nothing.

P2: On resignation, Roberts was appointed titular Archbishop of Sugdaea in Crimea (modern Sudak). His resignation was announced in "L'Osservatore Romano" as on grounds of ill health, perhaps because at that time resignations of bishops were unusual except on grounds of senility. **However, the announcement that he was ill did not help Roberts in his quest for a new position, at the least a short-term thing.** Talk of other full-time episcopal appointments perhaps in Guyana or the West Indies came to nothing.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **even a temporary one** and **at the least a short-term thing** interchangeable (i.e., having the same meaning)?

Pair 2287

P1: In the fall of 1991, the Susan G. Komen Foundation had handed out pink ribbons to participants in its New York City race for breast cancer survivors. In 2010, Delta Air Lines painted N845MH, a Boeing 767-432ER in "Breast Cancer Research Foundation" special colors. **In September 2015, a newer version of the livery was repainted on the same plane.** Activities and events.

P2: In the fall of 1991, the Susan G. Komen Foundation had handed out pink ribbons to participants in its New York City race for breast cancer survivors. In 2010, Delta Air Lines painted N845MH, a Boeing 767-432ER in "Breast Cancer Research Foundation" special colors. **In September 2015, a later update of the livery was repainted on the same plane.** Activities and events.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **newer version** and **later update** interchangeable (i.e., having the same meaning)?

Pair 2288

P1: Engineer design fee is a one time charge that can be incurred again in a repair whereas engineer oversight of quality persists through the term and after. Unfortunately, these contractor accounting terms are being used when the owner is insured and many have erroneously equated hard costs with property and soft costs with business interruption which is called Delay in Opening coverage being added to some builder's risk policies. **With its popularity increasing in recent years, some insurers automatically include soft costs coverage, which can be activated by designating the limit on policy declarations.** However, these modifications to builder's risk insurance will not cover the efficiency of business owners or managers.

P2: Engineer design fee is a one time charge that can be incurred again in a repair whereas engineer oversight of quality persists through the term and after. Unfortunately, these contractor accounting terms are being used when the owner is insured and many have erroneously equated hard costs with property and soft costs with business interruption which is called Delay in Opening coverage being added to some builder's risk policies. **With its popularity increasing in recent years, some insurers automatically include soft costs coverage, which can be activated by designating the limit on covered items.** However, these modifications to builder's risk insurance will not cover the efficiency of business owners or managers.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **policy declarations** and **covered items** interchangeable (i.e., having the same meaning)?

Pair 2289

P1: The sites include the Marathon battle site, Tomb of the Marathon Warriors, the Marathon Museum, Tomb of the Plataeans, and Ramnous. The sites were saved, due to the fight of local residents during the night of 23–24 August, and the assistance of a northerly wind that helped contain the fires and avoid catastrophe to the ancient monuments and

ecologically important area of Schinias. Marathon residents had already been fighting the construction of a **land-fill site** outside Grammatiko. Aftermath.

P2: The sites include the Marathon battle site, Tomb of the Marathon Warriors, the Marathon Museum, Tomb of the Plataeans, and Ramnous. The sites were saved, due to the fight of local residents during the night of 23–24 August, and the assistance of a northerly wind that helped contain the fires and avoid catastrophe to the ancient monuments and ecologically important area of Schinias. Marathon residents had already been fighting the construction of a **garbage disposal place** outside Grammatiko. Aftermath.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **land-fill site** and **garbage disposal place** interchangeable (i.e., having the same meaning)?

Pair 2290

P1: And in his first presidential decision, the selection of a running mate, he hit it out of the park. With Joe Biden's experience and wisdom, supporting Barack Obama's proven understanding, instincts, and insight, America will have the national security leadership we need. After Joe Biden spoke, his **first address** as Vice Presidential Nominee, Barack Obama made a surprise appearance praising the convention. Thursday, August 28.

P2: And in his first presidential decision, the selection of a running mate, he hit it out of the park. With Joe Biden's experience and wisdom, supporting Barack Obama's proven understanding, instincts, and insight, America will have the national security leadership we need. After Joe Biden spoke, his **inaugural speech** as Vice Presidential Nominee, Barack Obama made a surprise appearance praising the convention. Thursday, August 28.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **first address** and **inaugural speech** interchangeable (i.e., having the same meaning)?

Pair 2291

P1: "I believe that NMCI in 2008 is achieving much of what we had hoped NMCI would achieve. It's leveled the playing field for security. It's allowed us to do things like push security patches that go through the **whole enterprise** that's on NMCI. If you look at NMCI historically, it was probably the first step for the Navy to move into what was then called Joint Vision 2010 and now is Joint Vision 2020.

P2: "I believe that NMCI in 2008 is achieving much of what we had hoped NMCI would achieve. It's leveled the playing field for security. It's allowed us to do things like push security patches that go through the **entire system** that's on NMCI. If you look at NMCI historically, it was probably the first step for the Navy to move into what was then called Joint Vision 2010 and now is Joint Vision 2020.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **whole enterprise** and **entire system** interchangeable (i.e., having the same meaning)?

Pair 2292

P1: These courses must equate to a 3.6 GPA or higher, and the cumulative master's degree program GPA is a 3.4 or higher. In addition, any Ph.D. level coursework must equate to a 3.6 GPA or higher at the institution in which the student is enrolled. **law school students** must have completed their first academic semester, with a grade point average of 2.5 or higher, on a 4.0 scale. Individual chapters may apply more stringent standards if they so desire.

P2: These courses must equate to a 3.6 GPA or higher, and the cumulative master's degree program GPA is a 3.4 or higher. In addition, any Ph.D. level coursework must equate to a 3.6 GPA or higher at the institution in which the student is enrolled. **degree seekers** must have completed their first academic semester, with a grade point average of 2.5 or higher, on a 4.0 scale. Individual chapters may apply more stringent standards if they so desire.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **law school students** and **degree seekers** interchangeable (i.e., having the same meaning)?

Pair 2293

P1: Her disappearance sparked a war between the two families. Slice is able to produce sharp claws from the ends of her fingers. **She has been shown to elongate her arms for a better reach with her hands.** She also appears to have increased strength, as remarked on by one of her combatants.

P2: Her disappearance sparked a war between the two families. Slice is able to produce sharp claws from the ends of her fingers. **She has been shown to elongate her arms for a more length with her hands.** She also appears to have increased strength, as remarked on by one of her combatants.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **better reach** and **more length** interchangeable (i.e., having the same meaning)?

Pair 2294

P1: The location of Yoichi in Hokkaidō was chosen particularly for its terrain and climate, which were in many ways reminiscent of Scotland (although financial constraints resulted in the first distillery actually being built in the more convenient location of Yamazaki on the main island). One facet of the style of Japanese whisky comes from the way in which blended whisky is produced, and the differing nature of the industry in Japan. **Despite the recent rise of interest in single malt whiskies, the vast majority of whisky sold in the world is still blended.** In Scotland, while a particular brand of blended whisky may be owned by a company that also owns one or more distilleries, it is common for blended whisky bottlers to trade single malt whiskies.

P2: The location of Yoichi in Hokkaidō was chosen particularly for its terrain and climate, which were in many ways reminiscent of Scotland (although financial constraints resulted in the first distillery actually being built in the more convenient location of Yamazaki on the main island). Question: In both passages, are **recent rise** and **current increase** interchangeable (i.e., having the same meaning)?

Pair 2295

P1: Fearing him and his vicious boons, the gods of the multiverse went into hiding where they worshiped the Goddess Parashakti for the last few thousand years of Bhandasura's uninterrupted rule, while he was immersed in lust and luxury by Lord Vishnu's Maya. When Bhandasura came to know of the gods' conspiracy against him, he attacked them at the spot where they were performing a Yajna to appease the goddess. **In fear, the Devas entered the fire pit and immolated themselves.** When a relieved Bhandasura had gone, the Goddess Parashakti incarnated on the form of Goddess Tripura Sundari and resurrected all the gods of the multiverse and restored their duties.

P2: Fearing him and his vicious boons, the gods of the multiverse went into hiding where they worshiped the Goddess Parashakti for the last few thousand years of Bhandasura's uninterrupted rule, while he was immersed in lust and luxury by Lord Vishnu's Maya. When Bhandasura came to know of the gods' conspiracy against him, he attacked them at the spot where they were performing a Yajna to appease the goddess. **In fear, the Devas entered the campfire place and immolated themselves.** When a relieved Bhandasura had gone, the Goddess Parashakti incarnated on the form of Goddess Tripura Sundari and resurrected all the gods of the multiverse and restored their duties.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **fire pit** and **campfire place** interchangeable (i.e., having the same meaning)?

Pair 2296

P1: DORCA has been described as mysterious, odd ball, bohemian. It is difficult if not impossible to categorise, having clearly involved at least in some sense in intelligence work. **That it morphed into ASOPA after the war gives no real insight into its wartime activities.** When formed in February 1943, the Directorate was made part of Military Intelligence, with Conlon reporting directly to General Blamey, commander-in-chief of the Australian Military Forces.

P2: DORCA has been described as mysterious, odd ball, bohemian. It is difficult if not impossible to categorise, having clearly involved at least in some sense in intelligence work. **That it morphed into ASOPA after the war gives no true outlook into its wartime activities.** When formed in February 1943, the Directorate was made part of Military Intelligence, with Conlon reporting directly to General Blamey, commander-in-chief of the Australian Military Forces.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **real insight** and **true outlook** interchangeable (i.e., having the same meaning)?

Pair 2297

P1: Ig Nobel. For many years before winning his Nobel Prize, Glauber was familiar to audiences of the Ig Nobel Prize ceremonies, where he took a bow each year as "Keeper of the Broom," sweeping the stage clean of the paper airplanes that have traditionally been thrown during the event. **He missed the 2005 event,** though, as he was being awarded his real Nobel Prize for Physics. Personal life.

P2: Ig Nobel. For many years before winning his Nobel Prize, Glauber was familiar to audiences of the Ig Nobel Prize ceremonies, where he took a bow each year as "Keeper of the Broom," sweeping the stage clean of the paper airplanes that have traditionally been thrown during the event. **He missed the 5 years after the second millennium,** though, as he was being awarded his real Nobel Prize for Physics. Personal life.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **2005 event** and **5 years after the second millennium** interchangeable (i.e., having the same meaning)?

Pair 2298

P1: Group. In May 2015 construction commenced, and the road section of the bridge was opened to traffic in May 2018. **The rail section was opened in 2019, with Russian president Vladimir Putin taking the first train across on December 23.** Culture.

P2: Group. In May 2015 construction commenced, and the road section of the bridge was opened to traffic in May 2018. **The subway stop was opened in 2019, with Russian president Vladimir Putin taking the first train across on December 23.** Culture.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **rail section** and **subway stop** interchangeable (i.e., having the same meaning)?

Pair 2299

P1: The CRT may be reached due to disturbance of the ballast, track components or track geometry. For example, the CRT may be reached due to a removal of a rail section or an Insulated Block Joint (IBJ). **A stressing engineer measures the rail section to be removed and places indicators with marks on the foot of the rails.** After the rail section is cut out,

its first stress free temperature is determined.

P2: The CRT may be reached due to disturbance of the ballast, track components or track geometry. For example, the CRT may be reached due to a removal of a rail section or an Insulated Block Joint (IBJ). A stressing engineer measures the train track portion to be removed and places indicators with marks on the foot of the rails. After the rail section is cut out, its first stress free temperature is determined.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are rail section and train track portion interchangeable (i.e., having the same meaning)?

Pair 2300

P1: A single interface can be configured for multiple remote sites because no two connections to one interface can be on at the same time. The first step in specifying a DDR interface is defining a rotary group. Although the DDR interface is a virtual one, all of the configuration commands for physical interfaces are available. A dialer Rotary Group can be created so that either of the interfaces in it can be used to dial any of the destinations defined in it.

P2: A single interface can be configured for multiple remote sites because no two connections to one interface can be on at the same time. The first step in specifying a DDR interface is defining a rotary group. Although the DDR interface is a not physical thing, all of the configuration commands for physical interfaces are available. A dialer Rotary Group can be created so that either of the interfaces in it can be used to dial any of the destinations defined in it.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are virtual one and not physical thing interchangeable (i.e., having the same meaning)?

Pair 2301

P1: The population developed a friendly relationship with the orelhão, as it made communication between the most distant and even unlikely places possible. A print advertisement in 1984 showed images of orelhões in different geographic settings of Brazil: on the beach, in the hills, in the typically rural area, on the side of a road. The text emphasized the companion character of the orelhão: "Telesp always puts a friendly little ear near you. On the coast, in the farms, on the roads, in the outskirts of São Paulo, on the streets, squares and avenues, you'll always find a friendly little ear to listen to you: Telesp's orelhões."

P2: The population developed a friendly relationship with the orelhão, as it made communication between the most distant and even unlikely places possible. A print advertisement in 1984 showed images of orelhões in different geographic settings of Brazil: on the beach, in the hills, in the typically rural area, on the side of a road. The text emphasized the friendly sidekick of the orelhão: "Telesp always puts a friendly little ear near you. On the coast, in the farms, on the roads, in the outskirts of São Paulo, on the streets, squares and avenues, you'll always find a friendly little ear to listen to you: Telesp's orelhões."

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are companion character and friendly sidekick interchangeable (i.e., having the same meaning)?

Pair 2302

P1: "Diablo III" features Templars and Crusaders, two other orders of holy Zakarum warriors similar to, but distinct from, the Paladins. The Templars, based in Westmarch, are a secretive group which recruits from the ranks of captive criminals and subjects them to torture and brainwashing until they can no longer recall their crimes, after which they are considered "purified" and inducted into the Order. In-game, the Templars are represented by the companion character Kormac, a warrior who believes himself to be such a criminal. However, his quest for his order's relics allows him to discover the truth: he has been innocent all along, whereas the Order is corrupt.

P2: "Diablo III" features Templars and Crusaders, two other orders of holy Zakarum warriors similar to, but distinct from, the Paladins. The Templars, based in Westmarch, are a secretive group which recruits from the ranks of captive criminals and subjects them to torture and brainwashing until they can no longer recall their crimes, after which they are considered "purified" and inducted into the Order. In-game, the Templars are represented by the traveling friend Kormac, a warrior who believes himself to be such a criminal. However, his quest for his order's relics allows him to discover the truth: he has been innocent all along, whereas the Order is corrupt.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are companion character and traveling friend interchangeable (i.e., having the same meaning)?

Pair 2303

P1: On February 26, 2008, at the House Homeland Security Appropriations Subcommittee hearing, Farr said "the public image of (the ICE agents)" has become "not (a) compassionate law enforcement agency but essentially a Gestapo-type agency that is knocking down doors" when conducting raids on illegal immigrants. Immigration and Customs Enforcement Julie Myers responded to Farr's comments by saying, "We are not the Gestapo. The men and women of this agency have a very difficult job...and I think they do that with distinction and great honor." Farr replied that he knew and appreciated this, but reiterated that there is "there is a very ill will public opinion in the counties (he) represent(s), about ICE".

P2: On February 26, 2008, at the House Homeland Security Appropriations Subcommittee hearing, Farr said "the public image of (the ICE agents)" has become "not (a) compassionate law enforcement agency but essentially a Gestapo-type agency that is knocking down doors" when conducting raids on illegal immigrants. Immigration and Customs Enforcement Julie Myers responded to Farr's comments by saying, "We are not the Gestapo. The men and women of this agency have a very challenging objective...and I think they do that with distinction and great honor." Farr replied that he knew and appreciated this, but reiterated that there is "there is a very ill will public opinion in the counties (he) represent(s), about ICE".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are difficult job and challenging objective interchangeable (i.e., having the same meaning)?

Pair 2304

P1: Types of reach. Organic Reach. This type of reach regards the number of distinct users that have seen a specific post on their feed. Organic reach in other words is the number of people who have seen the post being analyzed on their Facebook newsfeed.

P2: Types of reach. Organic Reach. This type of reach regards the number of distinct users that have seen a particular statement on their feed. Organic reach in other words is the number of people who have seen the post being analyzed on their Facebook newsfeed.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are specific post and particular statement interchangeable (i.e., having the same meaning)?

Pair 2305

P1: Several of Degas's relatives are depicted engaged in a range of activities. Musson is seated in the foreground and is examining cotton for its quality. His legs are cropped by the lower frame and the top of his hat is surrounded by cotton. To his left is an empty chair where raw cotton rests.

P2: Several of Degas's relatives are depicted engaged in a range of activities. Musson is seated in the foreground and is examining cotton for its quality. His legs are cropped by the low aspect and the top of his hat is surrounded by cotton.

To his left is an empty chair where raw cotton rests.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **lower frame** and **low aspect** interchangeable (i.e., having the same meaning)?

Pair 2306

P1: A board of directors was established and the first chair was Scott Nay who worked in the Human Resources Department in the city of Portland. He was instrumental in hiring the first market manager Dana Comfort who along with a well chosen staff began to organize the site by and under the Burnside Bridge. **A clear site plan was eventually created, marking out booth spaces, defining aisles and a pattern for customer traffic.** In 1976, the market moved to a site under the Burnside Bridge between First Avenue and Front Avenue (now Naito Parkway), where it then remained for the next 33 years.

P2: A board of directors was established and the first chair was Scott Nay who worked in the Human Resources Department in the city of Portland. He was instrumental in hiring the first market manager Dana Comfort who along with a well chosen staff began to organize the site by and under the Burnside Bridge. **A clear site plan was eventually created, marking out booth spaces, defining aisles and a pattern for user interactions.** In 1976, the market moved to a site under the Burnside Bridge between First Avenue and Front Avenue (now Naito Parkway), where it then remained for the next 33 years.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **customer traffic** and **user interactions** interchangeable (i.e., having the same meaning)?

Pair 2307

P1: In-orbit testing was expected to be completed by mid-July 2012. In July 2012, Intelsat 19 completed its in-orbit testing and the satellite drifted to its final location at 166° East, where it was expected to begin service in mid-August 2012. **On 13 August 2012, the satellite entered commercial service as customer traffic previously on Intelsat 8 was transitioned over.** Solar array deployment failure and recovery.

P2: In-orbit testing was expected to be completed by mid-July 2012. In July 2012, Intelsat 19 completed its in-orbit testing and the satellite drifted to its final location at 166° East, where it was expected to begin service in mid-August 2012. **On 13 August 2012, the satellite entered commercial service as individuals usage previously on Intelsat 8 was transitioned over.** Solar array deployment failure and recovery.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **customer traffic** and **individuals usage** interchangeable (i.e., having the same meaning)?

Pair 2308

P1: Firefly Arts Collective is an American non-profit organization that facilitates the annual New England regional burner festival 'Firefly'. **Firefly is a regional event inspired by the annual Burning Man festival in Nevada.** Firefly is held in Vermont typically during July 4 weekend.

P2: Firefly Arts Collective is an American non-profit organization that facilitates the annual New England regional burner festival 'Firefly'. **Firefly is a community occurrence inspired by the annual Burning Man festival in Nevada.** Firefly is held in Vermont typically during July 4 weekend.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **regional event** and **community occurrence** interchangeable (i.e., having the same meaning)?

Pair 2309

P1: The frequency of sexual activity might range from zero (sexual abstinence) to 15 or 20 times a week. In the United States, the average frequency of sexual intercourse for married couples is 2 to 3 times a week. **It is generally recognized that postmenopausal women experience declines in frequency of sexual intercourse and that average frequency of intercourse declines with age.** According to the Kinsey Institute, the average frequency of sexual intercourse in the US for individuals who have partners is 112 times per year (age 18–29), 86 times per year (age 30–39), and 69 times per year (age 40–49).

P2: The frequency of sexual activity might range from zero (sexual abstinence) to 15 or 20 times a week. In the United States, the average frequency of sexual intercourse for married couples is 2 to 3 times a week. **It is generally recognized that postmenopausal women experience declines in frequency of sexual intercourse and that regular intervals of intercourse declines with age.** According to the Kinsey Institute, the average frequency of sexual intercourse in the US for individuals who have partners is 112 times per year (age 18–29), 86 times per year (age 30–39), and 69 times per year (age 40–49).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **average frequency** and **regular intervals** interchangeable (i.e., having the same meaning)?

Pair 2310

P1: In response Marcellus led his squadrons of cavalry forward and tried to outflank them, extending his wings into a thin line, until he was not far from the enemy. His horse however were temporarily seized with panic and turned away from the Gallic line, which fortunately he was able to convert into a spectacle of dedication to the Gods. **He then vowed that he would consecrate to Jupiter Feretrius the most beautiful suit of armor among them.** Meanwhile, Viridomarus had ridden out in front of his men and issued a challenge for single combat to the Roman consul.

P2: In response Marcellus led his squadrons of cavalry forward and tried to outflank them, extending his wings into a thin line, until he was not far from the enemy. His horse however were temporarily seized with panic and turned away from the Gallic line, which fortunately he was able to convert into a spectacle of dedication to the Gods. **He then vowed that he would consecrate to Jupiter Feretrius the most pretty wear of armor among them.** Meanwhile, Viridomarus had ridden out in front of his men and issued a challenge for single combat to the Roman consul.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **beautiful suit** and **pretty wear** interchangeable (i.e., having the same meaning)?

Pair 2311

P1: All that is necessary is that the utility index change as more preferred bundles are consumed. On a plane with two kinds of commodities that meet the different needs of consumers, a curve composed of a series of points that consumers feel indifference becomes an indifference curve. **The tangent point between the indifference curve and the budget line is the point at which consumer satisfaction is maximized.** Indifference curves are typically numbered with the number increasing as more preferred bundles are consumed.

P2: All that is necessary is that the utility index change as more preferred bundles are consumed. On a plane with two kinds of commodities that meet the different needs of consumers, a curve composed of a series of points that consumers feel indifference becomes an indifference curve. **The tangent point between the indifference curve and the cost estimation is the point at which consumer satisfaction is maximized.** Indifference curves are typically numbered with the number increasing as more preferred bundles are consumed.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **budget line** and **cost estimation** interchangeable (i.e., having the same meaning)?

Pair 2312

P1: In June 1927, the powerful GJL dissolved itself at its AGM and its twenty member clubs were joined by a further twenty from other leagues to form the breakaway "Scottish Intermediate Football League". In Ayrshire, the Western Junior Football League reformed as the Western Intermediate Football League at the same time with sixteen out of the eighteen clubs supporting the dispute. Clubs in Fife also showed an interest however the prospect of increased travel meant their participation was not viable. From the beginning of season 1927–28, Intermediate clubs began to compete in separate competitions, including their own Scottish Intermediate Cup (i.e.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are increased travel and greater wandering interchangeable (i.e., having the same meaning)?

Pair 2313

P1: Another popular interpretation, held mainly in the United States, is that of an American win. In a 2012 interview at "The Christian Science Monitor", Donald Hickey said: "By my count, we lost the War of 1812 and we lost Vietnam. That's not a widely held opinion in the United States about the War of 1812. The common view is that the war ended in a draw".

P2: Another popular interpretation, held mainly in the United States, is that of an American win. In a 2012 interview at "The Christian Science Monitor", Donald Hickey said: "By my count, we lost the War of 1812 and we lost Vietnam. That's not a popular thought in the United States about the War of 1812. The common view is that the war ended in a draw".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are widely held opinion and popular thought interchangeable (i.e., having the same meaning)?

Pair 2314

P1: A dark blue/black evening dress is authorized for officers and individual branches or regiments may parade bands or "fanfares" in historic dress dating as far back as the Napoleonic period. Germany. The German Army has retained a form of field grey for dress wear though of modern cut and worn with berets. Some senior officers still wear peaked caps.

P2: A dark blue/black evening dress is authorized for officers and individual branches or regiments may parade bands or "fanfares" in historic dress dating as far back as the Napoleonic period. Germany. The German Army has retained a form of field grey for dress wear though of in style hem and worn with berets. Some senior officers still wear peaked caps.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are modern cut and in style hem interchangeable (i.e., having the same meaning)?

Pair 2315

P1: Her father was James Frampton and her mother was Phillis Frampton, ex-wife of Charlton Wollaston. Frampton would regularly travel to London with her parents and witnessed the Gordon Riots and the trial of Warren Hastings.

Her father died in 1784 and Frampton settled in Dorchester with her mother, where they were central to **local society**. Frampton kept a diary from a young age; this was published as "The Journal of Mary Frampton, From The Year 1779 to Until The Year 1846" in 1885.

P2: Her father was James Frampton and her mother was Phillis Frampton, ex-wife of Charlton Wollaston. Frampton would regularly travel to London with her parents and witnessed the Gordon Riots and the trial of Warren Hastings. Her father died in 1784 and Frampton settled in Dorchester with her mother, where they were central to **immediate population**. Frampton kept a diary from a young age; this was published as "The Journal of Mary Frampton, From The Year 1779 to Until The Year 1846" in 1885.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **local society** and **immediate population** interchangeable (i.e., having the same meaning)?

Pair 2316

P1: Paul M. Bator, who helped negotiate and draft the UNESCO convention on the International Trade of Art, argues that larger countries are responsible for the cultural interests of smaller ones. He explains in "The International Trade in Art" that "art-rich countries should create tax and other financial and psychological incentives to persuade those with important antiquities and archaeological objects to keep them at home". Proponents of liberalization in international art markets stress that open markets contribute to **efficient production** and distribution of cultural products. Reliance on competitive market forces also frees creative individuals from the hindrance of government oversight.

P2: Paul M. Bator, who helped negotiate and draft the UNESCO convention on the International Trade of Art, argues that larger countries are responsible for the cultural interests of smaller ones. He explains in "The International Trade in Art" that "art-rich countries should create tax and other financial and psychological incentives to persuade those with important antiquities and archaeological objects to keep them at home". Proponents of liberalization in international art markets stress that open markets contribute to **streamlined output** and distribution of cultural products. Reliance on competitive market forces also frees creative individuals from the hindrance of government oversight.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **efficient production** and **streamlined output** interchangeable (i.e., having the same meaning)?

Pair 2317

P1: Set in the United States, the story is in the form of a diary written from the first-person perspective of sixteen-year-old Ann Burden, who has survived a nuclear war and nerve gas through living in a small valley with a self-contained weather system. According to Sally Conly, "Z for Zachariah" was her husband's second novel intended for adults, following his 1972 science-fiction thriller "A Report from Group 17". O'Brien had previously established himself as a children's writer with his novels "The **silver crown**" (1968) and "Mrs. Frisby and the Rats of NIMH" (1971). "Z for Zachariah" received a 1976 honor award from the Jane Addams Children's Book Award and the Edgar Award for the best mystery fiction in the juvenile category.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **silver crown** and **children's novel** interchangeable (i.e., having the same meaning)?

Pair 2318

P1: It is the absence of the physical interpretation of the bra that allows the ensemble approach to by-pass the notion of "collapse". Instead, the density operator expresses the observational side of the ensemble interpretation. It hardly needs saying that this account could be expressed in a **dual way**, with bras and kets interchanged, "mutatis mutandis". In the ensemble approach, the notion of the pure state is conceptually derived by analysis of the density operator, rather than the density operator being conceived as conceptually synthesized from the notion of the pure state.

P2: It is the absence of the physical interpretation of the bra that allows the ensemble approach to by-pass the notion of "collapse". Instead, the density operator expresses the observational side of the ensemble interpretation. It hardly needs saying that this account could be expressed in a **binary method**, with bras and kets interchanged, "mutatis mutandis". In the ensemble approach, the notion of the pure state is conceptually derived by analysis of the density operator, rather than the density operator being conceived as conceptually synthesized from the notion of the pure state.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **dual way** and **binary method** interchangeable (i.e., having the same meaning)?

Pair 2319

P1: In February 2006, he became Minister for Energy, Minister for Ports and Waterways and Minister Assisting the Treasurer on Business and Economic Regulatory Reform. In April 2007, he became Minister for Small Business, Regulatory Reform, Ports and Waterways. In 2007, former premier Bob Carr was critical of Tripodi's performance as waterways minister with regard to his management of **harbour development**. In 2009, it was reported that Tripodi had proposed electricity industry reform in NSW that would result in the three state-owned retailers being sold off to private enterprise and the sale of long-term "gentrader" contracts.

P2: In February 2006, he became Minister for Energy, Minister for Ports and Waterways and Minister Assisting the Treasurer on Business and Economic Regulatory Reform. As the Geneva Convention no longer applied, and because of the atrocities discovered at concentration camps, prisoners’ rations were cut and job responsibility were increased. Before being sent home they were required to watch documentaries of the camps.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are work loads and job responsibility interchangeable (i.e., having the same meaning)?

Pair 2322

P1: He began as a forward at local team SVg Pitten before moving to 1. Wiener Neustädter SC at the age of 11. At the age of 15, while still an amateur and at mainstream school, Fuchs played for their senior team. When he was 17, he signed his first professional deal at SV Mattersburg, a team who despite coming from a town of 6,000 drew league record average crowds of 17,000, came third in the Austrian Football Bundesliga and played in European competition.

P2: He began as a forward at local team SVg Pitten before moving to 1. Wiener Neustädter SC at the age of 11. At the age of 15, while still an amateur and at typical learning institution, Fuchs played for their senior team. When he was 17, he signed his first professional deal at SV Mattersburg, a team who despite coming from a town of 6,000 drew league record average crowds of 17,000, came third in the Austrian Football Bundesliga and played in European competition.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are mainstream school and typical learning institution interchangeable (i.e., having the same meaning)?

Pair 2323

P1: What were formerly the competencies of the EEC fell within the European Community pillar. Justice and Home Affairs was introduced as a new pillar while European Political Cooperation became the second pillar (the Common Foreign and Security Policy). The community institutions became the institutions of the EU but the roles of the institutions between the pillars are different. The Commission, Parliament and Court of Justice are largely cut out of activities in the second and third pillars, with the Council dominating proceedings.

P2: What were formerly the competencies of the EEC fell within the European Community pillar. Justice and Home Affairs was introduced as a new pillar while European Political Cooperation became the second pillar (the Common Foreign and Security Policy). The authority commandments became the institutions of the EU but the roles of the institutions between the pillars are different. The Commission, Parliament and Court of Justice are largely cut out of activities in the second and third pillars, with the Council dominating proceedings.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are community institutions and authority commandments interchangeable (i.e., having the same meaning)?

Pair 2324

P1: They then laid siege to Fort Mifflin and Fort Mercer, unsuccessfully attacking the latter by land and river in the Battle of Red Bank on October 22. The 1,200 Hessians of the assault force suffered over 350 casualties, the British also losing (64 guns) and HMS "Merlin" (18 guns) to grounding. The latter was possibly an **indirect result** of engagement by the Continental and Pennsylvania navies, which also provided enfilading fire against the Hessians. The siege was commanded by John Montresor, designer of Fort Mifflin.

P2: They then laid siege to Fort Mifflin and Fort Mercer, unsuccessfully attacking the latter by land and river in the Battle of Red Bank on October 22. The 1,200 Hessians of the assault force suffered over 350 casualties, the British also losing (64 guns) and HMS "Merlin" (18 guns) to grounding. The latter was possibly an **incidental happening** of engagement by the Continental and Pennsylvania navies, which also provided enfilading fire against the Hessians. The siege was commanded by John Montresor, designer of Fort Mifflin.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **indirect result** and **incidental happening** interchangeable (i.e., having the same meaning)?

Pair 2325

P1: Kildare became the first team to win the Sam Maguire Cup in 1928. They haven't won it since. Tactics such as the **hand pass** were perfected by those early Kildare teams, but they also developed what became traditional catch-and-kick football. Olympic high jumper Larry Stanley was regarded as one of the greatest fielders in the history of the game, and first winner of the all-time All Star award.

P2: Kildare became the first team to win the Sam Maguire Cup in 1928. They haven't won it since. Tactics such as the **football tactic** were perfected by those early Kildare teams, but they also developed what became traditional catch-and-kick football. Olympic high jumper Larry Stanley was regarded as one of the greatest fielders in the history of the game, and first winner of the all-time All Star award.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **hand pass** and **football tactic** interchangeable (i.e., having the same meaning)?

Pair 2326

P1: The tendons of the palmaris longus and flexor carpi ulnaris are partly attached to the surface of the retinaculum; below, the short muscles of the thumb and little finger originate from the flexor retinaculum. Function. The flexor retinaculum is the roof of the carpal tunnel, through which the median nerve and tendons of muscles which flex the **hand pass**. Clinical significance.

P2: The tendons of the palmaris longus and flexor carpi ulnaris are partly attached to the surface of the retinaculum; below, the short muscles of the thumb and little finger originate from the flexor retinaculum. Function. The flexor retinaculum is the roof of the carpal tunnel, through which the median nerve and tendons of muscles which flex the **appendage cross**. Clinical significance.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **hand pass** and **appendage cross** interchangeable (i.e., having the same meaning)?

Pair 2327

P1: The ships resumed their original position following the fleet, but failed to report to Jellicoe what had happened to the destroyers, or the sighting of German battleships. At around 23.40 large ships were again sighted and Allen attempted to challenge. Before he could do so, the German battleship SMS "Westfalen" sent her own **recognition signal** and then turned on searchlights. "Broke" attempted to fire torpedoes, but the range was very short, in the region of 150 yards, and the German ship opened fire first.

P2: The ships resumed their original position following the fleet, but failed to report to Jellicoe what had happened to the destroyers, or the sighting of German battleships. At around 23.40 large ships were again sighted and Allen attempted to challenge. Before he could do so, the German battleship SMS "Westfalen" sent her own **personalized communication** and then turned on searchlights. "Broke" attempted to fire torpedoes, but the range was very short, in the region of 150 yards, and the German ship opened fire first.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **recognition signal** and **personalized communication** interchangeable (i.e., having the same meaning)?

Pair 2328

P1: The Shipping Building houses a parking garage and the other four house apartments. In 2007, the five buildings of the Heinz Lofts were listed as a Pittsburgh History and Landmarks Foundation Historic Landmark. In 2014, Heinz Lofts sought to expand by purchasing the **service building**. In 2016, a different residential developer purchased the Administration Building, the Administration Annex, and the Riley Research Building.

P2: The Shipping Building houses a parking garage and the other four house apartments. In 2007, the five buildings of the Heinz Lofts were listed as a Pittsburgh History and Landmarks Foundation Historic Landmark. In 2014, Heinz Lofts sought to expand by purchasing the **Pittsburgh location**. In 2016, a different residential developer purchased the Administration Building, the Administration Annex, and the Riley Research Building.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **service building** and **Pittsburgh location** interchangeable (i.e., having the same meaning)?

Pair 2329

P1: In Common Criteria and European Union electronic signature standards "trusted path" and "trusted channel" describe techniques that prevent interception or tampering with sensitive data as it passes through various system components: User login. One of popular techniques for password stealing in Microsoft Windows was login spoofing, which was based on programs that simulated operating system's login prompt. When users try to log in, the fake login program can then capture user passwords for **later use**. As a safeguard Windows NT introduced Ctrl-Alt-Del sequence as secure attention key to escape any third party programs and invoke system login prompt.

P2: In Common Criteria and European Union electronic signature standards "trusted path" and "trusted channel" describe techniques that prevent interception or tampering with sensitive data as it passes through various system components: User login. One of popular techniques for password stealing in Microsoft Windows was login spoofing, which was based on programs that simulated operating system's login prompt. When users try to log in, the fake login program can then capture user passwords for **subsequent usage**. As a safeguard Windows NT introduced Ctrl-Alt-Del sequence as secure attention key to escape any third party programs and invoke system login prompt.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **later use** and **subsequent usage** interchangeable (i.e., having the same meaning)?

Pair 2330

P1: Selection and placements. The program invites a select group of the world's leading science and engineering institutions to nominate their "most exceptional" PhD students. Nominees then submit an application, consisting of a research proposal, a **personal statement**, current CV, and 4-7 recommendation letters. The stated selection criteria are extraordinary achievement, extraordinary degree of intelligence, scientific curiosity and innovation, collaborative spirit, leadership, and an ambition for social good.

P2: Selection and placements. The program invites a select group of the world's leading science and engineering institutions to nominate their "most exceptional" PhD students. Nominees then submit an application, consisting of a

research proposal, a **singular declaration**, current CV, and 4-7 recommendation letters. The stated selection criteria are extraordinary achievement, extraordinary degree of intelligence, scientific curiosity and innovation, collaborative spirit, leadership, and an ambition for social good.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **personal statement** and **singular declaration** interchangeable (i.e., having the same meaning)?

Pair 2331

P1: Nixon then nominated Harry Blackmun, who was confirmed. Nixon was shortly afterward faced with two new vacancies on the high bench due to the retirements of John Marshall Harlan and Hugo Black in 1971. **In spite of the rejections of Haynesworth and Carswell, Nixon announced that he would nominate Hershel Friday and Mildred Lillie to the high bench.** Neither was well regarded.

P2: Nixon then nominated Harry Blackmun, who was confirmed. Nixon was shortly afterward faced with two new vacancies on the high bench due to the retirements of John Marshall Harlan and Hugo Black in 1971. **In spite of the rejections of Haynesworth and Carswell, Nixon announced that he would nominate Hershel Friday and Mildred Lillie to the better position.** Neither was well regarded.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **high bench** and **better position** interchangeable (i.e., having the same meaning)?

Pair 2332

P1: If birch wood is not available any other wood will do, but well dried birch wood is preferred because of its good quality and smell, and long lasting burn. The important thing is to have a good "löyly", that is when the stones are hot enough to evaporate the water thrown on them into steam that rises to the bathers. **The bather in every type of sauna sits on a high bench near the ceiling where the hot steam reaches them quickly.** Electric sauna.

P2: If birch wood is not available any other wood will do, but well dried birch wood is preferred because of its good quality and smell, and long lasting burn. The important thing is to have a good "löyly", that is when the stones are hot enough to evaporate the water thrown on them into steam that rises to the bathers. **The bather in every type of sauna sits on a rise seat near the ceiling where the hot steam reaches them quickly.** Electric sauna.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **high bench** and **rise seat** interchangeable (i.e., having the same meaning)?

Pair 2333

P1: The cost of administering the program was more than twice the amount paid out to purchase the land, and transactions that were supposed to last weeks took many months. Finally Widtsoe was emptied out. **government workers tore down most of the buildings and placed over under the provisions of the Taylor Grazing Act.** A few houses and an old community building still stand on the site.

P2: The cost of administering the program was more than twice the amount paid out to purchase the land, and transactions that were supposed to last weeks took many months. Finally Widtsoe was emptied out. **authority figures tore down most of the buildings and placed over under the provisions of the Taylor Grazing Act.** A few houses and an old community building still stand on the site.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **government workers** and **authority figures** interchangeable (i.e., having the same meaning)?

Pair 2334

P1: Membership of the various national sections of the Red Sport International was by no means monolithic. According to the RSI's own study of the issue, members of the organizations were predominantly male, but hailed from a variety of communist, socialist, syndicalist, and anarchist tendencies, including many of whom who were members of no party. Although many of these were of the working class, also included were white collar employees, students, and government workers. Membership records of the French section, for example, indicate that approximately 80% of participants were from the working class, with the remaining 20% members of other social groups.

P2: Membership of the various national sections of the Red Sport International was by no means monolithic. According to the RSI's own study of the issue, members of the organizations were predominantly male, but hailed from a variety of communist, socialist, syndicalist, and anarchist tendencies, including many of whom who were members of no party. Although many of these were of the working class, also included were white collar employees, students, and federal employees. Membership records of the French section, for example, indicate that approximately 80% of participants were from the working class, with the remaining 20% members of other social groups.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **government workers** and **federal employees** interchangeable (i.e., having the same meaning)?

Pair 2335

P1: During offshore migration in winter and spring, adults have also been known to consume whitebait. Because "R. leporina" has small eyes that are located further back from the snout tip, they lack vision around their mouth region. This is compensated by an enhanced sense of touch in the anterior rays of the dorsal fins, the lateral lines along the body. The anterior rays are used to sense prey buried under sediment, or in turbulent water, and the lateral lines detect waves of pressure and low-frequency sound in the water.

P2: During offshore migration in winter and spring, adults have also been known to consume whitebait. Because "R. leporina" has small eyes that are located further back from the snout tip, they lack vision around their mouth region. This is compensated by an improved feeling of touch in the anterior rays of the dorsal fins, the lateral lines along the body. The anterior rays are used to sense prey buried under sediment, or in turbulent water, and the lateral lines detect waves of pressure and low-frequency sound in the water.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **enhanced sense** and **improved feeling** interchangeable (i.e., having the same meaning)?

Pair 2336

P1: The repertoire of the orchestra includes Western classical music ranging from early baroque to contemporary classical music as well as Chinese works composed or arranged for a Western orchestra. This is reflected in the program for its inaugural concert that included Rossini's Overture, Beethoven's Piano Concerto No. 5 (soloist Ong Lip Tat), Charles Ives' "The unanswered question", and the Chinese orchestral piece "Dance of the Yao People". Recordings.

P2: The repertoire of the orchestra includes Western classical music ranging from early baroque to contemporary classical music as well as Chinese works composed or arranged for a Western orchestra. This is reflected in the program for its inaugural concert that included Rossini's Overture, Beethoven's Piano Concerto No. 5 (soloist Ong Lip Tat), Charles Ives' "The orchestral piece", and the Chinese orchestral piece "Dance of the Yao People". Recordings.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **unanswered question** and **orchestral piece** interchangeable (i.e., having the same meaning)?

Pair 2337

P1: director Tim Rhys-Evans. In 2018 Gwdihw hosted Pwer Fest, a small indy and pop-punk festival. Pwer Fest was started up by Stereobrain Records and has hosted a multitude of different bands from dream state to False Advertising. Pwer fest was scheduled to be held at Gwdihw again in 2019 but due to the shutting down of the bar it was moved to Club Ifor bach.

P2: director Tim Rhys-Evans. In 2018 Gwdihw hosted Pwer Fest, a small indy and pop-punk festival. Pwer Fest was started up by Stereobrain Records and has hosted a multitude of different bands from band name to False Advertising. Pwer fest was scheduled to be held at Gwdihw again in 2019 but due to the shutting down of the bar it was moved to Club Ifor bach.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are dream state and band name interchangeable (i.e., having the same meaning)?

Pair 2338

P1: This protein has been found to direct the stereoselective biosynthesis of (+)-pinoresinol from coniferyl alcohol monomers: Lignan biosynthesis is catalysed by oxidative enzymes. In the test tube the reaction results in a heterogeneous mixture of dimeric compounds. When a dirigent protein is present during the reaction, one stereoisomer of one compound is highly enriched. Dirigent proteins appear to possess no oxidative radical forming activity of their own; in the absence of oxidative enzyme, no reaction will occur.

P2: This protein has been found to direct the stereoselective biosynthesis of (+)-pinoresinol from coniferyl alcohol monomers: Lignan biosynthesis is catalysed by oxidative enzymes. In the test tube the reaction results in a heterogeneous mixture of dimeric compounds. When a dirigent protein is present during the reaction, one stereoisomer of an element is highly enriched. Dirigent proteins appear to possess no oxidative radical forming activity of their own; in the absence of oxidative enzyme, no reaction will occur.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are one compound and an element interchangeable (i.e., having the same meaning)?

Pair 2339

P1: Worse, one must include contributions to the current matrix element where the external photon interacts with connected currents arising from vacuum fluctuations in order to obtain the correct frame-independent result. Such vacuum contributions do not arise in the light-front formalism, because all physical lines have positive formula_37; the vacuum has only formula_38, and formula_39 momentum is conserved. At large momentum transfers, the elastic helicity-conserving form factors fall-off as the nominal power formula_40 where formula_41 is the minimum number of constituents. For example, formula_42 for the three-quark Fock state of the proton.

P2: Worse, one must include contributions to the current matrix element where the external photon interacts with connected currents arising from vacuum fluctuations in order to obtain the correct frame-independent result. Such vacuum contributions do not arise in the light-front formalism, because all physical lines have positive formula_37; the vacuum has only formula_38, and formula_39 momentum is conserved. At large momentum transfers, the elastic helicity-conserving form factors fall-off as the median strength formula_40 where formula_41 is the minimum number of constituents. For example, formula_42 for the three-quark Fock state of the proton.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are nominal power and median strength interchangeable (i.e., having the same meaning)?

Pair 2340

P1: WPCI is a radio station located at 78 Mayberry Street in Greenville, South Carolina, U.S. that features a format consisting of a variety of music from different genres. The station is licensed by the FCC to broadcast on 1490 AM with a **nominal power** (radio broadcasting) of 1 kW, full-time. WPCI is owned and operated by local businessman Randy Mathena, and the programming consists entirely of selections from his extensive record collection stored on hard drive.

P2: WPCI is a radio station located at 78 Mayberry Street in Greenville, South Carolina, U.S. that features a format consisting of a variety of music from different genres. The station is licensed by the FCC to broadcast on 1490 AM with a **mean wattage** (radio broadcasting) of 1 kW, full-time. WPCI is owned and operated by local businessman Randy Mathena, and the programming consists entirely of selections from his extensive record collection stored on hard drive.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **nominal power** and **mean wattage** interchangeable (i.e., having the same meaning)?

Pair 2341

P1: Since the 1980s, with the "reform and opening up", Chinese leaders have made economic development one of their first priorities. Chinese businesses often produce goods tailored to market expectations; therefore, Chinese products generally may lack quality when consumers prefer to pay a low price. Many companies and businesses also lack capital, industry expertise, and **marketing power**, leading to their manufacturing of counterfeit products. Many companies produce such goods to piggyback on the popularity of legitimate companies such as Apple, Hyatt and Starbucks are copied.

P2: Since the 1980s, with the "reform and opening up", Chinese leaders have made economic development one of their first priorities. Chinese businesses often produce goods tailored to market expectations; therefore, Chinese products generally may lack quality when consumers prefer to pay a low price. Many companies and businesses also lack capital, industry expertise, and **audience reach**, leading to their manufacturing of counterfeit products. Many companies produce such goods to piggyback on the popularity of legitimate companies such as Apple, Hyatt and Starbucks are copied.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **marketing power** and **audience reach** interchangeable (i.e., having the same meaning)?

Pair 2342

P1: The helmets are white because that colour is easier to spot by cameras and police helicopters. The helmet is plain white for inspectors (rank equivalent to police officer/constable) who function as section members during public order operations. Chief-inspectors (who function as section chiefs) wear white helmets with **one blue stripe** running from back to front. Commissioners and chief-commissioners (who function as platoon commanders or even squadron commanders and group commanders) have two blue stripes.

P2: The helmets are white because that colour is easier to spot by cameras and police helicopters. The helmet is plain white for inspectors (rank equivalent to police officer/constable) who function as section members during public order operations. Chief-inspectors (who function as section chiefs) wear white helmets with **single indigo line** running from back to front. Commissioners and chief-commissioners (who function as platoon commanders or even squadron commanders and group commanders) have two blue stripes.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one blue stripe** and **single indigo line** interchangeable (i.e., having the same meaning)?

Pair 2343

P1: Parkinson spent more than a quarter-million dollars dredging the harbor and using the fill to raise the isle more than ten feet above the high tide line. The Griffith Company was hired to build seawalls, a bridge, piers and roads. The new

development was one of the **first master** planned communities in California and was conceived to resemble a European resort. Parkinson envisioned the space as a resort similar to those in the Mediterranean.

P2: Parkinson spent more than a quarter-million dollars dredging the harbor and using the fill to raise the isle more than ten feet above the high tide line. The Griffith Company was hired to build seawalls, a bridge, piers and roads. **The new development was one of the inaugural overall** planned communities in California and was conceived to resemble a European resort. Parkinson envisioned the space as a resort similar to those in the Mediterranean.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **first master** and **inaugural overall** interchangeable (i.e., having the same meaning)?

Pair 2344

P1: Craig Byrnes created this flag in 1995. In the season 14 episode of "The Simpsons" called "Three Gays of the Condo," originally aired in 2003, Homer Simpson is standing on the street in Springfield's gay district talking with Waylon Smithers. **A group of Smithers' gay friends pass by on a street car** and one of them shouts, "Hey Waylon! Who's the bear?"

P2: Craig Byrnes created this flag in 1995. In the season 14 episode of "The Simpsons" called "Three Gays of the Condo," originally aired in 2003, Homer Simpson is standing on the street in Springfield's gay district talking with Waylon Smithers. **A group of Smithers' gay friends pass by on a trammed train** and one of them shouts, "Hey Waylon! Who's the bear?"

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **street car** and **trammed train** interchangeable (i.e., having the same meaning)?

Pair 2345

P1: And since broadcasting replacements is not time critical, if a cache is not required to process the replacement right away, there is no downside. On the other hand, if a cache does not process an update right away, it may lead to out-of-order updates. **In such cases a three state update protocol, like the Firefly protocol, may have performance advantages.** Comparisons.

P2: And since broadcasting replacements is not time critical, if a cache is not required to process the replacement right away, there is no downside. On the other hand, if a cache does not process an update right away, it may lead to out-of-order updates. **In such cases a three state update protocol, like the Firefly protocol, may have system enhancements.** Comparisons.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **performance advantages** and **system enhancements** interchangeable (i.e., having the same meaning)?

Pair 2346

P1: The Sopwith Swallow was a British parasol wing fighter aircraft of the First World War. **A single example was built, but it saw no production, offering no performance advantages over contemporary biplanes.** Design and development.

P2: The Sopwith Swallow was a British parasol wing fighter aircraft of the First World War. **A single example was built, but it saw no production, offering no competitive benefits over contemporary biplanes.** Design and development.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **performance advantages** and **competitive benefits** interchangeable (i.e., having the same meaning)?

Pair 2347

P1: The first minaret, known as Al-Fakhariyya Minaret, was one of the Mamluk minarets. It was built in 1278, on the junction of the southern wall and western wall at the orders of the Mamluk sultan Lajin. The minaret was built on the solid part of the wall. It was named after Fakhr al-Din al-Khalili, the father of Sharif al-Din Abd al-Rahman who supervised the building's construction.

P2: The first minaret, known as Al-Fakhariyya Minaret, was one of the Mamluk minarets. It was built in 1278, on the junction of the southern wall and western wall at the orders of the Mamluk sultan Lajin. The minaret was built on the sturdy foundation of the wall. It was named after Fakhr al-Din al-Khalili, the father of Sharif al-Din Abd al-Rahman who supervised the building's construction.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are solid part and sturdy foundation interchangeable (i.e., having the same meaning)?

Pair 2348

P1: Thoughtful consideration should be used to ensure the resources and commitment are present to make the animal - human relationship beneficial for both. Rescue dogs. A rescue dog is a dog that has been placed in a new home after being abused, neglected, or abandoned by its previous owner. The term can also apply to dogs that are found as strays, surrendered by owners for a variety of reasons, including relationship breakdowns, moving home where the owner is unable or unwilling to take their pets, or elderly people who are not permitted to take their dog(s) into a nursing home.

P2: Thoughtful consideration should be used to ensure the resources and commitment are present to make the animal - human relationship beneficial for both. Rescue dogs. A rescued K9 is a dog that has been placed in a new home after being abused, neglected, or abandoned by its previous owner. The term can also apply to dogs that are found as strays, surrendered by owners for a variety of reasons, including relationship breakdowns, moving home where the owner is unable or unwilling to take their pets, or elderly people who are not permitted to take their dog(s) into a nursing home.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are rescue dog and rescued K9 interchangeable (i.e., having the same meaning)?

Pair 2349

P1: Currently, Gerretsen is a member of the Standing Committee on Procedure and House Affairs and continues to be the Chair of the Ontario Liberal Caucus. Personal life. Mark and his wife Vanessa live in Kingston's east end with their three children Mason, Francesco and Vivian and their rescue dog Otis. Mark is the son of John Gerretsen, former Mayor of Kingston and MPP for Kingston and the Islands who held several positions in the cabinets of Premier Dalton McGuinty and Kathleen Wynne.

P2: Currently, Gerretsen is a member of the Standing Committee on Procedure and House Affairs and continues to be the Chair of the Ontario Liberal Caucus. Personal life. Mark and his wife Vanessa live in Kingston's east end with their three children Mason, Francesco and Vivian and their saved canine Otis. Mark is the son of John Gerretsen, former Mayor of Kingston and MPP for Kingston and the Islands who held several positions in the cabinets of Premier Dalton McGuinty and Kathleen Wynne.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are rescue dog and saved canine interchangeable (i.e., having the same meaning)?

Pair 2350

P1: The Tsaigumi UAV is an unmanned aerial vehicle designed and used by the Nigerian Air Force. It is one of the first UAVs indigenously developed in Nigeria. This is in furtherance of the ongoing drive to produce and incorporate

made-in-Nigeria military weapons. History.

P2: The Tsaigumi UAV is an unmanned aerial vehicle designed and used by the Nigerian Air Force. It is one of the first UAVs indigenously developed in Nigeria. This is in furtherance of the continued effort to produce and incorporate made-in-Nigeria military weapons. History.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are ongoing drive and continued effort interchangeable (i.e., having the same meaning)?

Pair 2351

P1: Early life. Livesey was born on 5 March 1794 at Walton-le-Dale near Preston, Lancashire, the son of John Livesey, a cloth manufacturer, and Jennett (née Ainsley). His father had a warehouse and warping mill in the village and contracted work out to local weavers. However, both Joseph's parents died of tuberculosis when he was 7, and his grandfather, also Joseph Livesey, and uncle, Thomas Livesey, stepped in to run the business and look after the boy; they were not successful and the business had to be wound up after 3–4 years.

P2: Early life. Livesey was born on 5 March 1794 at Walton-le-Dale near Preston, Lancashire, the son of John Livesey, a cloth manufacturer, and Jennett (née Ainsley). His father had a warehouse and warping mill in the village and hired hand out to local weavers. However, both Joseph's parents died of tuberculosis when he was 7, and his grandfather, also Joseph Livesey, and uncle, Thomas Livesey, stepped in to run the business and look after the boy; they were not successful and the business had to be wound up after 3–4 years.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are contracted work and hired hand interchangeable (i.e., having the same meaning)?

Pair 2352

P1: Historical background. Systems psychology has emerged here as a new approach in which groups and individuals, are considered as systems in homeostasis. Within open systems they have an active method of remaining stable through the dynamic relationship between parts. A classic example of this homeostatic dynamic is the "problem behavior" of a bed wetting child having a stabilizing function of holding a troubled marriage together because the attention of the parents is drawn away from their conflict towards the "problem" child.

P2: Historical background. Systems psychology has emerged here as a new approach in which groups and individuals, are considered as systems in homeostasis. Within open systems they have an effective manner of remaining stable through the dynamic relationship between parts. A classic example of this homeostatic dynamic is the "problem behavior" of a bed wetting child having a stabilizing function of holding a troubled marriage together because the attention of the parents is drawn away from their conflict towards the "problem" child.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are active method and effective manner interchangeable (i.e., having the same meaning)?

Pair 2353

P1: It was also their first and only independent album since leaving their old label Jive Records in 2010. The album debuted at number five on the US "Billboard" 200, making the Backstreet Boys the first act since Sade to have nine US top 10 albums, and the only boy band to do so. On May 20, 2013, the group released "permanent stain" as a promotional single, which was co-written by band member Nick Carter. A free download of the song was offered with the purchase of a ticket for their In a World Like This Tour.

P2: It was also their first and only independent album since leaving their old label Jive Records in 2010. The album debuted at number five on the US "Billboard" 200, making the Backstreet Boys the first act since Sade to have nine US top 10 albums, and the only boy band to do so. On May 20, 2013, the group released "single song" as a promotional

single, which was co-written by band member Nick Carter. A free download of the song was offered with the purchase of a ticket for their In a World Like This Tour.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **permanent stain** and **single song** interchangeable (i.e., having the same meaning)?

Pair 2354

P1: He was dragged from the hospital and burned to death in front of a mob of hundreds in a field south of the city. Fifteen men and teenage boys were indicted, but all were acquitted at trials. **The lynching was the last in Pennsylvania and is said to have left a permanent stain on the city's image.** Walker's murder was investigated by the National Association for the Advancement of Colored People (NAACP), which called for an end to lynching nationwide.

P2: He was dragged from the hospital and burned to death in front of a mob of hundreds in a field south of the city. Fifteen men and teenage boys were indicted, but all were acquitted at trials. **The lynching was the last in Pennsylvania and is said to have left a noticeable scar on the city's image.** Walker's murder was investigated by the National Association for the Advancement of Colored People (NAACP), which called for an end to lynching nationwide.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **permanent stain** and **noticeable scar** interchangeable (i.e., having the same meaning)?

Pair 2355

P1: Other attractions include a bobsleigh track, a do-it-yourself chocolate factory, and a children's fire station. Christmas in Kongeparken. **"Jul i Kongeparken" (Christmas in Kongeparken) is held in November and December and features fairy lights, Christmas trees, elves, carol singing and family workshops.** Attractions and rides.

P2: Other attractions include a bobsleigh track, a do-it-yourself chocolate factory, and a children's fire station. Christmas in Kongeparken. **"Jul i Kongeparken" (Christmas in Kongeparken) is held in November and December and features fairy lights, Christmas trees, elves, carol singing and home stores.** Attractions and rides.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **family workshops** and **home stores** interchangeable (i.e., having the same meaning)?

Pair 2356

P1: It is noted that anxious attachment individuals report significantly more instances of sexual fantasising, and portray the self as feeble, dependable and powerless. Avoidant attachment types report fantasies in which relationships are regarded as cold, unfeeling and impersonal. **As such, sexual fantasies serve the primary function of fulfilling interpersonal goals through the mode of mental representation.** Evolutionary theory provides another interesting explanation as to the purpose and function of gender differences in sexual fantasies.

P2: It is noted that anxious attachment individuals report significantly more instances of sexual fantasising, and portray the self as feeble, dependable and powerless. Avoidant attachment types report fantasies in which relationships are regarded as cold, unfeeling and impersonal. **As such, sexual fantasies serve the key way of fulfilling interpersonal goals through the mode of mental representation.** Evolutionary theory provides another interesting explanation as to the purpose and function of gender differences in sexual fantasies.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **primary function** and **key way** interchangeable (i.e., having the same meaning)?

Pair 2357

P1: Needless add that his first cabinet appointment was Assistant Minister of Education, charged with crafting Kenya's first postcolonial educational system during the Kenyatta regime. He was one of the first African members of the colonial legislatures, when in 1960 the colonial government ordered a nationwide election for 14 African Legislators to the colonial parliament. Khasakhala was the winner of the combined counties of Marama, Kisa, Maragoli, Tiriki and Bunyore; he became the first Legislator for the **combined region**. In 1962 Khasakhala together with the other 13 Members of Parliament were taken to Britain for one month edification on political governance and the parliamentary system.

P2: Needless add that his first cabinet appointment was Assistant Minister of Education, charged with crafting Kenya's first postcolonial educational system during the Kenyatta regime. He was one of the first African members of the colonial legislatures, when in 1960 the colonial government ordered a nationwide election for 14 African Legislators to the colonial parliament. Khasakhala was the winner of the combined counties of Marama, Kisa, Maragoli, Tiriki and Bunyore; he became the first Legislator for the **whole place**. In 1962 Khasakhala together with the other 13 Members of Parliament were taken to Britain for one month edification on political governance and the parliamentary system.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **combined region** and **whole place** interchangeable (i.e., having the same meaning)?

Pair 2358

P1: LaDawri renamed the car the Centurion 21 and production continued until 1965. Formula Libre. **The last body** La Dawri introduced was the 1965 Formula Libre, with a front or mid-engined layout. LaDawri offered to adapt it to take any running gear that the customer chose.

P2: LaDawri renamed the car the Centurion 21 and production continued until 1965. Formula Libre. **The ultimate design** La Dawri introduced was the 1965 Formula Libre, with a front or mid-engined layout. LaDawri offered to adapt it to take any running gear that the customer chose.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **last body** and **ultimate design** interchangeable (i.e., having the same meaning)?

Pair 2359

P1: For instance, an image of 'La Parisienne', – the typical Parisian woman – does consist not only of clothing but also of certain manners, values and behavioural patterns associated with the country and its citizens. One of the most typical associations with Paris is that it is the city of love and fashion, a romantic city full of chic and luxury. **The fashion phenomenon can provide strong associations and a clear understanding** of Paris as a centre of fashion, love and dreams. Japan.

P2: For instance, an image of 'La Parisienne', – the typical Parisian woman – does consist not only of clothing but also of certain manners, values and behavioural patterns associated with the country and its citizens. One of the most typical associations with Paris is that it is the city of love and fashion, a romantic city full of chic and luxury. **The fashion phenomenon can provide strong associations and a visible knowing** of Paris as a centre of fashion, love and dreams. Japan.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **clear understanding** and **visible knowing** interchangeable (i.e., having the same meaning)?

Pair 2360

P1: AVMs remove the human element from the valuation process and rely on computer objectivity so as to remove human bias and subjectivity. AVMs are particularly useful in assessing the value of a property portfolio. **Using an automated model can also be useful for valuing an individual property where the provider can deliver a suitable level** of accuracy.

Disadvantages.

P2: AVMs remove the human element from the valuation process and rely on computer objectivity so as to remove human bias and subjectivity. AVMs are particularly useful in assessing the value of a property portfolio. Using an automated model can also be useful for valuing an individual property where the provider can deliver a passable amount of accuracy. Disadvantages.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are suitable level and passable amount interchangeable (i.e., having the same meaning)?

Pair 2361

P1: Weather during harvest need not be as fair and dry as when harvesting for drying. For corn, harvest begins when the whole-plant moisture is at a suitable level, ideally a few days before it is ripe. For pasture-type crops, the grass is mown and allowed to wilt for a day or so until the moisture content drops to a suitable level. Ideally the crop is mowed when in full flower, and deposited in the silo on the day of its cutting.

P2: Weather during harvest need not be as fair and dry as when harvesting for drying. For corn, harvest begins when the whole-plant moisture is at a suitable level, ideally a few days before it is ripe. For pasture-type crops, the grass is mown and allowed to wilt for a day or so until the moisture content drops to a preferred content. Ideally the crop is mowed when in full flower, and deposited in the silo on the day of its cutting.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are suitable level and preferred content interchangeable (i.e., having the same meaning)?

Pair 2362

P1: Labelling RAN as a measure of reading ability ignores many complexities of the task. Schatschneider et al. argue that rapid naming tasks are composed of attentional, visual, lexical, temporal, and recognition sub-processes that all contribute to naming speed performance. Lumping all these sub-processes under the category of phonological processes obscures the complexity of rapid naming tasks.

P2: Labelling RAN as a measure of reading ability ignores many complexities of the task. Schatschneider et al. argue that rapid naming tasks are composed of attentional, visual, lexical, temporal, and recognition sub-processes that all contribute to naming timing metric. Lumping all these sub-processes under the category of phonological processes obscures the complexity of rapid naming tasks.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are speed performance and timing metric interchangeable (i.e., having the same meaning)?

Pair 2363

P1: Her father was a staunch believer in women's education, and sent Emily to Monson Academy for several years, before having her attend a boarding school in New Haven, Connecticut. Courtship and marriage to Edward Dickinson. In 1826, Edward Dickinson, who was training to be a lawyer in Amherst, Massachusetts, traveled up to Monson on legal business and met Emily Norcross. She caught his attention, and the two struck up a lengthy correspondence.

P2: Her father was a staunch believer in women's education, and sent Emily to Monson Academy for several years, before having her attend a boarding school in New Haven, Connecticut. Courtship and marriage to Edward Dickinson. In 1826, Edward Dickinson, who was training to be a lawyer in Amherst, Massachusetts, traveled up to Monson on legit affairs and met Emily Norcross. She caught his attention, and the two struck up a lengthy correspondence.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **legal business** and **legit affairs** interchangeable (i.e., having the same meaning)?

Pair 2364

P1: The by-election took place on 28 June 1928 and Jones emerged as the narrow winner. Jones had made his opposition to the land policy a feature of the campaign in an attempt to retain the support of the division's farmers, many of whom shared Mond's concern about the nationalisation proposals. **In any event the "Green Book" had by this time been withdrawn as a full statement of Liberal land policy.** Instead, Jones promoted as the main object of Liberal land policy the desire to give security of tenure to tenant farmers.

P2: The by-election took place on 28 June 1928 and Jones emerged as the narrow winner. Jones had made his opposition to the land policy a feature of the campaign in an attempt to retain the support of the division's farmers, many of whom shared Mond's concern about the nationalisation proposals. **In any event the "Green Book" had by this time been withdrawn as a complete stand of Liberal land policy.** Instead, Jones promoted as the main object of Liberal land policy the desire to give security of tenure to tenant farmers.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **full statement** and **complete stand** interchangeable (i.e., having the same meaning)?

Pair 2365

P1: From a military perspective, the IDF needed a few more days to make the Egyptian Third Army surrender and cut off the Second Army, which would collapse the entire Egyptian military. On the other hand, Israel had a great debt to the United States as a result of the massive arms shipments of Operation Nickel Grass. **He later said it was the latter consideration that made him accept the ceasefire.** The town of Suez had about 260,000 residents before the War of Attrition, but most of them left during that conflict.

P2: From a military perspective, the IDF needed a few more days to make the Egyptian Third Army surrender and cut off the Second Army, which would collapse the entire Egyptian military. On the other hand, Israel had a great debt to the United States as a result of the massive arms shipments of Operation Nickel Grass. **He later said it was the previous thought that made him accept the ceasefire.** The town of Suez had about 260,000 residents before the War of Attrition, but most of them left during that conflict.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **latter consideration** and **previous thought** interchangeable (i.e., having the same meaning)?

Pair 2366

P1: The draft formed the basis of the new Labour Relations Act 66 of 1995, which appeared in its current form after "intensive debate" in the National Economic Development & Labour Council (NEDLAC), a body consisting of representatives of government, organised labour, and employers, including the Manpower Commission and the National Economic Forum. They started thrashing out a new framework, to deal comprehensively with both individual and collective labour law. **Given the adversarial nature of the relationship between organised labour and employers up to that point, this was a revolutionary development.** Under the watchful eye of government representatives, and with their participation, management and labour were entrusted with the task of developing the draft bill into a uniquely South African product that at once satisfied the aspirations of labour and the reservations of management, and yet conformed to the letter and spirit of the Constitution and the requirements of the International Labour Organization (ILO), of which South Africa was now a member.

P2: The draft formed the basis of the new Labour Relations Act 66 of 1995, which appeared in its current form after "intensive debate" in the National Economic Development & Labour Council (NEDLAC), a body consisting of representatives of government, organised labour, and employers, including the Manpower Commission and the National Economic Forum. They started thrashing out a new framework, to deal comprehensively with both individual and collective labour law. **Given the difficult environment of the relationship between organised labour and employers up to that point, this was a revolutionary development.** Under the watchful eye of government representatives, and with their

participation, management and labour were entrusted with the task of developing the draft bill into a uniquely South African product that at once satisfied the aspirations of labour and the reservations of management, and yet conformed to the letter and spirit of the Constitution and the requirements of the International Labour Organization (ILO), of which South Africa was now a member.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **adversarial nature** and **difficult environment** interchangeable (i.e., having the same meaning)?

Pair 2367

P1: When Jesus discusses marriage, he points out that there is some responsibility for a man marrying a woman (and vice versa). Not having assets of their own, women needed to be protected from the risk of their husbands' putting them on the street at whim. In those times marriage was an **economic matter** rather than one of love. A woman and her children could easily be rejected.

P2: When Jesus discusses marriage, he points out that there is some responsibility for a man marrying a woman (and vice versa). Not having assets of their own, women needed to be protected from the risk of their husbands' putting them on the street at whim. In those times marriage was an **industrial concept** rather than one of love. A woman and her children could easily be rejected.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **economic matter** and **industrial concept** interchangeable (i.e., having the same meaning)?

Pair 2368

P1: He was confirmed by Senate voice vote for both positions. In an April 4, 2013, speech, he affirmed that the 'Shift to Asia' initiative of President Obama was a priority that would not be affected by the budget sequestration in 2013. Carter noted that "The Shift to Asia" is principally an **economic matter** with new security implications. India, Australia, and New Zealand were mentioned as forthcoming security partners.

P2: He was confirmed by Senate voice vote for both positions. In an April 4, 2013, speech, he affirmed that the 'Shift to Asia' initiative of President Obama was a priority that would not be affected by the budget sequestration in 2013. Carter noted that "The Shift to Asia" is principally an **exchange concern** with new security implications. India, Australia, and New Zealand were mentioned as forthcoming security partners.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **economic matter** and **exchange concern** interchangeable (i.e., having the same meaning)?

Pair 2369

P1: His overall record is 106–81. Former Wildcats active in the National Football League going into the 2020 season include Ibraheim Campbell, Austin Carr, Garrett Dickerson, Joe Gaziano, Nate Hall, Blake Hance, Montre Hartage, Justin Jackson, Joe Jones, Tyler Lancaster, Dean Lowry, Sherrick McManis, Ifeadi Odenigbo, Trevor Siemian, Clayton Thorson, Dan Vitale, and Anthony Walker, Jr. Men's Basketball. The Wildcats men's basketball team is under the direction of Sullivan-Ubben **head men's** Basketball Coach Chris Collins, a role that he's been in since 2013. Collins led the Wildcats to heights never before reached during the 2016–17 season when the program saw a school record 24 wins and its first NCAA tournament berth and victory in program history.

P2: His overall record is 106–81. Former Wildcats active in the National Football League going into the 2020 season include Ibraheim Campbell, Austin Carr, Garrett Dickerson, Joe Gaziano, Nate Hall, Blake Hance, Montre Hartage, Justin Jackson, Joe Jones, Tyler Lancaster, Dean Lowry, Sherrick McManis, Ifeadi Odenigbo, Trevor Siemian, Clayton Thorson, Dan Vitale, and Anthony Walker, Jr. Men's Basketball. The Wildcats men's basketball team is under the

direction of Sullivan-Ubben **NCAA school's** Basketball Coach Chris Collins, a role that he's been in since 2013. Collins led the Wildcats to heights never before reached during the 2016–17 season when the program saw a school record 24 wins and its first NCAA tournament berth and victory in program history.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **head men** and **NCAA school** interchangeable (i.e., having the same meaning)?

Pair 2370

P1: After being informed by Dagger, who visits her in secret, that Argul went north to a town called Panther's Halt, Claidi sets out in the Star-ship. Before she reaches the town, the Star-ship abruptly loses its power. **Yinyay shrinks down to a molecular size, leaving Claidi to travel the last distance to Panther's Halt herself.** Here she sees Argul during an enormous ceremony, and rushes across town to meet him.

P2: After being informed by Dagger, who visits her in secret, that Argul went north to a town called Panther's Halt, Claidi sets out in the Star-ship. Before she reaches the town, the Star-ship abruptly loses its power. **Yinyay shrinks down to a molecular size, leaving Claidi to travel the ultimate measure to Panther's Halt herself.** Here she sees Argul during an enormous ceremony, and rushes across town to meet him.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **last distance** and **ultimate measure** interchangeable (i.e., having the same meaning)?

Pair 2371

P1: By 2002, the simulcast with 92.3 was dropped and 100.9 switched to Urban Gospel under the WTHB call sign. In August 2007, Radio One sold its Augusta stations (including WTHB) to Perry Broadcasting. **On January 11, 2008, the station switched frequencies with sister WAKB and moved to 96.9 FM, a weaker signal.** To boost its coverage, it simulcasts with WTHB 1550 AM.

P2: By 2002, the simulcast with 92.3 was dropped and 100.9 switched to Urban Gospel under the WTHB call sign. In August 2007, Radio One sold its Augusta stations (including WTHB) to Perry Broadcasting. **On January 11, 2008, the station switched frequencies with sister WAKB and moved to 96.9 FM, a worse reception.** To boost its coverage, it simulcasts with WTHB 1550 AM.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **weaker signal** and **worse reception** interchangeable (i.e., having the same meaning)?

Pair 2372

P1: One method of preventing loss is hermetic grain storage. Hermetic grain storage strives to eliminate all exchange of gases within the storage system. **This mitigates bacterial activity and prevents rodents and bugs from being able to breathe inside the storage systems.** The introduction of hermetic grain storage to subsistence farms can create a more stable food supply in the area and reduce the risk of starvation.

P2: One method of preventing loss is hermetic grain storage. Hermetic grain storage strives to eliminate all exchange of gases within the storage system. **This mitigates bacterial activity and prevents rodents and bugs from being able to breathe inside the packaged containers.** The introduction of hermetic grain storage to subsistence farms can create a more stable food supply in the area and reduce the risk of starvation.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **storage systems** and **packaged containers** interchangeable (i.e., having the same meaning)?

Pair 2373

P1: (He will, for instance, write a letter saying that he cannot meet the debt.) The friend will then apply for compulsory sequestration on the strength of this act of insolvency. An application for compulsory sequestration brought by a creditor who is not at arm's length is generally referred to as "friendly sequestration. The mere fact that an application for compulsory sequestration is brought by a creditor who is prepared to co-operate with the debtor, or who is motivated partly by a desire to assist the debtor, does not preclude the granting of a sequestration order.

P2: (He will, for instance, write a letter saying that he cannot meet the debt.) The friend will then apply for compulsory sequestration on the strength of this act of insolvency. An application for compulsory sequestration brought by a creditor who is not at acceptable distance is generally referred to as "friendly sequestration. The mere fact that an application for compulsory sequestration is brought by a creditor who is prepared to co-operate with the debtor, or who is motivated partly by a desire to assist the debtor, does not preclude the granting of a sequestration order.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are arm's length and acceptable distance interchangeable (i.e., having the same meaning)?

Pair 2374

P1: The home is decorated to look as it would have in the early 1900s. In 2002, an addition was built to the front of the original home to display more items teaching about African-American history in Kansas. one display includes prints of original photographic plate negatives donated to the museum, called the Black Dignity Photos from the Mary Everhard collection. The photographs are African-American pioneers who lived in and around the Leavenworth area from 1870s to 1920s.

P2: The home is decorated to look as it would have in the early 1900s. In 2002, an addition was built to the front of the original home to display more items teaching about African-American history in Kansas. a single diagram includes prints of original photographic plate negatives donated to the museum, called the Black Dignity Photos from the Mary Everhard collection. The photographs are African-American pioneers who lived in and around the Leavenworth area from 1870s to 1920s.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are one display and a single diagram interchangeable (i.e., having the same meaning)?

Pair 2375

P1: It describes a recipe for gunpowder and recognized its military use: In 1250, the Norwegian "Konungs skuggsjá" mentioned, in its military chapter, the use of "coal and sulphur" as the best weapon for ship-to-ship combat. Muslim and Christian Iberia. In reference to the siege to Alicante in 1331, the Spanish historian Zurita recorded a "new machine that caused great terror. It threw iron balls with fire."

P2: It describes a recipe for gunpowder and recognized its military use: In 1250, the Norwegian "Konungs skuggsjá" mentioned, in its military chapter, the use of "coal and sulphur" as the best weapon for ship-to-ship combat. Muslim and Christian Iberia. In reference to the siege to Alicante in 1331, the Spanish historian Zurita recorded a "modern piece of technology that caused great terror. It threw iron balls with fire."

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are new machine and modern piece of technology interchangeable (i.e., having the same meaning)?

Pair 2376

P1: Overtime under the original format was sudden death, the first team to score would be declared the winner. In March , the NFL amended its rules for postseason overtime, with the rule being extended into the regular season in March 2012. **If a team scores a touchdown, or if the defense scores a safety on the (other team's) first possession, it is declared the winner.** If it scores a field goal on its first possession, however, it then kicks off to the opposing team, which has an opportunity to score; if the score is tied again after that possession, true sudden death rules apply and whoever scores next will win.

P2: Overtime under the original format was sudden death, the first team to score would be declared the winner. In March , the NFL amended its rules for postseason overtime, with the rule being extended into the regular season in March 2012. **If a team scores a touchdown, or if the defense scores a safety on the (other team's) initial acquisition, it is declared the winner.** If it scores a field goal on its first possession, however, it then kicks off to the opposing team, which has an opportunity to score; if the score is tied again after that possession, true sudden death rules apply and whoever scores next will win.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **first possession** and **initial acquisition** interchangeable (i.e., having the same meaning)?

Pair 2377

P1: In the late Middle Ages, Middle Scots, became the dominant language. Ideas of chivalry began to dominate during the reign of David II. **Tournaments provided one focus of display.** The Scottish crown in the fifteenth century adopted the example of the Burgundian court, through formality and elegance putting itself at the centre of culture and political life.

P2: In the late Middle Ages, Middle Scots, became the dominant language. Ideas of chivalry began to dominate during the reign of David II. **Tournaments provided a single view of display.** The Scottish crown in the fifteenth century adopted the example of the Burgundian court, through formality and elegance putting itself at the centre of culture and political life.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one focus** and **a single view** interchangeable (i.e., having the same meaning)?

Pair 2378

P1: Despite this, they are still mentioned in-game via a collectible trophy. The Polar Bear from this series also appears as an enemy in the 3DS version's Smash Run mode. **The Ice Climbers and summit stage returned to the series in "Super Smash Bros. Ultimate".**

P2: Despite this, they are still mentioned in-game via a collectible trophy. The Polar Bear from this series also appears as an enemy in the 3DS version's Smash Run mode. **The Ice Climbers and mountain level returned to the series in "Super Smash Bros. Ultimate".**

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **summit stage** and **mountain level** interchangeable (i.e., having the same meaning)?

Pair 2379

P1: Yet, the play that leads to 2.09 tricks on average, beats the play leading to an average of 2.12 tricks in terms of matchpoint objective. This can be seen by considering the lay-outs on which the line of play that starts with a deep finesse takes more tricks than the line of play starting with a finesse and vice versa: it follows that the deep finesse beats the finesse in 22.95% of the cases, while the finesse beats the deep finesse only in 18.33% of the cases. **In the remainder of the cases (58.72%) both lines of play lead to the same number of tricks.** Mixed strategies.

P2: Yet, the play that leads to 2.09 tricks on average, beats the play leading to an average of 2.12 tricks in terms of matchpoint objective. This can be seen by considering the lay-outs on which the line of play that starts with a deep finesse takes more tricks than the line of play starting with a finesse and vice versa: it follows that the deep finesse beats the finesse in 22.95% of the cases, while the finesse beats the deep finesse only in 18.33% of the cases. **In the remainder of the cases (58.72%) both lines of hands result to the same number of tricks.** Mixed strategies.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **play lead** and **hands result** interchangeable (i.e., having the same meaning)?

Pair 2380

P1: Compared to an annual GDP growth rate of 6.5% from 1973 to 1980, growth slowed to an average of 2.9% a year from 1980 through 1985 and was stagnant from 1986 to 1990. The crisis peaked in 1990 when the first measures of an IMF structural adjustment program were carried out. **While the program was not fully implemented before the war, key measures** such as two large devaluations and the removal of official prices were enacted. The consequences on salaries and purchasing power were rapid and dramatic.

P2: Compared to an annual GDP growth rate of 6.5% from 1973 to 1980, growth slowed to an average of 2.9% a year from 1980 through 1985 and was stagnant from 1986 to 1990. The crisis peaked in 1990 when the first measures of an IMF structural adjustment program were carried out. **While the program was not fully implemented before the war, main actions** such as two large devaluations and the removal of official prices were enacted. The consequences on salaries and purchasing power were rapid and dramatic.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **key measures** and **main actions** interchangeable (i.e., having the same meaning)?

Pair 2381

P1: Gyroid structures have photonic band gaps that make them potential photonic crystals. Gyroid structures have been observed in biological structural coloration such as butterfly wing scales, inspiring work on biomimetic materials. **The gyroid mitochondrial membranes found in the retinal cone cells of certain tree shrew species present a unique structure which may have an optical function.** In 2017, MIT researchers studied the possibility of using the gyroid shape to turn bi-dimensional materials, such as graphene, into a three-dimensional structural material with low density, yet high tensile strength.

P2: Gyroid structures have photonic band gaps that make them potential photonic crystals. Gyroid structures have been observed in biological structural coloration such as butterfly wing scales, inspiring work on biomimetic materials. **The gyroid mitochondrial membranes found in the retinal cone cells of specific plant shrew species present a unique structure which may have an optical function.** In 2017, MIT researchers studied the possibility of using the gyroid shape to turn bi-dimensional materials, such as graphene, into a three-dimensional structural material with low density, yet high tensile strength.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **certain tree** and **specific plant** interchangeable (i.e., having the same meaning)?

Pair 2382

P1: PCC6803 is capable of natural genetic transformation. For transformation to take place, the recipient bacteria must be in a competent state. **A gene, "comF", was shown to be involved in competence development** in "Synechocystis" sp. PCC6803.

P2: PCC6803 is capable of natural genetic transformation. For transformation to take place, the recipient bacteria must be in a competent state. **A gene, "comF", was shown to be involved in capability progress** in "Synechocystis" sp. PCC6803.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **competence development** and **capability progress** interchangeable (i.e., having the same meaning)?

Pair 2383

P1: formula_4 is observed discharge at time "t". The Nash–Sutcliffe efficiency is calculated as one minus the ratio of the error variance of the modeled time-series divided by the variance of the observed time-series. In the situation of a **perfect model** with an estimation error variance equal to zero, the resulting Nash–Sutcliffe Efficiency equals 1 ("NSE" = 1). Conversely, a model that produces an estimation error variance equal to the variance of the observed time series results in a Nash–Sutcliffe Efficiency of 0.0 ("NSE" = 0).

P2: formula_4 is observed discharge at time "t". The Nash–Sutcliffe efficiency is calculated as one minus the ratio of the error variance of the modeled time-series divided by the variance of the observed time-series. In the situation of a **typical example** with an estimation error variance equal to zero, the resulting Nash–Sutcliffe Efficiency equals 1 ("NSE" = 1). Conversely, a model that produces an estimation error variance equal to the variance of the observed time series results in a Nash–Sutcliffe Efficiency of 0.0 ("NSE" = 0).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **perfect model** and **typical example** interchangeable (i.e., having the same meaning)?

Pair 2384

P1: Like many other groups, the lower cost of living in Philadelphia has attracted many immigrants who entered the US through New York. There are large numbers of Haitians in North Philadelphia, Northeast and some in other areas like Olney, East Mount Airy, Chestnut Hill and West Philadelphia. The **conservative number** of Haitians in Philadelphia is 30,000. Chicago.

P2: Like many other groups, the lower cost of living in Philadelphia has attracted many immigrants who entered the US through New York. There are large numbers of Haitians in North Philadelphia, Northeast and some in other areas like Olney, East Mount Airy, Chestnut Hill and West Philadelphia. The **undervalued estimate** of Haitians in Philadelphia is 30,000. Chicago.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **conservative number** and **undervalued estimate** interchangeable (i.e., having the same meaning)?

Pair 2385

P1: If A is much greater than 1 then the condition is well satisfied. The case where A equals 1 is considered the cutoff for satisfying the condition and is the edge of where the crystal can resolve a pulse. Typically, A is chosen as a **conservative number** such as 3. These equations can be used to determine the working limits for a given setup as a function of wavelength.

P2: If A is much greater than 1 then the condition is well satisfied. The case where A equals 1 is considered the cutoff for satisfying the condition and is the edge of where the crystal can resolve a pulse. Typically, A is chosen as a **smaller amount** such as 3. These equations can be used to determine the working limits for a given setup as a function of wavelength.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **conservative number** and **smaller amount** interchangeable (i.e., having the same meaning)?

Pair 2386

P1: The Hydrofoil Mystery was written in 1999 by Canadian author Eric Walters. It is about a teenage boy named Billy McCracken whose mother arranges for him to go away for the summer to work with none other than the well-known inventor of the telephone, Alexander Graham Bell. Billy expects his summer to be boring, but with the German U-boats endangering the maritime coast, his work with Bell's hydrofoil becomes an adventure. The book is set during the first World War and although it is a work of fiction, it serves as a launching pad for discussions about Canada's involvement in the war and the contributions of Canada's leading scientist, Alexander Graham Bell.

P2: The Hydrofoil Mystery was written in 1999 by Canadian author Eric Walters. It is about a teenage boy named Billy McCracken whose mother arranges for him to go away for the summer to work with none other than the well-known inventor of the telephone, Alexander Graham Bell. Billy expects his summer to be boring, but with the German U-boats endangering the ocean coastline, his work with Bell's hydrofoil becomes an adventure. The book is set during the first World War and although it is a work of fiction, it serves as a launching pad for discussions about Canada's involvement in the war and the contributions of Canada's leading scientist, Alexander Graham Bell.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are maritime coast and ocean coastline interchangeable (i.e., having the same meaning)?

Pair 2387

P1: Namibia gained independence on 1 February 1990 with the introduction of majority rule and end of apartheid. The country attended the next Games in 1991, participating disabled and able-bodied athletes sharing the medals equally. The country's involvement in the African Games is the responsibility of the Namibian Sports Commission which provides funding for participation in the events. Medal tables.

P2: Namibia gained independence on 1 February 1990 with the introduction of majority rule and end of apartheid. The country attended the next Games in 1991, participating disabled and able-bodied athletes sharing the medals equally. The area's interaction in the African Games is the responsibility of the Namibian Sports Commission which provides funding for participation in the events. Medal tables.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are country's involvement and area's interaction interchangeable (i.e., having the same meaning)?

Pair 2388

P1: During the reign of Vikrama Chola (1118 C.E. to 1135 C.E.) and his son Kulothunga-II and grandson Rajaraja-II the transition to Saivism was complete and Shaktism was relegated to subordinate role. Shiva the supreme god was also portrayed as the King of Dance (Nataraja) and in the mythology he defeated Kali in the dance competition.

P2: During the reign of Vikrama Chola (1118 C.E. to 1135 C.E.) and his son Kulothunga-II and grandson Rajaraja-II the transition to Saivism was complete and Shaktism was relegated to lesser position. Shiva the supreme god was also portrayed as the King of Dance (Nataraja) and in the mythology he defeated Kali in the dance competition.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are subordinate role and lesser position interchangeable (i.e., having the same meaning)?

Pair 2389

P1: Some treaties are intended by the parties to be only temporarily binding and are set to expire on a given date. Other treaties may self-terminate if the treaty is meant to exist only under certain conditions. A party may claim that a treaty should be terminated, even absent an express provision, if there has been a fundamental change in circumstances. Such

a change is sufficient if unforeseen, if it undermined the "essential basis" of consent by a party if it radically transforms the extent of obligations between the parties, and if the obligations are still to be performed.

P2: Some treaties are intended by the parties to be only temporarily binding and are set to expire on a given date. Other treaties may self-terminate if the treaty is meant to exist only under certain conditions. **A party may claim that a treaty should be terminated, even absent an obvious exception, if there has been a fundamental change in circumstances.** Such a change is sufficient if unforeseen, if it undermined the "essential basis" of consent by a party if it radically transforms the extent of obligations between the parties, and if the obligations are still to be performed.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **express provision** and **obvious exception** interchangeable (i.e., having the same meaning)?

Pair 2390

P1: Defensivism is a philosophical standpoint related in spirit to the Non-aggression principle. **It is also a midway point between other combat-based philosophies, that of Just War and Pacifism.** Concept.

P2: Defensivism is a philosophical standpoint related in spirit to the Non-aggression principle. **It is also a central point between other combat-based philosophies, that of Just War and Pacifism.** Concept.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **midway point** and **central point** interchangeable (i.e., having the same meaning)?

Pair 2391

P1: Quad and dormitory. Construction began on "New Hall" in the summer of 2013. **The project was expected to cost over \$9.5 million and is situated near the lower entrance of campus in back of Brady Hall.** The residence hall, known as the "Living Learning Commons" (LLC), is able to hold 150 students, and has expanded the residential options for undergraduates and should eliminate the need for triple occupancy rooms.

P2: Quad and dormitory. Construction began on "New Hall" in the summer of 2013. **The project was expected to cost over \$9.5 million and is situated near the less elevated door of campus in back of Brady Hall.** The residence hall, known as the "Living Learning Commons" (LLC), is able to hold 150 students, and has expanded the residential options for undergraduates and should eliminate the need for triple occupancy rooms.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **lower entrance** and **less elevated door** interchangeable (i.e., having the same meaning)?

Pair 2392

P1: The screen captures suggest that tool has the ability to filter by nationality (it is possible to enter multiple nationalities), location, and "target extension" (the given example is "D Diplomatic"). The analyst is also able to enter a classification string, and include a declassification date, in the sample given: 20320108 is code for January 8, 2032. **There is a category labeled "Intelligence Purpose Information," in which the analyst is able to select a geopolitical area, topic and subtopic.** The screen captures suggest that the tool gives the analyst the option of suggesting how often to forward new intelligence, and enter a reason for any higher priority requests.

P2: The screen captures suggest that tool has the ability to filter by nationality (it is possible to enter multiple nationalities), location, and "target extension" (the given example is "D Diplomatic"). The analyst is also able to enter a classification string, and include a declassification date, in the sample given: 20320108 is code for January 8, 2032. **There is a category labeled "Intelligence Purpose Information," in which the analyst is able to select a state place, topic and subtopic.** The screen captures suggest that the tool gives the analyst the option of suggesting how often to forward new

intelligence, and enter a reason for any higher priority requests.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **geopolitical area** and **state place** interchangeable (i.e., having the same meaning)?

Pair 2393

P1: Once the monsters are revived they reveal themselves to be the owners of the house and kin to Mr. Morley. They are Gaspar, Melisandre, and Ludmilla Morley as well as Albert and the were-human Bob. Anthony and Sarah agree to help them get back to the house and to their **appropriate size** (and eventually shape). Once that's done Anthony and Sarah are about to leave when a mysterious friend from Gaspar's past appears, the Wentar.

P2: Once the monsters are revived they reveal themselves to be the owners of the house and kin to Mr. Morley. They are Gaspar, Melisandre, and Ludmilla Morley as well as Albert and the were-human Bob. Anthony and Sarah agree to help them get back to the house and to their **acceptable amount** (and eventually shape). Once that's done Anthony and Sarah are about to leave when a mysterious friend from Gaspar's past appears, the Wentar.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **appropriate size** and **acceptable amount** interchangeable (i.e., having the same meaning)?

Pair 2394

P1: The fund plans to invest in Israeli mobile and Internet digital entertainment and consumer product companies. In October 2017, Playtika made its first foray into the casual games' genre with its acquisition of the Israeli-based games studio, Jelly Button. In December 2018, the company took **another step** in its new diversification strategy with the acquisition of Berlin-based casual games studio, Wooga. In January 2019, the company acquired a Vienna-based casual games studio, Super treat.

P2: The fund plans to invest in Israeli mobile and Internet digital entertainment and consumer product companies. In October 2017, Playtika made its first foray into the casual games' genre with its acquisition of the Israeli-based games studio, Jelly Button. In December 2018, the company took **a different approach** in its new diversification strategy with the acquisition of Berlin-based casual games studio, Wooga. In January 2019, the company acquired a Vienna-based casual games studio, Super treat.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **another step** and **a different approach** interchangeable (i.e., having the same meaning)?

Pair 2395

P1: In order to combat this, UI/UX designers should remember to make clickable elements large, and spaced far enough apart to prevent accidental clicks. Generally, as vision fails due to age, senior citizens will choose to have text display larger than younger users. If possible, incorporating larger text sizes and **greater contrast** into the design can substantially reduce frustration felt by older users while navigating the software. Navigation should be obvious and easy to recognize and remember.

P2: In order to combat this, UI/UX designers should remember to make clickable elements large, and spaced far enough apart to prevent accidental clicks. Generally, as vision fails due to age, senior citizens will choose to have text display larger than younger users. If possible, incorporating larger text sizes and **more distinction** into the design can substantially reduce frustration felt by older users while navigating the software. Navigation should be obvious and easy to recognize and remember.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **greater contrast** and **more distinction** interchangeable (i.e., having the same meaning)?

Pair 2396

P1: The work consists of numerous letters written by the former first lady after the death of her husband. The narrator relates deeply to the grief Mary Todd Lincoln expresses throughout the pages of the text. **After her husband died, she no longer had a **stable home**; she simply wandered the world in a permanent state of mourning.** The narrator continuously reads this book throughout the novel; comparing Mary Todd Lincoln's suffering to that of his own.

P2: The work consists of numerous letters written by the former first lady after the death of her husband. The narrator relates deeply to the grief Mary Todd Lincoln expresses throughout the pages of the text. **After her husband died, she no longer had a **sturdy household**; she simply wandered the world in a permanent state of mourning.** The narrator continuously reads this book throughout the novel; comparing Mary Todd Lincoln's suffering to that of his own.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **stable home** and **sturdy household** interchangeable (i.e., having the same meaning)?

Pair 2397

P1: Tertiary crust. Tertiary crust is more chemically-modified than either primary or secondary. **It can form in several ways: The only **known example** of tertiary crust is the continental crust of the Earth.** It is unknown whether other terrestrial planets can be said to have tertiary crust, though the evidence so far suggests that they do not.

P2: Tertiary crust. Tertiary crust is more chemically-modified than either primary or secondary. **It can form in several ways: The only **recognized evidence** of tertiary crust is the continental crust of the Earth.** It is unknown whether other terrestrial planets can be said to have tertiary crust, though the evidence so far suggests that they do not.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **known example** and **recognized evidence** interchangeable (i.e., having the same meaning)?

Pair 2398

P1: Controversy and potential risks. The use of penguin sweaters has been criticized as a potential risk to the health of the penguins, as wearing foreign garments can cause additional stress to the penguins and adversely affect their health. **Instead, some wildlife rescues use **heat lamps** to help regulate the temperature of the birds and prevent excessive preening.** The International Bird Rescue does not use penguin sweaters or any bird sweaters, because of the dangers of placing a garment on the birds that presses the oil against their skin and prevents the fumes from the oil from dissipating.

P2: Controversy and potential risks. The use of penguin sweaters has been criticized as a potential risk to the health of the penguins, as wearing foreign garments can cause additional stress to the penguins and adversely affect their health. **Instead, some wildlife rescues use **warming ovens** to help regulate the temperature of the birds and prevent excessive preening.** The International Bird Rescue does not use penguin sweaters or any bird sweaters, because of the dangers of placing a garment on the birds that presses the oil against their skin and prevents the fumes from the oil from dissipating.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **heat lamps** and **warming ovens** interchangeable (i.e., having the same meaning)?

Pair 2399

P1: In League 2 the top 4 engines promote. The engines in each league are seeded based on their performances in previous seasons. **For GPU engines, there will be **one league** only, with up to 16 competitors.** The top 2 GPU engines

will then contest a playoff against the top 4 CPU engines in League 1, with the four highest-placing engines promoting to Premier Division.

P2: In League 2 the top 4 engines promote. The engines in each league are seeded based on their performances in previous seasons. For GPU engines, there will be individual bracket only, with up to 16 competitors. The top 2 GPU engines will then contest a playoff against the top 4 CPU engines in League 1, with the four highest-placing engines promoting to Premier Division.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are one league and individual bracket interchangeable (i.e., having the same meaning)?

Pair 2400

P1: The irrationality of voters inherent in democracies can be explained by two major behavioral and cognitive patterns. Firstly, most of the voters think that the marginal contribution of their vote will not make a difference on election outcomes; therefore, they do not find it useful to inform themselves on political matters. In other terms, due to the required time and effort of acquiring new information, voters rationally prefer to remain ignorant. Moreover, it has been shown that most citizens process political information in deeply biased, partisan, motivated ways rather than in dispassionate, rational ways.

P2: The irrationality of voters inherent in democracies can be explained by two major behavioral and cognitive patterns. Firstly, most of the voters think that the marginal contribution of their vote will not make a difference on election outcomes; therefore, they do not find it useful to inform themselves on political matters. In other terms, due to the allotted duration and effort of acquiring new information, voters rationally prefer to remain ignorant. Moreover, it has been shown that most citizens process political information in deeply biased, partisan, motivated ways rather than in dispassionate, rational ways.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are required time and allotted duration interchangeable (i.e., having the same meaning)?

Pair 2401

P1: The example below shows three items from the 1980 revision (R-UCLA), where respondents were asked to rate each item from one of four choices: 'Never', 'Rarely', 'Sometimes' or 'Often'. Once the answers are completed, the numbers associated with each rating are totalled up, to give the individual's loneliness score. It's considered bad design to make all the items negative statements, so some are phrased as a positive (marked with '*' in the example above.) For a positive item, the score is reversed.

P2: The example below shows three items from the 1980 revision (R-UCLA), where respondents were asked to rate each item from one of four choices: 'Never', 'Rarely', 'Sometimes' or 'Often'. Once the answers are completed, the numbers associated with each rating are totalled up, to give the individual's loneliness score. It's considered terrible practice to make all the items negative statements, so some are phrased as a positive (marked with '*' in the example above.) For a positive item, the score is reversed.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are bad design and terrible practice interchangeable (i.e., having the same meaning)?

Pair 2402

P1: He is the co-author of "Poor Economics". He also serves on the academic advisory board of Plaksha University, an upcoming science and technology university in India. His new book, co-authored with Esther Duflo, "good economics for Hard Times", was released in October 2019 in India by Juggernaut Books. He was sent to Delhi's Tihar Jail for 10 days for participating in protests at Jawaharlal Nehru University in 1983.

P2: He is the co-author of "Poor Economics". He also serves on the academic advisory board of Plaksha University, an upcoming science and technology university in India. His new book, co-authored with Esther Duflo, "book name for Hard Times", was released in October 2019 in India by Juggernaut Books. He was sent to Delhi's Tihar Jail for 10 days for participating in protests at Jawaharlal Nehru University in 1983.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **good economics** and **book name** interchangeable (i.e., having the same meaning)?

Pair 2403

P1: Greysky City is a city ruled by thieves. People are robbed for having money in their pockets and murder is common. The most **prominent organization** is the Greysky City Thieves Guild, run by Bozzok. Guildmaster Bozzok.

P2: Greysky City is a city ruled by thieves. People are robbed for having money in their pockets and murder is common. The most **popular league** is the Greysky City Thieves Guild, run by Bozzok. Guildmaster Bozzok.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **prominent organization** and **popular league** interchangeable (i.e., having the same meaning)?

Pair 2404

P1: After the occupation of Norway by Nazi Germany, mining continued under German administration until January 1942. Kirkenes and the areas along the railway and at the mine were being used to store material for "Wehrmacht". To allow **better capacity** to ship out the materials, in 1942, a branch line was built to Haganes. Known as the Port Line (Norwegian: ,), the line was completed in 1943 and demolished after the war.

P2: After the occupation of Norway by Nazi Germany, mining continued under German administration until January 1942. Kirkenes and the areas along the railway and at the mine were being used to store material for "Wehrmacht". To allow **improved capability** to ship out the materials, in 1942, a branch line was built to Haganes. Known as the Port Line (Norwegian: ,), the line was completed in 1943 and demolished after the war.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **better capacity** and **improved capability** interchangeable (i.e., having the same meaning)?

Pair 2405

P1: Since Iloilo City is a conglomeration of towns, the districts have their own plazas which are surrounded by establishments of political and ecclesiastical influence, such as churches and old administrative halls. In 1930, Juan M. Arellano of the Bureau of Public Works designed the schematic plan for Iloilo City, which was influenced by Ebenezer Howard's "Garden City." The Spanish colonial influence is strongly imprinted not only in Iloilo's history and **cultural background** but also the architectural perspective. The city's regaled status during the Spanish colonial era until the turn of the 20th century is implied during by the sugar boom with ubiquitous stately mansions and edifices built by the old money Ilonggo Sugar Baron and elite families which contrast to the city's economic importance as a second city next to Manila during the said era in the Philippines.

P2: Since Iloilo City is a conglomeration of towns, the districts have their own plazas which are surrounded by establishments of political and ecclesiastical influence, such as churches and old administrative halls. In 1930, Juan M. Arellano of the Bureau of Public Works designed the schematic plan for Iloilo City, which was influenced by Ebenezer Howard's "Garden City." The Spanish colonial influence is strongly imprinted not only in Iloilo's history and **racial history** but also the architectural perspective. The city's regaled status during the Spanish colonial era until the turn of the 20th century is implied during by the sugar boom with ubiquitous stately mansions and edifices built by the old money Ilonggo Sugar Baron and elite families which contrast to the city's economic importance as a second city next to Manila during

the said era in the Philippines.

Pair 2409

P1: (Spain having become an ally of the British against the French.) If they refused the offer, the letters informed him that the British had orders to capture Barataria to put an end to their smuggling. The **second item** was a personal note to Lafitte from McWilliam's superior, Lieutenant Colonel Edward Nicolls, urging him to accept the offer. Believing that the U.S. would eventually prevail in the war against Great Britain, Lafitte thought he could more easily defeat the US revenue officers than he could the British navy.

P2: (Spain having become an ally of the British against the French.) If they refused the offer, the letters informed him that the British had orders to capture Barataria to put an end to their smuggling. The **next thing** was a personal note to Lafitte from McWilliam's superior, Lieutenant Colonel Edward Nicolls, urging him to accept the offer. Believing that the U.S. would eventually prevail in the war against Great Britain, Lafitte thought he could more easily defeat the US revenue officers than he could the British navy.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **second item** and **next thing** interchangeable (i.e., having the same meaning)?

Pair 2410

P1: The regular characters were named on screen with a freeze frame as they made their entrance at the start of each episode. Each credit also featured a brief description of the character, such as MARK the medical student, JENNIFER the student, BOB the accountant, JEREMY he's something in television, TINTO the landlord. The **final character** was Laura, the dumb "brunette", a model unaware of her physical attractiveness. Laura was the key character around which most of the show's situations revolved.

P2: The regular characters were named on screen with a freeze frame as they made their entrance at the start of each episode. Each credit also featured a brief description of the character, such as MARK the medical student, JENNIFER the student, BOB the accountant, JEREMY he's something in television, TINTO the landlord. The **last model** was Laura, the dumb "brunette", a model unaware of her physical attractiveness. Laura was the key character around which most of the show's situations revolved.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **final character** and **last model** interchangeable (i.e., having the same meaning)?

Pair 2411

P1: In whisky production, Bourbon uses a mash made primarily from maize (often mixed with rye or wheat and a small amount of malted barley), and single malt Scotch exclusively uses malted barley. Variables. Each particular ingredient has its own flavor that contributes to the **final character** of the beverage. In addition, different ingredients carry other characteristics, not directly relating to the flavor, which may dictate some of the choices made in brewing: nitrogen content, diastatic power, color, modification, and conversion.

P2: In whisky production, Bourbon uses a mash made primarily from maize (often mixed with rye or wheat and a small amount of malted barley), and single malt Scotch exclusively uses malted barley. Variables. Each particular ingredient has its own flavor that contributes to the **ultimate essence** of the beverage. In addition, different ingredients carry other characteristics, not directly relating to the flavor, which may dictate some of the choices made in brewing: nitrogen content, diastatic power, color, modification, and conversion.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **final character** and **ultimate essence** interchangeable (i.e., having the same meaning)?

Pair 2412

P1: Both ships were assigned to the Beiyang Fleet, and she was captained by Deng Shichang throughout her life. She was part of a flotilla which toured ports during the summer of 1889. "Zhiyuan's **sole action** was at the Battle of the Yalu River on 17 September 1894 during the First Sino-Japanese War. During the battle, she came under heavy fire from the Japanese forces.

P2: Both ships were assigned to the Beiyang Fleet, and she was captained by Deng Shichang throughout her life. She was part of a flotilla which toured ports during the summer of 1889. "Zhiyuan's **only doing** was at the Battle of the Yalu River on 17 September 1894 during the First Sino-Japanese War. During the battle, she came under heavy fire from the Japanese forces.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **sole action** and **only doing** interchangeable (i.e., having the same meaning)?

Pair 2413

P1: A decision model may also be a network of connected decisions, information and knowledge that represents a decision-making approach that can be used repeatedly (such as one developed using the Decision Model and Notation standard). Excepting very simple situations, successful action axioms are used in an iterative manner. For example, for decision analysis, the **sole action** axiom occurs in the Evaluation stage of a four-step cycle: Formulate, Evaluate, Interpret/Appraise, Refine. Decision models are used to model a decision being made once as well as to model a repeatable decision-making approach that will be used over and over again.

P2: A decision model may also be a network of connected decisions, information and knowledge that represents a decision-making approach that can be used repeatedly (such as one developed using the Decision Model and Notation standard). Excepting very simple situations, successful action axioms are used in an iterative manner. For example, for decision analysis, the **particular statement** axiom occurs in the Evaluation stage of a four-step cycle: Formulate, Evaluate, Interpret/Appraise, Refine. Decision models are used to model a decision being made once as well as to model a repeatable decision-making approach that will be used over and over again.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **sole action** and **particular statement** interchangeable (i.e., having the same meaning)?

Pair 2414

P1: Inverted pyramid structure. Journalists usually describe the organization or structure of a news story as an inverted pyramid. The essential and most interesting elements of a story are put at the beginning, with supporting information following in order of **diminishing importance**. This structure enables readers to stop reading at any point and still come away with the essence of a story.

P2: Inverted pyramid structure. Journalists usually describe the organization or structure of a news story as an inverted pyramid. The essential and most interesting elements of a story are put at the beginning, with supporting information following in order of **declining value**. This structure enables readers to stop reading at any point and still come away with the essence of a story.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **diminishing importance** and **declining value** interchangeable (i.e., having the same meaning)?

Pair 2415

P1: Role of animals in society. This aspect of veterinary public health deals with a number of ethical issues. Welfare of animals is an **ever present issue** regardless of the setting, whether it concerns pet animals, production animals or wild animals. Where the line that defines acceptable and unacceptable welfare conditions lies is different for different individuals from different countries and cultures, however, it is common for minimum welfare standards to be defined in

legislation Other issues may concern the use of animals in science, not just for experimentation, but the use of transgenic animals (an animals who has had its genome deliberately altered by genetic engineering techniques as opposed to selective breeding) and xenotransplantation (the transplantation of organs or tissues from one species to another) or the emergence of resistance to antimicrobial drugs due to their use in animals

P2: Role of animals in society. This aspect of veterinary public health deals with a number of ethical issues. **Welfare of animals is an every day worry** regardless of the setting, whether it concerns pet animals, production animals or wild animals. Where the line that defines acceptable and unacceptable welfare conditions lies is different for different individuals from different countries and cultures, however, it is common for minimum welfare standards to be defined in legislation Other issues may concern the use of animals in science, not just for experimentation, but the use of transgenic animals (an animals who has had its genome deliberately altered by genetic engineering techniques as opposed to selective breeding) and xenotransplantation (the transplantation of organs or tissues from one species to another) or the emergence of resistance to antimicrobial drugs due to their use in animals

That year, police forces were called to shops across Britain to deal with crowd control issues, assaults, threatening customers, and crowd concerns. In response to incidents at branches of Tesco, Greater Manchester Police's deputy chief constable Ian Hopkins said shoppers had behaved in an "appalling" fashion, and criticized shops for not making adequate security arrangements to ensure the safety of customers."

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are traffic issues and crowd concerns interchangeable (i.e., having the same meaning)?

Pair 2420

P1: These two models of rolling stock are from the former KCRC network (KCR East Rail, West Rail and Ma On Shan Rail). They did not receive major changes after the merger of the two companies except for the updated route map, the exterior company logo and such. The capability of this EMU fleet is similar to those on the urban network. Starting from 2015, the West Rail and Ma On Shan line trains have been lengthened to 8 cars while the East Rail line 12 car sets have been withdrawn from the line in 2021.

P2: These two models of rolling stock are from the former KCRC network (KCR East Rail, West Rail and Ma On Shan Rail). They did not receive major changes after the merger of the two companies except for the updated route map, the exterior company logo and such. The capability of this EMU fleet is similar to those on the inner-city system. Starting from 2015, the West Rail and Ma On Shan line trains have been lengthened to 8 cars while the East Rail line 12 car sets have been withdrawn from the line in 2021.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are urban network and inner-city system interchangeable (i.e., having the same meaning)?

Pair 2421

P1: Four other have been captured. Antonio Nariño Front. It was an **urban network** composed of up to 50 individuals, and operated in Bogotá. Columns and Companies.

P2: Four other have been captured. Antonio Nariño Front. It was an **oppidan alliance** composed of up to 50 individuals, and operated in Bogotá. Columns and Companies.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **urban network** and **oppidan alliance** interchangeable (i.e., having the same meaning)?

Pair 2422

P1: Some polishing waxes contain powdered rotten stone in a paste substrate. For larger polishing jobs, rotten stone mixed with a binder is applied to polishing wheels. It has also been used to polish brass, such as that found on **military uniforms**, as well as steel and other metals. Plates used in daguerreotypes were polished using rotten stone, the finest abrasive available at the time.

P2: Some polishing waxes contain powdered rotten stone in a paste substrate. For larger polishing jobs, rotten stone mixed with a binder is applied to polishing wheels. It has also been used to polish brass, such as that found on **fighting wear**, as well as steel and other metals. Plates used in daguerreotypes were polished using rotten stone, the finest abrasive available at the time.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **military uniforms** and **fighting wear** interchangeable (i.e., having the same meaning)?

Pair 2423

P1: EBEC 2012. EBEC Final 2012 was organised in Zagreb, receiving the patronage of the President of Croatia. The event consisted of four working days, Official Opening/Closing Days and **one free day**, where participants had the opportunity to discover the city of Zagreb. EBEC 2013.

P2: EBEC 2012. EBEC Final 2012 was organised in Zagreb, receiving the patronage of the President of Croatia. The event consisted of four working days, Official Opening/Closing Days and **single holiday**, where participants had the opportunity to discover the city of Zagreb. EBEC 2013.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one free day** and **single holiday** interchangeable (i.e., having the same meaning)?

Pair 2424

P1: Melissa Pickett, an eco-therapist practicing in Santa Fe, claims she treats between forty and eighty eco-anxious patients a month. Symptoms include irritability, sleeplessness, loss of appetite, bouts of weakness, panic attacks, and twitching. In terms of treatment, Chalquist notes that individualistic models of mental health are "not designed to deal with collective trauma on a **planetary scale**". In general, psychotherapists say that when individuals take action, either by changing their lifestyle to reduce carbon emissions or by getting involved in social activism, this reduces anxiety levels by bringing a sense of personal empowerment and feelings of connection with others in the community.

P2: Melissa Pickett, an eco-therapist practicing in Santa Fe, claims she treats between forty and eighty eco-anxious patients a month. Symptoms include irritability, sleeplessness, loss of appetite, bouts of weakness, panic attacks, and twitching. In terms of treatment, Chalquist notes that individualistic models of mental health are "not designed to deal with collective trauma on a **global rate**". In general, psychotherapists say that when individuals take action, either by changing their lifestyle to reduce carbon emissions or by getting involved in social activism, this reduces anxiety levels by bringing a sense of personal empowerment and feelings of connection with others in the community.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **planetary scale** and **global rate** interchangeable (i.e., having the same meaning)?

Pair 2425

P1: The War of the Worlds II is a 1974 board wargame published by Rand Game Associates. Gameplay. "The War of the Worlds II" is a science-fiction game on a **planetary scale**, with various starfaring races fighting over an uninhabited, resource-rich star system. Reception.

P2: The War of the Worlds II is a 1974 board wargame published by Rand Game Associates. Gameplay. "The War of the Worlds II" is a science-fiction game on a **galactic proportion**, with various starfaring races fighting over an uninhabited, resource-rich star system. Reception.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **planetary scale** and **galactic proportion** interchangeable (i.e., having the same meaning)?

Pair 2426

P1: PESCO is similar to "enhanced co-operation" in other policy areas, in the sense that integration does not require that all EU member states participate. Defence industry coordination and research funding. The European Defence Fund is an EU-managed fund for coordinating and increasing **national investment** in defence research and improve interoperability between national forces. It was proposed in 2016 by President Jean-Claude Juncker and established in 2017 to a value of €5.5 billion per year.

P2: PESCO is similar to "enhanced co-operation" in other policy areas, in the sense that integration does not require that all EU member states participate. Defence industry coordination and research funding. The European Defence Fund is an EU-managed fund for coordinating and increasing **government fiscal help** in defence research and improve interoperability between national forces. It was proposed in 2016 by President Jean-Claude Juncker and established in 2017 to a value of €5.5 billion per year.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **national investment** and **government fiscal help** interchangeable (i.e., having the same meaning)?

Pair 2427

P1: Equal proportion reduction. The three partners may choose equal proportion reduction instead of equal percentage reduction. Had there been only **one partner**, who owned 100% interest, selling 20% interest would reduce ownership interest of the original owner by 20%. The same approach can be used to buy equity from each of the partners.

P2: Equal proportion reduction. The three partners may choose equal proportion reduction instead of equal percentage reduction. Had there been only **a teammate**, who owned 100% interest, selling 20% interest would reduce ownership interest of the original owner by 20%. The same approach can be used to buy equity from each of the partners.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one partner** and **a teammate** interchangeable (i.e., having the same meaning)?

Pair 2428

P1: A footjob is a non-penetrative sexual practice with the feet that involves one's feet being rubbed on a partner in order to induce sexual excitement, stimulation or orgasm. In some cases it can be part of a foot fetish. Footjobs are

most often performed on penises, with **one partner** using their feet or toes to stroke or rub the other partner's genital area. The term "footjob" may also refer to the practice of using one's feet or toes to caress a partner's breasts or vulva.

P2: A footjob is a non-penetrative sexual practice with the feet that involves one's feet being rubbed on a partner in order to induce sexual excitement, stimulation or orgasm. In some cases it can be part of a foot fetish. Footjobs are most often performed on penises, with **a single friend** using their feet or toes to stroke or rub the other partner's genital area. The term "footjob" may also refer to the practice of using one's feet or toes to caress a partner's breasts or vulva.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one partner** and **a single friend** interchangeable (i.e., having the same meaning)?

Pair 2429

P1: Its ruins are near the town of Azeffoun. Name. **()** was the Phoenician and Punic name of Cape Corbelin and meant "Cape of the **strong one**" or "Cape of the Fort". It was hellenized as "Rhousazoûs" **()** and latinized variously as Rusazus, Rusazu, Rusazis, Ruseius, and Rusadum.

P2: Its ruins are near the town of Azeffoun. Name. **()** was the Phoenician and Punic name of Cape Corbelin and meant "Cape of the **Cape name**" or "Cape of the Fort". It was hellenized as "Rhousazoûs" **()** and latinized variously as Rusazus, Rusazu, Rusazis, Ruseius, and Rusadum.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **strong one** and **Cape name** interchangeable (i.e., having the same meaning)?

Pair 2430

P1: Each rest symbol and name corresponds with a particular note value, indicating how long the silence should last, generally as a multiplier of a measure or whole note. One-bar rests. **When an entire bar** is devoid of notes, a whole (semibreve) rest is used, regardless of the actual time signature. The only exceptions are for a time signature (four half notes per bar), when a double whole rest is typically used for a bar's rest, and for time signatures shorter than $\frac{3}{4}$, when a rest of the actual measure length would be used.

P2: Each rest symbol and name corresponds with a particular note value, indicating how long the silence should last, generally as a multiplier of a measure or whole note. One-bar rests. **When an integrated music line** is devoid of notes, a whole (semibreve) rest is used, regardless of the actual time signature. The only exceptions are for a time signature (four half notes per bar), when a double whole rest is typically used for a bar's rest, and for time signatures shorter than $\frac{3}{4}$, when a rest of the actual measure length would be used.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **entire bar** and **integrated music line** interchangeable (i.e., having the same meaning)?

Pair 2431

P1: Another reform program was the VISTA (Volunteers in Service to America) bail bond program, formed in Baltimore in 1968. The program defined a mathematical system to determine when a person charged with a crime was likely to voluntarily appear in court, such that the person might receive a personal recognizance bond. **The system was organized around a point-based marker, where defendants earned points for positive merit and were deducted points for poor behavior.** A research program based in New York City tested the effects of a pretrial release agency and deposit bail.

P2: Another reform program was the VISTA (Volunteers in Service to America) bail bond program, formed in Baltimore in 1968. The program defined a mathematical system to determine when a person charged with a crime was likely to voluntarily appear in court, such that the person might receive a personal recognizance bond. **The system was organized around a point-based marker, where defendants earned points for positive merit and were deducted points for**

bad attitude. A research program based in New York City tested the effects of a pretrial release agency and deposit bail.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **poor behavior** and **bad attitude** interchangeable (i.e., having the same meaning)?

Pair 2432

P1: Two studies of the hillfort were reported in 1995; Isserlin 1995 is an analytical field survey of South Weald and another hillfort, and Medlycott et al. 1995 reports the results of two trenches excavated in 1990 at points to the north-west and south-west across the rampart and ditches. **Their findings inform contemporary understanding of the Camp, and identify four main periods of activity at the site.** Iron Age hillfort.

P2: Two studies of the hillfort were reported in 1995; Isserlin 1995 is an analytical field survey of South Weald and another hillfort, and Medlycott et al. 1995 reports the results of two trenches excavated in 1990 at points to the north-west and south-west across the rampart and ditches. **Their findings inform modern knowledge of the Camp, and identify four main periods of activity at the site.** Iron Age hillfort.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **contemporary understanding** and **modern knowledge** interchangeable (i.e., having the same meaning)?

Pair 2433

P1: Incumbent Governor Alfred Mutua had won the 2013 elections having run on a Wiper Democratic Movement-Kenya ticket. The Governor however decamped to his own new Maendeleo Chap Chap Party in 2015. **Machakos, like most counties, holds primary elections for Governor then the winners pick their own running mates.** The incumbent Governor Mutua had avoided his deputy Bernard Kiala who had remained in Wiper Democratic Movement party.

P2: Incumbent Governor Alfred Mutua had won the 2013 elections having run on a Wiper Democratic Movement-Kenya ticket. The Governor however decamped to his own new Maendeleo Chap Chap Party in 2015. **Machakos, like most counties, holds primary elections for Governor then the winners pick their own campaign companions.** The incumbent Governor Mutua had avoided his deputy Bernard Kiala who had remained in Wiper Democratic Movement party.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **running mates** and **campaign companions** interchangeable (i.e., having the same meaning)?

Pair 2434

P1: Credits. "Family Guy". **They have written "Family Guy" episodes "Mind Over Murder", "Da Boom", "running mates" and "E. Peterbus Unum".** Eventually Goldman and Donovan became story editors for the show, and are now executive story editors.

P2: Credits. "Family Guy". **They have written "Family Guy" episodes "Mind Over Murder", "Da Boom", "episode name" and "E. Peterbus Unum".** Eventually Goldman and Donovan became story editors for the show, and are now executive story editors.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **running mates** and **episode name** interchangeable (i.e., having the same meaning)?

Pair 2435

P1: The habitat is known for its bamboo, dense forest and wild elephants. The Mekong channel upstream of Vientiane Important Bird Area (IBA) is 18,230 hectares in size. As its name implies it comprises an **approximately section** of the Mekong upstream of Vientiane. It spreads over two provinces: Vientiane and Sainyabuli.

P2: The habitat is known for its bamboo, dense forest and wild elephants. The Mekong channel upstream of Vientiane Important Bird Area (IBA) is 18,230 hectares in size. As its name implies it comprises an **about piece** of the Mekong upstream of Vientiane. It spreads over two provinces: Vientiane and Sainyabuli.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **approximately section** and **about piece** interchangeable (i.e., having the same meaning)?

Pair 2436

P1: Chinese companies are widely believed to offer worse pay and labour conditions than local or other foreign companies, and to be unwilling to promote locals over Chinese nationals. A scholarly study found corroboration of poor working conditions, with one notorious case being a 2002 fire in a Chinese-owned plastics factory from which 45 workers were unable to escape as they were locked inside by their bosses. However, Chinese companies state that they prefer to recruit and retain **local workers** as the cost of attracting expatriate talent from China has risen. The Li Group, for example, has a total of about 500 Chinese employees.

P2: Chinese companies are widely believed to offer worse pay and labour conditions than local or other foreign companies, and to be unwilling to promote locals over Chinese nationals. A scholarly study found corroboration of poor working conditions, with one notorious case being a 2002 fire in a Chinese-owned plastics factory from which 45 workers were unable to escape as they were locked inside by their bosses. However, Chinese companies state that they prefer to recruit and retain **regional laborers** as the cost of attracting expatriate talent from China has risen. The Li Group, for example, has a total of about 500 Chinese employees.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **local workers** and **regional laborers** interchangeable (i.e., having the same meaning)?

Pair 2437

P1: File carving is a highly complex task, with a potentially huge number of permutations to try. To make this task tractable, carving software typically makes extensive use of models and heuristics. This is necessary not only from a standpoint of **execution time**, but also for the accuracy of the results. State of the art file carving algorithms use statistical techniques like sequential hypothesis testing for determining fragmentation points.

P2: File carving is a highly complex task, with a potentially huge number of permutations to try. To make this task tractable, carving software typically makes extensive use of models and heuristics. This is necessary not only from a standpoint of **doing duration**, but also for the accuracy of the results. State of the art file carving algorithms use statistical techniques like sequential hypothesis testing for determining fragmentation points.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **execution time** and **doing duration** interchangeable (i.e., having the same meaning)?

Pair 2438

P1: In 2012, Heritage oil formed a joint venture in Nigeria called Shoreline to purchase a 45% stake in OML 30, an onshore oil block formerly owned by Shell PLC. The firm announced positive financial results in 2013, after major successes with this oil field, which achieved record gross production in August 2013. A **strong growth** in revenues was also reported thanks to these successes in Nigeria, as well as in Russia. Investors were also boosted by the news that the firm had expanded its portfolio in a promising region of Papua New Guinea and Tanzania, with drilling to commence on new sites in these areas in 2014.

P2: In 2012, Heritage oil formed a joint venture in Nigeria called Shoreline to purchase a 45% stake in OML 30, an on-shore oil block formerly owned by Shell PLC. The firm announced positive financial results in 2013, after major successes with this oil field, which achieved record gross production in August 2013. **A sturdy acceleration in revenues was also reported thanks to these successes in Nigeria, as well as in Russia.** Investors were also boosted by the news that the firm had expanded its portfolio in a promising region of Papua New Guinea and Tanzania, with drilling to commence on new sites in these areas in 2014.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **strong growth** and **sturdy acceleration** interchangeable (i.e., having the same meaning)?

Pair 2439

P1: The dam broke a year later, flooding Foleyet and lowering the lake levels significantly once again. The town has had many such disasters, in the form of fires and floods, and much of its landscape differs completely now from its origins. **Often when a new progress was made or added, it was simply destroyed years later.** The land occupied by Foleyet was originally an island, before an esker was destroyed and the lake receded dramatically.

P2: The dam broke a year later, flooding Foleyet and lowering the lake levels significantly once again. The town has had many such disasters, in the form of fires and floods, and much of its landscape differs completely now from its origins. **Often when a novel implementation was made or added, it was simply destroyed years later.** The land occupied by Foleyet was originally an island, before an esker was destroyed and the lake receded dramatically.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **new progress** and **novel implementation** interchangeable (i.e., having the same meaning)?

Pair 2440

P1: However, the Lannings have another trick up their sleeve – they can fly! To add insult to injury, Valérian’s jet pack breaks down and he has to be rescued by the Lannings. **The Lannings are finding this very amusing and ask Valérian to show them another machine.** He demonstrates a personal shield – the chief puts one on and Valérian throws rocks at him showing that they bounce off the shield.

P2: However, the Lannings have another trick up their sleeve – they can fly! To add insult to injury, Valérian’s jet pack breaks down and he has to be rescued by the Lannings. **The Lannings are finding this very amusing and ask Valérian to show them an additional device.** He demonstrates a personal shield – the chief puts one on and Valérian throws rocks at him showing that they bounce off the shield.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **another machine** and **an additional device** interchangeable (i.e., having the same meaning)?

Pair 2441

P1: These have come from telecom operators who cite undue demands from various public bodies (owners of RoW). MoIT&T began a process of consultation with all relevant stakeholders to develop a standard mechanism for addressing the long-standing issue of RoW being faced by telecom operators and has prepared draft RoW rules. **The Telecom Authority (PTA) is actively pursuing and participating in finalizing the RoW Rules in the larger interest of the telecom sector.** E-commerce.

P2: These have come from telecom operators who cite undue demands from various public bodies (owners of RoW). MoIT&T began a process of consultation with all relevant stakeholders to develop a standard mechanism for addressing the long-standing issue of RoW being faced by telecom operators and has prepared draft RoW rules. **The Telecom Authority (PTA) is actively pursuing and participating in finalizing the RoW Rules in the grander scheme of**

the telecom sector. E-commerce.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **larger interest** and **grander scheme** interchangeable (i.e., having the same meaning)?

Pair 2442

P1: Legacy. "Life's Too Good" is credited as the first Icelandic album "of its breed" to have a worldwide impact. In 2014, Treble wrote that the album "[generated] a **larger interest** towards the country's popular and alternative music scenes alike." The album is considered a definite influence on all subsequent Icelandic popular music, and on international acts such as Savages and Florence and the Machine.

P2: Legacy. "Life's Too Good" is credited as the first Icelandic album "of its breed" to have a worldwide impact. In 2014, Treble wrote that the album "[generated] a **wider audience** towards the country's popular and alternative music scenes alike." The album is considered a definite influence on all subsequent Icelandic popular music, and on international acts such as Savages and Florence and the Machine.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **larger interest** and **wider audience** interchangeable (i.e., having the same meaning)?

Pair 2443

P1: Olivia Bertalan, a former neighbor of Zimmerman's from The Retreat at Twin Lakes, testified that she was the victim of a home invasion in the gated community. Bertalan said that she hid in her son's bedroom as two teenagers broke into her home. After the robbery, she said that Zimmerman had come over to her house and offered her a lock for her **sliding glass door**. Bertalan also testified that Zimmerman told her that she could go spend time with his wife if she felt too scared to be home alone during the day.

P2: Olivia Bertalan, a former neighbor of Zimmerman's from The Retreat at Twin Lakes, testified that she was the victim of a home invasion in the gated community. Bertalan said that she hid in her son's bedroom as two teenagers broke into her home. After the robbery, she said that Zimmerman had come over to her house and offered her a lock for her **traveling clear entryway**. Bertalan also testified that Zimmerman told her that she could go spend time with his wife if she felt too scared to be home alone during the day.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **sliding glass door** and **traveling clear entryway** interchangeable (i.e., having the same meaning)?

Pair 2444

P1: Database storage hierarchy. A database, while in operation, resides simultaneously in several types of storage, forming a storage hierarchy. By the nature of contemporary computers most of the database part inside a computer that hosts the DBMS resides (partially replicated) in **volatile storage**. Data (pieces of the database) that are being processed/manipulated reside inside a processor, possibly in processor's caches.

P2: Database storage hierarchy. A database, while in operation, resides simultaneously in several types of storage, forming a storage hierarchy. By the nature of contemporary computers most of the database part inside a computer that hosts the DBMS resides (partially replicated) in **short-term memory**. Data (pieces of the database) that are being processed/manipulated reside inside a processor, possibly in processor's caches.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **volatile storage** and **short-term memory** interchangeable (i.e., having the same meaning)?

Pair 2445

P1: The plot of land between Parlier and Reedley called Mosesian Ranch was the site of the new station. More property was added over the years, and by 1985 the station reached its current size of , most of which are under cultivation. Besides fields and orchards, KREC includes laboratories, greenhouses, insectaries, offices, trailers, **volatile storage**, GIS facility, and a small dormitory for visitors. Its 33 laboratory facilities include a postharvest fruit and vegetable lab, mosquito control lab, and biocontrol quarantine lab.

P2: The plot of land between Parlier and Reedley called Mosesian Ranch was the site of the new station. More property was added over the years, and by 1985 the station reached its current size of , most of which are under cultivation. Besides fields and orchards, KREC includes laboratories, greenhouses, insectaries, offices, trailers, **short duration care**, GIS facility, and a small dormitory for visitors. Its 33 laboratory facilities include a postharvest fruit and vegetable lab, mosquito control lab, and biocontrol quarantine lab.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **volatile storage** and **short duration care** interchangeable (i.e., having the same meaning)?

Pair 2446

P1: Nardella was replaced by Archbishop Guido Pozzo as the choir's administrator, but for a time Palombella retained his post as the choir's musical director. In July 2019 Palombella resigned as director of the choir. Marcos Pavan, who leads the "Pueri Cantores" (the **boys section** of the choir) was named as interim director. Past members.

P2: Nardella was replaced by Archbishop Guido Pozzo as the choir's administrator, but for a time Palombella retained his post as the choir's musical director. In July 2019 Palombella resigned as director of the choir. Marcos Pavan, who leads the "Pueri Cantores" (the **men area** of the choir) was named as interim director. Past members.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **boys section** and **men area** interchangeable (i.e., having the same meaning)?

Pair 2447

P1: Similar progress in attaining new customers and increasing freight volumes has been made over the life of the Plan to date (other than with coal). Steady and at times rapid progress has been made on the enabling parts of the Turnaround Plan, such as new locomotives and wagons, lengthening of the rail ferry and track distressing, but not always effectively. The 10 Year Turnaround Plan was quickly undermined by a series of adverse events, including: **2017 update** of the Turnaround Plan. Partially as a response to the events outlined above, in the 2017 budget the government announced a further \$450 million in capital funding for KiwiRail, and that the company's operations would be placed under another major review, believed to relate to future funding models.

P2: Similar progress in attaining new customers and increasing freight volumes has been made over the life of the Plan to date (other than with coal). Steady and at times rapid progress has been made on the enabling parts of the Turnaround Plan, such as new locomotives and wagons, lengthening of the rail ferry and track distressing, but not always effectively. The 10 Year Turnaround Plan was quickly undermined by a series of adverse events, including: **17 revival** of the Turnaround Plan. Partially as a response to the events outlined above, in the 2017 budget the government announced a further \$450 million in capital funding for KiwiRail, and that the company's operations would be placed under another major review, believed to relate to future funding models.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **2017 update** and **17 revival** interchangeable (i.e., having the same meaning)?

Pair 2448

P1: If the player cannot pay the cost, or the card cannot be played at the current time, the player can choose to "focus" the card and store it face down as stored energy. When an attack is not stopped, it continues through to the next zone, where the player again flips over a card and has a chance to take an action. **If the player is already in the red zone when this occurs, the opponent scores a point and may "celebrate".** Signature moves.

P2: If the player cannot pay the cost, or the card cannot be played at the current time, the player can choose to "focus" the card and store it face down as stored energy. When an attack is not stopped, it continues through to the next zone, where the player again flips over a card and has a chance to take an action. **If the player is already in the card game area when this occurs, the opponent scores a point and may "celebrate".** Signature moves.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **red zone** and **card game area** interchangeable (i.e., having the same meaning)?

Pair 2449

P1: However, this linear magazine and barrel assembly was too bulky to be fit to a small model ship's gun turret. To improve scale appearance, a brass elbow fitting was added to reduce the above deck size of the gun. **This enabled the magazine to exit the deck vertically, with the BBs running into the base leg of the elbow before entering the restrictor.** This led to the development of the new Mk II breach/barrel assembly.

P2: However, this linear magazine and barrel assembly was too bulky to be fit to a small model ship's gun turret. To improve scale appearance, a brass elbow fitting was added to reduce the above deck size of the gun. **This enabled the magazine to exit the deck vertically, with the BBs running into the foundation stand of the elbow before entering the restrictor.** This led to the development of the new Mk II breach/barrel assembly.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **base leg** and **foundation stand** interchangeable (i.e., having the same meaning)?

Pair 2450

P1: On April 3, 2015, a pilot was killed after his aircraft crashed into a rural area near the airport. The aircraft was a 1984 fixed wing, single engine lightweight similar to a glider. **The aircraft crashed across the street of a PG&E power station located on the base leg of the traffic pattern of the airport.** Nearby airports.

P2: On April 3, 2015, a pilot was killed after his aircraft crashed into a rural area near the airport. The aircraft was a 1984 fixed wing, single engine lightweight similar to a glider. **The aircraft crashed across the street of a PG&E power station located on the bottom aspect of the traffic pattern of the airport.** Nearby airports.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **base leg** and **bottom aspect** interchangeable (i.e., having the same meaning)?

Pair 2451

P1: 1 had been built, Pavilions No. 2 and No. 3 were put into operation together with the Forum Pavilion - a **unique structure** in the form of a glass pyramid. In the subsequent years the venue continued expanding - Pavilions No.

P2: 1 had been built, Pavilions No. 2 and No. 3 were put into operation together with the Forum Pavilion - a **rare building** in the form of a glass pyramid. In the subsequent years the venue continued expanding - Pavilions No.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **unique structure** and **rare building** interchangeable (i.e., having the same meaning)?

Pair 2452

P1: The wreck is a Protected Wreck managed by Historic England. The wreck. The site consists of the remains of a **large wreck**, probably Swedish, a cargo vessel dating from some time after its coinage of 1787. To bear such coinage only it may have been wrecked at latest about twenty years later.

P2: The wreck is a Protected Wreck managed by Historic England. The wreck. The site consists of the remains of a **big debris**, probably Swedish, a cargo vessel dating from some time after its coinage of 1787. To bear such coinage only it may have been wrecked at latest about twenty years later.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **large wreck** and **big debris** interchangeable (i.e., having the same meaning)?

Pair 2453

P1: Hincmar of Reims, who speaks of Hilduin with great respect, was one his students at the school of Saint-Denis. Dungal of Bobbio and possibly Otrid of Weissenburg served under him. "Hilduin was concerned with the **accurate production** of manuscripts", and oversaw the scriptorium at Saint-Denis. The Abbey had a substantial library.

P2: Hincmar of Reims, who speaks of Hilduin with great respect, was one his students at the school of Saint-Denis. Dungal of Bobbio and possibly Otrid of Weissenburg served under him. "Hilduin was concerned with the **correct reproduction** of manuscripts", and oversaw the scriptorium at Saint-Denis. The Abbey had a substantial library.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **accurate production** and **correct reproduction** interchangeable (i.e., having the same meaning)?

Pair 2454

P1: The most common types of electronic DACs are: Performance. The most important characteristics of a DAC are: Other measurements, such as phase distortion and jitter, can also be very important for some applications, some of which (e.g. **wireless data transmission, composite video**) may even "rely" on **accurate production** of phase-adjusted signals. Non-linear PCM encodings (A-law / -law, ADPCM, NICAM) attempt to improve their effective dynamic ranges by using logarithmic step sizes between the output signal strengths represented by each data bit.

P2: The most common types of electronic DACs are: Performance. The most important characteristics of a DAC are: Other measurements, such as phase distortion and jitter, can also be very important for some applications, some of which (e.g. **wireless data transmission, composite video**) may even "rely" on **precise replica** of phase-adjusted signals. Non-linear PCM encodings (A-law / -law, ADPCM, NICAM) attempt to improve their effective dynamic ranges by using logarithmic step sizes between the output signal strengths represented by each data bit.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **accurate production** and **precise replica** interchangeable (i.e., having the same meaning)?

Pair 2455

P1: Other versions. A version of the Fatal Five appeared in Tangent Comics, where the team is composed of the Tangent Comics versions of Ice, the Shadow Thief, Kid Psycho, Deathstroke and Count Viper. They next appear in a flashback in the "Tangent: Superman's Reign" miniseries (2008), in which they are shown to have slaughtered the **second atom**. This version of the Fatal Five exist on Earth-97 of the old Multiverse, which has been reborn as Earth-9 of the new

Multiverse.

P2: Other versions. A version of the Fatal Five appeared in Tangent Comics, where the team is composed of the Tangent Comics versions of Ice, the Shadow Thief, Kid Psycho, Deathstroke and Count Viper. They next appear in a flashback in the "Tangent: Superman's Reign" miniseries (2008), in which they are shown to have slaughtered the superhero name. This version of the Fatal Five exist on Earth-97 of the old Multiverse, which has been reborn as Earth-9 of the new Multiverse.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **second atom** and **superhero name** interchangeable (i.e., having the same meaning)?

Pair 2456

P1: If one atom is sent into the setup in its ground state formula_57 and passed through the first interaction zone, the state would become a superposition of ground and excited states formula_58 , just as it would with a regular Ramsey interferometer. It then passes through the quantum cavity, which initially contains only a vacuum, and then is measured to be formula_57 or formula_60 . A **second atom** initially in formula_57 is then sent through the cavity and then through the phase-shifted second Ramsey interaction zone. If the first atom is measured to be in formula_57 , then the probability that the second atom is in formula_60 depends on the amount of time between sending in the first and the second atoms.

P2: If one atom is sent into the setup in its ground state formula_57 and passed through the first interaction zone, the state would become a superposition of ground and excited states formula_58 , just as it would with a regular Ramsey interferometer. It then passes through the quantum cavity, which initially contains only a vacuum, and then is measured to be formula_57 or formula_60 . A **building block** initially in formula_57 is then sent through the cavity and then through the phase-shifted second Ramsey interaction zone. If the first atom is measured to be in formula_57 , then the probability that the second atom is in formula_60 depends on the amount of time between sending in the first and the second atoms.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **second atom** and **building block** interchangeable (i.e., having the same meaning)?

Pair 2457

P1: Constituency profile. The constituency is slightly more elevated than the surrounding areas. **Barnet was once a narrow projection** of Hertfordshire into the county of Middlesex, and consisted of an agricultural market town. The town became well connected to central London by the London Underground network and is today prime suburbia, with many of its properties semi-detached with substantial gardens as well as having many small parks and nature reserves.

P2: Constituency profile. The constituency is slightly more elevated than the surrounding areas. **Barnet was once a thin inlet** of Hertfordshire into the county of Middlesex, and consisted of an agricultural market town. The town became well connected to central London by the London Underground network and is today prime suburbia, with many of its properties semi-detached with substantial gardens as well as having many small parks and nature reserves.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **narrow projection** and **thin inlet** interchangeable (i.e., having the same meaning)?

Pair 2458

P1: "E!" reported that Penn had signed on as a regular on the show along with Olivia Wilde and Peter Jacobson and this was confirmed in the plot of the episode "Games". **Penn continued with the series through to the episode "simple explanation"**, which aired April 6, 2009. He made an additional appearance as Lawrence Kutner on the fifth-season finale, "Both Sides Now", that aired on May 11, 2009.

P2: "E!" reported that Penn had signed on as a regular on the show along with Olivia Wilde and Peter Jacobson and this was confirmed in the plot of the episode "Games". Penn continued with the series through to the episode "episode name", which aired April 6, 2009. He made an additional appearance as Lawrence Kutner on the fifth-season finale, "Both Sides Now", that aired on May 11, 2009.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **simple explanation** and **episode name** interchangeable (i.e., having the same meaning)?

Pair 2459

P1: At Hotel Real a clash between opponents and supporters of Morales and police took place; opposition groups were attacked with tear gas by the police. Dozens were wounded, including the rector of the Higher University of San Andrés (UMSA), Waldo Albarracín, who was taken to the UMSA hospital. Subsequently, the **computing center** at the Hotel Presidente suspended the vote count due to the protests that were in place. Four departmental electoral tribunals suspended the vote counting made by the TREP due to protests by citizens registered outside the computing centers.

P2: At Hotel Real a clash between opponents and supporters of Morales and police took place; opposition groups were attacked with tear gas by the police. Dozens were wounded, including the rector of the Higher University of San Andrés (UMSA), Waldo Albarracín, who was taken to the UMSA hospital. Subsequently, the **technology HQ** at the Hotel Presidente suspended the vote count due to the protests that were in place. Four departmental electoral tribunals suspended the vote counting made by the TREP due to protests by citizens registered outside the computing centers.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **computing center** and **technology HQ** interchangeable (i.e., having the same meaning)?

Pair 2460

P1: In 1985, Mera-Elzab submitted to the Ministry of Education a proposal to create a network version of a computer for Polish schools. In this configuration, the Meritum II computer with a connected disk drive would act as a server, student computers were based on Meritum I. The network project was developed by scientists from the **computing center** of the Silesian University of Technology. Finally, the Ministry rejected the offer.

P2: In 1985, Mera-Elzab submitted to the Ministry of Education a proposal to create a network version of a computer for Polish schools. In this configuration, the Meritum II computer with a connected disk drive would act as a server, student computers were based on Meritum I. The network project was developed by scientists from the **building name** of the Silesian University of Technology. Finally, the Ministry rejected the offer.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **computing center** and **building name** interchangeable (i.e., having the same meaning)?

Pair 2461

P1: History. This work is considered to be a work of sophistry or political strategy which aimed to win support from inconsistently-anti-slavery or "fence-sitting" Northerners whose sympathies were squarely on the side of the Constitution, but who opposed slavery on a mixed and inconsistent basis (Spooner believed that the Constitution was "of no Authority," as his later essay "No Treason Volume VI: The Constitution of No Authority" revealed). As a **strategic approach**, it was adopted by Frederick Douglass, who delivered its core message to thousands of Northerners in his speeches and writings. This greatly legitimized the abolitionist message, making it far more effective than it had been under Garrison's more "anarchic" message.

P2: History. This work is considered to be a work of sophistry or political strategy which aimed to win support from inconsistently-anti-slavery or "fence-sitting" Northerners whose sympathies were squarely on the side of the Constitution,

but who opposed slavery on a mixed and inconsistent basis (Spooner believed that the Constitution was "of no Authority," as his later essay "No Treason Volume VI: The Constitution of No Authority" revealed). As a **crucial method**, it was adopted by Frederick Douglass, who delivered its core message to thousands of Northerners in his speeches and writings. This greatly legitimized the abolitionist message, making it far more effective than it had been under Garrison's more "anarchic" message.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **strategic approach** and **crucial method** interchangeable (i.e., having the same meaning)?

Pair 2462

P1: It identifies the possible areas of risk and assures that the proper approach is used. Then operational risk management will insure that steps for minimizing or eliminating the risk are followed. A **strategic approach** of the risk management includes studying the environment and being aware of the issues that must be considered in any situation. Risks can occur due to a range of unexpected possible and potential events outside of the organisation's control, such as: political instability, change in currency, changes of the weather which could lead to a change in customer behavior, etc.

P2: It identifies the possible areas of risk and assures that the proper approach is used. Then operational risk management will insure that steps for minimizing or eliminating the risk are followed. A **critical procedure** of the risk management includes studying the environment and being aware of the issues that must be considered in any situation. Risks can occur due to a range of unexpected possible and potential events outside of the organisation's control, such as: political instability, change in currency, changes of the weather which could lead to a change in customer behavior, etc.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **strategic approach** and **critical procedure** interchangeable (i.e., having the same meaning)?

Pair 2463

P1: Fully muffled bell ringing is very rare as the loud and soft effect is lost. An excellent example of this was demonstrated with the bells of Westminster Abbey at the Funeral of Diana, Princess of Wales in 1997. The accompanying picture shows a half-muffled full-circle bell, with the bell in the **inverted position** (or the "up" position). The clapper is shown resting on the lower side of the bell's soundbow, and when it first rotates (to the right in the picture) the un-muffled side of the clapper will strike when the bell rises to the inverted position and the clapper is moving faster and crosses to the other side.

P2: Fully muffled bell ringing is very rare as the loud and soft effect is lost. An excellent example of this was demonstrated with the bells of Westminster Abbey at the Funeral of Diana, Princess of Wales in 1997. The accompanying picture shows a half-muffled full-circle bell, with the bell in the **upside down placement** (or the "up" position). The clapper is shown resting on the lower side of the bell's soundbow, and when it first rotates (to the right in the picture) the un-muffled side of the clapper will strike when the bell rises to the inverted position and the clapper is moving faster and crosses to the other side.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **inverted position** and **upside down placement** interchangeable (i.e., having the same meaning)?

Pair 2464

P1: As the "Thylacoleo" is believed to have become extinct 45,000–46,000 years ago, this suggests a similar age for the associated Gwion Gwion art. Archaeologist Kim Akerman however believes that the megafauna may have persisted later in wetter areas of the continent as suggested by Wells, and has suggested an age of 15,000 to 22,000 years for the paintings. Recent advances in dating methods may shed light on the age of the paintings and gain a more **accurate result**. Neuroscientist Jack Pettigrew has proposed dating the art by using DNA sequencing extracted from colonies of microorganisms

which have replaced the pigment in some paintings.

P2: As the "Thylacoleo" is believed to have become extinct 45,000–46,000 years ago, this suggests a similar age for the associated Gwion Gwion art. Archaeologist Kim Akerman however believes that the megafauna may have persisted later in wetter areas of the continent as suggested by Wells, and has suggested an age of 15,000 to 22,000 years for the paintings. Recent advances in dating methods may shed light on the age of the paintings and gain a more telling extrapolation. Neuroscientist Jack Pettigrew has proposed dating the art by using DNA sequencing extracted from colonies of microorganisms which have replaced the pigment in some paintings.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are accurate result and telling extrapolation interchangeable (i.e., having the same meaning)?

Pair 2465

P1: In the press conference announcing the termination, Arkansas Athletic Director Jeff Long said, "(Petrino) made the decision to mislead the public, (and it) adversely affected the university and the football program." In Petrino's place, Assistant Coach Taver Johnson will serve as interim coach through the end of spring practice. After the firing of Bobby Petrino in April 2012, there was considerable media speculation that Smith would return to Arkansas. This was confirmed on April 23 when multiple media outlets reported that Smith had indeed agreed to succeed Petrino.

P2: In the press conference announcing the termination, Arkansas Athletic Director Jeff Long said, "(Petrino) made the decision to mislead the public, (and it) adversely affected the university and the football program." In Petrino's place, Assistant Coach Taver Johnson will serve as interim coach through the end of spring practice. After the firing of Bobby Petrino in April 2012, there was good amount of questioning that Smith would return to Arkansas. This was confirmed on April 23 when multiple media outlets reported that Smith had indeed agreed to succeed Petrino.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are considerable media speculation and good amount of questioning interchangeable (i.e., having the same meaning)?

Pair 2466

P1: Both members were involved with the making of the most recent Gutterball outing, but the rumors say that Hott has left that group as well and been replaced by the drummer for The dB's. Bryan Harvey completed a solo album in early 1997, which remains unreleased. Gutterball is still considered to be an open project by the people involved; however, no plans have been made to record new material. Bryan along with his wife Kathryn Harvey (née Grabinsky, born November 28, 1966, age 39), maternal half-sister of actor Steven Culp, and their two daughters Stella (b. November 3, 1996, age 9) and Ruby (b. July 4, 2001, age 4) on January 1, 2006 were victims of the 2006 Richmond spree murders.

P2: Both members were involved with the making of the most recent Gutterball outing, but the rumors say that Hott has left that group as well and been replaced by the drummer for The dB's. Bryan Harvey completed a solo album in early 1997, which remains unreleased. Gutterball is still considered to be an ongoing ordeal by the people involved; however, no plans have been made to record new material. Bryan along with his wife Kathryn Harvey (née Grabinsky, born November 28, 1966, age 39), maternal half-sister of actor Steven Culp, and their two daughters Stella (b. November 3, 1996, age 9) and Ruby (b. July 4, 2001, age 4) on January 1, 2006 were victims of the 2006 Richmond spree murders.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are open project and ongoing ordeal interchangeable (i.e., having the same meaning)?

Pair 2467

P1: The Vodafone Foundation Germany along with the Federal Ministry of Family Affairs, Senior Citizens, Women and Youth supports research projects for the further development of SRS. In addition, the creation of an English Version of SRS has been supported by the Social Impact Analysts Association (SIAA). The reporting standard is an open project

under the Creative Commons licence and all interested social organisations in Germany can participate. In addition to further developing the standard, a dialogue on entrepreneurial thinking and impact-oriented actions to increase common welfare should also be established.

P2: The Vodafone Foundation Germany along with the Federal Ministry of Family Affairs, Senior Citizens, Women and Youth supports research projects for the further development of SRS. In addition, the creation of an English Version of SRS has been supported by the Social Impact Analysts Association (SIAA). The reporting standard is an evolving work in progress under the Creative Commons licence and all interested social organisations in Germany can participate. In addition to further developing the standard, a dialogue on entrepreneurial thinking and impact-oriented actions to increase common welfare should also be established.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **open project** and **evolving work in progress** interchangeable (i.e., having the same meaning)?

Pair 2468

P1: 1609 King Charles seems to have forgotten his earlier anger and distrust to Sorolainen. Sorolainen was also a noted writer, publishing his first work in 1614. He translated into Finnish the **service book** of 1614, wrote a large catechism (1614). Between 1621 and 1625 he published a book of sermons in Stockholm entitled "Postilla".

P2: 1609 King Charles seems to have forgotten his earlier anger and distrust to Sorolainen. Sorolainen was also a noted writer, publishing his first work in 1614. He translated into Finnish the **help guide** of 1614, wrote a large catechism (1614). Between 1621 and 1625 he published a book of sermons in Stockholm entitled "Postilla".

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **service book** and **help guide** interchangeable (i.e., having the same meaning)?

Pair 2469

P1: He also won gold medals with the Hungarian team at the 1933, 1935 and 1937 International University Games as well as the unofficial, German-led 1939 International University Games. He was able to escape post-war Soviet-occupied Hungary when his engineering degree earned him a teaching fellowship at an American university. He went on to establish and grow a successful architecture and **engineering practice** in San Francisco, California. Tarics attended the 2012 London Olympics as the oldest living Olympic champion and turned 100 in September 2013.

P2: He also won gold medals with the Hungarian team at the 1933, 1935 and 1937 International University Games as well as the unofficial, German-led 1939 International University Games. He was able to escape post-war Soviet-occupied Hungary when his engineering degree earned him a teaching fellowship at an American university. He went on to establish and grow a successful architecture and **manufacturing work** in San Francisco, California. Tarics attended the 2012 London Olympics as the oldest living Olympic champion and turned 100 in September 2013.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **engineering practice** and **manufacturing work** interchangeable (i.e., having the same meaning)?

Pair 2470

P1: Actually, it's not even past," a paraphrasing of an often-quoted line from Faulkner's 1950 book "Requiem for a Nun" ("The past is never dead. It's not even past. "), claiming that the paraphrasing was an **unlicensed use** of the estate. Faulkner is directly credited in the dialogue when Gil claims to have met the writer at a dinner party (though Faulkner is never physically portrayed in the film).

P2: Actually, it's not even past," a paraphrasing of an often-quoted line from Faulkner's 1950 book "Requiem for a Nun" ("The past is never dead. It's not even past. "), claiming that the paraphrasing was an **unofficial practice** of the

estate. Faulkner is directly credited in the dialogue when Gil claims to have met the writer at a dinner party (though Faulkner is never physically portrayed in the film).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **unlicensed use** and **unofficial practice** interchangeable (i.e., having the same meaning)?

Pair 2471

P1: A typical pommel horse exercise involves both single leg and double leg work. Single leg skills are generally in the form of scissors. **Double leg work however, is the main staple of this event.** The gymnast swings both legs in a circular motion (clockwise or counterclockwise depending on preference) and performs such skills on all parts of the apparatus.

P2: A typical pommel horse exercise involves both single leg and double leg work. Single leg skills are generally in the form of scissors. **Double leg work however, is the primary focus of this event.** The gymnast swings both legs in a circular motion (clockwise or counterclockwise depending on preference) and performs such skills on all parts of the apparatus.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **main staple** and **primary focus** interchangeable (i.e., having the same meaning)?

Pair 2472

P1: by dasypeltes, boomslangs, monitor lizards like savannah and Nile monitors, baboons, civets, and mongooses. The African harrier-hawk likewise sometimes robs the nests, holding on to the entrance of the cavity with one claw and grabbing the nestlings with the other. **The mentioned predators mostly capture eggs and fledgling birds, while adult birds may be hunted by eagles, hawks, falcons, and sparrowhawks of appropriate size.** The most common ectoparasites found on Poicephalus parrots are feather mites and bird lice that live on the birds' feathers and skin.

P2: by dasypeltes, boomslangs, monitor lizards like savannah and Nile monitors, baboons, civets, and mongooses. The African harrier-hawk likewise sometimes robs the nests, holding on to the entrance of the cavity with one claw and grabbing the nestlings with the other. **The mentioned predators mostly capture eggs and fledgling birds, while adult birds may be hunted by eagles, hawks, falcons, and sparrowhawks of agreeable proportion.** The most common ectoparasites found on Poicephalus parrots are feather mites and bird lice that live on the birds' feathers and skin.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **appropriate size** and **agreeable proportion** interchangeable (i.e., having the same meaning)?

Pair 2473

P1: In 1995, Detective Sergeant Don Beech joined the ranks of Sun Hill, later causing the removal of the CID team in 2000. During 1997, The Bill underwent a series of changes. **"The Bill's" ratings were challenged by BBC One who introduced a number of docusoaps such as "driving school".** Michael Chapman, having been Executive Producer since 1989, handed over to Richard Handford.

P2: In 1995, Detective Sergeant Don Beech joined the ranks of Sun Hill, later causing the removal of the CID team in 2000. During 1997, The Bill underwent a series of changes. **"The Bill's" ratings were challenged by BBC One who introduced a number of docusoaps such as "TV show".** Michael Chapman, having been Executive Producer since 1989, handed over to Richard Handford.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **driving school** and **TV show** interchangeable (i.e., having the same meaning)?

Pair 2474

P1: The curriculum required four years of English and Theology, one year of Western Civilization, two years of American History, three years of Natural Science, three years of Mathematics, two years of a modern or classical language, and a physical education course each year. Many electives were also offered, such as art and music (several), Journalism, QBASIC, C++ Programming, Law Education, Accounting, Survey of Dramatic Literature, Environmental Science, and Statistics. Many AP courses were offered, in subjects such as English Literature, American History, **american government**, Chemistry, Java Programming, Psychology, and Studio Art. Bishop Hoban maintained a cooperative agreement with Wilkes University to allow interested, qualified students to pursue college-level Calculus courses there during their senior year.

P2: The curriculum required four years of English and Theology, one year of Western Civilization, two years of American History, three years of Natural Science, three years of Mathematics, two years of a modern or classical language, and a physical education course each year. Bishop Hoban maintained a cooperative agreement with Wilkes University to allow interested, qualified students to pursue college-level Calculus courses there during their senior year.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **american government** and **AP course** interchangeable (i.e., having the same meaning)?

Pair 2475

P1: Another source of anxiety is her relationship with her current boyfriend, Riley, whom she finds plotting world domination with Adam in his original, human, form. She fears what Riley could turn into as a result of his alliance with the military. She also fears the **destabilizing effect** of this alliance on their relationship, and the destabilizing effect of this relationship on her life as the slayer. She is shown putting mud on her face, mimicking the mud mask of the primal, First Slayer.

P2: Another source of anxiety is her relationship with her current boyfriend, Riley, whom she finds plotting world domination with Adam in his original, human, form. She fears what Riley could turn into as a result of his alliance with the military. She also fears the **live-streamed discussion** of this alliance on their relationship, and the destabilizing effect of this relationship on her life as the slayer. She is shown putting mud on her face, mimicking the mud mask of the primal, First Slayer.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **destabilizing effect** and **live-streamed discussion** interchangeable (i.e., having the same meaning)?

Pair 2476

P1: The sensor is activated only by BB hits, and once activated, will show a red light, and activate a sound to register a hit. The equipment also registers the time of the hit. **Airsoft is not registered as an organised sport**, although there are official Airsoft and paintball arenas. Airsoft players in UAE typically play with Airsoft guns with a round speed under 450 FPS (feet per second).

P2: The sensor is activated only by BB hits, and once activated, will show a red light, and activate a sound to register a hit. The equipment also registers the time of the hit. **Airsoft is not registered as an administered activity**, although there are official Airsoft and paintball arenas. Airsoft players in UAE typically play with Airsoft guns with a round speed under 450 FPS (feet per second).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **organised sport** and **administered activity** interchangeable (i.e., having the same

meaning)?

Pair 2477

P1: Walkers on St Cuthbert's Way through the village on pilgrimage from Melrose to Lindisfarne see the same view of the Eildon Hills as was seen by such men as Modan who established a religious cell at Dryburgh; Aidan who brought twelve young monks from Lindisfarne to Old Melrose as missionaries; Cuthbert who became prior and bishop and Boisil who, after a life of holiness and healing gave his name to the village and parish of St Boswells. Sports. **St Boswells is one of the Borders' more active villages regarding organised sport.** Perhaps unusually for Scotland, part of the Green was given over to cricket.

P2: Walkers on St Cuthbert's Way through the village on pilgrimage from Melrose to Lindisfarne see the same view of the Eildon Hills as was seen by such men as Modan who established a religious cell at Dryburgh; Aidan who brought twelve young monks from Lindisfarne to Old Melrose as missionaries; Cuthbert who became prior and bishop and Boisil who, after a life of holiness and healing gave his name to the village and parish of St Boswells. Sports. **St Boswells is one of the Borders' more active villages regarding official exercise.** Perhaps unusually for Scotland, part of the Green was given over to cricket.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **organised sport** and **official exercise** interchangeable (i.e., having the same meaning)?

Pair 2478

P1: Historic estates. Wrafton. **Wrafton is a large hamlet narrowly separated by a small field from edge of the main local village centre, that of Braunton to the west.** It is the location of Wrafton Laboratories, the division of over-the-counter preparations and contract medications producer Perrigo UK, manufacturer for Bayer UK of Germolene.

P2: Historic estates. Wrafton. **Wrafton is a large hamlet narrowly separated by a tiny region from edge of the main local village centre, that of Braunton to the west.** It is the location of Wrafton Laboratories, the division of over-the-counter preparations and contract medications producer Perrigo UK, manufacturer for Bayer UK of Germolene.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **small field** and **tiny region** interchangeable (i.e., having the same meaning)?

Pair 2479

P1: Upon its introduction, giant slalom briefly displaced the combined event at the world championships; it was absent in 1950 and 1952. The combined returned in 1954 in Åre, Sweden, but as a "paper race," using the results of the three events (downhill, giant slalom, and slalom), a format used through 1980. **The combined returned as a stand-alone event at the world championships in 1982 at Schladming, Austria, and at the 1988 Calgary Olympics.** It was changed to the super-combined format (one run of slalom on same day as downhill) at the world championships in 2007 and the Olympics in 2010.

P2: Upon its introduction, giant slalom briefly displaced the combined event at the world championships; it was absent in 1950 and 1952. The combined returned in 1954 in Åre, Sweden, but as a "paper race," using the results of the three events (downhill, giant slalom, and slalom), a format used through 1980. **The combined returned as a singular occurrence at the world championships in 1982 at Schladming, Austria, and at the 1988 Calgary Olympics.** It was changed to the super-combined format (one run of slalom on same day as downhill) at the world championships in 2007 and the Olympics in 2010.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **stand-alone event** and **singular occurrence** interchangeable (i.e., having the same meaning)?

Pair 2480

P1: Kim then appointed Lee as Deputy Chairman, which made him as the youngest person to hold the position in South Korea. 1980s. Lee was banned from politics by new military of Chun Doo-hwan in 1980, therefore unable to run in 1981 election. His constituency was then taken over by Park Kwan-yong, Lee's secretary, and Kim Jin-jae.

P2: Kim then appointed Lee as Deputy Chairman, which made him as the youngest person to hold the position in South Korea. 1980s. Lee was banned from politics by Korean army of Chun Doo-hwan in 1980, therefore unable to run in 1981 election. His constituency was then taken over by Park Kwan-yong, Lee's secretary, and Kim Jin-jae.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are new military and Korean army interchangeable (i.e., having the same meaning)?

Pair 2481

P1: The Department of Defense has collaborated with positive psychology scientists to create the Comprehensive Soldier Fitness program for members of the Army. More recently, the Family Skills Component of this program has been released for use by family members in the military. new military, government, and public health initiatives are focused on fostering and promoting resilience in the military family overall. Initial results from pilot studies show that those who are resilient can better cope with stressors and are less likely to suffer from depression or alcohol use.

P2: The Department of Defense has collaborated with positive psychology scientists to create the Comprehensive Soldier Fitness program for members of the Army. More recently, the Family Skills Component of this program has been released for use by family members in the military. emerging defense, government, and public health initiatives are focused on fostering and promoting resilience in the military family overall. Initial results from pilot studies show that those who are resilient can better cope with stressors and are less likely to suffer from depression or alcohol use.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are new military and emerging defense interchangeable (i.e., having the same meaning)?

Pair 2482

P1: Their introduction of PVC coated fly lines was largely responsible for the decline of the old line sizing system that used letters—HCH—to designate the taper and weight of silk fly lines. Because PVC coated lines were significantly different from silk lines, a new system evolved that identified lines with their grain weight in the first 30 feet of line (i.e. 5 wgt) and a two letter designation—DT (double taper), (ST-Single Taper) or (WF-Weight Forward) to identify the line taper. Scientific Anglers is subsidiary of Orvis, and currently has a design lab in Midland, Michigan.

P2: Their introduction of PVC coated fly lines was largely responsible for the decline of the old line sizing system that used letters—HCH—to designate the taper and weight of silk fly lines. Because PVC coated lines were significantly different from silk lines, a new system evolved that identified lines with their grain weight in the first 30 feet of line (i.e. 5 wgt) and a two letter designation—DT (dual lines), (ST-Single Taper) or (WF-Weight Forward) to identify the line taper. Scientific Anglers is subsidiary of Orvis, and currently has a design lab in Midland, Michigan.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are double taper and dual lines interchangeable (i.e., having the same meaning)?

Pair 2483

P1: At one time there were only two lights. The "Sarum Consuetudinary" (about the year 1210) says: "Let the candle upon the reed be lighted, and let another candle be lighted at the same time, so that the candle upon the reed can be rekindled if it should chance to be blown out". A miniature of the eleventh century shows the Paschal Candle being lighted

from a **double taper**. triple candle appears first in the twelfth and fourteenth Ordines Romani, about the twelfth century.

P2: At one time there were only two lights. The "Sarum Consuetudinary" (about the year 1210) says: "Let the candle upon the reed be lighted, and let another candle be lighted at the same time, so that the candle upon the reed can be rekindled if it should chance to be blown out". A miniature of the eleventh century shows the Paschal Candle being lighted from a **couple of drapes**. triple candle appears first in the twelfth and fourteenth Ordines Romani, about the twelfth century.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **double taper** and **couple of drapes** interchangeable (i.e., having the same meaning)?

Pair 2484

P1: In addition, his measurements reveal that his shed is also too wide and too long. Terry suggests that a chainsaw be taken to Terry's shed so that it can come out in four pieces (after telling everyone of having quartered a moose with a chainsaw), for which Jill is happy to oblige. The shed is cut front to back with the chainsaw, and the **front half** is cut again, only to find the second cut unnecessary. The rear half of the shed is taken out, but the roof is also taken off (so indeed, Terry's "Bud Shed" is in four pieces).

P2: In addition, his measurements reveal that his shed is also too wide and too long. Terry suggests that a chainsaw be taken to Terry's shed so that it can come out in four pieces (after telling everyone of having quartered a moose with a chainsaw), for which Jill is happy to oblige. The shed is cut front to back with the chainsaw, and the **forward part** is cut again, only to find the second cut unnecessary. The rear half of the shed is taken out, but the roof is also taken off (so indeed, Terry's "Bud Shed" is in four pieces).

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **front half** and **forward part** interchangeable (i.e., having the same meaning)?

Pair 2485

P1: With the first course, each guest at the table begins by using the tableware placed on the outside of place setting. As each course is finished the guest leaves the used cutlery on the used plate or bowl, which are removed from the table by the server. In some case, the original set is kept for the **next course**. To begin the next course, the diner uses the next item on the outside of the place setting, and so on.

P2: With the first course, each guest at the table begins by using the tableware placed on the outside of place setting. As each course is finished the guest leaves the used cutlery on the used plate or bowl, which are removed from the table by the server. In some case, the original set is kept for the **ensuing meal**. To begin the next course, the diner uses the next item on the outside of the place setting, and so on.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **next course** and **ensuing meal** interchangeable (i.e., having the same meaning)?

Pair 2486

P1: Various techniques for doing that have been suggested, at the network layer, above the network layer (see Shim6), or by using multipath techniques at the higher layers (see Multipath TCP and Multipath Mosh). Support in routing protocols. On a network with a single edge router, it is possible to implement source-specific routing by **manual manipulation** of routing tables. With multiple routers, explicit support for source-specific routing is required in the routing protocol.

P2: Various techniques for doing that have been suggested, at the network layer, above the network layer (see Shim6), or by using multipath techniques at the higher layers (see Multipath TCP and Multipath Mosh). Support in routing protocols. On a network with a single edge router, it is possible to implement source-specific routing by **digital change** of routing tables. With multiple routers, explicit support for source-specific routing is required in the routing protocol.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **manual manipulation** and **digital change** interchangeable (i.e., having the same meaning)?

Pair 2487

P1: The protest, which spread over 129 days, was quickly politicized and marked an inflection point in her administration. The system was finally rejected in the Senate by an opposing vote by the Vice President Julio Cobos. **The political style of the government changed in 2010 with the death of Néstor Kirchner.** President Cristina Fernández de Kirchner slowly distanced herself from the traditional structure of the Justicialist Party and favored instead "La Cámpora", a group of young supporters led by her eldest son Máximo Kirchner.

P2: The protest, which spread over 129 days, was quickly politicized and marked an inflection point in her administration. The system was finally rejected in the Senate by an opposing vote by the Vice President Julio Cobos. **The civic mode of the government changed in 2010 with the death of Néstor Kirchner.** President Cristina Fernández de Kirchner slowly distanced herself from the traditional structure of the Justicialist Party and favored instead "La Cámpora", a group of young supporters led by her eldest son Máximo Kirchner.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **political style** and **civic mode** interchangeable (i.e., having the same meaning)?

Pair 2488

P1: Leadership style refers to a leader's behavior. It is the result of the philosophy, personality, and experience of the leader. **Rhetoric specialists have also developed models for understanding leadership (Robert Hariman, "political style", Philippe-Joseph Salazar, "L'Hyperpolitique. Technologies politiques De La Domination").**

P2: Leadership style refers to a leader's behavior. It is the result of the philosophy, personality, and experience of the leader. **Rhetoric specialists have also developed models for understanding leadership (Robert Hariman, "bureaucratic publication", Philippe-Joseph Salazar, "L'Hyperpolitique. Technologies politiques De La Domination").**

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **political style** and **bureaucratic publication** interchangeable (i.e., having the same meaning)?

Pair 2489

P1: The short is one of several satirical takes on Superman produced during World War II. The purpose of the short was to entertain and educate low-literacy enlisted men. **Snafu ends up doing the wrong thing because of his refusal to read his field manual.** The short uses a segment of the Sammy Timberg's Superman theme song, which was previously heard in the Superman shorts by Fleischer Studios and Famous Studios.

P2: The short is one of several satirical takes on Superman produced during World War II. The purpose of the short was to entertain and educate low-literacy enlisted men. **Snafu ends up doing the wrong thing because of his refusal to read his job instructions.** The short uses a segment of the Sammy Timberg's Superman theme song, which was previously heard in the Superman shorts by Fleischer Studios and Famous Studios.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **field manual** and **job instructions** interchangeable (i.e., having the same meaning)?

Pair 2490

P1: Restraint is distinct from isolationism: isolationists favor restricting trade and immigration and tend to believe that events in the outside world have little impact within the United States. As already noted, it is sometimes confused with non-interventionism. Restraint, however, sees economic dynamism as a **key source** of national power and accordingly tends to argue for a relatively open trade system. Some restrainers call for supporting this trade system via significant naval patrols; others suggest that the international economy is resilient against disruptions and, with rare exceptions, does not require a powerful state to guarantee the security of global trade.

P2: Restraint is distinct from isolationism: isolationists favor restricting trade and immigration and tend to believe that events in the outside world have little impact within the United States. As already noted, it is sometimes confused with non-interventionism. Restraint, however, sees economic dynamism as a **main authority** of national power and accordingly tends to argue for a relatively open trade system. Some restrainers call for supporting this trade system via significant naval patrols; others suggest that the international economy is resilient against disruptions and, with rare exceptions, does not require a powerful state to guarantee the security of global trade.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **key source** and **main authority** interchangeable (i.e., having the same meaning)?

Pair 2491

P1: Products and services. Core Molding Technologies specializes in large-format moldings and provides fiberglass processes, such as compression molding process (SMC, GMT), spray-up, hand lay-up, resin transfer molding (RTM), and reaction injection molding (RIM). Core Molding Technologies mainly produced fiber reinforced plastics and plastic composites such as shielding, **vehicle roofs**, hoods and so on. Besides, it also provides services for manufacturing and product development, such as custom material formulations, composite mold construction, design for manufacturability and so on.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **vehicle roofs** and **car tops** interchangeable (i.e., having the same meaning)?

Pair 2492

P1: Tripods are used by those seeking crisp professional photo and video imagery and also enable chasers to tend to other activities. Other accessories include cable/remote shutter releases, lightning triggers, and lens filters. Windshield mounted cameras or dome enclosed cameras atop **vehicle roofs** may also be used, and a few chasers use UAVs ("drones"). Late in the 2000s smartphones increased in usage, with radar viewing applications frequently used.

P2: Tripods are used by those seeking crisp professional photo and video imagery and also enable chasers to tend to other activities. Other accessories include cable/remote shutter releases, lightning triggers, and lens filters. Windshield mounted cameras or dome enclosed cameras atop **sedan domes** may also be used, and a few chasers use UAVs ("drones"). Late in the 2000s smartphones increased in usage, with radar viewing applications frequently used.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **vehicle roofs** and **sedan domes** interchangeable (i.e., having the same meaning)?

Pair 2493

P1: Peer review is the evaluation of work by one or more people with similar competencies as the producers of the work (peers). It functions as a form of self-regulation by qualified members of a profession within the relevant field. Peer review methods are used to maintain **quality standards**, improve performance, and provide credibility. In academia,

scholarly peer review is often used to determine an academic paper's suitability for publication.

P2: Peer review is the evaluation of work by one or more people with similar competencies as the producers of the work (peers). It functions as a form of self-regulation by qualified members of a profession within the relevant field. Peer review methods are used to maintain **character requirements**, improve performance, and provide credibility. In academia, scholarly peer review is often used to determine an academic paper's suitability for publication.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **quality standards** and **character requirements** interchangeable (i.e., having the same meaning)?

Pair 2494

P1: The central character, Mariam, is the elegant, classy go-getter who is dating three men at a go. She is the envy of every girl in town, a master of the game who is living the dream life. Her best friend is Eva, a banker who is dating a **married man**, and has had a daughter by him. She is drowning in delusions, believing that the man is in love with her and will leave his wife for her.

P2: The central character, Mariam, is the elegant, classy go-getter who is dating three men at a go. She is the envy of every girl in town, a master of the game who is living the dream life. She is drowning in delusions, believing that the man is in love with her and will leave his wife for her.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **married man** and **husband figure** interchangeable (i.e., having the same meaning)?

Pair 2495

P1: Chapters 8 and 9 contain two letters to Moroni from his father, Mormon. The first talks about the beginnings of apostasy among the Nephites, focusing particularly on the practice of infant baptism. The **second details** the awful state of the Nephites and foreshadows their destruction. Chapter 10 contains Moroni's Promise and some advice for people in the present day.

P2: Chapters 8 and 9 contain two letters to Moroni from his father, Mormon. The first talks about the beginnings of apostasy among the Nephites, focusing particularly on the practice of infant baptism. The **runner-up explains** the awful state of the Nephites and foreshadows their destruction. Chapter 10 contains Moroni's Promise and some advice for people in the present day.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **second details** and **runner-up explains** interchangeable (i.e., having the same meaning)?

Pair 2496

P1: The Australian angelshark has a broad, vertically compressed body and large triangular pectoral fins with free trailing flaps. The snout has fringed barbels beside the nostrils and a pair of spiracles. Each of these is set at a distance from the eye of about **one and a half times** the diameter of the eye. There are two small dorsal fins set far back and the tail fin is small.

P2: The Australian angelshark has a broad, vertically compressed body and large triangular pectoral fins with free trailing flaps. The snout has fringed barbels beside the nostrils and a pair of spiracles. Each of these is set at a distance from the eye of about **almost twice** the diameter of the eye. There are two small dorsal fins set far back and the tail fin is small.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **one and a half times** and **almost twice** interchangeable (i.e., having the same meaning)?

Pair 2497

P1: These black slaves would summon their gods, called [[Orisha|Orixas]], Voduns or Inkices with chants and dances they had brought from Africa. These cults were persecuted throughout most of Brazilian history, largely because they were believed to be [[Paganism|pagan]] or even [[Satanism|satanic]]. However, the Brazilian [[republic]]an government legalized all of them on the grounds of the **necessary separation** between the State and the Church in 1889. In current practice, Umbanda followers leave offerings of food, candles and flowers in public places for the spirits.

P2: These black slaves would summon their gods, called [[Orisha|Orixas]], Voduns or Inkices with chants and dances they had brought from Africa. These cults were persecuted throughout most of Brazilian history, largely because they were believed to be [[Paganism|pagan]] or even [[Satanism|satanic]]. However, the Brazilian [[republic]]an government legalized all of them on the grounds of the **required disengagement** between the State and the Church in 1889. In current practice, Umbanda followers leave offerings of food, candles and flowers in public places for the spirits.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **necessary separation** and **required disengagement** interchangeable (i.e., having the same meaning)?

Pair 2498

P1: Providing an infant with table foods initiates the development of strong oral motor control for chewing and swallowing, including tongue lateralization and eventual bolus formation. When an infant mouths a food texture, the tongue lateralization reflex forces them to move their tongue to the side to lick and taste the food. Through **continued practice**, infants learn to volitionally lateralize their tongue—the first step in the development of a munching/chewing pattern. Baby led weaning can start as soon as 4 months.

P2: Providing an infant with table foods initiates the development of strong oral motor control for chewing and swallowing, including tongue lateralization and eventual bolus formation. When an infant mouths a food texture, the tongue lateralization reflex forces them to move their tongue to the side to lick and taste the food. Through **repeated habit**, infants learn to volitionally lateralize their tongue—the first step in the development of a munching/chewing pattern. Baby led weaning can start as soon as 4 months.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **continued practice** and **repeated habit** interchangeable (i.e., having the same meaning)?

Pair 2499

P1: Unlike them, Craber et al. (1985) failed to find any distinctive EEG changes in four men during masturbation and ejaculation; the authors concluded that the case for the existence of EEG changes specifically related to sexual arousal and orgasm remained unproven. So disagreement arises as to whether the experiment conducted by Mosovich & Tallaferrero casts a **new light** on the nature of orgasm. In some recent studies, authors tend to adopt the opposite point of view that there are no remarkable EEG changes during ejaculation in humans.

P2: Unlike them, Craber et al. (1985) failed to find any distinctive EEG changes in four men during masturbation and ejaculation; the authors concluded that the case for the existence of EEG changes specifically related to sexual arousal and orgasm remained unproven. So disagreement arises as to whether the experiment conducted by Mosovich & Tallaferrero casts a **shiny perspective** on the nature of orgasm. In some recent studies, authors tend to adopt the opposite point of view that there are no remarkable EEG changes during ejaculation in humans.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **new light** and **shiny perspective** interchangeable (i.e., having the same meaning)?

Pair 2500

P1: In many places in the archipelago, he was beloved. It is said that the people of Tapul built a mosque honouring him and that they claim descent from Karim ul-Makhdum. Thus, the success of Karim ul-Makhdum of spreading Islam in Sulu threw a **new light** in Islamic history in the Philippines. The customs, beliefs and political laws of the people changed and customised to adopt the Islamic tradition.

P2: In many places in the archipelago, he was beloved. It is said that the people of Tapul built a mosque honouring him and that they claim descent from Karim ul-Makhdum. Thus, the success of Karim ul-Makhdum of spreading Islam in Sulu threw a **novel viewpoint** in Islamic history in the Philippines. The customs, beliefs and political laws of the people changed and customised to adopt the Islamic tradition.

Please record your answer for the following question in the provided Google sheet

Question: In both passages, are **new light** and **novel viewpoint** interchangeable (i.e., having the same meaning)?
